positive, small ions, meas. by time-of-flight method 8=43474
sputtering, r. f., energy distrib. calc. 8=25687
Al, in plasma induced near crystal surface by laser 8=36051
Ar afterglow plasma, and conversion rates 8=43480
Ar, liquified, ion mobilities 8=48193
Au, in plasma induced near crystal surface by laser 8=36051
Cs vapour, Cs_2^+ diffusion, time-of-flight analysis rel. to conduction 8=43705
Cu, in plasma induced near crystal surface by laser 8=36051
in He afterglow, obs. 8=43448
He in afterglow plasma, obs. with Langmuir probe 8=43449
He liquid, rotating, trapped in vortex lines 8=37334
in He, of He$^+$ 8=38835
in He, p and α 8=38836
He, superfluid, mobility discontinuities, inadequacy of Huang-Olinto theory 8=41897
H$^+$, mass-identified, in H_2, drift mobility obs. 8=39033
H_3^+, mass-identified, in H_2, drift mobility obs. 8=39033
He^3, charge mobility at crit. point 8=41888
He^3 liquid, mobility obs. below 1°K 8=24039
$K_xNa_{1-x}Fe_7O_{11}$, ion mobility 8=48782
Li^{6,7} positive ions in LiF, relative difference between mobilities rel. to isotope self-diffusion effect 8=35500
Ne afterglow plasma, and conversion rates 8=43480
Ne$^+$ and Ne_2^+, mobility and reaction rate obs. 300°K 8=39049
electrolytic
See also Conductivity, electrical/liquids, electrolytic; Electrophoresis.
adsorption energy at Hg electrode 8=36600
cyclooctatetraenyl radical anion, electronic spectrum 8=25658
Raman spectra of aq. soln. 8=34863
p-phenylenediamine cations, dimerization 8=25657
$HNClO_3^-$, structure from i.r. absorpt. obs. 8=34247
NH_4-NH_4 proton exchange in liq. NH_3 8=27675
Ionization
See also Dissociation; Electrons/ionization.
acetaldehyde, by electron impact, dissoc. 8=39056
acetic acid, by electron impact, dissoc. 8=39056

Ionization—contd

- acetone, by electron inpact, dissoc. 8=39056
- acetonitrile, photoionization 8=47789
- alcohols, lower aliphatic, photoionization 8=47793
- alkali metal atoms by slow electrons 8=43477
- atom, by colliding with excited atom, formula without rotating-atom approx. 8=25706
- atom, by e impact, quantum theory 8=43470
- atoms during plasma heating for short-wave radiation amplification 8=47780
- atoms, Z=41-98, by electron impact, calc. 8=39013
- current measurement, fluctuation errors 8=42345
- diethylamine radical ($C_4H_{10}N$), at W surface 8=47794
- electron-impact dissoc., translational energies of products 8=38929
- elimination of CO_2 from ions in mass spectrometer 8=38607
- energies, semiempirical calc., isoelectronic atoms 8=47478
- field-ionization mass spectra 8=47796
- gauges and vacuum technique 8=30323
- hologen negative ions, electron energies from inert gas collisions 8=29972
- hydrocarbons, ion impact, charge and proton transfer 8=29984
- ionometer for continuous meas. on a fluid in the dispersed state 8=25709
- ion-polar mol. reactions, preferred dipole orientation 8=34444
- mechanisms, rel. to Alfven's critical vel. hypothesis 8=36989
- methanol-acetaldehyde mixtures, H atom and proton transfer 8=34444
- methyl phenanthrene, by electron impact 8=47797
- molecular plasma 8=43493
- molecules, photoionization and electron structure 8=47582
- multiple, Auger effect theory 8=39019
- organic compounds, metastable ion detector for mass spectra 8=43152
- organic molecules, energies in vapour state and in molec. cryst. 8=29947
- phenanthrene, by electron impact 8=47797
- photo and auto, parametrization for attenuation cross-sections in atoms 8=38684
- photoelectrons, ang. distrib. 8=25705
- plasma, magnetoactive, equilibrium with recombination 8=29993
- propylene, ion-mol. reactions 8=43492
- radiation prod. in arc discharge, optimum parameters 8=29930
- solar corona, revaluation of temp. 8=45923
- tetramethyl-p-phenylene diamine in soln, biphotonic ionization 8=43861
- total energy of atom 8=34439
- ArII multiplets, Stark broadening, temp. depend. 8=39028
- Be atom, photo-ionization cross-section near threshold, calc. 8=39029
- C^-, laser photodetachment, ang. depend 8=25713
- Ca, autoionization resonance structure of spectrum fitted to Shore parameter 8=43185
- Cd atoms by e impact, direct and stepwise cross-sections 8=29961
- Cd, autoionization up to 19 eV 8=39031
- $pD(1S) \rightarrow H(1S, 2S)D^+$ electron capture cross-section calc, 0.02-100MeV 8=43237
- H, electron impact, extension of Gryzinskis theory to degenerate levels 8=43483
- H^-, laser photodetachment, ang. depend 8=25713
- $H^- + F$ and $H + F^-$ collisions electron detachment 8=34451
- H_2, photo calc. not giving obs. cross-section undulations 8=43482
- HCN, photoionization 8=47789
- He, autoionizing $2p^2\ ^1D$ state, calc. of position and width 8=38756
- He, liq., external source effects on breakdown voltage dispersion 8=41890
- $pHe(1S^2) \rightarrow H(1S)He^+\ 1S$, electron capture cross-section calc. 8=43237
- He, photoionization, by diagonalization method for calc. atomic system reson. 8=43220
- He^-, autoionization $1s2s2p^4P_{5/2}$ state 8=39041
- Hg autoionization, up to 17.7 eV 8=39031
- K, autoionizing states, new magnetic resonance method 8=43244
- K^+ to K^{2+}, by electron impact 8=39047
- Kr^+–Kr, sudden change in number of electrons at 25 keV 8=39018
- I ions, electron capture between 19 and 55 MeV 8=39040
- Li, autoionization $1s2s2p^4P_{5/2}$ state 8=39041
- $Li^{6,7}$, atom, autoionizing $(1s2s2p)^4P_J$ states, energies and lifetimes 8=43243
- Li^+ in $H^+ + Li^+ \rightarrow H(n) + Li^{++}$ cross-section calc. 8=25392
- $Mg^+e \rightarrow M^{++}2e$, threshold to 2000 eV, cross section meas. 8=43486
- N, photoionization cross-sections 8=39044
- N_2 discharge, excited waves 8=47745
- $N_2^+ + H_2$ and $N_2^+ + D_2$, low energy ion-mol. reactions 8=27711
- $N_2^* + Ar$ collisions, cross section enhancement by excited mols., obs. 8=34454

Ionization—contd

- Na^+ to Na^{2+}, by electron impact 8=39047
- Ne–Ne, Ne^+–Ne, Ne^{++}–Ne, ratio of prod. of fast electrons 8=39018
- O atom, auto-ionizing e energy spectra 8=39050
- O^-, laser photodetachment, ang. depend 8=25713
- O^+, photoionization cross-sections 8=39044
- gases
  - See also Plasma.
  - in accelerating space of gas-filled neutron tube 8=47141
  - acetylene, Frank-Condon factors 8=29982
  - acetylene, reactions with 0.5-1200 keV positive ions 8=43491
  - air, by shock wave, e temp. meas. 8=39221
  - air, dry, positive-ion mobility obs. 8=39027
  - alkali-like ions in plasma, variable ionization equilib. 8=30004
  - alkali metal atoms, oscillator strengths of photoionization continua 8=29603
  - aromatics, polycyclic, cross sections and ionization pot., 1120-1770Å 8=38860
  - atomic, by multi-photon tech., effect of contours interact. 8=39017
  - atomic, photoionization cross section meas. 8=29949
  - atoms, highly excited, near metallic surface, calc. 8=25707
  - autoionization in u.v., anal. of generalized Ladenburg-Reiche integral 8=34438
  - in cathode-fall region of moving arcs 8=29938
  - charge transfer, thermal and low-eV region, energy depend. 8=39025
  - classical expression based on Thomson theory for atom-atom collisions 8=29951
  - compound state e spectra, obs. 8=34224
  - conductivity components in magnetic field 8=47783
  - controlled ion conc. apparatus 8=43469
  - cyanocarbons, electron capture 8=34457
  - dissociative electron attachment to mols., theory 8=29953
  - electric field, effect of inelastic collisions 8=47821
  - electrons in weakly ionized gas, appl. expanded Boltzmann eqn. 8=34442
  - equilibrium of low density plasma, collision effect 8=25722
  - ethane, dissociative ionization 8=29976
  - ethane 10^{-4}, due to electron collision, calc. of mean free path 8=34458
  - flame, ion density and vel. of propag., reln. 8=39022
  - Hall effect, comparison with solids 8=43695
  - halogen acids, to $^2\pi$ and $^2\Sigma^+$ states, study by photoelectron spectra 8=34229
  - inert gases, by 0.2-1.8 MeV He^+ ions, effective cross sections 8=39035
  - inert gases, in m.h.d. generator, to plasma with electron temp.> gas stagnation temp. 8=37448
  - ion motion, steady state in elect. field, controlled by charge exchange alone 8=25712
  - ion waves dispersion near and above plasma freq. 8=30152
  - by laser pulse, mechanism theory rel. to inverse bremsstrahlung process 8=29952
  - laser, rel. to drift velocity of ions 8=37551
  - mass spectra, field-ionization 8=34447
  - m.h.d. channel, enhancement using peroxides 8=30043
  - methane, photoionization, mass spectra 8=29986
  - methanol ion-mol. reactions, ion cyclotron reson. 8=27709
  - methyl halides, prebreakdown current growth 8=25708
  - microwave absorpt. near electron cyclotron frequencies in magnetic field 8=39020
  - mixture of charged and neutral particles, statistical equilibrium 8=28330
  - monatomic, precursor ionization, effect of line rad. 8=39015
  - partial, e vel. distrib., inelastic interaction effects 8=39024
  - I,2 photon photo-process, discrepancy 8=34453
  - photo-ion kinetic energy analysis with photoelectron spectrometer 8=47784
  - photoionization, multichannel u.v. chamber 8=29948
  - photon scatt. by electrons, and Fokker-Planck operator 8=43475
  - pinch shock tube, current sheet dynamics 8=34448
  - plasma, charge exchange meas. of emitted fast atoms flux distribution 8=43501
  - plasma diode, density distribution rel. electron temp. for equilibrium 8=43606
  - propane, 10^{-4}, due to electron collision, calc. of mean free path 8=34458
  - pure and binary, by Pb^{206} 103 keV recoil particles 8=29950
  - radiation smoothing to prod. continuous temp. profile 8=39200
  - rare at 10^{-3} torr, by laser-irradiation rel. to multiphonon theory 8=29964
  - rate meas. in shock heated gases, microwave method 8=39014
  - shock wave in e.m. tube, separation of electron density transition from sheet 8=43472
  - shock wave, transverse elect. field ahead (Alfven Mach > 2) 8=34440
  - shock waves, ionizing, simple model 8=47781

Ionization—contd
gases—contd
source of molecular ions, multimomentum 650 mA for producing trapped plasma 8=43609
spectro-ionometer, electronic for meas. in air, aerosols. 8=25709
Stark field ionizer for ETH ion source 8=46430
tetra alkyl metal compounds, total cross section 8=25719
in thermal equilibrium, review 8=47782
transient radiation, effects on electronic components 8=31126
transport props using modified Chapman-Enskog tech for collision terms 8=43473
two-atom, thermodynamic functions, approx. calcs. 8=47954
vacuum gauges standardization 8=39250
Vlasov eqn; linearized, soln. for space-time dependent distribution function 8=29954
wave coupling across shock front, theory 8=46165
Ar afterglow plasma, conversion rates and ion velocity 8=43480
Ar and Ar-C_2H_6 mixture, ionization coeffs. and sparking voltages 8=25701
Ar arc plasma rel. to equilib. disturbance 8=29942
Ar, at high-temps, e. attachment on SF_6 injection 8=43478
Ar, electron energy loss, charact., on transmission 8=34449
Ar flash as light source for high-speed photography 8=28768
Ar: freon-12, multiphoton, evidence for cascade breakdown 8=39000
Ar plasma, waves, characteristic pots. rel. to press. and current for three types 8=25742
Ar radiation frequencies absorption, resonance rel. to transfer shock precursor radiation 8=34441
Ar, by shock waves, e temp. meas. 8=39221
Ar, shocked in mag. field, microwave signal attenuation 8=29960
Ar, supersonic m.h.d. stream, struct. obs. by induced e.m.f. 8=41992
Ar-C_3H_8, ionization coefficient and sparking voltage 8=43479
Ar-CH_4, ionization coefficient and sparking voltage 8=43479
Ar-Co discharge plasma, instability in crossed elec. and mag. fields, obs. 8=34556
CF_4, current growth 8=29983
C_2F_6, current growth 8=29983
C_3F_8, rate of electron attachment, two body process 8=43471
C_7F_{14}, rate of electron attachment, two body process 8=43471
CHO^+ ion-mol. proton transfer reactions 8=49869
CH_3, photoionization 8=29985
C_2H_5I and CH_3CD_2I, fragment ions from X-irrad. 8=47795
CO, e beam dissoc., O^- prod. cross-section obs. 8=47703
CO, electronic transition moment integrals 8=25460
CO_2, dissociative ionization 8=29976
CO_2, 10^{-4}, due to electron collision, calc. of mean free path 8=34458
CO_2, photoionization and Franck-Condon principle 8=39030
Cs discharge, rel. to plasma params. and wall ion current, 0.03-0.3 torr 8=25714
Cs, partial, effect on viscosity in temp. range 1000° to 2400°K 8=30310
Cs, vapour arc, low voltage short gap 8=43465
Cs vapour, Cs_2^+ diffusion, time-of-flight analysis rel. to conduction 8=43705
H atom, multiphoton, cross section calc. 8=25715
H, atomic, multiphoton absorpt., theory 8=47788
H, equilib. effects on non-Maxwellian deviation of fast electrons 8=47804
H halides, dissociative electron attachment 8=29965
H-like ions in plasma, variable ionization equilib. 8=30004
H plasma, and recomb., rel. to reabsorpt. of rad. 8=34495
H^- e detachment by e impact, cross-section obs. 8=39036
H^- source, K vapour charge exchange 8=33099
H_2 and D_2, photionization, threshold electrons 8=39034
H_2, as initial plasma of θ-pinch, by intense light source 8=34528
H_2, at 10^{-3} torr, by laser-irradiation rel. to multiphonon theory 8=29964
H_2, by e-impact, 250-2200 eV, and D^+ ion formation 8=29963
H_2, photoionization near threshold 8=47786
H_2, by 0.2-1.8 MeV He^+ ions, effective cross sections 8=39035
H_2, by rad. from dense He and H plasmas below 800Å 8=34529
H_2, double ionization, Franck-Condon calc. 8=29967
H_2, double ionization, test of Franck-Condon priniciple 8=29966
H_2, drift mobility of mass-identified H_3^+ and H^+ 8=39033
H_2, photoionization, ion-mol. and chemi-ionization
H_2^+, hyperfine transitions, nuclear and e polarization 8=29743
He(2^3S) e affinity meas. by laser photodetachment 8=29970
He, by p bomb, e cross-sections 8=34452

Ionization—contd
gases—contd
He, double ionization by electron impact, importance of exchange scatt. 8=39032
He, transport coefficients 8=29968
He^+, reaction with vibr. excited N_2 in afterglow 8=41253
He_3^+, evidence for 8=39037
He^{3+}, 15-25 transition obs. 8=29971
Hg vapour, associative ionization cross section 8=25716
H_2O, dissociative ionization 8=29976
I_2, dissoc. e attachment at 295°K, obs. 8=47790
InI_3 discharge at h.p. theory 8=43455
K, vapour, photoionization absorpt. continua 8=29973
Kr, by impact of monoenergetic electrons 8=43485
N, coeffs. 8=39042
N, states of some unidentified lines 8=43223
N_2^{2+}, charge exchange in N_2, CO_2 and Ar 8=29974
N_2, by collisions with atomic ions, transfer of rot. and vib. energies 8=39046
N_2, by 0.2-1.8 MeV He^+ ions, effective cross sections 8=39035
N_2, by shock wave, e temp. meas. 8=39221
N_2, dissociative ionization 8=29976
N_2 thermodynamic functions, approx. calcs. 8=47954
N_2, vac. u.v. photon impact 8=47609
N_2, with simultaneous excitation by e impact 8=25717
NH_2^- ion reactions with triatomic mols. 8=29980
NH_3 ionization energy from NH_4I and $NH_4I(Tl)$ spectra 8=32014
NH_3, photoionization, ion-mol. reactions 8=36612
N I, limits 8=43488
NO, e beam dissoc., O prod. cross-section obs. 8=47703
NO, rate consts. for charge exchange with quasithermal ions 8=29975
NO_2, first ionization potl. and vibr. struct. obs. 8=43487
NO_2 + H, free electron generation 8=49872
Ne afterglow plasma, conversion rates and ion velocity 8=43480
Ne, auto-ionizing levels, excitation by ion impact 8=39048
Ne, growth time analysis 8=29912
Ne, ion mobility and reaction rate obs. 300°K 8=39049
Ne, low-voltage arc mode in plasma diode, predominant mechanism 8=47779
O, oscillator strengths, exptl. determ. 8=34456
O^-, associative detachment reactions, electron prod. 8=39051
O^- e detachment by e impact, cross-section obs. 8=39036
O^+, reaction with vibr. excited N_2 in afterglow 8=41253
OCN^- formation in ion-mol. reactions 8=41259
O_2, dissociative ionization 8=29976
O^-_4, stability 8=25718
$Pb(CH_3)_4$, fragment ions from X-irrad. 8=47795
Rb, vapour, photoionization absorpt. continua 8=29973
S_n, high-temp. vapours, photoionization 8=47791
S^- ion reactions with triatomic mols. 8=29979
SF_6, rate of electron attachment, two body process 8=43471
SiF_4, rate of electron attachment, three body process 8=43471
on Ti Br_4-Br mixture, Ti I, II absolute gf-values determ. 8=43489
Tl halides, and recomb. rate rel. to Ar and Xe press 8=43490
Xe, ionic ground state alignment by e impact 8=39052
Xe-methane mixtures, charge exchange 8=47792
Xe, photoionization cross sections of M shell 8=29981
liquids
aromatic hydrocarbons in soln., free carriers from triplet-triplet collisions 8=48201
benzenes, F-substituted, ionization ptl. calc. 8=43868
insulators, transient radiation effects on electronic components 8=31126
radiolysis, geminate recomb. 8=45403
scavenging of ions in irrad. liqs. 8=39413
He, superfluid, mobility discontinuities, inadequacy of Huang-Olinto theory 8=41897

solids
anthracene, crystalline, photo-ionization 8=31267
dielectric, track formation theory 8=40552
film, thin semicond. field ionization 8=31463
hydrocarbon glasses. radiation-induced trapped electrons 8=45401
insulators, transient radiation effects on electronic components 8=31126
metals, transient radiation effects on electronic components 8=31126
polythene films, by giant laser pulses 8=40720
rare gas matrix of trapped atoms, photo-prod. 8=40202
semiconductor diode junctions, charact. magnitudes determ by avalanche noise meas. 8=40534
semiconductor impurity atoms, in strong elec. fields 8=35864
semiconductors, transient radiation effects on electronic components 8=31126
$Cd_{0.23}Hg_{0.77}Te$ alloy, thresholds determ. by quantum yield of internal photoelectric effect 8=35879
n-GaP, impurity photoionization 8=41091
Ge, photothermal, of H-like acceptors, and assoc. photoconductivity 8=44954

Ionization—contd
- solids—contd
  - Ge, Li drifted, energy determ. 8=24522
  - InSb, impact ionization rates and instabilities, effect of mag. fields 8=31303
  - InSb, impact, rel. to avalanche plasma prod. 8=35794
  - La, K-ionized, L-K X-ray ang. correl. obs. 8=41111
  - Si, Li drifted, energy determ. 8=24522
  - SiO_2, collision ionization during anodic growth mechanism 8=39687
  - UO_2, surface diffusivity of U ions, 1544°-1915°C obs. 8=35511

Ionization, atmosphere
- See also Atmosphere/radioactivity; Ionosphere.
- aurora, e flux and luminosity, simultaneous obs. 8=32286
- controlled ion conc. apparatus 8=43469
- corpuscular and wave radiation effects on ionosphere 8=45508
- E region, equatorial evening twilight Langmuir probe obs. 8=45545
- in equatorial F-layer, seasonal depend. of osc. movement and turbulence 8=32342
- field-aligned structure at boundaries of spread-F in middle latitudes 8=32346
- ionometer for continuous meas. on a fluid in the dispersed state 8=25709
- ionosphere, electron content, annual and seasonal anomalies 8=45511
- ionospheric, electrons and ions, temp. and composition 8=45513
- plasmasphere, thermal ion struct. 8=45492
- positive-ion distrib. in F-region, 140-300km., calc. and obs. 8=45552
- var. horizontal and vertical, 15° to 30° South latitude 8=27984
- F2 layer ionization rate variations at high altitudes during solar activity max. 8=45550
- F2 layer, rate meas. 8=36871

Ionization, surface

- B atom, e affinity calc. 8=38661
- benzene, SCF-MO-LC(LCGO) calc. 8=47624
- benzenes, F-substituted, vertical potl. calc. 8=43868
- cyclopropane, SCF-MO-LC(LCGO) calc. 8=47625
- electron subshell binding energies, H to Zn 8=43156
- ethane, from electron spectra 8=34459
- ethylene, SCF-MO-LC(LCGO) calc. 8=47626
- free radicals, appearance pot. meas. 8=29829

Ionization potential—contd
- Koopman's theorem, analysis 8=34116
- lanthanides, from surface ionization 8=31477
- methane, from electron spectra 8=34459
- methane, SCF-MO-LC(LCGO) calc. 8=47628
- nitrogen heterocyclics 8=39060
- oxygen/water vapour mixture, ion cross-sections of different species 8=39023
- Ar-CH_4 mixture 8=43479
- Ar-C_3H_8 mixture 8=43479
- BF_3, BCl_3 and BBr_3 8=34450
- C_7H_{12}, mono- and bicyclic isomers 8=39059
- CHO^+, appearance potential 8=36557
- $C_5H_5^-$, SCF-MO-LC(LCGO) calc. 8=47623
- CNDO/2 method calc. 8=47785
- Cl, atomic 8=38663
- HF and DF, ionization energies 8=29962
- H_3O 8=47610-11
- I, atomic 8=38663
- N, states of some unidentified lines 8=43223
- NH_4 8=47610-11
- NO_2, first potl. and vibr. struct. obs. 8=43487
- O_2^+, energies of $b^4\Sigma^-_g$ and $B^2\Sigma^-_g$ states 8=47615
- S_n, high-temp. vapours, photoionization 8=47791

Ionized gases. See Ionization/gases; Plasma.

Ionosondes. See Ionosphere measuring apparatus.

Ionosphere
- See also Electromagnetic wave propagation/ionosphere.
- absorption in freq. range 128-2775 kc/s, diurnal and seasonal variations 8=32300
- acoustic waves up to 120 km at 0.01 and 10 Hz, model 8=45534
- Alfven waves rel. to pc-3 and pc-4 pulsations 8=50217
- auroral X-rays during slowly varying absorption events, simultaneous balloon obs. 8=27956
- auroral zone disturbances rel. to propag. characts. of freqs. below 12 kHz and above 16 kHz 8=32307
- auroral zone, 129 to 212 km daytime, temp. profile from N_2^+ rocket spectra 8=45483
- auroral zone satellite scintillation at Kiruna, rel. to time and mag. activity 8=32285
- back scatter sounding, field strength predictions 8=50190
- bithermal, double scatt. of plasma streams 8=45531
- characteristics, CCIR atlas 8=27980
- charged particle motion in geomag. dipole field, under action of e.m. pulses 8=36815
- composition and mean molecular weight, diurnal and latit. effects 8=36770
- conductivity components in mag. field, model 8=47783

- disturbances, quasi-sinusoidal 8=41432
- drift obs., analysis method 8=45535
- earth-ionosphere cavity, resonance mode, frequency tracker 8=36852
- effects associated with appearance of energetic electrons in magnetospheric tail 8=45510
- electric currents calc. by equiv. circuit method 8=41439
- electric field, meas. by ejected probe 8=36849
- electrojet over Thumba, India, quiet day obs. 8=41406
- electron and ion temp. and composition 8=45513
- electron and ion temp. profiles at temperate latits., review 8=27985
- electron conent, and [01] 6300Å nightglow 8=36827
- electron content, annual and seasonal anomalies 8=45511
- electron content, enhancements assoc. with mag. storms 8=45512
- electron content, Faraday rot. and Doppler determ. methods, comparison 8=32295
- elecron content, incoherent radar back scatter obs. 8=32296
- electron content near mag. equator, Faraday rot. obs. 8=32294
- electron content, nighttime changes 8=36825
- electron content, total, at mid-latits. during sunspot min. 8=27967
- electron cooking due to induced transitions amongst fine struct. levels of O 8=32298
- electron density, by ground-based obs. of radio signals from cosmic vehicles, review 8=41415
- electron density meas. in transition region with magnetosphere 8=36829
- electron density profiles, 55-105km, 1QSY seasonal var. Wallops Island 8=45528
- electron density profiles above Antarctica, during solar event of Jan. 28, (1967) 8=36768
- electron density profile, microstruct. meas. by gyro-plasma probe 8=36828
- electron conc. meas. apparatus 8=36845
- electron, ion and neutral particle temps., rocket and satellite obs. review 8=32297
- electron production rate in ionosphere of bolar cap due to solar cosmic rays 8=50177

Ionosphere—contd
electron temp. and conc., altitude distrib. meas. by geophys. rockets 8=27966
electron temp. and density, v. l. f. rads and noise 8=41438
electrostatic waves and ionization irregularities 8=32314
energy deposition, nonlocal for thermal disequilibrium and allowing for photoelectron escape 8=45526
equatorial, oblique sounding and spread echoes 8=32312
F-region drift speed, rel. to sunspot activity 8=28175
fine structure by aperture synthesis 8=45529
geomag. obs. rel. to stratospheric heating 8=27982
heating, presunrise at Arecibo, due to conjugate point. photoelectrons 8=41421
hydromagnetic wave propag. and Schumann resonance 8=45532
ice shelf, Filchner, directional characts. ionosonde interference patterns 8=45533
inhomogeneities, dimensions from satellite signal fading at 20 and 40 MHz 8=36841
inhomogeneites from electron density profiles once Wallops Island 8=32319
inhomogeneities, moving, lifetime and spreading, model 8=36840
initial height determ., absorpt. meas. method 8=36824
ion and electron densities and temps., effective recomb. coeff. 8=41378
ion and electron densities and temps, rocket meas. in Indonesia 8=36830
ion density meas. with blunt probes 8=36853
ionization var. vertical and horizontal obs. 15°to 30° South latitude 8=27984
ionogram analysis, correlation with lab. obs. 8=45509
ionosphere and magnetosphere, temps. obs. 8=32297
irregularities, field aligned, effect on radio scintillations from BEB and BEC satellites 8=45530
irregularities in electron content, from Faraday rot. obs. at 3 places 8=36837
irregularities, refracting, determ. from fading of signals from stationary satellites 8=41434
irregularities, small scale formation, linear analysis 8=41433
irregularities, statistical and of h.f. radio wave diffraction 8=32304
Langmuir probe, spherical, charact. of ion collection in drifting Maxwellian distribution 8=25765
low, cosmic ray electron production obs. 8=50176
lower, electron density, wave propag. and r.f. capacitance probe obs. 8=45515
lower, region of development of disturbance systems, non-isolated, rel. to meteorology 8=32316
lower, use of ionic mobilities for meas. 8=36846
magnetically conjugate photoelectron flux heating, low latitude effects 8=41410
m.f. radio wave absorption, dependence at mid-latitudes on planetary mag. activity 8=41423
middle, effects of superposition of two anomalous X-ray emissions 8=45516
movements, detection by freq. swept backscatt. soundings 8=32311
night-time electron density, meas. by v.l.f. Doppler shift method 8=36848
North and South hemisphere, current rels. 8=45569
observations at mag. conjugate points Kerguelem-Sogra 8=45507
observations (Nov. 1967) 8=50173
observations, October 1967 8=27963
observations, September 1967 8=27962
observations, May 1968, Belgium 8=50174
over Europe, total e content (Jan. 1965) 8=41418
Pc-3 pulsation transmission, effects of solar X-ray fluxes 8=41472
photoelectron escape 8=41417
plasma l.f. instability, theoretical discussion 8=45527
polar cap absorption event, recent, nonconjugate aspects 8=36834
of polar caps, electric current, mean intensity rel. to planetary mag. activity 8=27964
polar, electron density, temp. and flux in altitude range 2000 to 3000 km 8=36826
radio absorption detection, late time following high altitude nuclear explosion 8=45538
radio absorption, solar eclipse 12 Nov. 1966 8=27978
radio star scintillations and fadeout 8=32516
radio-star visibility fades in Alaska near solar minimum 8=41437
radio-star visibility fades, phase variance and autocorrelation obs. 8=41436
radiowave absorption in model ionospheric layers 8=41424
real-height problem, generalization of Abel's soln. for both magnetoionic components 8=27965
refractive index for v.l.f. wave transmitted from ground 8=32303
resonances at 2nd, 4th and 5th harmonic of electron gyro-freq., Explorer 20 obs. 8=27968
satellite signal utilization for investigation 8=50189
scintillation, Canadian obs. 8=32609
scintillation obs. at 136 MHz, diurnal pattern characts. 8=32317
scintillations in satellite signals, latitudinal var. 8=41431
scintillations obs. by v.h.f. radar reflections from satellites 8=32315
scintillations, radio star and satellite, geophys. aspects 8=32318
slab thickness, equivalent, incoherent radar backscatter obs. 8=32296
solar flare effects, theory 8=41413
solar proton flare disturbances 8=36838
space research, conference, London (1967) 8=28020
spherical satellite, electrostatic pot. fields and wake 8=41414
Sq midlatitude current system, vector obs. 8=41416
sub protonospheric whistlers, existence of electron density 8=36844
thermosphere, diurnal variation of electron temp. 8=50175
thermosphere, lower, air densities from jet radii 8=36759
topside, ionization var. during mag. storm, obs. 8=41435
topside, night-time plasma transport, using back-scatter N profiles 8=41419
total electron content, anomalous variations at sub-auroral latitudes 8=41420
transmission and refl. coeffs. as vertical incidence for v.l.f. waves 8=32299
travelling disturbances caused by nuclear explosions, rel. to acoustic and gravity-wave modes 8=27979
travelling disturbances, review 8=27981
turbulent process stratification below turbopause 8=36839
upper, charged particle density, relation with sunspot number 8=32293
upper, drift inhomogeneities, rel. to diurnal variations of geomag. field 8=45525
v.l.f. emissions, stations close to auroral zone and at lower latits 8=45505
v.l.f. hiss decrease rel. to sudden commencement 3 Sept., 1966 8=32305
whistlers and hiss, characts and variations, review 8=32263
wind oscillations, short period, exptl. demonstration 8=27983
winds, over Yuma, Arozona, obs. by gun-launched projectiles 8=36843
wind profiles, 85 to 160 km altitude, circulation patterns seasonal and time difference 8=36842
Ar and He concentrations rel. to turbopause altitude 8=36775
H and He, thermal diffusion 8=50188
H^+ velocity distributions from Boltzmann eqn., collision model and Maxwellian distributions 8=41412
He^+ conc. calc. and escape rates 8=27937
N(h) profile calc., assigning reference elements for computer memory 8=36831
N_2 density and temp., diurnal 8=36774

D-region
annual behaviour, similarities with stratosphere 8=50117
conduction, low field, in presence of high field signal 8=45540
conductivity gradients, SID changes 8=32321
electron collision, energy loss factor 8=27990
electron conc. profiles, day and night, method of calc. 8=36855
electron concentration profile sunrise development, Virginia rocket obs. 8=27988
electron concentrations and negative ions, pre-sunrise rocket and ground v. l. f. obs. 8=27989
electron density distrib., meas. from v.l.f. radio wave propag. 8=32322
electron density distribution during winter anomalous radio absorption 8=45542
electron density, height distrib. rel. to ionization prod. by solar rads., rocket meas. 8=32327
electron-neutral collision freq. and density profiles, v.l.f. meas. 8=32326
focused atenna, transient electron growth due to intense e.m. wave 8=43504
gyro-wave interaction obs. 8=45539
mag. storm long lasting effects on amplitude of 245 kHz signals 8=27987
middle-latitude, ionization changes associated with geomag. storms 8=41441
negative ion. concentration estimation 8=50192
radio absorpt. rel. to e bursts in magnetotail 8=41440
radio absorption at 2MHz and rel. to solar zenith angle 8=45541
reflection loss, l. f. and v. l. f. calc. 8=50185
NO in non-polar region, height distribution and recombination coeff. 8=50191
NO production and $O_2(^1\Delta)$ metastable ionization by 1027–1118Å 8=32323
NO production around 100 km 8=41442
O and O_3, associative detachment and dissociative attachement, l.f. obs. 8=32324
$O_2(^1\Delta)$ metastable, ionization by 1027–1118Å and NO production 8=32323

E-region
anisotropy parameters of irregularities 8=45546
annual behaviour, similarities with stratosphere 8=50117

- **Ionosphere**—contd

- $CH_4^+ + C_3H_6$, charge transfer reaction, obs. by He resonance line 8=34445
- CO_3^{3-}, Y^{3-}-stabilized mol.-ion in calcite 8=49620
- $C_5H_5^-$, SCF-MO-LC(LCGO) calc. 8=47623
- Ca XV and XVI spectra, laser prod. plasma, 120-240 Å 8=29608
- Cd I series, intercombinational transition probabilities 8=38711
- Cl^- collisions with He, Ne, Ar and Kr atoms, detached electrons energy obs. 8=29972
- Co^{2+} in ZnS, CdS, ZnSe and ZnS-CdS, absorpt. and emission rel. to impurity levels, 3500 cm^{-1} 8=27613
- Cr, positive, spin-orbit coupling 8=38665
- Cr^{2+} in MgO, dynamic lattice couplings, from microwave u.s. and thermal-conductivity studies 8=35053

Ions—contd
- Cr^{3+} in $LiNbO_3$, acoustic paramag. reson., 4.2°K 8=44318
- in Cs seeded Ar plasma, species present, relative abundance and ion signals 8=29987
- Cs vapour of Cs_2^+, diff. coeff., time-of-flight obs. 8=30314
- $Cs^{+,2+,3+}$ polarized ions, production by e bombardment on Cs° 8=24160
- Cu^{2+}, bonding in Rochelle salt and triglycine sulphate e.p.r. obs. 8=36243
- D_2^+, collision-induced dissociation 8=25648
- D_2^+ photodissoc., theory and calc. 8=47704
- Eu^{3+} in YVO_4, absorpt. and fluorcoc., $(4f)^6$ level splittings rel. to cryst. field, obs. 8=41152
- Fe, positive, spin-orbit coupling 8=38665
- Fe^{3-} in $CdWO_4$, e.p.r. lines splitting by elec. field, 320 kv/cm 8=40929
- $FeCl_4^-$ anion, intensities of d-d transitions 8=29736
- H cluster ions, condensed, mass spectra 8=47787
- H^-, electron correlation 8=34238
- H^-, stability, wave function calc. 8=47482
- H_2^-, attempt to produce 8=43481
- H_2^+, collision-induced dissociation 8=25648
- H_2^+ photodissoc., theory and calc. 8=47704
- $(HCO_3)_2^{2-}$ in $KHCO_3$, structure from n.m.r. study 8=26032
- H_3O^-, in hydrated $Ga_2(SO_4)_3$ crysts., n.m.r. 8=49643
- H^3He^+ reactions with gaseous methane and ethane 8=45341
- He_3^+, evidence for 8=39037
- $He^+ \rightarrow He_2^+$ in afterglow plasma, obs. of rate 8=43449
- He^3-He^4 solutions, mobility of positive ions, 1.4 to 2.15°K 8=46312
- Hg, in supersonic jet, charge exchange of polarized ions 8=39039
- Hg I series, intercombinational transition probabilities 8=38711
- I^- collisions with He, Ne, Ar and Kr atoms, detached electrons energy obs. 8=29972
- I_3^- in $N(CH_3{}_4)I_3$, structure studies 8=30649
- I_2Br^- in CsI_2Br, structure studies 8=30649
- Ir^{4+}, exchange coupling in $(NH_4)_2Ir$; $PtCl_6$ 8=32002
- $Kr^+ + C_3H_6$, charge transfer reaction, obs. by He resonance line 8=34445
- Li^-, stability, wave function calc. 8=47482
- $Li^{+,2+}$ polarized ions, production by e bombardment on Li° 8=24160
- Li^{7+}, ^1D, ^3D, ^1F and ^3F states, mag. h.f.s. calc. 8=38673
- Mn, positive, spin-orbit coupling 8=38665
- Mn^{2-} in $CdWO_4$, e.p.r. lines splitting by elec. field, 320 kv/cm 8=40929
- N_2, excited states rot. and vibr. consts. calc. 8=38792
- NO^+, electronic states 8=47606
- NO_2^-, charge distrib. in ferroelec. $NaNO_2$ 8=48308
- Nd^{3+}, approx. analytical wavefunctions 8=38674
- Nd^{3+} in $NdCl_3$, annihilation between excited states 8=41205
- O^+, reaction with O_2 and N_2, temp. depend. of rate coeffs. 8=29977
- O^-_4, stability 8=25718
- Pb III series, intercombinational transition probabilities 8=38711
- Ru, sorption on $Fe(OH)_2$, obs. 8=44073
- in SF_6, in swarm conds., electron detachment, rel. to corona studies 8=29978
- in Si, implanted impurity distribs. of B, N, P and As 8=27131
- SiII, IV, spectra, doublets oscillator strength ratios, Fermi calc. and obs. 8=34152
- Ti^{3+} in $BaTiO_3$, electronic transition theory 8=49362
- UO_2^{2+} excitation in β-diketone + N-containing organic bases triple complexes by intramol. energy transfer. obs. 8=34288
- X_2O_7, type, vibration spectra and chemical structure 8=47475
- XY_4 type, force consts. vibr. amplitudes and Coriolis coupling consts. 8=34206
- Zn I series, intercombinational transition probabilities 8=38711
- recombination
  - rate consts., gaseous ions 8=34446
  - capture radius 8=29956
  - and diffusion, no. unrecombined particles, asymptotic limit 8=34473

unmagnetized, mag. small angle scatt. of thermal neutrons 8=31642
vacancy concentration during high temp. deformation 8=31038
whiskers, plastic flow, 4-300°K 8=49032
white cast, Bi, Al, B determ. by hollow-cathode discharge spectrum 8=36642
X-ray diffraction line intensity changes on plastic deform. 8=44166
x-ray line intensity and lattice consts. rel. to temp. 8=48649
in Al melts, u. s. dispersion, 740-800°C 8=39442
Au^{197} Mössbauer effect rel. to hyperfine structure determ. 8=43948
in CoO, multiple charge states 8=39521
in Cu, singlet ground state n.m.r. 8=31900
in Cu, spin compensated state rel. to Mössbauer effect 8=35036
in ε Cu-Zn, local moment formation from susceptibility meas. 8=31617
Fe^{55} X-ray source for Debye-Scherrer diffractometry 8=28930
Fe^{57}, acoustic sidebands in Mössbauer spectrum due to r.f. magnetic field 8=39513
Fe^{57} isomer shift pressure dependence in b.c.c. phase 8=43950
Fe^{57} Mössbauer scattered radiation time dependence 8=43947
Fe^{57}, spectrum (I) following Co^{57} decay in AgCl 8=39519
α-Fe, cold-deformed, solid solubility of C and N, normal and in stacking faults 8=35543
α-Fe, damping peak, cold-working 8=31204-5
α-Fe, neutron-irradiation effects saturation 8=31151
α-Fe solid solution, internal friction of C, effect of osc. modes on quantitative anal. 8=35695
α-Fe, solubility and permeability of S 8=43974
FeI, lifetimes of energy levels calc. from transition probabilities of spectra 8=47496
Fe I u.v. lines, gf shock tube meas. 8=29638
Fe(111) type film, energy and spin wave amps. eigenvalues 8=49512
FeIX to XIV, oscillator strengths 8=38668
Fe XV in solar corona, lines relative intensities 8=37082
Fe^{2+}, high-spin, electronic factors in paramag. relax. 8=40921
Fe^{2+} in $KMgF_3$, magnetoelastic coeffs. from acoustic paramag. resonance 8=31817
Fe^{2+} in MgO, low-lying energy level from spin-relaxation time meas., 4.2–13°K 8=45086
Fe^{3+} in $Al_2SiO_4F_2$, isotropic and dipolar contribs. to s.h.f.s. tensor 8=36244
Fe^{3+}, in CaO, uniaxial stress meas. at impurities, strain coeffs. 8=40134
Fe^{3+} in LiF, e.s.r. and n.m.r. 8=40920
Fe^{3+} in ZnSe, e.p.r. rel. to Fe^{3+} in cubic and axial fields 8=40949
Fe^{3+}/Fe^{2+} ratios in phosphate and oxide mixtures, Mössbauer quantitative anal. 8=27778
Fe^{+m}, $(8 \leq m \leq 15)$, ionization cross sections rel. to solar corona temp. 8=37085
Fe:Co^{60}, spin lattice relax., low temp. deviations from Korringa law 8=45106
Fe^{2+}:MgO, spin-lattice relaxation by phonon avalanche 8=40941
Fe : Pd, magnetic hyperfine field, temp. depend. 8=45016
Fe:Sb^{125}, mag. hyperfine fields and spin-lattice relax., from n.m.r. 8=31891
in GaAs, activation energies 8=40238
in Ir, Os-Ir and Ir-Pt alloys, resistivity temp. dependence 8=40318
on LiF, films, single-cryst., epitaxial growth 8=35170
on MgO, films, single-cryst., epitaxial growth 8=35170
Mn effects on impact properties 8=35693
$2MnO.SiO_2$ inclusions, e microprobe obs. 8=27802
from NH_3 synthesis, and N chemisorption 8=41265
Ni effects on impact properties 8=35693
in Ni_3Ga, giant mag. moment inducement 8=27423
P stabilized, b.c.c., diffusivity of O 8=44387
Tm^{169} implanted, time-dependent hyperfine interaction 8=39524

Iron alloys

Sareq e. m. on-line separator with fission source 8=38769
stable isotopes, review of methods 8=34187
Ar^{36}, by thermal diffusion 8=47548
B^{10,11} by BF_3 distillation, pressure effect 8=25394
Ce^{145,146,147} by column partition chromatography, obs. 8=38430
He^{8} iron p-irrad. cotton fibres, obs. 8=38414
Hg from Pb p-spallation target 8=38394
In, liq., isotope thermotransport 8=29671
Kr and Xe from U^{238}O$_2$-stearate fission source, obs. 8=38549
N, between NO and NO_2^- 8=27674
N, between NO_2^- and NO_3^- 8=27673
Tl from Pb p-spallation target 8=38394
U^{235} and U^{238}, on commercial basis 8=47399
Isotope shifts. See Isotope effects; Spectra.
Isotopes
applications review for humidity meas., moderators, shielding, reactor materials, neutron detectors, optical standards 8=43245
in atmosphere, prod. by cosmic ray nucleons 8=29254
element 102, synthesis and study, review 8=29381
particle beam prod. in thick targets, conc. 8=37025
meteorites and moon surface, nuclide prod. by cosmic rays 8=37025
oxygen, bibliography of uses, 1963-66 8=34185
radioisotope production in JRR-3, n irradiation conditions 8=24947
C, fractionation in CO_2-gas-CO_2 in soln., and HCO_3-CO_2 in soln. systems 8=47547
Cd^{111,114} polarization of light emitted by optical resonance of 2288Å radiation 8=34158
Cd, optical resonance, polarization of radiation (2288Å) emitted 8=25359
Li^{6} and Li^{7} interdiffusion unisotopically pure Li melt 8=34807
Li metal, isotope inter-diffusion 8=39976

Isotopes—contd
Sb odd mass, low level props. calc. from core-particle-coupling model 8=42894
Sn^{117} and Sn^{119}, level crossing investigation of hyperfine struct. 8=29629
detection
See also Mass spectra; Radioactivity.
mass spectrometer for isotopic ratio of trace amounts of noble gases 8=47452
N^{15}, spectrochemical estimation, enhancement by inert gas 8=27791
relative abundances
See also Elements/relative abundances.
recording servoamplifier for mass spectrometer ion current ratios 8=38610
Be^{7,9} in solar cosmic rays, calc. 8=37057
C$^{16-18}$ and O$^{12-13}$ in Venus 8=28153
C and O composition variation in calcereous cave concretions 8=50096
Ca^{43,48}, determ. by neutron time-of-flight 8=36648
Co^{56,59} in solar cosmic rays, calc. 8=37057
Cs, $128 \leqslant A \leqslant 144$, U p-fission yield, 150 MeV 8=38542
Cs, fragments from p-reactions on U, Th, Ta 8=34001
N, determ. by recording spectrometer 8=28817
Na, $20 \leqslant A \leqslant 25$, Si p-spallation yield, 150 MeV 8=38542
Na, fragments from p reacts on Mo^{100}, Ta, Ir, U 8=34000
Os^{187} conc., spectrographic determ. 8=36635
Rb, $83 \leqslant A \leqslant 98$, U p-fission yield, 150 MeV 8=38542
Rb, fragments from p-reactions on U, Th, Ta 8=34001
Sr, ratios in volcanic rocks of three island arc areas 8=32186
Th and U concentrations and ratios in river sediments 8=50094
U^{235,238}, activation analysis by γ spectrometry 8=47546
U^{235,238} in natural U, Fabry-Perot spectrometer, meas. 8=28803
Zr in star HR1105 8=28069

  solid, compression up to 20 kbar at 81 and 115°K 8=26836
  solid, equilibrium vacancy conc. meas 8=48809
  solid, model potentials and phonon dispersion curves 8=35389
  solid, pair pot. calc. 8=30615
  solid, thermodynamic props. from thermal expansion, sp. ht., compressibility and vacancy equil. conc. meas. 8=48745
  thermal cond., Langmuir calc. for incandescent lamps 8=42210
  in thermionic converter, effect on V-I characts 8=28481
  viscosity, low-temp. 8=39237
  Ag thermal desorption obs. 8=48483
  Au thermal desorption obs. 8=48483
  Br^- ions collision with atoms, detached electrons energy obs. 8=29972

Krypton—contd
- Cl^- ions collision with atoms, detached electrons energy obs. 8=29972
- Cu thermal desorption obs. 8=48483
- Hg-Kr glow discharge, e energy distrib. rel. to striations 8=34418
- I^- ions collision with atoms, detached electrons energy obs. 8=29972
- Kr^{83}, Mossbauer effect with Se^{83} sources 8=43952
- Kr^{83} n.m.r., local mag. field shift, obs. and theory 8=39226
- Kr^{85} leak test for evacuated tubes 8=47990
- Kr^{86} spectral line profiles from complex visibility Fourier transform, obs. 8=29619
- Kr^{86}, wavelength standard, reproducibility, discussion 8=23789
- Kr-propylene system, liq.-vapour phase equilib., and solubility 8=39479
- Kr^+ charge transfer dissociative reaction with propylene 8=34445
- Zn 3075.9 Å, perturbation of resonance line 8=47512

Krypton compounds
- H_2Kr, bound states, i.r. absorpt. 8=25472

Kuhn–Thomas sum rule. See Molecules/electronic structure.
Kurie plots. See Beta-decay theory; Beta-ray spectra.
Kyropoulos method. See Crystals/growth.

LCAO calculations. See Molecules/electronic structure; Orbital calculation methods.
LS coupling. See Atoms; Spectra/atoms.
Laboratories
- See also Acoustical laboratories.
- for cosmic rays, underground, near Turin (the Monte Cappucini lab.) 8=38133

Laboratory apparatus and technique
- adsorptive pumps for low temp. serial mass spectrometer evacuation 8=38608
- apparatus to achieve temps from 4.2 to 300°K, with temp. stabilization 8=28432
- autoclave liners (noble metal), corrosion during hydrothermal crystal growth reactions 8=49855
- bonding of thermoelements in thermoelec. dev. 8=49398
- ceramic-to-metal seals, graded, fabrication by isostatic gas, bonding 8=34692
- comparator for photoelectric microscope 8=46413
- control wiring, recording by computer 8=37808
- crystallographic specimen-holder, thermoelec. annealing 8=39755
- Dewar for cathodoluminescence meas. 8=41878
- Dewar, narrow-tail glass for liquid He 8=32994
- diaphragm cutter, fast acting 8=32630
- diffusion meas. apparatus for polymer solns. 8=48113
- electro measuring app. with strings, stability of mobile part 8=33009
- electron gun demountable 8=46404
- for electron paramagnetic resonance solid state obs. of radicals formed in gas phase by 5 to 500 eV electrons 8=25652
- electroreflectivity meas. at low temps., sample package 8=49696
- extraction efficiency flow distrib. and droplet boundary-layer behaviour dependences 8=48123
- film gauge for low density shock tubes, highly sensitive 8=32899
- flatness control in optical polishing 8=37652
- flow distrib. over contact, filtering and other Z-shaped app. 8=30360
- gas-cap radiation from simulated Martian atmos. probes 8=41569
- gas drying, moisture trap 8=50470
- gas fluidized beds, density and pressure fluctuations 8=48230
- gas humidity transducers, test rack 8=26001
- gas inlet valve, electromagnetic, very quick acting, for plasma expts. 8=47935
- gas mixtures, explosive, continuous flow mixing 8=34618
- gear hobbing machine table drives, diffraction gratings for error obs. 8=24373
- general relativity verification expt., synthesis 8=41745
- glass capillary sealing under pressure 8=50469
- glass tubing, production of extremely thin walls and small holes 8=32629
- goniometer head for low-temp crystal rotation 8=30815
- graphite cuvette for atomic spectroscopy 8=38619
- HF fractionation column 8=41608
- high heat flux density prod. 8=28393
- hydrothermal crystal growth, large noble metal can technique 8=44112
- internal friction and Young's modulus at h.f., meas. 8=40097
- isotope labelling of cpds., for probing chemistry underlying mass spectra 8=25393
- KCl, grain boundary mobility, meas. 8=40052
- labelling sand with Cr^{51} 8=50092
- laser beam splitting devices 8=37554
- liquid metal level meas. by induction probe. 8=38594
- low angle electron diff. camera, appl. to physics and biology 8=24149

Laboratory apparatus and technique—contd
- low-background radiation meas., alternating method, liquid scintillation counter 8=37772
- micro AgCl tech. for i.r. spectrophotometry 8=24403
- micrometeoroid impact simulation, study of craters and penetration 8=37028
- Mössbauer effect demonstrator 8=38350
- neutron generator for undergraduate lab. 8=38076
- optical instrument parts, machining with diamond-tipped tools on metal-cutting lathes 8=45939
- optical method for prod. Fresnel zone plates 8=28869
- organic coatings, book 8=32628
- packed bubble columns, filled with Raschig rings, performance 8=25858
- packed liquid extraction column, dynamic behaviour 8=49833
- particle accelerators and thermonuclear plasma, common problems 8=34064
- pipetter, remotely operated, for highly radioactive liquid samples 8=41295
- polishing, disproving previous hypotheses 8=50468
- pressure vessels, triaxial elec. lead-in 8=50474
- Pyrex toroidal section prod 8=41607
- quartz toroidal section prod. 8=41607
- regenerators, heat transfer surface, and design for fluids with variable thermophys. props. 8=30293
- rotating agitators for batch mixing of viscous liqs, model study of seven mixer types 8=30437
- rotor-position indicator, anal. of mag. irons for shape and size 8=33051
- sample holder for simultaneous gas sorpt. and X-ray obs. 8=33301
- sample holders for solution calorimetry 8=34831
- sample orientation in solenoid 8=45934
- seal faces, mean surface profile meas. 8=35138
- semiconductor detector for thin film thickness meas. 8=44029
- separation of particles by controlled cycling, apparatus and theory 8=35065
- silicides of transition metals, auxiliary metal bath procedure for synthesis 8=49835
- solar simulator for 3m space environment chamber, geometric optics princ. 8=28734
- spark timer, transistorized 8=28221
- specimen blanks for electron microscope, preparation 8=37098
- spring strip mounts control with piezoelectric 8=37249
- step annealing process for diffusion coeff. determ. 8=48773
- stress corrosion cell for uniaxial tensile tests 8=48970
- structure models, ball-drilling methods 8=32631
- surface-roughness measurement techniques, development in U.S.S.R. 8=48416
- surface texture profilometry, relocation 8=44019
- synthesis of oxidation resistant metal dibonde composites 8=45317
- for thermoluminescence with spectral dispersion 8=45252
- thin film coercivity rel.-to-temp.-, app.-for automatic meas. 8=31583
- torsion pendulum technique for internal friction meas. of glass fibres 8=40168
- for transferring crystal from one goniometer head to another 8=26345
- transmission electron microscope rapid thin foil preparation 8=28205
- u.h.f. investigation of e,m. fields in metal lattice 8=35026
- ultramicrotome cutting of f.c.c. metals, deformation produced, 8=48850
- vacuum apparatus for student practical work 8=30324
- wakes and shock caps of re-entry models, time-resolved spectra 8=41485
- water cooling system, leak detection by aspirin tablet 8=37097
- welding, explosive 8=28202
- Al extrusion temp. meas. using BACO radiation pyrometer 8=32982
- Al powder briquets, prep. for spectrochem. anal. 8=32158
- Al_2O_3, particulate, replication for e. microscope exam. 8=44160
- Au disk cutting from sheet by HCl jet 8=32632
- C articles, monolithic, semi-isostatic forming 8=45933
- GaP bulk ingot prep. 8=48542
- Li wire extrusion for exploding-wire system 8=50473
- $NaCl_3$ Rb–D_2 filter for student optical pumping expts. 8=42196
- p-Si crystal, ohmic contact with Al wire 8=40483
- Si soldered contact prep., metal hydride flux 8=45931
- Sn^{113} source, radioactive, fractional distillation from In^{113} 8=42954
- ZnS luminophors, preparation, effect of halide addition 8=49819

Lamb shift. See Spectra/atoms.
Lambda (λ) point. See Helium/liquid; Phase transformations.
Lamps. See Light sources.
Landé splitting factor. See Spectra; Zeeman effect.
Langmuir probes. See Discharges, electric; Plasma/measurement technique; Space vehicles/instrumentation.
Lanthanides. See Rare earth metals.

Lanthanons. See Rare earth metals.
Lanthanum
  $\beta \to \alpha$ phase transform., model and nucleation 8=44006
  K-ionized, L-K X-ray ang. correl. obs. and partial fluoresc. yield 8=41111
  secondary e emission coeff. and energy spectrum obs. 8=40716
  superconducting, structure in tunneling characteristics of thin film diodes 8=35850
  thermal expansion and magnetostriction, 1.5-40°K, rel. to superconducting transition temp. pressure dependence 8=35438
  La III spectra, principle series, transition probabilities in doublets 8=47506
Lanthanum compounds
  electron emission, laser-induced using ruby and Ar lasers 8=40710
  ethylsulphate:Er^{3+}, spin-lattice relax. times 8=45089
  La complex, ethylene diaminetetra-acetic, La(III), cryst. struct. 8=44223
  La nitrate soln, electrophoretic behaviour of monodisperse polystyrene latex particles 8=49923
  La tetrahydrate perrhenate, i.r. absorpt. obs. 8=36384
  LaB_6, rod cathode in high-brightness electron gun 8=28555
  LaB_6-La system cathodes, emission characts. 8=27348
  $La_{1-x}Ba_xEu_xLi_xPO_4$, luminescence rel. to mixed valency Eu centres 8=45278
  $La_2Be_2O_5$, crystal structure 8=39799
  LaC_2, crystal structure changes on phase transform at 1060°C 8=26405
  La–Ce alloys, susceptibility above magnetic ordering temp. evidence for spin compensation 8=40750
  $LaCl_3$, first-order Raman scattering depolarization 8=27578
  $LaCl_3$:Ce^{3+}, i.r. Zeeman effect at 77 and 27°K 8=36383
  $LaCl_3$: Gd^+ e.p.r. determ. of Gd^{3+} pair-interaction constants determ. 8=31775
  La-Cu double nitrate, heat capacity below 1°K 8=44336
  $La_{3\cdot33}Cu_2S_6$, double sulphide, crystallographic and structural data 8=30800
  in LaF_3, energy transfer between rare earth ions, temp. depend. 8=45138
  LaF_3, i.r. dispersion rel. to lattice vibrations 8=45201
  LaF_3, lattice defects and F motion 8=31048
  LaF_3, tysonite-type crystals, NMR and electronic structure 8=27506
  LaF_3, vapour press., enthalpies and entropies in range 1050°-1200°C 8=35015
  LaF_3:Dy^{3+}, absorpt. and fluoresc. spectra 8=31985
  LaF_3: Pr^{3+}, spontaneous emission probabilities and quantum efficiences 8=49805
  LaF_3:Nd^{3+} laser, continuous stimulated rad. at 300°K 8=37616
  LaF_3:Pr^{3+}(Nd^{3+}), NMR of F^{19}, relax. times, 150-800°K 8=45127
  LaF_3-SrF_2:Nd^{3+} laser operating at 300°K 8=27579
  $LaFeO_3$, e.p.r. rel. to weak ferromagnetism 8=27488
  $La_{1-x}Gd_xAl_2$, superconducting, transition temp. dependence on Gd spin conc. 8=27016
  $La_{2-x}Gd_xCoMnO_6$, mag. interactions and structure 8=27417
  $(La, Gd)_2CoMnO_6$ system, mag. interactions and crystal structure 8=49527
  $La_2M_3''(NO_3)_{12}.24H_2O$: Gd, ($M''$ = Zn or Mg), e.p.r. angular spectra, anomalous 8=45080
  $La_2Mg_3(NO_3)_{12}.24H_2O$: Cu^{2+}, spin-lattice relax 8=40950
  $La_2Mg_3(NO_2)_{12}.24H_2O$:$Mn^{2+}$, e.p.r. 8=40928
  $La_2Mg_3(NO_3)_{12}.24H_2O$:$Mn^{2+}$ zero-field splitting 8=30627
  $La_2Mg_3(NO_3)_{12}.24H_2O$: Nd, electron spin lattice relax. of Nd 8=31872
  $La_{3\cdot33}MnS_6$, double sulphide, crystallographic and structural data 8=30800
  $LaNbO_4$: Nd^{3+} luminescence obs. 8=36515
  $LaNiFe_{11}O_{19}$, persistent polarization after appl. of d.c. field 8=31424
  LaO spectral high resolution using hollow cathode lamp and Fabry-Perot spectrometer 8=29675
  La_2O_3, retention of additives 8=39693
  $La_2O_3.3B_2O_3$, crystal structure and isotypism 8=48657
  La_2O_3 (Bi) phosphor, excitation and emission spectra 8=45279
  LaOOH, synthetic, crystal structure 8=48658
  $La_4Re_6O_{19}$, metal-metal bonding 8=48305
  $LaRu_2$: Gd^{+++}, magnetic susceptibility and e.p.r. study 8=31502
  LaS, vaporization and dissoc. energy 8=48287
  LaSb, thermal and elec. props. rel. to semi-metal charact., 8=39948
  LaSb, thermoelec. power temp. dependence, 80-500°K 8=27309
  La_3Se_4, superconductivity rel. to lattice and electronic props. 8=27017
  $(La, Sr)CoO_3$, localized- to collective-electron transition 8=35773
  $LaTaO_4$: Nd^{3+} luminescence obs. 8=36515
  La-Tb alloys, antiferromagnetism rel. to h.c.p. and d.h.c.p. structures 8=31792
  $LaTO_3$, (T = Ho, Y, Er, Tm, Yb, Lu), crystallography and mag. props. 8=48656
Lasers

light modulation 8=46542
light pulse, short, two-quantum amplification of short light pulse 8=46546
light scattering in atmosphere 8=32243
light source for high-resolution Brillouin spectroscopy in solids 8=49686
light sources, review 8=28769
line-narrowing effects, freq. spectrum, theory 8=29589
liquid, Nd(III), room-temp. 8=46632
liquid, organic anthracene derivative (9,10-diphenylanthracene) laser-pumped 8=46630
lunar ranging for earth gravitational inertial mass ratio meas. 8=41748
metal irradiation, evaporation obs. 8=39494
mineral irradiation, evaporation obs. 8=39494
miniature linac with grating, proposal 8=37810
mirrors, dielectric, high efficiency, for laser techniques, technology 8=42079
mirrors, laser windows and optical filters for laser work 8=49674
mode coupling by cavity-length modulation, theory 8=28658
mode locked, output characteristics 8=28666
mode locking and ultrashort pulses with anisotropic molecular liquid in resonator 8=42071
modes of optical resonator, computation by resonance excitation method 8=42074
modes, TEM_{009}, separation with absorbing film 8=37565
modulation and demodulation of light 8=46647
modulation using grating diffraction effect 8=42122
nanosecond fluorescence decay times meas. 8=34884
nonlinear optical phenomena, anharmonic oscillator model 8=28657
operation and amplification 8=28653
optical cooling of solids, by transfer of energy into atomic vibration 8=39900
optical pulse generator, extended path and digitally scanned 8=46679
optical pumping efficiency calc. by graphical method 8=42067
optical spectrometers, laser calibration for colour blind spectroscopists 8=37675
opto-mechanical shutter for Q-modulation of resonator 8=42077
organic dye, flashlamp pumped 8=46629
organic dye solutions, cryptocyonine in glycerol and CAP in ethanol, time-resolved spectra 8=33230
organic dye, time-resolved stimulated emission spectra 8=28712
organic luminophore solns. in systems under optical pumping, as light transformers 8=28650
organic matter irradiation, evaporation obs. 8=39494
oscillator for meas. relaxation rates for atomic moments 8=29588
oscillator, obs. of quantum phase noise 8=28667
output energy meas., review 8=42059
output mirror, determination of optimum transmission coefficient 8=46566
parallelism of surfaces, interferometric determ. using coherent light 8=37550
parameters measurement, equipment 8=46555
parametric noise emission, noncollinear phase matching 8=24281
parametric oscillations, nonlinear crystal internal to cavity, theory 8=46547
parametric oscilln. using doubly and singly resonant cavities 8=42072
parametric resonance, theory 8=33167
passively switched, mode locked pulse generation 8=28651
passively switched, short-pulse emission origin 8=37558
phase-modulated, internally, quantum theory 8=28660
phase modulation in small-scale filaments 8=24274
photodetachment meas. of the e affinity of He 8=29970
photometric meas. by photoelec. devices 8=42138

Lasers—contd
photon distribution function equation of motion derivation 8=42051
photon statistics 8=28647
plasma production from interaction with solid D targets 8=39064
plasma production, high temp. and press. 8=29994
plasma production in air and air/D_2, and high-temp. meas. 8=47799
plotting of component parameters to build or modify nomal-mode pulsed systems 8=46554
polarizers, prism for use with lasers 8=33158
polymethine dyes, nineteen, stimulated emission over continuous range 710-1060 mμ 8=28713
polymethyl methacrylate rods containing rhodamine dyes, stimulated emission when flashlamp excited 8=28714
principles, operating characts. and appl. 8=33165
prism, regular, triangular, thermal state calc. 8=24276
propagation of pulse in Kerr liquid, steady-state electromagnetic shock solution 8=46549
propionitrile, competition between modes, polarization, magnification of some lines 8=33231
pulse formation from exact soln. of nonlinear eqns. in transient and steady state region 8=46560
pulse production of quasi-stationary phenomena in Fabry-Perot cavity 8=42070
pulse width meas. with two-photon excitation of fluoresc. 8=46533
pulsed light source, spectroscopy by defocused Fabry-Pérot interferometer 8=42250
pulsed mode-locking, dynamics of generation 8=37562
pulsed, synchronization of light pulse output 8=37564
pulsed, threshold meas. by ballistic galvanometer 8=33164
pulses, giant, rel. to ionization of thin polythene films 8=40720
pulses, rel. to dissociation of $A^{III}B^{V}$ semiconducting compounds 8=40437
pumping by electrodeless h.f. discharge 8=33178
pumping pulse effect on birefringence in Nd glass 8=41125
pumping source, power supply, optimum capacitance 8=42052
Q-modulation by controllable-transmitting liquid shutter 8=42063
Q-modulated, memory tube recording of pulse 8=46535
Q-switch using $LiNbO_3$ as electrooptic material, 1.06 μ operation 8=46604
Q-switched, emission of pulse trains, application of Maxwell and density matrix eqns. 8=37549
quantum electronics, effect on technology 8=28655
quantum fluctuations 8=24282-3
quantum noise, multitime correspondence between quantum and classical stochastic processes 8=42055
quantum noise, six-classical variable description 8=42056
quantum optics fundamentals, book 8=24352
quartz-stimulation of Brillouin effect hypersound parametric amplification 8=26583
radiation characts. rel. to resonator switching rates 8=24286
radiation, transformation in stimulated induced combinational scattering 8=46564
Raman, pulse generation by focusing ruby output on H_2 cell 8=28684
Raman scattering, stimulated in H_2 gas by simultaneous fundamental and 2nd harmonic ruby laser radiation 8=46592
Raman scattering, stimulated, mixtures of acetone and CS_2, distribution of anti-Stokes emission 8=46631
Raman spectroscopy of crystal powders 8=49685
rate eqns., Lyapunov's second method 8=28656
rate equations, singular periodic soln., with saturable absorber 8=24284
rays, scattering on plasma 8=39110
reconstruction of images, microwave hologram. 8=46746
reflectivity of metal, changes during pulse 8=45169
resonator appl. meas. freq. spectra laser and passive resonators 8=24292
resonator, confocal, mode obs. 8=24293
resonator mirror, angular oscillatory modes 8=28664
resonator modes, equations for amplitudes 8=46563
resonator, molecular, stability and selectivity 8=46557
resonator, open two-mirror astigmatic 8=33174
resonator with partial polarizers, eigenstates of polarization 8=46559
resonator with radial gain profile, Gaussian mode 8=37563
resonator, X-band microwave exptl. scaling 8=41997
resonators and beam waveguides, scalar theory 8=28669
resonators and waveguides with infinite mirrors, modes 8=33121
resonators, scalar theory 8=28668
rhodamine dyes in polymethyl methacrylate rods, stimulated emission when flashlamp excited 8=28714
ring applications 8=46541
ring device 8=46572
ring, field spatial distribution 8=42073
ring, locking zone phase relations and optical phasemeter 8=28662
rod between parallel plates which act as mirrors, frequency of axial modes 8=24291

Lasers—contd
ruby, R-line quantum efficiency and spatial distrib. of fluorescence 8=42101
satellite, use for atmospheric surface press. meas. 8=45439
scattering by relativistic electrons, spectral intensity and finite vol. 8=42451
scattering Doppler shift, meas. of turbulent velocities 8=39272
scattering for meas. of ion temp. in plasma 8=39114
scattering for plasma e density profile 8=30082
scattering, multiple stimulated, of electrons by strong laser field 8=47087
second-harmonic generation, coherence functions 8=24358
second harmonic generation in crysts. due to field depend. of dipole moment operator 8=36287
second harmonic generation, nonlinear crystal inserted into cavity, optimum coupling 8=46551
selective-loss, single-freq. regime generation 8=33163
with self-resonant feedback, theory 8=24270
semiconducting and recombination radiation 8=31953
semiconductor irradiation, evaporation obs. 8=39494
semiconductor, variable wavelength as spectroscopy light sources 1-20μ 8=28838
shock-wave generation in rarefied gases by impact in Be targets 8=47833
simulation and interpret. of complex LEED patterns 8=35310
spark gap trigger mechanism 8=34431
spark light source for wide band-gap drift mobility meas. 8=42205
spark production, expansion mechanism 8=34432
spark, travelling, ignition below breakdown threshold intensity 8=42061
spectra, single-pulse operation 8=24268
in spectrochemical analysis 8=32157
spectrochemical analysis, substance utilization improvement 8=36645
spectrophone for meas. light absorpt. in gases 8=39218
statistics of fluctuations 8=46538
statistics, photocount versus photon distributions 8=46532
stimulated Brillouin scattering, large and small angle, threshold condition 8=34661
stimulated emission by emission wave-second order wave beats 8=33173
stimulated emission cross section meas. using laser 8=24280
stimulated Raman scatt., relativistic theory 8=24278
stimulated recomb. luminesc. in rigid organic soln. 8=41222
stress prod. in transparent dielecs., and failure 8=40547
temp. determ. of working substance by dilatometric method 8=28661
Theory, averaging of products of Lorentzian line shapes over thermal velocities 8=43214
theory, exact solution for steady-state resonant pulse propagation on inverted medium 8=46548
theory, mode locking by loss modulation 8=42065
theory of phase locking the transverse modes, application
thermal blooming of beams, time dependence 8=37556
thermodynamic limits 8=24382
threshold excitation conditions and interacting fields phase relations 8=28648
tracer-particle fluid velocity meas. 8=41623
two-coupled. theory 8=42064
two-dimensional resonator 8=24290
two mode field, quantum and classical descriptions 8=42066
two-photon enhanced emission, strong radiation 8=37555
ultrashort light pulse formation, nonlinear, nonstationary optical eff. 8=46544
ultrashort pulse, development and uses 8=24275
ultrashort pulses form. dynamics 8=37552
unidirectional optical heterodyne system over 2.6 km atmos. path, design and output 8=27915
up-conversion of 10.6μ beam to visible in HgS crystal, second harmonic generation 8=46552
u.s. diffraction, appl. in optical correlation, anal. and performance 8=28751
u.v., rel. to luminescence of AgCl 8=36469
vaporization of subst. by laser radiation action 8=48288
vessel for resonator for liquid light diffusion studies 8=46536
waves and harmonics appl. to molecular optical anisotropy dispersion studies 8=38774
welding and connected techniques 8=42057
Al plasma form. by surface irrad., ion energy and abundances 8=36051
Ar, ionized gas, construction and theory 8=42085
Ar plasma-beam discharge stimulated emission 4545–5145Å 8=28673
Au plasma form. by surface irrad., ion energy and abundances 8=36051
CO_2-N_2-He, increased efficiency through addition of Xe 8=46583
Cu plasma form. by surface irrad., ion energy and abundances 8=36051
$GaAs_{1-x}P_x$ injection, electroluminescent source, luminance $> 6 \times 10^9$ cd/m² 8=41192

Lasers—contd
Gd chelates soln., stimulated emission from organic ligand 8=24349
Ge film thickness meas. by i.r. absorpt. 8=35173
He-Ne, echoes from atmos. constituents, freq. spectrum, aerosol content of air obs. 8=45442
He-Ne, TEM_{009} modes separation with Ni film, obs. 8=37565
Nd glass stimulated emission spectrum and quasi-continuous generation, 4.2°K 8=36503
Nd(III), room-temp. liq. 8=46632
$Nd^{3+}SeOCl_2$ liquid, self-Q-switching 8=46633
Nd^{3+}-$SeOCl_2$ liquid, stimulated emission in $^4F_{3/2} \rightarrow {}^4I_{13/2}$ transitions 8=46628
RbH_2PO_4 freq. doubling crystal 8=37557
$SeOCl_2$:Nd^{3+}, liq., improvements 8=37624
$SeOCl_2$-Nd^{3+}, liquid Q-switched, 20°C 8=37623
YAG:Nd^{3+}, pumping efficiency of Kr and Xe flash tubes 8=46550
gaseous
active medium, dip parameters in transition line 8=46576
air superradiant laser action in spark discharges at atmos. press. 8=24301
amplification of modulated light signal 8=24269
anodic-bore ion laser tube 8=37571
axial oscillation mode, radiation field 8=24288
design with small discharge tube 8=37570
discharge-modulation noise, suppression using external KDP cell 8=24302
discharge tube, perpendicularly disposed windows 8=24298
coherent axial mode mixing in InSb photo-resistors 8=36372
field theory, nonperturbative, use to explain inhomogeneous effects 8=33175
fluctuations, statistical analysis 8=37573
for frequency characteristic meas. of photoelectronic devices 8=46317
frequency shifting and modulation 8=46568
gain distribution, population densities and rotational temperature for rotation-vibration transition 8=33183
high power, parameters affecting power output 8=37572
in homodyne arrangement for plasma electron density meas. 8=25761
influence on fluoresc. emitted by gas in magnetic field 8=47515
infrared transitions, pulsed excitation of calcium and strontium vapours 8=42088
intra-cavity reflector for Q control 8=28670
K vapour, four wave parametric interaction 8=33177
mirror refl. coeff. meas. 8=24297
mode locking theory, stability conditions 8=28672
molecular gas breakdown obs. 8=29904
moving striatron modes, obs. rel. to modulation of beam 8=24296
nonlinear absorption, theory 8=46575
oscillation build-up, resonator tuning dependence 8=46570
output coupling, optimum, from inhomogeneously broadene lines 8=37567
output power calculation 8=37574
output power calc., multiple vibr. modes 8=33176
plasma instability, influence in working of laser 8=46574
power system, use of cable pulse transformer 8=46577
pressure broadening effects in output 8=24300
in Raman spectroscopy of natural products 8=27793
resonator, single-freq. parameter optimization 8=33188
review, investigations and applications 8=42080
ring, single-frequency operation, frequency stabilization method 8=46578
single mode, polarization in transverse mag. field 8=3756
theoretical applications 8=46571
travelling wave, unidirectional oscillation 8=37569
trifluoromethyl iodide laser, Q switching and mode locking 8=37576
water vapour, meas. of three lines in 7 micron region 8=33189
water vapour, pulsed, gain characts. 8=24310
Zeeman, g value meas. for atomic levels of Ne 8=43198
Ar, breakdown characts. 8=29910
Ar, continuous, saturation, obs. 8=28677
Ar, excitation of CdS rel. to hole and electron behaviour 8=36012
Ar, excitation of $LiNbO_3$ and parametric luminesc 8=4120
Ar ion, anomalous competition between transitions 8=3757
Ar ion, c.w., excitation processes 8=28675
Ar ion, extension of range of laser oscillation 8=46573
Ar ion, 4880, 4765, 5145 Å intensification, saturation 8=243
Ar ion, high current continuous-action cathode 8=46579
Ar^+, light scattering by He reflex discharge rel. to e-density and -temp. meas. 8=38991
Ar, low voltage, pulsed, possible methods of populating working level 8=28671
Ar, pulsed ion, saturation of power output in very high current regions 8=28676
Ar, pulsed ion, with axial mag. field, improved performance 8=24304
Ar, pulsed, output power characteristics 8=42083
Ar, rel. to induced electron emission from W, Ta and LaB_6 8=40710

Lasers—contd
- **gaseous**—contd
  - Ar II, pulse type, effects of mag. field on output 8=28674
  - Ar II, transition probabilities in lower states 8=46580
  - Ar^+, c.w. scatt. obs. of e vel. distrib. in reflex discharge 8=30012
  - Ar^+, pulsed ion, resonance radiation trapping 8=42084
  - CN, far i.r., pulsed output, mode pattern and polarization characts. 8=46582
  - CN, 337 μm, use in meas. electron densities of plasma 8=47856
  - CO_2, c.w., high power generation and appl. as heat source in welding 8=28678
  - CO_2, 4.3μ transient oscill. 8=28680
  - CO_2, heterodyne detection of beat freq. with $Pb_{0.88}Sn_{0.12}Te$ diode laser 8=42098
  - CO_2 high-power, sealed-off, theory and design 8=42087
  - CO_2, induced fast photocond. in Te 8=40676
  - CO_2, intensity of generated pulses, effect of moment of Q-switching 8=37580
  - CO_2, mode locking using GaAs intracavity acousto-optic loss modulator 8=24305
  - CO_2, output timing by selective intracavity absorpt. 8=46586
  - CO_2, passive Q switching by vinyl chloride 8=28679
  - CO_2, population inversion, thermal production 8=37578
  - CO_2, power-dependent distortion of i.r. beam from laser during propag. in liquids 8=25916
  - CO_2, production of multijoule pulses 8=33180
  - CO_2, quartz welding 8=33179
  - CO_2, repetitive pulsing by means of CO_2 gas and other absorbers 8=24306
  - CO_2 sealed-off system, effect of H and O on gas composition 8=46584
  - CO_2-, sealed-off, gas comp. rel. to water vapour and hydrogen effects 8=24307
  - CO_2, sealed-off, influence of Xe as gas additive 8=33184
  - CO_2, stabilization using 3-mirror system 8=46587
  - CO_2, use of pyroelectric detector to meas. Q-switched pulses 8=46581
  - CO_2, vibr. levels population, 9-11μ 8=24374
  - CO_2, vibration-rotation transitions, sequential Q-switching 8=24308
  - CO_2 with near confocal optical resonator, obs. 8=42076
  - CO-N_2, line selection, amplification and vibrational population 8=28681
  - CO_2-He-N_2, composition and power output, gas flow dependence 8=46585
  - CO_2-N_2-He, dependence of discharge current on laser action 8=33182
  - CO_2-N_2-He mixture, increasing output 8=37577
  - CO_2-N_2-He, output power rel. to pump current and length 8=42086
  - CO_2-N_2-He, passive mode locking 8=37579
  - CO_2-N_2-He, use in determ. of CO_2 line parameters 8=29720
  - CO_2-N_2-He, Q-switching with BCl_3 saturating filter 8=46588
  - CO_2, Q-switching and pulse sharpening, analysis 8=33162
  - CO_2, Q-switching, technique to provide h.f. output pulse repetition rate 8=33185
  - CS_2-O_2 chemical, analysis showing new lines and selective excitation 8=46569
  - DCN, assignment of lines 8=28682
  - DCN, new c.w. sub-mm lines, absolute freq. obs. 8=28683
  - HCN, assignment of lines 8=28682
  - HCN, multiple pulse emission 8=24309
  - HCN pulsed, acoustic perturbations 8=46593
  - HF, chemical 8=46590
  - HF, prod. by flash photolysis 8=37582
  - H_2O, far i.f. spectrum calc. 8=42089
  - H_2O lines identification 8=29745
  - H_2O, molecular level parameters rel. to identification 8=29748
  - H_2O spectrum, transitions in $2\nu_2$, ν_3 and ν_1 states 8=29741
  - H_2O vapour, identification of lines 8=42097
  - H_2O + H_2, sub-mm. sealed-off 8=37581
  - He, breakdown characts. 8=29910
  - He-Ne, absorpt. saturation effects, and freq. reproducibility 8=37591
  - He-Ne, aerosol surface meas. appl. 8=34948
  - He-Ne, amplification and loss meas. 8=37587
  - He-Ne, appl. to breakdown plasma afterglow obs. 8=34504
  - He-Ne, arc and h.f. discharges, comparison 8=43456
  - He-Ne at 0.62μ, freq. fluctuation and natural width determ. 8=24318
  - He-Ne, coherence length extension 8=37586
  - He-Ne, cw oscillations from low-voltage arc discharge 8=24315
  - He-Ne, decay of metastable He atoms rel. to condition for population inversion 8=24312
  - He-Ne, Faraday rotation obs. temp. meas. anomaly 8=42094
  - He-Ne, focussing, effects on optical second harmonic generation in $NH_4H_2PO_4$ 8=45139
  - He-Ne, generation of high repetition rate optical pulses 8=28690
  - He-Ne, hysteresis and "hard" excitation, 0.63μ 8=37584
  - He-Ne, intensification line shape, change due to saturation 8=37590
  - He-Ne, intensity fluctuations at 0.63 and 3.39μ 8=24316
  - He-Ne laser beam Faraday rotation on passage through θ-pinch plasma 8=37583
  - He-Ne laser, forced and spontaneous phase locking of transverse modes 8=42093
  - He-Ne laser freq. rel. to at. freq. 8=28688
  - He-Ne laser operating at 6328 Å π transition for Ne double resonance studies 8=47502
  - He-Ne, lifetime of $3P_4$ level in Ne 8=34184
  - He-Ne, light source for Raman spectrometer, resolution improvement 8=24398
  - He-Ne, meas. plasma θ-pinch end loss 8=30115
  - He-Ne, meas. small thermal expansion coeff. 8=35440
  - He-Ne, mode-locked frequency shifting by use of electrooptic effect 8=46595
  - He-Ne, modulated by discharge current, transient behaviour 8=37589
  - He-Ne, modulation by ferromag. resonance of ferroglass 8=24359
  - He-Ne, Ne as nonlinear absorber for mode locking 8=37588
  - He-Ne, observation of saturation peaks by tuned laser differential spectrometry 8=42091
  - He-Ne, optical freq. doubling and mixing 8=42095
  - He-Ne, oscillation noise, suppression 8=42082
  - He-Ne, output at 6328Å, optimum diameter for various tube lengths 8=24314
  - He-Ne, photons correlation, obs. 8=28686
  - He-Ne, photon statistics for threshold light with finite counting time 8=24319
  - He-Ne, power broadening, observation by tuned laser differential spectrometry 8=46594
  - He-Ne, radiation backward scattering from smokes and fogs, optical thickness dependence 8=34949
  - He-Ne, radiation field diffr. struct. 8=24313
  - He-Ne, saturation behaviour in various polarization states 8=46591
  - He-Ne, single-mode, amplitude stabilization 8=33187
  - He-Ne 6328Å, competition and stimulated switching of transverse modes 8=42092
  - He-Ne, 6328Å, side light investigations 8=24320
  - He-Ne 6328Å, unsaturated gain and output power 8=28687
  - He-Ne, small optical loss meas. 8=28689
  - He-Ne, spectroscopic meas. 8=42081
  - He-Ne, spontaneous emission of $Ne(2p_4 \rightarrow 1s_4)$ along axis 8=25363
  - He-Ne spontaneous modulation on beam switching 8=42090
  - He-Ne, sputtered cathode particles 8=24317
  - He-Ne, stabilized at 633 nm, reproducibility of wavelengths 8=28685
  - He-Ne, temp. effect on output power 8=33186
  - He-Ne, type LG-75 8=24311
  - He-Ne, with folded optical path 8=42096
  - He-Xe, spectroscopic meas. 8=42081
  - Ne, spectroscopic meas. 8=42081
  - Ne, superradiant 5401Å pulsed, coherence props. 8=28691
  - Ne-O, O 3^3p level population inversion mechanism, obs. 8=28692
  - NH_3-methane, deuterated, discharge emission spectral obs. 8=33190
  - Te vapor-Ne, pulsed discharge, assignment of transitions to Te II spectrum 8=46596
  - Xe, discharges, time varying, perturbations of microwave cavity fields 8=24294
  - Xe, isotope shifts on i.r. lines, obs. 8=28652
  - Xe-He, c.w. with diffuse mirror non-reson. feedback, freq. characts., 3.50μ 8=37592
- **solid**
  - absorber saturated by strong light pulse, amplification of simultaneous weak pulse 8=37593
  - active material, thermal conditions 8=46599
  - amplification irregularity distrib. obs. 8=33192
  - amplifier chain, high-gain, optical isolation technique 8=46600
  - coatings, single layer antireflection, mismatch 8=42060
  - current pulse generator, short rise time, high current 8=46333
  - diodes, effect of band-tailing on linewidth of spontaneous emission 8=46602
  - electron-beam-pumped, effect of inhomogeneous minority carrier distributions 8=28696
  - electron pumped, photon loss and gain factor meas. 8=28699
  - electron pumped, power and quantum efficiencies 8=33201
  - epitaxial diodes, temp. dependence of linewidth of spontaneous emission 8=42099
  - with external mirrors for low-temp. expts. 8=46537
  - five-component fluoride as laser material 8=28706
  - frequency stabilization by tuned mirrors 8=24321
  - glass:Nd, induced "blow-off" plasma 8=40065
  - with half-wave Q-factor modulator based on ADP crystal 8=24323
  - heating by pumping, change in active element 8=24325
  - injection, elect. modelling 8=33168
  - insulating materials, luminesc. 8=36468
  - junction, carrier lifetime meas. by direct modulation 8=33191
  - Kerr cell shutter, use of reft. prisms 8=24285

    - GaAs, critical temp. for excited carriers in exponential of band tail 8=35749
    - GaAs diode, near-field pattern, effect of material inhomogeneities 8=42109
    - GaAs diode, oblique angles betw. resonator mirrors and p-n junction 8=46603
    - GaAs diode, short-wavelength radiation emission spectrum 8=37613
    - GaAs diode spectrograph, temp. tunable 8=46589
    - GaAs diode, 300˚K, transient temp. distribution and o/p pulse duration 8=33217
    - GaAs diodes, luminescence mode, current noise spectra 8=46614
    - GaAs diodes, optical losses and efficiency 8=33213
    - GaAs diodes, temp. depend. of delay time between current pulse and laser emission 8=24339
    - GaAs, effect of multiple Zn diffusions on threshold and c.w. output power 8=46615
    - GaAs, electron-beam pumped, nonradiative surface recombination 8=49226
    - GaAs, electron pumped, power and quantum efficiencies 8=33201
    - GaAs, emission delays rel. to temp., trapping model 8=3322
    - GaAs, epitaxial compensated, recombination rel. to temp., and band tailing 8=33225
    - GaAs far field patterns 8=33202
    - GaAs injection diode, internal mode excitation 8=24341

Lasers—contd
solid—contd
GaAs injection, multilayer 8=33210
GaAs injection, optimum stimulation 8=33218
GaAs injection, phase locking and external cavity coupling 8=33211
GaAs, injection, self damage 8=33208
GaAs injection-type, far-field patterns with Gaussian profiles in junction plane 8=37597
GaAs injection, with two junctions, mutually pumped 8=33226
GaAs, ionized by passage of Gunn domains, laser action 8=24340
GaAs junction, compensation effects of Zn and Te impurities 8=46616
GaAs junction, continuous microwave oscills. 8=33220
GaAs junction, internal Q switching 8=33212
GaAs junction, internal Q switching 8=37612
GaAs junction, obtaining Gaussian beams 8=33203
GaAs junction, output light spikes at room temp. 8=33204
GaAs junction, transverse modes 8=33206
GaAs near room temp., delay characts. 8=33222
GaAs, n-type at 77°K, threshold current, power output and quantum efficiency 8=33216
GaAs p-n junction, applic. to phase-modulated optical ranging systems 8=42110
GaAs semiconductor injection, mode self-synchronization 8=46565
GaAs semiconductor, liquid N_2 temp., spectral characts. 8=24336
GaAs semiconductor thin-platelets optically pumped 8=46613
GaAs soln. grown, gain and loss rel. to orientation 8=33214
GaAs structures, thermal impedance meas. 8=33223
GaAs transmitter for optical communications 8=37611
Ga(AsP) semiconductor thin platelets optically pumped 8=46613
Ga(AsP) thin platelet resonator, pumped by Ga(AsP) junction, photon output energy rel. to bandgap 8=33215
$GaAs_{1-x}P_x$ injection, delay and memory effects 8=33209
$GaAs_{1-x}P_x$ injection laser diode, pulsed, temporal-line shift 8=49307
$GaAs_{1-x}P_x$ injection lasers 8=46617
$GaAs_{1-x}P_x$, optical filling of delay inducing traps 8=46618
$GaAs_{1-x}P_x$, threshold and emission efficiency temp. dependence 8=33224
$GaAs_xP_{1-x}$ p-n junction, applic. to phase-modulated optical ranging systems 8=42110
GaP_xAs_{1-x}-based injection-type, production and props. 8=36360
GaSb, modes temp. depend. rel. to optical consts near energy gap, 80°K 8=41088
H_2 foil irradiation, plasma production 8=29995
ICN. 538μm emission, mechanism and time behaviour 8=37615
LaF_3:Nd^{3+}, continuous stimulated emission at 300°K 8=37616
LaF_3-SrF_2:Nd^{3+}, operating at 300°K 8=27579
LiF/U^{6+}, suitability of fluorescence props. for laser 8=46620
$LiNbO_3$, pulsed parametric oscilln. and power limiting 8=42078
Nd, and ruby, beam superposition in freq. mixing 8=24333
Nd glass, band narrowing with passive shutter 8=24345
Nd glass, coupled, three-mirror system 8=37619
Nd glass, electro-optical modulation of Q-factor 8=24342
Nd glass, energy characts. of radiation with Q switching 8=24348
Nd glass, form. and ignition of metal droplets 8=34740
Nd glass in Fabry-Perot resonator, polarized emission 8=42111
Nd glass, noise obs. 8=24344
Nd glass, nonlinear resonator 8=33227
Nd glass, parameters determ. 8=24343
Nd glass rod pumping with compressed Xe_2 light source 8=28709
Nd glass, self-focusing by density change 8=36310
Nd glass, single-mode, waveguide type 8=24346
Nd glass, with unstable resonator, props 8=46625
Nd, plane mirror resonator, spectral effects 8=24287
Nd, polarization of radiation 8=37617
Nd, self-focusing of 1.06μ radiation 8=24347
Nd, spectral effects of resonator elements 8=24289
Nd, use of Q-switch dyes 8=42112
Nd, with plane mirrors, internal modulation 8=33228
Nd^{3+} activated, stimulated emission studies rel. to laser generation 8=37595
Nd^{3+} doped calcium fluorophosphate, optical pumping and oscillations 8=37620
Nd^{3+}, spectroscopic investigations of stimulated radiation 8=46621
Nd:YAG oscillator, intracavity tuning, polarization and Q switching 8=28707
Nd:YAG, picosec. pulses, obs. 8=37618
Nd:YAG, repetitively pump-pulsed, dynamics 8=46623
Nd:YAG, thermal effects and transverse mode control 8=28708
Nd:YAl garnet, mode-locked, characts., 8=46622
$Pb_{0.88}Sn_{0.12}Te$ diode, tunable, heterodyne detection of beat freq. with CO_2 laser 8=42098

Lasers—contd
solid—contd
$Pb_{1-x}Sn_xTe$ diode, i.r. up to 28μ, props. at 12° and 77°K 8=37621
$SeOCl_2$:Nd^{+3}, absorption cross section of Nd^{+3} transition 8=46624
UO_2^{+2}:Nd^{+3} laser glass, Ce-stabilized 8=28710
YAG-Nd, single-mode, static and dynamic behaviour 8=46626
YAG:Nd, CW laser transitions at room temperature 8=46627
YAl garnet: Nd^{3+} ring, close-lying mode suppression 8=46558
YAlG:Nd, continuous 0.532μ solid-state source using $Ba_2NaNb_5O_{15}$ in cavity 8=33253
YGa garnet: Nd single crysts. and growth, obs. 8=39694
YGdAl:Nd^{3+} growth and characts. 8=39692
YVO_4 tetragonal crystals containing Nd^{3+}, induced emission at 300°K 8=33229
ZnO crystals, electron-beam pumped 8=49765
ZnO far field patterns 8=33202

liquid and solid, Brillouin scatt. of neutrons rel. to collective particle motion 8=25869
liquid, cooperative modes of motion 8=34725
liquid, cooperative modes of motion, temp. depend. 8=34726
liquid, density 8=39325
liquid, mass-current fluctuations 8=25890
liquid, nucleated by solid Cu, Fe and Sb, undercooling 8=43911
liquid, structure factor 8=48062
neutrons, fast, shielding and collimation props. 8=33793
optical properties in the far u.v. 8=31978
phonon states, tunnelling and neutron-derived densities, origin of discrepancy 8=26883
photoelectric γ cross-section determ. 50-208 keV 8=36004
positron annihilation, single-quantum, cross sections 8=44670
rock isotope abundances, concordia plots rel. to age of earth 8=27856
shield, γ-ray leakage through slit 8=38595
slip bands, orientation distrib. under pure shear 8=48864
solubility in liq. Na 8=43762
superconducting, complex elec. cond., strong-coupling calc. 8=35854
supercooling nucleation behaviour 8=48257
surface atoms, mean displacement 8=30935
superconducting shell, zero mag. field attainment 8=27044
superconducting, surface resistance meas. at 2.868 GHz 8=40383
superconductivity predictions from phonon spectrum and e.-phonon interactions 8=44719
thin films, critical field, influence of structure disorder and defects 8=40382

Lead—contd
thin films, production by diffusion evaporation 8=48456
tunnel effect under pressures up to 15kbar at 1.3°K 8=44737
u.s. attenuation, longit., low-temp. amplitude-independent 8=44321
u.s. attenuation, longit., low-temp. amplitude-independent 8=44322
X-ray Lα, emission, depth distrib. and absorpt. in anticathode, 17-29 kV 8=36420
Cu film on Pb, proximity effects in supercond. 8=27015
Pb$^{206-8}$, muonic, hyperfine interactions obs. 8=38772
Pb(II) electrode in NaNO$_3$-KNO$_3$ eutectic, linear sweep voltammetry 8=27750
Pb III series, intercombinational transition probabilities 8=38711
Pb^{2+}, diffusion in NaCl crysts. 8=31011
Sn^{119m} isomer shift 8=26015
ZnTe, hole-traps, Pb-associated 8=26884
in ZrSiO$_4$, e microprobe meas. 8=27811

Lead compounds
alloys, grain growth dependence on low solubility additions during recrystallization 8=35280
alloys, superconducting transition temps. 8=44729
chalcogenide films, mono- and multilayer, epitaxially grown structure 8=26115
ferrites with oxide additives, mag. residual induction and energy product 8=40842
halides, planar, γ-irrad., colour centre prod., e.s.r. and optical meas. 8=36249
lead(II) hydroxide, structure 8=44255
magnetoplumbite, Bitter patterns rel. to changes in width and domain shape 8=31557
oxides, thermodynamic props. by e.m.f. meas. 8=48729
perovskites, phase transforms. 8=26063
thioborate, crystal structure, new type 8=35349
BiFeO$_3$-Pb(Fe$_{0.5}$Nb$_{0.5}$)O$_3$ solid soln. system, phase transitions 8=39543
Pb rich alloy of Pb-Sn-Sb ternary system, aging 8=26764
Pb-Ag eutectic alloy, structure during solidification 8=26037
Pb-Bi alloys, films at low temp., electron diffraction examination of structure 8=35152
Pb–Bi alloys, superconducting, mag. field spatial distrib. and crit. current density 8=40381
Pb-Bi alloys, superconducting, pinning of flux vortices 8=49200
Pb-Bi solid soln., indirect nuclear spin-spin interactions in Pb by spin echo 8=40996
Pb-Bi system, metastable phases 8=30704
Pb–Bi system, superconducting transition temp. in amorphous phase 8=35844
Pb-BiCl$_3$ molten mixtures, absorpt. spectra 440-1000 mμ to interact. 8=34878
PbBi$_2$Se$_4$, struct. electron diff. exam. 8=35348
PbBr$_2$, anion vacancies in single crystals 8=48812
PbBr$_2$, ionic recomb. rates for weak ionization 8=43476
PbBr$_2$ molten, self-diffusion 8=34808
PbCa$_2$Si$_3$O$_9$, margarosanite, struct. and cryst. chem. 8=44248
PbCd$_{0.5}$W$_{0.5}$O$_3$, ferrielectric phase transitions between 130-400°C and at 420°C 8=40583
PbCl$_2$, crystal growth, effect of bivalent cation addition to soln. before crystallization 8=44120
PbCl$_2$, elastic consts. from vel. meas. of u.s. waves 8=35712
PbCrO$_4$, counterdiffusion of Pb^{++} and CrO$_4$ in agar gel 8=48244
Pb-0.5% Cu alloy, effect of dopant on alloy structure and fatigue life 8=26841
PbF, dissoc. energy 8=38933
PbF$_2$ Cherenkov counter for gamma rays and e$^{\pm}$ 8=46885
PbF$_2$ crystal Cherenkov shower detector 8=33613
PbF$_2$, e.p.r. and spin lattice relaxation of Yb^{3+} 8=36253
PbF$_2$, mass spectra of vapour 8=38933
PbF$_2$: Gd^{3+}, spectrum rel. to excited levels of Gd^{3+} at 77°K 8=36250
Pb(Fe$_{0.5}$Nb$_{0.5}$)O$_3$, e.p.r. rel. to para- to ferroelec. transition 8=27488
Pb(Fe$_{1/2}$Ta$_{1/2}$)O$_3$, dielectric and magnetic props. 8=40615
Pb-Ga, liq., critical opalescence, temp. depend. 8=48149
Pb-Hg solid soln., indirect nuclear spin-spin interactions in Pb by spin echo 8=40996
PbI, Zeeman effect and intensity anomalies 8=34148
PbI$_2$, defect energy level structure from photo-excitation studies 8=44650
PbI$_2$, ionic recomb. rates for weak ionization 8=43476
PbI$_2$, polytypism as high-order transformation 8=44012
Pb-In alloy, intermediate state structures, transition from flux lattice 8=44731
Pb–In alloys, stacking fault formation during deformation rel. to alloy comp. 8=35578
Pb-6.3 at.% In foils, type II superconductor, flux line arrangement 8=40384
Pb-In solid soln., indirect nuclear spin-spin interactions in Pb by spin echo 8=40996
Pb$_{85}$In$_{15}$ superconductor, resistive and mag. props., demonstration 8=35855
Pb-Mg solid solns., decay 8=35062
PbMg$_{1/3}$Nb$_{2/3}$O$_3$ crystals, electro optical effects 8=36400
Pb(Mg$_{1/3}$Nb$_{2/3}$)O$_3$-PbTiO$_3$-PbZrO$_3$ ceramics with Ba or Sr substitutions, piezoelectric props. and phase relations 8=31442

Lead compounds—contd
PbMoO$_4$, i.r. spectra 8=45179
PbMoO$_4$, laser-induced Raman spectra 8=31969
PbMoO$_4$: Ce^{3+}, Yb^{3+}, spin-lattice relax., contrib. processes 8=40911
α-PbN$_6$, cryst. struct., neutron diffr. 8=30908
Pb$_2$(NiW)O$_6$ synthesized under high pressures, phase transitions 8=35122
Pb(NO$_3$)$_2$, annealing of γ-irrad. damage, kinetics 8=44414
Pb(NO$_3$)$_2$, crystal growth, effect of methylene blue impurity 8=39679
PbO, electrical and optical props. 8=26948
PbO layers, microstruct. rel. to optical filter characts. 8=28765
PbO polycrystalline, SCL currents and trap distrib. from photoconductivity 8=36024
PbO vapour deposited layers, preferred crystal orientation 8=30756
PbO, yellow, forbidden band width, determ. 8=32022
PbO. 2B$_2$O$_3$, enthalpy of fusion 8=43905
PbO-B$_2$O$_3$-PbF$_2$ melts, solubility of trivalent oxides, temp. dependence, 1000-1500°C 8=39320
PbO-B$_2$O$_3$-SiO$_2$, phase equilibria and liq. immiscibility 8=34749
PbO-La$_2$O$_3$-B$_2$O$_3$ optical glasses exhibiting unusual dispersion characts. 8=45214
PbO–SiO$_2$ silicates, crystalline and vitreous, spectra 8=32021
PbO-TiO$_2$ mixed films, elec. props and permittivity rel. to struct. 8=49347
PbS, artificial, morphology rel. to hydrodynamic flow theory 8=26197
PbS, chemically deposited, influence of impurities on photosensitivity 8=44931
n-PbS, conduction band nonparabolicity 8=35776
n-PbS, conduction band structure, 77-300°K 8=27119
PbS crystals, steady-state creep, stoichiometric defects and foreign atom addition effects 8=40179
PbS, deformation state, investigation by harmonic analysis of form of interference lines 8=31227
PbS, effect of temp. on photoconductivity 8=44930
PbS film, monocrystalline, photosensitivity 8=40667
PbS films, polycrystalline, and crystals, photo-e.m.f. force temp. dependence 8=36025
PbS films, polycrystalline, polarization currents rel. to oxygen diffusion 8=35909
PbS, growth in silica gels, thioacetamide ion donor 8=48555
PbS on Si, mica and PbS single-crystal substrate, growth process rel. to substrate defect structure 8=26280
PbS, thermal conductivity lattice and electronic components, separate meas., 3-100°K 8=39951
PbS + CdO → PbO + CdS, solid state, reaction kinetics and diff. mech. 8=49839-40
PbS(Te) lattice parameters rel. to pressure 8=48669
Pb-0.5% Sb alloy, effect of dopant on alloy structure and fatigue life 8=26841
Pb-Sb alloys, liquid, density rel. to temps. 8=39326
Pb–Sb alloys, (to 2 wt.% Sb) ageing after quenching 8=35121
Pb–0.5% Sb, fatigue bands developed on reversed bending cycles 8=35714
Pb-Sb system, metastable phases 8=30704
Pb-Sb-Sn alloys, liquid, density rel. to temp. 8=39326
PbSe, anomalous diffusion of Ni 8=39981
n-PbSe, conduction band nonparabolicity 8=35776
PbSe epitaxic film formation by sublimation in vacuo 8=26123
PbSe films, polycrystalline, photoconductive meas. at 77°K rel. to mobility changes and heat treatment 8=27328
PbSe, growth, annealing and diffusion coeffs. 8=44141
PbSe, thermal conductivity lattice and electronic components, separate meas., 3-100°K 8=39951
PbSe:Gd, doping rel. to elec. props. 8=44805
Pb-Sn alloys, cell boundary diffusivity, calcs. from Cahn and Turnbull theories 8=30670
Pb–Sn alloys, electron reflection, 600 to 1200 keV 8=44197
Pb-0.005% Sn alloy, hydrodynamic currents in solidification front region 8=34968
Pb-Sn alloys, liq. self-diffusion of Ag impurity 8=34806
Pb-Sn solid solns, decay 8=35062
Pb–Sn system, cell growth, calc. of limiting boundary diffusivities 8=48533
PbSnO$_3$, perovskite, high press. synthesis and lattice consts. 8=48554
Pb$_{1-x}$Sn$_x$ Se alloys, phase diag. 8=48594
Pb$_{1-x}$Sn$_x$Se, solid solubility, optical props. and band struct. 8=43980
Pb$_{0.88}$Sn$_{0.12}$Te laser diode, tunable, detection of beat freq. with CO$_2$ laser 8=42098
Pb$_{1-x}$Sn$_x$Te alloys, T — x phase diagrams and lattice parameter values 8=26077
Pb$_{1-x}$Sn$_x$Te, growth, annealing and diffusion coeffs. 8=44141
Pb$_{1-x}$Sn$_x$Te laser, i.r. up to 28μ, props. at 12° and 77°K 8=37621
Pb$_{1-x}$Sn$_x$Te, solid solubility, optical props. and band struct. 8=43980
Pb$_{1-x}$ Sn$_x$Te, two valence band evidence and thermal energy gap 8=44651

Lead compounds—contd
- $(Pb_xSr_{1-x})TiO_3$, crystal growth by traveling heater method 8=44139
- $Pb(SSCOC_4H_9)_2$, crystal struct. 8=39855
- Pb-0.5% Te alloy, effect of dopant on alloy structure and fatigue life 8=26841
- PbTe, elastic constants, thermal expansion and Debye temp., 8=49044
- PbTe films, temp. depend. of photoelec. parameters 8=40668
- PbTe, high pressure transformations 8=35082
- PbTe, Knight shift calcs. using augmented-plane-wave method 8=40995
- PbTe, localized energy levels in forbidden gap, $PbTe-Al_2O_3$ junction tunnelling obs. 8=35910
- PbTe, thermal conductivity lattice and electronic components, separate meas. 3-100°K 8=39951
- PbTe, valence band using transport phenomena 8=44804
- p-PbTe-CdTe alloy, magnetoresistance at 77°K 8=49257
- PbTe-SnTe, cryst. growth, phase diagram and props. 8=44140
- PbTe-SnTe-PbS system, current carrier scattering mechanism 8=31385
- PbTe:In p-n junctions, tunnelling electrons scatt. by impurity vibrs., 1-10°K 8=35938
- PbTe: Na, drift mobility of light-mass holes 8=49258
- PbTe:Sb, electrical cond. and Hall effect 8=40478
- $PbTe_{0.5}Se_{0.5}$, I^+ doping effects on thermal conducitivity, 100-400°K 8=35461
- $PbTe_xSe_{1-x}$ solid solns., forbidden band width temp. dependence 8=40247

  metals, solid state and liq. state physics, links and review 8=30398
  methanol, microscopic transport props., use of atomic substitution in n scatt. studies 8=30403
  molecular motion, effects on n.m.r. relax. 8=39426
  molecular motion study by nuclear relax. 8=30399
  optical Kerr mol. consts., calc. 8=34845
  organic, bubble growth rel. to Jakob. number 8=34996
  organic mixtures, concs., by internal filling counters 8=27817
  polar dielecs., props. by "ionic thermoconductivity" method 8=25944
  refractive index variation in strong field of ruby laser 8=41098
  radiation nucleation, model of thermal spike effect 8=41292
  rotationlike motion of mols. 8=48157
  salinity gradient, stable, heated from below, behaviour 8=43716
  sliding of detonation and shock waves over surfaces 8=23949
  solid matter solubility in liquid phases, equation 8=48070
  spin-lattice relax. time rel. to molec. rotation and re-orientation 8=30531
  supercooled, viscoelastic relaxation 8=30430
  viscous, pressure drop created by sphere settling, Reynolds no. 0. 2 to 21, 000 8=39263
Liquids—contd
  wake of three cylinders, low Reynolds number, smoke obs. 8=30371
  water in capillaries, shift in temp. of max. density 8=34790
  water, proton dynamics from slow n. inelastic scattering 8=39303
  weightless, outside earth's gravitational field 8=48104
  Ar, liquified, motion, and ion mobilities 8=48193
  CO_2, in crit. region, heat transfer by free convection from Pt wire 8=34823
  Ge melt temp. field in growing crystals by the Czochralski method 8=30829
  $PbO-B_2O_4-SiO_2$, immiscibility and phase equilibria 8=34749
  structure
    in above-critical region, theory 8=25995
    acetonitrile, spin-lattice relax. and molec. reorientation in liq. 8=30539
    alcohols, hydrogen bonding 8=48059
    alkali metal nitrate melts 8=39378
    ammonia, liquid, rel. to absorpt. spectra of $Li\cdot NH_2$ solns. 8=39380
    amphiphile aqueous cryst. solns., phase structs. 8=30408
    p-azoxyanisol liquid crystals, in permanent and variable elec. fields, X-ray study 8=25881
    benzene, x-ray diffrn. 8=34764
    carbon tetrachloride, neutron diffraction 8=34761
    cholesteric crystal, distortion by mag. field 8=30407
    cholesteric liq. crystals, effects of elec. and mag. fields 8=34768
    cholesterol derivatives, liq. crysts. 8=48069
    density expansions of radial distrib., correl. and scatt. intensity functions 8=25876
    deuterium, ortho-para solns., neutron scat. 8=30404
    diborane, significant struct. rel. to phys. props. 8=43755
    ethyl alcohol, i.r. spectroscopic study of non-H-bonded OH groups 8=30401
    feldspar and silica mixtures 8=39297
    flow birefringence of simple liqs. 8=39369
    formamide, and K1 solns., X-ray diffr. 8=39306
    free volume 8=34760
    glass, melt and solid, similarities 8=30790
    hydrated electron, model 8=34752
    hydrazine, significant struct. rel. to phys. props. 8=43755
    hydrogeneous, neutron scatt. cross-section meas. 8=48065
    inert gases in H_2O 8=48077
    metal melts ordering states 8=34759
    metal melts, paracrystalline lattice with vacancies model 8=25979
    metal, theory and exptl. technique 8=34758
    metals, book 8=34753
    methyl alcohol, i.r. spectroscopic study of non-H-bonded OH groups 8=30401
    mixtures, X-ray or neutron scatt. data anal. 8=39628
    molecular groups, correl. between positions and orientations, distrib. functions 8=25868
    molecular motion study by nuclear relax. 8=30399
    molecular rot. influence on viscosity and shear relax. times 8=30426
    molecular, thermal agitation coeff. determ. for diffr. studies 8=25878
    neutron scatt. heating arrangement up to 900° C 8=34762
    nematic from obs. of optical rotation 8=43826
    octyl alcohols, transform., evidence from PVT meas. 8=39296
    organic liqs., correl. with positronium annihilation 8=30406
    polar films orientation by cell surface elec. fields, i.r. absorpt. obs. 8=39302
    polyethylene, oligomeric, conformational struct. in aromatic nonaromatic solvent mixtures, n.m.r. obs. 8=43765
    scattering studies with X-rays and neutrons, comparison 8=30402
    solutions, x-ray and n diffr. methods 8=34763
    spin-lattice relax., theory 8=39427
    thermal motion 8=48063
    water, and distrib. functions, by X-ray scatt. from free surface in equilib. with vapour 8=25872
    water, effect of solutes and temp. 8=39295
    water, exciton and interband transition, band gap 8=43752
    water, i.r. spectroscopic study of non-H-bonded OH groups 8=30401
    water, light, molec. motion models, comp. with results from neutron scatt. 8=39304
    water, modification of Nemethy-Scheraga theory 8=43754
    water, study by i.r. absorpt. of HEO mols. in H_2O at high press. and temp. 8=25930
    water, theory of solvent power for hydrocarbons 8=48085
    water, urea as struct. breaker 8=48085
    water-alcohol solns. of KCl 8=39407
    Al, coordination number transforms, viscosity obs. 8=2586
    Al, radial distrib. function from Percus-Yevick and convolution hypernetted-chain eqns. at high densities 8=48058
    Al-Cu, coordination number transforms., viscosity obs. 8=25866
    Al-Ge alloys, eutectic, atom distribution 8=39298
    Al-Mg, coordination number transforms., viscosity obs. 8=25866

Ar, α-particle induced, obs. 8=47521
CCl_4-Na, K flames chemiluminesc., C_2 high-press bands excitation mechanism, obs. 8=38816
CO, chemiluminesc. from flames 8=27698
CO, Xe-sensitized, excited by 1470 Å radiation 8=25457
Cd atomic vapour, double resonance excited by modulated light 8=38685
Cs, fluoresc. quenching cross-sections, determ. by flame tech. 8=29617
$H + O_3$, i.r. chemiluminesc. 8=32099
H_2O, vac. u. v. photodecomp. 8=47613
He, high-pressure, scintillation induced by α-particles, recombination 8=29642
Hg-vapour green-band emission 8=29944
K, fluoresc. quenching cross-sections, determ. by flame tech. 8=29617
NO afterglow, temp. depend. 8=38993
N_2 afterglow, temp. depend. of chemiluminesc. 8=27712
N_2^+, from vac. u. v. photon impact 8=47609
Na, fluoresc. and energy transfer in collisions with inert gases 8=34182
Ne, $^2P_4$ fluoresc. under laser reson. illum., 6328A 8=38675
Ne, $^3P^0$ and $^1P^0$ populations time dependence during post-luminescence under c. m. wave pulses 8=38686
Rb, fluoresc. quenching cross-sections, determ. by flame tech. 8=29617
SiC, vapour, emission spectrum time scanning 8=34231
Tl, fluoresc. quenching cross-sections, determ. by flame tech. 8=29618
liquids and solutions
acridine-biacetyl-benzene, triplet acridine form. by triplet biacetyl energy transfer, obs. 8=25925
acridine, quenching in ethanol soln. 8=41284
aminobenzoic acids, fluorescence quenching by dinitrobenzenes. 8=43846
aminopyridines in soln. 8=48169
anthracene in n-paraffin rel. to phase transitions of solvent 8=25938
anthracene-perylene fluorescence in benzene solns. energy transfer 8=39387
aromatic hydrocarbons, effect of alcoholic solvents on fluoresc. yield 8=48171
aromatic hydro carbons, fluoresc. yield and triplet state form efficiencies 8=43832

Luminescence—contd
liquids and solutions—contd
aromatic hydrocarbons, oxygen quenching of singlet states 8=48170
aromatics solns., delayed luminesc. and triplet quantum yields, obs. 8=25941
aromatic hydrocarbon solns, p-type delayed fluoresc. 8=30498
benzene and derivatives, excitation by electron impact 8=48172
benzene excimers, semiempirical MO calc. 8=34313
benzodioxane-1, 4, O-substituted 8=48173
chemiluminescence, preannihilative, mechanism 8=27692/3
coronene in n-paraffin rel. to phase transitions of solvent 8=25938
cryptocyanine solns., laser flash 8=48162
crystal with impurity centre, density matrix method considerations 8=45249
diacetyl, sensitized, benzene and toluene triplet-triplet energy transfer 8=34316
DNA, in nucleosides and nucleotides in soln., rel. to energy transfer and excited states in DNA 8=25939
9, 10-diphenylanthracene as fluoresc. standard 8=39391
2, 5-diphenyloxazole in benzene, toluene, p-xylene and mesitylene, excimer, fluoresc. solvent-solute energy transfer 8=25940
fluoranthene and derivatives, anomalous fluoresc. 8=30500
fluorenon, absorpt. bands 8=34328
Hafner's hydrocarbons, substituted, anomalous emission 8=48175
hexafluoroacetone-hexafluorobiacetyl mixtures, energy transfer 8=48168
laser dyes, nanosecond fluorescence decay times meas. 8=34884
liquid scintillators, organic, temperature dependence of energy degradation 8=46869
liquid scintillators with high-speed and efficiency, excited by gamma rays 8=46866
luminophors, org. and inorg., for u.v. radiation meas. with photoresistors 8=48166
rel. to molecular Einstein coeffs. 8=39367
napthacene in n-paraffin rel. to phase transitions of solvent 8=25938
naphthalene + 1, 4-dicyanobenzene, triple complex formation 8=48176
naphthalene in soln., monomer and excimer phosphoresc. 8=30501
N-(α-naphthyl)-carbazole in soln., phosphoresc. 8=43849
nonradiative energy transfer in systems with frozen rot. Brownian motion 8=34883
nucleosides, nucleotides and DNA in soln., rel. to energy transfer and excited states in DNA 8=25939
organic dyes for Q-switch laser, fluoresc. and bleaching 8=28693
organic, phosphoresc. and delayed fluoresc., kinetics and chem. appls. 8=25936
organic, radioluminesc. rel. to mol. excitation kinetics, obs. 8=39384
oxazole, and derivatives, excimer formation 8=29796
perylene-N in N-dimethylaniline, fluoresc. quenching via charge transfer 8=34885
phenanthrene in soln., monomer and excimer phosphoresc. 8=30501
phenanthrolines, fluoresc. and phosphoresc. spectra 8=43382
phenolic binary complexes, hydrophobin bond formation 8=43850
photoluminescence, polarization spectra 8=39386
phthalamides, polarisation in fluorescence spectrum, temp. dependence 8=30502
pyrene in cyclohexane and ethanol, delayed luminesc. and triplet quantum fields, obs. 8=25941
pyrene in n-paraffin rel. to phase transitions of solvent 8=25938
pyrene, in solns. 8=25942
quenching, effect of diffusion 8=34882
quenching, transient and solvent effects, kinetics 8=39385
quinine bisulphate as fluoresc. standard 8=39391
rare earths in H_2SO_4, chemiluminesc. in visible and u. v. range 8=30495
radiation-induced scintillator luminesc. in cyclohexane, mechanism 8=43847
relaxation of local temp. of centres 8=39388
rhodamine B in ethylene glycol, fluoresc. meas. of photon flux 8=46653
rhodopsin extracts in 29° digitonin, 575-600 mμ 8=49828
scintillation mixes for aq. T counting, efficiencies and costs 8=28979
scintillator solns., u. v. excited, decay times 8=30496
scintillators, time dependence of scintillations and the effect on pulse-shape discrimination 8=46868
sonoluminescence produced in liqs. under cavitation. thermal and elec. hypotheses 8=48167
spectrophotofluorometer for absorpt. and transmission 8=46694
tetraphenylbutadienes in soln., effect of intramolec. twisting 8=39390

Luminescence—contd
liquids and solutions—contd
toluene scintillators, max. H_2O conc., dioxane and naphthalene effects 8=43844
transfer of electronic excitation energy, effect of diffusion 8=34881-2
trypaflavine, photoluminesc. quenching by rhodamine in glycerine solns 8=48174
Ce^{3+} organic complexes 8=34873
Eu β-diketone chelates, in soln., fluoresc. characts. 8=32071
Eu chelate cpds., in water-methanol 8=30499
Eu chelates, D isotope effects 8=30503
H_2O, sonoluminescence, temp. depend. 8=39389
KI soln., effect of ultrasonic irradiation cavitation 8=37278
Tb chelates, D isotope effects 8=30503
UO_2^{2+} in β-diketone + N-containing organic bases triple complexes, intramol. energy transfer, obs. 8=34288
$UO_2(NO_3)_2$ water solns. in presence of $Na_4P_4O_{12}$ photoluminescence 8=25943
Xe, liquid, in electric field, induced by α-particle 8=25937
solids, inorganic
alkali halide crystal phosphors, F centers interaction with microdefects in crystal lattice 8=31123
alkali halide crystals, relaxation processes, effect of cryst. lattice microdefects 8=36472
alkali halides, and tribo-electron emission 8=31462
alkali metal halides: Tl^+, rel. to lattice structure 8=36470
alkaline earth aluminates: Eu^{2+}, u. v. excitation and emission mechanisms 8=45253
alkaline earth cpds.: Eu^{2+}, 390-520 nm emission 8=45254
anthracene, crystalline, phosphorescence, triplet exciton 8=27665
anthracene, X-ray excited, prompt and delayed fluoresc. 8=27666
antimonates, Nb^{5+}-activated 8=41207
cathodo-and radioluminesc., theory 8=36462
crystals, co-operative, donor-acceptor mechanisms 8=31942
diamond, and similar lattices 8=36475
diamond, natural, excitation spectra 8=36473
diamond, rel. to at. vibration spectrum, review 8=43922
films, thin, prep. and props. 8=36454
glass, oxide: Er^{3+}, sensitization by other rare-earth ions 8=36486
insulators, for lasers 8=36468
leucosapphire, grown from tungstate melts 8=39648
magnetic props. of centres, rel. to luminesc., 8=41178
measurements rel. to e.s.r. 8=31840
meteorites, rocks and glasses under proton bombard. rel. to transient lunar events 8=28145
niobates, oxidic, cryst. struct. effect on luminesc. 8=45284
nitrite salts 8=49810
phosphors, Eu^{3+}-activated, quantum efficiency meas. using excitation to selected Cu^{3+} levels 8=49798
phosphor: Mn^{2+}, characteristics rel. to crystal lattice obs. 8=27641
plastic, transient nonlinear response to electron irradiation 8=46865
polyethylene, e-irradiated, Hg lamp excitation 8=24729
radical-recombination, on H excitation, temp. effects, 270-470°C 8=36457
rare-earth-activated phosphors, mechanism 8=32052
rare earth crystalline complexes, tests on structural forms 8=36467
rare earth phosphate based phosphors with fast decay rates 8=45285
rare earth phosphate-based phosphors, spectral props. 8=49747
rare earth phosphors and scintillators, survey of electron- and X-ray-stimulated luminescence 8=46874
rare earths, cathodoluminesc. analysis 8=36643
ruby, fluoresc. dosimeter for pulsed ionizing radiation 8=45258
ruby, grown from tungstate melts 8=39648
ruby, spatial distrib. of fluorescence and R-line quantum efficiency 8=42101
ruby, two-photon excitation 8=45259
semiconductors, cathodoluminesc., obs. 8=41187
semiconductor donor-acceptor pairs as radiative recombination centres, review 8=27055
silicate glass: Nd, Yb, stimulated emission 8=36512
tantalates, oxidic, cryst. struct. effect on luminesc. 8=45284
titanates, oxidic, cryst. struct. effect on luminesc. 8=45284
tungstates, oxidic, cryst. struct. effect on luminesc. 8=45284
III-V compound semiconds., electron-hole radiative recomb. mechs. 8=45248
II-VI cpds., V-doped 8=45251
uranyl cpds., fluorescence spectra, interpret. 8=49758
uranyl salts, fluoresc. decay rel. to temp., obs. 8=45288
uranyl nitrates, complexed, fine struct. rel. to anion and cation vibrs., 77°K 8=36514
vitreous, rel. to struct. and phys. props. 8=36465
Ag halides, temp. extinction range, behaviour 8=41181
Ag halides: Tl^+, rel. to lattice structure 8=36470

Luminescence—contd

- **solids, inorganic**—contd
  - AgBr containing iodide, and mirror-like absorpt. 8=41050
  - AgBr, induced by Q-switched ruby laser 8=45255
  - AgCl, excited by u.v. laser 8=36469
  - AgCl, induced by Q-switched ruby laser 8=45255
  - AgCl, radiative lifetime of I^-, rel. to excited state structure 8=45257
  - AgI, powdered, phosphorescent excitation spectra recording 8=36484
  - Al crystal, K-shell fluoresc. under ion bombard. 100-200keV 8=49788
  - $Al_xGa_{1-x}P$, photoluminescence, and preparation 8=26233
  - AlP, fluoresc. rel. to temp. of synthesis 8=44115
  - AlSb, Se-doped, sharp-line donor-acceptor pair spectra 8=36471
  - BaI_2, for X-ray and photo-excitation 8=41182
  - $(Ba_xSr_yCa_z)MgSi_2O_8$: Eu, rel. to equilibria in subsolidus phases 8=49789
  - C_2N_2 (cyanogen) condensed in solid N_2 and Ar 8=25455
  - Ca halophosphate (As, Mn), decay obs. 8=27642
  - CaF_2:Ce^{3+}, constant-temp., rel. to 4f ↔ 5d transitions 8=45263
  - CaF_2: Ce^{3+}, f-d transitions, relative intensities calc. 8=36476
  - CaF_2-ErF_3: Tm^{3+}, $Er^{3+} \rightarrow Tm^{3+}$ energy transfer, conc. and temp. depend. 8=41185
  - CaF_2-ErF_3: Ho^{3+}, $Er^{3+} \rightarrow Ho^{3+}$ energy transfer, conc. and temp. depend. 8=41185
  - CaF_2:Eu^{2+}, rel. to Zeeman effect 8=45177
  - CaF_2:Ho^{3+}, on laser illumination rel. to two-photon absorpt. 8=45180
  - CaF_2:$Pu^{3+,4+}$ 8=31968
  - CaF_2:Y, X-irradiated, polarized, and structure of centres 8=36478
  - CaF_2: Yb + Nd, multiple sensitization effects 8=41183
  - CaO, phosphoresc., u.v. and γ excited, decay rel. to trap depths distrib. 8=41186
  - CaO, radical-recombination mechanism on excitation with H 8=41177
  - $Ca_3(PO_4)_2$ activated by Hg-like ions 8=36479
  - CaS: Zr phosphors, mag. susceptibility obs. 8=44967
  - $CaWO_4$, effect of electron irradiation 8=36481
  - $CaWO_4$ luminophor, pulse-excited, decay rel. to temp. 8=45290
  - $CdGeP_2$, recombination radiation 8=49791
  - CdO, powdered, phosphorescent excitation spectra recording 8=36484
  - CdS, cathodoluminesc., high density bombard. obs. 8=41187
  - CdS, e-beam excited, rel. saturation 8=31973
  - CdS, emission bands in 2.0eV region 8=49792
  - CdS, green edge emission, a.c. modulated 8=49794
  - CdS low-temp. spectrum, ion bombard. effects rel. to vacancies creation 8=36483
  - CdS luminophor, emission spectra 8=45295
  - CdS, pure and doped, donor-acceptor pairs, 77° and 4.2°K 8=27643
  - CdS, recombination kinetics 8=27645
  - CdS, trapping level disposition 8=49793
  - CdS: rare earth heterojunctions, injection luminesc. 8=45265
  - CdSe crystal, 0.93μ, rel. to photoconductivity 8=36482
  - CdSe, effect of uniaxial stress 8=36342
  - CdSe, i.r., ($\lambda_m = 1.2\mu$), mechanism rel. to photoconductivity 8=45266
  - CdTe, emission at 77°K 8=49795
  - $[Cr\ urea_6][Cr(CN)_6]$. $3H_2O$, energy transfer Cr-Cr 8=41188
  - Cr(III) compounds, spectra 8=49796
  - CsBr, after shock compression 8=49806
  - CsI(Tl) in plastic double layered scintillator for separating and detecting low energy protons and electrons 8=46877
  - CsI(Tl), long-lived phosphoresc components 8=27657
  - CsI(Tl) scintillation characteristics, vacuum deposited 8=46875
  - Cs_2PtCl_6 8=36505
  - Cu halide crystals, grown from melt 8=36485
  - Cu halides: Tl^+, rel. to lattice structure 8=36470
  - CuCl, laser excited 8=32053
  - Cu_2O, due to electron bombardment 8=41189
  - Cu_2O, exciton, at 77 and 4.2°K 8=49797
  - $EuCl_3$-dipyridyl complexes 8=41190
  - $Eu(NO_3)_3$. $6H_2O$, aromatic ketones sensitized, energy transfer mechanism, obs. 8=36487
  - p-, n-GaAs, e-irradiated, fluorescence at 300 and 77°K rel. to conduction band density of states 8=32054
  - GaAs, epitaxial, n-type from p-type, photo luminescence 8=41193
  - GaAs p-n junction obs. 8=36509
  - GaAs, radiative lifetime, quantum efficiency 8=49802
  - n-GaAs, self-activated, rel. to Ga vacancy-donor centres 8=36495
  - GaAs, with Cu as substitutional impurity, charact. recomb. times 8=27089
  - GaAs: Ge, due to Ge acceptors 8=49801
  - GaAs: Si grown by liquid-phase epitaxy 8=27650
  - n-GaAs: Te, schlieren pattern 8=45270
  - GaAs: Zn, near-band-edge 8=45271
  - GaAs: Zn, 1.370eV photoluminescence emission band, heat treatment effects 8=49800

Luminescence—contd

- **solids, inorganic**—contd
  - GaAs: Zn, rel. to defect formation during Cu diffusion 8=48820
  - p-GaAs: Zn, schlieren pattern 8=45270
  - GaP, band formation, role of vacancies and substitutional impurities 8=45274
  - GaP diodes, 300-900°K, rel. to band gap determ. from absorpt. meas., 0-900°K 8=45188
  - GaP, energy levels of N-N pairs 8=49803
  - GaP, i.r. donor-acceptor pair spectra involving deep oxygen donor 8=36488
  - GaP, photoluminescence excitation spectra above intrinsic interband absorpt. threshold 8=27647
  - n-GaP, photoluminescence, influence of Si 8=36496
  - GaP p-n junctions, electroluminescent synthesis and epitaxial growth by fused salt electrolysis 8=48573
  - GaP p-n junctions, forward-biased, edge-spectra 8=36490
  - GaP: Cd(Zn) and O, red pair 8=27649
  - GaP: Zn, O, excitation spectra and quantum efficiency 8=41195
  - GaP(Zn, O)/(Cd, O), temp.-dependent radiative recombination mechanisms 8=41194
  - GaP: Zn-O, (Te), p-n junctions, red emission time-delay characts. 8=45272
  - Ge, and other diamond-type lattices 8=36475
  - Ge, energy-deficient photons subjected to uniaxial compression 8=45275
  - Ge, interimpurity radiative recombination, thermal quenching 8=36364
  - $GdVO_4$, fluorescence of Eu^{3+}, determ. of phenomenological parameters of crystal field Hamiltonian 8=31992
  - InAs, p-n junctions, mechanism 8=36489
  - InP, p-n junctions radiative recombination mechanisms 8=41197
  - KBr-KCl solid solutions, intrinsic, induced by X-ray 8=41198
  - KBr, M-centre 8=41199
  - KBr: Tl, F scintillations, and recomb. luminesc. 8=36493
  - KBr: Tl, (In), mono- and di-molecular recombination, elec. field effects 8=45276
  - KCl, M-centre 8=41199
  - KCl, X-irradiated, under mechanical impact 8=36491
  - KCl: Ag^+, transitions, electronic, of impurities, symm. assignment by two-photon-induced emission 8=36494
  - KCl–KBr with Pb admixture, absorption spectra and fluorescence 8=49735
  - KCl: I, from ICl^- V_K-centre-electron recombination and localized exciton decay 8=27651
  - KCl: In, kinetics of F-scintillations 8=36492
  - KCl: Pb, kinetics of F-scintillations 8=36492
  - KCl: Tl, two-e correlation in impurity centres in model pot. approx. 8=32049
  - KCl: Tl, F scintillations, and recomb. luminesc. 8=36493
  - KI: Cu phosphor, complex activation centres 8=45277
  - KI: Tl, host sensitized 8=27653
  - KI: Tl, F scintillations, and recomb. luminesc. 8=36493
  - $KMnF_3$: Eu^{3+}, spin-wave wideline in spectra 8=27655
  - K_2PtBr_6 8=36505
  - K_2PtCl_6 8=36505
  - Kr crystal, intrinsic, 20°-110°K obs. 8=27656
  - K_2SnCl_6: Pt 8=36505
  - La, K-ionized, partial fluoresc. yield 8=41111
  - $La_{1-2x}Ba_xEu_xLi_xPO_4$, rel. to mixed valency Eu centres 8=45278
  - LaF_3: Dy^{3+} 8=31985
  - LaF_3:Nd^{3+}, continuous stimulated emission at 300°K 8=37616
  - LaF_3 : Pr^{3+}, spontaneous emission probabilities and quantum efficiencies 8=49805
  - $LaNbO_4$: Nd^{3+} 8=36515
  - La_2O_3 (Bi) phosphor, excitation and emission spectra 8=45279
  - La_2O_3:Bi^{3+}, configuration curves calc. rel. to band widths and phonon emission 8=40058
  - $LaTaO_4$: Nd^{3+} 8=36515
  - $LiAlSiO_4$, X-irradiated, and e.p.r. 8=40936
  - LiF, after shock compression 8=49806
  - LiF, e-irradiated, rel. to colouring process 8=40062
  - LiF: O^{2-}, impurity effect 8=36499
  - LiF/U^{6+}, suitability of fluorescence props. for laser 8=46620
  - $LiNbO_3$, parametric, excited by Ar laser 8=41201
  - $MgAl_2O_4$:Cr^{3+}, fluorescence spectra 8=49715
  - MgO cryst., phosphorescence and X-ray stimulated luminescence 8=49809
  - MgO:Cr^{3+}, diffusion determ. 8=31010
  - MgS: Sb, K luminophor, pulse-excited, decay rel. to temp. 8=45290
  - $MgTiO_3$: Mn^{4+}, fluorescence, transitions 8=36500
  - Mn^{2+} in spinel, spin temp. equalization between excited and fundamental states 8=45282
  - Mn^{4+} activated oxygenated cpds, excitation spectra 8=41202
  - MnF_2 :$Mg^{2+}(Zn^{2+})(Ca^{2+})$, impurity-induced fluorescence 8=45281
  - Na_3AlF_6: Eu^{3+}, obs. 8=36502
  - $NaAlSi_3O_8$, X-irradiated, and e.p.r. 8=40936
  - NaCl, after shock compression 8=49806
  - NaCl, coloured, triboluminesc., and tribo-photostimulated electron exoemission 8=40709

Luminescence—contd
solids, inorganic—contd
NaCl: Ag excited with extreme u.v. radiation 8=36501
NaCl-Tl, -Ag, phosphors, recombination efficiency after photo thermal destruction of F centres 8=48881
NaF, delayed, of M centre in F-to-M conversion 8=41203
NaI(Tl), emission bands, excited by X-irradiation, 5-80°K 8=46856
NaI(Tl), long -lived phosphoresc components 8=27657
NaI(Tl), pulse shape rel. to Tl conc. and temp. 8=46876
NaI(Tl) scintillation characteristics, vacuum deposited 8=46875
NaI: Tl, temp. (15-300°K) and conc. dependence rel. to Tl$^+$ dimer centre characts. 8=27658
NaI: Tl$^+$, temp. and conc. dependence rel. to energy transfer 8=27659
NaLn$_{1-x}$ Eu$_x$ TiO$_4$, Eu^{3+} fluoresc. 8=41191
Na$_2$ZrSiO$_5$ phosphor, zone scheme 8=41219
Nd glass stimulated emission spectrum and quasi-continuous generation, 4.2°K 8=36503
Nd^{3+} activated, high temp. spectroscopy of stimulated emission 8=37595
Nd^{3+} fluorescence in glass, concentration quenching 8=41206
NdCl$_3$, fluorescence obs. rel. to annililation between excited states of Nd^{3+} ions 8=41205
NH$_4$I and NH$_4$I(Tl), spectra 8=32014
NiCl$_2$, matrix-isolated mols., fluoresc. spectrum 8=29757
O-dominated lattices 8=36504
OH and OD in solid Ne, evidence of rotation 8=32020
PbI$_2$, spectra rel. to defect energy-level structure determ. 8=44650
Pt^{4+} in octahedral complexes 8=36505
RbI: Tl, exciton scintillations, form, decay time and relative efficiency 8=36506
RbMnF$_3$, broad-band fluorescence rel. to temp. 8=49811
RbMnF$_3$:Nd^{3+}, antiferromag., intensity and decay time temp. depend., 20-100°K 8=32057
Rb$_2$PtCl$_6$ 8=36505
Ru(II) complexes, mechanism 8=32027
in Sc$_2$O$_3$, Nd^{3+} rel. to Stark splitting scheme and $^4F_{3/2}$ lifetime, 4.2-293°K 8=32017
Si, and other diamond-type lattices 8=36475
Si, recombination radiation at high excitation levels 8=41209
SiC, and other diamond-type lattices 8=36475
SiC, energy levels and capture centres 8=41210
β-SiC, fast electron bombardment effects 8=36508
SiC, irradiated with electrons, H and D ions of 20 keV 8=36510
α-SiC (6H), high-resistivity, doped accidentally, rel. to band scheme 8=35779
α-SiC (6H), photoluminesc. of single crystals 8=36511
α-SiC: Ni and Al complexes, luminescence 8=36507
Sm, trivalent, in oxide glasses 8=36412
Sr$_3$(PO$_4$)$_2$: Tb, bluish-white emitting cathode-ray phosphor with long decay time 8=49813
Tb(NO$_3$)$_3$.6H$_2$O, aromatic ketones sensitized, energy transfer mechanism, obs. 8=36487
TiO$_2$ (rutile), thermally stimulated currents and luminescence 8=36513
U-activated cpds with rocksalt lattice, fluorescence and co-dopant quenching 8=49808
YGdAl:Nd^{3+} laser characts. 8=39692
YNbO$_4$: Nd^{3+} 8=36515
Y$_2$O$_3$: Ln^{3+}, (Ln=Pr, Nd, Eu, Er, Tm), radiative and multiphonon relax of Ln^{3+} 8=45289
In Y$_2$O$_3$, Nd^{3+} rel. to Stark splitting scheme and $^4F_{3/2}$ lifetime, 4.2-293°K 8=32017
Y$_2$O$_3$: R^{3+}, (R = rare earths), cathodoluminescence 8=49814
YTaO$_4$: Nd^{3+} 8=36515
YVO$_4$: Eu^{3+}, spectrum (4f)^6 level splittings rel. to internal field, obs. 8=41152
Zn, K-fluoresc. yield from Zn^{69m} β decay obs. 8=38418
ZnAl$_2$O$_4$:Cr^{3+}, fluorescence spectra 8=49715
(Zn, Cd)O phosphors 8=45292
Zn$_x$Cd$_{1-x}$S graded-band-gap crystals, and elec. props. 8=39696
(Zn, Cd)(S, Se) :Cu phosphors, photo- and electro-luminesc., obs. 8=45293
ZnO crystal, recomb. radiation of bound excitons, 4.2°-90°K 8=31301
ZnO, edge, exciton contribution 8=27660
ZnS luminophor, emission spectra 8=45295
ZnO luminophor, pulse-excited, decay rel. to temp. 8=45290
ZnO phosphors 8=45292
ZnO, u.v. spectrum, 4.2°-77°K 8=41216
ZnO, Ga scintillation due to α, obs. 8=37789
ZnS activated with Group IVB elements, e.p.r. investigation 8=49815
ZnS and similar lattices, props. 8=36522
ZnS, coherent fluorescence for excitation by 2 photon absorption 8=32063
ZnS crystal, photolum. 77°-600°K, obs. 8=45291
ZnS, excitation at low temp. 8=27661
ZnS luminophors, preparation, effect of halide addition 8=49819
ZnS phosphors, temp. shift of green-Cu band 8=32068
ZnS(Ag) based, scintillation output rel. to α-radiation of surface 8=27662

Luminescence—contd
solids, inorganic—contd
ZnSAg monocrystal, rel. to e.s.r. 8=36523
ZnS:Al(Ga), self-activated polarization 8=32067
ZnS$_x$ -CdS$_{1-x}$, exciton type, edge emission and long-wave rad. 8=41212
ZnS: Cl luminophor, pulse-excited, decay rel. to temp. 8=45290
ZnS: Cu, Al(Ag, Al), rel. to i.r. absorpt. due to donor states 8=41156
Zn(SCN)$_2$, Pb^{2+} or Sn^{2+} activated 8=36520
ZnSe, photoelectronic props. in p-type-Cu-activated and n-type-self-activated 8=45296
ZnSe, photoluminescent props. of activated emissions 8=49816
Zn(S: Se) phosphors, activator free 8=36517
p-ZnSe: Cu, radiative pair transitions 8=45294
ZnSe: Tm^{3+}(Er^{3+})(Ho^{3+}), with Li or Cu codopants, 8=27664
Zr silicates activated by Mn, Cr, Hf and rare-earth's props. 8=41219
ZuSnP$_2$, radiative recombination, photoluminesce. spectra 8=41213
solids, organic
acetophenone in soln. at 77°K, time-resolved phosphorescence, medium effects 8=45297
alkyl aromatics, radiationless decay 8=32072
anthracene, blue fluorescence from triplet exciton interaction, magnetic field effects 8=41223
anthracene, dimezo substituted, 1, 2 benzanthracene composite excimers 8=49821
anthracene, doped crysts., at high press. 8=49824
anthracene, excimer emission at v. high press. 8=49823
anthracene, in host crysts. at high press. 8=49822
anthracene, polarization diagrams for impurity mol. orientation 8=36531
anthracene, scintillation pulses excited by α bombard., temp. pressure depend. 8=36526
anthracene, scintillation response to heavy charged particles, directional anisotropy 8=46870
aromatic hydrocarbons, triplet decay, high press. effects 8=49825
aromatics, triplet-state lifetimes, effect of partial deuteration 8=34306
benzene-cyclohexane, solid solns. at 77°C 8=27624
benzene, energy transfer in isotopically mixed crysts. 8=27668
benzene isotopic mixed crysts., fluorescence and phosphorescence, static cryst. effects 8=49771
benzene, isotopic mixed crysts., trap-trap triplet energy transfer 8=36527
benzene, isotopic mixed crysts., triplet-triplet annihilation and delayed fluoresc. 8=41225
benzene, nonradiative decay, deuteration effects 8=49826
1, 12-benzoperylene quasiline fluoresc. line-widths temp. depend., 4-175°K 8=36528
benzophenone, at 77°K 8=41224
biphenyl, solid soln. in cyclohexane, delayed fluoresc. 8=36529
cattle rod outer segments 575-600 mμ 8=49828
chlorobenzenes in rigid solns., polarization 8=27669
chromophores, intramolec. energy transfer between triplet states 8=41157/8
chrysene, delayed luminesc., growth and decay 8=32073
coronene, in cryst. matrices, effect of thermal treatment 8=45242
4-dimethylamino-4′-nitrodiphenyl in binary soln., phosphor-impurity group centres props., 77°K 8=36532
dinucleotides, at 77°K 8=41227
1, 6-diphenyl-hexatriene-1, 3, 5, polarization diagrams for impurity mol. orientation 8=36531
$\alpha\alpha'$ and $\gamma\gamma'$ dipyridol in n-paraffins, structural spectra of phosphorescence 8=36530
energy transfer in isotopically mixed crysts. 8=27668
ferrocene, matrix-isolated 8=49775
fluoro-aromatics, h.f.s. in $\Delta m=2$ transitions 8=31851
formaldehyde derivatives, phosphoresc. lifetimes 8=25473
halogenated benzenes, singlet-triplet emission 8=27625
hydrocarbons aromatic, quasilinear phosphoresc. spectra 8=36524
p-methylbenzyl radical in Ar matrix 8=36617
mixed crysts., intermolec. triplet decay processes 8=32070
naphthacene, fluorescence in mag. fields 8=41226
naphthalene d$_8$-naphthalene mixed crysts., phosphoresc. spectra 8=32074
napthalene, delayed luminesc., growth and decay 8=32073
naphthalene, doped crysts., at high press. 8=49824
napthalene, e.s.r. emission in triplet state 8=45298
naphthalene, excimer emission at v. high press. 8=49823
naphthalene, fluorescence and absorpt. conc. depend. in n-heptane, cyclohexane 77°K 8=49830
naphthalene mixed crysts., phosphoresc. and delayed fluoresc. 8=32075
naphthalene, polarization diagrams for impurity mol. orientation 8=36531
naphthalene, quenching of triplet state 8=34341
nucleic acid derivative aggretates, energy transfer in frozen solns. 8=45304
organophosphors, photoluminesc. reabsorpt. 8=36525

Luminescence—contd
  solids, organic—contd
    orthodiazines, electronic states and radiationless processes 8=27667
    perylene, α-and β-type crysts., high press. 8=41168
    phenanthrene, delayed luminesc., growth and decay 8=32073
    phenanthrene, doped crysts., at high press. 8=49824
    phenanthrene, excimer emission at v. high press. 8=49823
    m-phenylene-bis-phenylmethylene, quintet mol. 8=47669
    phosphorescence and delayed fluoresc. in solid solns., kinetics and chem. appls. 8=25936
    phosphors 8=41221
    plastic scintillators, mixed preparation and efficiency 8=49829
    polymers of acetylene series 8=32079
    pyrazine, decay at low temp. 8=36535
    pyrazine, phosphorescence, at 4.2°K 8=36534
    pyrene in biphenyl, delayed excimer fluoresc. 8=32076
    pyrene, in mixed cryxts. 8=25942
    pyrene monomer in solid soln. 8=45300
    pyrene, spectrum rel. to carrier photogeneration 8=40679
    radioluminescence of single crysts. rel. to mol. excitation kinetics, obs. 8=39384
    rigid soln., laser-stimulated recomb. 8=41222
    rubrene, crysts. under press. 8=49779
    salicylic acid and salts, polarization diagrams 8=32077
    salicylidene aniline, photochromism 8=45302
    sodium salicylate, fluorescent emission band shape interpretation 8=45303
    sodium salicylate, temp. effects 8=45301
    tetracene, cryst. under press. 8=49779
    tetracene, in host crysts. at high press. 8=49822
    tetracene, temp. depend. 8=36536
    tetraphenylbutadienes, effect of intramolec. twisting 8=39390
    trinitrobenzene cryst. complexes, high press. 8=27635
    trinitrofluorenone cryst. complexes, high press. 8=27635
    triphenylene, delayed luminesc., growth and decay 8=32073
    triphenylene-d$_{12}$-Rhodamine B solns., triplet-singlet energy transfer kinetics, obs. 8=36533
    tris-oxalato Cr(III), low temp. 8=27670
    vanadyl prophyrin complexes 8=45299
    Eu β-diketone chelates, fluoresc. props. 8=32071
    KI, from α-centre, polarization 8=27654
    LuVO$_4$: Eu^{3+}, rel. to Hamiltonians at Eu^{3+} site 8=41208
    NaCl: Cu, fluoresc. spectral comp. after period of storage 8=49741
    ScVO$_4$: Eu^{3+}, rel. to Hamiltonians at Eu^{3+} site, 8=41208
Luminescence chambers
    He gas, high-pressure, scintillation induced by α-particles, recombination 8=29642
Luminescent devices
    See also Counters/scintillation.
    anthracene scintillator, α, e-excited, decay obs. 8=49832
    capacitor, electroluminesc., as distributed-parameter system 8=36537
    cells, electroluminesc., phys. props. 8=36521
    phosphor, photometric standards for chem. testing 8=45418
    phosphor powder, radioactive isotope analysis 8=43987
    phosphors, radioluminesc. dosimetry 8=36462
    scintillator, decay time meas. by simulated photomultiplier pulses 8=46883
    thermoluminescent, for low and high temperatures 8=49831
    Au-Si$_3$N$_4$-ZnSe diode, visible electroluminesc. 8=41230
    CaS: Ce phosphor, decay and thermoluminesc. obs. 8=45305
    CaS: Zr phosphors, mag. susceptibility obs. 8=44967
    Cd-In alloyed diode, spectra at 78 and 300°K, I-V characts. at 300°C 8=36538
    GaP diodes, solution-grown, photoluminesc. at 77°K, effect of donor conc. on optical efficiency 8=44843
    GaP electroluminescence diodes, prep. from p-on-n liquid-phase epitaxial layers 8=41229
    GaP electroluminescent p-n junction, prep. by fused salt electrolysis 8=48573
    GaP p-n junctions grown by liq-phase epitaxy, green electroluminescence 8=41231
    GaP p-n junctions, red-emitting, prep. by soln. growth of p-type thick layers on n-type substrates 8=41232
    CaS: Zr phosphor, thermoluminesc. peak shift obs. 8=45306
    Si-intermetallic cpds.-SiC light diodes, V-I depend. of recomb. rad. intensity 8=27184
    ZnS electroluminesc. resistor props. 8=27145
    ZnS phosphor, trace metal determ. by n. activation 8=50001
    ZnS-type phosphors 8=36522
    ZnS: Cu luminophor, two-band electrolum. emission 8=45307
    Zn$_2$SiO$_4$ phosphors on glass base in u.v. radiation detectors 8=24372
Lumino(pho)rs. See Luminescence/solids, inorganic; Luminescence/solids, organic; Luminescent devices.
Lutetium
    electronic structure from relativistic augmented-plane-wave calcs. 8=26905
    generalized susceptibilities and mag. ordering 8=44973
    Hall effect meas. 8°-320°K, mag. fields to 7.8 kOe 8=44690
    thermal conductivity, temp. dependence, 5-300°K 8=35458
Lutetium compounds
    iron garnet, sublattice magnetization 8=40840
    LuFe garnets: Fe^{4+}, linewidth temp. dependence, 4.2°-300°K at 10 and 26 kMc/sec 8=31827
    LuFeO$_3$, paramagnetic susceptibility, semi-empirical expression by Padé approximant 8=27386
    Lu(ReO$_4$)$_3$ crystal struct., high-temp. modification, X-ray obs. 8=30914
    LuVO$_4$: Eu^{3+}, luminescence rel. to Hamiltonians at Eu^{3+} site 8=41208
Luxemburg effect. See Electromagnetic wave propagation/ionosphere.

Magnesium
    atom, lifetime of 4 ^{1}D term, determ. 8=34164
    atomic, photoionization cross section meas. 8=29949
    chemisorption of diphite molecules 8=49899
    corrosion in NaCl, transient charge fluctuations, obs. 8=45368
    deformation, fast, slip and twinning contribs. to mechanism 8=40169
    electron-irradiated, low temp. annealing spectrum 8=26734
    electron momenta from X-ray meas. 8=44647
    emission spectra, L$_{23}$, rel. to Al X-ray band spectra interpret 8=45172
    flame temp. meas. by MgO vibr. spectroscopy 8=24013
    ionization of Mg$^+$ to Mg^{++} by electron impact from threshold to 2000 eV, cross section meas. 8=43486
    ion sputtering on Al, Mo, Ta targets, ang. distrib. obs. 8=48909

Magnesium—contd
- K-type stars, abundance by photometric meas. 8=45633
- λ Boo, abundance ratio Mg/O calc. from i.r. spectra 8=50286
- lattice mechanics, elec. and electronic props., 8=48707
- π 'Ori', abundance ratio Mg/O calc. from i.r. spectra 8=50286
- single crystal, nature of oxide layers on surface 8=35167
- single crystal, optical consts. from reflectance ratios 8=45164
- Sirius, abundance calc. from Mg II lines 8=50285
- spectrochemical anal. in blood plasma, using improved plasma jet equipped with inexpensive analyzer 8=47894
- spectrochemical detect. in Ta 8=45416
- sputtering by 1- to 5 keV Ar^+, rel. to orientation dependence 8=40076
- strained elastically, inner-displacement tensor 8=26406
- talc, structural changes during heating 8=48601
- θ Hya, abundance ratio Mg/O calc. from i.r. spectra 8=50286
- twins, second-order, internal deformation and fracture 8=44588
- weak line transition probability calc. 8=29621
- Mg1, f-values calc. 8=34135
- Mg(II) coordination no. in aq. solns. determ. by p.m.r. 8=39431
- Mg II, e impact line broadening calc. 8=47507
- Mg^{25} in aq. soln., NMR line, chemical shift 8=39440
- Mg^+, electron scatt., autoionization states, excitation of 3s → 3p, 3s → 3d transitions 8=43232

Magnesium compounds
- alloy, h.c.p., fast deformation, slip and twinning contribs. to mechanism 8=40169
- basic sulphate, composition determ. by thermogravimetry, differential thermal anal. and i.r. absorpt spectrophotometry 8=27671
- brucite-like layer ions in double-layer structures formation 8=48514
- brucite, structure from n. -diffr. exam. 8=39804
- chrysotile asbestos suspensions, stability rel. to surface charge on fibres 8=48242
- chrysotile, X-ray diffr. profiles of faulted cylindrical lattice 8=39805-6
- ferrous ferrite, mirowave resonance rel. to magnetic anneal 8=31818
- gypsum systems, hardness, modulus of elasticity, and porosity, interrelation 8=40172
- magnesia spinel, reactive, prep. and props. 8=43989
- magnesioferrite, precip. and coarsening in MgO–Fe solid soln. 8=44007
- olivine, in carbonaceous meteorite 8=28158
- pyroavrite, crystal structure 8=39803
- sepiolite, sorption of vapours 8=26137
- talc, structural changes on heating 8=30699
- Mg alloyed cast iron, laser spectrochemical analysis 8=32157
- Mg ammonium metaphosphates, rhombohedral 8=44245
- Mg borides prepared under superhigh-pressure condns. 8=35245
- Mg phthalocyanine, films, barrier effect, photoconductivity 8=40678
- Mg(II) oxalate complex, conc. soln, raman spectra rel. to co-ord. and coupling 8=43843
- Mg-Al alloys, valence electron distrib. investigation 8=44648
- Mg-Al spinel, Czochralski growth 8=39675
- Mg-Al spinel, epitaxial deposition on Si layers, defect formation 8=48832
- ϵ-$Mg_{23}Al_{30}$, crystal structure 8=44227
- $MgAl_2O_4$, microwave phonon attenuation 8=39895
- $MgAl_2O_4$, single crystal growth by travelling isotherm technique 8=44135
- $MgAl_2O_4$ spinel, plastic deform., slip planes and stoichiometry 8=31216
- $MgAl_2O_4$ spinel, etching investigations for visibility of dislocations and slip planes 8=48526
- $MgAl_2O_4$, vacuum hot-pressing, densification kinetics 8=40174
- $MgAl_2O_4$:Cr, emission and absorpt. spectra, visible and u.v. 8=45210
- $MgAl_2O_4$:Cr^{3+}, optical spectra 8=49715
- $MgBr_2$-diethylether coordination compound, i. r. spectrum 8=25569
- Mg-Cd alloys, ordering effect on residual resistivity and mag. susceptibility 8=40321
- Mg-Cd alloys, ordering transforms., 50-220℃ 8=35113
- $Mg(Cr,Al)O_4$, disorder, X-ray diffraction study 8=44226
- $MgCr_2O_4$, mag. structure from n. diffr. exam., 8=45063
- Mg-Cu-F, high-temp. gaseous equilibria 8=34375
- MgF_2, birefringence, 1500 to 3000 Å 8=41056
- MgF_2, elastic and thermoelastic behaviour 8=44590
- MgF_2, elastic consts. 8=44589
- MgF_2, plasmon and interband transition excitation on e-bombardment 8=26931
- MgF_2, rutile type crystals, NMR and electronic structure 8=27506
- MgF_2 Soleil compensator, near i.r. 8=37699

Magnesium compounds—contd
- MgF_2, vibr. freq. determ. by n. scatt. rel. to Raman scatt. 8=44302
- $MgFe_2O_4$, disorder, X-ray diffraction study 8=44226
- $MgFe_2O_4$, Mossbauer Faraday effect 8=45158

- MgO, adsorption of CO_2 and H_2O, i.r. study 8=47974
- MgO based insulating materials, phase composition and electrophysical props. 8=31445
- MgO, chemisorption of H_2 and surface OH, i.r. spectros. 8=49894
- MgO, colour centre bands, Faraday rot. anal. 8=35588
- MgO, colour centres after neutron irrad., study by optical absorpt. bands 8=35589
- MgO, compression creep curve, shape 8=31221
- MgO content in ilmenites, rel. to MgO/FeO ratio in host rocks 8=50070
- MgO, crack front interaction with cleavage steps 8=44591
- MgO, effective atomic charges by X-ray exam. 8=26169
- MgO, e microscope exam., lattice fringes resolution, 100 kV 8=39775
- MgO, exciton line splitting, phonon induction, obs. 8=36331
- MgO, F band, temp. depend. 8=45209
- MgO, F-centre absorpt. spectrum, expt. compared with theory 8=44472
- MgO, ferromagnetic films epitaxial growth substrate 8=35170
- MgO films, porous, field-assisted secondary electron emission 8=27359
- MgO flame, dispersion of absorpt. coeff. 8=32975
- MgO flame, radiometry 8=37321
- MgO, irradiated, defect clusters, very small, study by neutron scattering meas. 8=35525
- MgO, irradiated, phonon-assisted optical absorpt. 8=41049
- MgO, i.r. spectral reflectivity and dispersion 8=41022
- MgO, isostatically hot-pressed, fabrication and characterization 8=26045
- MgO, lattice vibrations in thin film, electron diffraction obs. 8=35387
- MgO(magnesia), high temp., creep, effect of additives 8=40171
- MgO(magnesia), high temp. creep, effect of simultaneous grain growth 8=40170
- MgO, microwave phonon attenuation 8=30948
- MgO, n/e-irradiated, aggregate defect centres, Mollwo-Ivey relations 8=31032
- MgO, neutron irrad., negative-ion vacancies 8=44412
- MgO, neutron irradiated, $(OF)^{2-}$ molecular ion as paramag. defect. 8=44404
- MgO, n-induced damage and macroscopic props. changes, review 8=44496
- MgO, n-irradiated at 80°K, colour centres, zero-phonon lines and phonon-coupling 8=27588
- MgO, n irrad. ($< 10^{18}$ nvt), rel. to hardening, lattice damage, colour centre conc. 8=26829
- MgO, Ni ferrite epitaxial growth on (111) and (110) surfaces 8=39594
- MgO, optical constants from electronic band structure by pseudo-potential calc., 7-28eV 8=27587
- MgO, phosphorescence and X-ray stimulated luminescence 8=49809
- MgO, polycrystalline, press. derivs. of elastic moduli, revised data 8=31217
- MgO porous thin film, self sustained electron field emission, obs. 8=40695
- MgO powder, ortho-positronium form. and annihilation 8=49130
- MgO powder, positronium diffusion constant and annihilation spectra mean length 8=44378
- MgO, pressure sintering, densification data rel. to plastic deform. 8=35070
- MgO, Rebinder effects, obs. 8=31083
- MgO, resistance at high temp., impurity effects 8=26950
- MgO rot. cryst., dispersion surface, electron diffr. pattern 8=35309
- MgO, scattering of lattice waves by dislocations 8=30933
- MgO, second-order, elastic constants pressure derivs., 8=49035
- MgO, secondary emission, shot noise fluctuations 8=44949
- MgO, second order Raman scattering spectrum 8=36386
- MgO single crystal whiskers, spontaneous growth 8=35257
- MgO, spin-lattice relax. anisotropies, theory 8=31874
- MgO, toughness, effect of water 8=40173
- MgO, V^1 centre thermal decay temp. dependence, 18°-50℃ 8=31121
- MgO:Cr^{2+}, acoustic paramag. reson. 8=45092
- MgO: Cr^{2+} dynamic lattice couplings from microwave u.s. and thermal conductivity exam. 8=35053
- MgO:Cr^{3+}, diffusion determ. from luminesc. 8=31010
- MgO: Cr^{3+}, ENDOR 8=40977
- MgO:Cr^{3+}, V^{2+}, e.p.r. of excited ^2E levels 8=45091
- MgO:Cr^{3+}, (V^{2+}), e.s.r. of excited $^2E(3d^3)$ level 8=27484

Magnesium compounds—contd
- $MgO-Cr_2O_3-Fe_2O_3$ at 1300°C in air, phase relations 8=39529
- MgO: Cu^{2+}, e.p.r. at 1.2°K, Jahn-Teller effect 8=27470
- MgO:Fe, detection of microsec. heat pulses in large mag. field 8=44366
- MgO:Fe^{2+}, far i.r. spectra at low temps. 8=27589
- MgO:Fe^{2+}, spin-relaxation time temp. dependence, 4.2–13°K rel. to Fe^{2+} low-lying energy level 8=45086
- MgO: Mn_2^+, charge transfer at surface, e.s.r. study 8=48422
- MgO:Mn^{2+}, e.s.r. at 1.3HGz 8=40930
- MgO–MnO solid solns., and with LiO_2, struct. and mag. props. 8=48662
- MgO-NiO solid solns., formation on thermal decomp. of mixed hydroxides 8=39532
- MgS: Sb, K luminophor, pulse-excited, decay rel. to temp. 8=45290
- Mg_2SiO_4, thermal diffusivity at high press. and temp. 8=48762
- $Mg_2SiO_4-Fe_2SiO_4$ system, olivine-spinel transition, geophys. applic. 8=36678
- Mg-Sn alloy melts, atomic distrib. curves 8=39300
- Mg-Sn alloy, twinning and fracture 8=44592
- n-Mg_2Sn, piezoresistance tensor components, 50-300°K rel. to many-valley processes 8=44800
- n-Mg_2Sn, thermal conductivity from 4.2 to 300°K 8=26603
- n-Mg_2Sn, thermal conductivity, 4.2 to 300°K 8=44365
- $Mg_2SnO_4-MgFe_2O_4$, solid solutions 8=40738
- $MgSO_4.7H_2O$ and $MgSO_4.7D_2O$, vibr. spectra 8=35382
- $MgSO_4.7H_2O$, crystal growth rate dependence on supersaturation of soln. 8=39676
- $MgSO_4$ soln., diffusion rate constants calc. 8=43783
- $MgSO_4$, decomposition kinetics rel. to sample mass and processing press. 8=36565
- $MgSO_4.7H_2O$, left form predominance, crystallization conditions effect 8=26177
- $MgTiO_3$: Mn^{4+}, fluorescence, transitions 8=36500
- Mg–Zn alloys, age hardening characts., effects of 1% Au addition 8=26832
- Mg–Zn–Mn alloy, wrought, tensile and mech. props. rel. to heat treatment 8=35704
- Mg-6 wt.% Zn-0.5 wt.% Zr alloy, diffusional creep with low strain rate sensitivity 8=26830
- Mg–Zr alloy, diffusion-creep and form. of denuded zones 8=26831
- Mg–Zr alloys, fine grain effect through Zr 8=48343

Magnetic amplifiers. See Amplifiers; Magnetic devices.

Magnetic anisotropy. See Magnetic properties of substances; Magnetization state.

Magnetic bays. See Earth/magnetic field, variations; Magnetic storms.

Magnetic bottles. See Magnetic fields; Plasma/confinement.

Magnetic cooling
- CMN crystal container for adiabatic demagnetization 8=32991
- thermodynamic and statistical aspects 8=31518

Magnetic devices
- balances of Sucksmiths type, thermostat for temps to 1100°C 8=46278
- data recording system, effective gap length estimation 8=28534
- digital data collection system for v.l.f. transient waveforms, appl. to atmospherics 8=32253
- eddy current braking at high speeds by permanent magnets 8=24115
- ferromagnetic films, strain-sensitive for sonic film memory 8=36125
- ferrimagnets, based on magnetoelastic effects 8=31713
- ferrite cores, magnetoelastic resonance 8=36226
- ferrite resonators, hydrodynamic liquid cooling method 8=33048
- film storage cells using domain propag. 8=24117
- film storage-elements, controlled easy-axis distrib. 8=49511
- films, coupled, for associative memories 8=36121
- films for magneto-optic readout using media modulation 8=40799
- four-magnet system for 180°e scatt. 8=24116
- hyperfine, caused by mag. impurities in metals 8=40962
- hysteresis, dynamical loop representation 8=44961
- information storage system, energetic model 8=46390
- lens, design, applic. of method of least squares 8=41964
- magnetoelastic two-port: nondispersive variable delay line 8=31745
- magnetoresistor for supercond. magnet field meas. 8=41938
- memory, using incremental permeability round different quiesient flux points 8=28533
- microwave ferrite 8=49547
- multilayer film-, magnetization reversal 8=36120
- orthoferrites, device applics. of mag. domains 8=49553
- permalloy film memories, keepered and nonkeepered, internal field distrib. 8=40820
- Perminvar toroidal magnetic cores, charact. determ. 8=49557
- pulsed magnetic field apparatus for up to 1.2 MOe 8=46383
- racetrack system, influence of form and stretch of azimuthel-edge fields 8=33472

Magnetic devices—contd
- readout, magneto-optic, amplitude, modulated 8=36122
- recording, theory and expt., review 8=33053
- roller for gas mixing 8=30237
- rotor-position indicator, comparative anal. of iron shapes and sizes 8=33051
- sharp film NDRO bit organized memory 8=36124
- shield against e.m. fields, scaling laws 8=46375
- shields for space vehicles, analog simulation and meas. of forbidden volume 8=41481
- solenoid, Cu-tape-wound, edge-cooled for Bevatron preinjector 8=33052
- spiral tape core, flux pattern 8=37398
- strip mag. balance with controllable sensitivity modification 8=46364
- superconducting system in pulsed MHD generator 8=37376
- superconductor-normal metal sandwich (Cooper pair), reduction in spin flip breaking 8=49502
- synchronous drum for n time-of-flight data 8=47155
- tape recording of photographically recorded data 8=42351
- thermomagnetic generators with graded mass and gap, performance characts., 8=46388
- vibrators, magnetostricture, mechanical power limitations 8=49452
- Z-pinch, megagauss pulsed fields prod. 8=28532
- EuO memory medium in low temp. laser-beam addressable memory 8=36123
- MnBi films, memory appls. rel. to props. 8=49531
- Mo permalloy tapes, rolled 4-79, magnetostriction and coercivity process variables dependence 8=31658
- Na flowmeter for reactor core, calibration and stability 8=48013

Magnetic domains. See Magnetization state/domains.

Magnetic field measurement
- automatic magnetometer for e.s.r. 8=46370
- beam bending 90° magnets field uniformity 8=28997
- components meas. in meridian plane at sea by nuclear precession 8=28005
- earth's, maritime two component gyrostabilized magnetometer 8=24107
- earth's, quartz H variometer, setting rel. to mag. meridian 8=41459
- ellipsoidal specimen, internal field recording method 8=46372
- gradient meter, advantages 8=41936
- Hall effect high stability probe system 8=28510
- Hall effect probes with diameters ≤ 1 mm, for axial mag. fields at cryogenic temps. 8=24031
- Hall-effect sondes, construction of suitable electromagnet 8=33041
- Hall probe, microminiature for use in liq. He 8=28509
- Lorentz microscopy, contrast linked to relief in ferromagnetic films 8=45002
- Lorentz microscopy of weak flux inhomogeneities 8=36132
- magnetometer, employing turbine 8=33043
- magnetometer, nuclear, with remote control 8=46369
- magnetometers in satellites, magnetodynamically induced ambiguities 8=36904/5
- proton-resonance automatic calibrator 8=37382
- pulsed distrib. determ. by low voltage capacitor bank 8=33044
- quartz H magnetometer readings, humidity effects 8=41458
- r.f., amplitude meas. by e.p.r. in effective field 8=46366
- size-dependent oscillatory magnetoresistance appl. 8=28517
- spinner magnetometer static charge elimination 8=50231
- static fields, inhomogeneous, several meas. devices 8=33045
- sunspots and pores, spectrography 8=32598
- superconducting loop magnetometer 8=28511
- superconducting magnet. by magnetoresistor 8=41938
- superconducting persistent current magnetometer 8=31355
- superconducting quantum interference device, shielding 8=31349
- n-InSb magnetoresistance probe at liquid He temp. 8=46371
- InSb magnetoresistive sensor for He temps. 8=46367

Magnetic fields
- See also Earth/magnetic field; Electromagnetic fields; Interplanetary magnetic fields; Sun/magnetism.
- absorption line form., anomalous dispersion 8=29570
- analogue of cyclotron central elec. field config. 8=46999
- axially symmetric, conducting ring interaction, induced voltage 8=47829
- of cable, submerged peculiarities rel. to geoelec. variations 8=36680
- confined, boundary layer with warm, streaming plasma 8=34520-1
- confinement by beam of ions 8=36822/3
- constant uniform, effect on e.m. wave scatt. by free electron 8=24726
- of coil, calculation by Kantorovich method 8=28518
- computer calc. of 3-dimens. fields of arbitrary current geometry 8=28515
- cylinders and annular shims, second-order approximation 8=33040
- dipole and quadrupole planar, produced by line currents 8=46393
- distribution in knot of 3-ph. core of cold rolled steel sheet 8=46377
- distribution in layers of sheets with mutually perpendicular rolling direction in knot of 3-ph core, at 90° 8=46378

Magnetic fields—contd
distribution inside cylinder with temp. depend. conductance in const. longit. elec. field 8=41946
electron clouds in mag. fields, electrostatic equilibrium 8=33074
in ferromagnetic sheet under alternating magnetiz., flux distrib. and waveform 8=28516
ferromagnetic susbts., nuclei of impurity atoms 8=40760
film, distrib. determ. technique, comments 8=46389
forces on conductors and field energy in 2-dimens. fields 8=28514
Heaviside formulae connection with relativity 8=46347
homogeneity meas. and control 8=46374
homogeneous, spectral line form. theory 8=43250
implosive megagauss field prod., travelling wave nature 8=24109
inhomogeneous, pole face profile calc. 8=33042
interaction with micro-elastic wave motion, in conducting medium 8=46154
kinetic eqn. for inhomogeneous plasma 8=43502
leakage into semi-infinite pipe, calc. 8=37383
long horiz. line source above ground 8=24242
mathematical models and computer soln., book 8=33054
megagauss, Faraday rot, meas. 8=46683
m. h. d. generator, electrodynamic effects of non-uniformity of mag. field and fluid parameters 8=28468
min. $\bar{B}$ field, equivalent potential and other props 8=46473
near-zone mag. field of small circular-loop antenna 8=46493
planetary, as test of dynamo theory 8=50405
plasma, annihilation and turbulent heating 8=34467
poloidal, in rotating stars 8=41500
prod. by plasma compression 8=30125
production in cavity undergoing compression 8=46394
pulse production for up to 80 kG intensity and appl. 8=36021
pulsed, Z-pinch flux compression to 3 MG 8=28532
pulsing, radar modulator techniques 8=46368
reduction by superconducting volume expansion 8=28513
resistivity meas. in megagauss fields, method 8=24066
scaling laws for large shields in quasi-stationary fields 8=46375
small uniform, prod. by current loops 8=28512
solenoid, maximum attainable field, calc. 8=37384
spherical multipole as plasma mag. trap 8=47868
static non-uniform, focusing props. 8=28540
sunspot group, Evershed effect 8=32596
superconducting coils, meas. techniques 8=37396
toroidal, negative V^{11} system and its equilibrium 8=47869
travelling, interact. with rigid conducting spheres or cylinders 8=24108
two dimensional problems, solution by boundary relaxation 8=45994
two-dimensional, with rectangular boundaries, solution 8=46376
ultra-quantum, kinetic coeffs. theory 8=35737
uniform, quantum mechanics of charged particle 8=42328
uniform transverse, winding optimization 8=28524
vertical dipole above a two-layered medium 8=50120
Mn^{2+} nuclei, effective, covalency effect 8=40739
Mn^{2+} nuclei in glasses, hyperfine splitting rel. to covalency estimate 8=48304
Pb-Bi alloys, superconducting, spatial distrib. 8=40381
effects
air, laser-induced breakdown and spark emission, 210 kG 8=29925
alternating field on convective heat transfer during turbulent flow of cond. liq. in channel 8=41994
anthracene, blue fluorescence from triplet-exciton interaction 8=41223
anthracene, photoconductivity 8=27336
antiferromagnets, in external field, non-linear spin waves 8=40856
on aqueous solns., metastable formations as crystallization centres 8=34776
arc at atmos. pressure 8=38983
arc, electric, wall-stabilized, with transverse field, field flow theory 8=39007
arc, electric, wall-stabilized, with transverse field, adjustable characts. 8=39008
p-azoxyanisol, liq.-crystal, on X-ray structural exam. 8=39309
Bloch electron motion in external field, classical and quantum dynamics 8=26875
on breakdown localization in p-n junctions, longit. and transverse fields 8=27153
on cholesteric liq. crystal struct. 8=34768
cholesteric liquid crystals, structure distortion 8=30407
crystal electrons, relativistic and spin effects 8=44624
drifting plasma, wave propag. 8=30149
electron diffusion, theory 8=24138
on excitonic insulator 8=40261
F-centres, shallow, in ionic cryst., rel. to theory 8=44470
ferromagnetic alloy, on martensitic transform. 8=35109
ferromagnetic discs, rotating in alternating and direct fields, energy losses 8=36102
ferromagnetic shells, uniform screening to obtain uniform field 8=37379

Magnetic fields—contd
effects—contd
films uniaxial-anisotropy relax. process excitation by rotating mag. anneal 8=31581
gas-discharged plasma, resonance in mag. field 8=39128
gas, thermomagnetic effect, obs. 8=39227
growing surface waves in semicond. in presence of transverse mag. field 8=35868
heat transfer intensification 8=41857
ions in cryst. fields, induced quadrupole splitting 8=43939
lateral and transverse, for suppression and crossed-field beam noise 8=24139
magnetism, in high fields 8=31478
on magnetodynamic shock waves, device for obs. 8=23942
magnetoelasticity and magneto-thermoelasticity 8=28278
magnetoplasma propag. 11 to field, Fermi liquid interactions 8=40271
Mössbauer spectrum, prod. of r. f. acoustic sidebands 8=39513
motion of anisotropic crystal in rotating field 8=30435
naphthacene, fluorescence 8=41226
paraffin, liquid, n.m.r. in rotating field 8=25958
parallel, rel. to stability of Hartmann boundary layer 8=41988
piezo-electric, semi-infinite rod in magnetic field longitudinal disturbances 8=40625
plasma, avalanche semiconductor, rel. to hole wave instabilities 8=35797
plasma column, hollow, rel. to helical instability 8=30175
plasma, cylindrical electron-hole, behaviour 8=35799
plasma instabilities due to two-lumped electron vel. distrib., computer expt. 8=30173
plasma jet, current sheet meas. on field interaction 8=39145
in plasma, linear waves, quasi electrostatic, low freq. 8=30156
plasma, spectral line Stark broadening 8=25340
plasma, streaming, transverse field strength rel. to e penetration 8=30022
plasma, weakly ionized, in time-depend. field, electron distrib. function 8=43520
polaron, energy spectrum changes 8=40268
saddle point optical transitions under crossed elec. and mag. fields 8=27543
scalloping of compressed e beams 8=46405
semiconductors, quantizing fields, negative conductivity 8=49403
semiconductors, thermogalvanomagnetic phenomena 8=44751
spin echo signal formation by simultaneous action of local elec. and mag. fields 8=40881
stars, single and multiple, effect on formation 8=50294
steel, martensitic transformation 8=39554
steel, stainless, austenitic, on phse transforms. 8=39553
superconducting alloys, dil. mag., behaviour 8=27004
superconducting ring, current attenuation in alternating field, obs. 8=44704
superconductors, type I, elect. field obs. in presence of quasistatic magnetic field 8=26991
ticonal, structure formation after themomagnetic treatment 8=35055
toroidal, l.f. instabilities in multiple plasma machine 8=39140
transistor, alloy junction, diffusion of minority carriers in base region 8=27196
transverse alternating, rel. to quadratic response of intermediate state 8=35835
triplet excitons, mutual annihilation 8=40260
viscous flow of gases in strong fields 8=34619
Al, Righi-Leduc effect in high fields 8=40727
on ArII pulse laser, output enhancement and quenching 8=28674
Au_2Mn, antiferromagnet, magneto-striction at high field 8=31754
Bi, longit., rel. to transverse voltage 8=35825
Bi, reluctance anisotropy at 77°K 8=40729
Bi-Sb alloys, large changes in seebeck coeff. 8=44905
C arc, magnetized, l.f. oscills 8=25779
C, glassy, on susceptibility 8=44966
$Cd^{111,114}$, 2288Å emission polarization 8=34158
Co^{57} Mössbauer effect sources mag., r.f. field destruction of hyperfine Mössbauer spectrum 8=43945
Cr, mag. props., n. -diffr. exam. 8=31766
Cu_2O, on exciton quadrupole transitions 8=31984
$CuSO_4 . 5H_2O$, ht. capacity and mag. moment, 0.4°-4.2°K 8=39915
$CuSO_4 . 5H_2O$, thermodynamic props., 4°K 8=39914
Fe-N solid solns, on elec. resistivity at 4.2 °K 8=31319
Fe-Si, magnetization curve and energy losses in alt., effect of dislocations 8=36142
Gd, electrons, field-emitted, polarization 8=27342
n-Ge in pulsed fields, photomagnetoelec. effect 8=36021
Ge p-i-p diode negative resist., 77°K 8=40530
Ge tunnel diodes, rel. to reverse current, oscillatory behaviour 8=27189
H arc in axial parallel mag. field 8=43467-8
H_2, breakdown electric, formative time in strong crossed fields 8=29903
He II, enhancement of λ4686 line 8=34132

Magnetic fields—contd
effects—contd
He-3, vapour pressure increase at 3°K 8=28433
Hg flow, travelling field induced, obs 8=24180
n-InAs, magnetophonon oscillations in longitudinal thermoelec. power 8=27308
InSb, on impact ionization rates and instabilities 8=31303
n-InSb, rel. to impurity states 8=49250
NO-N_2 mixture, diffusion 8=30316
Ni steel phase transforms 8=30702
Ni, strongly deformed, onset of uniaxial anisotropy after mag. annealing 8=36216
Ni-Cu and Ni, var. of thermal cond. in mag. field 8=45022
Ni-Fe, electrolytically prepared, conditions for formation of hexagonal structure 8=26122
α $NiSO_4.6H_2O$, magnetothermodynamics, theory 8=39920
$O^{16}O^{18}$-O_2^{16} mixture, diffusion 8=30316
O, sound absorption 8=39210
O_2 thermal cond., field gradient depend., obs. 8=39199
on Si avalanche diode, effects on oscillation 8=27185
YFe garnet, h.f., rel. to para process near Curie point 8=49566
Magnetic films
betatron, inhomogeneities calc. and correction 8=37823
characteristics, local static and pulse, Kerr effect apparatus 8=49513
coercivity as function of temp., app. for automatic and continuous recording 8=31583
coupled, device for associative memories 8=36121
coupled, transverse initial susceptibilities 8=45003
domain struct., hysteresis and magnetooptical effects, teaching demonstration 8=27397
domain structure and reversal mechanisms, electro- and magneto-optical obs. 8=36107
epitaxial growth of ferrites on metal oxides 8=35175
evaporated, perpendicular, anisotropy 8=36108
ferromagnetic and superconducting, proximity effect 8=27008
ferromagnetic, anisotropy of localized sections rel. to pulse switching, obs. 8=31580
ferromagnetic, band structure 8=36117
ferromagnetic, contrast linked to relief in Lorentz microscopy 8=45002
ferromagnetic, Curie temp. thickness depend., spin-wave theory 8=31576
ferromagnetic, density of states formulae in band theory generalization 8=31592
ferromagnetic, domain-propagation technique 8=36126
ferromagnetic, in microwave cavity, uniform mode growth mechanism 8=36220
ferromagnetic, mag. domains individually obs. by e-microscope 8=31586
ferromagnetic, magnetization, thickness-, anisotropy- and temp.-dependence 8=36116
ferromag. magnetization, walls, Bloch, Neel and intermediate 8=36106
ferromagnetic Néel wall energy 8=31574
ferromagnetic, Néel wall structure model 8=31584
ferromagnetic, 180° domain wall energy densities 8=45018
ferromagnetic, partial switching in rot. field 8=31572
ferromagnetic, plane Hall effect optimization 8=44681
ferromagnetic, pulse switching, noise subtraction circuit for gated oscillograph c.r.o 8=31575
ferromag. reson. rel. to mag. params., obs 8=31807
ferromag., surface waves in spin-wave resonance, theory 8=45068
ferromagnetic resonance, l.f., anharmonicity for transversely magnetized film 8=40883
ferromagnetic, single-crystal, transverse susceptibility 8=36127
ferromagnetic, standing spin waves 8=49510
ferromagnetic strips-conductor sandwich, switching processes, obs. 8=31579
ferromagnetic, theory of spin wave resonance 8=31808
ferromagnetic uniaxially anisotropic, magnetization axis rotation under external stress 8=36131
ferromagnetic, with domain structure, spin waves 8=40798
holograms appls., recording and reconstruction 8=33294
hysteresis loops obtained from transverse Kerr effect, azimuth variation effect 8=40786
interaction effects 8=36130
Lorentz microscopy, electron beam coherence and micrograph interpretation 8=33090
Lorentz microscopy, high-resolution 8=36128
Lorentz microscopy of weak flux inhomogeneities 8=36132
magnetization increments near saturation rel. to anisotrpy dispersion, obs. 8=31578
magnetization ripple, linear and nonlinear theories 8=36109
magnetoelastic oscillations, coupled, mag. and acoustic excitation 8=31582
magneto-optic effect, longitudinal Kerr, in multilayer structs. 8=41045
magneto-optic readout, amplitude-modulated 8=36122
for magneto-optic readout using media modulation 8=40799
metallic, magnetoelastic waves, boundary-value-problem 8=40797
Magnetic films—contd
moment subharmonic oscills. in rot. field 8=31573
multilayer, coupled wall configurations 8=36129
multilayer devices, magnetization reversal 8=36120
Permalloy, abnormal Bloch wall motion under hard axis nanosec. pulse drive 8=31668
Permalloy anisotropy and blocking fields rel. to r.f. losses, obs. 8=31678
permalloy, annealing kinetics and increasing S conc. 8=31222
Permalloy, coercive force and blocking field rel. to substrate temp., obs. 8=31676
permalloy, and coupled double layers with Fe-Ni-Mn, spin-wave resonance 8=31814
Permalloy, critical switching curves, obs. 8=31671
permalloy, cylindrical, annealed, bimodal state of magnetization 8=49540
permalloy, domain boundary dynamic props. 8=36167
permalloy, domain wall movement, thermally activated 8=45020
Permalloy, domain walls and mag. fine struct. in switching, stroboscopic transmission e microscope obs. 8=31674
Permalloy domains and coercive force in supercritical transition, obs. 8=31629
Permalloy, exchange stiffness constant by pulse switching technique 8=31686
Permalloy, ferromag. reson. and off-reson. suseptibility, obs. 8=31822
Permalloy, ferromag. reson. rel. to internal stresses, obs. 8=31821
permalloy, flash evaporated, for investigation of spin-wave resonance 8=31809
permalloy/Gd/Co-permalloy triple layers, spin-wave resonance temp. dependence, 100-400°K 8=31816
permalloy, induced uniaxial anisotropy on n.- and Ar^+ bombardment 8=31694
Permalloy, internal isotropic stresses and demagnetizing factors, ferromag. reson. obs. 8=31223
permalloy, in contact with FeNiMn or Gd, spin-wave resonance obs. 8=31681
permalloy, domain boundary energy meas. rel. to thickness 8=40826
permalloy, mag-moment motion in h.f. rotating field 8=36157
Permalloy, mag. struct. stability in pulsed orthogonal fields, obs. 8=31691
permalloy, memories, keepered and nonkeepered, internal field distrib. 8=40820
Permalloy, narrow strips for meas. of domain wall energy 8=27420
permalloy, 1000Å, Néel wall structure and energy 8=31663
Permalloy, pulse switching, induction and magneto-optical meas. comparison 8=31688
Permalloy, pulse switching rate, −180-250°C 8=31675
Permalloy 78, demag. rel. to alternating field freq., obs. 8=31692
Permalloy spots nucleation, struct. and field rel. to dimensions, obs. 8=31673
permalloy stripe-films, domain structure 8=31693
permalloy, supercritical, domain structure, theory 8=31684
permalloy, susceptibility at 5000 Hz, easy and hard directions 8=36110
permalloy, 360° walls and strong stripe domains 8=45024
Permalloy, uniaxial anisotropy, mag. annealing effects, 20-400°C 8=31677
permalloy, wall streaming obs. 8=31558
polycrystalline, susceptibility and ripple 8=36118
ripple relax. times, models 8=36119
rotational initial susceptibility mechanisms 8=31577
saturation magnetization, ferro-, thin 8=36113
sharp film NDRO bit organized memory 8=36124
spin wave resonance 8=36114
spin waves, theorems and tables 8=49512
storage-elements, controlled easy-axis distrib. 8=49511
strain-sensitive ferromag., for sonic film memory 8=36125
superparamagnetic effects ferromag., thin 8=36112
switching process 8=36115
thin ferromag., Bloch wall transitions 8=31589
thin ferromag. coupling effects through nonmag. interlayer 8=31588
thin ferromag., domain obs. by transmission e mic. 8=31590
thin ferromag., spin-wave theory and expt. 8=31591
thin ferromag., stationary spin-wave excitation 8=31587
thin, magnetization and field distrib. determ. technique, comments 8=46389
thin multiple, oscillating hysteresis losses 8=31585
transition layers between domains 8=31555
two-layer, Néel bonding energy interlayer thickness dependence 8=45004
uniaxial-anisotropy relax. process excitation by rotating mag. anneal. 8=31581
Co alloys, ferromag, epitaxial growth on LiF and MgO 8=35170
Co, domains and coercive force in supercritical transition, obs. 8=31629
Co, domains and fine structure form., e microscope obs. 8=31640

Magnetic films—contd
  Co, epitaxial, anisotropy constant 8=31631
  Co ferromag., in Co-Co oxide-Al device, rel. to anomalous tunneling 8=31422
  Co, ferromag., planar Hall effect, thickness (100-1500Å) and temp. (77-293°K) dependence 8=31687
  Co, galvanomagnetic effects and domain struct. rel. to thickness, 200-2000Å 8=31598
  Co, high-coercivity, magneto-optic domain obs. 8=36134
  Co, Kerr effect and application to hysteresis loop plotter 8=45007
  Co, magneto-optic and mag. props. 8=32018
  Co, single-cryst., epitaxial growth on LiF and MgO 8=35170
  Co-CoO, separated by Pd film, magnetization coupling 8=36133
  Co-Ni domains and fine structure form., e microscope obs. 8=31640
  Cu-Ni film thermocouple for substrate temp. meas. 8=31676
  Co-Ni-Fe, critical thickness and coercivity 8=27400
  Co-Ni-Fe, stress, production parameter dependence 8=31192
  Co-P, coercivity rel. to substructure 8=27402
  Cr, antiferro-paramag. transition rel. to resistivitv 8=39590
  EuO, ferromagnetic, transverse Kerr magneto-optical effect 8=31987
  EuO memory medium in low temp. laser-beam addressable memory 8=36123
  Fe alloys, ferromag., epitaxial growth on LiF and MgO 8=35170
  Fe, anisotropy from Mossbauer meas. 8=31641
  Fe, domains and coercive force in supercritical transition obs. 8=31629
  Fe, domains and fine structure form., e microscope obs. 8=31640
  Fe, epitaxial, anisotropy constant 8=31631
  Fe, ferromag., planar Hall effect, thickness (100-1500Å) and temp. (77-293°K) dependence 8=31687
  Fe ferromag., in Fe-Fe oxide-Al device, rel. to anomalous tunneling 8=31422
  Fe, single-cryst., epitaxial growth on LiF and MgO 8=35170
  Fe, Richter-type aftereffect 8=31633
  Fe-Cr, exchange constants from spin-wave resonance spectra 8=36147
  Fe-Ni domains and fine structure form., e microscope obs. 8=31640
  Fe-Ni, exchange stiffness const. 8=49522
  Fe-Ni, switching along easy axis above nonuniform, rot. threshold field 8=31630
  Fe-Ni-Co, anisotropy. coercive force and s.h.j. reson. absorpt. obs. 8=31629
  Fe-Ni-Co, anisotropy, review 8=36148
  Fe-Ni-Co, single cryst. anisotropy, domains and saturation magnetization, obs. 8=40809
  FeNi, electrodeposited, mag. switching behaviour 8=27419
  FeNi electrodeposited, magnetization reversal obs. 8=31644
  FeNi-FeNiMn, separated by Pd film, magnetization coupling 8=36133
  Gd-Permalloy, antiparallel exchange coupling 8=40816
  Gd/permalloy double layers, spin-wave resonance temp. dependence, 100 400°K 8=31816
  Mg-Mn ferrite, FMR, thermal treatment effects 8=31817
  Mn ferrites epitaxially grown on MgO, prep. methods 8=35175
  MnBi, props. rel. to memory appls. 8=49531
  $MnFe_2O_4$, single-cryst., pulse switching and static characts., obs. 8=31730
  Nb_3Sn superconducting ribbons, vapor-deposition rel. to e.m. performance 8=40418
  Nb_3Sn strip superconductor, plasma-plated, critical current angular dependence 8=40420
  $NdCo_5$ and Nd_2Co_{17}, magneto-optic and mag. props. 8=32018
  Ni alloys, ferromag.. epitaxial growth on LiF and MgO 8=35170
  Ni, domains and fine structure form., e microscope obs. 8=31640
  Ni, electrodeposited, and charged with H, effect of H on magnetization inversion 8=36170
  Ni, epitaxial, anisotropy constant 8=31631
  Ni ferrite, structural properties and ferromag. resonance 8=36192
  Ni ferromag., in Ni-Ni oxide-Al device, rel. to anomalous tunneling 8=31422
  Ni, ferromag., planar Hall effect, thickness (100-1500Å) and temp. (77-293°K) dependence 8=31687
  Ni, ferromag. reson. rel. to internal stresses and magnetization inhomogeneity, obs. 8=31821
  Ni films, oscillating hysteresis 8=45021
  Ni-magneto-optical parameter temp. dependence, 20-400°C 8=36398
  Ni, p-bombardment effects on mag. props. at 850 keV 8=36168
  Ni, single-cryst., epitaxial growth on LiF and MgO 8=35170
  Ni, ultrasound from stripe domain resonance 8=31682
  Ni, u. v. reflection, near Curie point 8=36399
  Ni-Fe alloy, domain-wall motion and ferromagnetic resonance losses 8=31695
  Ni-Fe alloy, spin-wave spectra, linewidth and relax. processes for main resonance 8=40887
  Ni-Fe, anisotropy dispersion, temp. depend. 8=40821
  Ni-Fe, electrochem. deposited, coercive force, obs. 8=31672
  Ni-Fe, ferromag., planar Hall effect, thickness (100-1500Å) and temp. (77-293°K) dependence 8=31687
  Ni-Fe, ferromagnetic, thick, domain-wall width determ. by Lorentz microscopy 8=27422
  Ni-Fe films, single and double, reversible rotation regions, obs. 8=31690
  Ni-Fe, magnetization, static reversal, effect of anisotropy dispersion 8=36155
  Ni-Fe, magnetoelastic sensitivity, composition gradient effect 8=36111
  Ni-Fe, magnetoresist. and resist. studies 8=44695
  Ni-Fe, polycrystalline alloy, anisotropy induced during evaporation and annealing 8=36152
  Ni-Fe, polycrystalline, susceptibility strain-dependence 8=40824
  Ni-Fe, ripple-comp.- meas. temp.- and substrate temp.-dependence 8=36159
  Ni-Fe, s. h. f. susceptibility, < 30 Oe 8=31689
  Ni-Fe, stress, production parameter dependence 8=31192
  76%Ni-Fe, type II stripe domains, obs. 8=40825
  Ni-Fe-Al films, single and double, reversible rotation regions, obs. 8=31690
  Ni-Fe-Co films, single and double, reversible rotation regions, obs. 8=31690
  Ni-Fe-Co, s. h. f. susceptibility, < 30 Oe 8=31689
  NiFe, coupled, domain wall behaviour 8=49541
  48 Ni/52Fe (111), epitaxial, ferromag; flat, of few atomic layers 8=36166
  NiFe, sputtered, reduced sensitivity to impurities by neg. bias appl. during deposition 8=31679
  NiFe, 2-200Å, magnetization anomalies rel. to surface anisotropy 8=36158
  NiFeCo, props., effect of Cu layer 8=40822
  $NiFe_2O_4$, ferromag. resonance thickness dependence 8=31823
  $NiFeS_x$ electrodeposited rel. to vacuum deposited 8=35177
  Ni-NiO, separated by Pd film, magnetization coupling 8=36133
  Ni-P, Hall effect obs. 8=26970
  Pb, epitaxially grown on PbTe, domain structure from Lorentz microscopy 8=36171
  Pb, parallel and perpendicular transitions, temp. (1-4.2°K) and thickness dependence 8=40741
  Sn, parallel and perpendicular transitions, temp. (1°K-T_c) and thickness dependence 8=40741
Magnetic flux. See Magnetic field measurement; Magnetic fields.
Magnetic hysteresis. See Magnetization process.
Magnetic lenses. See Electron lenses/magnetic; Ion optics.
Magnetic materials
  alloy, dilute, Green's function theory of Kondo effect 8=31263
  alloys, dilute, singlet-triplet formulation, s-d exchange and Anderson models 8=27369-70
  alnico, high-coercivity, powder pattern exam. 8=35346
  antiferromagnetic dielectrics, near phase transition of second kind 8=36301
  birefringence, gyrotropic, phenomenological theory 8=36303
  ceramics, structure rel. to ferrimagnetism, review 8=49554
  commercial, prep and permanent magnet props. 8=46380
  congress, international, USA (1967) 8=27368
  crystals, Faraday rotation, origin and uses 8=36306
  exchange enhanced susceptibility, effect of spin-flip scattering 8=40747
  ferromagnet in two-phase mixture, mag. oscills. damping and dispersion 8=40600
  ferromagnetic alloy, martensitic transform. mag. field effects 8=35109
  ferromagnetic binary alloys, vapour pressure temp. dependence rel. to mag. and structural transitions 8=35014
  ferromagnetic dielectrics, near phase transition of second kind 8=36301
  ferromagnetic, magnetization direction distributions around spherical cavity 8=40757-8
  ferromagnetic, polarization of emitted photo-electrons 8=40701
  ferromagnets, lattice structure determ. using micro. e.-diffr. technique 8=39761
  Hyhro Radio metal, development, props. and appls. 8=27387
  light absorpt. and scattering in crystals 8=36297
  magnetism, in high magnetic fields 8=31478
  magnetostricture, dynamic properties and applns. 8=49452
  Mumetal, permeability temp. vars. stabilization and appls. 8=27387
  paramagnetic crystals, proton spinlattice relax. in high fields and low temps. 8=31889

Magnetic materials—contd

- properties. book 8=49459

- Mössbauer absorption spectra of magnetically ordered systems rel. to spin relax. 8=43940
- noble metal-rare earth, susceptibility meas. rel. to local moments 8=31882
- Onsager reaction field, mol. field theory and spherical model 8=32826
- pyridine Cu(II) chlorobenzoates 8=36072
- pyrite dichalocogenide cpds. 8=31493
- quartz, non-linearities and isochronism defect 8=27301
- rare-earth-cobalt cpds, R_xCo_y, comp. dependence 8=31506
- rare earth cpds, low-lying crystal-field spectra 8=36296
- rare earth cpds, susceptibility and elec. meas. rel. to ordering 8=27234
- rare earth cpds, susceptibility at low temps. 8=49348
- rare-earth cpds with singlet crystal-field ground state, collective excitations and mag. ordering 8=44964
- rare-earth hydroxides 8=31507
- rare-earth metal impurities in noble metals rel. to electron transport of dil. alloy 8=31316
- rare-earth metals, mag. anisotropies 8=31505
- rare-earth-nickel cpds, R_xNi_y, comp. dependence 8=31506
- rare-earth orthoferrites, in anisotropy change region 8=31793
- rare-earth perovskites, ordering between 1.2° and 5°K 8=39921
- rare-earth-Th alloys, f.c.c., Th effect in ordering 8=36218
- rare-earth-transition-metal cpds., electron moment, itinerant, in cubic Laves phase 8=49473
- rare earths, heavy, generalized susceptibilities and mag. ordering 8=44973
- rare-earths, structure, ferroelectric props. 8=40619
- rubeanato-Cu co-ord. polymer, cryst. compared with amorphous 8=27385
- selenospinels, binary, rel. to misibility studies 8=30653
- semiconductors, wurtzite type. mag. levels in valence band 8=49094
- space groups and their irreducible representation 8=31488
- spectra, sharp, of magnetic ions, magnon effects 8=27373
- spectroscopy, far-i.r., techniques, mag. ion spectra and magnon absorpt. in antiferromagnets 8=36294
- steel, transformer, annealing effects at high-temp and vacuum 8=35107
- sulphospinels, binary, rel. to misibility studies 8=30653
- susceptibility, complex, effect of mag. diffusion after-effect and logarithmic distrib. of time consts. 8=49549
- susceptibility, nonlinear, diagrammatic approach 8=48297
- systems with dipole interactions, thermodynamic props. shape-dependence 8=44329
- transition metal alloys, dynamic susceptibilities 8=31491
- transition metal alloys, local moments, statements from macroscopic meas. 8=31509
- transition metal arsenides 8=41079
- transition metal carbides, nitrides and oxides, M-M interaction effects 8=26441
- transition metals. nearly ferromag., spin fluctuations effect on susceptibility 8=44992
- AgMn films, evaporation prod., conc. depend. 8=40802
- $Al_2O_3 : V^{3+}$, anisotropy meas. 1.5-5.0°K rel. to g factor and zero-field splitting 8=44965
- Au-Fe alloys, hyperfine coupling constants from nuclear sp. hts. down to 0.02°K 8=31495
- BF molecule, Hartree-Fock calc. 8=25447
- BH molecule, Hartree-Fock calc. 8=25447

Magnetic properties of substances—contd
Bi, reluctance anisotropy mag. field dependence at 77°K 8=40729
Ca manganates, rel. to comp. and lattice geometries 8=31757
CdSb: (Mn, Fe, Ni and La), susceptibility, temp. depend. 8=49464
α, β, Ce, susceptibility above magnetic ordering temp., temp. depend. 8=40750
CeSb, magnetic state phase diagram 8=49465
Co films, and magneto-optic props. 8=32018
Co solid solution with P, moment rel. to P content 8=45006
Co^{2+} in fluoride salts, ordering effects on optical-absorpt. transitions 8=36350
Co_5(rare-earth) high-coercive force mat., domain-boundary model 8=31500
$Co_2BaFe_{16}O_{27}$ crystals, energy anisotropy constants and temp. dependence, 20-500°C 8=40732
Co-Rh alloys, enhanced susceptibilities and n.m.r. relax. rates 8=31499
Cr binuclear complex cpds., biquadratic exchange interaction 8=49467
Cr-Mo(W) alloys, T_N comp. -dependence, from resistivity meas. 4-325°K 8=31763
Cs_3CoCl_5, and optical and e.p.r. props. 8=31501
Cs_3ZnCl_5: Co^{2+}, and optical and e.p.r. props. 8=31501
Cu acetate monohydrate, rel. to optical behaviour 8=36434
Cu alloys, dil., mag. impurity problem, ground state, rel. to NMR meas. 8=45116
Cu-Al, susceptibility of dilute solutions of Fe 8=27403
$CuCr_{1+x}Rh_{1-x}Se_4$, $-1 < x \leq 1$, and electrical conduction 8=31609
$CuCr_2Se_xS_{4-x}$ solid solution 8=40733
$CuCr_{1+x}Ti_{1-x}S_4$, $0 < x \leq 1$, and electrical conduction 8=31609
$CuCr_{1+x}Ti_{1-x}S_4$, $0 \leq x \leq 1$, and electrical conduction 8=31609
$CuSO_4.5H_2O$, mag. moment in mag. field at 0.4°-4.2°K 8=39915
$CuSO_4.5H_2O$, 4°K 8=39914
Dy, generalized susceptibilities and mag. ordering 8=44973
$DyFe_2$, hyperfine field at Fe from Mössbauer effect 8=36146
Er, generalized susceptibilities and mag. ordering 8=44973
$ErFe_2$, hyperfine field at Fe from Mössbauer effect 8=36146
ErO_2S, and structures from n. diffr. meas. 8=40869
Eu-chalcogenide, anomalous props. 8=31268
Fe-Be, and Mossbauer effect 8=26024
FeF_3-FeF_2-MF, (M = Li, Na, K, Rb, Tl) system, of phases rel. to crystallog. classif. 8=48651
$Fe(NH_4SO_4)_2.6H_2O$, susceptibility and quadrupolar hyperfine anisotropy 8=43951
FeP, and thermodynamic props. 8=27378
Gd, generalized susceptibilities and mag. ordering 8=44973
Gd-Er alloys, magnetocrystalline anisotropy rel. to impurity contribution 8=44971
Gd-Ho alloys, magnetocrystalline anisotropy rel. to impurity contribution 8=44971
He^3-He II dilute soln., nuclear mag. susceptibility obs. 8=46306
HgTe, oscillations of longitudinal magnetic resistance in degenerate electron gas 8=40466
$HoCo_5$, structure and magnetocrystalline anisotropy 8=40737
$HoFe_2$, hyperfine field at Fe from Mössbauer effect 8=36146
In-Ce solid solns., localized moments from elec. meas. 8=31339
$(IrX_6)^{2-}$ complexes (X = F, Cl, Br) 8=49471
$KNiF_3$ and K_2NiF_4, ordered crystals, effect of electron-magnon interaction on Ni^{2+} absorption band 8=41127
La-Ce alloys, susceptibility above magnetic ordering temp., evidence for spin compensation 8=40750
$LaRu_2$: Gd^{+++}, susceptibility and e.p.r. study 8=31502
$LaTO_3$, (T = Ho, Y, Er, Tm, Yb, Lu) 8=48656
Lu, generalized susceptibilities and mag. ordering 8=44973
Mg-Cd alloys, susceptibility, effect of ordering 8=40321
MgO-MnO solid solns., and with LiO_2, susceptibilities 8=48662
Mg_2SnO_4-$MgFe_2O_4$, solid solutions, existence of magnetic fields 8=40738
$MnAs_{0\cdot 92}P_{0\cdot 08}$, polycrystalline, and crystallographic props. 8=31503
$Mn_{1-x}Fe_xP$ solid solutions, rel. to props. of FeP 8=27378
Mn-Sn alloys in liq. state, links in Curie-Weiss curves 8=36214
Na disilicate glass, with diffused Fe, susceptibility rel. to Fe content 8=27381
Nb films, sputtered cylindrical, flux jumping phenomena 8=49472
Nb, superconducting, anomalous behaviour 8=27383
Nb-Sb superconducting alloys, mag. hysteresis, at 4.2°K 8=27024

Magnetic properties of substances—contd
Nb_3Sn, hard supercond. tubes, flux jumps, 4.2°K 8=31341
Nb-Ti-Zr alloys, supercond., critical fields 8=35851
Nb-Zr, hard supercond. tubes, flux jumps, 4.2°K 8=31341
Nd^{3+} in ethyl sulphate lattice, anisotropy 8=43932
$NdCo_5$ and Nd_2Co_{17} films, and magneto-optic props. 8=32018
Ni, reversible magnetic susceptibility, dependence on temp. and stress 8=36154
NiO-MgO solid soln. 8=35061
α-$NiSO_4.6H_2O$, mag. moment, 0.4-4.2°K 8=30968
α $NiSO_4.6H_2O$, magnetothermodynamics, theory 8=39920
OCS, magnetic susceptibility anisotropy 8=25511
Pb films, epitaxially grown on PbTe, domain structure from Lorentz microscopy 8=36171
Pb-Bi alloys, superconducting, field spatial distrib. 8=40381
$Pb_{85}In_{15}$, exptl. demonstration, superconductivity 8=35855
Pd_3Fe alloy, hyperfine interaction constants from nuclear sp. hts, 0.15-1°K 8=31504
Pd-Fe alloys, hyperfine coupling constants from nuclear sp. hts. down to 0.02°K 8=31495
Pd-NO sorption systems 8=44075
Pd-Ni alloys, dynamic susceptibilities 8=31491
Pt_3Fe alloy, hyperfine interaction constants from nuclear sp. hts, 0.15-1°K 8=31504
$Pu(C_2O_4)_2.3H_2O$-$Th(C_2O_4)_2.2H_2O$, susceptibility 8=36073
$RbNiF_3$, exchange interactions exam. by n.m.r. 8=41001
$RbNiF_3$, ordered crystals, effect of electron-magnon interaction on Ni^{2+} absorption band 8=41127
$SmFe_2$, hyperfine field at Fe from Mössbauer effect 8=36146
Sn magnetic breakdown rel. to quantum oscills. in thermo-electric e.m.f. 8=40643
Sn-Ce solid solns., localized moments from elec. meas. 8=31339
Sn-In films, superconducting 8=44974
$(Sr_{0\cdot 4}Bi_xLa_{0\cdot 6-x})MnO_3$, and dielec. props. rel. to structure 8=26038
$Sr_{1-y}Bi_y)MnO_3$, and dielec. props. rel. to structure 8=26038
Tb, damping 8=49475
$TbFe_2$, hyperfine field at Fe from Mössbauer effect 8=36146
Tb-Y alloys, helicoidal struct., effect of replacing Tb by Y 8=40742
ThO_2: Yb^{3+}, g-factor stress dependence 8=31510
$TiCr_2S_4$, mag. struct., comparison with $TiCr_2Se_4$ 8=35358
$TiCr_2Se_4$, mag. struct., comparison with $TiCr_2S_4$ 8=35358
Ti-H systems, susceptibility maximum 8=49658
Ti_2O_3, order, and resistivity 8=31313
Ti_5O_9, susceptibility, anomalous, 77° -160°K 8=31511
$TmAl_3$, cryst. stark splitting 8=48309
TmSb, magnetization anisotropy 8=31512
TmFe garnet, sublattice magnetization 8=40840
V, superconducting, anomalous behaviour 8=27383
VAu_4, effect of at. environment, correction to paper 8=31513
VO_2, and elec. props. 8=40293
Y-Ce alloys, bound state, magnetoresistance at low temp. 8=49476
Y-Ce dilute alloys, susceptibility and thermopower due to s-f anomaly 8=27384
YFe garnet, e.m. conversion to exchange spin wave energy, coherent i.r. diffraction determ. 8=40848
$ZnNi_xMn_{2-x}O_4$, susceptibility temp. dependence 8=40745
antiferromagnetic
See also Antiferromagnetism.
alloy, dil., with mag. impurity distrib. symmetrical rel. to sublattices 8=40851
critical relaxation below Neél point 8=49567
tris(dihydroxobis(diethylamine)chromium)chromium (III) sulphate decahydrate, suscept. 8=40860
geothite, natural, rel. to thermoremanence 8=49523
Heisenberg antiferromagnet with uniaxial anisotropy, anomalous behaviour of sound near crit. pt. 8=39883
Heisenberg, ground-state sublattice magnetization 8=36200
Heisenberg, with spinless impurities, zero-point spin deviation 8=27437
hematite, moment direction pressure dependence to 41 kbar, n. diffr. exam. 8=45059
Kondo instability, anal. using Schrieffer-Wolf model 8=49501
magnon absorpt. from far i. r. spectroscopy 8=36294
manganites of perovskite structure, behaviour rel. to lattice distortions 8=49534
moments in crystals, local distrib. by neutron diffraction 8=31643
perovskites, $ATbO_3$, (A=Fe, Cr, Al, Co), ordering of Tb 8=31799
rare-earth-Al alloys 8=36176
rare-earth antimonides, mag. anisotropies 8=31791
rare earth chromites, magnetostatic props. 8=31790
rare earth crystals, mag. -ordering temp., pressure dependence 8=31652
rare earth manganites, magnetostatic props. 8=31790
rare-earth monochalcogenides, susceptibility temp. dependence, 4-1300°K 8=31761
rare-earth ortho-aluminates, thermal props. in Neel point neighbourhood 8=35435

Magnetic properties of substances—contd
antiferromagnetic—contd
rare-earth orthoferrites with weak ferromagnetism, anisotropy pressure depndence 8=40857
seignettomagnetics, phase transitions and coupling of ferroelec. and mag. props. 8=27398
seignettomagnetics, phase transitions from Mossbauer studies 8=27442
semiconductor, coupled spin, plasmic and e. m. waves in const. fields 8=40771
semiconductor, new type of auto-localized conductivity 8=40429
semiconductors, spin-disorder scattering of carriers 8=27058
slow neutron scatt. near mag.-acoustic res., rel. to mag.-elastic coupling 8=40855
spin relaxation, anomalous, near mag. transition 8=49582
spin-wave spectrum, anomaly in spiral spin structures 8=49572
spin waves, instability 8=36202
2, 2, 6, 6 tetramethyl 4-piperidinol 1-oxyl, exchange interaction 8=30969
transition metal salts, transferred hyperfine interactions and spin deviations 8=31919
transition metal boracites, temp. between 1, 8°and 300°K 8=45065
transition metals, atomic mag. moment rel. to localized d electrons 8=35047
two-magnon scattering of neutrons involving orbital transitions 8=45047
uniaxial, sound attenuation, anomalous, near spin-flop transition point 8=26580
AgCrS(Se)$_2$, and crystal structure 8=39810
AlTbO$_3$, magneto-electric effect 8=36217
Au-Cr disordered alloys, susceptibility meas. 8=44685
Au$_2$Mn, exchange striction and exchange coupling consts. 8=31755
Au$_5$Mn$_2$, ordered 8=31756
Ba$_{0.15}$Ca$_{0.85}$MnO$_3$, at. mag. structure from n-diffr. exam. 8=40859
BaCo$_2$Fe$_{16}$O$_{27}$, rotatory hysteresis losses and anisotropy 8=45037
BiFeO$_3$ 8=27285
BiFeO$_3$, e.p.r. study 8=27488
BiFeO$_3$-PrFeO$_3$ system, phase transitions and ferroelec. props. 8=26064
(1-x)BiFeO$_3$-xSr(Sn$_{1/2}$Mn$_{2/3}$)O$_3$, solid solns., transitions from Mossbauer studies 8=27442
CaCrO$_3$ perovskite, band antiferro., and parasitic ferromag. below T_N 8=49570
CaF$_2$: Ho^{2+}, g-factor stress dependence 8=31510
Ca$_2$FeAlO$_5$, and spin orientation 8=31758
Ca$_2$Fe$_2$O$_5$, magnetic structure 8=31759
CaRuO$_3$, rel. to band structure 8=36177
CdAlO$_3$, ordering from sp. ht, susceptibility and optical meas. 8=31773
Cd-Mn alloys, dil., ordering from elec. resistivity and susceptibility meas. 8=31760
Ce, monochalcogenides, susceptibility temp. dependence, 4-1300°K 8=31761
CeAs, from neutron scattering data 8=45052
CeCl$_3$, interaction constants determ. 8=36239
CeSb, from neutron scattering data 8=45052
CoBr$_2$·6H$_2$O, spin-flopping 8=45053
CoBr$_2$. 6H$_2$O, susceptibility and reson. expts. 8=36204
Co-CoO films, ferro-antiferromagnetic coupling and after effect 8=49517
CoCr$_2$S$_4$, NiAs-type structure, magnetization, 1. 5°K to room temp. 8=45064
CoF$_2$, behaviour in high mag. field normal to c axis 8=36230
CoF$_2$, excitations near Neel pt. from n. scattering meas. 8=31762
CoO(I) and (II), hyperfine Mossbauer spectra of Fe^{57} below Neel temp. 8=26018
CoO(I) and (II), Neel temp. shifts rel. to Mossbauer studies 8=26017
CoSe$_2$ pyrite, 8=31493
Co-Ti system, Laves phase, susceptibility rel. to temp. 8=49571
Cr and alloys, spin density waves 8=36205
Cr alloys, spin-density-wave periodicity conc. dependence 8=36207
Cr alloys, spin density wave to antiferromagnetic transition, pressure effect 8=31767
Cr, critical n. scattering rel. to itinerant e.-model 8=31764
Cr, electrical resist. 8=40316
Cr, field-cooled, domain state, fermi surface change 8=39891
Cr, Hall coeff. temp. dependence, 77-330°K rel. to "mag. cooling" effects 8=45054
Cr, high-pressure changes by neutron-diffractometry 8=26361
Cr, Néel temp., effect of plastic deform. 8=45055
Cr, pressure and mag. field effects, n.-diffr. exam. 8=31766
Cr, rel. to band structure 8=36201
Cr, rel. to sinusoidal spin-density waves, band model 8=36206

Magnetic properties of substances—contd
antiferromagnetic—contd
Cr, spin-density-wave distribs. 8=31765
CrH$_x$, ($x < 1$), contrib. to anomalous paramag., rel. to H-orbital expansion effects 8=49480
Cr-Mn alloys, structure stabilisation 8=48735
Cr-Mo alloys, absolute thermoelectric power between 100 and 600°K 8=49393
Cr-Mo(W) alloys, from resistivity meas. 4-325°K 8=31763
Cr$_2$O$_3$, Neel temp. pressure dependence up to 13. 3 kbar 8=27443
Cr$_2$O$_3$ powder, Néel temp. depend. on particle size 8=40861
Cr$_2$O$_3$, sublattice magnetization, susceptibility 8=40862
Cr$_2$O$_3$-Fe$_2$O$_3$ system, structure 8=27444
Cr$_2$TeO$_6$, structure by neutron diffraction 8=40863
Cr$_2$WO$_6$, structure by neutron diffraction 8=40863
CsMnCl$_3$. 2H$_2$O, and n. m. r. 8=36275
Cs$_2$MnCl$_4$. 2H$_2$O, and n. m. r. 8=36275
CuCl$_2$. 2H$_2$O-d$_x$, deuteration effects, from PMR 8=36264
CuCl$_2$. 2H$_2$O, proton relaxation 8=49635
CuCrS(Se)$_2$, and crystal structure 8=39810
CuFe$_2$S$_3$, ordering from Mössbauer spectroscopy 8=40864
Cu-Mn-Sb system, phase equilibrium 8=45056
Cu(NH$_3$)$_4$SO$_4$. H$_2$O, order from PMR 8=36263
Cu(NO$_3$)$_2$. 2. 5H$_2$O, rel. to ht. capacity, 0. 5-4. 2°K 8=35428
Cu(NO$_3$)$_2$. 3H$_2$O, ordering from PMR 8=36263
CuSO$_4$. 5H$_2$O, proton magnetic resonance down to 0. 3°K 8=49637
CuSeO$_4$. 5H$_2$O, proton magnetic resonance down to 0. 3°K 8=49637
Dy, anisotropy constant temp. dependence 8=31651
Dy, mag. -ordering temp., pressure dependence 8=31652
Dy, spin-wave spectrum, anomaly in spiral spin structures 8=49572
DyAl garnet, critical n. -scattering rel. to Ising model 8=31769
DyAl garnet, magnetization and mag. ordering. 0. 37°K 8=40866
Dy$_3$Al$_2$, metamagnetic 8=49544
DyAlO$_3$, neutron diffraction study 8=48647
DyAlO$_3$, rel. to absorpt. spectra 8=36356
DyC$_2$ 8=40865
DyFeO$_3$, below 36°K 8=31768
DyFeO$_3$, ordering rel. to sp. ht., 1. 2-80°K 8=35429
DyO$_2$S, and structures from n. diffr. meas. 8=40869
Er, Néel temp., effect of hydrostatic press. 8=36212
Er, structure of three ordered states below Néel temp. 8=44970
ErAl$_2$, neutron diffr. meas. 8=31611
ErGa garnet, antiferromag. struct. and metamag. transition, 0. 31 and 4. 2°K 8=40867
Er-Th alloys, f.c.c., ordering stabilization by Th 8=36218
Eu, from mag. moment meas. at 4. 2°K 8=31706
Eu$_3$O$_4$, hyperfine fields from Mossbauer spectra 8=36208
Eu$_3$O$_4$, interaction between linear arrays 8=40734
Fe-Al alloys, below 40°K, 8=31615
FeCl$_2$. 4H$_2$O, Mossbauer study, 4. 2-0. 025°K 8=36211
Fe-Cr-Ni alloys, mag. investigation 8=36209
FeCr$_2$S$_4$, effective-field parameters at Fe^{57} temp. dependence, 60-298°K rel. to magnetically induced quadrupole interaction model 8=45060
FeCr$_2$S$_4$, NiAs-type structure magnetization, 1. 5°K to room temp., 8=45064
FeF$_2$, effects of exciton-magnon interactions in spin-allowed optical transitions 8=45062
FeF$_2$ rutile, spin-wave light scattering 8=36387
FeF$_2$, spin-wave dispersion relations from n.-scattering 8=31771
FeF$_2$, susceptibility rel. to i.r. spectra 8=36210
FeF$_2$, uniaxial, exam. by cluster-variation method 8=45058
FeF$_2$, zero-magnon lines in 3800Å and near i.r. region 8=45061
γ-FeMn alloys, rel. to mag. moment and hyperfine field temp. and comp. dependence 8=31770
Fe$_{0.98}$O, Neel temp. determ. by elastic modulus method 8=31772
α-Fe$_2$O$_3$, n scatt. by spin-waves, polarization effects, obs. 8=36187
α-Fe$_2$O$_3$: Ti, canted structure and doping rel. to mag. resonance 8=36231
Fe(OH)$_2$, hyperfine fields from Fe^{57} Mossbauer meas. 8=39517
α-FeOOH, structure from n-diffr. meas. at < 80°C 8=30894
Gd, anisotropy constant temp. dependence 8=31651
Gd$_2$O$_3$, and structures from n. diffr. meas. 8=40869
He^3, solid, nuclear spin exchange interaction 8=31774
Ho, Néel temp., effect of hydrostatic press. 8=36212
Ho-Th alloys f.c.c., ordering stabilization by Th 8=36218
HoO$_2$S, and structures from n. diffr. meas. 8=40869
K$_2$IrCl$_6$, ordering from n. diffr. exam. 8=40870
KMnCl$_3$. 2H$_2$O, and n. m. r. 8=36275
KMnF$_3$, zero-point spin reduction rel. to low temp. heat capacity 8=44340
K$_2$MnF, zero-point spin reduction rel. to low temp. heat capacity 8=44340

  - rare-earth iron garnets, mag. moment at 0°K substitution dependence, mol.-field model 8=45027
  - rubber ferrite-loaded magnets 8=24111
  - saturation temp. dependence in mol. field coeff. determ. using Néel-Weiss theory 8=45033
  - spinels, insulators, hyperfine interactions at diamagnetic ions 8=40832
  - thermoplastic ferrite-loaded magnets 8=24111
  - two-sublattice cpds., first magneto-crystalline anisotropy constant temp. dependence 8=45042
  - Ba ferrites rel. to magnets for transport appls. 8=24114
  - $Ba_2(FeMo)O_6$, and elec. props 8=36195
  - $BaFe_{12}O_{19}$ flexible magnets, anisotropic, and prep. 8=24110
  - $BaFe_{12}O_{19}$, rotatory hysteresis losses and anisotropy 8=45037
  - $Ba_4Zn_2Fe_{36}O_{60}$, 8=31719
  - $Bi_{3-2x}Ca_{2x}Fe_{5-x}V_xO_{12}$, two-sublattice cpd., first magneto-crystalline anisotropy constant temp. dependence 8=45042
  - $Ca_2(FeMo)O_6$, and elec. props. 8=36195
  - $CdCr_2Se_4$, distant-neighbour interaction analysis 8=31596
  - $Co_2BaFe_{16-x}In_xO_{27}$, Curie pt. comp. dependence 8=45038
  - $CoCr_2O_4$, structure from n. -diffr. 8=31721
  - $CoFe_2O_4$, spinel, cation distrib. in octahedral and tetrahedral sites, Mössbauer determ. 8=35035
  - DyAl garnet, sp. ht. shape dependence 8=35423
  - $Dy_{0.2}Y_{1.8}Ti_2O_7$, susceptibility meas. 2-1400°K 8=27429
  - Er ferrite garnet, anisotropy temp. dependence, 4.2-20.4 °K 8=36185
  - Er, orthoferrites, microwave mag. loss meas. near spin-reorientation temps. 8=36224

Magnetic properties of substances—contd
  ferrimagnetic—contd
    EuFe garnet, sublattice magnetization 8=40839
    $FeCr_2O_4$, and electronic props. of Fe^{2+} from Mossbauer spectra 8=31726
    Fe-Ni-Co ferrites, induced anisotropy constant angular dependence 8=45039
    Fe_3O_4(magnetite) crystals, remanent and transitory effects if elastic deformation 8=31728
    Fe_7S_8, pyrrhotite, sublattice rotations, mol. field model 8=31725
    FeV_2O_4, and electronic props. of Fe^{2+} from Mossbauer spectra 8=31726
    $Ga_{2-x}Fe_xO_3$, anisotropy rel. to ferromagnetic resonance, 1.2–360°K 8=27453
    GdFe garnet, sublattice magnetization 8=40840
    $GdFe_2$, induced fields at Gd nuclei 8=49558
    $GeFe_2O_4$, and electronic props. of Fe^{2+} from Mossbauer spectra 8=31726
    Ho, orthoferrites, microwave mag. loss meas. near spin-reorientation temps. 8=36224
    $Li_{0.5}Fe_{2.5}O_4$, n scatt. by spin-waves, polarization effects, obs. 8=36187
    Li-Zn ferrites, hot-pressed fine-grained, h.f. and microwave props. rel. to microstructure 8=27435
    LuFe garnet, sublattice magnetization 8=40840
    $MgFe_2O_4$ superparamag. precip. in MgO, Mossbauer spectroscopy 8=31729
    Mg–Mn films, FMR, thermal treatment effects 8=31817
    $(Mn, Co)_4C$, structure from polarized n. scattering 8=31732
    $MnCr_2O_4$, ferrimagnetic spiral, n.m.r. of Mn^{55} 8=45130
    $MnCr_2O_4$ spiral, far i.r. absorption 8=45204
    $MnCr_2O_4$, structure from n. -diffr. 8=31721
    $Mn_{2-x}Cr_x$ Sb (x=o, 0.03), spin-reorientation rel. to phase transform, 180-280°K 8=36189
    $MnFe_2O_4$ films, single-cryst., pulse switching and static characts., obs. 8=31730
    $Mn_{1+x}Fe_{2-x}O_4$, induced anisotropy at low temps. 8=36188
    $MnIn_xCr_{2-x}S_4$, $(0 \leqslant x < 0.4)$, and crystallographic props. 8=36190
    $Mn_2Sb_{1-y}As_y$, four different ordered states from X-ray diffr. and magnetization meas. 8=27433
    Mn_2Sn 8=36214
    $Mn(TiMn)O_4$, structure, ordering 8=40872
    Mn–Zn ferrite, effect of sintering conditions 8=49561
    Mn-Zn ferrite, sintering conditions effect 8=27432
    Mn–Zn ferrites with high-permeabilities 8=49560
    Mn–Zn ferrites, permeabilities rel. to micro- and chemical structures 8=27431
    $Mn_{0.825}$-ZnY ferrites, from Mossbauer spectroscopy 8=36198
    $NdFeO_3$, mag. anisotropy 8=31733
    Ni films, structural properties and ferromag. resonance 8=36192
    $Ni_{1+x}Ge_xFe_{2-2x}O_4$, anisotropy rel. to resonance props, 4.2-393°K 8=36227
    $Ni_{1+x}Ge_xFe_{2-2x}O_4$, internal fields at two sites, Mossbauer determ. 8=36193
    Ni–Zn ferrite, hot-pressed, fine-grained, hf and micro-wave props. 8=49562
    NiFe ferrite, magnetization by Barkhausen jumps, hysteresis freq. depend., obs. 8=40789
    Ni-Fe ferrites with small additions of Co, diffusion after-effect 8=36191
    Ni-Zn ferrites, hot-pressed fine-grained, h.f. and microwave props. rel. to microstructure 8=27435
    $Ni_{1-x}Zn_xFe_2O_4$, effective anisotropy, contributing factors 8=31735
    Pb ferrites with oxide additives, residual induction and energy product 8=40842
    $RbNi_{1-x}Co_x$ F3, magnetization axis rot. at 77°K 8=49555
    $RbNiF_3$, meas. in strong pulsed fields at 4.2 and 77°K 8=40844
    $RbNiF_3$, spin-ordering on Ni ion substitution 8=31738
    $RbNiF_3$, structure 8=31737
    SmFe garnet, Sn^{3+} mag. moment and hyperfine field temp. dependence from Mossbauer effect 8=31740
    SmFe garnets, from Mossbauer effect, 85-600°K 8=36196
    Sr, processes of magnetic reversal 8=31739
    $SrFe_{12-x}Ga_xO_{19}$, hyperfine field at Fe^{57} nuclei 8=30624
    $Sr_2(FeMo)O_6$, ordering from n-diffr. studies 8=27436
    $Sr_2(FeMo)O_6$, ordered perovskite, and elec. props. 8=36195
    $SrO.4Fe_2O_3.2Al_2O_3$ single crystal, magnetization process and reversal 8=31741
    Tm, orthoferrites, microwave mag. loss meas. near spin-reorientation temps. 8=36224
    TmGa garnet, susceptibility rel. to low-lying energy levels 8=31742
    Y garnets, Si-substituted, permeability and coercive force, spectral dependance 8=40845
    YFe garnet, delay of microwave signals 8=49564
    Y-Fe garnet, magnetoelastic waves, 1.1 GHz, props. from light diffraction obs. 8=40101
    YFe garnet, para process in h.f. mag. field near Curie point 8=49566
    YFe garnet rods, axially magnetized, containing turning pt., magnetostatic mode propagation 8=40846
    Y Fe garnet, spin wave excitation time in first- and second-order nonlinear processes 8=45041

EuSe, magnetically ordered, Eu^{115} n.m.r. 8=49641

Magnetic properties of substances—contd
ferromagnetic—contd
EuSe, magnetocrystalline anisotropy from ferromag. resonance at 1.3°K 8=45012
Fe, anisotropy constant, first-order, pressure dependence 8=27407
Fe, deduced from tight-binding calcs. 8=36145
Fe, deviations from Bloch law, temp. depend. 8=27411
Fe, dispersion-strengthened, rel. to dispersoid effect 8=31620
Fe, elastic limit determ. by Barkhausen effect 8=26838
Fe film, planar Hall effect, thickness (100-1500Å) and temp. (77-293°K) dependence 8=31687
Fe films, anisotropy from Mossbauer meas. 8=31641
Fe films, epitixial, anisotropy constant 8=31631
Fe films, Richter-type aftereffect 8=31633
Fe filoform microcrystals, effect of dislocations on magnetization process 8=26677
Fe, Fisher's spin pair correlation function, evidence from critical neutron scattering 8=27412
Fe, high field susceptibility 8=45013
Fe in Cu, spin compensated state rel. to Mòssbauer effect 8=35036
Fe in ϵ Cu-Zn, local moment formation from susceptibility meas. 8=31617
Fe, interaction energy with the magnetization of interstitial atoms and solute atom pairs 8=31614
Fe, isomer shift temp. dependence and hyperfine field near Curie point 8=31636
Fe, magnetization field near frontal plane rel. to domain formation 8=31554
Fe, mag. moment disturbance distrib. from dissolved impurity atom, n. scattering obs. 8=31637
Fe(II) octahdral complexes 8=35038
Fe. permeability changes on rotation in continuous mag. field 8=40811
Fe polycrystals, after effect rel. to plastic deform. 8=36143
Fe, rel. to band structure 8=31632
Fe, saturation magnetization determs. 8=31618
Fe, spin-wave renormalization effects, obs. 8=49520
Fe, susceptibility above Curie temp., depend. 8=40812
Fe-Al alloy, interaction energy with the magnetization of Al solute pairs 8=31614
Fe-Al alloys, below 40°K, and superparamagnetic behaviour, > 40°4 8=31615
Fe-Al alloys, K-state effects 8=49525
Fe-Al alloys, magnetization and spin-wave stiffness in Heisenberg model 8=31645
Fe_3Al, internal-field temp. dependence for two sublattices 8=27410
Fe-Co alloy, high field susceptibility 8=45013
Fe-Co alloy powders, permeability meas. at 400-40 000 Mc 8=40810
Fe-Co alloys, deviations from Bloch law, temp. depend. 8=27411
Fe-Co-Ni-Al-Cu system alloys with added Nb and Ti, high-coercive phases rel. to anisotropy 8=27415
Fe-Cr alloy, high field susceptibility 8=45013
Fe-Cr films, exchange constants from spin-wave resonance spectra 8=36147
FeF_3, sublattice magnetization near critical point 8=27416
$Fe_xGa_{2-x}O_3$, from polarized n.-scattering 8=31727
$Fe_xGa_{2-x}O_3$, structure 8=36139
Fe:Mn, hyperfine field at Mn, temp. dependence 8=40814
FeNi electrodeposited films, switching behaviour 8=27419
Fe-Ni alloy, high field susceptibility 8=45013
Fe-Ni alloys, f.c.c., Curie temp. and C effect 8=31646
Fe-50Ni, alloys, fibre-reinforced, rel. to mech. strength 8=31209
Fe-Ni alloys, Mössbauer effect and exchange anisotropy 8=48328
Fe-Ni(50-50) crystals, n-irradiated in mag. fields, magnetization curves 8=36144
Fe-Ni films, exchange stiffness const. 8=49522
Fe-Ni films, switching along easy axis above nonuniform rot. threshold field 8=31630
Fe-Ni-Co films, anisotropy. coercive force and s,h. f. reson. absorpt. obs. 8=31629
Fe-Ni-Co films, anisotropy, domains and saturation magnetization, obs. 8=40809
Fe-Ni-Co films, anisotropy, review 8=36148
Fe-Ni-Ti alloys, absence of changes on hardening by ageing with plastic deform. at 600°C 8=35699
α-Fe_2O_3, domain struct. close to low temp. transition 8=31648
α-Fe_2O_3 fine particles, spin flip temp. shift particle size dependence rel. to lattice dilation 8=27414
α-Fe_2O_3, memory effect rel. to neg. pressure effects on Morin transition pt. 8=31616
γ-Fe_2O_3 particles, acicular, crystallite size dependence 8=31635
Fe_2O_3, spin-wave excitation-energy changes from n. scattering meas. 8=31638
α-Fe_2O_3, superparamagnetism obs. by Mössbauer effect 8=49521
Fe_2O_3: Co, induced anisotropy, dependence on annealing temp. 8=36186

Magnetic properties of substances—contd
ferromagnetic—contd
$Fe_{90}P_{12.5}C_{7.5}$, amorphous, magnetization and hyperfine field temp. dependence 8=40813
Fe-Pd alloys, changes on annealing and plastic deformation rel. to structural transforms 8=35102
Fe-Pd alloys, dil., hyperfine field at Fe, mag. field dependence at 1.2°K (T_c ≈ 5°K) 8=36081
Fe : Pd, hyperfine field, temp. depend. 8=45016
$FePd_x$, (x = 3.1), Fe^{57} hfs temp. dependence near Curie temp. 8=45015
$Fe_3(PO_4)_2.4H_2O$, ludlamite, static magnetization obs. below 15.3°K 8=27413
FeS, structure 8=36139
Fe_3S_4, synthesis 8=41248
Fe_7S_8, anisotropy energy origin 8=31634
Fe_7Se_8, anisotropy energy origin 8=31634
Fe-1.35Si alloys, fibre-reinforced, rel. to mech. strength 8=31209
Fe-Si crystals, X-ray diffr. contrast at domain wall 8=27409
Fe-3% Si, cube textured rel. to Goss oriented, obs. 8=26265
Fe-3% Si, hysteresis loss and magnetostriction hysteresis in rotating fields up to 2000 Oe 8=31680
Fe-3% Si, magnetization by Barkhausen jumps, hysteresis freq. depend., obs. 8 =40789
Fe-Si, magnetization curve and energy losses in alt. mag. fields, effect of dislocations 8 =36142
Fe_3Si, internal-field temp. dependence for two sublattices 8=27410
Fe_5Si_3, C-stabilized, mag. moments and hyperfine interactions 8=31623
Fe_2TeO_6, structure, transition temp. by Mössbauer effect 8=49457
Fe-V alloy, high field susceptibility 8=45013
Gd, anisotropic high field props. from mag. moment meas. at 4.2°K 8=31705
Gd, Curie temp. variation with hydrostatic press. and anomalous compressibility 8=36149
Gd, induced fields at nuclei 8=49558
Gd, mag.-ordering temp., pressure dependence 8=31652
Gd-Permalloy films, antiparallel exchange coupling 8=40816
Gd, susceptibility ferromag. impurity dependence near Curie temp. 8=40751
Gd^{3+} pair-interaction constants in $LaCl_3$ from e.p.r. determ. 8=31775
$GdCl_3$, specific heat, exchange consts., high freq. meas. 8=40817
GdPd, and structure 8=44216
$HgCr_2S_4$, structure and metamagnetism 8=31653
Ho, anisotropic high field props. from mag. moment meas. at 4.2°K 8=31705
HoAl, and structure 8=31650
Ho_xEr_y, alloys with 4f e conc = 10, 11; magnetization 8=31654
$HoFeO_3$, rel. to absorpt. spectra 8=36356
$LaFeO_3$, e.p.r. study 8=27488
$(La, Gd)_2CoMnO_6$ system, exchange interactions rel. to ordering 8=49527
$La_{2-x}Gd_xCoMnO_6$, exchange interactions and structure 8=27417
$(La, Sr)CoO_3$, rel. to localized- to collective-electron transition 8=35773
Mn, localized moments and Pauling valence 8=49528
Mn_3B_4, Mo- or W- substituted 8=27418
$MnCO_3$, magnon sidebands in absorpt. spectra at 4.2°K 8=32010
$MnCr_2O_4$, spin-structure determ. from magnetization and resonance 8=31731
Mn_5Ge_3, uniaxial anisotropy consts., temp. depend. of energy 8=36150
MnO. OH, structure 8=49533
MnP. by torque meas. 8=49529
MnP, helical spin structure, stability 8=36151
MnP, hydrostatic pressure rel. to props. 8=31657
MnP, metamagnetic interactions pressure dependence 8=31656
MnP-MnAs solid solutions, domains 8=48388
Mn-Pt system, structures and transforms. rel. to exchange interactions 8=45017
MnSb, spin relaxation of Fe^{57} below Curie point 8=49532
MnSb-Sb aligned eutectic, anisotropy 8=49535
MnSi, mag. moment spacial distrib. from n. scattering 8=31655
Mn-Zn alloys with CsCl-type structure, magnetization and structure 8=40819
Mn-Zn-Ga alloys with CsCl-type structure, magnetization and structure 8=40819
Mo permalloy tapes, rolled 4-79, magnetostriction and coercivity, process variables dependence 8=31658
$NaNiF_3$, orthorhombic, canting from AFMR 8=31839
Ni alloys, saturation magnetization rel. to conc. fluctuation 8=49537
Ni, anisotropy constant, first-order, pressure dependence 8=27407
Ni, anisotropy of energy and magnetization, torque meas. 8=31667

Magnetic properties of substances—contd
ferromagnetic—contd
Ni, anisotropy temp. dependence from magnetostriction and elastic constants 8=31561
Ni crystals, coercivity rel. to dislocation distrib. effects 8=31699
Ni, dispersion-strengthened, rel. to dispersoid effect 8=31620
Ni, elastic limit determ. by Barkhausen effect 8=26838
Ni, electroplated, anisotropy rel to vacancies and interstitials formed on H charging 8=49538
Ni, exchange and spin-orbit interactions rel. to mag. breakdown and de Haas-van Alphen effect 8=44649
Ni film, planar Hall effect, thickness (100-1500Å) and temp. (77-293°K) dependence 8=31687
Ni films, epitaxial, anisotropy constant 8=31631
Ni films, p-bombardment effects at 850 keV 8=36168
Ni films, u. v. reflection, near Curie point 8=36399
Ni, form factor anisotropy rel. to band structure 8=31600
Ni, hysteresis loss and magnetostriction hysteresis in rotating fields up to 2000 Oe 8=31680
Ni, lattice dynamics 8=35391
Ni, mag. moment disturbance distrib. from dissolved impurity atom, n. scattering obs. 8=31637
Ni, magnetization near Curie pt. 8=31697
Ni, magneto elastic resonance props. 8=36164
Ni, magnetostrictive crystalline energy of dislocations from anisotropy of approach to saturation 8=35571
Ni, n-bombardment effects 8=36169
Ni, rel. to band structure 8=31632
Ni, saturation curve anisotropy, edge-dislocation contribution 8=49536
Ni, saturation magnetization determs. 8=31618
Ni, spin-wave renormalization effects, obs. 8=49520
Ni, strongly deformed, onset of uniaxial anisotropy after mag. annealing 8=36216
Ni superparamag. particles, Mossbauer spectra of Fe^{57}, temp and mag. field effects 8=36161
Ni, susceptibility, generalized, temp. depend. 8=31665
Ni, 3d-band, density of states curve 8=40246
Ni, transition temp. pressure-dependence, itinerant-electron theory 8=27424
Ni$_3$B$_7$O$_{13}$I 8=49539
Ni$_3$B$_7$O$_{13}$I, ferromagnetoelectric, props. 8=31670
Ni: Cd^{111}; (Ru^{99}), hyperfine fields at solutes from perturbed-angular-correlation exam. above and below T_c 8=40992
NiCo-C alloys, C anisotropy 8=49526
NiCoP films, chem. deposited, stability, up to 100°C and 1600 hr 8=45023
NiCr$_2$O$_4$, spin-structure determ. from magnetization and resonance 8=31731
Ni-Cu alloys, transition temp. pressure-dependence, itinerant-electron theory 8=27424
Ni-Cu and Ni, var. of thermal cond. in mag. field 8=45022
Ni-Fe alloy, e-irradiated, remanence growth during low temp. mag. anneal. 8=36156
Ni-Fe alloys, high-permeability, classification by props. 8=31662
Ni-Fe film, magnon-phonon coupling 8=27421
Ni-Fe film, planar Hall effect, thickness (100-1500Å) and temp. (77-293°K) dependence 8=31687
Ni-Fe films, electrochem. deposited, coercive force, obs. 8=31672
Ni-Fe films, polycrystalline, susceptibility strain-dependence 8=40824
NiFe films, rel. to neg. bias appl. during sputtering deposition 8=31679
Ni-Fe films, ripple, comp.- meas. temp.- and substrate tem.-dependence 8=36159
Ni-Fe films, s. h. f. susceptibility, < 30 Oe 8=31689
NiFe films, 2-200Å, magnetization anomalies rel. to surface anisotropy 8=36158
Ni-Fe thick films, domain-wall width determ. by Lorentz microscopy 8=8=27422
NiFe-C alloys, C anisotropy 8=49526
NiFeCo film, effect of Cu layer 8=40822
Ni-Fe-Co, films, s. h. f. susceptibility, < 30 Oe 8=31689
NiFe$_2$O$_4$, effect of tetrahedral site Ni^{2+} ions 8=27455
NiFe$_2$O$_4$ superparamag. particles, hyperfine splitting in mag. field from Mössbauer spectra of Fe^{57} 8=36160
Ni$_3$Ga with dissolved Fe, giant moments induced by Fe 8=27423
Ni-18 at. % Mn-8 at. % Fe alloy, longit. galvanomagnetic effect magnetization dependence rel. to anisotropy 8=40827
Ni-NiO films, ferro-antiferromagnetic coupling and after effect 8=49517
Ni-Rh alloy, nearly ferromag., susceptibility and sp. ht. 8=31660
Ni-SOCo alloy, induced anisotropy on cold-rolling 8=31661
Ni-Sn, alloys, Hall effect 8=27425
Ni-V, (Rh), (Pt), and paramag. props., 14-1000°K 8=31683
Pd, exchange interactions, strain depend. 8=45025
PdFe alloys, dilute, exchange interactions, strain depend. 8=45025
Pd-Fe alloys, dil, Fe hyperfine fields, 1.3-4.2°K 8=31701
Pd-Fe alloys, high-field susceptibility conc. dependence 8=36080
Pd-Fe alloys, very dil., low temp. magnetization 8=36079

Magnetic properties of substances—contd
ferromagnetic—contd
PdFe, polarization, distrib. 8=36099
PdFe, spontaneous magnetization 8=36172
Pd$_2$MnSn and Pd$_2$MnSb(Heusler alloys), rel. to mag. and chem. order in Pd$_2$MnAl 8=31700
Pt-50% Co alloy, uniaxial anisotropy induced by tempering under stress 8=31702
Pt-Co ordered crystals, rel. to crystallite distrib. (texture) 8=36175
RbNiF$_3$, susceptibility and press. depend. of Curie temp. 8=48661
Rh-Fe, magnetic impurity, ordinary scattering rel. to exchange scattering 8=26863
Si steel, coercive forces temp. dependence in deformed crystals 8=36174
Si-Fe crystals, coercivity rel. to domain structure 8=31704
Si -Fe single crystals, effect of dislocations on magnetization process 8=26677
Sn-Co, in liquid state, and elec. resist. 8=43871
Sn-Ni, in liquid state, and elec. resist. 8=43871
SrRuO$_3$, rel. to band structure 8=36177
Tb, anisotropic high field props. from mag. moment meas. at 4.2°K 8=31705
Tb, exchange interactions, from inelastic n. -scattering 8=31709
Tb, magnon energies and exchange interactions 8=45030
Tb, spin-wave spectrum and exchange interactions 8=31707
Tb-10% Ho, exchange interactions, from inelastic n. -scattering 8=31709
Tb$_3$Al$_2$, metamagnetic 8=49544
TbAu$_2$, mag. structs. 8=27426
Tb-Y alloy, mol. field soln. 8=31708
Te^{125} hyperfine struture in Fe-rich (ferromag.) mats. from Mossbauer spectra 8=26027
TiCo alloys, susceptibility comp. dependence at 295°K and 77°K 8=31920
TiFe$_x$Co$_{1-x}$ alloys, localized magnetization from n-scattering 8=30912
Tm, from mag. moment meas. at 4.2°K 8=31706
U$_6$M, (M=Mn, Fe, Co, Ni) and alloys, rel. to superconductivity 8=27036
UO$_2$, antiferromag., weak ferromagnetism rel. to canted structure and domains 8=49574
US-ThS system 8=49545
UX, (X=S, Se, Te), explanatory model 8=36179
Y$_{2.1}$Ca$_{0.9}$Fe$_{4.1}$Sn$_{0.9}$O$_{12}$, effective mag. fields at Fe^{57} and Sn^{119} nuclei, rel. to non mag. Sn^{4+} conc. 8=36197
Y$_y$(Mn$_x$Fe$_{1-x}$)$_z$, ($y = 1, 6$; $z = 2, 23$) magnetisation and susceptibility, 80-1500°K 8=31710
YFe garnets, from Mossbauer effect, 85-600°K 8=36196
YFe garnet, magnetoelastic instability in uniform precession 8=36221
YFe garnet: Yb, ion-ion interaction via magnon field 8=40830
ZnCr$_2$O$_4$, spin-structure determ. from magnetization and resonance 8=31731
ZnCr$_2$Se$_4$, spin magnetism 8=36136
(ZrCo$_2$)$_x$(ZrFe$_2$)$_{1-x}$ alloys, hyperfine field distribs. from Mossbauer spectra 8=31712
Zr$_{1-x}$Gd$_x$Zn$_2$, and NMR rel. to localized mag. moments effect in ZrZn$_2$ 8=36180
in (Zr$_{1-x}$Hf$_x$)Zn$_2$ system 8=40831
Zr$_{1-x}$M$_x$Zn$_2$ where M = Ti, Y, Nb or Hf, magnetization, Curie temp 8=49546
ZrZn$_2$, rel. to itinerant electron model 8=31547
paramagnetic
See also Paramagnetic resonance and relaxation; Paramagnetism.
alloy, dil., ground state analysis 8=40200
alloys, dilute, enhanced effective exchange interaction due to localized spins 8=31594
alloys, dilute, superconducting, order parameter spacial variations 8=31332
alloys, dil., with spin-½ impurities, s-d scatt. theory 8=44980
alloys, susceptibility of quasi-bound state 8=44979
dilute, Curie temp. variation rel. to ion conc. 8=36076
di(tetramethylammonium)bis(maleonitriledithialato)CuII, X-ray and e.s.r. studies 8=35364
exchange enhanced Curie Weiss θ's, effect of spin-flip scattering 8=40747
impurities, electron scattering, analytic structure solution 8=40748
impurities in oxide layer of tunnel diode anomalous tunneling theory 8=31410
ketene molecule 8=25589
magnesioferrite, superparamagnetism rel. to precipl. and coarsening in MgO-Fe solid solns. 8=44007
magnetic cooling, thermodynamic and statistical aspects 8=31518
metals, rel. to virtual spin-wave effects 8=31517
methylene fluoride, molec. susceptibility 8=34339
moment fluctuations, temporal, by neutron diffraction 8=31516
p-phynylenediamine-chloranil charge-transfer complex, mag. excitations 8=31880

Magnetic properties of substances—contd
paramagnetic—contd
pyrocarbons, B-doped, susceptibility at room temp. 8=27084
rare earth h.c.p. crystals, field effects on inelastic n scatt. 8=40749
rare-earth sodium molybdates, axial anisotropy from susceptibility meas., 2-300°K 8=31528
salt soln., mag. resonance in eddy solenoidal field 8=34905
spin lattice vibrations 8=36075
spin relaxation, anomalous, near mag. transition 8=49582
superconductors with impurities, conc. non-uniformity, effect on props. 8=44705
TEMPAD biradical, susceptibility, anomalous behaviour 8=40756
transition metal alloys, dilute, moments 8=45031
transition metal alloys, spin susceptibility, exchange enhancement rel. to. rigid-band model breakdown 8=31532
transition metals, orbital susceptibility calc. from band structure 8=31529
transition metals, 3d, stability of non-magnetic state 8=40746
vinylidene fluoride, MO theory 8=29803
B-C cpds, paramag. centre comp. dependence 8=45077
B.C. cpds, susceptibility conc. dependence 8=31520
$CaF_2:Eu^{2+}$ relaxation time meas. using optical Faraday rotation technique 8=49479
CaS : Zr phosphors, susceptibility obs. 8=44967
CoO, rel. to anomalous elastic props. and internal friction from u.s. meas. 8=44560
Cr-Cs alum, susceptibility rel. to cross relax 8=27486
CrH_x, (x < 1), anomalous behaviour rel. to H-orbital expansion effect on d-electron exchange 8=49480
Cr_2O_3 powder, Néel temp. depend. on particle size 8=40861
CrX_3 (X=Br, F), n. scattering energy distrib. 8=31521
Cu diethyldithiocarbamate 8=49485
Dy, effect of hydrostatic pressure 8=36082
Er, neutron scattering, rel. to interactions 8=31523
Eu^{3+} ion, magnetic case history 8=31522
Eu_3O_4, Curie temp., from inverse susceptibility 8=40734
EuO_2S, and structures from n. diffr. meas. 8=40869
EuP, Eu^{3+} spin $\langle S(T)\rangle$ temp. dependence from P^{31} n.m.r. obs. 8=31904
$Fe(OH)_2$, hyperfine fields from Fe^{57} Mossbauer meas. 8=39517
Fe-Pd alloys, dil., hyperfine field at Fe, mag. field dependence at 1.2°K (T_c < 1.2°K) 8=36081
$Fe_3(PO_4)_2 \cdot 4H_2O$, ludlamite, single crystal susceptibility obs. 8=27379
Fe–Ru alloys, susceptibility, Mössbauer eff. 8=49481
FeS_2 pyrites, rel. to valence and spin states 8=36078
Gd, susceptibility forromag. impurity dependence near Curie temp. 8=40751
n-Hg Te, susceptibility singularity 8=44981
Ho, neutron scattering, rel. to interactions 8=31523
K-chloranil, susceptibility transition in 210-260°K region 8=31535
$KMnF_3$, susceptibility, semi-empirical expression by Padé approximant 8=27386
$LuFeO_3$, susceptibility, semi-empirical expression by Padé approximant 8=27386
$MnAs_x\ Sb_{1-x}$ solid solns, susceptibility and structure 8=49482
Ni films, u.v. reflection, near Curie point 8=36399
Ni, lattice dynamics 8=35391
Ni, Stoner modes, spin waves and crtical fluctuations 8=36215
Ni, susceptibility calc. 8=49483
Ni, susceptibility calc. contrib. of intra-atomic exchange enhancement 8=31524
Ni: Cd^{111}, (Ru^{99}), hyperfine fields at solutes from perturbed-angular-correlation exam. above and below T_c 8=40992
Ni-I boracite, susceptibility temp. dependence 8=31525
$NiSe_2$ pyrite 8=31493
$NiSiF_6$, susceptibility rel. to cross relax 8=27486
Ni-V, (Rh), (Pt), and ferro-props., 14-1000°K 8=31683
Pd alloys, susceptibility rel. to band structure and exchange-enhancement effects 8=31294
Pd, susceptibility calc. 8=49483
Pd, susceptibility meas. vs field and temp., rel. to exchange enhancement 8=31526
Pd–Fe alloys, high-field susceptibility 8=40752
Pd-Fe alloys, high-field susceptibility conc. dependence 8=36080
Pd-Fe alloys, very dil., low temp, magnetization 8=36079
Pd-x at. % Ni alloys (x ⩾ O), s-electron-paramagnon scattering rel. to low temp. elec. resistivity 8=31323-4
Pt alloys, susceptibility rel. to band structure and exchange-enhancement effects 8=31294
Pt, susceptibility calc. 8=49483
Pt, susceptibility meas. vs field and temp., rel. . to exchange enhancement 8=31526
Pt-1 at % Co(Fe) alloys, and elec. props., plastic deformation effects 8=31327
Pt-Co(Fe) alloys, local-moment saturation from NMR obs. 8=31527
PuO_2, susceptibility, Van Vleck paramagnetism 8=40753
$RbMnF_3$, spin correlations in paramag. state 8=49484

Magnetic properties of substances—contd
paramagnetic—contd
Tb, critical n.-scattering inelasticity above Néel temp. 8=31530
Tb, effect of hydrostatic pressure 8=36082
Th carbides, carbonitrides and nitrides 8=31531
TiH_x, ($x < _2$), anomalous behaviour rel. to H-orbital expansion effect on d-electron exchange 8=49480
UO_2, rel. to u.s. attenuation and elastic constants 8=39898
US–ThS system 8=49545
V_2O_3, susceptibility, 300°-700°K 8=31534
V_2O_5, susceptibility meas. and calcs. 8=36083
V_3Si, absence of neutron scattering rel. to d electrons in conduction band 8=40754
$Y_3Al_5O_{12}$ system, wavelength dependence of Faraday rotation 8=44982
Yb, susceptibility from mag. moment meas. at 4.2 ~300°K 8=31706
Zr, susceptibility anisotropy temp. dependence 8=40755
transitions
antiferromagnets, orbital, in two-magnon scattering of neutrons 8=45047
binary alloys, effect on vapour pressure temp. dependence 8=35014
crystals with domain structures, local temps. 8=40781
Heisenberg systems, two-dimensional, expt. verification of spin-wave predictions 8=36088
magnetic system distortion 8=36064
neutron diffraction investigation 8=36136
paramagnet, diluted by diamag. ions, Curie temp. variation rel. to mag. ion conc. 8=36076
rare earth crystals, mag.-ordering temp., pressure dependence 8=31652
rare earth ferrite garnets, para-process near Curie temp. 8=45040
rare earths, h.c.p., associated entropy 8=49453
seignettomagnetics, from Mossbauer studies 8=27442
spin relaxation, anomalous, near mag. transition 8=49582
transition metals and alloys, electronic sp. ht. enhancement near paramag. to antiferromag. instability 8=31922
$BaTiO_3$–$BiFeO_3$ solid solns., e.p.r. study 8=27488
$Bi_{1-x}Ca_xMnO_3$, solid solns., temp.-comp. dependence rel. to structural transitions 8=27377
$BiFeO_3$ solid solns. 8=27285
$BiFeO_3$-$Pb(Fe_{0.5}Nb_{0.5})O_3$ solid soln. system 8=39543
$(1-x)BiFeO_3$–$xSr(Sn_{1/2}Mn_{2/3})O_3$, solid solns., from Mossbauer studies 8=27442
$Co_2BaFe_{16-x}In_xO_{27}$, Curie pt. comp. dependence 8=45038
CoO, rel. to anomalous elastic props. and internal friction from u.s. meas. 8=44560
Cr films, antiferro-paramag., rel. to resistivity anomaly 8=39590
Cr, Neel pt. and spin-slip, pressure and temp. dependence 8=31766
Cr_2O_3 powder, Neel temp. depend. on particle size 8=40861
Dy, effect of hydrostatic pressure 8=36082
Dy, effect on thermal conductivity anisotropy, 5-300°K 8=35458
Dy, mag.-ordering temp., pressure dependence 8=31652
Dy, ordering temps. at high pressures 8=40730
Dy_3Al_2, metamagnetic 8=49544
$DyFeO_3$, rel. to sp. ht. meas., 1.2–80°K 8=35429
$Dy_xY_{1-x}Fe_2$, Curier temp. and coercivity comp. dependence 8=31610
Er, effect on thermal conductivity anisotropy, 5-300°K 8=35458
ErGa garnet, metamag. transition and antiferromag. struct., 0.31 and 4.2°K 8=40867
EuO, Curie-point increases by selective damping 8=31612
EuO, λ anomaly and magnetoelastic interactions from magnetostriction meas. 8=45011
Eu_3O_4, antiferromagnetic temp., rel. to susceptibility peak 8=40734
EuS, ferromag.-paramag., critical line existence 8=36137
Fe:Mn, transition impurities, hyperfine field at Mn 8=40814
Fe-Ni alloys, f.c.c., Curie temp. and C effect 8=31646
Fe_2O_3, antiferro- to weak ferromag. from magnetostriction study 8=40868
$Fe(Pd_xPt_{1-x})_3$, antiferro-ferromag., mechanism, obs. 8=40808
Fe-Rh alloys, pressure dependence 8=40735
Fe_2TeO_6, temp. determ. by Mössbauer effect 8=49457
Gd, mag.-ordering temp., pressure dependence 8=31652
Gd, ordering temps. at high pressures 8=40730
Gd, u.s. attenuation at Curie pt. 8=35416
K-chloranil, in paramag-susceptibility in 210-260°K region 8=31535
KD_2PO_4, Curie temp. shift on hydrostatic pressure, theoretical explanation 8=40818
KH_2PO_4, Curie temp. shift on hydrostatic pressure, theoretical explanation 8=40818
Mn, lattice params. and thermal expansion rel. to para-antiferromag. transition, –180-1500°C 8=44253
Mn, paramag. to ferromag., rel. to cryst. structure 8=48663
MnF_2, u.s. attenuation meas. near Néel point 8=48720
MnP, Curie screw-ferromag. pts, pressure dependence 8=31656

- Fe-Ni-Co films, anisotropy, obs. 8=31629
- α-Fe$_2$O$_3$, remanent magnetization, variation with temp. of natural and synethic crysts. 8=31647
- Fe(Pd$_x$Pt$_{1-x}$)$_3$ rel. to antiferro-ferromag. transition, obs. 8=40808
- Gd, anisotropy meas. in pulsed fields up to 150kOe 8=40743
- GdFe garnet, of sublattices 8=40840
- He^3, solid, nuclear spin interaction rel. to thermodynamic props. 8=41905
- LuFe garnet, of sublattices 8=40840
- Mn$_{1+x}$Fe$_{2-x}$O$_4$, induced anisotropy at low temps. 8=36188
- Mn-Zn alloys of CsCl type structure, and mag. structure 8=40819
- Mn-Zn-Ga alloys of CsCl type structure, and mag. structure 8=40819
- Ni alloys, effect of plastic deform. 8=40823
- Ni, anisotropy due to screw dislocations, calc. 8=40790
- Ni, disturbances rel. to substitutional impurities 8=36153
- Ni film, ferromag. reson. rel. to inhomogeneity, obs. 8=31821
- Ni, films electrodeposited and charged with H, effect of H on magnetization inversion 8=36170
- Ni-Fe films, single and double, reversible rotation regions, obs. 8=31690
- Ni-Fe-Al films, single and double, reversible rotation regions, obs. 8=31690
- Ni-Fe-Co films, single and double, reversible rotation regions, obs. 8=31690
- Ni$_3$Fe, anisotropy due to screw dislocations, calc. 8=40790
- Ni-Pd alloy, saturation, and g factor meas. 8=31666
- Tb, anisotropy meas. in pulsed fields up to 150 kOe 8=40743
- TmFe garnet, of sublattices 8=40840
- YFe garnet, demagnetization, shock-induced 8=31744
- Y$_6$Mn$_{23}$, ferrimag. coupling, polarized n obs. 8=40849

domains
- alnico, high-coercivity, powder pattern exam. 8=35346
- alnico, meas. using magneto-optical Kerr effect 8=36165
- basalt, white pattern zones of titanomagnetite grains, obs. 8=48588
- Bloch wall fast irreversible displacements model 8=40782
- Bloch wall friction, possible mechanisms 8=31564
- ferrites, high-uniaxial-anisotropy, domain-wall mobility 8=27428
- ferrites, rel. to initial permeability at microwave and natural gyromagnetic resonance 8=31715
- ferrites, square loop, simulation of wall motion and wall behaviour 8=45036
- ferromagnet, magnetization field near frontal plane rel. to domain formation 8=31554

Magnetization state—contd

domains—contd
- ferromagnet, uniaxial, Bloch wall energies in ext. mag. field perp. to hexagonal axis 8=40783
- ferromagnetic films, individually obs. by e-microscope 8=31586
- ferromagnetic films, teaching demonstration 8=27397
- ferromagnetic films with domain structure, spin waves 8=40798
- ferromagnetics, boundaries, interact. with dislocations 8=40784
- ferromagnetic, from light diffr. 8=45143
- ferromagnetic wall dynamics 8=36100
- ferromagnets and antiferromagnets, local transition temps. 8=40781
- film storage-elements, two-domain state and separating wall rel. to easy-axis distrib. 8=49511
- films electron microscope investigation of domain walls 8=33090
- films, thin, Bloch wall transitions 8=31589
- films, thin, transmission e microscope obs. 8=31590
- films, transition layers between domains 8=31555
- four-axial ferromagnets, (71°/180°) Bloch wall soln 8=49503
- hematite, and evidence for new wall structure 8=27408
- in imperfect crystals 8=35573
- Kittel open structure, modification 8=31557
- in martensite crystals of high-C Cr steel, e-microscope exam. 8=40805
- Néel wall energy in ferromag. films 8=31574
- orthoferrites, props. and device applics. of domains 8=49553
- oscillating walls, direct study 8=44960
- Permalloy films, abnormal Bloch wall motion under hard axis pulse drive 8=31668
- permalloy films, boundary dynamic props. 8=36167
- permalloy films, boundary energy meas. rel. to thickness 8=40826
- permalloy film, 1000Å, Néel wall structure and energy 8=31663
- Permalloy films, rel. to supercritical transition, thickness depend obs. 8=31628
- permalloy films, strong stripe, and 360° walls 8=45024
- permalloy film, wall movement, thermally activated 8=45020
- Permalloy films, walls and mag. fine struct. in switching, stroboscopic transmission e microscope obs. 8=31674
- Permalloy, single-crystal platelets, ferromagnetic 8=31664
- permalloy stripe-films 8=31693
- Permalloy thin film strips, meas. of wall energy 8=27420
- reversible 180° domain wall motion controlled by magnetostatic effects, magnetization curves derivation 8=31565
- vicalloy, in various structural states strained in tension 8=40804
- wall models, 180°, self-consistency meas. 8=31556
- wall streaming and obs. in permalloy films 8=31558
- wall structure in ferromagnet, perturbation theory 8=31559
- Co, crystals, tensile elastic strain effects 8=36173
- Co film, high-coercivity, magneto-optic obs. 8=36134
- Co films, fine structure form., e microscope obs. 8=31640
- Co films, polycryst., in switching, obs. 8=31598
- Co films, rel. to supercritical transition, thickness depend obs. 8=31628
- Co, 20° to 400°C 8=31498
- Co^{57} Mössbauer effect sources, mag., in mechanism of r.f. mag. field destruction of hyperfine Mössbauer spectrum 8=43945
- Co-Ni films, fine structure form., e microscope obs. 8=31640
- Co$_5$(rare-earth) high-coercive force mat., domain-boundary model 8=31500
- Eu chalcogenides, ferro- and antiferromag. 8=31613
- Fe films, fine structure form., e microscope obs. 8=31640
- Fe films, rel. to supercritical transition, thickness depend. obs. 8=31628
- Fe, unmagnetized, scatt. of thermal neutrons at boundaries 8=31642
- Fe, wall dynamics from pulsed n.m.r. expts. 8=31621
- Fe-Ni films, fine structure form., e microscope obs. 8=31640
- Fe-Ni-Co films, single cryst., and anisotropy, obs. 8=40809
- α-Fe$_2$O$_3$, ferromag, struct. close to low temp. transition 8=31648
- Fe-Si crystals, X-ray diffr. contrast at ferromagnetic domain walls 8=27409
- FeSi, ferromag., by magnetization in alternating fields up to 20 kcpsec, stroboscopical obs. 8=49524
- Mn-ferrite, structure from X-ray obs. 8=27434
- Ni films, fine structure form., e microscope obs. 8=31640
- Ni film, ultrasound from stripe domain resonance 8=31682
- Ni-Fe alloy films, -wall motion and ferromagnetic resonance losses 8=31695
- Ni-Fe films, rel. to anisotropy dispersion, temp. depend. 8=40821

Magnetization state—contd
domains—contd
Ni 81%-Fe 19% film, 180° domain wall energy density, rel. to thickness 8=45018
76%Ni-Fe films, type II stripe domains, obs. 8=40825
NiFe, thin coupled films, wall behaviour 8=49541
Pb films, epitaxially grown on PbTe, from Lorentz microscopy 8=36171
Si-Fe crystals, structure rel. to coercivity 8=31704
Si–Fe crystals, temp. dependence up to 650°C 8=40829
Si-Fe crystals, tensile elastic strain effects 8=36173
YFe garnet, -wall propag. vel., effect of Er doping 8=49565
Y Fe garnet, X-ray topographic and optical obs. 8=45044
YFe garnet: Si, wall mobility 8=31746
Magnetoacoustic effects
current loops, levitation 8=28522
echo phenomena in superconductors and normal metals 8=40364
ferrites, resonant elastic oscillation excitation at non-linear ferromag. resonance 8=49064
in ferromagnetics, near resonance, scatt. of l.f. e.m. waves by sound 8=40796
microwave acoustic waves, possibility of generation in ferromag. crystals 8=49508
piezoelectric mats., acoustic wave ineract. with cyclotron and helicon waves 8=27296
Procopiu, in ferromag. sample free at one end 8=45001
streaming in elec. conducting fluid, due to small disturbance waves 8=41845
wave, fast large amplitude, rel. to heating of H plasma 8=47839
Fe^{57} Mössbauer effect sidebands due to r.f. magnetic field 8=30513
Ga, cyclotron resonance, Doppler-shifted 8=48720
He plasma, flowing, waves 8=25738
$LiNbO_3$:Cr^{3+}, acoustic paramag. reson., 4.2°K 8=44318
Ni film, ultrasound from stripe domain resonance 8=31682
Sb, galvanomagnetic effects, 50-300°K rel. to band model 8=40330
Y garnet, resonance in 3-cm wavelength range, obs. using transverse pumping 8=35419
YGd garnet, resonance in 3-cm wavelength range, obs. using transverse pumping 8=35419
Magnetocaloric effects. See Magnetothermal effects.
Magnetocrystalline anisotropy. See Magnetic properties of substances; Magnetization state.
Magnetoelastic effects. See Magnetomechanical effects.
Magnetoelectric effects
See also Hall effect; Magnetoresistance.
eddy currents, plate moving in mag. field 8=33027
excitonic insulator in mag. fields 8=40261
films, negative cond. in transverse mag. field, mechanism 8=40300
galvanomagnetic effects, high-elect.-field, in piezoelectric semiconductors 8=31366
galvanomagnetic effects in strong mag. field, semiclassical transport theory 8=35755
higher-orders in Gibbs function 8=27374
magneto-conductivity in a.c. elec. field, nonlinear Boltzmann eqn. soln. 8=35748
magnetostatic waves at singular turning points, effect of finite linewidth 8=27372
metals, galvanomagnetic studies by heliconlike waves 8=26961
rigid cond. sphere or cylinder, travelling relative to sinusoidal mag. field, electromech. characts of interact 8=24108
saddle point optical transitions under crossed elec. and mag. fields 8=27543
semiconductors, many-valley rel. to dissipative effects disappearance 8=40427
semiconductors, thermogalvanomagnetic phenomena at high mag. fields 8=44751
susceptibility upper bound 8=26941
$AlTbO_3$, magneto-electric effect 8=36217
As, and galvanomagnetic effects and Fermi surface, correlation 8=40232
As, energy bands, galvanomagnetic investigation 8=26902
Bi, charge-carrier density from galvanomag. data at 4.2°K 8=26963
Bi-Sn-Te alloys, magnetothermoelec. and thermoelec. props. 8=35996
Bi–Te, in arbitrary mag. fields 8=31312
Fe, galvanomagnetic coeff. rel. to Fermi-surface determ. 8=31289
$FeTbO_3$ magneto-electric effect 8=36217
Ge, galvanomagnetic recombination effect 8=40461
Ge, galvanomagnetic recombination effect, with unequal Lorentz forces 8=40462
n-Ge with dislocations, magnetocond. and low-field magnetoresist. 8=35890
n-InSb, galvanomag. props. at 77°K 8=27117
in InSb, magnetoconductance of nonequilib. plasmas 8=44667
Ni, galvanomagnetic coeff. rel. to Fermi-surface determ. 8=31289
$Ni_3B_7O_{13}I$, ferromagnetoelectric, props. 8=31670
Ni-18 at.% Mn-8 at.% Fe alloy, longit. galvanomagnetic effect magnetization dependence rel. to anisotropy 8=40827
Magnetoelectric effects—contd
Os, galvanomag. props. and Fermi surface anal. 8=40327
Sb, galvanomag. props. in transverse fields up to 100kOe at 4.2, 20.4 and 77°K 8=49170
SiP_2 and $SiAs_2$, meas. 8=40484
Te, down to 0.05°K 8=35916
Te, galvanomagnetic effects, anisotropy, statistical interpret. 8=31394
Magnetogasdynamics. See Magnetohydrodynamics.
Magnetohydrodynamic generators. See Electricity/direct conversion; Magnetohydrodynamics.
Magnetohydrodynamic waves. See Magnetohydrodynamics; Plasma/magnetohydrodynamics; Plasma/oscillations.
Magnetohydrodynamics
See also Plasma/magnetohydrodynamics.
Alfvèn waves, intrinsic freq. and energy conservation 8=23807
Alfven waves in viscous fluid due to introduction of magnetic dipole 8=24171
aligned flow past flat plate, steady-state heat transfer phenom. 8=28589
axisymmetric rot. in viscous fluid of finite conductivity 8=46451
axi-symm. steady flow, effect of mag. field 8=46452
boundary layer on plane plate in presence of strong longitudinal mag. field 8=33115
boundary stability increase by crossing elect. and mag. fields 8=24196
boundedless at flows 8=46459
boundedness at flows 8=46460
channel flow, book 8=34614
channel flow, incompressible, viscous, steady and laminar 8=37445
conducting fluid flow in longitudinal mag. field, end effect 8=24181
conducting fluid motion due to flow rot. of disc in cylinder subject to axial mag. field 8=24184
conducting liquid boundary layer in uneven mag. field 8=24182
conducting liq. in rectangular ducts situated in transverse mag. field, velocity distribution 8=33114
conducting liquid, rot. under stationary disc in mag. field 8=24188
convective heat transfer during turbulent flow of cond. liq. in channel, alt. mag. field effect 8=41994
core flow in subsonic m.f.d. generator channels 8=41933
Couette, flow, unsteady with suction, similar solns. 8=46457
couple on slowly rotating solid 8=24190
curled flow in plane channel, influence of Hall effect on development 8=24187
current, azimuthal, excited in rot. cond fluid 8=24170
diocotron instability model 8=41950
duct with sectionized electrodes, space effects 8=24201
electrodynamic → MGD wave transformation 8=37441
electrolyte in crossed elect. and mag. fields, transport process simulation 8=41989
e.m. pump based pn pinch effect with constant metal flow 8=24178
energy-transport velocity of induced electromagnetic wave in lossy moving fluids 8=37442
epihydrodynamics, optimization techniques 8=34704
field-aligned flow past plate, porous or sublimable, skin friction, heat and mass transfer 8=33111
finite-magnetic-Reynolds-number effects in flows 8=46444
flow around plane plage 8=41990
flow due to accelerated plate 8=46454
flows, electrically driven, theory 8=24173
flow in infinite cylindrical configurations, boundary conditions and EMF calculations 8=37443
flows in pipes in presence of longitudinal elec. current 8=46447
flow in rectangular channel, charact. of boundary layers and their overlapping 8=46443
flow limited by insulating wall, study 8=46448
flow, non stationary satisfying on circulation property 8=24189
flow past a sphere, pressure distrib. 8=24192
flow past insulator 8=46449
flow-past profiles, relativistic 8=24183
flow, quasi-onedimensional, stability 8=46455
flow stability in infinitely long cylindrical pips, radial magnetic field 8=46456
flow through rectangular duct due to periodic pressure gradient 8=46450
flow, turbulent in channel, velocity profiles 8=46461
flow, unsteady, under influence of const. press. gradient 8=28591
fluid channel flows, couple stress effects 8=28590
fluid layer with finite resistivity, self-gravitational instability 8=43621
fluids, conducting homogeneous with horizontal interface, gravitational instabilities 8=33117
forced oscillatory motion of conducting, viscous liquid 8=33118
gas duct, nonconducting wall boundary layer 8=28593
gas subjected to oblique mag. field, rel. to nonuniform shock wave in gas at. rest 8=39184

Magnetohydrodynamics—contd
  generator channel, operation of cold electrodes 8=28474
  generator channel, potential distribution by equivalent circuit method 8=28472
  generator, electrodynamic effects of non-uniformity of mag. field and fluid parameters 8=28468
  generator, end effects and induced mag. field 8=24198
  generator, homopolar, d.c. pump 8=24199
  generator, open-cycle, applic. of aq. K_2CO_3 for admission of ionizing additive into duct 8=46360
  generator, optimum, with channel of constant cross section 8=46359
  generator, vector analysis 8=28469
  generator with finite electrodes, elect. conductivity effect on flow 8=28471
  generators, finite electrodes, end effects on fluid flow 8=28473
  generators with sectionalized electrodes, volt/ampere characts. 8=28470
  Hartmann boundary layer, stability 8=41988
  heat transfer in channel flow, thermal-entry region props. rel. to axial conduction 8=33110
  heat wave, cylindrical with uniform axial mag. field, obs. 8=28595
  hydromagnetic waves excited by slowly streaming cosmic rays 8=47191
  hydromag. waves propag. under action of Coriolis force 8=28596
  induction generator experiment 8=28467
  inviscid boundary layer problems 8=28586
  ion accel. mechanism, with hydromagnetic waves, in Crab nebula 8=41522
  jets, compressible, two-dimens.; hydromagnetic stability 8=46462
  Joule's dissipation of flow in const. transverse mag. flux 8=33113
  linear solution determination 8=33107
  linearized, flow past semi-infinite flat plate in transverse magnetic field 8=46446
  liquid film down inclined conducting plane, hydromagnetic stability 8=28592
  liquid metal automatic metering device for die casting machine 8=24174
  liquid metal drops falling in viscous dielectric in longit. mag. field 8=30390
  magnetofluid dynamics, pressure distrib. meas. around sphere 8=28588
  magnetoionic wave eqns. in cylindrical geometry 8=37440
  MGD, axisymmetric mixed flow 8=24195
  MGD flow, steady 2 dimensional general 8= 46458
  MGD, non-ideal, discontinuities 8=24175
  MGD shock wave, unsteady, curvature and torsion of mag. lines behind wave 8=46167
  molten metal in d.c. pump duct, static equilibrium 8=24179
  motion of cylinder in viscous elec. cond. medium in mag. field 8=41991
  noble gases in generator, mag. induced ionization 8=37448
  past thin bodies, with inwardly diffusing mag. field, flow modification 8=41995
  phenomena similarity, non-dimensional groups definition 8=24172
  plane flow, laminar mass transfer in oriented mag. field 8=33112
  plane shock wave in gas, fading in transverse mag. field 8=33106
  plane waves, influence of imperfect boundaries 8=23923
  plastic —viscous medium, vel. profile through slot in transverse mag. field 8=37446
  propane-O, K_2CO_3 seeded plasma in duct, pot. distrib. and electrode voltage drop, obs. 8=39084
  pulsed generator with superconducting magnet system 8=37376
  Rayleigh-Taylor instabilities, experiment and theory 8=24197
  rear stagnation point, differential eqn. 8=24191
  relativistic, shock waves and compressibility hypotheses 8=28587
  relativistic, simple waves 8=41987
  relativistic, solution to propagation problem 8=24176
  shock tube generator, unsteady flow 8=28594
  shock wave, magnetogasdynamic, with conductivity jump 8=33119
  shock waves decay 8=33108
  sliding mag. field generation in linear machine with finite dimensions 8=37375
  solar processes, laboratory simulation 8=33109
  stagnation-point flow near front of blunt body, general and accurate anal. 8=43624
  stators, max. pondermotive force at in-phase connection 8=24200
  steady flow past slender bodies, establishment 8=24186
  steady-state flow of conducting fluid at large Hartman numbers 8=41993
  theory applied to plasma 8=39086
  thermal instability of magneto fluid in vertical rectangular channel 8=24185

Magnetohydrodynamics—contd
  three-layered fluid, development of flow in plane tube in presence of transverse mag. field 8=30204
  transients in magneto-ionic media 8=37444
  turbulence damping in pipes by longit and transverse mag. fields 8=24194
  turbulence, numerical expt. with incompressible eqns. 8=33116
  turbulent boundary with longitudinal press. gradient 8=24193
  viscous, incompressible and elect. conducting fluid, confined vortex flows 8=41996
  waves, conducting liquid surrounded by flowing gas 8=48036
  waves in second-order fluids 8=37447
  Ar, ionized, struct. of supersonic stream moving in alt. mag. field by plotting induced e.m.f. 8=41992
  Hg flow caused by travelling mag. field obs. 8=24180
  Hg, transient mag. field induced motion in shallow layer, obs. 8=24177
  Na, liquid, Alfven waves, Faraday rotation 8=46445
Magnetomechanical effects

- Mn^{2+}, diffusion in Ag halides 8=39962
- Mn^{2+} e.p.r. in $Cd_2V_2O_7$ obs. 8=31856
- Mn^{2+} e.p.r. in halide host cpds. 8=36246
- Mn^{2+} in calcite, e.s.r. 8=40932
- Mn^{2+} in CaF_2, hyperfine coupling temp. depend 8=31876
- Mn^{2+} in CaF_2, F^{19} nuclear spin-lattice relaxation 8=49633
- Mn^{2+}in (Ca, Mg, Fe)CO_3, e.s.r. allowed and forbidden transitions 8=40933
- Mn^{2+}, in CaO, uniaxial stress meas. at impurities, strain coeffs. 8=40134
- Mn^{2+} in Cd_xHg_{1-x} Te, e.p.r. 8=40934
- Mn^{2+} in $CdWO_4$, e.p.r. lines splitting by elec. field, 320 kv/cm 8=40929
- Mn^{2+}in $La_2Mg_3(NO_3)_{12}.24H_2O$, e.p.r. 8=40928
- Mn^{2+} in $La_2Mg_3(NO_3)_{12}.24H_2O$, zero-field splitting 8=30627
- Mn^{2+} in MgO, charge transfer at surface, e.s.r. study 8=48422
- Mn^{2+} in MgO, e.s.r. at 1.3 GHz 8=40930
- Mn^{2+} in pyrosilicate and pyrogermanate isomorphs of barvsilite, e.p.r. 8=40931
- Mn^{2+} in spinel, spin temp. equalization between excited and fundamental states 8=45282
- Mn^{2+} nuclei, effective magnetic field, effect of covalency 8=40739
- Mn^{2+} nuclei in glasses, hyperfine splitting rel. to covalency estimate 8=48304
- Mn^{3+} in α-Mn_2O_3-type structures, bonding 8=39501
- Mn^{4+} in α-Al_2O_3, trigonal splittings stress dependence 8=43929
- Mn^{4+} activated oxygenated cpds, excitation spectra 8=41202
- Mn^{4+} in TiO_2, ENDOR 8=41007
- Mn^{55} in $Mn_2(CO)_{10}$, n.m.r. spectrum, quadrupole coupling effects 8=49653

Manganese compounds
- ardennite, crystal structure rel. to Si_3O_{10} group positioning 8=39808
- chlorides, complex, hydrated, NMR and antiferromag. props. 8=36275
- ferrite: Ba, discontinuous growth 8=39677
- ferrite, domain structure from X-ray obs. 8=27434
- ferrites, epitaxial growth on metal oxides, prep. methods 8=35175
- ferrites, Fe-rich, electrical cond. at low temps. 8=49140
- ferrites, Hall effect 8=40841
- ferrites, manganic, crystal growth techniques 8=26257
- Mag–Mn ferrite films, FMR, thermal treatment effects 8=31817
- manganese arsenic borate glass dosimeter 8=44500
- manganic acetylacetonate and related chelates, vinyl polymerization initiation 8=32124
- manganites of perovskite structure, magnetic behaviour rel. to lattice distortions 8=49534
- oxides, thermodynamic props. by e.m.f. meas. 8=48729
- oxides with spinel struct, Kβ-group of X-ray lines 8=31988
- spinel ferrite lattice, cubic, local Jahn-Teller distortions rel. to phase transitions 8=26408
- steels, $\gamma \rightleftharpoons \epsilon^1$ and $\gamma \rightleftharpoons \epsilon$ transforms. dilatometric and X-ray diffr. exam. 8=35114
- Cu–Ni–Mn system, diffusion rel. to thermodynamic activities, obs. 8=31004
- Mn complex, diaquobisacetylacetonatomanganese (II), crystal structure 8=44228
- Mn complex, phthalocyanatopyridinemanganese(III)-μ-oxo-phthalocyanatopyridine-manganese(III) dipyridinate 8=26409
- MnAs, n.m.r. hydrostatic pressure and temp. dependence 8=31911
- $MnAs_{0\cdot9}P_{0\cdot1}$, crystal structure at 119°K and 298°K, X-ray powder pattern determ. 8=35341
- $MnAs_{0\cdot92}P_{0\cdot08}$, polycrystalline, mag. and crystallographic props. 8=31503
- Mn As_xSb_{1-x} solid solns., magnetic props. and structure 8=49482
- Mn-Au alloys, antiferromag. props. on thermal and mech. treatment 8=31776
- Mn_3B_4, Mo-or W- substituted, mag. props 8=27418
- MnBi film, mag. props. rel. to memory appls. 8=49531
- $MnCl_2$, aqueous soln, dielec. consts. and loss factors 8=34887
- $MnCl_2$, new absorpt. band 8=32012
- $MnCl_2.4H_2O$, thermal expansion anomaly near Neel pt. due to antiferromag. ordering 8=35445
- $MnCl_4^{2-}$-$ZnCl_4^{2-}$ mixed crysts., spectra at 4°K 8=27590
- $Mn_3Cl_2(NO_3)_{12}.24H_2O$, Zeeman splitting of blue lines, theory and obs. 8=41117
- $MnCO_3$, absorpt. spectrum at 4.2°K rel. to magnon side bands 8=32010
- $MnCO_3$, vis. and u.v. absorpt. spectra 8=32008
- $Mn_2(CO)_{10}$, Mn^{55} n.m.r. spectrum, nuclear quadrupole coupling effects 8=49653

Manganese compounds—contd
$(Mn, Co)_4C$, mag. structure from polarized n. -scattering 8=31732
$MnCr_2O_4$, ferrimagnetic spiral, far i. r. absorption 8=45204
$MnCr_2O_4$, ferrimagnetic spiral, n. m. r. of Mn^{55} 8=45130
$MnCr_2O_4$ insulating spiral, ferrimag. resonance freq. and temp. dependence 8=31831
$MnCr_2O_4$, spin-structure determ. from magnetization and resonance 8=31731
$MnCr_2O_4$, mag. structure determ. from n. -diffr. 8=31721
$MnCr_2S_4$, NiAs-type structure, magnetization, 1. 5°K to room temp. 8=45064
$Mn_{2-x}Cr_xSb$ (x=o, 0. 03), spin reorientation rel. to phase transform, 180-280°K 8=36189
Mn–Cu null-matrix alloy for n diffr. exam. 8=44195
MnF_2, antiferromagnet, uniaxial, first-and second-neighbour exchanges, statistical mech. 8=31782
MnF_2, elastic and thermoelastic behviour 8=44590
MnF_2, n. m. r., extremely narrowed, applications 8=27509
MnF_2, u. s. attenuation near and above spin-flop transition 8=44319
MnF_2, Fe^{2+} impurity, critical-point magnetization 8=31787
MnF_2, n. scattering near critical pt., temp. dependence 8=31784
MnF_2, octahedral symmetry, i.r. absorpt. spectra of Co^{2+} ions 8=32011
MnF_2 rutile antiferromagnet, spin-wave light scattering 8=36387
MnF_2, spin-wave sidebands 8=36388
MnF_2, stressed, magnon sideband shapes rel. to exciton dispersion and exciton-magnon interactions 8=36389
MnF_2, susceptibility meas. rel. to spin-wave theory 8=31783
MnF_2, u.s. attenuation meas. near Néel point 8=48720
MnF_2:Co, localized magnon obs. by neutron scattering 8=27380
$MnF_2:Mg^{2+}(Zn^{2+})(Ca^{2+})$, impurity-induced fluorescence 8=45281
MnFE antiferromagnet Faraday effect, h.f. optical transitions contrib. 8=41116
$MnFe_2O_4$ films, single-cryst., pulse switching and static characts., obs. 8=31730
$MnFe_2O_4$, Mossbauer effect 8=43954
$Mn_{1+x}Fe_{2-x}O_4$, induced anisotropy at low temps. 8=36188
$Mn_xFe_{3-x}O_{4+\gamma}$, Richter type relax, details 8=36219
$Mn_xFe_{3-x}O_{4+\nu}$, electron-transfer relaxs. 8=31830
$Mn_{1-x}Fe_xP$ solid solutions, magnetic props. rel. to props of FeP 8=27378
Mn_3GaN, antiferromagnetic ordering of Mn spins 8=40871
Mn_5Ge_3, ferromag., uniaxial anisotropy consts., temp. depend. of energy 8=36150
Mn_2GeO_4, high-pressure form, crystal structure 8=39807
MnI_2 insulating spiral, antiferromag. resonance freq. and temp. dependence 8=31831
$MnIn_xCr_{2-x}S_4$, $(0 \leq x \leq 1.0)$, mag. and crystallographic props. 8=36190
$Mn(Mn_xV^{4+}_xV^{3+}_{2-2x})O_4$, $x < 0.68$ elec. props. and structures 8=35340
Mn_2N, antiferromagnetic and crystal struct. 8=49573
Mn-Ni, Mn-Pd and Mn-Pt (CuAu-I type alloys), mag. structures and phase transformations 8=31780
MnO, covalency parameters 8=30617
MnO, deformed, crystal structure 33-157°K and mag. anomaly 8=30906
MnO, Hall mobility of electrons and holes at 943°C 8=27118
MnO inclusion in steel, thermal expansion and reln. to tessellated stresses 8=44350
MnO, struct. exam. 8=48592
MnO substrate for Cs_3Sb films 8=39591
MnO, thermoelectric force, electrical resistivity 8=40477
MnO_2 effect on corundum recrystallization 8=48536
MnO_2, semicond. and dielec. props rel. to contact mats and way of coating 8=31383
$MnO.Al_2O_3$ inclusion in steel, thermal expansion and reln. to tessellated streses 8=44350
MnO : Li, electrical conduction 8=44801
MnO. OH, mag. structure and H location 8=49533
$2MnO.SiO_2$ inclusions in Fe, e microprobe obs. 8=27802
Mn_2O_3-NiO-Cu_2O system, thermistor with negative temp. coeffs. 8=49280
MnP, helical spin ordering, development of theory 8=31309
MnP, helical spin structure, stability 8=36151
MnP, magnetic properties by torque meas. 8=49529
MnP, magnetic props, hydrostatic pressure effects 8=31657
MnP, metamagnetic interactions pressure dependence 8=31656
MnP–MnAs solid solutions, magnetic and structural study 8=48388
Mn–Pt system, mag. structures and transforms. rel. to exchange interactions 8=45017
Mn_3Pt, magnetic structure, effect of Fe substitution 8=27446
Mn_3Pt, magnetic transformation, first-order, x-ray and susceptibility study 8=31777
α-MnS, covalency parameters 8=30617
α-MnS., lattice parameters rel. to pressure 8=48669

Manganese compounds—contd
α-MnS, paramagnetic, S^{33} NMR temp. dependence, 175-300°K 8=45131
α-MnS, parameters rel. to pressure 8=48669
MnS inclusion in steel, thermal expansion and reln. to tessellated stresses 8=44350
$MnSO_4$, antiferromagnetic spin configuration 8=36213
$MnSO_4$ powders, anhydrous and monohydrate mag. props. 8=31786
MnSb, dilute solutions in superconducting PdSb 8=27029
MnSb, magnetization and crystal anisotropy 8=49530
MnSb, n.m.r. hydrostatic pressure and temp. dependence 8=31911
MnSb, spin relaxation of Fe^{57} below curie point 8=49532
MnSb–Sb aligned eutectic, mag. anisotropy 8=49535
MnSe, sublimation 8=39498
$MnSeO_4$, antiferromag. structure from n. diffr. data 8=31778
$MnSeO_4$, Neél temp., obs. using continuous flow cryostat 8=49548
MnSi, mag. moment spacial distrib. from n. scattering 8=31655
Mn-Sn system, mag. props of phases and liq. state 8=36214
$MnSn_2$, antiferromagnet, strong weakly coupled moments 8=31781
$MnSn_2$, antiferromagnetic, neutron-diffraction study rel. to structure transitions 8=31779
Mn_3Sn, helical spin ordering, development of theory 8=31309
MnTe, antiferromagnetic semiconductor magnon drag at optical freq. and i.r. spectrum 8=32009
p-MnTe : Ag, thermoelec. props. 300°-1000°K 8=44908
$Mn(TiMn)O_4$, magnetic and crystalline structure 8=40872
$MnTiO_3$, gyrotropic birefringence 8=45155
Mn-V alloys, X-ray investigation of σ-phase 8=49713
Mn– Zn alloys of CsCl type structure, magnetization and mag. structure 8=40819
Mn–Zn ferrite, mag. props. rel. to sintering conditions effects 8=49561
Mn-Zn ferrite, sintering conditions effect on mag. props. 8=27432
Mn-Zn ferrites, Mössbauer study of hyperfine fields 8=35042
Mn-Zn ferrites, permeabilities rel. to micro-and chemical structures 8=27431
Mn–Zn ferrites with high-permeabilities 8=49560
β_1-MnZn films ferromag. resonance 8=27451
$Mn_xZn_{1-x}Fe_2O_4$, cation distribs. and lattice parameters from X-ray and n.-exams. 8=44229
Mn– Zn–Ga alloys of CsCl type structure, mangetization and mag. structure 8=40819
$Mn_{0.625}$-ZnY ferrites, Mossbauer spectroscopy 8=36198
Manometers
See also Vacuum gauges.
all-glass recording membrane 10-760 torr instrument 8=41625
automatic, for press. of liq. metals meas. 8=48011
Bayard-Alpert, X-radiation residual current 8=34685
butyl phthalate oil, correction for variations in room temp. 8=32646
differential, in gas flowmeters, meas. errors 8=25806
dual-range for mercury or oil 8=28224
electric discharge "immersion" with simplified construction 8=47996
high-vacuum measurements, achievements 8=48000
oil, with continuous elec. readout 8=32644
for plasma neutral gas in mag. field var. direction and magnitude 8=43548
thermocouple manometric transducers, thermal rating 8=45961
vacuum, apparatus and methods of meas. 8=39253
vacuum, interferrometric differential apparatus 8=39249
Hg, collinear-arm instrument 8=32643
Many-particle systems. See Quantum theory/many-particle systems.
Markov processes. See Statistical analysis.
Mars. See Planets.
Masers
active medium, nonlinear, excitation by beam of oscillators 8=33155
c. w. 337μ, rel. to interference of sub.-mm waves over 450m path diff. 8=33278
on earth satellite, freq. stability obs. 8=28643
material Q rel. to pump intensity and freq. 8=37548
molecular-beam, oscillation quenching 8=46531
molecular spectroscopy application 8=38782
quantum electronics, effect on technology 8=28655
rate eqns., Lyapunov's second method 8=28656
resonators, optimization 8=33156
ruby, preamplifier for e. p. r. spectrometer 8=33146
theoretical and exptl. work in USSR, review and bibliography 8=28644
three level, intermittent pumping rel. to enhanced action 8=28642
travelling wave, amplification at 36GHz 8=28641
USSR, review 8=33157
H, automatic tuning 8=46530
H, freq. shifts, due to coherently excited $\Delta m_F = \pm 1$ transitions between $F = 1$ levels of ground state 8=25350

Masers—contd
- H, $\Delta m = O$, triplet decomp. 8=42049
- H, synchronised, oscillation amplitude freq. dependence 8=42050
- NH_3 molecular beam oscillator with two cavities in series, characts. 8=37547
- NH_3, two cavity, meas. of 3-2 inversion freq. and freq. stability 8=24267
- Rb^{87}, theory rel. to relax. times 8=24266

optical. See Lasers; Optical pumping.

Mass spectra

See also Chemical analysis/by mass spectrometry.
- acetone condensation products 8=29840
- acetylene, decomp. by 0. 5-1200 keV positive ions 8=43491
- alcohols, lower aliphatic, photoionization 8=47793
- alkyl ions, prod. by H_3^+ reactions with propane or butane 8=39057
- biphenylene 8=39058
- cyclic alkanes, fragmentation of skeletal bonds 8=29824
- deciphering, for high temp. thermodynamic reactions 8=38609
- digital recording systems, design theory 8=38604
- doublet mass difference discrepancies, 1954-1958, analysis 8=29667
- ethanes, deuterated (d_0-d_6) 8=47446-7
- field-ionization, production using heated filaments 8=47448
- for fission products separation 8=38544
- free radicals, techniques and results 8=29829
- group IIA fluorides, bond energies 8=38934

fracture toughness of high strength alloys, effect of microstructure 8=49011
fracture toughness testing, state for WOL specimen 8=48973
glass, effect of polymeric organosilicon film 8=49024
glass, inorg., fracture strength, rel. to surface conds., loading and chem. comp. 8=31176
glass-reinforced plastics in oil, long-time strength 8=31239
glass sheet, ambient humidity dependence 8=40165
glass, weakening defects 8=44580
graphite, reactor type, meas. before and after n-irrad. 8=26789
metallic/brittle aggregates, fracture initiation and modes of failure 8=31182
microsamples, test apparatus for 1.3-1200°K 8=48950
optical contacts 8=44528
oriented media, time-dependence, theory 8=44529
plane stress problems, finite element representations 8=23824
plastics, scale and temp. effects 8=31238
polymers, amorphous, tearing 8=31237
polymers, amorphous, temp.-time charact. 8=31234
polymers, tear strength increase 8=49066
porous solid, effect of surface energy 8=48969
radial nozzles in spherical pressure vessels, shakedown loads 8=32750
shock waves, spherical and plane, propag. and attenuation, rel. to solid strength 8=26751
silicate glasses, strengthening by ion exchange 8=26845
steel, diaphragm, square, plastic deform. and failure 8=37155
steel, e bombard. effects, 2.5 MeV 8=35694
steel, low C castings, effect of rare-earth metal additions 8=49009
steels, Fe–C and Fe–Ni–C, martensite strength, contribution factors 8=26815
steels of ultra-high strength, fracture toughness, effects of microstructure 8=49010
Al alloys, fracture toughness, orientation dependence 8=48989
Al alloys, serrated yielding, dislocation model of temp. and strain rate depend. 8=44548
Al, increase on low temp. deformation due to mosaic block misalignment 8=35653
Al–MeO, dispersion strengthened, elevated temps. 8=40124
BeO, rupture mod., effect of strain rate, environment and surface cond. 8=26788
Co-W ferromag. high-temp. structural alloy development 8=31601
Cr black coatings, electrolytically deposited 8=45394
Cu diaphragm, square, plastic deform. and failure 8=37155
Cu, n-irradiated, strengthening mechanism after mild annealing 8=31198
Cu, reduction by presence of thin epitaxial Ni overgrowth 8=40146
Cu single crystals, film coating on, increase rel. to surface damage 8=40150
Cu, yield surfaces, effects of plastic deform and neutron irrad. 8=44564
4% Cu–Al alloys, rel. to time and temp. 8=31201
Cu-Cr alloys, stress limitation rel. to cavity formation, 8=48871
Fe–C martensite, yield strength and transformation substructure 8=26812
Fe-Mn-N, alloys, high. temp. strengthening, Mossbauer study 8=49019
Fe-N single crystals, solid solution strenthening 8=49013
Fe-Ni-Cr-Nb alloys, strengthening phase identification 8=44574

Mechanical strength—contd
- Ge crystals, smooth surface defects, effect at 300°K and 4.2°K 8=40161
- MgO, toughness, effect of water 8=40173
- NaCl, along body and face diagonals theoretical 8=44594
- NaCl:Mn, yield strength 8=40175
- Ta–Mo alloys, effect of Mo conc. on yield stress 8=35718
- Ta–Nb alloys, effect of Mo conc. on yield stress 8=35718
- Th, effect of C content, 0.008 to 2.83 at % 8=44603
- Th, effect of C solid solution 8=40183
- Ti alloys, fracture toughness parameters 8=49058
- WC-Co alloys, transverse-rupture strength increase on porosity decrease 8=49062
- **compressive**
  - of columns with cracks, load carrying capacity 8=44520
  - cylindrical shells eccentrically stiffened, stability 8=41651
  - rings, diametral compression by "point" loads 8=31168
  - rubber cylinders under end loads, stability 8=44610
  - semiconductors based on GeTe: (Bi, Cu), effect of n and γ irrad. 8=40637
  - Mo, hydrostatically-extruded 8=35706
- **shear**
  - glass, molten, high-temp. u.s. interferometry 8=39280
  - longitudinal shear crack with infinitely narrow plastic zone 8=46061
  - powder, split-ring annular cell meas. 8=35611
  - W, modulus freq. and temp. dependence (0.0004–20 cps, 1400–2000°K) 8=35723
- **tensile**
  - alkali halides, NaCl-type, and elastic consts. 8=49036
  - apparatus for micro-specimens in 1.3 to 1200°K range 8=48947
  - brittle fracture initiation, rel. to microstruct. 8=31174
  - ethylene-propylene copolymer single crysts. mats. obs. 8=44616
  - fibres, three-point bend tester 8=31172
  - flat plate with circular hole under uniaxial tension 8=41723
  - granular materials, theory and expt. in whole moisture range 8=31173
  - high-temperature meas. apparatus 8=31175
  - magnetostrictive load cell for tensile testing under high hydrostatic pressures 8=40103
  - martensitic steel, C content, effect on notch toughness 8=35684
  - metal foils, time-to-rupture from creep tests under tensile loads of periodically varying orientation 8=35626
  - metal samples at 1.3°K, micromachine 8=48959
  - metals, sheet, tensile straining, high temp. effect 8=48982
  - plastic resin reinforced with alumina fibres 8=26857
  - polyethylene, rel. to mol. chain mobility, ≤ 40 000 psi 8=44620
  - polytetrafluoroethylene, rel. to mol. chain mobility, ≤ 60 000 psi 8=44620
  - steel, austenitic stainless, He embrittlement, 540–760°C 8=31213
  - steels, cast austenitic, increase by phase transformations on thermal cycling 8=35698
  - tension tests, stability conditions 8=26739
  - testing apparatus in range -76°C to + 100°C, simple 8=48966
  - testing, remedy for scatter 8=26765
  - uniaxial tests using stress corrosion cell 8=48970
  - Al, zone-refined, changes during recrystallisation after low-temp. deformation 8=35660
  - CsI crystals 8=40139
  - Cu alloys, improvement by increasing Pb content 8=40144
  - Cu, Hg addition effects 8=31203
  - Fe, yield, effect of annealing after wet H treatment 8=49018
  - Fe–50Ni alloys fibre-reinforced, rel. to mag. props. 8=31209
  - Fe–1.35Si alloys, fibre-reinforced, rel. to mag. props. 8=31209
  - KCl, dependence on growth conditions and impurity effects 8=26401
  - LiF, dependence on growth conditions and impurity effects 8=26401
  - Mg–Zn–Mn alloy, wrought, effects of heat treatment 8=35704
  - Mo, hydrostatically-extruded 8=35706
  - NaCl dependence on impurity effects 8=26401
  - NiCoMo steels, constant properties in wide temperature range 8=49016
  - Ni_3Fe, ordered and disordered, behaviour 8=44595
  - Zr, effect of up to 4.2 at.% O on deform 8=44609

Mercury (planet). See Planets.
Mercury
  addition to Cu, effect on tensile props. 8=31203
  arc plasma, i. r. bremsstrahlung calc. 8=30069
  atom, double-resonance broadening, 6^3P_1 state 8=38732
Mercury—contd
  atom, elastic electron scatt., cross section and Mott asymm. function calc. 8=34174
  Atom, electron scatt., Mott theory, influence of screening 8=34171
  atom, internal conversion coeff. for e. m. transition between shells 8=38670
  atom, $\lambda = 1850$ Å line, isotope shift and hyperfine structure 8=43192
  atom, metastable 6^3P_2 state, Zeeman sublevel decay constant is relaxation time of longitudinal component of quadrupole moment 8=34142
  atom, 6s6p$^3P_2$ metastable state, elec. dipole polarizabilities meas. 8=38704
  atom, 7^3S_1 state, lifetime and depopulation rate 8=38706
  atom, 2537 Å line broadening and shift by H_2 impact 8=43194
  atomic levels by optical methods 8=43191
  atoms collisions in Na-Hg system, meas. 8=29665
  atoms, excited ^3P, state, inelastic collisions of second kind with electrons 8=43230
  atoms in Se film, distrib. study by e. p. r. 8=35179
  column level meas., by variable resistance, automatic method 8=28455
  conductivity, electrical, and eqn. of state at 0-2000°C and 200-5000 atm. pressure 8=25945
  crystal Knight shift at 1.2°K 8=49646
  crystalline, glide and deformation twinning, –39°C to –196°C 8=26706
  crystalline, magnetoresistance and Fermi surface topology 8=26968
  crystals, deformation twinning modes 8=26187
  desorption from W on interaction with low energy electrons 8=39623
  detection on surfaces in vac. systems using ellipsometer 8=39255
  discharge excitation of Raman spectra in α-quartz 8=49753
  discharge h.p. lamp with iodide additive 8=42207
  discharge, low press., induction interaction of currents, obs. 8=43451
  discharge, r.f., afterglow spectrum 8=29616
  discharge, vapour, surface wave prod. device and soln. 8=47750
  discharges, Tonks, Dattner resonances damping rel. to microwave field 8=43443
  electrocrystallization 8=41283
  electrode, adsorpt. energy of ions 8=36600
  excitation by $N_2(A^3\Sigma_u^+)$ 8=34163
  flow caused by travelling mag. field, obs 8=24180
  fluorescent tube operation, vapour pressure influence when frequency rises to 28 KHz 8=46681
  4-point contact probe for thin film elec. cond. meas. 8=41907
  halide complex with azines, prep. and infra-red study 8=36432
  ions, electrochem. in fused $AlCl_3$-NaCl-KCl 8=49917
  jet supersonic vapour, use for charge exchange of polarized ions 8=39039
  lamp for holography 8=46754
  lifetime of 6^1P_1 level, coherence scattering of light 8=47498
  liquid evaporation rate in vacuum 8=39480
  liquid in reactor boilers, corrosion, inhibited by Ti or Zr 8=47426
  liquid, Knight shift 8=39438
  liquid, temp. profiles in turbulent flow, effect of superimposed free convection 8=34836
  liquid, thermal conductivity, 350°K-500°K 8=48130
  low pressure gas discharge, current limitation and gas clean-up 8=47767
  mag. field induced motion in shallow layer, obs. 8=24177
  manometer with collinear arms 8=32643
  monolayer ellipsometer, surface tension and contact pot. obs 8=48061
  photoemission, two- and three-photon, in $HClO_4$ solns., obs. 8=40706
  porosimeter, low pressure for macropores meas. 8=30660
  preionized vapour flow, intensity relax. of certain lines in flow dirn. 8=47753
  reservoir, control by greaseless valve 8=34691
  resonance radiation, rel. to monochromatic flash spectroscopy 8=24389
  seeding in Cs plasma diode, rel. to performance 8=28475
  6^1P_1, $6^3P_{0,1,2}$ states excited by electron impact 8=38705
  solubility in dimethylcyclohexanes and alcohols 8=48071
  solubility in various liqs. 8=30416
  solubility in various liqs., free-vol. theory 8=30417
  solubility, temp. depend, entropies and solute solvent interacts 8=43798
  spectral line broadening, 2537 Å, in presence of Cd, Zn and Mg vapour 8=43193
  spectroscopy, Fourier, 15.295 Å line h. f. s. 8=28830
  subcooling 8=30583
  vapour, associative ionization cross section 8=25716
  vapour, breakdown by laser beam, threshold values 8=47766
  vapour discharge, electron energy distribs. and Langmuir paradox 8=34419

Mercury—contd
  vapour-discharge, positive column, electron-density profile microwave meas. 8=39113
  vapour, electrical breakdown, mechanisms 8=43484
  vapour, green-band emission 8=29944
  vapour, photoionization curves up to 17.7 eV 8=39031
  viscosity under press. between 40 and 440 kbars 8=48094
  Hg^{119}, hyperfine structure constants in $6\,{}^1P_1$ level, and hyperfine structure of line $6\,{}^1P_1$-$8\,{}^1S_0$ 8=43195
  Hg^{198} atom collisions with inert gases, relax., temp. effect 20°-600°C 8=29664
  Hg^{201}, dispersion and optical props. in vapour on optical pumping and in pulsating e.m. field 8=43222
  γ-Hg, structure 8=44220
  Hg^+ sputtering, yield and ang. distrib. rel. to random and preferential ejection correlation 8=44499
  HgI series, intercombinational transition probabilities 8=38711
  Hg/sulpholane interface, specific adsprt. rel. to elec. double layer 8=30396
  Hg + Cl atom combination 8=49960
  Hg-Hg turbulent co-current flow heat exchanges, expt. rel. to theory 8=34835
  Hg-Kr glow discharge, e energy distrib. rel. to striations 8=34418
  Mo wire and foil quenching 8=31218
Mercury compounds
  alloys, liquid, Knight shift 8=39438
  amalgams, liq., hall effect 8=43869
  β-HgS films, elec. conductivity and thermal e.m.f. temp. dependence 8=44792
  liquid alloys, elec. cond., invalidity of Mott model 8=25948
  mercury di-n-hexyl, liquid: radiolysis to identify composition 8=49976
  HgCl, dimerization 8=49960
  $HgCl_2$ as γ-ray dosimeter, radiolytic and photolytic consts. 8=45409
  Hg-CN-SCN complex in aqueous soln, Raman spectra rel. to mixed ligands 8=43842
  $Hg(CNO)_2$, bonding and stability 8=26006
  $HgCr_2S_4$, mag. structre and metamagnetism 8=31653
  $HgCr_2Se_4$, n.m.r. of Cr^{53} and Se^{77} at 4.2°K 8=31896
  HgD, hyperfine struct. in spectra 8=43314
  $Hg_5In_2Te_8$, elastic consts. 8=49027
  $Hg(OHg)_4Br_2$, least-squares refinement 8=48654
  $[HgOSi(CH_3)_4]_2$, crystal structure 8=48683
  HgS crystal, up-conversion of 10.6μ beam to visible 8=46552
  HgS, films epitaxial growth on CdS and ZnS platelets, dislocations and cryst. orientation 8=35165
  α-HgS, nature of photoelectret effect 8=31440
  HgS_xSe_{1-x}, $O \leqslant x \leqslant 0.4$, cond., Hall effect and i.r. absorpt., 25-300°K 8=40319
  HgS_xTe_{1-x}, $O \leqslant x \leqslant 0.4$, elec. cond. and Hall effect, 25-300°K 8=40319
  HgSe thin films, structure 8=30755
  HgSe-βHgS mixed crystal, elect. props. and band struct 8=31320
  HgT, hyperfine struct. in spectra 8=43314
  Hg-Tb(Yb) systems, phase diags. 8=30706
  HgTe, density of states, effective mass of holes 8=40242
  HgTe, lattice dilatation, constant and thermal expansion coefficient rel. to temp. 8=48744
  Hg Te, magnetoplasma reflection rel. to temp. 8=49247
  HgTe, magnetoresistance oscillations 8=35811
  HgTe, oscillations of longitudinal magnetic resistance in degenerate electron gas 8=40466
  HgTe, phonon viscosity attenuation of u.s. waves 8=30946
  n-HgTe, Shubnikov-de Haas effect 8=27106
  HgTe thin films, structure 8=30755
  HgTe-βHgS mixed crystal, elect. props. and band struct. 8=31320
  HgTe-HgSe mixed crystal, elect. props. and band struct. 8=31320
  Hg_3Te_3-Im_2Te_3 alloy system, phase diagram 8=30697
  Hg_3Te_3-In_2Te_3 alloys, elec. props. 8=40464
  Hg-Tl eutectic, interfacial reactions with metals, dielectrics and polymers 8=49873
  Hg–3% Zn liquid, rel. to ductile-brittle transition temp. of Al, strain-rate depend. 8=35657
  Hg–3% Zn liquid, rel. to ductile-brittle transition in Al 8=35656

 capture
  K^- absorpt. by light nuclei, pair-absorpt. model 8=34019
  by nucleus in mesic atom, approx. calc. 8=47333
  O^{16} radiative π capture, shell model calc. 8=47334
  π^-, by H in hydrogeneous substs. 8=47739
 decay
  $A_1 \rightarrow \rho\pi$ and $\pi^\pm - \pi^\circ$ mass difference, Schwinger theory 8=24854
  $A_1 \rightarrow \rho\pi$ in quark model 8=29175
  $A1 \rightarrow \rho\pi$ using current algebra, pole dominance and meson coupling constants 8=33526
  A_1 width calc. using Lagrangian model of $\pi - A_1$ mixing 8=24855
  $A_2 \rightarrow \pi\gamma$, width calc. from saturating sum rule from $\pi \rightarrow \pi^\circ l\nu\gamma$ 8=33726
  $B \rightarrow \omega\pi$, rel. to spin and parity determ. of B 8=38040
  boson resonances decaying determ. of spin, parity 8=33715
  Cabibbo theory status 8=38009
  χ°, using current algebra rel. to $\eta \rightarrow \gamma\gamma$ 8=24837
  $\chi \rightarrow \eta\pi\pi$, chiral-dynamic-Lagrangian calc. 8=42605
  e.m. rel. to quark charge-commutation relations 8=29108
  κ, lifetime and $K\pi$ coupling calc. 8=29153
  η, CP violation, assuming $\Delta I = 2$ selection rule 8=24816
  $\eta \rightarrow l^+l^-\gamma$ or $\rightarrow l^+l^-$, $l = 3$ or μ, branching ratios calc. 8=42589
  η, rate calc. from Schwinger's chiral dynamics 8=24637
  η, rel. to C nonconservation, obs. review 8=33711
  $\eta \rightarrow 2\gamma$, assuming the interaction for 3π decay transforms. like the third member of an octet 8=24836
  $\eta \rightarrow 2\gamma/\pi^\circ \rightarrow 2\gamma$ ratio rel. to SU_3 symm breaking 8=24769
  $\eta \rightarrow \gamma\gamma$, using current algebra 8=24837
  $\eta \rightarrow 2\gamma/\pi^\circ \rightarrow 2\gamma$ widths ratio by soft-photon emission calc. with SU(3) symmetry breaking 8=38019
  $\eta \rightarrow 2\gamma$, $X^\circ - \eta$ mixing in quark model 8=24835
  η, modes, current algebra and PCAC discussion 8=38025
  $\eta \rightarrow \pi^\circ e^+e^-$, C violation 8=24816

Mesons—contd
  decay—contd
    $\eta \rightarrow \pi\pi\gamma$, C violation 8=24816
    $\eta_V \rightarrow 2\pi$, $\overline{K}K$ branching ratio and SU_3 violation 8=29113
    $\eta \rightarrow \pi^+\pi^-\pi^\circ$, Dalitz plot analysis, possible $\Delta I = 0$, $\Delta I = 2$ C-violating amplitude 8=33712
    $\eta \rightarrow \pi^+\pi^-\pi^0$, $K \rightarrow 0$ replaces $K_u \rightarrow 0$ 8=38005
    $\eta \rightarrow \pi^+\pi^-\pi^0$, obs. test of invariance 8=42591
    $\eta \rightarrow \pi^+\pi^-\gamma$, test of C invariance, obs. 8=42590
    η_{+-} phase, $Re\epsilon$ and superweak model 8=38008
    $\eta^\circ \rightarrow 2\gamma$ derived from N Compton scatt. 8=33663
    $\eta^* \rightarrow \eta + 2\pi$, meson chiral transformation 8=24686
    $f^\circ \rightarrow 2\gamma$ width, $\gamma + \gamma \rightarrow \pi^\circ + \pi^\circ$ dispersion sum rule calc. 8=29173
    h, properties and implications 8=24759
    isospin-one on Regge trajectories, classification, decay modes 8=24677
    K amplitude/π amplitude = 1 to all orders of SU(3) breaking interaction calc. 8=38011
    K decay constant, Goldberger-Freiman relation validity 8=37828
    $K \rightarrow \gamma + e + \nu$, weak vector current conservation 8=37876
    $K \rightarrow l\nu\ \pi l\nu\ \pi\pi l\nu$ current algebra approach 8=37830
    K obs., consistency with soft-pion prediction of current algebra 8=42569
    $K \rightarrow 1 + \nu_1 + \gamma$ applic. of Cabibbo theory 8=24753
    $K \rightarrow \pi e^+e^-$, using vector meson dominant model calc. 8=38004
    $K \rightarrow 2\pi$, CP violation, current-current models 8=42575
    $K \rightarrow 2\pi$, formalism, singularities, and dumps with one π only off mass shell 8=33697
    $K \rightarrow 2\pi$ rel. to CPT invariance and π-π phase shift anomaly 8=24815
    $K \rightarrow 2\pi$, violation of $\Delta T = 1/2$ rule 8=29148
    $K \rightarrow 3\pi$, current algebra constraints, comparison with expt. in τ decay 8=33697
    $K \rightarrow 3\pi$, like-π spectra and non-linear effects 8=24819
    $K \rightarrow 3\pi$, nonleptonic, $\Delta T = 1/2$ violation 8=24823
    $K \rightarrow 3\pi$, odd-π spectral shape rel. to low-energy π-π scatt. 8=33692
    $K \rightarrow 3\pi$ rates, e.m. corrections calc. 8=47116
    $K \rightarrow 3\pi$, simple model for amplitude 8=29152
    $K \rightarrow 3\pi$, vector meson dominance model 8=42577
    $K \rightarrow \pi\pi\pi l\nu_e$, form factors from current algebra and PCAC 8=29149
    K, radiative form factors 8=42566
    K resonance quark model 8=33731
    K, semi-leptonic, phenomenological model 8=24771
    K, with matrix element structure of Hamiltonian and current algebra 8=29210
    K_A strong, calc. using Weinberg-Schnitzer model 8=33730
    $K_A \rightarrow K + \omega$ current algebra calc. using Schnitzer-Weinberg technique 8=33723
    $K_A \rightarrow K + p$ current algebra calc. using Schnitzer-Weinberg technique 8=33723
    K_{13}, calc. of $f_-(0)/f_+(0)$ from algebra of currents and spectral function sum rules 8=42572
    K_{13} current algebra calc. of form factors with SU(3) symm. breaking 8=38002
    K_{13}, discrepancies in ξ determ. 8=29150
    K_{13} form factor calc. using current algebra and dispersion relations 8=38003
    K_{13} form factors, current algebra and subtracted dispersion relations 8=42578
    K_{13} form factors, from chiral dynamics and field-current identity 8=24820
    K_{13} form factors from current algebra and Weinberg spectral function sum rules 8=24818
    K_{13} form factors studied using current algebra 8=33699
    K_{13} mode, matrix element of divergence or vector current 8=42580
    K_{13}, K_{14} from factors, using soft pion techniques and current algebras calc. 8=33694
    K_{14}, extraction of form factors 8=42576
    K_{14}, form factors for calc. of π-π phase shifts 8=29137
    K_{e3} amplitude rel. to renormalization corrections 8=42386
    K_{e3}, Cabibbo theory status 8=38009
    K_{e4} characteristics rel. to low-energy π-π scatt. 8=33692
    K_{e5}, vector form factors, current algebra calc. 8=42579
    $K_{\mu 4}$ spectrum calc. from current algebra 8=24822
    K°, CP violation estimated with a Cabibbo transformation 8=24816
    K°, CP violation phenomena, possible explanation of anomalies 8=33693
    K°, $\Delta S = -\Delta Q$ selection rule 8=33696
    K°, $\Delta S = \Delta Q$ test in leptonic decay 8=42570
    K°, effects of $\Delta S = \Delta Q$ on CP-nonconservation in decay 8=38001
    $K^\circ \rightarrow e^\pm + \nu + \pi$, $\Delta S = \Delta Q$ conserved 8=38007
    K°, pion decay 8=47115
    K°, time-dependent K_S, K_L interference in $\pi^+\pi^-$ decay channel obs. 8=42564
    $K^\circ \rightarrow 2\pi$ rel. to CP 8=24612
    $K^\circ \rightarrow 2\pi$, restrictions imposed by TCP and unitarity 8=42581
    $\overline{K}^\circ \rightarrow K^- + e^+ + \nu_e$, probability predicted in phenomenological model 8=24771

Mesons—contd

    K°_{13}, μ_3, charge asymmetry rel. to K°-$\overline{K}^\circ$ system params. 8=42584
    K_{e3}°, radiative corrections 8=42573
    $K^\circ_{\mu 3}$ and $\overline{K}^\circ_{\mu 3}$ differential probabs. 8=29147
    $K^\circ_{\mu 3}$, $Re\xi$ meas. from μ polarization 8=42567
    K^0_L, leptonic, T-violating effects 8=33567
    $K^\circ_L \rightarrow \mu^+\mu^-$ and weak-interaction cut-off 8=33700
    $K_L \rightarrow \pi e\nu$, decay mode study 8=29146
    $K_L^\circ \rightarrow \pi^\pm e^\mp$, charge asymm. implying CPT test 8=42568
    $K_L^\circ \rightarrow \pi^\pm\mu^\mp\nu$ charge asymm. implying CPT test 8=42568
    $K^\circ_L \rightarrow 2\pi^\circ$, CP violation 8=24814
    $K_L \rightarrow 2\pi$ CP violation rel. to model $W \equiv a$ 8=38012
    K_2° lifetime meas. 8=33709
    K°_s, mean life $= 0.856 \times 10^{-10}$ sec obs. 8=33695
    $K_s \rightarrow 2\pi$, radiative corrections 8=33833
    $K^0_1 \rightarrow \pi^+\pi^-$ mass-amplitude relation 8=38010
    $K_2^\circ \rightarrow 2\pi^\circ$, $K_1^\circ \rightarrow 2\pi^\circ$, ratio $[\eta_{00}|^2 = (-2 \pm 7) \times 10^{-6}]$ 8=42571
    $K^0_2 \rightarrow \pi\pi\pi$, $K^2 \rightarrow 0$ replaces $K_u \rightarrow 0$ 8=38005
    $K_2^\circ \rightarrow \pi^+\pi^-\pi^\circ$ incorrect assumption that integral over phase space of first-order term is zero 8=33701
    $K^\circ_2 \rightarrow \pi^+\pi^-\pi^\circ$ spectrum rel. to π scatt. lengths, obs. 8=29135
    K^+ $\Delta S = \Delta Q$ selection rule 8=33696
    $K^+ \rightarrow \pi^+ + \pi^- + e^+ + \nu$, π-π phase shift review 8=24805
    $K^+ \rightarrow \pi^+\pi^\circ$ mass-amplitude relation 8=38010
    $K^+ \rightarrow \pi^\circ + \mu^+ + \nu$, parameter $E(q^2)$ determ. 8=24817
    $K^+ \rightarrow \pi^\circ\pi^\circ\pi^+$ spectrum rel. to π scatt. lengths, obs. 8=29135
    K^+_{e2} branching ratio, meas. in spark chamber and counter expt. 8=42565
    $K^+_{e3} \rightarrow \pi^\circ + e^+ + \nu$, π° momentum meas. from its e-pair decay 8=33698
    $K^+_{\mu 3} \rightarrow \pi^\circ + \mu^+ + \nu$, π° momentum meas. from its e-pari decay 8=33698
    $K^\pm \rightarrow \pi^\circ + \mu^\pm + \nu$, radiative corrections with finite ν mass 8=24821
    $K^\pm \rightarrow \pi^\pm\pi^\circ$, and $\Sigma^+ \rightarrow n\pi^+$ related by $\Delta I = 3/2$ effects 8=29151
    $K^\pm\pi^\circ\pi^\circ\pi^\pm$ incorrect assumption that integral over phase space of first order term is zero 8=33701
    K^*(890)(1420) in K^-p, 10 GeV/c comparison with Regge pole model 8=33732
    $K^* \rightarrow K\pi$, $K\pi\pi$ rel. to baryon model for bosons 8=33548
    K^* strong, calc. using Weinberg-Schnitzer model 8=33730
    K^* widths from vertex functions 8=42598
    mass spectrum, using cluster model of hadrons 8=42486
    non-leptonic, amplitudes rel. to current divergence 8=33529
    $\omega \rightarrow e^+e^-$ new data 8=33721
    $\omega \rightarrow l^+l^-$, non-existent consequence, protoprod. 8=33728
    $\omega \rightarrow l^+l^-$, radiative correction calc. 8=29170
    $\omega \rightarrow$ neutrals/$\omega \rightarrow$ total, branching ratio meas. 8=38032
    ω, ϕ, $\rho \rightarrow 2\pi\gamma$, soft-photon emission approach 8=29174
    $\varphi \rightarrow e^+e^-$ obs. 8=33721
    $\phi \rightarrow e^+e^-$, partial width obs. 8=33722
    $\phi \rightarrow l^+l^-$, radiative correction calc. 8=29170
    ϕ, isospin violations assuming asymptotic symmetry 8=42606
    $\phi \rightarrow K + K$, current algebra calc. using Schnitzer-Weinberg technique 8=33723
    $\phi \rightarrow K\overline{K}$, width calc. 8=33654
    ϕ strong, calc. using Weinberg-Schnitzer model 8=33730
    ϕ widths from vertex functions 8=42598
    pseudoscalar, applic. of Cabibbo theory 8=24753
    pseudoscalar, two-body radiative using current algebra, PCAC 8=37955
    Q widths from vertex functions 8=42598
    quark model calc. 8=42497
    radiative, connection with current algebra 8=38025
    radiative, correction with current algebra 8=38025
    resonance, 3-particle, spin and parity determ. 8=38021
    $\rho \rightarrow e^+e^-$ new data 8=33721
    $\rho \rightarrow e^+e^-$, vector-meson-dominance prediction, finite-width corrections 8=42607
    ρ, $f_{\rho\pi\pi}(-m^2_\rho, o, o)$ calc. 8=33727
    $\rho \rightarrow l^+l^-$, protoprod. 8=33728
    $\rho^\circ \rightarrow l^+l^-$, radiative correction calc. 8=29170
    $\rho \rightarrow 2\pi$ and $\pi^\pm - \pi^\circ$ mass difference, Schwinger theory 8=24854
    ρ width calc. using Lagrangian model of $\pi - A_1$ mixing 8=24855
    soft-pion emission, quark model 8=24755
    $V \rightarrow l^+l^-$, radiation correction to decay rate, calc. 8=29170
    vector and axial-vector, current-algebra calc. 8=42597
    vector, current-density-current-density commutators 8=42337
    vector two-body radiative using current algebra, PCAC 8=37955
    vector $\rightarrow$ 2 pseudoscalars, deviation from SU_3 symm. in vector meson field theory 8=29168
    widths, scalar 8=37956
    $W^\pm$, leptonic, T-violating effects 8=33567
    Ξ° $\Delta S = \Delta Q$ selection rule 8=33696

Mesons—contd
decay observations
$K^+ \rightarrow e^+ + \nu_e$, branching ratio 8=42574
$K_L^\circ \rightarrow \pi^+\pi^-\pi^\circ$, streamer chamber for n beam 8=46978
$K_S \rightarrow \pi^+ + \pi^-$, lifetime meas. 8=42582
$\eta \rightarrow \pi^+\pi^-\pi$ and $\eta \rightarrow 3\pi^\circ$, branching ratio 8=47117
$\eta \rightarrow 3\pi^\circ$ and $\eta \rightarrow \pi^+\pi^-\pi$, branching ratio 8=47117
detection measurement
energy estimation from ionization meas. in nuclear emulsions 8=47114
streamer chamber, proportional counter controlled, for slow-meson stops 8=47105
effects
No entries

annihilation into vacuum rel. to quark model of hadron decay 8=42497
axial-vector current partial conservation and Kawarabayashi-Suzuki-Riazuddin-Fayazuddin sum rule 8=33717
baryon-meson, $U(6) \otimes U(6)$ scheme SU(6) mixing 8=25001
baryon-pseudoscalar meson coupling consts., dispersion sum rules 8=37959
electromagnetic and Dirac fields, K_0-$\overline{K}_0$ transitions 8=38015
η_{+-} phase, Reϵ and superweak model 8=38008
$K + p \rightarrow K + N^*$, Regge pole model, N^* matrix elements 8=33839
KN, low energy between threshold and $Y_0^*(1520)$ resonance, anal. 8=42585
KN, resonance prod., differential cross section 8=24843
KN, superconvergence relations 8=29115
$\overline{K}N$, superconvergence relations 8=29115
KNY coupling consts., modified dispersion relations 8=24828
Kp with $\Delta(1238)$ prod., π trajectory Regge-pole analysis 8=29217
$K\pi$, existence of κ resonance 8=24861
$K\pi$, s-wave in K_{13} decay mode 8=42580
K^--emulsion nuclei, short range hyperfragments, $p_K = 1.5$ GeV/c 8=33702
K^--emulsion nuclei, $\Sigma\pi$ pair prod. obs. 8=33836
$K^- + p \rightarrow K^\circ + n$, K° leptonic decay test of $\Delta S = \Delta Q$ 8=42570
K^- with heavy nuclei, double hyperfragment emission, 1.5–5 MeV 8=33832
K^- with propane freon in bubble chamber $\Sigma^\circ\pi^\circ$ prod. which decay to Λ°, γ 8=25254
$K^- + He^4 \rightarrow (\Sigma + \text{nucleus}) + \pi^- \rightarrow \Lambda^\circ + p + d + \pi^-$, impulse model calc. 8=38094
$K + N \rightarrow Y + M$, amplitude determ. in quark model 8=33703
K^-d, at 2.24 BeV/c, prod. of $Y_1^*(1385)$ state 8=42666
K^-d, resonances rel. to $I = 2$ hyperons search; 2.11, -2.65 GeV/c 8=42656
K^-d, test of one-meson exchange 8=42586
$K^-d \rightarrow \Lambda n$, $p_{K^-} = 340$ MeV/c and 400 MeV/c 8=33704
$K^-d \rightarrow \overline{Z}^-p$, $p_{K^-} = 340$ MeV/c and 400 MeV/c 8=33704
$K^-n \rightarrow \Sigma^-\pi^+\pi^-$, 1660 to 1900 MeV, study of baryon resonances 8=42665
$KN \rightarrow \Lambda\pi$, 1900-2,215 MeV $Y_1^*(1910)$, $J^P = 5/2^+$ 8=33841
K^-p and $Y_1^*(1660)$ and $Y_1^*(1695)$ prod. 8=25005
K^-p at 1.33 GeV/c, 2-body final states 8=42588
K^-p, 1.7-2.7 BeV/c, Ξ^-, Ξ^* prod., spin and decay parameters 8=24997
K^-p at 4.6 and 5.0 GeV/c, 3π effect near 960 MeV obs. 8=38043
K^-p, 5.5 GeV/c, Ω^- prod. obs. 8=29213
K^-p, 6 GeV/c, cross-sections obs., density-matrix elements estimate 8=33705
$K^-p \rightarrow \gamma\Lambda$, rel. to isospin props. of e.m. interactions, predictions of quark model 8=37916
K^-p, Λ prod. cross-section, 10 GeV/c 8=38834
$K^-p \rightarrow \Lambda\eta$ in modified exchange model 8=33707
K^-p, Λ° production, 6 GeV/c 8=38087
$K^-p \rightarrow \overline{K}N\pi$, 1.33 GeV/c, $\overline{K}^*(890)N$, $N^*(1236)\overline{K}$ and $Y_0^*(1520)\pi$ prod. 8=33706
$K^-p \rightarrow \overline{K}^\circ n$, SU(3) symmetry validity 8=37852
$K^-p \rightarrow K^\circ p$, SU(3) symmetry validity 8=37852
K^-p, $K^*(890)(1420)$, prod. obs. comparison with Regge pole model 8=33732
K p, mass dependence of small angle differential cross section, 10 GeV/c 8=42542
$K_2^\circ + p \rightarrow K_1^\circ + p$, domination by ω exchange 8=42587
$K^+ + d \rightarrow p + p + K^\circ$ rel. to K°-K^+ mass difference 8=29154
K^+p, 5.5 GeV/c, K(1300) prod. 8=38024
K^+p at 9 BeV/c, hyperon prod. 8=24991
$K^+p \rightarrow K^+\pi^+n$, double peripheral model 8=29156
K^+p, $S = 2$ boson resonance in mass region 1.0-3.1 GeV search 8=38045
K_S and L_S regeneration phase in Cu at 2.5 GeV/c 8=38006
$K_1 + Y \rightarrow \pi + N$, extrapolation to s, p-wave amplitude in Y decay 8=24988
$Md \rightarrow \gamma BN$, sensitivity to BN interactions 8=37916
meson-baryon coupling consts. in broken SU(6) static model 8=24749

Mesons—contd
interactions—contd
meson-baryon in derivative coupling model, sum rules in coupling constants 8=37958
meson-baryon, prod. of neutral vector and pseudoscalar mesons, quark model 8=37957
meson-baryon, strangeness-exchange, quark model 8=33659
meson-meson, using current algebra and PCAC 8=38025
meson $+ N \rightarrow \gamma B$ for determ. of e.m. couplings of MN resonances 8=37916
meson-nucleon, vector meson prod. rel. to hadron photoprod., photon-vector-meson analogy 8=42503
meson-nucleon, very-high-energy polarization theory 8=37963
meson-proton coherent prod. and deck effect best with deuterium 8=24911
one-boson-exchange, PVS theory, rel. to N-N interacts. 8=24751
two-body, polarization and reson. decay rel. to transversity amplitudes 8=33737
$VP \rightarrow PP$, bootstrapping of Regge trajectories 8=33658
$w, \pi + w \rightarrow \pi + \pi$, thin d double spectral function effects 8=24680

  - A_2 trajectory no-compensation mechanism rel. to KN scatt. finite-energy sum rules 8=42612
  - A_2 trajectory and residue functions obtained 8=24853
  - A_2^-, in $\pi^- p \to {}^-\pi p\eta^\circ$ at 5 BeV/c 8=38036
  - A_2^- (1300) double-pole characteristics explained by nondegenerate mass matrix for 2 mesons 8=24857
  - $A_2^\pm\pi^+$ in four-prong annihilation of 1.2 GeV/c $\bar{p}$ in hydrogen 8=38066
  - analysis of $e + p \to e^1 + \rho^\circ + p^1 \to \pi^* + \pi^-$ 8=24859
  - axial mesons, axial current sources 8=33713
  - axial-vector current partial conservation and Kawarabayashi–Suzuki–Riazuddin–Fayazuddin sum rule 8=33717
  - B° in pion, η photoprod. on p, 6-17.8 GeV 8=42523
  - boson, use of nuclear targets obs. 8=24841
  - $\chi \to \eta + 2\pi\pi$ decay, chiral-dynamic-Lagrangian calc. 8=42605
  - coupling consts., vector and scalar, with nucleon, from low-energy p-p scatt. 8=24748
  - current-algebra calc., vector and axial-vector 8=42597
  - D, mass eigenvalues 8=47122
  - D(1280) prod. in $\bar{p}p \to K\bar{K}\ 3(4)\pi$, 1.2 GeV/c 8=33759
  - δ and η', possibility of being same particle 8=24842
  - $\eta\pi\pi$ enhancement near 960 MeV 8=33657
  - η, photoprod. on nucleons, expt. and theory 8=33667
  - f° in $I = 0, J = 2$ channel of π-π scatt. 8=33692
  - f° in four-prong annihilation of 1.2 GeV/c $\bar{p}$ in hydrogen 8=38066
  - f_0, Regge trajectory and mass calc. 8=24470
  - $f^\circ \to 2\gamma$ decay width, $\gamma + \gamma \to \pi^\circ + \pi^\circ$ dispersion sum rule calc. 8=29173
  - g in multipion mass spectra 8=38028
  - g, rel. to new resonance prod. in $\pi^- p \to p\rho^-\rho^\circ$ 8=38023
  - g_A evaluation rel. to chiral algebra 8=24849
  - infinite mass renormalization, some consequences 8=24850
  - isospin-one on Regge trajectories, classification 8=24677
  - κ, possible existence in $K\pi$ system 8=24861
  - $K_T \to K\pi, K^*\pi$ quark model 8=33731
  - $K_A \to K^*\pi$, quark model 8=33731
  - K_A strong decay calc. using Weinberg-Schnitzer model 8=33730
  - K(1300) system prod. in K^+p, 5.5 GeV/c 8=38024
  - $KKn\pi\ (\pi \geq 1)$ final state S = 2 boson search with mass 1.0-3.1 GeV 8=38045
  - KN collisions, Regge-pole model 8=24843
  - $K\pi\pi$, appearance in eigenchannels with definite quantum numbers 8=24848
  - $K\pi\pi$ system, interference 8=42613
  - $K^\circ\bar{K}^\circ$ system, mass resonance ~1300 MeV 8=24847
  - $K^\circ K^+$ final state S = 2 boson search with mass 1.0-3.1 GeV 8=38045
  - K^+K^+ final state S = 2 boson search with mass 1.0-3.1 GeV 8=38045
  - K^* -κ mutual supporting mechanism rel. to $K\pi$ system 8=24861
  - K^*, $K\pi$ and $K\pi\pi$, decay, rel. to baryon model for bosons 8=33548
  - $K^* \to K\pi$, quark model 8=33731
  - $\bar{K}^*N$ prod. in $K^-p \to \bar{K}N\pi$, 1.33 GeV/c 8=33706
  - $K^{*+}\Sigma^+$ production, diff. cross sections and Regge pole model 8=24994
  - K^* strong decay calc. using Weinberg-Schnitzer model 8=33730
  - K^*(890), (1420) obs. in K^-p, 10 GeV/c, decay ang. distrib., comparison with Regge Pole and absorption models 8=33732
  - modified amplitude 8=24851
  - neutral vector in meson-baryon processes, quark model 8=37957
  - neutral vector mesons, leptonic decays, ρ-ω interference 8=38029
  - new, in $\pi^- p \to p\rho^-\rho^\circ$ decay mode and relation to g 8=38023
  - octet, rel. to current algebra and PCAC 8=24624
  - $\omega \to e^+e^-$ new data 8=33721
  - ω exchange in K^{*-}(890) prod. in K^-p at 10 GeV/c 8=33732
  - ω, from $\gamma p \to p\omega$ and $\gamma p \to p\omega\pi^+\pi^-$, up to 5.8 GeV 8=33719
  - ω in p-p at 6 GeV/c obs. 8=29187
  - ω in $p\bar{p} \to 3\pi^+3\pi^-\pi^\circ$, 5.7 GeV/c, cross-section 8=24940
  - $\omega \to l^+l^-$, non-existent consequence, photoprod. 8=33728
  - ω, photoproduction from nucleons 8=33725
  - $\omega, \phi, \rho \to 2\pi\gamma$, decay, soft-photon emission approach 8=29174
  - ω, photoprod. on nucleons, expt. and theory 8=33667
  - $\omega\rho^\circ$ interference in $e^+e^- \to \pi^\circ\gamma, \eta\gamma$ 8=24734
  - ω° prod. in $\gamma p \to$ multipion, 4.8-6.9 BeV 8=33669
  - ω° prod. in p-p collisions, double Regge-pole model 8=24858
  - 1^- and 2^+ nonets self-consistent couplings 8=33718
  - 1^+ mass spectrum and strong decays, O(4, 2) theory 8=42594
  - ϕ decay isospin violations assuming asymptotic symmetry 8=42606
  - ϕ decay width from vertex functions 8=42598
  - ϕ, from $\gamma p \to p\phi$ and $\gamma p \to p\phi\pi^+\pi^-$, up to 5.8 GeV 8=33719

Mesons—contd
- **resonances**—contd
  - Φ, mass eigenvalues 8=47122
  - ϕ, photoprod. on C, cross section, 1800 MeV 8=38033
  - ϕ photoprod. on H, cross section, 15 GeV 8=33724
  - ϕ strong decay calc. using Weinberg-Schnitzer model 8=33730
  - ϕ-ω mixing in model for isovector form factors 8=29039
  - ϕ°, photoproduction from H_2 differential cross-section obs. 6.5-17.8 GeV 8=42602
  - photoproduction and application of optical theorem for quasi-elastic scatt. 8=42601
  - photoproduction, Regge-pole model 8=42600
  - photoproduction rel. to cross sections and photon energy dependence 8=47123
  - photoproduction using polarized-photon parity filter 8=42599
  - πN collisions, Regge-pole model 8=24843
  - $\pi N \rightarrow VN$ and π photoprod., γ–V analogy model 8=33666
  - $\pi\pi$ and $\gamma\pi$, from $\gamma\pi$, of any spin 8=47119 ,
  - $\pi\pi$, I = 0, J = 4 near 2 GeV in π-π scatt. 8=37998
  - $\pi\pi$ interaction, vector meson exchange 8=29166
  - π^+ multipion in π^+p collisions, 1630 MeV 8=33729
  - $\pi^+\pi^-\pi^\circ$ from $\bar{p}p$ annihilations at rest 8=38042
  - 3π near 960 MeV in K^-p interaction at 4.6 and 5.0 GeV/c 8=38043
  - in π photoprod. and N Compton scatt. 8=29162
  - p in πp scatt., analyticity constraints, soln. by means of resonance and Regge trajectories 8=33680
  - in $\bar{p}p \rightarrow K\bar{K}\ 3(4)\pi$, 1.2 GeV/c 8=33759
  - $\varphi \rightarrow e^+e^-$ obs. 8=33721
  - quantum number determ. and phenomenological description of states 8=24844
  - radiative correction to prod. 8=38038
  - ρ and A_1, dominance in $\pi \rightarrow e\nu\gamma$ 8=29176
  - ρ and e.m. coupling determ. 8=42610
  - ρ bootstrap, δ-function and Breit-Wigner exchange compared 8=29074
  - ρ contrib. to π form factor at high momentum transfer 8=24768
  - ρ, coupling consistency with $SU(2) \otimes SU(2)$ theories 8=38041
  - ρ coupling constant in terms of πN coupling constant 8=37992
  - ρ dominance and current algebra 8=38034
  - $\rho \rightarrow e^+e^-$ new data 8=33721
  - $\rho \rightarrow e^+e^-$, vector-meson-dominance prediction, finite-width corrections 8=42607
  - ρ, f bootstrap model, in π-π scatt., high-and low-energy amplitudes simultaneously calc. 8=37912
  - ρ, $f_{\rho\pi\pi}(-m^2, o, o)$ calc. 8=33727
  - ρ in I = 1, J = 1 channel of π-π scatt. 8=33692
  - ρ in $\pi + N \rightarrow \rho + N^* \rightarrow N + 3\pi$, Regge-pole model 8=24780
  - ρ in $p\bar{p} \rightarrow 3\pi^+3\pi^-\pi^\circ$, 5.7 GeV/c, cross-section 8=24940
  - $\rho \rightarrow l^+l^-$, photoproduced 8=33728
  - ρ, photoproduction from nucleons 8=33725
  - ρ, photoprod. on nucleons, expt. and theory 8=33667
  - ρ position in proton form factor in time like region 8=29184
  - ρ prod. and decay ang. distribs. in π^-p interact. 8=42614
  - ρ prod in $\pi + N \rightarrow \rho + N^*$, ang. decay correls. at 8 GeV 8=24781
  - ρ Regge amplitude for πN charge-exchange scatt. 8=24779
  - ρ Regge pole in t-channel generated by $\pi\pi$ channel 8=24860
  - ρ, Regge trajectory and mass calc. 8=24470
  - ρ width and Reggeized short range potential 8=47036
  - ρ, width calc. in π-π scattering 8=29145
  - $\rho\gamma$ enhancement near 960 MeV 8=33657
  - $\rho\pi$, I=2, in 27 plet of bosons 8=29033
  - $\rho\pi$ spectrum from π^-p interaction at 6.7 GeV/c 8=37979
  - ρ-π superconvergence relation, approx. saturation 8=38044
  - $\rho + \rho'$ dominance, s-wave π-N scatt. length and current algebra 8=24799
  - ρ-ω interference and neutral vector meson leptonic decays 8=38029
  - ρ^- prod. in multipion photoprod. on protons, 4.8-6.0 BeV 8=33669
  - ρ°, from $\gamma p \rightarrow p\rho^\circ$ and $\gamma p \rightarrow p\rho^\circ\pi^+\pi^-$, up to 5.8 GeV 8=33719
  - ρ° in four-prong annihilation of 1.2 GeV/c $\bar{p}$ in hydrogen 8=38066
  - ρ^0 photoprod. ang. distrib. 8=37914
  - ρ° photoprod. on H, cross section, 15 GeV 8=33724
  - ρ°, photoproduction from H_2 differential cross-section obs. 6.5-17.8 GeV 8=42602
  - ρ° photoprod., rel. to lepton-pair cross section 8=24709
  - ρ° prod. in $\pi^-p \rightarrow \rho^\circ n$, 4 and 8 GeV/c comparison with $\gamma p \rightarrow \pi^+ n$, Vector dominance model 8=37972
  - ρ° prod. in p-p collisions, double Regge-pole model 8=24858
  - ρ°, ω interference in $e^+e^- \rightarrow \pi^\circ\gamma, \eta\gamma$ 8=24734
  - ρ^+ multipion in π^+p collisions, 1720 MeV 8=33729
  - R, S, T, U mesons classification, adopting spin-orbit and spin-spin forces 8=42593
  - shape, $\pi p \rightarrow \rho N \rightarrow \pi\pi N$ 8=38037
  - σ as bound state of 4π 8=29177

    creep, high-temp., in high stacking-fault energy metals, mechanism 8=35622
    crystal defects, diffusivity of atoms and plastic deform. mechanism 8=26629
    crystal mosaic block size and disorientation changes on crystallization 8=40051
    crystals, localized damage by laser irradiation 8=30716
    crystals on glass, vacuum-condensed, growth and orientation, rel. to deposition conditions 8=26226
    cubic, thermal expansion, Grüneisen parameters rel. to temp. 8=48743
    cutting at 100–700 m/s, force meas. method 8=35655
    cyclotron resonance in inclined mag. field, characts. 8=40284
    deformation state, and shears, after cold-welding by pear-shaped method 8=37099
    deposited layers, thermal conductivity coeff. 8=35453
    diffusion in liq. metals, fluctuation model 8=43790
    diffusion mobility temp. dependence 8=48783
    dislocations as sources and sinks for point defects 8=31071
    ductile, crack initiation of fracture 8=48972
    ductility, workability 8=26758
    e. m. wave transformation into elastic waves 8=39886
    electric field penetration leading to slowly damping of the pot. 8=40298
    elect. fields, gravitationally induced, criticism of an expt. 8=40297
    electrical cond., low-temp. dimensional effects 8=26951
    electrical conductivity transverse 8=49148
    electrochemical machining theory, Cauchy problem for Laplace eqn. 8=49914
    electrodeposited, aplication of electron microscopy of investigation 8=44154
    electrodeposited, internal stress due to hydrogen 8=31167
    electron emission, experimental proof of general theory 8=49434
    electron gas, new formulation of ground state energy 8=28340
    epitaxial films, growth by thermal evaporation on ionic crystals in vacuo and air 8=30738
    epitaxial films, elec. field effects on growth 8=26109
    epitaxial films on mica and NaCl substrates, stresses causing film curling 8=35157
    evaporation by laser irradiation, obs. 8=39494
    exoelectrons, on solidification of metals in vacuum, nature 8=40692

Metals—contd
external X-ray photo-effect, quantum yield obs. 8=36005
face-centred, work hardening theories rel. to flow stress and dislocation density 8=35558
f.c.c., Bordoni peak meas. 8=26742
f. c. c., plasticity by meas. viscosity of wire samples 8=31169
f.c.c., point defects, energies and atomic configurations 8=31026
f.c.c. quenched, small vacancy clusters 8=31036
f. c. c., stacking fault energy determ. from anisotropic elasticity theory 8=26700
fast cracking during fatigue propagation 8=44586
fatigued, dislocation distrib., effect of surface-active substs. 8=35556
fatigue, theory 8=40116
ferromagnetic, energy spectrum of Fermi excitations 8=49093
ferromagnetic, magneto-optical effects, anomalous, electron-phonon scattering contrib. 8=31949
film conductor in integrated monolithic device with insulator film, basic technology 8=44852
film, mag. props. 8=49461
film thickness determ. by fast e.-backscatt. 8=48434
films, cubic, thermally induced strains 8=40122
films, e.m. power-transmission coeffs., 8=49698
films, temp. meas. during vapour deposition 8=44035
films, vacuum-evaporated, density meas. 8=48437
films, work function thickness, shape and size factors 8=36037
Flow in explosive cladding and welding 8=39262
foil thermal insulation in high pressure gas 8=26602
foils, time-to-rupture from creep tests under tensile loads of periodically varying orientation 8=35626
fracture under static and repeated loads 8=48971
friction, two-member law, verification rel. to real surface of contact 8=32697
galvanomagnetic studies by heliconlike waves 8=26961
gravitationally induced external elec. field, meas. 8=35814
h. c. p., elastically strained, inner-displacement tensor 8=26406
heat conduction near surface exposed to blackbody radiation, modified kinetic theory 8=44353
heat conduction to liq. He II, Kapitza theory 8=28444
heat transfer at interface, thermoelasticity 8=41738
helicon wave propag., standing wave resonances mode struct. 8=44663
hexagonal, first-, second- and third-order shear constants, for arbitrary axial ratio 8=35642
hydrides, positron annihilation, two exponential decays 8=40286
impurity diffusion rel. to elec. resistivity due to impurities 8=30996
with incomplete inner shells, superconductivity 8=35837
i. r. spectral reflectances at low temp. 8=27526
iodide crystals, exciton peak, position rel. to lattice parameter 8=49113
iodination, by I vapour at room temp., effects of Co^{60} γ-irrad. 8=36555
ion emission on giant-pulse laser irrad., and surface temp. 8=27361
ions in ionosphere, E-region, layering processes, effects on NO^+ and O_2^+ 8=36858
ions, secondary, Auger de-excitation, obs. 8=40718
irradiated, porosity formation mechanism 8=35518
Knight shift, review 8=27494
lattice, short range e.m. fields meas. method 8=35026
layer, resistances, stability condns. 8=35818
liquid, asynchronous flowmeter dos. 8=48027
liquid, book 8=34753
liquid, collective excitation 8=48054
liquid, eddy-current flowmeter, analysis 8=48026
liquid, heat transfer characts. of turbulent flow, effect of internal source. 8=48021
liquid, heat transfer, review 8=39353
liquid, laser droplet form. and ignition 8=34740
liquid, links between liq. state physics and metal physics, review 8=30398
liquid, ordering states 8=34759
liquid, sound vel. calc. 8=43803
liquid, structure factor by neutron diffractions techniques 8=43757
liquid, struct. theory and exptl. technique 8=34758
liquid, supercooled, effect of u.s. vibs on nucleation 8=48261
liquid, surface energies of interfaces with graphite and diamond 8=30718
liquid, thermal flowmeter, design 8=48025
liquid, velocity of sound 8=25911
localized states, survey 8=35741
magnetic breakdown, osc. periods and de Haas-Van Alphen effect 8=40725
with magnetic impurities, electronic scattering problem 8=31271
with magnetic impurities, electronic structure 8=31270
with magnetic impurities, Kondo effect 8=31272
magnetic impurities, methods of approaching Kondo's problem 8=35816

Metals—contd
mechanical props at low temp., review 8=26738
melting and melts, disorder model 8=25979
metal-dielec.-metal structs, temp-depend of tunnel current 8=49146
metastable, diffusion rates, annealing time effects 8=35474
microscope for high-temp. study of microstruct. deformation and recryst. 8=42183
microwave surface impedance, reason for oscillations 8=36311
monovalent, interionic potentials 8=35813
on moon surface, Surveyor V obs. 8=28140
noble, energy band structures 8=44642
noble, optical spectra rel. to band structure 8=32036
noble Tafel slope rel. to cathodic reduction kinetics 8=45380
non-ferrous, annealing, grain refining rel. to heating speed and dispersion 8=39714
with nonmag. impurities, temp. depend. of EPR line width 8=49583
non-transitional, stacking fault energy correlations 8=44462
nuclear quadrupole-quadrupole interactions through conduction electrons 8=41007
IB, IIB groups, mag. susceptibility 8=49466
oxidation at high temp., influence of specific area and core dimension changes 8=36551
oxidation, oxide scale layers, effects of size and shape of specimen 8=36552
oxidation rate-constant determ., low-temp., from discontinuous film resistance changes 8=49883
oxide film stripping technique 8=30732
oxides, e probe microanalysis standards 8=41307
with paramagnetic impurity, cond. for form. of localized mag. moment 8=31519
paramagnetic, props. rel. to virtual spin-wave effects 8=31517
paramagnetic resonance and relaxation of impurities calc. by perturbation method 8=49591
particles in low cond. liqs., high field electrophoresis 8=30548
phonon conductivity calc. 8=30928
plasma zero-point energy, exchange and correl. contrib. 8=26922
plasticity by meas. viscosity of wire samples 8=31169
plated by plasmic method, thermal and elec. cond., emissivity and expansion 8=35815
point defect migration. 8=48801
polaritons 8=44660
polycrystalline, ferromag. resonance, plastic deformation and annealing effects 8=31811
porous, cooling under vacuum, rate of water evaporation 8=30602
powder compacts, pressure distrib. meas. 8=48950
powders, echo phenomonon 8=27448
quenched, excess vacancy coalescence during annealing, theory 8=35527
proton-irradiated, diffusion-out of rare earth impurities on heating in vacuum, 1500-2800°C 8=40081
pure, under fatigue, grain-boundary migration, characts. at elevated temps. 8=39710
radiation of heat, black-body laws, correction for a real body 8=32935
refractory, absolute elec. conductivity above 1000°C meas. and obs. 8=31314
refractory, b. c. c., creep analysis 8=26759
refractory, Cs layer adsorpt., field e microscopy 8=39624
refractory, induction melting in self formed lining 8=30580
reflectivity changes during laser pulse 8=45169
resistance at magnetic critical points, spin-fluctuation effects 8=26958
resistivity, eddy-current decay meas., analysis 8=46326
resistor, thin film, material and characts., 8=44675
rough surface, i.r. reflection spectra 8=31932
rupture characts. on basis of short-term creep data 8=44526
second electron energy distribution rel. to incidence of primary beam 8=36059
secondary electron emission coeff. rel. to energy of primary electrons 8=36058
secondary electron energy spectra, structure 8=31473
self-diffusion mechanism rel. to defect densities 8=26615
semimetals in crossed elec. and mag. fields, u.s. amplification 8=35408
semimetals, carrier density pressure dependence 8=40313
semimetals, electric field penetration leading to slowly damping of the pot. 8=40298
semi-metals, superconducting and insulating mechanisms 8=26886
sheet, tensile straining, high temp. effect 8=48982
sheet texture determ., neutron diffraction method 8=35261
shock resistance of metals, effect of deformation speed 8=41714
single crystals, pulsed n.m.r. 8=40959
singlet ground state of localized spin, Schrödinger equation solved 8=40223
solidification profiles with ultrasonic pulses 8=39477
specific heat, modified modulation method 8=48732
spin-paramagnetism, effect of electron-lattice interactions 8=36077

Metals—contd
- sputtering, with low-energy inert gas ions, rel. to trapped gas 8=26726
- stacking fault energy rel. to density of electron states 8=26698
- strain ratio meas. method 8=35641
- stress corrosion susceptibility rel. to ambient press 8=49034
- surface cleanness, industrial vacuum technology aspects 8=39572
- surface, molec. orbital model, and gas interact. in field ion microscope 8=35143
- surface radio frequency size effect for drift motion of electron 8=44638
- structure, protonographic exam. 8=26363
- temperature-gradient instability in low-symmetry, highly conducting crystals 8=35022
- thermal activation energy determ. by alternating bending 8=35613
- thermal analysis, contactless, 20-2800°C 8=28411
- thermal and elec. cond. when coated by plasmic method 8=35815
- thermal emissivity, temp. and kinetic dependence 8=35465
- three dimensional, periodic distortion 8=49095
- transient radiation effects on electronic components 8=31126
- transition, 3d, stability of non-magnetic state 8=40746
- vacancy-impurity pairs, binding entropy, and validity of nearest-neighbour interaction model 8=31037
- vapour condensation coeff. meas., improvement on Knudsen's method 8=34988
- wire thermally shocked into longitudinal vibration by current pulse 8=40088
- working, microphotoplasticity techniques using laser systems 8=48954
- X-ray emission, soft, quantum-mechanical many-body treatment 8=27541
- zone-refined, solute-induced hardening near grain boundaries 8=26842
- Bi-type, elec. conductivity temp. dependence, 80-300°K 8=40301
- Cd, Mg and Sn single crystals, opt. consts. from reflectance ratios 8=45164
- Cr, He, Ni and Zr, polycrystalline, opt. consts. from reflectance ratios 8=45164
- He liquid-metal heat transport, kinetic theory model 8=37338
- O determ. through $O^{16}(n,\gamma)N^{16}$ 8=32167
- TiNb33, metallic additions rel. to supercond., microstruct. and workability, obs. 8=44742
- TiNb40, metallic additions rel. to supercond., microstruct. and workability, obs. 8=44742
- VO_2 crystal, semiconductor-metal transition rel. to reflection spectra 8=41150
- VO_2, optical props. between 0.25 and 5eV rel. to band structure 8=49760
- Xe^{133} diff. and mech. props. 8=48766
- **theory**
  - See also Crystals; Electron gas; Plasma.
  - alkali, local pseudopotential form factors, calcs. errors on omitting conduction-electron exchange potential 8=44630
  - atomic capture coeff. and desorpt. rate in one-dimensional model at very low temps. 8=30762
  - b.c.c., zero-point energy and Θ_c^{∞} 8=30932
  - diffusion thermoelec. power, appl. of integral over Fermi surface 8=40220
  - dislocations, dissociation and sliding on prismatic planes 8=44440
  - divalent simple, structures 8=26364
  - effective mag. field seen by one electron 8=40722
  - electron mean free path and free-electron density, elastic strain coeff. determ. using thin-film technique 8=49081
  - f.c.c., binding and vibrational characts. rel. to structure 8=39500
  - Fermi-liquid, inequalities, instabilities and renormalization 8=26864
  - ferromagnetic, wave functions symmetry in one-electron band theory 8=44990
  - ferromagnets, spin-waves, model 8=40765
  - hyperfine mag. fields and elect. field gradients caused by mag. impurities 8=40962
  - with impurities, energy spectrum and props., 8=35760
  - h.f. wave propag., Fermi-liquid effects 8=49120
  - indirect exchange interaction 8=31256
  - localized mag. impurities 8=26865
  - localized magnetic moment, conditions for existence 8=44957
  - local-moment-conduction-electron exchange coupling and RKKY spin densities 8=35742
  - magnetic moments in strong mag. fields, charact. props. 8=44962
  - magnetic moments, local 8=44963
  - magnetic surface levels, obs. in surface impedance meas. geom. modifications effects 8=44655
  - many-band model for interacting electrons, absence of mag. ordering in one and two dimensions 8=44993
  - melting criterion for cubic metals 8=34964

Metals—contd
- **theory**—contd
  - minute particles, discrete electron energy levels, evidence from mag. resonance 8=40894
  - model for lattice dynamics 8=30927
  - monovalent, e-phonon interaction, screening and e,-correlation effects 8=49074
  - noble, localized impurity d state splitting 8=26868
  - nuclear spin interaction, indirect, divergences 8=26877
  - optical effects, thermodynamic approach 8=27518
  - phonons, transverse microwave, freq. depend. of e.m. generation 8=49087
  - plasmons in metal spheres, e. bombardment stimulation and radiative decay 8=45145
  - pseudopotential form factors, local, in alkali metals errors on omitting conduction-electron exchange potential 8=44630
  - quantum structure in dielectric function of metals and anomalous prop. modes. 8=31307
  - screened interionic potential 8=40204
  - semimetals, piezogalvanomagnetic effects., meas. using stress modulated Alfven waves 8=49147
  - semimetals, superfluidity possibility at dielec. transition 8=44627
  - skin effect, anomalous, for specular e.-scatt. and opt. expts at non-normal angles of incidence 8=49739
  - spin fluctuations in almost ferromagnets, impurity effects 8=40764
  - strong-coupling, quasiparticle approximation breakdown 8=26862
  - thermodynamic props. rel. to band structure 8=39904
  - thermoelectricity, thermodynamic and free electron gas theories 8=40636
  - transport props. in e.m. field 8=35451
  - tunnel current between normal metals due to electron-phonon interaction 8=26956
  - ultrasonic wave propag., quantum theory 8=35407
  - vacancy migration, thermodynamics 8=35528
  - X-ray spectrometry, soft-, rel. to e. theory 8=49687
  - zero-temp. impurity resistivity, breakdown of conc. expansion 8=31306
  - Cs, indirect nuclear interactions 8=43937
  - Ga, size-dependent oscillarotry effect magneto-resistance effect 8=49164
  - Rb, indirect nuclear interactions 8=43937

Minerals
See also Mica; Quartz; Ruby.
absorbing anisotropic, refractive index and absorpt. coeff. 8=41061
adularia, O mobility study 8=35477
albite, O mobility study 8=35477
andesite, crystallization under high press. hydrous conds. 8=35227
andesite from circum Pacific arcs, systematic potash content vars. 8=36675
anomalously magnetic, thermal changes in mag. props. 8=31595
apatite structure, paramag. centres 8=31848
apatites, i.v. spectra 8=41047
ardennite, crystal structure, rel. to Si_3O_{10} group positioning 8=39808
barysilite, pyrosilicate and pyrogermanate isomorphs, e.p.r. of Mn^{2+} 8=40931
basalt and granite, strength rel. to stress rate and
basalt in ultra high vacuum, strength characts. 8=41320
basalt, paleomag. meas. 8=50232
basalt, synthetic, crystallization under high press. hydrous conds. 8=35227
basalt vapour scintillation, emission spectrum time scanning 8=34231
basalt, white pattern zones of titanomagnetite grains, obs. 8=48588
basalts, Pliocene, from S.W. U.S.A. paleomagnetism 8=32371
bayerite, structure from n.-diffr. exam., 8=39804
bernankite, struct., X-ray exam. 8=35345
borate, systematology 8=48511
botryogen, crystal structure 8=39790
brucite, structure from n.-diffr. exam. 8=39804
Bulgarian andesites, palaeomag. stability and petrology 8=28013
calcereous cave concretions, C and O isotopic composition var. 8=50096
calcic amphiboles, unit-cell volume and packing density, isotypic replacement effects 8=26372
calcite as neutron monochromator, structure factors 8=42651
calcite, growth shapes rel. to twinning 8=26238
calcite, synthetic, morphology and optical props. 8=26194
chabazite cryst. plug, hydraulic permeability rel. to ambient salt conc. 8=35473
comendite glasses, systematic variation of major elements 8=50075
cristobalite, polymorphic transform., impurity effects 8=26079
cristobalite, stacking fault conc. calc. from X-ray diffr. line profiles 8=26703
crystal-chemical classification based on i.r. spectroscopy 8=39637
deformation rates in h.f. e.m. fields 8=35643
dickite microcrystals, Au-decorated, growth study by e-diffr. exam. 8=26231
dolerites from Spitsbergen, late Mesozoic, anomalous paleomag. poles 8=50224
dunite and gabbro, brittle-ductile transitions 8=48976
ettringite, crystal structure 8=44210
evaporation by laser irradiation, obs. 8=39494
felspars, X-irradiated, structure defect exam. by e.p.r. and thermoluminescence 8=26710
fluorites, dosimetric parameters, from Bulgarian ore deposits 8=49799
Galway granite, zoning of garnets due to Rayleigh fractionation princ. 8=27852
geothite, natural, thermoremanence rel. to parasitic ferromag. and antiferromag. 8=49523
granite, Rb and Sr isotopes post-crystalline movement rel. to feldspar alteration 8=50081
granite, Westerly, permeability rel. to press. up to 4 kB 8=36687
haidingerites, $CaHAsO_4.H_2O$ and $SrHAsO_4.H_2O$, cry. struct. 8=48641
halloysite, water mol. arrangement 8=26143
Iceland spar, prism cutting 8=42160
Iceland spar, rational utilization of geometry in cutting polarizing prisms 8=42159
isotopic abundances of Pb, rel. to age of earth from concordia plots 8=27856
kaolinite microcrystals, Au-decorated, growth study by e-diffr. exam. 8=26231
kröhnkite, cryst. struct. and n.m.r. 8=48660
limestone, brittle-ductile transition 8=48976
magnetite at margins of crystallites, domain struct. behaviour 8=50225

Minerals—contd
magnetite crystals, elastic deformation, remanent and transitory effects 8=31728
metamorphic rocks from Ontario, Hf/Zr ratio 8=50067
metavauxite, crystal structure 8=48631
meteorites, hypersthene achondrites radiation ages 8=37023
meteorites, olivine from 6 pallasites, radiation ages 8=37023
mica, ancient cosmic rays tracks? 8=25036
mica, u.s. transmission coeff. rel. to freq. 8=30947
molecular sieve, type A Linde, containing Ni^{2+} ions, spectra 8=41143
montmorillonite with adsorbed cations, particle size by optical absorption 8=34943
muscovite samples, etchable length of fission tracks rel. to age 8=27854
olivine microchondrules in type I carbonaceous chondrites 8=50431
ores, state of flux in grain boundary movement 8=26843
orthopyroxenes, cation distribution, Mössbauer determ. 8=48324
pantellerite glasses, systematic variation of major elements 8=50075
parawollastonite, cryst. structure 8=48643
particles, ice nucleating props 8=35229
peridotite inclusions and host basalts, Th, U, and K abundances 8=50012
phosphate and oxide mixture, Mössbauer quantitative anal. of Fe^{3+}/Fe^{2+} ratios 8=27778
plagioclases from basic rocks, Sr and Ca fractionation trends, reinterpret. 8=50074
potassium feldspar and plagioclase, simultaneously crystallized at 600 °C, distrib. of trace elements 8=36627
proustite for optical conversion det. of $10 \mu m$ radiation 8=33123
pyrite, elastic field, effect of spherical inclusions 8=48938
pyroavrite, crystal structure 8=39803
pyrrhotite samples, mag. phases 8=50222
quartz, hydrothermal crystallization kinetics 8=26230
quartz-glass-coesite, phase transforms. under high-temp. and pressure 8=48400
radioactive, determ. using low energy (20-610 KeV) γ spectrometry 8=36651
radioactive, pulse-height spectrum analysis 8=46939
recent rhyolites of Mono and Inyo craters, appl. of K-Ar age anal. 8=27857
sapphire, crystals, conductivity, 20-850 °C 8=27236
sapphirine, crystal structure 8=35352
sepiolite, sorption of vapours 8=26137
serendibite, space group, cell dimens. 8=48644
silicate-mineral inclusions, orientation in natural diamond 8=26179
silicates, quantitative microprobe analysis, obs. 8=27809
silicates, surface and bond-forming props. 8=48427
silicates, surface area by Xe adsorb. 8=48426
single stage C replica for electron microscopy, rapid method of prep. 8=30855
sintering kinetics, thermal analysis, meas. 8=30665
spodumene, twinned, internal friction 8=49033
talc, structural changes during heating 8=48601
talc, structural changes on heating 8=30699
tectosilicates, elec. cond., method and exptl. results 8=40289
thaumasite, $Ca_3H_2(CO_3/SO_4)SiO_4.13H_2O$, thermal decomposition, i.r. study 8=26065
titanomagnetite transform. to titanomaghemite on cryst. margin 8=35125
triploidite, crystal structure 8=48652
ultramatic rocks in Alaska, Sb-Rb-K and Sr isotopic relns. 8=50069
Vanda porphyry dikes in Wright Valley, Antarctica, age 8=27859
villamaninite, chem. and structural analyses 8=48646
volcanic from Mono and Inyo Craters, Th^{230} dating 8=27860
whitlockites, crystal chemistry 8=39639
X-ray powder crystallography, peak intensity errors 8=26285
zeolite, H_2O adsorption, translational diffusion, model 8=39619
Zeolite Linde 13x, temp. depend. of mag. proton and cation reson. 8=49656
zeolite, synthetic, surface state evolution from r.f. spectrometry during dehydration 8=39581
zeolites, i.r. spectra of adsorbed NO, N_2O and NO_2 8=27553
zeolites, i.r. spectra rel. to chem. struct. 8=27552
zeolites, surface area determ. 8=48432
zeolites, synthesis 8=36541
zeolites, synthetic, containing transition metal ions, spectra, theory 8=41142
zeolites, synthetic, containing transition metal ions, spectra 8=41143
AlOOH crystals, preferential orientation 8=26183
B polycrystals etched by H_2SO_4, photomicrographs 8=39651
$CaAl_2Si_2O_8$, anorthite, n.m.r. of Al^{27}, obs. 8=40972
(Ca, Mg, Fe) CO_3: Mn^{2+}, e.s.r., allowed and forbidden transitions 8=40933
Mg ilmenites, MgO content rel. MgO/FeO ratio in host rocks 8=50070

Minerals—contd
- Mn_2GeO_4(olivine type) high-pressure form, crystal structure 8=39807
- MoS_2, molybdenite, surface point defects and non-basal dislocations 8=35526
- Pb-Zn ores, applic. of method of determ. true chargeabilities of vertical discontinuities 8=41323
- Pb-Zn ores in Turkey, true chargeability obs. 8=32177
- Sr and Pb, isotopes evolution model with crustal material recycling through mantle 8=36682
- U, presence in rocks and minerals from fission fragment tracks made visible by chemical etching 8=32185
- YFe garnet, e.m. conversion to exchange spin wave energy, coherent i.r. diffraction determ. 8=40848
- ZrO_2:Ce, baddeleyite, impurity positions 8=30917

Minor planets. See Planets.

Molecules—contd

configuration and dimensions—contd
- d, polarized in $2S_{1/2}$ metastable state 8=38763
- gas-phase electron diffractometry, EG-100A apparatus 8=38805
- high-pressure effects, Raman spectral data 8=41031
- intramolecular distances, semi-empirical calc. 8=29708-9
- by molecules, resonance before electron emission or predissociation 8=38949
- polytetrafluoroethylene oxide 8=35366
- potential curves, free parameters for linear eqns. 8=38958
- shape factors in vapour-liquid equilibrium calcs. 8=48269
- in solutions, reversible oritentation, mech. 8=39322
- structure models, ball-drilling methods 8=32631
- H_2, and shape 8=34248

configuration and dimensions, inorganic
- uranine, plus solvation shell, vol. in glycerol-ethyl alcohol and glycerol-H_2O solns., obs. 8=34285
- uranyl cpds., U-O bond distance calc. from i.r. spectra 8=34287
- hydrides, first-row, floating spherical Gaussian orbital model 8=38811
- Ag complex, bis(8-hydroxyquinoline)Ag(I) pyridine solvate 8=39765
- Au(III)-dimethyl hydroxide 8=39770
- B compounds, i.r. evidence for single H bridges 8=38808
- BF_3 8=29715
- B_2O_3 8=38809
- $BrICl^-$ in NH_4BrICl 8=30649
- Ca complex, $CaBr_2 . 10H_2O . 2(CH_2)_6N_4$ and crystal structure 8=26370
- Cd complex, diethyldithiocarbamate, and crystal structure 8=26375
- Cd complex, diethyldithiocarbamate and crystal structure 8=26376
- Cd complex, L-α-glycerophosphorylcholine cadmium chloride trihydrate 8=35325
- CF_2 8=25453
- CO_3 8=25464
- C_3O_2, gas electron diffr. 8=25466
- Co complex, nitropentamminocobalt(III) bromide and cryst. structure 8=26386
- Fe(111) complex, tetra-(n-butyl)-ammonium bis-(maleonitriledithiolate)Fe(III) 8=25469
- $Fe(C_{12}H_8N_2)_3Sb_2(C_4H_2O_6)_2 . 8H_2O$ and crystal structure 8=26397
- Ge periodate, i.r. absorpt. spectrum 8=43300
- H_2S_2 8=25485
- HCO radical 8=47713
- $(HCO_3)_2^{2-}$ in $KHCO_3$, structure from NMR study 8=26032
- $HNCLO_3^-$ ion, i.r. absorpt. obs. and structure 8=34247
- H_2O dimer, MO calc. for H-bond 8=38828
- HOCl 8=25475
- HPF_4 8=34279
- He_3^+ 8=34249
- I_3^- in $N(CH_3)_4I_3$ 8=30649
- I_2Br^- in CsI_2Br 8=30649
- IrF_6, electron diffr. 8=38858
- $K_4Mo(CN)_8 . 2H_2O$, mol. struct. 8=43317
- $K_4W(CN)_8 . 2H_2O$, mol. struct. 8=43317
- Mn complex, phthalocyanatopyridinemanganese(III)-μ-oxo-phthalocyanatopyridine-manganese(III) dipyridinate 8=26409
- $Mo(CN)_8^{4-}$ 8=41118
- N_2F_4 8=38839
- N_2H_2, extended Huckel calc. 8=25509
- NH_3 and ND_3, average struct. 8=29753
- NH_3, use of wavefunctions of double minimum potentials 8=25507
- NO_3 in $Ba(NO_3)_2$ crystals, from n-diffr. 8=39773
- $NOIrF_6$ and isotypes, by n-diffr. 8=25469
- $NOPtF_6$ and isotypes, by n-diffr. 8=25469
- Ni complex, bis(N, N-di-n-propyl-dithiocarbamate)Ni(II), and crystal structure 8=26419
- Ni complex, Ni glyoxime, mol. structure 8=26417
- NpF_6, electron diffr. 8=38858
- O_2AsF_6 and isotypes, by n-diffr. 8=25469
- O_2SbF_2 and isotypes, by n-diffr. 8=25469
- OsF_6, electron diffr. 8=38858
- PHF_2 and PDF_2 8=38849
- $Pd(SO_3)(NH_3)_3$ and crystal structure 8=26431
- PuF_6, electron diffr. 8=38858
- Ru complex, diethyldithiocarbamate, and nitrosyl salt and crystal structure 8=26375
- Ru complex, tetraphenyl arsonium tetrachloro cis-diaquo ruthanate monohydrate 8=35351
- $[RuBr_2(CO)_3]_2$ and crystal structure 8=26438
- $SbF_5 . SO_2$ 8=39820
- TaF_8^{3-} 8=41118
- $TmCl_3$, from Mossbauer effect 8=43959
- TmF_3, from Mossbauer effect 8=43959
- V_2O_5, from mag. susceptibility meas. and calcs. 8=36083
- UF_6, electron diffr. 8=38858
- $W(CN)_8^{4-}$ 8=41118
- WF_6, electron diffr. 8=38858
- XeF_6, electron diffraction 8=25523
- XeF_6, from gas-phase electron diffr. 8=34290-1
- $XeOF_4$ 8=43339

Molecules—contd
- **configuration and dimensions, inorganic**—contd
  - Zn complex, bis(acetylacetonato)zinc(II), and crystal structure 8=39824
  - Zn complex, tris(thiourea) zinc (II) sulphate, and crystal structure 8=39825
- **configuration and dimensions, organic**
  - para-acetotoluidide crystals, monoclinic modification X-ray study 8=44262
  - 3β-acetoxy-17α-hydroxy-16β-bromo-5α-pregnan-11, 20-dione, and crystal structure 8=26459
  - adenosine-3′-phosphate dihydrate, and crystal struture 8=35361
  - o-aminobenzoic acid, phase determ. and X-ray obs. 8=43359
  - 1, 2-0-aminoisopropylidene-α-D-glucopyranose, from crystal structure 8=25623
  - azaridines and N-deutero derivs., from i. r. spectra 8=34309
  - p-benzoquinone 8=34913
  - bigeranyl tetrahydrochloride and crystal structure of triclinic form 8=39827
  - biphenyl, config. 8=34348
  - α, α'-bipyridil in cryst. and liquid states, Raman obs. 8=34355
  - γ, γ'-bipyridil in cryst. and liquid states, Raman obs. 8=34355
  - bonds, two photon sensitized breaking, at 77°K, mech. 8=29704
  - 12α-bromo-11β-hydroxyprogesterone, and crystal structure 8=39828
  - 1-bromotriptycene $BrC_{20}H_{13}$, and crystal structure 8=44266
  - 5-bromouridine and dimethylsulphoxide 1:1 complex, bond lengths and angles 8=26471
  - 1, 3-butadienes 8=38918-20
  - calcium hexa-antipyrine perchlorate, and crystal structure rel. to other metal hexa-antipyrine perchlorates 8=44268
  - carborane and derivs, gas e-diff. study 8=25552
  - cellulose triacetate, different conformations in different solvents 8=43820
  - 1-chloroaziridine 8=25556
  - chloroformates (alkyl and phenyl), comparison with butyl formate, dipole moments obs. 8=25555
  - 2, 3-bis-(cis-chloro-1-methylcyclohexyl)-trans-2-butene, and crystal structure 8=39830
  - 2-chloropropene-1, 3-d_1, conformation of methyl group 8=25558
  - 2-chlorotropene, crystal structure 8=26476
  - cumene, by gas e-diffr. rel. to nature of conjugating system 8=25587
  - cyclobutyl monohalides, conformational behaviour 8=25563
  - cis, cis, cis, -1, 4, 7-cyclononatriene $AgNO_3$ adduct and crystal structure 8=26485
  - cyclooctane analogues, conformation rel. to crystal structure 8=26483
  - cyclooctanone, in crystalline phases above and below −87℃ 8=26091
  - cyclopentadienyl iron sulphide, and crystal structure 8=26537
  - cyclopropanone 8=29774
  - L-cysteine, and crystal structure 8=44271
  - demissidine hydroiodide, $C_{27}H_{46}INO$, crystal structure rel. to config. 8=26489
  - 1, 2, dibromoethane, rot. isomerism, n. m. r. study 8=47646
  - 1, 1-dibromo-3-fluorobutadiene-1, 3, energies of conformations, n. m. r. study 8=47631
  - dicarboxylic acids, $COOH[CH_2]_{2n+1}COOH$, and crystal structure 8=26478
  - 3, 6-dichloro-2, 5-diaminobenzoquinone-(1, 4), and crystal structure 8=26493
  - 1, 2, dichloroethane, rot. isomerism, n. m. r. study 8=47646
  - 1, 1-dichloro-3-fluorobutadiene-1, 3, energies of conformations, n. m. r. study 8=47631
  - diferrocenyl and derivs., and crystal structure 8=26497
  - difluorostilbene derivs., and crystal structure 8=26559
  - dihydrothymine 8=30918
  - $3\beta, 17\alpha$-dihydroxy-21-bromo-5α-pregnan-11, 20-dione, and crystal structure 8=39834
  - dimethylamine 8=47660
  - 2, 3-dimethylbutadiene 8=43375
  - dimethyline sulphonyl chloride, $(CH_3)_2NSO_2Cl$ 8=25607
  - 1, 3-dimethyl-2-thioxo-4-oxo-1, 2, 3, 4, 6, 7, 8 heptahydro-pyrimido [1, 2-a] [1, 3, 5] triazine 8=48686
  - eperuic acids, config. at C(13) from p-bromophenacylester of labdanolic acid structural analysis 8=39840
  - fluorinated methyl radicals, MO theory of geometry 8=47564
  - galactose, rel. to sp. ht. and enthalpy, 15-45℃ 8=30966
  - glucose, rel. to sp. ht. and enthalpy, 15-45℃ 8=30966
  - gramicidine S in soln., n. m. r. obs. 8=34332
  - hexamethylethane, steric deformations from gas-e-diffr. study 8=25606
  - hydrocarbons, floating spherical Gaussian orbital model 8=38886
  - 2-hydroxy-1-phenazine carboxylic acid from pseudomonas aureofaciens and crystal structure 8=26541
  - iso-eremolactone, and crystal structure 8=44273
  - isoprene, by gas e-diffr. rel. to nature of conjugating system 8=25587

Molecules—contd
- **configuration and dimensions, organic**—contd
  - ketones, $\alpha\beta$-unsaturated 8=29788
  - labdanolic acid, config. at C(13) from its p-bromophenacylester structural analysis 8=39840
  - leurocristine methiodide dihydrate, by anomalous scatt. methods 8=25590
  - mannose, rel. to sp. ht. and enthalpy, 15-45℃ 8=30966
  - α- and β-mercaptoesters, skeletal rearrangement on electron impact, mass spectra 8=47456
  - metal-metal carbonyl derivatives, X-ray study 8=26474
  - methyl chloroform, microwave spectra 8=29773
  - methyl group, electronic rel. to steric effects 8=25593
  - methyl halides 8=25596
  - 1-methylpentaborane 8=25600
  - 1-methylpentaborane(9) 8=29791
  - methyl vinyl ether 8=29790
  - micrococcinic acid bis-4′-bromoanilide and crystal structure 8=26531
  - molecular-crystals, structure determ. from potential energy-rotation angle minima 8=26455
  - monobromoduclauxin, and crystal structure rel. to duclauxin structure 8=44272
  - monoselenoparaldehyde, from crystal structure analysis 8=35365
  - natural products, from crystal structures 8=26457
  - nitrogen derivatives, stereochemistry from gas e-diffr. study 8=25608
  - nitroxide radicals from diethylhydroxylamine, dioctylhydroxylamine and N-hydroxypyrrolidine, e. s. r. obs. 8=25655
  - norbormide, stereochemistry from X-ray investigations 8=26165
  - octahydroxycyclobutane 8=44267
  - perhydrotriphenylene (PHTP) + n-hydrocarbons; + chloroform; + cyclohexane, inclusion cpds. 8=30920
  - phenol, in ground and first excited state 8=25614
  - phenylcyclopropane, by gas e-diffr. rel. to nature of conjugating system 8=25587
  - phenyldichlorophosphine oxide, by gas e-diffr. rel. to nature of conjugating system 8=25587
  - phthalazine, n-π* transitions 8=41170
  - poly-L-proline II, rel. to crystal structure 8=26547
  - porphyrin diacids 8=44282
  - propargyl alcohol and amine, isomers from microwave spectra 8=25532
  - pyrazine 8=34913
  - 2-pyrone electron-impact fragments 8=39061
  - selenophene 8=43395
  - silacyclobutane, puckered-ring angle 8=29800
  - steroids 8=25626
  - testosterone: mercuric chloride 2:1 complex, absolute config. and crystal structure 8=44283
  - tetrabenzonaphthalene, M-O-calcs. 8=34312
  - 1, 2, 3, 4-tetrabromo-1, 2, 3, 4-diphthaloyl-cyclobutane 8=48688
  - tetracyanoethylene-Pt complex 8=34322
  - tetramethylethane, steric deformations from gas-e-diffr. study 8=25606
  - tetramethylbiphosphine-bis(monoborane), and crystal structure 8=39851
  - N, N, N′, N′-tetramethyl-p-diaminobenzene iodide, and crystal structure 8=26524
  - tetramethyl-2, 2, 6, 6, -piperidinol-4-oxyl-1, free radical in crystal 8=25654
  - s-tetrazine, bond lengths in ${}^1A_g$ and $\tilde{A}\,{}^1B_{3u}$ states 8=25627
  - thulium acetylacetonate trihydrate, from Mossbauer effect 8=43959
  - thulium benzoate, from Mossbauer effect 8=43959
  - thulium oxinate, from Mossbauer effect 8=43959
  - titanium tetramethoxide, and crystal structure 8=44284
  - titanocene derivs, $(C_5H_5)_2TiCl_2$ and $C_5H_5TiBr_3$, by gas e-diffr. 8=25629
  - trifluoromethylphosphine 8=25574
  - trimethylamino borontrichloride and crystal structure 8=44264
  - from triplet states mag. reson. spectra 8=27449
  - triselenoparaldehyde, from crystal structure analysis 8=35365
  - Tschitschibabin carbohydrates in benzolic solution 8=48064
  - Wurster's blue iodide, and crystal structure 8=26524
  - CF_2, unstable mol. 8=25468
  - CF_3, orbital calc. 8=47664
  - $(CF_3)_4As_2$ 8=25604
  - $(CF_3)_2PF_3$ 8=25576
  - CF_3PF_4 8=25576
  - CH_3 in methyl aromatic hydrocarbons 8=29789
  - CH_3, orbital calc. 8=47664
  - $C^{13}H_3NC$, n. m. r. determ. 8=34336
  - $(C_5H_5)_2TiAl(C_2H_5)_2$, crystal and mol. structure 8=26504
  - σ-Fe diarylene, Mössbauer investigation 8=35039
  - H_2CO, use of wavefunctions of double minimum potentials 8=25507
  - $2SbCl_3$. dibenzyl, mol. complex, and crystal structure 8=35353
  - $4SbCl_3$. dibenzyl, mol. complex, and crystal structure 8=35353

Molecules—contd
  configuration and dimensions, organic—contd
    4:1$SbCl_3$. stilbene, mol. complex and crystal structure 8=35353
    $Sn_3(CH_3)_4Fe(CO)_{16}$, and crystal structure 8=26537
    Ti methoxide, and crystal structure 8=26523
  configuration and dimensions, macromolecules
    actin structure by X-ray scattering and diffr. 8=25674
    carboxypeptidase A, by low resolution technique 8=25675
    cellulose propylene phosphite, transformation, by spectroscopy 8=38966
    cyclotetratriacontane, and crystal structure 8=39831
    DNA, conformation in soln. 8=29860
    DNA of phage T2, and lattice structures rel. to glucoside residue effect 8=26490
    DNA, rel. to RNA and DNA-RNA hybrids and synthetic analogs 8=26556
    NaDNA, segment length and helix dia. 8=30434
    ferritin, and crystal structure 8=26506
    gyration radius of linear mol., boson representation 8=38974
    helical macromols. in soln., size and shape determ. 8=30420
    helical parameters 8=38965
    intramolecular energy functions for conformation anal. 8=29861
    β-lactoglobulin, Fourier maps from 2 different crystals 8=26516
    maleic anhydride-styrene copolymer, chain length and steric param., obs. 8=43776
    Markov chain model, end effects 8=25672
    1-methyl-5-bromouracil: 9-methyladenine, and crystal structure 8=26566
    polyacrylonitrile, neutron scatt. 8=25686
    poly-γ-benzyl-L-glutamate in soln., conformations 8=48096
    polybutadiene, chlorinated, n.m.r. obs. 8=38914
    polymer chain, eqn. of repeat angle 8=25685
    polymer chains, geometry 8=25684
    polymethacrylic acid, aqueous and methanol solns., rel. to small-angle X-ray scattering 8=25888
    β-poly-γ-methyl-L-glutamate, disordered structural characteristics 8=25677
    polypeptide chains, conformational analysis 8=25673
    polystyrene, chain dimens. temp. depend. below O point, obs. 8=43774
    PVC, chlorinated, n.m.r. obs. 8=38914
    protein, secondary structure small deformation model 8=25678
    protein structure refinement 8=25679
    proteins, determ. from rotary dispersion 8=29862
    rel. to protein coating of viruses 8=32624
    PVC conformational struct. from vib. anal. 8=43436
    RNA, and crystal structure of double helix 8=26555
    RNA rel. to DNA and DNA-RNA hybrids and synthetic analogs 8=26556
    s-RNA, from X-scattering study of mols. in water 8=25885
    t-RNA, from X-ray diffr. exam. at different concs. and ionic strengths 8=25875
    trypsin and DIP deriv., from X-ray scattering of mols. in soln. 8=25681
    vinyl polymers, mean dimens., effect of side-group interactions 8=29863
  dissociation

o-fluorotoluene, photoexcit. triplet state yield rel. to vibr., gas-phase obs. 8=25630
hexafluorobenzene, photoexcit. triplet state yield rel. to vibr., gas-phase obs. 8=25630
hydrocarbons, double photon excitations 8=25585
lifetime meas. of states with accelerated ion beam 8=43251
metastable, review of unusual props. 8=29591
monofluorobenzene, photoexcit. triplet state yield rel. to vibr., gas-phase obs. 8=25630
naphthalene, quenching of triplet state 8=34341
naphthalene, singlet and triplet π electron states 8=25543
naphthalene, triplet state, excitation exchange and optical spin polarization, e.s.r. study 8=47686
β-naphthol, triplet state, acidity determ. by e.p.r. 8=34342
2-napthyl methylketane energy transfer to Eu and Tb, obs. 8=36487
nonradiative energy transfer in systems with frozen rot. Brownian motion 8=34883
optical anisotropy dispersion, by appl. of laser waves and certain harmonics 8=38774
organic, dye (Eastman 9860)electronic transition, picosec. lifetime direct obs. using Nd glass laser 8=43346
organic, multiphoton, by Q-modulated ruby laser 8=34295
organic, radioluminescence, kinetic study 8=47630
organic triplet energy transfer in cysts. from mag. reson. spectra 8=27449
organic triplet states and low-energy e impact spectrometry 8=25528
organic triplet states de-excit. in condensed media rel. to mol.-host interactions 8=26029
oxazole, and derivatives, excimer formation 8=29796
parahydrogen, solid, rot. and vibr. theory 8=43967
phenanthrolines, fluoresc. and phosphoresc. spectra 8=43382
phenanthrene, excit-states decay and intersystem crossing, obs. 8=25537
phenanthrolines, deactivation of excited states 8=43383
phosphorescent T-S band decay rate meas., effect of absorpt. T*←T bands 8=38777
photoselection effects on polarization of luminesc. mols. 8=47579
photoselection, tandem two-photon processes 8=49692
polarization in static elec. field rel. to even harmonic radiation 8=43249
pyrene, flash excited absorpt. spectrum 8=43840
pyridine, photoexcit. triplet state yield rel. to vibr., gas-phase obs. 8=25630
quantum beats 8=34209
quinoxaline triplet state, and radiative decay, paths rel. to mag. interactions 8=25624
radiative lifetimes of excited states 8=34230
rotational and vibr., by low-energy electrons 8=25418
rotational and vibrational excitation of molecular ions by electrons 8=38785
in solids and liquids, excited state lifetime 8=39367
tandem two-photon processes, polarization correl. 8=49692
toluene, excited states in pulse radiolysis 8=49979
toluene, higher excimer states 8=34872
toluene, photoexcit. triplet state yield rel. to vibr., gas-phase obs. 8=25630
toluene to diacetyl triplet-triplet energy transfer in solns., obs. 8=34316
triplet absorpt., extinction coeff. meas. 8=25401
triplet form., quantum yields meas. 8=25401
triplet yield determ. by e.s.r. 8=29806
C_2 high-press. bands in CCl_4-Na, K flames, mechanism, obs. 8=38816
CN, in active N_2, reaction kinetics 8=27699
CO, Asundi bands, in gas discharge 8=38994
CO, energy relax. for thermal e 8=38818
CO, in pulse radiolysis 8=45405
CO, selective, in CS_2O_2 chem. laser analysis 8=46569

methanes, substituted, force consts. and zero-point energies calc. 8=25595
methaneselenol 8=25602
methyl bromide, vibration-rotation spectra, near 6000 cm^{-1} 8=47659
methyl chloride, $2\nu_5$ band near 2880 cm^{-1}, parallel component 8=43374
methyl chloride, perturbations in ν_4 band 8=34334
methyl cyanide, direct l-type doubling 8=34323
methyl fluoride 8=43371
methyl halides, anharmonicity 8=38895
methyl halides, C-H bond, i.r. absorpt. intensities rel. to electron cloud distrib. 8=43373
methyl iodide, resonances perturbing ν_5 band 8=25594
methyl vinyl ether 8=29790
methyldiphenylarsine 8=43381
1-methylpentaborane(9), vibr.-rot. interaction 8=29791
methylstannane 8=43369
methylvinylsulphide 8=38899
mode interactions, anharmonic 8=25411
mono-deuterobenzene p-derivs., ν(CH) and ν(CD) 8=34315
monofluorobenzene, photoexcit., rel. to triplet state yield, gas-phase obs. 8=25630
naphthalene, symmetry coords. 8=43376
naphthalenes, isotopic, mean amplitudes calc. 8=43377
organotrichlorosilanes, l. f. vibs. 8=47620
oxalyl halides 8=24612
parahydrogen, solid, excitation theory 8=43967
perbromocyclopropane 8=25565
perchlorocyclopropane 8=25565
perfluorocyclopropane 8=25565
phenol, in ground and first excited state 8=25614
phenol, out-of-plane freqs. 8=43378
phenyl group IV-A cpds. 8=38901
o-phenylenebis(dimethylarsine) 8=43381
polyatomic, first approx. method for force field 8=47562
polyatomic, models, symmetry coordinates 8=25414
polyatomic mols., anomalies in intensity distrib. of rot. -vibr. lines 8=43257
polyatomic, use of dependent coords. 8=47561
polymer chain, dispersion curves and freq. distrib. 8=38975
polymers frequency distributions 8=47736
polymers, random, freq. distrib. 8=38970
polyvinylchloride, normal vib. anal. rel. to conformational struct. 8=43436
potential energy calc. 8=38799
pressure broadening of rot. and vibr.-rot. transitions, scatt. theory 8=47558
pyridazine, and deuterium analogues 8=25933
pyridine derivs., ν(CH) bands near 3000 cm^{-1}, i. r. absorpt. study 8=29799
pyridine, photoexcit., rel. to triplet state yield, gas-phase obs. 8=25630
pyrimidines, polysubstituted, i. r. spectra in 700-200 cm^{-1} range 8=47670
quinoline and isoquinoline, at liq. N_2 temp., interpret. and i. r. spectra 8=34362
rare-earth halide-terpyridyl complexes 8=41131
redundant coords. in harmonic approx. 8=47559
relaxation of anharmonic oscillators in collisions 8=29839
rigid-body motion analysis in crystals 8=26028
$^1\Sigma$-state diatomic mols., expectation values as functions of internuclear separation 8=29689
silacyclobutane, ring puckering 8=29800
silicate glasses, containing As, Sb oxides, vibr. and struct. 8=31964
stimulated Raman transitions, competition 8=25399

Molecules—contd
vibration—contd
symmetric top mols., vibr. -rot. transition moment 8=29692
symmetric tops, computer anal. of bands 8=25412
symmetric tops, Coriolis reson., computer anal. 8=25416
ternary symmetry, hyperfine structure of rotation levels, effects 8=29698
tert-butylropenyl radicals, vibronic near degeneracy 8=38944
tetracyanoethylene, assignment on basis of i. r. polarized spectra of charge transfer complexes 8=38879
tetrahalogens correl. between mean amplitude quantities and bond covalency 8=34228
tetrahydrofuran and deutero-substitutes, spectra interpretation 8=43397
tetraiodoethylene, vibrational spectra and force consts. 8=43396
tetraphenylbutadienes, effect of intramolec. twisting on fluoresc. 8=39390
s-tetrazine 8=25628
theory, second-order secular eqn. 8=34204
thiophene, monoalkyl substitutes, oscillation spectra 8=34364
toluene, photoexcit., rel. to triplet state yield, gas-phase obs. 8=25630
transition probabilities in molec. collisions, WKB calc. 8=38953
1, 3, 5-trichlorobenzene, NQR investigation 8=27516
trichloromethyl radical in solid Ar 8=29831
trifluoromethylphosphonylchloride 8=34330
trimethylene selenide, ring-puckering 8=29802
triphenylarsine 8=43381
triphenylarsine, mol. addition compounds with SnX_4 (X=halogen), i. r. spectra obs. 8=25631
triphenylphosphine, and complexes 8=43380
triphenylphosphine, mol. addition compounds with SnX_4 (X=halogen), i. r. spectra obs. 8=25631
triphenylphosphine oxide, and complexes 8=43380
uranyl cpds., bending freq. and U-O bond distance calc. 8=34287
urea and deuterated urea, spectra, force constants and mean amplitudes of vibrs. 8=38904
vibration-rotation energy-level density calc. 8=29685
vibrational excitation of molecular ions by electrons 8=38785
vinyl fluoride and deuterovinyl fluorides, normal coords. 8=25632
zig-zag chains, randomly folded, vibr. freq. 8=47735
AsH_3, K-type doubling in ν_3 band 8=25445
AsI_3, far i. r. cryst. spectra 8=45223
BF_3-dimethyl selenide and sulphide complexes 8=38806
BO_4 group complexes, asymmetric stretching, rel. to i. r. spectra 8=29714
B_2O_3 in crystallite from radial distrib. functions, rel. to lattice dynamics contrib. 8=44206
Ba tetraoxometalates 8=31965
Be halides 8=25449
BeF, ground state reduced potential curves 8=29717
BeH_2, diatomics-in-mols. calc. 8=25450
$BiCl_3$, far i. r. cryst. spectra 8=45223
Br_2, vibr. relax. in Ar 8=47726
C_2 in acetylene-air flames, low press., spectroscopic and thermo-couple meas. of temp. 8=41877
C_2 mol., new $c'\,{}^1\Pi_g$-$b^1\Pi_u$ band syst. 8=29725
CCl_4, Raman intensity in various solvents 8=30488
$C_6D_5GeCl_3$ 8=25615
$C_6D_5GeCl_3$ 8=34351
CF_2 radical 8=29723
CF_3 radical 8=29723
$(CF_3)_4As_2$ 8=25604
CF_3SF_5 8=25516
CH force consts. 8=29789
CH in acetylene-air flames, temp. by spectroscopic and thermocouple meas. 8=41877
CH_3 in methyl aromatic hydrocarbons 8=29789
CH_3 one and two top mols., torsional vibr. 8=25601
C_2H_6, CH_3CD_3, and C_2D_6, torsional vibr. 8=29778-9
$C^{13}H_3Cl$ 8=29794
$(CH_3)_3CNCO$ 8=29732
C_7H_6D radical, vibronic near degeneracy 8=47706
in CH_2I_2, crysts., and lattice vibr., n inelastic scatt. obs. 8=35385
in CH_3I, crysts., and lattice vibr., n inelastic scatt. obs. 8=35385
CH_3NF_2 and CD_3NF_2, rotational coupling 8=25597
$(CH_3)_2NPX_2$. (X=F, Cl, Br), from i.r. spectra, fundamentals assignment 8=43372
CH_3OPCl_2 8=38892
CH_3SiHD_2 8=34338
CH_2X, hybrid orbital force field calcs. 8=29781
ClCO radical, potential functions calc. 8=47713
$ClSi(NCO)_3$ 8=29732
Cl_3SiNCO 8=29732
Cl_3SiNCS 8=29732
CN, 10th level of $A^2\pi_{3/2}$ state, transitions between hyperfine levels of $J=7/2$ γ doublet 8=38819
CO, adsorbed on Si-supported Pt 8=30773
CO, rel. to CS_2-O_2 chem. laser analysis 8=46569

- **Molecules**—contd
  - **vibration**—contd
    - CO, vib.-rot. constants 8=47589
    - CO, vibr. relax. in nozzle flow 8=47586
    - CO_2, anharmonic force consts. 8=43292
    - CO_2, bands at 4.3μ 8=29730
    - CO_2, collisional relax. in $10^{0}0$ state 8=47715
    - CO_4 group complexes, asymmetric stretching, rel. to i.r. spectra 8=29714
    - C_3O_2, amplitudes and shrinkage effects, temp. effect 8=25466
    - C_3O_2, mean amplitudes and shrinking effects 8=25465
    - $^{12}C^{16}O_2$, analysis 8=47590
    - COF_2, $COCl_2$ and $COBr_2$, integrated intensities 8=38875
    - CO_2 + N_2O, near-resonant energy transfer between i.r.-active vibrs. 8=47725
    - CS, ground state reduced potential curves 8=29717
    - C_3S_2, mean amplitude rel. to temp., from spectrum obs. 8=43290
    - CaO 8=34237
    - $Ca(OH)_2$ 8=27563
    - $CaSO_4.2H_2O$, i.r. combination vibr. spectrum, 10,000-12,000 cm^{1} 8=41074
    - $Co(CO)_3NO$, symmetry force consts. 8=48161
    - Cs_2, 6250Å band system 8=29733
    - D_2, first excited $^1\Sigma^+_g$ state rot. and vibr. levels calc. 8=38823
    - D_2O deform. vibrs. characterization by vectors nonperpendicular to bonds 8=29679
    - D_2S_2, force field from i.r. spectra 8=43331
    - D_2S, ν_2 fundamental 8=25484
    - FCN, direct l-type doubling 8=34323
    - F_2CN, matrix-isolated 8=38946
    - FCO radical, potential functions calc. 8=47713
    - GF method generalisation, inter- and intramolecular coupling 8=43961
    - GeO, ground state reduced potential curves 8=29717
    - H-bonded systems, theory of i.r. spectra 8=38787
    - H halides, correl. between mean amplitude quantities and bond covalency 8=34228
    - H_2, $B^1\Sigma_u^+$, $a^3\Sigma_g^+$ states, vibr. energies 8=38827
    - H_2, first excited $^1\Sigma^+_g$ state rot. and vibr. levels calc. 8=38823
    - H_2, large vibr.-rot. interaction effects in Franck-Condon factors 8=43304
    - H_2 and D_2, chemisorbed on Rh 8=25470
    - H_2 and D_2, vibr. relax., isotope effect 8=34240
    - H_2^+ and D_2^+, vibr. struct. 8=39034
    - HCCH, isotopic, force const. displays 8=43302
    - HCN, bending, "nearly linear" formalism 8=25474
    - HCO radical, potential functions calc. 8=47713
    - HCP, bending, "nearly linear" formalism 8=25474
    - HD, and D_2 8=25471
    - HDO deform. vibrs. characterization by vectors nonperpendicular to bonds 8=29679
    - HF, nuclear shielding and spin-rot. consts., vibr. corrections 8=38924
    - H_2, HD and D_2, vibr. consts. of singlet states 8=43305
    - HCl, second harmonic vibration-rotation band in liq., cubic, orthorhombic phases 8=25929
    - H_2O, bending, "nearly linear" formalism 8=25474
    - H_2O deform. vibrs. characterization by vectors nonperpendicular to bonds 8=29679
    - H_2O, isotopic, force const. displays 8=43302
    - HOF, potential function 8=43299
    - H_2O, D_2O, and HDO. i.r. intensities in solid films 8=36369
    - H_2O, HDO and D_2O in non-aq. solvents, i.r. intensities 8=39377
    - H_2O-H_2O collisions, vibr. transition probabilities 8=34389
    - in $H_3O.NO_3$ crysts., and lattice vibr., n inelastic scatt. obs. 8=35385

- $Mo(CN)_8^{4-}$, spectra and struct. 8=41118
- MoCoB and related $PbCl_2$-type crystals, crystal structure 8=39809
- Mo_3CoSi, crystal structure 8=35342
- Mo-Fe solid soln, precipitation behaviour and lamellae form 8=35115
- $Mo_{13}Ge_{23}$, crystal structure 8=39782
- $MoNb_{15}O_{40}F$, crystal structure 8=44232
- MoO_2, distorted rutile, metal-metal bonding 8=48305
- MoO_3, optical absorpt. and photocond. for films and crysts. 8=32013
- $Mo_3O_4(C_5H_7O_2)(C_2H_5O)_3$, crystal structure 8=26461
- $MoOF_5^{2-}$ ions, X- and Q-band e.s.r. spectra, comparison 8=38911
- MoS_2, lattice parameter meas. 8=44231
- MoS_2, molybdenite, surface point defects and non-basal dislocations 8=35526
- MoS_2, spherically bent cryst., soft X-ray spectroscopy 3 to 30Å 8=32033
- $MoSi_2$ in Cs vapour, e- and ion-emission rel. to other refractory metal cpds 8=27350
- $MoZn_{\sim 22}$, crystal structure 8=44230

Monitoring. See Radiation monitoring.

Monochromators
- See also Filters, optical; Light sources; X-ray monochromators.
- for cathodoluminescence meas., e microprobe monochromator-photomultiplier attachment 8=36463

Monochromators—contd
- constant output, 100 ± 2μW 8=28810
- monochromatic generation by amplitude modulation 8=24355
- neutron, curved-slit chopper 8=24985
- neutron, double reflection appratus 8=24977
- rapid-scan, for analyzing chemical lasers 8=28816
- Seya-Namioka, for vac. u. v. 8=33264
- single, instrument function for partially-coherent illum. of entrance slit 8=24400
- two-beam, with compensating recorder 8=24393
- u. v., spurious obs. of scatt. light 8=28807
- x. u. v., concave-grating mounting 8=28808

Monolayers. See Adsorbed layers.

Monomers. See Molecules.

Monomolecular layers. See Adsorbed layers.

Monte Carlo method. See Statistical analysis.

Moon
- absolute coordinates for 917 lunar features 8=45813
- attitudes, relative, meas. and reduction 8=28142
- basalt in ultra high vacuum, strength characts. 8=41320
- Birt crater, anomaly in length of internal shadow 8=50399
- bow and wake shock waves, hypothesis for absence 8=36997
- capture by earth, theory and geophys. consequences 8=50401
- capture hypothesis 8=36993
- cis-lunar space, zodiacal dust meas. by OGO III and Mariner IV, (1966) 8=37034
- by cosmic rays, nuclide prod. on surface 8=37025
- Copernicus crater, cometary impact origin 8=32526
- crater array analysis 8=28146
- craters, computer simulation 8=45816
- craters, dark-haloed, origin 8=36991
- craters diameter-frequency relation, photographed by Rangers VII, VIII and IX 8=45810
- craters, large, surface density 8=45808
- dimensions and geometric shape, anomalies obs. 8=45802
- diurnal atmospheric tide 8=36992
- earth-moon system, early history from waves in marine sandstones and calcarenites 8=50115
- to earth, return trajectoreis from surface and satellite orbits 8=32375
- eclipse of 1964 Dec. 19, occultation obs. 8=45807
- electrical conductivity 8=37002
- elevation profiles by isodensitometry, Ranger 9 photographs 8=28144
- emission, mm and sub-mm range 8=45804
- Encke C region, crater alignments 8=41554
- γ-ray intensities due to Al^{26}, Na^{22}, Mn^{54} 8=32531
- γ-ray obs. 8=45795
- glows, transient, due to bombard. of surface by solar protons 8=28145
- ground, struct. and mech. props., density of surface layer, meas. from 'Luna 13' 8=36995
- Hamsteed region, crater alignments 8=41554
- Herodotus and Schroter's valley, obs. 8=32528
- hot spots during eclipse, temp. enhancement proportional to crater depth/diam. ratio 8=36998
- interplanetary mag. field, perturbations by lunar wake 8=37031
- interplanetary matter in vicinity, density rel. to halo or passage thro' dust cloud 8=37033
- isodensitometry charting and relative heights meas. 8=28143
- isostatic equilibrium, model 8=32527
- Laser ranging for earth gravitational/inertial mass ratio meas. 8=41748
- libration in longitude, approx. soln. 8=28138
- lunar radial bands, dark, formation 8=45805
- magnetic field in solar wind wake 8=50395
- magnetic field structure in plasma void leeward of solar wind, model 8=41559
- magnetic tail and wake 8=32529
- magnetospheric interaction with solar wind, models 8=41558
- maria and craters rel. to collision with ice 8=45815
- meteorite impact density 8=45814
- meteorite origin 8=50432
- observation when highly illuminated 8=32525
- occultations, tables for 1966 at Sydney Observatory 8=50398
- orbital history and new integrals of motion 8=41556
- outgassing, frequency limit of bursts 8=41553
- phase, effect on amplitude of type Pc stable pulsations, statistical study 8=45565
- photoelectron atmos., density rel. to height, models 8=45809
- photography, earth-based high-resolution 8=28137
- photography, light rays struct. anomalies rel. to craters struct. 8=45801
- photography, techniques and results 8=36994
- Plato J, nature of crater 8=50397
- profile deviations from circle, annular solar eclipse January (1963) 8=28319
- proton and electron intensities in vicinity, meas. from Luna II 8=37060
- radar aperture synthesis, appl 8=32616
- radar astronomy, two-dimens. aperture synthesis and brightness distrib. 8=32524
- radio scattering cross section, models in optical range 8=45803

Moon—contd
- reflection coeff. of upper layer 8=28136
- rille pattern in crater Humboldt 8=37001
- ring structures and nature of maria 8=41555
- sedimentary rocks, obs. evidence 8=32532
- shadow, accuracy estimates 8=45818
- shadowing of energetic particles obs. 8=37003
- soil, particle size distrib. 8=32530
- solar wind, magnetized, free molecule flow 8=37058
- spectra, Fourier i. r. obs. 8=28780
- specular reflection, lunar satellite tracking possibility 8=50394
- star occultation time, effect of gravit. deflection of light 8=32801
- surface 8=45806
- surface characteristics inferred from optical properties 8=50400
- surface, colour opposition effect obs. 8=45812
- surface material size distribution, Surveyor I data interpretation 8=36995
- surface metals distrib., Surveyor V obs. 8=28140
- surface, nocturnal heat sources 8=41557
- surface, photometric props., in situ meas. 8=36999
- surface samples, contamination by lunar module exhaust 8=37000
- surface, thermal behaviour of rock on equator 8=45811
- thermal history, effects of selective melting 8=50403
- three-channel photoelec. spectropolarimeter obs. 8=36921
- topography, grand-based photography under oblique illum. 8=28141
- transient phenomena obs. 8=50396
- transient phenomena, possibility of explanation by gaseous volumes 8=45817
- solar cells and arrays for lunar surface operations 8=24098
- USSR radioastronomical apparatus and obs. 8=32523
- rel. to vertical deviations of astronomical obs. 8=36924

Morse potential. See Kinetic theory; Molecules/intermolecular mechanics.

Mosaic structure. See Crystal structure/microstructure.

Mössbauer effect
- See also Gamma-rays/absorption; nuclear excitation.
- alkali halides, quadrupole splitting, and elec. field gradient at (100) surface 8=30717
- Alni alloys, chem. comp. and magnetization ageing dependence 8=49514
- benzene, supercooled glassy and polycrystalline states, obs. of mol. motion 8=43751
- chalcopyrite, $CuFeS_2$, spectra, 300-448°K 8=26019
- cryostat, demagnetization, ≥ 0.025°K 8=37330
- crystal lattice interference effects 8=48320
- using cryostat, He^3/He^4 dilution refrigerator, for expt. at 0.03°K 8=41880
- cytochrome c, Fe spectra 8=48331
- Debye-Waller factor in single crystal absorbers, obs. 8=39745
- emission from atoms in relaxing localized modes 8=48319
- Faraday effect 8= 45158
- with Faraday rotation 8=45157
- ferrites, Ga substituted, obs. on Fe^{57} 8=30624
- for ferromagnesian silicate abundance in bronzite chondrites obs. 8=45847
- ferro-spinels, quadrupole splitting of spectra 8=43942
- gadolinum garnet: Sn^{119}, effective mag. field change at compensation point 8=49469
- glycerol, supercooled, glassy and polycrystalline states, obs. of mol. motion 8=43751
- ice: Sn(IV), conc. depend. of isomer shifts 8=43957
- iron-stilbene, 3°-310°K. obs. 8=30641
- limonite, study 8=35031
- local environment effect on ang. distrib. of resonantly scatt. γ-quanta 8=39511
- low-temp., closed-cycle He refrigerator 8=46301
- magnetic-field-induced quadrupole splitting 8=43939
- magnetically ordered systems, absorpt. spectra rel. to spin relax. 8=43940
- metallic matrices, of Sn^{119} and Au^{197} impurity, interpret. of isomer (chem) shift 8=48318
- methane I^{129} derivatives 8=48332
- natural line widths of Mossbauer absorbers at variable low temps. 8=30635
- nucleus, refined constitution analysis methods 8=49624
- optics, gamma-ray and x-ray, quantum theory 8=30636
- orthopyroxenes cation distribution determ. 8=48324
- oscillations of separate atoms in system, and effective Debye freq. 8=39509
- paramagnetic and magnetically ordered substs., spectrum rel. to atomic spin time fluctuations 8=30642
- peroxidase and derivs. rel. to spin states 8=29823
- Prussian blue and Turnbull's blue 8=39518
- radiation, rel. to quantized space-time 8=24689
- rare-earth iron garnets: Eu^{153}, rel. to exchange interaction determ. 8=36194
- rare earths, electronic shielding 8=39508
- review of study of nuclear hyperfine interactions in solids 8=48317
- solid solns. order-disorder transforms. effects 8=35032
- solid state applications, review 8=43938
- source Doppler shift, data reduction, graph method 8=38350

Mössbauer effect—contd
- spectra in presence of e.s.r. 8=35030
- spectral parameters and standard errors using least-squares method 8=47044
- spectrometer, velocity calibration, interferometric method 8=37927
- spectrometer, with constant velocities ≤ 30 cm/sec 8=47062
- spectrometer, with constant velocity or constant acceleration 8=47052
- spectrometry, electromech. servomechanism 8=37783
- spectroscopy using high-field superconducting magnets 8=37387
- surface chemistry, review, 8=49902
- time correlation function formalism 8=29386
- zinnwaldite mica, absorpt. spectra 8=43960
- AgCl, Fe impurity ions 8=39510
- Al-Fe alloy, Fe precip. exam. 8=30678
- Al_2O_3:Fe^{57}, heat treatment effects rel. to iron clustering and cation valence states 8=43943
- Au_4V, of Au^{197} rel. to V moment determ. 8=26016
- $BaTi_{0.75}Sn_{0.25}O_3$ solid soln., temp. depend. rel. to dielec. props., —200 - 20°C 8=30639
- $CeSn_3$, of Sn^{119}, phases at 4.2°K 8=43944
- Co^{57} sources, mag., r.f. mag. fields effects 8=43945
- Co complex, bispyridinooobalt(II)dichloride, structural isomers, rel. to intermolecular interaction 8=29837
- β-Co, superparamagnetism obs. 8=49521
- $CoFe_2O_4$, ferrimag. spinel, cation distribs. in octahedral and tetrahedral sites, determ. 8=35035
- Co_2MnSn, Heuser alloy 8=35033
- CoO, containing Fe, multiple charge states 8=39521
- CoO(I) and (II), hyperfine spectra of Fe^{57} below Neel temp. 8=26018
- CoO(I) and (II), rel. to valency states 8=26017
- Cr_2O_3-Fe_2O_3 system, magnetic structure 8=27444
- Cu-Fe alloys, "doublet" line structure 8=39512
- Cu : Fe^{57}, f number and isomer shift pressure dependence 8=48321
- Cu: Fe, rel. to spin compensated state 8=35036
- $CuFe_2S_3$, rel. to antiferromag. ordering 8=40864
- $Cu_{1-x}M_xFe_2O_4$, (M = Cu, Zn, Cd), Fe^{57} resonance, 4.2-1000°K 8=31907
- Cu-Ni-Fe alloys, "doublet" line structure 8=30512
- Dy^{161}, 74.5 keV level, g factor, elec., mag. moment obs. 8=25150
- Dy ethyl sulphate, paramag. relax. 8=27472
- $DyFe_2$, rel. to hyperfine fields at Fe 8=36146
- $ErAl_2$, ferromagnetism and ferromag. relax. study 8=49518
- $ErAl_3$, rel. to Er spin relax 8=31864
- $ErFe_2$, rel. to hyperfine fields at Fe 8=36146
- Eu^{2+} and Eu^{3+}, electron transitions, isotopic shifts and changes in nuclear radii 8=48322
- EuFe garnet, rel. to exchange interactions in sublattice and its magnetization 8=40839
- EuO, hyperfine field study 8=36208
- Eu_3O_4, hyperfine field study 8=36208
- $^{151}Eu_3S_4$, electron hopping obs. by Mossbauer spectroscopy 8=30638
- F^{19}, Coulomb excitation of decelerated ions, probab., calc. 8=42878
- Fe^{57} acoustic sidebands due to r.f. magnetic field 8=39513
- Fe^{57}, Coulomb excitation of decelerated ions, probab., calc. 8=42878
- Fe^{57} γ-rays scattering time distribs. 8=43947
- Fe^{57}, spectrum (I) following Co^{57} decay in AgCl 8=39519
- Fe, b.c.c., of Fe^{57} rel. to isomer shift pressure dependence up to 130 kbar 8=43950
- Fe, charged states in Co cpds., spectra 8=35034
- Fe chromites, phase transformation study 8=35101
- Fe complex, bis(1,2-cyclohexanedionedioxime)Fe(II)XY, XY ligands ataxial posns. 8=30640
- Fe compounds, effect of electronic struct. of Fe atom 8=39514
- σ-Fe diarylene: Fe^{57}, spectra 8=35039
- Fe film magnetic anisotropy meas. 8=31641
- Fe in CoO, Fe multiple charge states 8=39521
- Fe in Cu and Au, Debye-Waller factor obs. 8=39874
- Fe, isomer shift temp. dependence and hyperfine field near Curie point 8=31636
- Fe, of Fe^{57}, effect of high press. to 140 kbars, rel. to $\alpha \rightarrow$ h.c.p. transition 8=43946
- Fe, of Fe^{57}, six-line spectra position analysis 8=48330
- Fe porphyrins, spectroscopy 8=26021
- Fe, pressure dependence, 0-85 kbar 8=43949
- Fe(II) octahedral complexes, $^5T_2$-$'A$, crossover 8=35038
- Fe(III) coordination no. determ. in organic complexes 8=39516
- Fe(III) N, N-dialkyldithiocarbamates 8=48329
- Fe^{2+}, line broadening due to orbit-lattice interaction 8=40921
- Fe^{3+}/Fe^{2+} ratios in phosphate and oxide mixtures, quantitative anal. 8=27778
- Fe_3Al, internal mag. field temp. dependence meas. for two sublattices 8=27410
- $FeAl_2O_4$, rel. to cation distrib. 8=35331
- Fe:Au^{197}, hyperfine structure determ. 8=43948
- Fe-Be system, and mag. props. 8=26024
- Fe-C martensite, during tempering 8=48323

Mössbauer effect—contd
Fe–C martensite, rel. to internal mag. field, Q.S. and isomer shift 8=26020
$FeCl_2$, anomalous temp.-dependence, 10-300°K, low-temp. anharmonicity interpretation 8=48326
$FeCl_2.H_2O$, 3°-310°K. obs. 8=30641
$FeCl_2.4H_2O$, 4.2-0.025°K rel. to mag. props. 8=36211
$FeCl_3$. 3°-310°K. obs. 8=30641
$FeCr_2O_4$, rel. to electronic and mag. props. of Fe^{2+} 8=31726
$FeCr_2S_4$, of Fe^{57}, 60-298°K, effective-field parameters rel. to magnetically induced quadrupole interactions 8=45060
$Fe_{1-x}Cu_xCr_2S_4$, indication of ion existence 8=39515
$FeLiO_2$ (β phase), study 8=26022
Fe-Mn-N alloys, study of high temp. strengthening 8=49019
$Fe(MSO_4)_2$, $M = NH_4^+, K^+, Rb^+, Cs^+$, rel. to crystal field splitting studies 8=26023
Fe_2N composition, study of ϵ and ζ phases 8=30695
$Fe(NH_4SO_4)_2.6H_2O$, of Fe^{57}, quadrupole hyperfine anisotropy determ. 8=43951
$FeNH_4(SO_4)_2.12H_2O$, spectrum, rel. to atomic spin time fluctuations 8=30642
Fe Ni alloys, exchange anisotropy 8=48328
γ Fe–Ni alloys, low Ni conc. 8=48333
Fe-Ni single crystal 8=35037
α-Fe_2O_3, superparamagnetism obs. 8=49521
$Fe(OH)_2$, Fe^{57} rel. to mag. fields at 4.2°K 8=39517
$FePd_x$, (x = 3.1), Fe^{57} hfs temp. dependence near Curie temp. 8=45015
Fe-Pd alloys, dil. hyperfine field at Fe, mag. field dependence 8=36081
Fe–Ru alloys, mag. susceptibility 8=49481
β–$FeSi_2$, space group symmetry determ. 8=48325
Fe_5Si_3, C-stabilized, mag. moments and hyperfine interactions 8=31621
Fe_2TeO_6, transition temp. determ. 8=49457
Fe_2TiO_4, spectra for electronic structure, 4.2-800°K 8=48327
FeV_2O_4, rel. to electronic and mag. props. of Fe^{2+} 8=31726
$Gd^{155,157}$ rel. to ratio of quadrupole moments and isomer shifts 8=33930
Ge^{73}, coulomb excited after recoil implantation 8=39525
$GeFe_2O_4$, rel. to electronic and mag. props. of Fe^{2+} 8=31726
GeI_4, I^{129} transition 8=39520
$HoFe_2$, rel. to hyperfine fields at Fe 8=36146
$I^{129}CN$ 8=30643
IBr, ICl, I_2Cl_6, using I^{129}, chem. bonding 8=35040
IBr, ICl, I_2Cl_6, using I^{129}, lattice dynamics 8=35041
Ir^{193}, no evidence for T-violation 8=25156
K^{40}, nuclear props. and target Debye temp. calcs. 8=42859
$K_3Fe(CN)_6$, h.f.s. and internal mag. field, 0.025-0.04°K 8=37330
$K_4Fe(CN)_6$, radiation scattering by nucl. resonance, diffr. and interference effects 8=26025
Kr^{83} with Se^{83} sources 8=43952
$LiAl_{5-x}Fe_xO_8$, spectra 8=43953
$MgFe_2O_4$, rel. to Faraday effect 8=45158
$MgFe_2O_4$ super paramag. precips in MgO, spectroscopy 8=31729
Mg_2SnO_4-$MgFe_2O_4$, hyperfine structure of absorption spectra 8=40738
$MnFe_2O_4$ 8=43954
Mn-Zn ferrites, hyperfine fields 8=35042
$Mn_{0.625}$-ZnY ferrites, rel. to hyperfine mag. fields and elec. quadrupole interactions 8=36198
NaCl, Fe impurity ions 8=39510
Ni superparamag. particles: Fe^{57}, spectral dependence on temp. and mag. field 8=36161
Ni, of Fe^{57}, effect of high press. 8=43946
$NiFe_2O_4$ superparamag. particles of Fe^{57}, rel. to hyperfine splitting in mag. field 8=36160
$Ni_{1+x}Ga_xFe_{2-2x}O_4$, internal fields at two sites, determ. 8=36193
Np^{237}, isomer shift and hyperfine splittings of 59.6 keV resonance 8=43955
Np^{237} spectrum after α-decay of Am^{241} in Th lattice 8=42929
Pt-1 at% Co(Fe) alloys, plastic deformation effects 8=31327
$RbFeF_3$:Fe^{2+} octahedral, magnetically induced elec.-field gradients Mossbauer determ. 8=31794
$RbFeF_3$, Fe^{57} hyperfine field determ. 8=31795
Sb halides, trivalent, isomer shifts of γ line 8=43956
SiI_4. I^{129} transition 8=39520
SmFe garnets, 85-600°K, rel. to mag. props. 8=36196
SmFe garnet, Sm^{3+} mag. moment and hyperfine field temp. dependence 8=31740
SmFe garnet, Sm^{3+} mag. moment and hyperfine field temp. dependence from Mossbauer effect 8=31740
$SmFe_2$, rel. to hyperfine fields at Fe 8=36146
Sn cpds., isomer shifts and nuclear radius change 8=26026
β-Sn, line shift during phase transform. under pressure 8=43941
Sn^{119}, resonant radiation, diffraction on electrons and nuclei, obs. 8=48334
SnTe, of Sn^{119} and Te^{125}, rel. to Debye temp. determ. 8=44344
SnX_4, (X = Cl, Br, I, H, Li, Na), Sn^{119} isomeric shift dependence on at. radius of X 8=30637
$SrTiO_3$:Fe^{57}, rel. to iron sites in lattice and oxygen vacancies 8=43958
$TbFe_2$, rel. to hyperfine fields at Fe 8=36146
Te^{125} hyperfine structure in Fe-rich (ferromag.) mats. 8=26027
Ti : Fe^{57}, f number and isomer shift pressure dependence 8=48321
$TiFe_{1-x}Co_x$:Fe^{57}, line profile comp., temp. and stoichiometry dependence 8=31921
Tm cpds, rel. to structure determs. 8=43959
Tm metal, hyperfine structure analysis below Neel temp. 8=30644
Tm^{169}, shift rel. to internal conversion 8=39226
V : Fe^{57}, f number and isomer shift pressure dependence 8=48321
W^{183}, following Coulomb excitation with protons 8=47262
Xe chlorides: Xe^{129} 8=30645
$Y_{2.1}Ca_{0.9}Fe_{4.1}Sn_{0.9}O_{12}$, effective mag. fields at Fe^{57} and Sn^{119} nuclei, rel. to nonmag. Sn^{4+} conc. 8=36197
YFe garnets, 85-600°K, rel. to mag. props. 8=36196
Y-Sn alloys. at room and liq. N_2 temp. 8=35043
$ZnY(Ba_2Zn_2Fe_{12}O_{22})$, rel. to hyperfine mag. fields and elec. quadrupole interactions 8=36198
$(ZrCo_2)_x(ZrFe_2)_{1-x}$ alloys, hyperfine field distrib. determ. 8=31712
Multiple stars. See Stars.
Muonium
coupling of muonium to antimuonium, probability and weak interact. calc. 8=42481
e. s. r. rates close to splitting freqs., rel. to residual polarization 8=38773
quenching of hyperfine resonance and polarization of bound muon rel. to O_2 and NO conc. 8=42482
Muons
arrival time distrib. in e.a.s. 8=38189
charge ratio in e.a.s. 8=38184
component in centre of e.a.s., fluctuations 8=38185
component in centre of e.a.s., lateral distrib. 8=38187

electron pair prod. in nuclear field 8=38257
flux meas. in cosmic ray burst 8=38134
high-energy in e.a.s., obs. 8=38186
lateral distrib. in e.a.s., obs. 8=38194
low-energy, in e.a.s. obs. 8=38182
magnetic moment, anomalous, suggested boson-lepton pair couplings 8=29102
magnetic moment, anomalous as test for q.e.d. 8=29099
magnetic moment, anomalous rel. to existence of neutral vector boson 8=42361
magnetic moment, using pion form factor data 8=24737
mass, evidence 8=29099
mass relationships, tamaid-bach theory 8=24629
moment, anomalous magnetic, and Lamb shift in H atom, hadronic contrib. 8=37944
μ^+-mesons depolarization in media, muon mechanism 8=38773
μ^+, polarization in various media, and relax. of spin 8=37943
number in e.a.s., probability distrib. functions 8=38213
polarization from $K^{\circ}_{\mu 3}$, Reξ meas. 8=42567
polarization meas. in $K^+ \rightarrow \pi^{\circ} + \mu^+ + \nu$ 8=24817
spin, evidence 8=29099
theoretical survey, decay and capture processes 8=24735
Mu–Ni alloys, electronic structure of Ni atoms 8=49744
capture
μ^-, by He^4, total capture rate 8=29229
radiative, angular correl. calc. 8=25214
Ca, n ang. distrib. asymmetry obs. 8=29416
Ca, n spectrum 7.7-52.5 MeV obs. 8=29415
He^4, μ^- capture rate obs. 8=38460
S, n ang. distrib. asymmetry obs. 8=29416
S, n spectrum 7.7-52.5 MeV obs. 8=29415
Si, n ang. distrib. asymmetry obs. 8=29416
Si, n spectrum 7.7-52.5 MeV obs. 8=29415
decay
electron spectrum, low energy, exact 8=29100
energy losses due to pair prod. 8=24738
μ^+ spectrum, low-energy end, obs. 8=24736
$\mu^{\pm}$ and μ^- in Cu, comparison of spectra 8=42478
$\mu^{\pm}$ in Cu, spectra comparison 8=29101
$\mu^{\pm}$, leptonic, T-violating effects 8=33567
underground decay, identification 8=38150
detection, measurement
spectrograph, cosmic ray bursts in iron, interpretation 8=38221
interactions
cosmic-ray, high-energy nuclear and e.m., obs. 8=38255
and e.m. stucture 8=24739
inelastic, 5 GeV/c, in emulsion 8=25213

Muons—contd
- **production**
  - cosmic ray N induced showers, 10^{12}-10^{14} eV 8=29250
  - cosmic ray, prop. rel. to shower size 8=29244
  - cosmic rays, spectrum obs. direct prod. not confirmed 8=25037
  - $\mu^+\mu^-$ asymmetric pairs, photoprod. on H rel. to quantum electrodynamics breakdown, 850 MeV 8=33647
  - $\mu\bar{\mu}$ pair, from W decay and πN, NN reactions 8=38022
- **scattering**
  - in emulsion, single, 5 GeV/c, distrib. obs. 8=25212
  - large-angle, by e. m. and photonuclear interactions 8=38254
  - $\mu^{\pm}$e, counter expt. 8=42479
  - μ-p, elastic, high momentum transfers, rel. to μ-e e.m. differences 8=42480
  - by nucleus 8=29099

Music. See Acoustics/musical.

Musical instruments
- clarinet, resonance freq. plotting 8=37269

Navier–Stokes equations. See Flow; Hydrodynamics.

Nebulae
- See also Galaxies.
- absorption in M17 direction 8=32482
- Andromeda, ellipsoidal subsystem of globular clusters 8=32477
- collisionally excited, effect of diffuse ionizing radiation 8=50340
- Cometary, S130, condensations i. r. emission and gas density, 1.6–21 μ 8=45783
- Crab, γ-spectrum obs. 8=45796
- Crab, linear polarization at 4170 and 6390 MHz 8=36961
- Crab, mechanism of ion accel. 8=41522
- Crab, neutron star mass infall as source of cosmic rays 8=45676
- Crab, obs. of γ-rays 8=45799
- Crab, radiobrightness distrib. at f=535 MHz, and centre of gravity 8=32483
- Crab, X-ray obs. 8=45720
- Crab, X-ray obs. 8=45776
- Cygnus X region II, obs. at 610.5 MHz 8=41544
- diffuse, review of obs. and theory 8=28089
- diffuse, stretched dark canals form. rel. to magnetogravit. instability 8=45714
- galactic, interstellar absorpt. obs. 8=28098
- gaseous, e temp. from Balmer decrement obs. 8=45718
- gaseous, e temp. from continuum-to-line ratio obs. 8=45719
- gaseous, radio emission rel. to distance and exciting star characts. 8=32484
- H II region temp. calc. 8=28091
- H II regions, 4170 MHz radio obs. 8=32493
- H II regions, optical obs. of H_α emission 8=32494

Nematic phase. See Liquid crystals.

Neodymium
- in complexes, fund. level splitting obs. 8=29623
- glass laser, band narrowing with passive shutter 8=24345
- glass laser, electro-optical modulation of Q-factor 8=24342
- glass laser in Fabry-Perot resonator, polarized emission 8=42111
- glass laser, single-mode, waveguide type 8=24346
- glass laser, with unstable resonator, props 8=46625
- ion in silicate glass, stimulated emission 8=36512
- laser, and ruby, beam superposition in freq. mixing 8=24333
- laser, glass, coupled, three-mirror system 8=37619
- laser, glass, energy characts. of radiation with Q switching 8=24348
- laser, plane mirror resonator, spectral effects 8=24287
- laser, resonator nonlinearity rel. to radiation flux 8=33227
- laser, selective resonator, spectral effects 8=24289
- laser, self-focusing of 1.06μ radiation 8=24347
- laser with external tilted mirrors, field genesis and structure 8=37608
- laser, with plane mirrors, internal modulation 8=33228
- self-focusing produced in laser 8=36310
- Nd-doped YAG laser, single-mode, static and dynamic behaviour 8=46626
- Nd glass laser, parameters determ. 8=24343
- Nd(III) liq. room-temp. laser 8=46632
- Nd^3 in glass, fluorescence, concentration quenching 8=41206
- Nd^{3+} activated subs, stimulated emission studies rel. to laser generation 8=37595
- Nd^{3+}, approx. analytical wavefunctions 8=38674
- Nd^{3+} doped calcium fluorophosphate, laser characts. 8=37620
- Nd^{3+}, electronic Raman effect in garnets 8=27612
- Nd^{3+} in CaF_2, ions in sites of tetragonal symmetry, direct one-phonon spin-lattice relaxation times 8=40938
- Nd^{3+} in CaF_2, spin-lattice interactions in uniaxially stressed crystal, e.s.r. obs. 8=40939
- Nd^{3+} in ethyl sulphate lattice, mag. anisotropy and field parametrization 8=43932
- Nd^{3+} in LaF_3-SrF_2, induced emission at 300° K 8=27579
- Nd^{3+} in tetragonal YVO_4 crysts., induced emission at 300° K 8=33229
- Nd^{3+} laser, spectroscopic investigations of stimulated radiation 8=46621
- Nd^{3+} spectra in Y_2O_3 and Sc_2O_3, Stark splitting scheme and $^4F_{3/2}$ lifetime, 4.2–293°K 8=32017
- $Nd^{3+}SeOCl_2$ liquid laser, self-Q-switching 8=46633
- Nd^{3+}-$SeOCl_2$ liquid laser stimulated emission in $^4F_{3/2} \rightarrow {}^4I_{13/2}$ transitions 8=46628
- Nd:YAG laser, picosec. pulses, obs. 8=37618
- Nd:YAG laser repetitively pump-pulsed, dynamics 8=46623
- Nd:YAG laser, thermal effects and transverse mode control 8=28708
- Nd:YAl garnet, mode-locked laser 8=46622
- in Pd-Ag alloy, resistance anomaly 8=31326
- $SeOCl_2$:Nd^{+3}, absorption cross section for laser transition 8=46624
- $SeOCl_2$-Nd^{3+} liquid laser, Q-switched, 20°C 8=37623
- YAG:Nd, CW laser transitions at room temperature 8=46627

Neodymium compounds
- glass, birefringence dependence on laser pumping pulses 8=41125
- glass laser, use of spherical pumping reflector 8=46598
- monochalcogenides, antiferromag. props., 4-1300°K 8=31761
- Nb-Ta alloys, oxidation kinetics, 550-1050°C 8=36566
- Nd-alkali metal tungstates, hydrothermal synthesis and morphology 8=26259
- Nd glass, generation and amplification of light pulses 8=41126
- Nd glass stimulated emission spectrum and quasi-continuous generation, 4.2°K 8=36503
- Nd nitrate soln, electrophoretic behaviour of monodisperse polystyrene latex particles 8=49923
- Nd(III) complex of nitrilotriacetic acid, crystal structure 8=26415
- NdB_6, magnetic susceptibility, transitions 8=40873
- NdC_4, atomization energy 8=47705
- $NdCl_3$, fluorescence obs. rel. to annihilation between excited states of Nd^{3+} ions 8=41205
- $NdCl_3$ Rb–D_2 filter for student optical pumping expts. 8=42196
- $NdCo_5$ and Nd_2Co_{17} films, magneto-optic and mag. props. 8=32018
- $NdFeO_3$, mag. anisotropy 8=31733
- Nd-H system, Hall effect and cond. 8=49141
- $Nd_2W_2O_9$, structure and hydrothermal synthesis, obs. 8=39636

Neodymium compounds—contd
- NdWO$_4$Cl, synthesis, struct. and thermal decomp., obs. 8=39815

Neon
- afterglow plasma, conversion rates and ion velocity 8=43480
- arc, low-voltage mode in plasma diode, predominant ionization and loss mechanism 8=47779
- atomic collisions, Ne-Ne, Ne$^+$-Ne, Ne^{++}-Ne, prod. of fast electrons obs. 8=39018
- atom, double resonance in He-Ne laser operating at 6328 Å π transitions 8=47502
- atom, Hartree-Fock calc. refr. index, dynamic polarizability and Verdet coeffs. 8=47485
- atom, low-energy e scatt., data analysis 8=25385
- atom, Ne, 2p^6, 2p^{5}3s, 2p^{5}3p, 2p^{5}4s states, wave functions 8=29624
- atomic levels in Zeeman laser, g value meas. 8=43198
- atomic transition probabilities determ. by Faraday effect 8=38676
- atoms, excited, collisional disalignment 8=34183
- atoms, $2p_4 \rightarrow 1s_4$ spontaneous emission along axis of He-Ne laser 8=25363
- atoms, $^3P^0$ and $^1P^0$ populations time dependence during post-luminescence under c. m. wave pulses 8=38686
- atoms, radiative transition probabilities 8=34146
- discharge, d.c. glow, connection between moving and standing striations 8=47758
- discharge, h.f., electron energy distribution 8=43457
- discharge, positive column, Bremsstrahlung emission 8=29898
- discharge tube, noiseless 8=47746
- discharge, 2-32 mm Hg, steady state positive column plasma 8=29899
- discharges, microwave and h. f., energy distrib. of electrons and positive ions in plasma 8=25692
- with dissolved H normal solns., surface tension, 24. 59 to 29°K 8=43780
- energy widths of X-ray levels 8=29649
- fluorescence, $^2P_4$ emission under laser reson. illum., 6328Å 8=38675
- gas, Fe particles dispersed, absorpt. spectra including carrier gas contrib. 8=25968
- glow discharge, ionization waves, effects of cooling 8=47757
- glow discharge, 1. 35-2. 6 torr, 0. 5-2. 5 mA, dynamics 8=34420
- glow discharge, normal cathode fall 8=34422
- incorporation in solidifying enstatite melts 8=34972
- ion mobility and reaction rate obs. 300°K 8=39049
- ion refl. from Cu single crystal 8=48918
- ionically pumped on glass, desorption temp. dependence 8=48485
- ionization growth times analysis 8=29912
- ions Ne$^+$, charge exchange with Ar, Kr, N$_2$, O$_2$ and CO$_2$, 2-250 eV 8=38758
- laser, He-Ne, population inversion condition 8=24312
- laser, superradiant 5401Å pulsed, coherence props. 8=28691
- lattice thermal cond. calc. 8=39940
- liquid, 24. 6 to 27°K, sound velocity meas., Debye-Sears method 8=25913
- microwave breakdown at 9 GHz 8=47768
- nonlinear absorber, for mode locking of He-Ne laser 8=37588
- optically pumped, 3S$_2$ level relax. rel. to theory of multiple coherent scattering 8=43224
- photoabsorption of K$_\alpha$ X-rays, double e ejection 8=38714
- plasma, interferometric meas. in 8mm band 8=38989
- plasma, negative conductivity 8=25733
- primordial, diffusion in Fayetheville meteorite 8=37024
- Rayleigh scatt. and atomic e. m. susceptibility 8=25375
- Rutherford scatt. of H and H$^+$ 8=38754
- solar emission spectrum obs. 8=28165
- solid, anharmonic contrib. to entropy 8=35431
- solid, compression up to 20 kbar at 18°K 8=26836
- solid, ground-state energy 8=48709
- solid, model potentials 8=35389
- solid, pair pot. calc. 8=30615
- spark, laser-prod., expansion mechanism, obs. 8=34432
- spectral radiation intensity, shock-tube heated 8=24399
- thermal cond. 8=47956
- 3P$_4$ level lifetime in He-Ne laser 8=34184
- Zeeman effects for large quantum no.s and freqs. 5-20 MHz 8=47501
- Ar II transition probabilities and continuous spectra meas. 8=43179
- Br$^-$ ions collision with atoms, detached electrons energy obs. 8=29972
- Cl$^-$ ions collision with atoms, detached electrons energy obs. 8=29972
- He-Ne plasma afterglow kinetics 8=30080
- I$^-$ ions collision with atoms, detached electrons energy obs. 8=29972
- Ne^{20} ions, 21 MeV, radiation chemical studies 8=41289
- Ne I solar isoelectronic sequence, spectral resonance line strength 8=45871
- Ne I, 3p level, lifetime meas. using ion beam 8=29645
- Ne IV-VIII solar emission lines obs. and abundance determ. 8=50443

Neon—contd
- Ne IX plasma, 2-proton continuum emission 8=29599
- Ne-Ar mixture, concentration diffusion coeff., meas. by two-bulb method 8=34678
- Ne-Ar mixtures, thermal diffusion 8=39239
- Ne-CO$_2$ mixtures, thermal diffusion 8=34679
- Ne-Kr mixture, thermal diffusion and intermolec. forces 8=34675
- Ne-Li plasma, shock wave structure 8=30046
- Ne-O laser, O 3^{3}p level population inversion mechanism, obs. 8=28692
- Ne-O$_2$, phase equilib., from 63°-152°K at 5000 psi 8=34981
- Ne-Xe mixtures, thermal diffusion 8=39239
- Ne + He + CO$_2$ system, thermal diffusion 8=30320
- with NH$_3$, thermal cond., 273-1173°K 8=47962
- Zn 3075. 9 Å, perturbation of resonance line 8=47512

Neon compounds
- NeAr, interatomic potential 8=29749
- Ne-He mixture positive column, region of Pupp current limit 8=34421
- NeI, eigenvectors of configuration (2p)^5(3p) and rel. probabilities of 2s-2p transitions 8=25362
- Ne-N liquid-vapour phase equilib., density and supercritical excess vols., 66-114°K and < 8000 lb in^{-2} 8=30592

Neptunium
- Np^{237}, Mossbauer resonance, 59. 6 keV, isomer shift and hyperfine splittings 8=43955
- Np^{237} resistivity, low-temp., α self-irrad. effects. obs. 8=31322

Neptunium compounds
- NpF$_6$, electron diffr. and molec. struct. 8=38858

Neutron diffraction crystallography—contd
dynamic interference theory for thermal neutrons, and exptl. results 8=48629
high-pressure apparatus and appls. 8=26361
line broadening effects, separation by means of line-width relations 8=45147
polarized slow n-diffractometer, flipper-chopper operation 8=26360
powder data, computer indexing 8=44188
tapiolite and synthetic trirutile substances 8=48614
time-of-flight method for structure investigations on fast-pulsed reactor IBR 8=26358
time-of-flight powder diffractometry, intensity and resolution calcs. 8=26359
α-Ti and O mixed crystals, hydrogenation 8=35357

Neutron diffraction examination of materials
antiferromagnetics, with easy plane, slow scatt. rel. to magneto-elastic coupling 8=40855
antiferromagnets, critical mag. scatt., theory 8=36096
carbon tetrachloride 8=34761
cynostat, He for use 3°-300°K 8=39763
ferromagnetics, with easy plane, slow scatt. rel. to magneto-elastic coupling 8=40855
ferromagnets, critical mag. scatt., theory 8=36096
γ-oxygen, vapour-condensed, (200) and (210) faces 8=26260
liquids, struct. and transport props., scatt. studies compared with X-ray methods 8=30402
metal sheet texture determ. 8=35261
metals, liquid, structure factor 8=43757
magnetic fluctuations, critical 8=31481
magnetic moments in crystals, local distrib. 8=31643
moment fluctuations, temporal 8=31516
rare-earth oxysulphides, mag. structures 8=40869
scattering, time-of-flight meas. by mag. pulsed beam 8=35314
small angle scatt. on lattice distortions, advantages to X-ray scatt., and techn. 8=26355
solid solns., disordered, monophonon scatt. 8=35379
solutions, liq., x-ray and n diffr. methods 8=34763
$Ba_{0\cdot15}Ca_{0\cdot85}MnO_3$, at. mag. structure 8=40859
Bi, liq., structure factor 8=48062
$Ca_2Fe_2O_5$, magnetic structure 8=31759
$CoCr_2O_4$, mag. structure determ. 8=31721
CoF_2, rel. to mag. excitations near Neel pt. from n. scattering meas. 8=31762
$CoMn_2O_4$, mag. structure, low-temp. determ. 8=31722
Cr, magnetic props., pressure and mag. field dependence n-diffr. exam 8=31766
CrX_3, (X = Br, F), rel. to paramagnetism 8=31521
$CuCr_2Se_3Br$, ferromag. props. from n-diffr. exam. 8=31606
$DyAlO_3$, nuclear and magnetic structure 8=48647
DyC_2, mag. struct. 8=40865
$ErAl_2$, mag. struct. 8=31611
Fe, susceptibility above Curie temp., temp. depend. 8=40812
Fe-Ni alloy, rel. to spin wave dispersion relation 8=31624
Fe_2O_3, spin-wave excitation-energy changes 8=31638
α-FeOOH, crystal and mag. structures, —190 to 120°C 8=30894
H bonding, from n. scattering by protons, double potential well model rel. to solids study 8=35017
H_xWO_3, same crystal structure as $Na_{(0\cdot1)}WO_3$ 8=35336
K_2ICl_5, mag. ordering from n. diffr. exam. 8=40870
K_2ReBr_6, mag. ordering from n. diffr. exam. 8=40870
K_2ReCl_6, mag. ordering from n. diffr. exam. 8=40870
$LiClO_4.3H_2O$, struct. by n diff. exam. 8=35339
$MgCr_2O_4$, mag. structre 8=45063
Mn–Cu null-matrix alloy 8=44195
$MnCr_2O_4$, mag. structure determ. 8=31721
MnO, low-angle, covalency parameters 8=30617
α-MnS, low-angle, covalency parameters 8=30617
$MnSn_2$, antiferromagnetic, rel. to structure transitions 8=31779
NH_4Cl, long range order parameter in order-disorder transitions 8=44242
Nb hydrides (deuterides), structure and phase transitions 8=39725
Ni_3Fe, near order from n. -scatt., 8=39531
NiO, low-angle, covalency parameters 8=30617
Pb, liq., structure factor 8=48062
α-PbN_6 8=30908
Si slices, impurities distrib. 8=40014
Sn liq., structure factor 8=48062
$TbAg_2$, mag. struct. 8=40877
$TiFe_xCo_{1-x}$ alloys, structure and mag. props. 8=30912
Ti_2O_3, rel. to mag. phase 8=31800
Tl, liq., structure factor 8=48062
U_3O_8, antiferromag. struct. study 8=31801
V_2O_3, rel. to mag. phase 8=31800
Zn, liq., structure factor 8=48062

Neutron sources. See Neutrons/production.

Neutron spectra
accelerator stray neutrons, < 0.5 and up to 200 MeV 8=33824
anisotropic, determ. from p recoil tracks 8=47161
d(p, n)2p, Ep = 45.5 MeV obs. 8=43017
from foil activation data, tech. using linear eqns. representing differential flux 8=29209

Neutron spectra—contd
in heavy gas, thermalization, with nonuniform temp. distrib. 8=29556
in multiplying assemblies with pseudo fundamental mode behaviour, puked spectra 8=38563
nucleon-meson cascade, theory appl. to accelerator shielding 8=24964
perturbed thermal, Laguerre expansion coeffs., activation meas. 8=33775
polarized, anal. using time-const mag. fields, expt. checking 8=38069
in polyethylene, thin slabs 8=24968
reactor, "cold" n segregation technique 8=24975
resonance, area, analysis, self-indication corrections 8=24982
resonance, area analysis, self-indication method 8=24981
resonance self-screening technique, epithermal 8=34109
scattering, polarization-dependent, spin-flip chopper meas. 8=47174
slowing down energy spectra of fast n from fission source 8=38584
threshold detector data anal. 8=38070
threshold detectors, "appropriate" solutions 8=24984
Ag thickness transmission meas. 8=24980
Al, results from thres-axis crystal spectrometer 8=33827
Am–Be source 8=24974
Am^{241}–Be^9 sources, p-recoil spectrometry with shaped converter foil, obs. 8=33784
$Be^9(\alpha, n)$ sources, calc. for Am^{241}, Po^{210}, Pu^{239} α-emitters 8=38515
Ca, μ capture, 7.7-52.5 MeV obs. 8=29415
Cf^{252} spontaneous fission fragments 8=25278
D plasma, ion component diagnostics 8=34512
$Er^{164,166,167,168,170}$, n resonance obs. 8=25153
Mo^{94}, isobaric analogue resonances 8=29320
$O^{18}(p, n)F^{18}$, E_p = 5.0 MeV, n time-of-flight spectrometry for O^{18} determ. 8=32149
Po-B source, and γ spectrum, fast-slow n-γ coincidence obs. 8=33783
Po–Be source, and γ spectrum, fast-slow n-γ coincidence obs. 8=33783
PuF_4 source, obs. 8=42650
in $Pu^{238}O_2$ 8=34099
S, μ capture, 7.7-52.5 MeV obs. 8=29415
Si, μ capture, 7.7-52.5 MeV obs. 8=29415
$U^{235,233}$ and Pu^{239}, thermal n fission, comparison for 0.8 to 16 MeV 8=38536

Neutron spectrometers
for accelerator stray n dosimetry, <0.5 and up to 200 MeV 8=33824
calibration and resolution determ., Bragg break meas. method 8=47171
correlation chopper, mechanical, expt. test 8=47170
crystal, three-axis design 8=33827
γ discrimination by scintillation decay time, circuit, $E_n \geqslant 0.2$ MeV 8=33384
improvements for quasi-elastic scatt. 8=24983
monochromator, curved-slit chopper 8=24985
polarized, accuracy with scatt. vectors not ⊥ mag. field 8=47175
p-recoil, organic scintillator, 0.4–18 MeV 8=33823
p-recoil, with shaped converter foil 8=33784
pulse shape discrimination system 8=33818
from recoil tracks, determ. 8=47161
resolution and intensity, Monte Carlo simulation 8=33826
stilbene response to internally generated protons 8=47169
stilbene scintillation with γ discrimination, $E_n \geqslant 0.1$ MeV 8=33821
stilbene scintillation, with γ discrimination, 1–10 MeV 8=33822
scintillation, double-summation with γ discrimination by scintillation decay time 8=47168
time-of-flight, buffer memory design 8=47172
time-of-flight data recording, synchronous drum store 8=47155
time-of-flight, for detecting neutrons in energy region from 10 to 100 MeV 8=47166
time-of-flight, for isochronous cyclotron 8=47167
triple-axis, for reactor inelastic scatt. 8=33828
Ag thickness transmission meas. 8=24980
C^{12} recoil meas. of n scatt. asymmetry 8=29457
$CaCO_3$ monochromator, crystal structure props. 8=42651
He^3 90° instrument 8=47173
He scintillation, with sodium salicylate wavelength converter, 14 MeV 8=33825
Li^6 sandwich semiconductor detector 8=38083
Li^6 semicond. sandwich type, efficiency calc. by Monte Carlo tech. 8=38084

Neutrons and antineutrons
See also Cosmic rays/neutrons; Nucleons and antinucleons.
beam prod., magnetically pulsed for scatt. expts. on crystals 8=35314
cross-section from nd high energy interaction 8=42645
damage flux in critical assemblies, rel. to inpile thermionic reactors 8=28504
decay constant, prompt in critical state of heavily reflected reactor 8=47377
double reflection monochromator 8=24977

Neutrons and antineutrons—contd
electric dipole moment, T nonconservation effect 8=42325
electric dipole moment, upper limit from mag. resonance expt. 8=42644
electric form factor threshold values depend. on d wave function 8=47139
excitation functions in low energy V^{51} (p, n) Cr^{51} reaction 8=33998
flux distributions space-time/energy in infinite homogeneous media 8=42643
flux profiles, fast and thermal, comparison from bucklings in UO_2 assembly 8=43138
flux ratios in tangential channels in reactor 8=34093
form factor, magnetic rel. to quasielastic e-d scatt. 8=24722
half-life, rel. to cosmological He prod. 8=24945
high energy expts. at CERN development 8=33624
liquid, bubbles due to zero-point motion of positronium atoms 8=30388
mechanical high transmissin selector of vels. 8=29201
models, non-relativistic 8=29016
n^3 bound state search 8=43039
neutron-proton mass difference, Cottingham formula 8=42630
n-γ, flux and Kerma distance depend., counter and Na activation obs. 8=33771
noise in reactors with external control loop 8=38589
nonlinear reactor kinetics, stability anal. for equilib. states 8=43134
n, p, single particle states similarity at same mass number 8=42815
in nuclear reactors, importance, thermal and total, theory and meas. 8=43137
optics of slow neutron beams 8=47143
Pauli's hypothesis, interaction, and one- or two-ν problem 8=24646
p-n mass difference 8=38058
population fluctuations in reactors, Monte Carlo anal. compared with one-mode model 8=38553
prompt n time const., reln. with stable reactor period in ANNA assembly 8=34091
pulsed reactivity expts in reflected reactor, interpret with Cohn model 8=43139
radius of distribution of Pb^{208} 8=33937
in reactor, number fluctuations 8=38552
resonance parameter correlations 8=25234
resonances, numerical determ. 8=24971
secondary, from 400—660 MeV proton bombard., on nuclei obs. 8=25219
shielding of fast sources, reduction in weight 8=29206
strange rel. to Cabibbo theory 8=24708
structure, rel. to quasi-elastic e-d scatt. 8=47084
transport, complementary variational principles appls. 8=33328
tri-neutron, non-existence, obs. 8=38383
velocity selector 8=47159
wave propag. along axis of infinite prism, dispersion law 8=38583
Ag nucleus, peripheral n excess, K^- capture obs. 8=34022-3
Br nucleus, peripheral n excess, K^- capture obs. 8=34022-3
absorption
See also Nuclear excitation; Nuclear reactions due to/ neutrons.
Albedo and Milne's problem 8=29550
body dose rel. to counter obs., isotropic fast flux and beam 8=38072
capture cross-section curves, automatic decomposition to Breit-Wigner terms 8=29194
concrete shielding for D-T neutrons 8=29199
cross sections, total, for 14.7 MeV neutrons 8=47148
dose in human phantom, distrib., obs. 8=38074
dose in tissue-equiv. human phantom, $\leq$ 5 MeV 8=38073
dose in tissue-equiv. human phantom, calc., 100 eV-10 MeV 8=38075
fuel rod lattice, reson. absorpt., calc. 8=34086
hydrocarbons, linear energy transfer, 14 MeV 8=43033
local pile oscillator, epithermal, calibration 8=38077
Milne problem, thermal-n in absorbing medium, arbitrary scatt. kernel 8=38574
moderators, wide reson., intermediate reson. integral, exact soln. 8=38571
MUFT programme, inclusion of Doppler broadening 8=43132
properties, use for radiography 8=46769
pulse decay in slabs and spheres 8=47376
in reactor lattices, resonance absorption, Boltzmann integral eqn. 8=29551
resonance absorpt., rapidly convergent iterative soln. 8=24970
resonances in slab lattice, interferences and flux depend. on lethargy and space 8=38582
scattering anisotropy correction, in transport theory 8=29200
in tissue and equivalents, Kerma calc., 0.1-10 MeV 8=33772
by d, thermal, zero-range approximation theory 8=29219
Sb, resonance parameters 8=47331
Sb^{121}, Sb^{123}, thermal capture cross section 8=29478
U^{237} cross-section 8=29481

Neutrons and antineutrons—contd
absorption—contd
U^{238} by 6.7 and 192 eV resons., exact calc. 8=38571
U^{228}-metal fuel rod lattice in H_2O and C, intermediate reson. absorpt. calc. 8=34086
$U^{238}O_2$ fuel rod lattice in H_2O and C, intermediate reson. absorpt. calc. 8=34086
angular distribution
cyclotron meas., accidental coincidence background reduction 8=29005
d(p, n)2p, Ep = 45.5 MeV, obs. 8=43017
4 MeV from nuclei, optical model analysis 8=29451
in reactor, appl. of space angle synthesis by simple approx. 8=38561
$Be^9(\alpha, n)C^{12}$, E_α = 6-10 MeV, obs. 8=43079
C^{12} scatt., E_n=15.85 MeV, obs. 8=29458
Ca, μ capture, asymmetry obs. 8=29416
$Ca^{42}(d, n)Sc^{43}$, E_d=5.15 MeV, obs. 8=34034
Fe reson. scatt., 1-2 MeV 8=29462
He target, E_n = 0.2-7.0 MeV, obs. 8=24957
S, μ capture, asymmetry obs. 8=29416
Si, μ capture, asymmetry obs. 8=29416
t(d, n)He^4, n energy dispersion obs. rel. to accelerators 8=29220
capture. See Nuclear reactions due to/neutrons.
detection, measurement
See also Dosimetry; Neutron spectrometers.
(α, n) sources calibration, continuous, in Mn bath 8=33782
alumophosphate: Li and B slow n dosimeters, personnel 8=33797
Campbell channels, comparison of γ discrimination of averaging and r.m.s. circuits 8=47163
Cauchois γ spectrometer for (n, γ) reactions, precision angle meas. device 8=25236
concentric detector for dose and rate meas. 8=38081
converter in reactor for investigation of scatt. and attenuation 8=29543
detector films from polyvinyl alcohol 8=24978
dosimeters, α-acetylaminoacrylic acid-N-vinylpyrrolidone copolymer-gelatin emulsion for fast-n dosimetry 8=33800
dosimeter, by emulsion scanning, edge effects and track length meas. 8=33804
dosimeters calibration, thermal-20 MeV 8=33806
dosimeter calibration with (α, n) sources, fluence-dose conversion 8=33805
dosimeters, 2, 4-disulphonic acid benzaldehyde polyvinyl acetate-gelatin emulsion for fast-n dosimetry 8=33800
dosimeter, fast and intermediate, personnel reson. film dosimeter with filters 8=33801
dosimeter, fast-n, by Cereknov radiation meas. 8=33798
dosimeter, personnel monitoring, review 8=33808
dosimeter, personnel, thermal and intermediate energy, body backscatt. effects 8=33803
dosimeter, plastic scintillator, tissue dose distrib. 8=33809
dosimeters radiation element, personnel 8=33799
dosimeters, solid state, Al_2O_3 and W 8=47162
dosimetry, body absorpt. rel. to counter obs., isotropic fast flux and beam 8=38072
dosimetry, fast n, use of synthetic polymers in emulsions 8=47152
dosimetry, personnel, by solid-state nuclear track detector 8=46920
exposure meas. with Si radiation damage monitors 8=29207
fast hodoscope, improvement 8=47164
fast n-γ detector for space research 8=47158
fission fragments, emission, indirect method 8=47363
flux determ. by back-to-back fission chamber 8=33814
flux meas. in reactor core, self-powered detector 8=43148
flux-density standards at N.P.L., thermal-19 MeV 8=33816
by foil activation in rad. effects studies, tech. for spectra determ. 8=29209
γ-compensated ionization chamber 8=47156
ionization chamber n detector, transient γ field behaviour 8=47160
ionization chambers, hexane and CCl filled 8=33811
isotope applic. 8=43245
Kodak NTA films, for personal fast n monitoring 8=33812
luminphor composition based on ZnS(Ag) and Li^6F registration of slow neutrons 8=47153
n and γ body doses in criticality accident, meas. 8=33767
organic phosphor efficiency meas. 8=29208
organic scintillator, recoil p distrib. 8=24979
personnel monitoring and high-energy meas., review 8=33810
polarimeter, liq. He, time of flight type 8=47145
p-recoil counter, rein sensitivity energy depend, 0.1-6.3 MeV 8=33807
proton recoils, n-induced, response of NE213 scintillator 8=46881
pulse transformer links in meas. lines for n. detectors 8=47151
reactor, EBR-II, counting-mean-square voltage channel performance 8=47157
rem meas. method for mixed γ-neutron radiation fields 8=46923

Neutrons and antineutrons—contd
- **detection, measurement**—contd
    - scattered on deuterium, 4, 6 MeV, polarization determ. 8=47324
    - scintillation counter, plastic, props. 8=29205
    - source calibration by point detector 8=33786
    - spherical dose equiv. n detector, improvements 8=47165
    - stilbene, use of anisotropy in scintillation response for directional meas. 8=47154
    - streamer chamber, design and performance 8=46978
    - thermal, flux meas. by foil activation 8=24976
    - thermal neutron flux density standard, calibration 8=47149
    - thermal, spectrum determ., appl. of Dy^{164}, Lu^{176} and Pu^{239} 8=29568
    - third moment of count in short time interval 8=38082
    - time-of-flight data recording, synchronous drum store 8=47155
    - Au activation n flux calibration 8=33802
    - BF$_3$, proportional counters, wall effect 8=24508
    - BF$_3$ short counter with spherical moderator for neutrons in γ background 8=33792
    - Gd thermal neutron counter 8=33813
    - He scintillation counter with sodium salicylate wavelength converter, 14 MeV 8=33825
    - He^3(n, p) T method 8=29459
    - Li^6 sandwich semiconductor detector 8=38083
    - LiF and Li$_2$B$_4$O$_7$:Mn, fast-n personnel dosimeter 8=33796
    - Sc^{46} monitor for reactors 8=47330

    - noise neoplasms regression rel. to B^{10} dose, thermal flux and reactor design 8=45926
    - permalloy films, induced uniaxial anisotropy 8=31694
    - perovskites, high-temp. phase transformations, radiation-induced 8=39538
    - quartz, production of crystalline-amorphous phase transform. 8=26146
    - quartz, rel. to structural changes 8=26080
    - quartz, u.s. attenuation 8=39897
    - semiconductors based on GeTe:(Bi, Cu), electrical conductivity, thermoelectricity compressive strength 8=40637

Neutrons and antineutrons—contd
- **effects**—contd
  - semiconds., compound, effects on optical attenuation and absorpt. edge 8=27569
  - semiconductors, disordered region production and effect on carrier recombination 8=40431
  - semiconductors, heavily doped, slow neutron scattering study of lattice dynamics 8=44759
  - Sicral F_1, swelling rel. to fission gas bubbles, 10^{14} n/cm² sec 8=44506
  - Sicral F_2, swelling rel. to fission gas bubbles, 10^{14} n/cm² sec 8=44506
  - steel irrad. embrittlement, sensitivity depend. on N conc. 8=47405
  - in steel, stainless He prod., due to (n, α) reaction 8=47406
  - steel, stainless, irradiation creep. obs. at 100°C 8=26833
  - steel, Cr–Ni/Nb stainless, CO_2 oxidation, 580°–840°C obs. 8=27705
  - steels with f.c.c. lattice of solid soln., rel. to internal friction peak 8=35678
  - superconductors, type II, interaction with polarized neutrons 8=26998
  - tetrachloroethylene, u.s. cavitation using pulsed n source 8=25849
  - transistor current gain prediction, influencing variables 8=31412
  - Ultraperm 10 6 × 10^{19} n/cm², > 1 MeV 8=29553
  - X-ray reflection of Si plane crystals 8=30911
  - Al-base Cu, precipitation 8=48379
  - 16 Al Fe Vacodor 16 permeability, 6 × 10^{19} n/cm², > 1 MeV 8=29553
  - α-Al_2O_3, macroscopic growth and damage 8=26666
  - Al_2O_3, damage and macroscopic props. changes, review 8=44496
  - Al_2O_3, meas. of macroscopic and lattice growth 8=26234
  - Al_2O_3, polycryst., effect on lattice, porosity and thermal resistivity 8=26366
  - Ar, thermal neutron capture, γ-ray emission 8=25242
  - Au single crystal sputtering 8=48911
  - BaF_2, self-trapped hole formation, e.s.r. exam. 8=31854
  - $BeAl_2O_4$, chrysoberyl, irrad., crystal growth obs. 8=31145
  - BeO, damage and macroscopic props. changes, review 8=44496
  - BeO, meas. of macroscopic and lattice growth 8=26234
  - n-$Bi_2(Te, Se)_3$, elec. and thermal parameter changes 8=27136
  - C, dimensional changes, influence of crystallite size 8=35600
  - C, pyrolytic, dimensional changes, model 8=31148
  - CaF_2, irradiated at liq. N_2 temps., induced colour centre obs. 8=26719
  - CaF_2, self-trapped hole formation, e.s.r. exam. 8=31854
  - CaO, colour centre formation 8=31115
  - CaO crysts., Ca^{40} (n, α) Ar^{37}, Ar^{37} diff. 8=39969
  - $CaWO_4$, oxygen vacancies prod. by fast reactor neutrons, direct obs. 8=31047
  - CdS, on dark resistivity and Hall mobility 8=49235
  - n-CdTe, thermal irrad., Cd vacancies, Hall and cond. obs. 8=35533
  - CrO_4K_2, n-irradiated, e.s.r. 8=49605
  - $CrO_4(NH_4)_2$, n-irradiated, e.s.r. 8=49605
  - Cs halides, Xe diffusion 8=39970
  - Cu crystal, defects induced on irradiation at 400°C 8=48804
  - Cu crystals, radiation hardened, critical shear stress temp. and strain rate dependence 8=31196-7
  - Cu, irradiated, cyclic deformation 8=26801
  - Cu, irradiated, rel. to active crystal length in yield region under deform. 8=40054
  - Cu nearly perfect crystals, radiation damage obs. by X-ray diffraction 8=26732
  - Cu, on yield surfaces 8=44564
  - Cu–0.01 wt, % B^{10}, dislocation loop spheres surrounding B particles, obs. 8=35564
  - α-Fe, irradiation effects saturation 8=31151
  - Fe-Ni(50-50) crystals, ordered in mag. fields, magnetization curves 8=36144
  - Ge, defect production and detection by anomalous X-ray transmission, 8=48834
  - Ge, diodes, point-contact, pile-n irrad. effects on switching props. 8=31406
  - Ge, dosage-damage correlations and X-ray diffr. studies 8=26733
  - Ge, two level model for lifetime reduction processes 8=27126
  - Ge(Li) γ detector degradation 8=42453
  - K halides, activation energies for Ar diffusion 8=35498
  - KCl, hardening from critical shear stress analysis 8=49037
  - Li_2SO_4, irradiated, OH radical thermal decay, e.s.r. study 8=27481
  - in LiF negative thread crystal formation 8=26256
  - LiH fission attenuation and γ-ray buildup factors by the Monte Carlo method 8=47401
  - MgO, colour centre prod. 8=35589
  - MgO, effect on luminesc. 8=49809
  - MgO, damage and macroscopic props. changes, review 8=44496

Neutrons and antineutrons—contd
- **effects**—contd
  - MgO, hardening, lattice damage, and colour centre conc. 8=26829
  - MgO, irradiated, defect clusters, very small, study by neutron scattering meas. 8=35525
  - MgO, irradiated, $(OF)^{2-}$ molecular ion as paramag. defect 8=44404
  - MgO, irradiated, phonon-assisted optical absorpt. 8=41049
  - MgO, n-irradiated at 80°K, zero-phonon lines and phonon-coupling 8=27588
  - MgO, negative ion vacancies 8=44412
  - Mo, irradiation creep obs. at 100°C 8=26833
  - Mu metal permeability, 6 × 10^{19} n/cm², > 1 MeV 8=29553
  - NaCl, hardening from critical shear stress analysis 8=49037
  - Nb, supercond., resist. and magnetization, obs. 8=40373
  - Nb, superconducting magnetization, changes on > 1 MeV irrad. 8=40379
  - NbZr superconducting coil performance effect rel. to accelerators 8=33405
  - Ni alloys, irradiation creep obs. at 100°C 8=26833
  - Ni-base alloy, irradiated, dislocation haloes 8=44452
  - Ni, ferromag. props. 8=36169
  - Ni, irradiation creep obs. at 100°C 8=26833
  - Ni, irrad., vacancy and interstitial clusters 8=35538
  - Ni, near Curie point, depolarization meas. of spontaneous magnetization 8=45019
  - Pt, irradiated, hardening 8=35716
  - Rb halides, rare-gas diffusion 8=40079
  - Re, identification of defect clusters 8=40080
  - Re, irradiated, unit cell and dimensional changes 8=26737
  - p-$(Sb, Bi)_2Te_3$, elec. and thermal parameter changes 8=27136
  - Se, hexagonal, irradiations, effect on cond. and photocond. 8=44809
  - Si, carrier lifetime degradation, induced, rel. to dopant impurities 8=31156
  - Si, carrier removal and annealing, influence of impurities 8=27124
  - Si, defect character from anomalously wide images using stereo e-microscopy 8=31025
  - Si, defect production and detection by anomalous X-ray transmission, 8=48834
  - p-Si, disordered region production, dimensions and conductivity 8=35913
  - Si, dosage-damage correlations and X-ray diffr. studies 8=26733
  - Si devices, injection level and temp. depend. of transient annealing 8=27122
  - Si, disordered regions formation from carrier mobility decrease 8=35551
  - Si, divacancy and A-centre production 8=44416
  - n-, p-Si, electrically active defect introduction rates on irradiation 8=39998
  - Si, injection level studies, and carrier lifetime depend. on excess density 8=27125
  - Si, plane crystal, X-ray reflection 8=30911
  - Si solar cells damage, Li effects, obs. 8=24095
  - Si transistors, effects in neutral and space-charge regions, annealing characts. 8=27202
  - Si, two level model for lifetime reduction processes 8=27126
  - β-SiC, porous, changes in growth, elasticity and thermal props. 8=26735
  - Si: Li diode, on diffusion coeffs. of Li 8=39982
  - Te, on elect. cond. of single crystal 8=31393
  - Ti, irradiation creep obs. at 100°C 8=26833
  - U, growth and elec. resistivity changes during burn up at 4.6°K 8=48933
  - α-U, swelling rel. to solid fission prods. segregation 8=44507
  - U-Mo 1, 1 alloy, swelling rel. to fission gas bubbles, 10^{14} n/cm²sec 8=44506
  - U-Mo-Al-Sn, swelling rel. to fission gas bubbles, 10^{14} n/cm² sec 8=44506
  - UO_2, on electronic props. from e.m.f. meas. 8=40290
  - V_2O_5-P_4O_{10} semicond. glasses, effect on elec. cond. 8=27137
  - W, n-irradiated, stage III recovery 8=31157
  - ZnS, colour centres, accumulation during bombardment 8=31125
  - ZrO_2 films, damage and effect on props. 8=35607
- **interactions**
  - charge depend. study and violation of charge symmetry 8=24864
  - $\gamma + n \rightarrow \pi^- + p$, photoproduction of π° meson near $N_{1/2}(1525)$ resonance 8=47108
  - high energy, theoretical survey 8=24710
  - $K^-d \rightarrow \pi^-(\Sigma^+n) \rightarrow \pi^-(\Lambda p)$ 8=38093
  - nd, 14-27 GeV/c, total cross section and Glauber screening protection 8=29196
  - nd, n cross-section, high energy 8=42645
  - $n + d \rightarrow 2n + p$, 14 MeV, ang. distrib. obs., anomaly and rel. to spectator model 8=33768
  - $n + d \rightarrow p + 2n$, 199 MeV, n-p bound scatt., polarization 8=24961
  - n-n, ^1S interact. comp. with pp data, charge asymmetry rel. to energy diff. between H^3 and He^3 8=24950
  - np, 14-27 GeV/c, total cross-section and Glauber screening correction 8=29196

Neutrons and antineutrons—contd
interactions—contd
n-p residual interaction in odd-odd nuclei quasiparticle random-phase-approx. 8=42791
n-p total cross sections 8=24952
nT, at 14.1 MeV, study of outgoing p, d and T 8=42646
n-t resonance energy, $Be^9 + t \rightarrow n + t + Be^8$ obs. 8=29502
neutron-C cross-section meas., erratum 8=42647
neutron-proton cross-section meas., erratum 8=42647
$\pi^- n \rightarrow \{p\pi^-\}\pi^-\pi^\circ$, nucleon isobars, 5 GeV/c 8=33675
$\pi^- n \rightarrow p\pi^-\pi^-\pi^\circ$, $N\pi\pi$ enhancements, 5 GeV/c 8=33676
p-n final state interacts. in d(p, 2p)n and p(d, 2p)n reactions 8=24902
$p + n \rightarrow \Delta^{++} + \Delta^-$, exchange mechanism 8=24917
$p + n \rightarrow W^- \rightarrow e + \bar{\nu}_e$, form factors and polarization 8=42642
$\Sigma^+ n \rightarrow \Lambda p$ obs. in $K^- d \rightarrow \pi^-(\Sigma^+ n) \rightarrow \pi^-(\Lambda p)$ 8=38093
steel, for determ. of B content 8=37100
$D(n, n^2)p$ interact. peak. at 14 MeV, rel. to n-n interact. 8=24951
H^3 at 14.1 MeV, outgoing particles obs. 8=33769
H^3, cross-section angular depend. rel. to H^4 existence, 0.007-5 eV 8=29195
$He^3(n, p)H^3$, resonance parameters from p-T scatt., 300-990 KeV 8=29185
$He^3[n, p(n)]T$, He^3, diff. cross section extrema due to excited state of He^4, Feymann diag. 8=24914
$He^4(n, p)H^4$, H^4 excited levels and bound states, obs. 8=34007
moderation
absorption in wide reson. moderators, intermediate reson., integral, exact soln. 8=38571
Boltzmann eqn., boundary ang. flux approximation 8=28350
decay const., pulse meas., time-of-flight effects 8=33773
fast n from fission source, energy spectrum for slowing down in homogeneous medium 8=38584
in graphite, pulse propag. meas. of thermalization process 8=34066
nonhydrogeneous infinite homogeneous media, formal soln. 8=33780
in nonmultiplying medium, energy correl. 8=34074
paraffin wax havitzers, optimum design, obs. 8=42649
pulsed n theory and expt. 8=24966
rethermalization cross sections, vel. depend. free-gas kernel calc. 8=34089
shielding penetration, Monte Carlo calc., self-optimized exponential biasing 8=34075
slowing down in cylindrical bounded medium 8=47146
thermalization in graphite-water system at large temp. gradients 8=47384
thermalization in heavy gas, with nonuniform temp. distrib. 8=29556
thermalization of pulsed neutrons, few-pole expansion method calc. 8=47147
water, effect of voids 8=24967
by water, heavy, calcs. on coherent scatt. of slow n 8=25237
$Al-H_2O$ plate lattices, slowing down anisotropy, obs. 8=38576
$Al-H_2O$ slab systems, slowing down anisotropy, Monte Carlo calcs. 8=38577
Be, assemblies, transient spectra for pulse 8=29541
Be, n wave propag. and diffusion const., calc. 8=33774
$ThO_2-D_2O-H_2O$ lattices, age meas. 8=29552
U-metal exponential columns, buckling rel. to U^{235} enrichment, 4.3-9.1% 8=34085
polarization
d(p, n)2p, polarization transfer calc., Ep = 30-150 MeV 8=38101
$\gamma + p \rightarrow \pi^+ + n$, n polarization obs. 8=24965
in n-d elastic scatt., rel. to phases at low energy 8=29221
polarimeter, liq.-He, time of flight type 8=47145
scattered on deuterium, 4, 6 MeV, apparatus for meas. 8=47324
spectra anal. using const mag. fields, expt. checking 8=38069
C^{12} scatt., E_n =15.85 MeV, obs. 8=29458
C^{12} stripping obs. 8=25238
He liquid polarimeter, description 8=33819
He liquid polarimeter for fast n, analysing power calc. 8=33820
N-nucleus, optical model analysis 8=29451
$N^{14}(d, n)O^{15}$ 2.9, 3.7 MeV calc. distorted wave theory 8=38509
$N^{15}(d, n)O^{16}$, 3.1-3.8 MeV, obs. 8=43059
production
in atmosphere by cosmic ray nucleons 8=29254
by cosmic ray μ in Pb, Cd, Fe, Al at a depth of 150 m. water equivalent 8=38461
emission reactions, nonscatt., energy-angle correl. neglect 8=24948
$\gamma + p \rightarrow \pi^+ + n$, n polarization obs. 8=24965
gas-filled neutron tube, ionization in accelerating space 8=47141
generator, described with 200 kV supply, vacuum system, ion source and accel. tube 8=29203
generator for undergraduate laboratory 8=38076
generator, target, wear meas. with current integrator 8=47142
generator with self-target using D-T reactions 8=29204
high-yield generator for radiographic TV system 8=37725

Neutrons and antineutrons—contd
production—contd
in nuclear explosions, possible source for energy depend. n-n scatt. expts. 8=24958
(dn) Penning tube with ion source 8=24949
positive-ion beam target for accelerator 8=33398
pulsed source, rate of yield decrease from tritium-Ti targets 8=33785
pulsed source using remodelled electron linear accelerator 8=46986
pulses, from $D(d, n)He^3$ reaction 8=47150
p reactions in C, 24 GeV/c, obs. 8=29439
$t(d, n)\alpha$ reaction, n yield, 14 MeV, α-counting 8=24946
reactor photoeffect, on Be reflector population analysis 8=38454
rotating target system for D^+, T^+ ion beams 8=33396
in soils, due to natural radioact., production rates 8=36681
source calibration by point detector 8=33786
sources, pulsed, and their applications 8=29202
tube, accel. voltage, work parameters, for D containers, and T target parameters 8=29193
windowless gas target for ion beams 8=33395
in Be(d, n) reaction, energy ang. distribs. and yields at 1 and 3 MeV 8=34029
D_2O by U^{235} fission fragment γ-rays, delayed n half-lives, obs. 8=33764
Pu-Be (α, n) sources, n yield increases 8=47428
U^{233} in soln, array of bottles determ. of neutron criticality condition 8=47398
reflection
beam enrichment in total refl. tube 8=38078
graphite/H_2O and /D_2O interfaces, diffusion waves refl. and refr., theory 8=38071
by human body dependence on surface tissue depth and energy 8=41606
scattering
acetic acid, use of atomic substitution techs. in spectroscopy of microscopic transport props. 8=30403
anisotropy, absorpt. correction, in transport theory 8=29200
beryl, l.f. vibrs. of H_2O mols. 8=48704
Bijoveet type generalized eqns. 8=35297
by condensed systems, generalization of 3-D Patterson function to 4-dimens. 8=26356
corrections calculation 8=47144
cross-section evaluation, computer graphics 8=47323
cross section meas., low-energy region 8=38068
cryostat, continuous flow, for scatt. expts. 8=49548
crystal, incoherent approximation 8=26354
on deuterium, 4, 6 MeV, apparatus for meas. polarization 8=47324
deuterium, liq. ortho-para solns. 8=30404
d-n, scintillation counter resolving effects 8=24513
diffuse elastic, from ferromagnetic alloys, second order effects 8=49491
at E_n = 1.01/2.44 MeV, obs. 8=24956
elastic, and nuclear polarizability, for underange mass nos, optical model anal. 8=29451
elastic, at 2.8 MeV, applicability of optical model for description 8=29197
ferromagnetic, critical, incident spectrum broadening by inelastic scatt. 8=40795
gas, molecular, rotational correl. functions 8=43277
by heavy water, coherent, calcs. with acoustic freq. distrib. 8=25237
Heisenberg antiferromagnet with impurities, diffuse elastic n. cross section 8=31752
hydrogeneous liquids, proton motions by cross-section meas. 8=48065
hydrogenous molec. solids, freq. spectrum determ. 8=39875
ice, freq. spectrum determ. 8=39875
ice, inelastic, freq. distrib. determ. 8=26574
in ice, rel. to proton dynamics 8=39303
inelastic, coherent obs. of localized vibrations in Cu-4% Al 8=39872
inelastic, near threshold, γ ang. distrib. 8=34006
inelastic, reactor triple-axis spectrometer 8=33828
inelastic, time-of-flight meas. and data analysis 8=24962
Ising magnet, temp. and freq. depend. 8=31571
$K^\pm n$ real part predicted by dispersion relation 8=24831
from light nuclei four-parameter optical model 8=29450
liquid metals, heating arrangement up to 900°C in experiment 8=34762
liquids, and relaxation phenomena 8=39305
media, inhomogeneous, time correl. function formalism 8=29386
methane, gaseous, rel. to intermolecular interactions 8=38898
methanol, use of atomic substitution techs. in spectroscopy of microscopic transport props. 8=30403
Milne problem, thermal-n in absorbing medium, arbitrary scatt. kernel 8=38574
Milne problem with capture, thermal 8=24969
mixtures of amorphous solids or liquids, data anal. 8=39628
multiple, in slab geometry, recursion formulae 8=34067
from n-dimensional lattice (n = 1, 2, 3) rel. to multiphonon processes 8=31132

Neutrons and antineutrons—contd
  scattering—contd
    neopentane mols. rel. to methyl group librations obs. 8=34345
    n-d, Born approximation with tensor interaction 8=24960
    n-d, elastic, different phases w.r.t. polarization of n, d 8=29221
    n-d, elastic, phase analysis accuracy enhancement 8=29198
    n-n cross-section, energy depend, possible use of nuclear explosion 8=24958
    (n, n), length calc. from (He^3, d) 8=43005
    n-n scatt. length, extraction by comparison anal. of reactions with $^1S_0$ N-N final state interact. 8=24954
    nn scatt. length from $\pi^- d \rightarrow 2n\gamma$; obs. 8=42648
    n-n, Wolfenstein amps at t = 0, rel. to meson exchange and coupling consts. 8=24931
    n-n and n-p scatt. length difference, pion instability effects 8=24883
    nuclei, even-even, exchange interaction 8=43034
    optical model, parameters from 1.5 MeV scatt. data 8=29452
    optical pot. for 6, 7, 8 MeV, Al-Bi evidence for symm. term 8=29449
    π^+ n, 4, 5 π prod. 3.29 GeV/c 8=37983
    pn, pp, Chou-Yang diffraction model, proton and neutron form factors proportionality obs. 8=47140
    polarization-dependent, spin-flip chopper meas. 8=47174
    polarization effects, including nuclear polarization 8=27392
    polyacrylonitrile 8=25686
    polyethylene, normal and deuterated 8=26579
    polymer solns., quasielastic scatt. 8=30419
    rare earth h.c.p. paramagnetic crystal field effects 8=40749
    rare earth nuclei, deformed, level density obs. 8=29328
    rare earths, paramagnetic 8=48890
    in reactor, Br-5, with a convertor 8=29543
    resonance, angular distrib., filter method 8=29462
    skyshine, Monte Carlo calc. 8=36758
    space-angle transport theory, Green functions 8=38570
    spectrometer improvements 8=24983
    s-wave strength function, threshold cusp. 8=42805
    thermal and subthermal, by crystal dislocations 8=24959
    thermal and subthermal, by l.f. sound modes 8=24959
    thermal and subthermal, by solid 8=24959
    time-of-flight measurements, using magnetically pulsed beam 8=35314
    total cross section, new method for s, p, d-wave strength functions determ. 8=25232
    water, ang. distrib. using Debye-Einstein frequency spectrum 8=30405
    from water, light, cross-sections, multiple scatt., rel. to molec. motion 8=39304
    in water, rel. to proton dynamics 8=39303
    Al^{27} inelastic, ang. distrib. of γ obs. 8=38481
    Al^{27}, inelastic to 2.980 and 3002 keV levels 8=43036
    Al^{27}, 1-4 MeV, inelastic, levels 8=29459
    Al, by n-irrad. defects rel. to lattice distortion, subthermal, 20°K 8=44203
    Al, inelasitc, cross-sections, calc. and obs. 8=29460
    Al, natural, elastic and inelastic differential cross sections 5.95 MeV 8=38480
    from Ar liquid, convolution approx. in theory 8=43758
    in Be, isotropic, decay const. and diffusion length calcs. in transport and diffusion theories 8=38590
    Be-U, 8 heavy elements, total cross sections obs. 27 GeV/c 8=43040
    Bi^{209}, 1-4 MeV, inelastic, levels 8=29459
    Bi, inelastic, cross-sections, calc. and obs. 8=29460
    C^{12}, E_n =15.85 MeV, polarization obs. 8=29458
    C^{12} recoil meas. of asymmetry 8=29457
    C, inelastic, cross-sections, calc. and obs. 8=29460
    CH_2I_2 crysts., inelastic, rel. to mol. and lattice vibr., obs. 8=35385
    CH_3I crysts., inelastic, rel. to mol. and lattice vibr., obs. 8=35385
    $Cd^{111}(n, n')Cd^{111m}$, cross section obs. 8=29475
    CeAs, rel. to mag. props. 8=45052
    CeSb, rel. to mag. props. 8=45052
    $Cl^{35}(n, 2n)Cl^{34g,m}$, cross-section obs., compared with statistical model calc. 8=47325
    Co, ferromagnetic, of thermal, rel. to spin correlation function 8=31626
    CoF_2, rel. to mag. excitations near Neel pt. from n. scattering meas. 8=31762
    Cr^{52}, 1-4 MeV, inelastic, levels 8=29459
    Cr, critical, near Neel temp. rel. to itinerant e.-model of mag. props. 8=31764
    CrX_3, (X = Br, F), rel. to paramagnetism 8=31521
    $Cu^{63,65}$ inelastic, ang. distrib. of γ obs. 8=38481
    Dy, total cross-sections, 0.02-1.0 eV 8=38482
    DyAl garnet, critical, rel. to antiferromag. Ising model 8=31769
    Er isotopes, cross-sections, 0.007-1 eV 8=29463
    Er isotopes, slow, cross-section meas., compared with theory 8=38483
    Er, paramagnetic, rel. to mag. interactions 8=31523
    Fe^{56}, inelastic, ang. distrib. of γ obs. 8=38481
    Fe^{56}, 1-4 MeV, inelastic, levels 8=29459
    Fe, by long-wavelength spin waves 8=49520

Neutrons and antineutrons—contd
  scattering—contd
    Fe, ferromagnetic, of thermal, rel. to spin correlation function 8=31626
    Fe, fine struct. rel. to 0.36 MeV intermediate reson. nature, obs. 8=34005
    Fe: impurity atoms, rel. to mag. moment disturbance
    Fe, inelastic, cross-sections, calc. and obs. 8=29460
    Fe, rel. to Fisher's correlation function 8=27412
    Fe, reson., angular distrib., 1-2 MeV 8=29462
    in Fe, unmagnetized, divergence of collimated thermal n beam 8=31642
    FeF_2, rel. to spin-wave dispersion relations 8=31771
    $Fe_xGa_{2-x}O_3$, polarized, rel. to ferrimag. props. 8=31727
    α-Fe_2O_3, by antiferromag. spin-waves, polarization effects. obs. 8=36187
    Fe_2O_3, rel. to spin-wave excitation-energy changes 8=31638
    Fe-(Mn, Er), dilute by virtual magnon states 8=31625
    Ga, liq, energy depend., in wavelength range 1-8Å 8=39301
    H^3, cross-section angular depend. rel. to H^4 existence, 0.007-5 eV 8=29195
    H-bonds 8=24963
    $H_3O.NO_3$ crysts., inelastic, rel. to mol. and lattice vibr., obs. 8=35385
    Ho, paramangetic, rel. to mag. interactions 8=31523
    Ho, total cross-sections, 0.02-1.0 eV 8=38482
    $K^{39}(n, 2n)K^{38g,m}$, cross-section obs., compared with statistical model calc. 8=47325
    $Li_{0.5}Fe_{2.5}O_4$, by ferrimag. spin-waves, polarization effects, obs. 8=36187
    Lu, total cross-sections, 0.02-1.0 eV 8=38482
    MgO, irradiated, rel. to study of small defect clusters 8=35525
    Mn^{55} total cross section, parametric fit, 0.01 eV-50 keV 8=38477
    MnF_2, near critical pt., temp. dependence rel. to mag. behaviour 8=31784
    MnF_2:Co, rel. to localized magnon obs. 8=27380
    MnF_2: Co, rel. to localized magnon obs. 8=31785
    NH_4 salts, phase transitions 8=48393
    Ni by long-wavelength spin waves 8=49520
    Ni, ferromagnetic, of thermal, rel. to spin correlation function 8=31626
    Ni: impurity atoms, rel. to mag. moment disturbance distrib. 8=31637
    Ni, polycrystalline, sub-thermal neutrons at dislocations 8=31084
    $Ni^{58}(n, p) \rightarrow Co^{58g,m}$, cross sections, isomeric ratios and total 8=38489
    P, natural, elastic and inelastic differential cross sections 5.95 MeV 8=38480
    Pb, liquid and solid, Brillouin scatt., rel. to collective particle motion 8=25869
    Pb, liquid, rel. to cooperative modes of motion 8=34725
    Pb, liquid, rel. to cooperative modes of motion, temp. depend 8=34726
    Pt, fast n scatt. obs. 8=29464
    $Pu^{239,241}$, meas. of scatt. resonances, rel. to energy levels 8=43037
    $RbMnF_3$, inelastic n. scattering near Neel pt. rel. to spin fluctuations 8=31796
    Re, fast n scatt. obs. 8=29464
    S, natural, elastic and inelastic differential cross sections 5.95 MeV 8=38480
    S, total cross reactions at 5.36-6.28 MeV 8=34004
    Sb^{121}, Sb^{123}, thermal capture cross section 8=29478
    Sc^{45}, elastic and total cross sections, 14 MeV 8=29461
    Si, natural, elastic and inelastic differential cross sections 5.95 MeV 8=38480
    Si^{29}, E_n = 0.57-2.28 MeV, excitation obs. 8=33906
    $Sr^{87}(n, n')Sr^{87m}$, cross section obs. 8=29475
    Ta, fast n scatt. obs. 8=29464
    Tb, critical, inelasticity above Néel temp. rel. to mag. order 8=31530
    U^{233}, meas. of scatt. resonances, rel. to energy levels 8=43037
    VH_x, inelastic, vibr. spectra in three cryst. phases 8=39878
    V_3Si, paramagnetic, absence of scattering rel. to d electrons in conduction band 8=40754
    W, total cross reactions at 5.36-6.28 MeV 8=34004
    $Y_3Fe_5O_{12}$, by parametrically excited spin-waves 8=36094
  scattering, proton-neutron
    bremsstrahlung at 208 MeV, obs. 8=24953
    in hydrogen bonds, double potential well model rel. to solids study 8=35017
    n-p bound in n + d → p + 2n, 199 MeV obs. 8=24961
    n-p, bremsstrahulng calc. from p-d obs. at 197 MeV 8=29182
    n-p, differential cross sections rel. to residues of π and $\Lambda + \Sigma$ poles 8=38016
    n-p, 199 MeV, cross-section obs. and polarization 8=24961
    n-p π exchange 8=33770
    n-p, 60-100 GeV, from cosmic ray absorpt. in paraffin and graphite 8=38248
    phase-parameter multiple-energy fits for energy range 8 to 340 MeV 8=24934

Neutrons and antineutrons—contd
scattering, proton—neutron—contd
phase shift anal. of data in 140 MeV region 8=24935
polarization and spin-correl. meas., rel. to phase-shift anal. 8=24955
singlet state scatt. length difference with n-n, pion instability effects 8=24883
total cross sections 8=24952
Wolfenstein amps at t = 0, phase shift dual. rel. to meson-nucleon coupling 8=24931
$^1S_0$ phase shift anal. with pp data, rel. to charge splitting 8=24929
Newtonian fluids. See Fluids.
Nickel
absorption, infra-red, at 4.2°K 8=27551
adherence and wettability to sapphire 8=43744
alloying with Mo, Cr, Si and Cu, effect on 3d-electron state 8=35775
anisotropy of energy and magnetization, torque meas. 8=31667
band structure rel. to low-energy optical transitions 8=35774
Barkhausen discontinuities, size distrib. calc. from simple model 8=31669
Barkhausen jumps, ultrasound influence 8=36163
catalyst beds, Q meas. 8=32120
coercivity rel. to dislocation distrib, effects 8=31699
cold-worked, ang. distrib. of scatt. neutrons rel. to defects 8=26355
conducting film formation using electron beam 8=39603
conductivity, thermal, by Jain and Krishnan method 1150-1400°K 8=39949
creep near Curie pt., rel. to stacking fault energy 8=35710
creep, void formation 8=31225-6
crystal, high-purity prep., by e. beam float zone melting 8=48553
crystal. stress-relax. meas., 77-350°K 8=40178
crystals, electro-deposited, structure and orientation in initial crystallization stage 8=30822
deformed, strongly, onset of uniaxial anisotropy after mag. annealing 8=36216
with deposited Ba film, thermionic emission 8=27347
diffusion in Ag 8=34813
diffusion in PbSe, anomalous 8=39981
diffusion of Au, lattice and grain-boundary type, 700–1075°C 8=44391
diffusion of H_2, isotope effects 8=31012
diffusion of H, kinetics 8=31014
diffusion of V, coeffs. 8=35476
diffusion rates, annealing time effects 8=35474
dislocations, e. microscope obs., 8=48859
dislocations magnetostrictive crystalline energy from anisotropy of approach to saturation 8=35571
dispersion-strengthened, mag. props. dispersed effects 8=31620
edge dislocations, vels. rel. to stress, and activation vol. and enthalpy 8=44454
effects on structure of sintered UC 8=26299
electrode contact for ferrites 8=31321
electrodeposited, microstructure, effects of addition agents 8=35277
electrodeposited, process conditions effect on stacking-fault, microstrain and particle size 8=26298
electrodes in vacuo, elect. breakdown 8=47763
electron cold emission in N_2 with elect. field 8=49439
electronic structure of atoms in solid solutions 8=49744
electroplated, mag. anisotropy rel. to vacancies and interstitials formed on H charging 8=49538
epitaxial overgrowth on Cu, reduction in mechanical strength of Cu 8=40146
Fermi-surface from galvanomag. coeffs. and de Haas-van Alphen effect 8=31289
ferrite films, structural properties and ferromag. resonance 8=36192
ferromagnet, elastic limit determ. by Barkhausen effect 8=26838
ferromagnet, hyperfine fields at Cd^{111} and Ru^{99} solutes 8=40992
ferromagnetic and paramagnetic, lattice dynamics 8=35391
ferromagnetic, de Haas-van Alphen effect rel. to electronic structure 8=31698
ferromagnetic, exchange and spin-orbit interactions rel. to mag. break-down and de Haas-van Alphen effect 8=44649
ferromagnetic films, planar Hall effect, thickness (100-1500Å) and temp. (77-293°K) dependence 8=31687
ferromagnetic properties rel. to band structure 8=31632
ferromagnetic reson. of film rel. to internal stresses and magnetization inhomogeneity, obs. 8=31821
ferromagnetic resonance linewidth temp. dependence 8=31815
ferromagnetic, thermal neutrons, critical scattering 8=31626
ferromagnetic, 3d-band, density of states curve 8=40246
ferromag. transition temp. pressure-dependence, itinerant-electron theory 8=27424
film, electrodeposited and charged with H, effect of H on magnetization inversion 8=36170
film on glass, light refl. phase retardation meas. 8=31960

Nickel—contd
film, oscillating hysteresis 8=45021
film, ultrasound from stripe domain resonance 8=31682
films, adsorpt. and interact. of N_2 8=26138
films, chemisorpt. of O_2 and H_2, reconstitution of adsorbate adsorbent interface 8=27737
films, domains and mag. fine structures form., e microscope obs. 8=31640
films, epitaxial, anisotropy constant 8=31631
films, magneto-optical parameter temp. dependence, 20-400°C 8=36398
films, orientation after deposition on NaCl 8=44085
films, p-bombardment effects on mag. props. at 850 keV 8=36168
films, u.v. reflection, near Curie point 8=36399
films, vacuum-condensed, elastic anisotropy rel. to structure 8=44545
films, vacuum-deposited, temp. coeff. of resistance 8=35819
foils, polycrystalline, residual resistivity and Kohler's rule 8=26971
fractional order peaks in diffracted LEED beams, surface asymmetry mech. 8=26100
fuel cell, electrode activation with Pt catalyst 8=46356
grain boundary, large-angle, dislocation form. 8=31105
grain-boundary relax. and damping peaks, rel. to internal friction 8=48872
intergranular structure, angular characts. by small-angle X-ray scattering 8=26297
internal friction, effect of H 8=49041
ions Ni^{++}, polarographic investigation in $LiNO_3$-$NaNO_3$-KNO_3 melt 8=45414
Kerr effect in dielec. permeability tensor freq. dependence determ. 8=31696
lattice dilation by dissolved C 8=44243
liquid, atomic structure from X-ray diffr. exam. 8=25874
in liquid steel, conc. rel. to C activity 8=30458
magnetic disturbances rel. to substitutional impurities 8=36153
magnetic eqn. of state near Curie point 8=40828
magnetic, form factor anisotropy rel. to band structure 8=31600
magnetic hysteresis loss and magnetostriction hysteresis in rotating fields up to 2000 Oe 8=31680
mag. moment disturbance distrib. from dissolved impurity atom, n. scattering obs. 8=31637
magnetic saturation curve anisotropy, edge-dislocation contribution 8=49536
magnetization near Curie pt. 8=31697
magnetization, spontaneous, near Curie pt. by neutron depolarization meas. 8=45019
Magnetocrystalline anisotropy constant, first-order, pressure dependence 8=27407
magnetocrystalline anisotropy temp. dependence from magnetostriction and elastic constants 8=31561
magnetoelastic parametric interaction due to ΔE effect 8=26840
magneto-elastic resonance props. 8=36164
microsegregation in directionally solidified steel 8=39552
Mössbauer spectrum of Fe^{57}, effect of press. 8=43946
neutron bombardment effects on ferromag. props. 8=36169
neutron irradiation creep obs. at 100°C 8=26833
oxidation kinetics 8=27713
oxidation rate-constant determ., low-temp., from discontinuous film resistance changes 8=49883
paramagnetic susceptibility calc. 8=49483
paramagnetic, susceptibility calc., contrib. of intra-atomic exchange enhancement 8=31524
in permanent magnets, effects of extrusion on texture and props. 8=33046
pitting corrosion critical potentials 8=49928
plane Hall effect, temp. depend. and role of scatt. mechanisms 8=40324
plating, electroless, on p-n junctions 8=45396
polycrystalline, dislocations, small angle mag. scattering of sub-thermal neutrons 8=31084
polycrystalline, optical consts. from reflectance ratios 8=45164
positrons, polarized, annihilation 8=49129
powder, superparamag., Mossbauer spectra of Fe^{57}, temp and mag. field effects 8=36161
pure, self-diffusion 8=39979
recovery of mech. props., laws 8=35709
recrystallization during creep, mechanism 8=48552
reversible magnetic susceptibility, dependence on temp. and stress 8=36154
saturation magnetization determs. 8=31618
self-diffusion, 980 to 1400°C 8=48786
solar emission spectrum obs. 8=28615
specific heat at low temp. 8=39919
spin-wave renormalization effects, obs. 8=49520
spin waves 8=31627
spin waves, Stoner modes and critical fluctuations 8=36215
sputtering by Ar^+, [110] and [100] close-packed directions yields, 25-600 eV 8=40078
superplasticity in pure metal 8=31224
surface energy and surface self-diffusion 8=44028

Nickel—contd
surface morphology, rel. to reaction with Br 8=30726
susceptibility, generalized, temp. depend. 8=31665
tensile internal stress during electrodeposition, role of hydrogen 8=31167
thermal cond. var. in mag. field 8=45022
thermal diffusivity meas. by laser flash method 8=39950
thermal expansion coeff. of film, e diffr. meas. 20–420°C 8=35546
thoriated, effect of S impurity on recrystallization 8=44138
vacancy clustering during quenching 8=44413
vacancy concentration during high temp. deformation 8=31038
vacancy and interstitial clusters, neutron-irrad. Ni 8=35538
vacuum-fused, recrystallization diag. 8=39659
x-ray line intensity and lattice consts. rel. to temp. 8=48649
As-plated, electroless, dissolution in acid rel. to Ni_2P phase existence 8=45383
C fibres, recrystallization, Ni stimulated 8=35236
Co, adsorption and oxidation of CO 8=48487
in Co, cathode ray polarographic microdeterm. 8=27776
Cu–Ni system, Cu diffusion on Ni side 8=31013
Fe- and Fe–C alloys, effects on impact properties 8=35693
in GaAs, activation energies 8=40238
H_2 desorpt. obs. 78°-300°K 8=30772
He-Ne laser TEM_{009} modes separation with film, obs. 8=37565
on LiF, films, single-cryst., epitaxial growth 8=35170
on MgO, films, single-cryst., epitaxial growth 8=35170
Na monolayers on (110), one-dimens. incoherent struct., obs. 8=39579
Ni^{61} low levels, h. f. s. and nuclear quadrupole moment 8=38677
Ni, magnetization anisotropy due to screw dislocations, calc. 8=40790
Ni, in thermionic diode, effective work function, comp. with Mo 8=31460
Ni(II) in aq. soln., primary solvation no. determ. by p. m. r. 8=39423
Ni, magnetization anisotropy due to screw dislocations, calc. 8=40790
Ni II, spectra, in excited configs., theory 8=43187
NiXI to XIV, oscillator strengths 8=38668
Ni–Cd flexible thin film batteries 8=33032
$Ni:Mn^{54}$, mag. hyperfine fields and spin-lattice relax., from n.m.r. 8=31891
Ni–Mo, resistivity anomaly rel. to ordering 8=40326
Ni^{2+}, in CaO, uniaxial stress meas. at impurities, strain coeffs. 8=40134
Ni^{2+} in CdF_2 and CaF_2, i. r. absorpt. spectra at room temp. and 4.2°K 8=31967
Ni^{2+} in $KMgF_3$, magnetoelastic coeffs. from acoustic paramag. resonance 8=31817
Ni^{2+} ions in fluorite-type lattices, absorpt. spectra temp. dependences 8=41076
Ni^{2+}: MgO, spin-lattice relaxation by phonon avalanche 8=40941
on n-, o-Si, plated contacts quality 8=44823
ThO_2 dispersed, grain growth and recrystallization rel to cold working 8=48604

Nickel alloys

"alni" type, 3-d structure modification 8=35270
alnico, domain structure tracking by magneto-optical Kerr effect 8=36165
alnico, high-coercivity, powder pattern exam. 8=35346
binary, fundamental to Nimonic series, stacking-fault energies 8=35577
creep, relax and tensile data, graphical anal. 8=49042
Curie point and magnetization, change after plastic deform. 8=40823
diffusion rates, annealing time effects 8=35474
with elements of Pd and Pt groups, residual electrical resistivity 8=49168
high-strength, stage I fatigue fracture characts. 8=26839
Hyhro Radio metal, development, props. and appls. 8=27387
Invar, mag. props. rel. to anomalous thermal expansion 8=36162
irradiated, dislocation haloes 8=44452
Mumetal, permeability temp. vars. stabilization and appls. 8=27387
Nimalloy (in Ni-Mn system), high mag. permeability, V additions rel. to props. 8=31685
Nimonic, n irradiation creep obs. at 100°C 8=26833
n.m.r., rel. to dilute impurities of 4d and 5d elements of group VIII 8=49642
oxidation kinetics 8=27713
permalloy, alloying with Mo, Cr, Si and Cu, effect on 3d-electron state 8=35775
permalloy cores, testing at low temperatures 8=49542
Permalloy disc, energy losses on rotating in alternating and direct mag. fields 8=36102
permalloy, elastic limit determ. by Barkhausen effect 8=26838

Nickel alloys—contd
Permalloy films, abnormal Bloch wall motion under hard axis nanosec. pulse drive 8=31668
permalloy, films and coupled double layers with Fe–Ni–Mn, spin-wave resonance 8=31814
Permalloy films anisotropy and blocking fields rel. to r. f. losses, obs. 8=31678
permalloy, film, annealed cylindrical, bimodal magnetization 8=49540
permalloy films, annealing kinetics and increasing S conc. 8=31222
Permalloy films, coercive force and blocking field rel. to substrate temp., obs. 8=31676
Permalloy films, critical switching curves, obs. 8=31671
Permalloy films, domains and coercive force in supercritical transition, obs. 8=31629
permalloy films domain boundary dynamic props. 8=36167
permalloy film, domain boundary energy meas. rel. to thickness 8=40826
Permalloy films domain walls and mag. fine struct. in switching, stroboscopic transmission e microscope obs. 8=31674
permalloy film, domain wall movement, thermally activated 8=45020
Permalloy, films ferromag. reson. and off-reson susceptibility, r.f. 8=31822
Permalloy, film, ferromag. reson. rel. to internal stresses obs. 8=31821
permalloy film in contact with FeNiMn or Gd, spin-wave resonance obs. 8=31681
permalloy films, induced uniaxial anisotropy on n.- and Ar^+ bombardment 8=31694
Permalloy films, internal isotropic stresses and demagnetizing factors ferromag. reson. obs. 8=31223
permalloy films, mag-moment motion in h. f. rotating field 8=36157
Permalloy, films mag. struct. stability in pulsed orthogonal fields, obs. 8=31691
permalloy film memories, keepered and nonkeepered, internal field distrib. 8=40820
Permalloy, films pulse switching, induction and magneto-optical meas. comparison 8=31688
Permalloy films pulse switching rate, –180-250°C 8=31675
permalloy films, spin wave resonances, effect of Au and Ni layers 8=49581
permalloy film, spin-wave resonance 8=27452
Permalloy film spots nucleation, struct. and field rel. to dimensions, obs. 8=31673
permalloy films, supercritical, domain structure, theory 8=31684
Permalloy film thermal expansion coeff., e diffr. meas. 20–420°C 8=35446
permalloy film, 1000Å, Néel wall structure and energy 8=31663
Permalloy films, 360° walls and strong stripe domains 8=45024
Permalloy films uniaxial anisotropy, mag. annealing effects, 20-400°C 8=31677
permalloy films, wall streaming obs. 8=31558
permalloy/Gd/Co-permalloy triple layers, spin-wave resonance temp. dependence, 100–400°K 8=31816
permalloy, mag. anisotropy rel. to vacancies and interstitials formed on H charging 8=49538
permalloy, magnetization axis 8=49543
Permalloy narrow strips, meas. of domain wall energy 8=27420
Permalloy 78 films, demag. rel. to alternating field freq., obs. 8=31692
Permalloy, single-crystal platelets, ferromagnetic domains 8=31664
permalloy stripe-films, domain structure 8=31693
Permalloy thin films, exchange stiffness constant by pulse switching technique 8=31686
permalloy thin film, stationary spin-wave excitation 8=31587
Satmumetal, development, props. and appls. 8=27387
saturation magnetization rel. to conc. fluctuation 8=49537
79HM5, electron reflection, 600 to 1200 keV 8=44197
steel, phase transforms., mag. field effects 8=30702
ticonal, structure formation after thermomagnetic treatment 8=35055
Cu–Ni–Mn system, diffusion rel. to thermodynamic activities, obs. 8=31004
FeNi, film, electrodeposited, mag. switching behaviour 8=27419
on LiF, ferromag. films epitaxial growth 8=35170
on MgO, ferromag. films epitaxial growth 8=35170
Mu metal permeability, n irrad. effects, 6 × 10^{19} n/cm², > 1 MeV 8=29553
Ni–Al cermet, sintering investigations 8=26046
Ni–Al, colour rel. to composition, Fermi surface and Brillouin zones 8=45213
NiAl, cryst. struct. of martensitic phase 8=48668
Ni–Al, γ′ precip. coarsening 8=35120
Ni-11%Al, grain boundary, large-angle, dislocation form. 8=31105
Ni–Al, soft X-ray spectroscopy 8=36419
Ni_3Al–Ni_3Nb system oxide scale X-ray microstructural analysis 8=35276

Ni–Au, fibre-reinforced, prep. 8=28208
Ni–Au films, vol. and surface diffusion 8=35486
Ni–Au system interdiffusion rel. to comp., 850–925°C 8=31015
Ni–2.2% Be, ageing, nucleated precip. phase space lattice, obs. 8=35271
Ni-C, metastable extension of C solubility, splat - quenching effects 8=30656
Ni–Co, f.c.c., low temp. sp. ht. 8=48739
NiCo–C, mag. anisotropy rel. to C interstitials 8=49526
Ni-Co-Cr superalloy sulphidation corrosion layers comp. and struct. obs. 8=30806
Ni–Cr, adherence and wettability to sapphire 8=43744
Ni–Cr films, vacuum-deposited, temp. coeff. of resistance 8=35819
Ni–Cr layers, electrical resistances, stability condns. 8=35818
Ni-34.5 at. % Cr, ordering from e. diffr. exam. rel. to elec. resistivity 8=35064
Ni–17%Cr, polycrystalline, alternating micro-deformation 8=35644
Ni—Cr—C—Si system, position of pseudo-eutectic, and reinforcing phase 8=43976
NiCr, ThO_2 dispersed, grain growth and recrystallization rel to cold working 8=48604
Ni-Cu, ferromag. transition temp. pressure-dependence itinerant-electron theory 8=27424
Ni–Cu film, resistivity, temp. (20–600°C) and comp. dependence 8=40325
Ni–2%Cu solid soln., vacancy quenching 8=44410
Ni–Cu, thermal cond. var. in mag. field 8=45022
$Ni_{1-3x}Cu_{2x}Fe_x$, low temp. sp. heat 8=39919
Ni-Fe alloys, sp. ht. 1.2-4.2°K obs. 8=26592
Ni-Fe, e-irradiated, remanence growth during low temp. mag. anneal 8=36156
Ni-Fe ferromagnetic films, planar Hall effect, thickness (100-1500Å) and temp. (77-293°K) dependence 8=31687
Ni-Fe, ferromagnetic thick films, domain-wall width determ. by Lorentz microscopy 8=27422
Ni–Fe films, anisotropy dispersion, temp. depend. 8=40821
Ni–Fe films, columnar grain structure obs., anisotropy existence and origin 8=44169
Ni-Fe films, domain-wall motion and ferromagnetic resonance losses 8=31695
Ni-Fe films, electrolytically prepared, conditions for formation of hexagonal structure 8=26122
48 Ni/52 Fe(111) films, epitaxial, ferromag., flat, of few atomic layers 8=36166
Ni-Fe film, magnon-phonon coupling 8=27421
Ni–Fe films, polycrystalline, susceptibility strain-dependence 8=40824
Ni-Fe, films, s. h. f. susceptibility, < 30 Oe 8=31689
Ni-Fe films single and double, reversible rotation regions, obs. 8=31690
Ni-Fe, films, spin-wave spectra, linewidth and relax. processes for main resonance 8=40887
NiFe films, sputtered, bias appl. during deposition, rel. to reduced sensitivity to gas impurities 8=31679
Ni-Fe film, static reversal of magnetization, rel. to anisotropy dispersion 8=36155
Ni–Fe films, stress, production parameter dependence 8=31192
76%Ni–Fe films, type II stripe domains, obs. 8=40825
Ni81% -Fe 19% film, 180°domain wall energy density rel. to thickness 8=45018
Ni-Fe, high-permeability, classification by props. 8=31662
Ni-Fe, magnetization ripple 8=36159
Ni-Fe, magnetoelastic sensitivity, composition gradient effect 8=36111
Ni-Fe polycrystalline, mag. anisotropy induced during evaporation and annealing 8=36152
Ni-Fe thin films, magnetoresist. and resist studies 8=44695
Ni_3Fe, near order from n. -scatt., 8=39531
Ni-Fe-Al films single and double, reversible rotation regions, obs. 8=31690
NiFe–C, mag. anisotropy rel. to C interstitials 8=49526
Ni-Fe-Co, films, s. h. f. susceptibility, < 30 Oe 8=31689
Ni-Fe-Co films single and double, reversible rotation regions, obs. 8=31690
Ni-Fe-Ni strip, gas emission in vacuum apparatus, rel. to heat and chem. treatment 8=39254
Ni_3Ga with dissolved Fe, giant mag. moments induced by Fe 8=27423
Ni–In, metastable b.c.c. phases formed on quenching 8=48408
NiMn, superlattice struct. due to periodic twinning 8=26712
Ni–18 at. % Mn– 8 at. % Fe, longit. galvanomagnetic effect magnetization dependence rel. to anisotropy 8=40827
Ni_3Mn, thin, antiphase boundaries obs. 8=35279
Ni-Mo, dislocations e. microscope obs., 8=48859
Ni_4Mo, ordered, rel. to tetragonal superstructure, and three classes of interfaces 8=26713
Ni_4Mo-Ni_4W, solid solns., ordering rel. to resistivity 8=39530

Nickel alloys—contd
NiO-MgO solid solns., formation on thermal decomp. of mixed hydroxides 8=39532
Ni–P films, Hall effect obs. 8=26970
Ni-P films, Hall effect structure dependence 8=44696
Ni-Pd, saturation magnetization and g factor meas. 8=31666
Ni-Pt, ferro- and paramag. props., 14-1000°K 8=31683
Ni-Rh, ferro- and paramag. props., 14-1000°K 8=31683
Ni-Rh, nearly ferromagnetic, mag. susceptibility and sp. ht. 8=31660
Ni-Si viscosity temp. dependence rel. to bonding 8=34796
Ni-Sn ferromag. Hall effect 8=27425
Ni-SOCo, cold-rolled, induced mag. anisotropy 8=31661
Ni-Ti, adherence and wettability to sapphire 8=43744
Ni-V, ferro- and paramag. props., 14-1000°K 8=31683
Ni-10 at. %W, local at. arrangements rel. to heat treatment and cold deformation 8=44244
Ni-W metallide phases isolation, investigation 8=39561
Ni-Zn ferrite, ferromag. relax. 8=27491
Ni-Zn, thermodynamic data 8=48726
Ni–Zn, X-ray absorption spectra, K edges 8=41080
Nickel compounds

boracites, sector-growth and twinning, exam. by polarized-light microscopy 8=26188
ferrite, Fe^{57} NMR relax. times and amplification of external field 8=36267
ferrites, with high saturation magnetization and improved hystersis 8=31734
ferrites, ultrasonic waves, magnetic hystersis of velocity with Co, Mn and Cu impurities 8=31736
nickelous nitrate–MgO aq. cements, bonding mechanism 8=26010
oxide bicrystals, [001] tilt boundaries, energies and grooving kinetics 8=35278
oxides, thermodynamic props. by e.m.f. meas. 8=48729
oxidized complex with α-benzyldioxime, e.s.r. investigation 8=36248
rare-earth-nickel, R_xNi_y, mag. behaviours 8=31506
Ni complex, bis-(N-ethylsalicylaldiminato)nickel, crystal structure 8=26421
Ni(II) complex, bis(N-isopropyl-3-methylsalicylaldiminato) nickel(II), crystal structure 8=26425
Ni complex, bis(N, N-di-n-propyl-dithiocarbamate)Ni(II), structure 8=26419
Ni complex, bisperchloratotetrakis-(3, 5-dimethylpyridine) nickel (II) crystal structure 8=39817
Ni complex, diaquobisglycinatonickel (II), crystal structure refinement 8=44246
Ni complex, diethylenediamine Ni(II) iodide, Ni $en_2I_2.H_2O$, structure 8=26420
Ni complex, diethylenediamine Ni(II) nitrate, Ni $en_2(NO_2)_2$, structure 8=26420
Ni complex, di-(2-thioimidazolidine)nickel thiocyanate crystal structure 8=26423
Ni complex, hydrazinecarboxylate, crystal structure 8=26427
Ni complex, tetrakis (3, 4-dimethylpyridine) nickel (II) perchlorate crystal structure 8=39818
Ni complex with N-β-diethylamine ethyl-5-chloro-salicylaldimine, crystal structure 8=26424
Ni complex, Ni glyoxime crystal and mol. structure 8=26417
Ni complex, tris-(2-dimethylaminoethyl)amine nickel(II) bromide crystal structure 8=26418
Ni complexes, chloro- and nitro-thiocyanato bis (ethylenediamine) nickel structures 8=26426
Ni complexes, Ni en_2NCSI and Ni $en_2NCSClO_4$ (en=ethylenediamine) structure 8=26422
Ni complexes, thiosemicarbazides, crystal structure 8=26428
Ni ferrite epitaxial growth on MgO (111) and (110) surfaces 8=39594
Ni ferrites, dielectric losses at microwave freq. 8=49346
Ni molybdate hydrates, non-stoichiometric, structures for two phases, and vacancies 8=30916
Ni^{2+} complexes, electron spin density attenuation 8=47593
β^1-NiAl, prismatic dislocation loops 8=44453
$NiAl_2O_4$ cryst, reacts between defects 8=26633
NiAs, order of vacancies 8=35539
$Ni_3B_7O_{13}I$, ferromagnetoelectric props. 8=31670
$Ni_3B_7O_{13}I$, mag. props. 8=49539
$NiBr_2$, ht. of sublimation and dissoc. energy 8=39496
$Ni(CO)_4$, force consts. from vibr. spectra of isotopic species 8=34270
$Ni(CO)_4$, semiempirical MO model 8=47594
$NiCl_2$, aqueous soln., dielec. consts. and loss factors 8=34887
$NiCl_2$, ht. of sublimation and dissoc. energy 8=39496
$NiCl_2$ in alkali halide melts, thermodynamic props. from cell emf's, 8=49946
$NiCl_2$ in alkali halide soln., absorpt. spectra 8=48159
$NiCl_2$, matrix-isolated mols., fluoresc. spectrum 8=29757
$NiCl_2$, specific heat rel. to mag. energy spectrum, 1.8-16°K 8=39918
$NiCl_2.6NH_3$ and $NiCl_2.6ND_3$, dielectric dispersion and proton motional phase transitions 8=40614

Nickel compounds—contd
- $NiCl_4$-$ZnCl_4^{2-}$ mixed crysts., spectra at 4°K 8=27590
- NiCoP films, chem. deposited, mag. props. stability, up to 100°C, 1600 hr exposure 8=45023
- $NiCr_2O_4$, spin-structure determ. from magnetization and resonance 8=31731
- $NiCr_2O_4$, tetragonal to cubic transform., structural parameters, 92-298°K 8=26076
- $NiCr_2S_4$, NiAs-type structure, magnetization, 1.5°K to room temp. 8=45064
- Ni-Fe films, electrochem. deposition rel. to mag. props., obs. 8=31672
- NiFe films, 2-200Å, magnetization anomalies rel. to surface anisotropy 8=36158
- Ni-Fe ferrites with small additions of Co, mag. diffusion after-effect 8=36191
- NiFe, thin coupled films, domain wall behaviour 8=49541
- NiF_2, electron-magnon interaction, effect on absorption band 8=41127
- NiF_6^{-4}, electron delocalization and spectrum 8=25510
- Ni_3Fe, tensile behaviour upon ordering 8=44595
- NiFeCo film, mag. props., effect of Cu layer 8=40822
- $NiFe_2O_4$, effect of tetrahedral site Ni_b^+ ions 8=27455
- $NiFe_2O_4$ films, ferromag. resonance thickness dependence 8=31823
- $NiFe_2O_4$ superparamag. particles, hyperfine splitting in mag. field from Mössbauer spectra of Fe^{57} 8=36160
- $NiFeS_x$ films, electrodeposited rel. to vacuum deposited 8=35177
- NiGa, structure defects constitutional and thermal, 8=48829
- Ni_3Ge, gaseous impurity segregation 8=35673
- $Ni_{1+x}Ge_xFe_{2-2x}O_4$, anisotropy rel. to resonance props., 4.2-393°K 8=36227
- $Ni_{1+x}Ge_xFe_{2-2x}O_4$, internal fields at two sites, Mössbauer determ. 8=36193
- Ni-H system, thermoelec. power rel. to H conc., 77-250°K 8=35998
- $Ni[(H_2O)_6]^{2+}$, O^{17} hyperfine coupling consts., evidence for distortion from octahedral symmetry 8=49652
- Ni–I boracite, paramag. susceptibility temp. dependence 8=31525
- NiI_2, ht. of sublimation 8=39496
- $NiNH_4(PO_3)_3$, rhombohedral form, crystal structure 8=44245
- Ni_3Nb oxide scale X-ray microstructural analysis 8=35276
- Ni-NiO multilayer films, mag. coupling 8=36133
- NiO, antiferromagnetic, magnon dispersion and density states 8=40874
- NiO, conductivity, high freq. 8=31384
- NiO, covalency parameters 8=30617
- NiO, decomposition on photo-absorption 8=36567
- NiO, lattice parameters rel. to pressure 8=48669
- NiO, struct. exam. 8=48592
- NiO whiskers, growth and props. 8=35255
- NiO (100) face, heating effects from e-diffr. exam. 8=39650
- $Ni(OH)_2$ in LiH, anodic oxidation and Li migration in n-semiconducting mat. production 8=45382
- NiO : Li, semiconducting phenomena 8=44803
- NiO-MgO solid soln., struct. and mag. props., 98°-298°K 8=35061
- NiO–MgO solid soln., thermodynamic activities of NiO 8=43979
- Ni_4Mo, order and resulting substructure, electron diffraction and electron microscope study 8=44009
- Ni_2P in Ni, As-plated electroless, electrochem. analysis 8=45383
- NiS, first-order-paramag-antiferromag., metallic-semiconducting transition 8=31788
- NiS_2 pyrite, antiferromag. props. 8=31493
- NiS_2, pyrites struct., growth by Cl_2 transport 8=26249
- Ni Sb_2O_6, neutron and X-ray diffraction studies 8=48614
- $NiSe_3$ pyrite, paramag. props. 8=31493
- $NiSi_8$ crystal, paramag. cross relax. 660Hz-1MHz 8=27486
- Ni_3Sn_2 gaseous impurity segregation 8=35673
- α-$NiSO_4 . 6H_2O$, ht. capacity, mag. moment, 0.4–4.2°K, in mag. field 8=30968
- α $NiSO_4 . 6H_2O$, magnetothermodynamics, theory 8=39920
- $NiTa_2O_6$, neutron and X-ray diffraction studies 8=48614
- Ni–Zn ferrite, ferromag. resonance and non-linear effects 8=31819
- Ni–Zn ferrites, hot-pressed, fine-grained, hf and microwave props. 8=49562
- $Ni_{1-x}Zn_xFe_2O_4$, effective anisotropy, contributing factors 8=31735
- N–NiO films. magnetic after effect of ferro-antiferro magnetic coupling 8=49517
- TiO_2–Sb_2O_3–NiO system, comp., structure and colour 8=26039

Niobium
- b.c.c. lattices, energy of interstition of impurity atoms into octahedral and tetragonal positions 8=35542
- collector of thermionic diode, microhardness rel. to reliability 8=37377
- conductivity, thermal mixed state anisotropy 8=26604
- crystals, shear-stress strain-rate dependence, characterization 8=31220

Niobium—contd
- crystals, slip asymmetry studies 8=26697
- crystals slip and yielding at room temp. 8=26696
- density from X-ray determ. of lattice parameter and hydrostatic meas. 8=48670
- diffusion of V, coeffs. 8=35475
- diffusion in W, electrochem. sectioning tech. to determ conc. profiles 8=48797
- dislocation-Nb velocity, stress dependence, etching meas. 8=31085
- elastic constants, third-order, for mono-and polycrystals 8=40177
- electrode charging with hydrogen to produce pure hydride 8=27755
- electrodes for vacuum gap, breakdown voltage and prebreakdown current on cooling to 4.2°K 8=29909
- electron emission from (110), (100), (111) and (116) faces 8=40689
- electron reflection, 600 to 1200 keV 8=44197
- film deposition by d.c. diode and substrate bias sputtering 8=48455
- films, sputtered cylindrical, flux jumping phenomena 8=49472
- in mixed state, superconducting props., crystalline orientation depend. 8=35852
- oxidation, 450-720°C, kinetics rel. to scale morphology 8=49878
- oxidation mechanism from oxygen diffusion meas. in Nb_2O_5 crystals and scales on Nb 8=48785
- oxidation rate-constant determ., low-temp., from discontinuous film resistance changes 8=49883
- rolled, orientation distrib. of crystallites 8=35275
- single crystal, anisotropic energy gap obs. 8=27023
- sorption of O_2, kinetics 1100-1800°C at 5×10^{-5} and 5×10^{-4} torr 8=49895
- spark-machine notched, dislocation distrib. from etch figures 8=40042
- strain-ageing oxygen dependence 8=26835
- superconducting, a.c. losses near lower critical field 8=44727
- superconducting, anomalous magnetic behaviour 8=27383
- superconducting magnetization, n-irradiation effects ($E > 1$ MeV) 8=40379
- superconducting, microwave surface resistance meas. 8=49195
- superconducting, peak effect rel. to dissolved oxygen clusters 8=49192
- superconducting properties, influence of extended defects 8=49193
- superconducting proximity effect in contact with Cu and Ni 8=27026
- superconducting resistivity and Hall effect meas. 8=44724
- superconducting, resist. and magnetization, n-irrad. effects. obs. 8=43073
- superconducting, tunnelling characteristic detail in high purity single crystal 8=27025
- superconducting, and V in mixed state, nonlinear resistivity and dissipation 8=27027
- superconductivity, K_1 and K_2, theory /expt. discrepancy 8=31342
- surface self-diffusion in strong elec. field, field-emission exam., 8=39978
- u. s. attenuation near H_{c_2} 8=30949
- wetting by Cs and Na, rel. to bare work function 8=35168
- X-ray K-absorpt., fine structure at 300°, 77°, 4.2°K. obs. 8=41124
- Nb^{96}, carrier-free, prep. from Zr^{96}(p, n) 8=47322
- Nb-Al_2O_3 powder between Nb slabs, cermet seal for thermionic diode 8=28499
- Nb + 75% Zr superconducting magnet, for 85 kG 8=41937
- Nb-Zr, type II superconductor, spin-lattice relaxation 8=41005

Niobium compounds
- alloy substrates for non-electrolytic deposition of Ti from fused salts at high temps. 8=44063
- hydride production with high purity by electrolytic charging of Nb with hydrogen 8=27755
- hydrides (deuterides), structure and phase transitions, from n diffr. exam. 8=39725
- niobates, ANb_2O_6 structural comparison with ATa_2O_6 phases 8=48636
- oxidic niobates, cryst. struct. effect on luminesc. 8=45284
- superconducting alloy, instability, source 8=49198
- Nb complex, tetrabromobis (acetonitrile) Nb(IV), struct. and i. r. spectra 8=44241
- Nb oxide, prod. from columbite by ion exchange process with Ta 8=36544
- Nb_3(Al, Ge), β-tungsten phase, high-transition-temp. superconductor, props. 8=40376
- Nb_3(Al, Ge), superconductivity in high mag. field 8=44726
- Nb_3Al-20%Nb_3Ge, sintered, supercond. critical temp. increase by annealing, obs. 8=27019
- NbC, f. c. c. superconducting props., anomalous 8=27022
- NbC-graphite composites, elastic props., 8=49040
- $NbC_{0.64}$, C diffusion coeff. temp. dependence 8=31018
- $(Nb_6Cl_{12})^{n+}$ (n=2, 3, 4), electronic struct. and spectra 8=27595
- NbF_6^-, spin relax. and chem. exchange effects in F^{19} n. m. r. 8=34914

Nb-Zr-N films, reactively sputtered, superconducting props. rel. to comp. 8=43080

Nitrogen
abundance in solar photosphere 8=28171
active, chemiluminesc. reaction and anhydrous Na_2SO_4 8=41255
active, $N_2(A^3\Sigma_u^+)$ 8=38840

Nitrogen—contd
active, u.v. chemiluminescence from reactions with I_2, IBr, ICl and ICN 8=49887
adsorption and desorpt. isotherms for porous mats. rel. to pore struct. anal. 8=30659
adsorption and interact. of N_2 with Ni and Pd films 8=26138
adsorption by ice, isotherms rel. to surface struct. 8=30769
adsorption by W on (110) and (112) planes 8=39621
aerosol with oleic acid particles, sound attenuation and dispersion 8=43889
afterglow, kinetic and spectroscopic constraints 8=29897
afterglow, temp. depend. of chemiluminesc. 8=27712
afterglow, yellow intensity 8=47756
ageing effects on insulators 8=40556
arcs, d.c. wall-stabilized, static and recovery characts. 8=39011
atmospheric, fixation by transition metal hydride complexes 8=25521
atom, fifteen new emission lines in 10 000 to 11 000Å region 8=34144
atom, low-energy e scatt., polarization calc. 8=47527
atomic, in chemiluminescent reactions involving H_2, CH_4, N_2 and Ar 8=41245
atom, metastable (^2D), e.s.r. spectrum 8=25386
atom, photoionization cross-sections 8=39044
atomic, photoionization cross section meas. 8=29949
atoms, Rydberg orbitals calc. 8=29620
band systems, $b'\,^1\Sigma_u^+ \rightarrow X^1\Sigma_g^+$ and $g^1\Sigma_u^+ \rightarrow X^1\Sigma_g^+$, selective enhancement in vacuum u.v. 8=38841
boiling for cooling in X-ray crystallography 8=32992
breakdown, a.c. induced, statistical time lags effect 8=47760
charge transfer from p and H atom, cross-sections 8=38737
in chemiluminescent reactions involving atomic N, and CH_4, H_2 and Ar 8=41245
chemisorption and NH_3 synthesis of Fe purified in ultravacuum 8=41265
chemisorption on metals, expt. and theoretical results for heat of reaction 8=36585
compressibility, ≤ 10 000 atm and 400° C 8=34600
condensation in hypersonic wind tunnel 8=30599
cooling effect in high-vel. streams, on injection into reacting or non-reacting boundary layer 8=32958
diffusion in ZrN, film-thickness determ. 8=44396
discharge, waves of ionization 8=47745
dissociative ionization 8=29976
electron diffusion coeff. rel. to mobility 8=39238
excitation and ionization, simultaneous, by e impact 8=25717
freejet expansion from sonic orifice, rotational relax. and rel. to temp. 8=34629
gas, dilute, thermomagnetic torques, exptl. investigation 8=30287
gas electron transport coeffs. 8=39230
gas: NO_2 and I_2, stimulated thermal Rayleigh scatt., obs. 8=34665
gas, p bombard., Ep=0.56-1.7keV, spectrum obs. 8=43322
gas, viscous flow in strong mag. fields 8=34619
glow discharge, acoustic wave effects on pos. column 8=47747
hydrates, dielec. props. 8=49343
implanted in Si, impurity distrib. determ. 8=27131
interferometric analysis of conc. in gaseous mixtures. 8=49988
interstitial solute trapping in quenched and irrad. Fe 8=44420
ion bombardment of p-Si, donor props. 8=27128
ionization coeffs. 8=39042
ionization and excitation simultaneous, by e impact 8=25717
ionization states of some unidentified lines 8=43223
ions implanted in Si, distrib. 8=49266
ions, low energy, resonance charge exchange 8=47536
ions, N_2^+ excited states rot. and vibr. consts. calc. 8=38792
ions, $N^+ + O^-$ neutralization cross section, obs. 8=34455
isotopes, determ. by recording spectrometer 8=28817
isotope exchange between NO_2^- and NO_3^- 8=27673
isotope exchange between NO and NO_2^- 8=27674
liquid, bubble growth and collapse, rel. to subcooling and decreasing press. 8=34788
liquid, bubble motion study 8=34739
liquid, dielec. permeability meas. at ca. −190°C rel. to liq. air permeability calc. 8=30512
liquid, elec. conduction in diode cell 8=48200
liquid, stimulated Raman scatt., photon distrib. in Stokes components 8=34855
low-energy e stopping cross sections 8=47977
metals, H, O, N joint determ., isotope method 8=27784
molecular beam interaction with stainless steel surface 8=29854
molecule, electronic energy transfer from metastable Xe atom 8=29847
molecule, excitation by 1-12 eV electrons 8=29755
molecule N_2, charge exchange with He^+ and Ne^+, 2-250 eV 8=38758
molecules, N_2 ground state rot. and vibr. consts calc. 8=38792

Nitrogen—contd
molecules, trapped in rare gas matrix, e transitions perturbation 8=39523
multiply-ionized, beam-foil excitation 8=29644
in optical pumping of Cs, enhancement by quenching 8=47514
permeation, diffusion and soln. in W and Mo 8=39987
permeation rates and coeffs. in W, 1800° to 2600°C 8=44394
plasma jet, i.r. emission spectrum 8=30182
plasma jet, temperature determ. by spectroscopic methods 8=30183
plasma laminar jet, mean temp. determ. 8=34469
plasma, non-equilib., emission lines from finite layers, calc. 8=43543
Rayleigh scattering, depolarized, as new probe of intermolecular forces 8=39212
reactions with He^+ and O^+ in afterglow 8=41253
red giants, N^{14} burning before He flash 8=28055
shock-wave ionization, e temp. meas. 8=39221
solid, thermal capacity, 2.6-15°K 8=30967
solubility in Ta; 10^{-8}-10^{-3} torr, 1600-2300 °K, 0.0044-1 atomic %, press.-temp.-conc. ranges 8=49897
solubility of N in cold-deformed α-Fe 8=35543
solubility of water in compressed N_2 8=30302
sorption by Mo 8=49908
spark, laser-prod., expansion mechanism, obs. 8=34432
spectral radiation intensity, shock-tube heated 8=24399
in steel, conc. effect on brittleness, when subject to neutron irrad. 8=47405
thermal cond. and total emission coeffs., high-temp., expt. and theory 8=47955
thermionic emission from conductors, above 600°C 8=36046
vibrational energy relaxation with multiple quantum transitions 8=34640
viscosity, low-temp. 8=39237
CO_2 low conc., mass spectrometric determ. 8=32153
Cd 6^3S_1 level depolarisation in N_2 collisions, cross section, obs. 8=38692
K-N_2 collisions, mixing and quenching cross sections 8=29836
N^{14} data from proton spectra by double irradiation method 8=37537
N^{14} excitation, 8.5-11.5 MeV, by inelastic e scatt. 8=29654
N^{14} ion beams, lifetimes and excited states for multiply charged ions 8=43217
N^{14} ions, 115 MeV, radiation chemical studies 8=41289
N^{14} n.q.r. study of NO_2^- ion in simple nitrites 8=49666
N^{15}, spectrochemical estimation, enhancement by inert gas 8=27791
N^{16}, use in temp. meas. of outlet channel of AGR · 8=47435
$N_2^{28} + N_2^{30} \rightleftarrows 2N_2^{29}$ catalyzed by Mo 8=49908
N^+ ion beam, N_2^{2+} contamination 8=28583
N^+ mobility in dry air, obs. 8=39027
N II $2p^3$-$2p3s$ arrays, line strengths and transition probabilities 8=45915
$N + CH_3CHO \rightarrow HCN + H_2 + HCO$, mass spectrometric study 8=27710
N I, ionization limits 8=43488
N_2, absolute u.v. transition probabilities 8=34230
$N_2(A^3\Sigma^+)$. excitation of Hg 8=34163
$N_2(A^3\Sigma_u^+)$, excitation of NO 8=25494
$N_2(A^3\Sigma_u^+)$ in active N 8=38340
$N_2(A^3\Sigma_u^+)$, reaction with N atoms 8=25493
N_2, collision with He atom, rotational excitation 8=25666
N_2 density and temp. altitude profiles from ground to 300 km, diurnal variation 8=41339
N_2 density and temp. in thermosphere, diurnal 8=36774
N_2 density in lower thermosphere above Sardinia, mass spectrometric determ. 8=27939
N_2, dipole-allowed absorpt. spectrum, absolute f values 8=34264
N_2 discharge, evidence for $^3\Delta_u \rightarrow B^3\Pi_g$ transition 8=47608
N_2, dissociation in shock tube, vac. u.v. absorpt. 8=25651
N_2, effect of O atoms on vibr. relax. 8=47724
N_2, excitation of N_2^+ by vac. u.v. photon impact 8=47609
N_2, first positive system excitation 8=38994
N_2 gas, hot, thermodynamic functions, approx. calcs. 8=47954
N_2 gas, ionization by 0.2-1.8 MeV He^+ ions, effective cross sections 8=39035
N_2, ground and ionized states, potential energy calc. 8=25492
N_2 interaction with Ti, and form. by Ti sorption and diss. of NH_3 8=32103
N_2, $K(b^1\Pi_u) \leftarrow X$ transition, u.v. absorpt. 8=25491
N_2 lasers, high power, parameters affecting power output 8=37572
N_2 mol., Cs-N_2 collisions, cross-section obs. 8=38957
N_2 number densities in thermosphere above Fort Churchill and Sardinia 8=36761
$N_2(1+)$ band system, e transition moment obs. 8=34262
N_2, potential energy curves of ground and ionized states, LCAO calc. 8=43320
N_2 reactions with He^+ in upper atm. 8=27937
N_2, Stark broadening 8=34272
N_2, Vegard-Kaplan bands, intensity obs. 8=34265
N_2 vibr. excitation due to 2-3 eV electron scatt., energy depend. oscills. due to motion of nuclear wave packet 8=43311

Nitrogen—contd
N_2, vibr. relaxation calc. 8=43263
N_2, viscosity, dynamic, meas. to 500°C, and statistical mech. correls. 8=43704
N_2^+, absolute u.v. transition probabilities 8=34230
N_2^+ atm. emission, tropospheric scatt. model 8=41365
N_2^+ aurora zone daytime, rocket spectra 8=45483
N_2^+ band excitation by e-impact (80-1500 eV) 8=25490
$N_2^+(B^2\Sigma_u^+)$, from rot. and vib. energy transfer in N_2 collision with atomic ions 8=39046
N_2^+, fluoresc. spectra from vac. u.v. photon impact 8=47609
$N_2^+ + H_2$ and $N_2^+ + D_2$, low energy ion-mol. reactions 8=27711
N_2^+ ions, excitation by electrons, at near threshold energies 8=47523
$N_2^+(1-)$ ion, first negative bands, e transition, dipole moment, matrix element square determ. 8=29752
N_2^+, Stark-broadened rot. lines, shapes and widths 8=34259
$N_2^* + Ar$ collisions, ionization cross section enhancement, obs. 8=34454
N_2^{-2} state e spectra, obs. 8=34224
N_2^{2+}, charge exchange in N_2, CO_2, and Ar 8=29974
N_3^-, SCF minimal basis set calc. 8=29719
N-He mixture, mass and thermal diffusion coeff. meas. 8=43706
N-I_2 flames, i.r. emission 8=49890
N-N pairs in GaP, energy levels 8=49803
N_2-O_2 diving atmosphere, non-combustion region 8=49884
N_2-O_2, solid-state phase diagram 8=35117
TiNb33, N addition rel. to supercond., microstruct. and workability, obs. 8=44742
TiNb40, N addition rel. to supercond., microstruct. and workability, obs. 8=44742

Nitrogen compounds
charge distribution, molecular spectroscopy by ESCA 8=47604
double nitrates: Pr^{3+}, mag. resonance lineshapes 8=31881
metal thiocyanate molten solns., i.r. spectra 8=25934
nitrite salts, inorganic, luminesc. 8=49810
nitroxide free radical, proton resonance at 310 MHz 8=43415
HNCO, SCF minimal basis set calc. 8=29719
HNO_3-N_2O_4-H_2O solns., phase diagram to −196°C 8=43903
HN_3, SCF minimal basis set calc. 8=29719
N^{14} n.q.r. study of NO_2^- ion in simple nitrites, N^{14} n.q.r. study 8=49666
NCN, singlet and triplet states 8=25495
NCN_3, flash photolysis 8=25495
NCN_3, microwave spectrum 8=25496
NCO^-, SCF minimal basis set calc. 8=29719
NCl_3 in CCl_4, raman spectrum at high resoln., 8=43838
$N^{14,15}ClO_3^{2-}$ anion, i.r. absorpt. spectra 8=29754
ND, $(A^3\pi_i$-$X^3\Sigma^-)$ system, rotational analysis of (2, 2) band 8=38843
N_2D_2, vacuum u.v. absorpt. spectra 8=34267
NF, $b^1\Sigma^+$-$X^3\Sigma^-$ band system 8=25497
N_2F_4, Raman spectrum and struct. 8=38839
NF_3, force field and molec. consts. 8=43319
NF_3, rotation absorpt. spectrum in range 10 to 50 cm^{-1} 8=34260
NH_4 mol., evidence 8=47610-11
NH...H intramolec. H bonds 8=25609
N_2H_2, extended Huckel treatment 8=25509
N_2H_2, i.r. and vacuum u.v. absorpt. spectra 8=34267
N_2H_4, vac.-u.v. photolysis 8=36613
$N_2H_4^+$, e.s.r., temp. depend. 8=47685
NH_2CN, microwave spectrum, N^{14}-quadrupole coupling 8=43297
$NH_4H_2AsO_4$, (ADA) elastic, piezoelectric and dielectric constants 8=27298
$NH_4H_2AsO_4$(ADA) resonator plate, low temp. coeff., props. 8=27299
$NH_4H_2AsO_4$, n.q.r. spectra, rel. to temp. 8=41009
$NH_3OH\ Al\ (SO_4)_2 . 12H_2O$, n.m.r. 8=40983
NO, adsorbed on zeolites, i.r. spectra 8=27553
NO, absolute u.v. transition probabilities 8=34230
NO afterglow discharge, photoionized, e recomb., attachment and ambipolar diffusion obs. 8=47755
NO afterglow, temp. depend. 8=38993
NO, combined Zeeman and Stark effects 8=25498
NO, e beam dissoc., O prod. cross-section obs. 8=47703
NO, effect on muonium, and on polarization of bound muon 8=42482
NO, eqn. of state, 190°-2000°K 8=43676
NO, excitation by $N_2(A^3\Sigma_u^+)$ 8=25494
NO, heterogeneous $(^2\Sigma-^2\Pi)$ interactions 8=34268
NO in H_2O, radiolysis study 8=49975
NO, intensity of fundamental band 8=25499
NO, ionosphere D-layer production 8=32323
NO, ionosphere D region height distribution and recombination coeff. 8=50191
NO, Λ doublets in mag. field 8=29758
NO, linewidth of $J = 1/2 \rightarrow 3/2$ rot. absorpt. 8=47605
NO, luminesc. during u.v. photolysis 8=34266
NO magnetoplasma, electron energy relax. 8=47815
NO, mesosphere upper, vertical motions and distribution 8=45485
NO mols. trapped in rare gas matrix, e transitions perturbation 8=39523

Nitrogen compounds—contd
NO and NO_2^-, exchange and fractionation of N isotopes 8=27674
NO and NO_2, in mesosphere, role in governing electron conc. 8=27880
NO, photoelectron spectrum 8=47606
NO production around 100 km 8=41442
NO, pure rotational spectrum 8=25500
NO, rate consts. for charge exchange with quasithermal ions 8=29975
NO, role in sunrise E-region, from density profiles and NO^+/N_2^+ ion ratios 8=36857
NO, rotating resonance on transitions between Zeeman levels in mag. field rel. to hyperfreq. elec. field meas. 8=38846
NO soln. in H_2O, D_2O; photolysis at 1849Å 8=49958
NO, sorption and mag. susceptibility on Pd 8=44075
NO spectra by double-beam, two-beam interferometry far i.r. 8=28818
NO trapped in NH_3OHCl, X-irradiated, e.s.r., and of radical pairs and V_K centres 8=31878
NO, 2 isotopes, comparison of rotational and spin-orbit coupling consts. 8=43325
NO^{-1} state e spectra, obs. 8=34224
NO^+, absolute u.v. transition probabilities 8=34230
NO^+ + e dissociative-recombination-rate coeff. temp. dependence 8=29958
NO^+ in E-region of ionosphere, effects of metal-ion layers 8=36858
NO^+, electronic states 8=47606
NO–N_2 mixture, diffusion, Senftleben effect 8=30316
NO + O, afterglow mechanism 8=32274
NO_2, absorption in lower stratosphere 8=27877
NO_2, adsorbed on zeolites, i. r. spectra 8=27553
NO_2, adsorbed on ZnO, e.s.r. 8=48499
NO_2, e.s.r. in cryst. N_2O_4 matrix 8=45094-6
NO_2, e.s.r. in frozen solns. 8=45093
NO_2, first ionization potl. and vibr. struct. obs. 8=43487
NO_2 in ionosphere D layer, non polar region, concentration changes after sunset 8=50191
NO_2, luminesc. during u.v. photolysis 8=34266
NO_2, molecular consts. from near i.r. spectrum 8=43326
NO_2, 2491Å electronic transition 8=25503
NO_2^-, charge distrib. in ferroelec. $NaNO_2$ 8=48308
NO_2^-, double-ζ LCAO SCF MO calc. 8=29756
NO_2^- and NO_3^-, exchange and fractionation of N isotopes 8=27673
NO_2^- state e spectra, obs. 8=34224
NO_2, CO, Cl; reactions at 381-473°C. kinetic eqn. setup 8=49857
$2NO_2 \rightleftarrows 2NO + O_2$, thermal separation 8=47986
NO_2 + H, free electron generation 8=49872
NO_3 configuration in $Ba(NO_3)_2$ crystals, from n-diffr. 8=39773
NO_3^- in $NaNO_3$, KNO_3 and $CsNO_3$ near 600°C, i. r. emission spectra 8=38842
NO_3^-, u. v. spectra in molten alkali metal nitrates 8=30489
N_2O absorpt. spectrum rel. to SISAM resolution, 4.5μ 8=28823
N_2O, adsorbed on zeolites, i. r. spectra 8=27553
N_2O band in ammonia, cross-correlation obs. 8=42230
N_2O, chemisorption of both N and O atoms by W, rel. to temp. 8=36586
N_2O, electron attachment, structural resolution 8=39045
N_2O, luminesc. during u.v. photolysis 8=34266
N_2O, N^{14} quadrupole coupling from microwave spectrum 8=25505
N_2O, quadrupole moment, from microwave spectral broadening 8=29729
N_2O, spectral transmission in near i.r. bands, calc. 8=25506
N_2O strength of bands near 4.5μ 8=34263
N_2O^- state e spectra, obs. 8=34224
N_2O^+ and NO excitation, lifetimes and decay cross-sections 8=34261
N_2O_4 gas, P-V-T dependence 8=30280
$N_2O_4 \rightleftharpoons 2NO_2$ system, diffusion of Kr 8=34681
$N_2^{14}O$ and $N_2^{15}O$ for meas. in mixed γ and thermal neutron fields 8=46921
$N^{14}O^{16}$, l.f. satellite band 8=25501
$N^{14}O^{16}O^{17}$, microwave spectrum 8=25504
$N^{15}O^{18}$, vibr. rot. bands 8=25502
$NOIrF_6$ and isotypes, structure from n-diffr. studies 8=25469
$NOPtF_6$ and isotypes, structure from n-diffr. studies 8=25469
$N_4P_4Cl_8$, T form, crystal structure 8=48665
ammonia
adsorbed on Si, vibrations obs., rel. to bonding strength 8=25508
adsorbed on W (100) surface, LEED obs. of electron impact effects 8=26140
adsorption and decomp. on W, field-emission meas. 8=27734
alkali metal-NH_3 solns., internal reflection spectra 8=30490
ammonia-nitrogen viscosity 30°-200°C, below 10cm Hg press: Chapman-Enskog theory 8=43702

Nitrogen compounds—contd
ammonia—contd
collision-induced transitions between rot. levels 8=47612
crystals, lattice vibrs. calc. 8=30926
crystals, stress relaxation 8=35708
ionization energy from NH_4I and $NH_4I(Tl)$ spectra 8=32014
leak detection equipment appl. 8=39258
liquid, solns. of KNH_2, absorpt. spectra 8=39380
maser two-cavity meas. of 3-2 inversion freq. and freq. stability 8=24267
matrix-isolated, i. r. obs. of nuclear-spin-species conversion 8=38830
mixture with methane, laser discharge emission spectral obs. 8=33190
molecular struct., using wavefunction of double minimum potentials 8=25507
oxidation in shock waves 8=41256
photoionization, ion-mol. reactions 8=36612
reaction with hydride ion, MO theory 8=27678
rotational lines, Stark effect observed by far i. r. laser 8=38845
solid, thermal conductivity, 28-114°K 8=35460
sorption of Ti, and dissociation to H_2 and N_2 8=32103
synthesis of Fe purified in ultravacuum and N chemisorption 8=41265
synthesis on Mo catalyst 8=49909
thermal cond., 273-1173°K, also with Ar and Ne 8=47962
thermodynamic props. as ideal gas 8=47960
AgBr, recrystallization and photosensitivity effects 8=30821
Li-NH_3 soln., u. s. vel. obs. and compressibility calc. 8=30468
Na-NH_3 liq. solns., dynamic polarization 8=34925
ND_3, deuteron spin lattice relaxation 8=48217
NH_2^- ion reactions with triatomic mols. 8=29980
NH_3-Pt complexes, far i.r. spectra 8=43330
NH_3-methylamine gas mixtures, heat cond. 8=34644
NH_3 and ND_3, anharmonic consts. and average struct. 8=29753
NH_3-O_2 mixtures, ignition by shock waves 8=27729
$N^{15}H_3$, h. f. s. inversion transition obs. 8=47607
ammonium compounds
and acetonitrile intermol. dipole-dipole interaction, spectral C≡N band shift obs. 8=30487
ammonium, atmosphere, particle size distribution obs. 8=50129
ammonium pentaborate, production of second harmonic of light 8=41167
oxalate, non-linear optical props. 8=36443
phase transitions. neutron scatt. determ. 8=48393
quaternary halides, i. r. spectra, C-N vibrs. 8=38844
salts, phase changes 8=35116
NH_3^+ substituent in π-electron systems, inductive effect 8=25525
NH_3OHCl, X-irradiated, e.s.r. of V_K centres, radical pairs and trapped NO 8=31878
NH_4^+, n. m. r. coupling consts. and isotope shifts 8=29820
$NH_4Ag_4I_5$, ht. of formation 8=48396
$NH_4Al(SO_4)_2 . 12H_2O$, n.m.r. 8=40983
NH_4Br, l. f. vibrs. 8=27596
NH_4Cl, effect of impurities on spin-lattice relax. 8=40955
NH_4Cl, electro-optic effect, linear, electronic contrib. 8=36397
NH_4Cl, l. f. vibrs. 8=27596
NH_4Cl lining of composite coating, rate of decomp. 8=30958
NH_4Cl, long range order parameter by neutron diffraction 8=44242
$NH_4Cl : Mn^{++}$, e.s.r. spectrum, temp. depend. 8=49614
$NH_4Cl : VO^{2+}$, e. p. r. linewidths 8=45103
NH_4ClO_4, sublimation kinetics 8=30609
NH_4ClSnO_3, elastic constants, determ. by optical method 8=26837
$(NH_4)_2CrO_4$ annealing of interstitials formed by Szilard-Chalmers recoil, crystal size effect 8=31049
$(NH_4)_2Cr_2O_7$, absorpt. spectrum at 2°K 8=45212
NH_4F in ice, dielec. relax. time actuation energy 8=44869
NH_4F, phase diagram to 20 kbar 8=34960
NH_4HF_2 in anhydrous HF, electrolysis 8=45391
NH_4HF_2 in HF, electrolysis and subsequent i. r. analysis, cell requirements and construction 8=36606
$NH_4H_2PO_4$, antiferroelec. phase transition, group theory 8=31439
$NH_4H_2PO_4$, antiferroelectric, spontaneous polarization temp. dependence 8=40624
$NH_4H_2PO_4$ crystal, as basis for laser with half-wave Q-factor modulator 8=24323
$NH_4H_2PO_4$, c. w. parametric scatt. with strong absorption in idler band 8=36394
$NH_4H_2PO_4$, electro-optical props., contribution of quadratic effect 8=32015
$NH_4H_2PO_4$, optical parametric scattering 8=45211
$NH_4H_2PO_4$, optical second harmonic generation, effects of He-Ne laser focussing 8=45139
$NH_4H_2PO_4$, paraelec. phase, crystal structure from e. diffr. exam., 8=39816
$(NH_4)H_2PO_4$, precipitates and dislocations exam. by X-ray diffr. microscopy 8=26691
$NH_4H_2 . PO_4$, search for mag. field induced optical second harmonic 8=45140

Nitrogen compounds—contd
- **ammonium compounds**—contd
  - $NH_4H_2PO_4$ spontaneous scatt. of intense light, quantum theory 8=27538
  - NH_4I, cubic and tetragonal magnetization coexistence, proton spin-lattice relaxation determ. 8=40740
  - NH_4I and $NH_4I(Tl)$, absorpt., luminesc. and excitation spectra 8=32014
  - NH_4I polycrystalline, e diff. exam. 8=35343
  - NH_4I-AgI, high-cond. solid systems 8=48396
  - $(NH_4)_2Ir; PtCl_6$, i.r. spectrum and exchange coupling between Ir^{4+} ions 8=32002
  - $(NH_4)_2Mn_2(SO_4)_3$, langbeinite structure, growth and electro-optical props. 8=39678
  - NH_4-NH_4 proton exchange in liq. NH_3 8=27675
  - $NH_4[SC(S)(NH_2)]$ polymorphism 8=48517
  - $(NH_4)_2SO_4$. Cu^{2+}, e.p.r. 8=40940
  - $(NH_4)_2[Sb_2(C_4H_2O_6)_2$. $5H_2O$, crystal structure 8=26416
  - $(NH_4)_3(VO_2F_4)$, space group, unit cell 8=35344
  - $(PO_3)_3CoNH_4$, orthorhombic crystal structure 8=26382

Nobelium

- Pu^{242} heavy-isobar field in explosion n flux rel. to supernovae reactions, obs. 8=38495
- U^{238} heavy-isobar field in explosion n flux rel. to supernovae reactions, obs. 8=38495

Novoids. See Novae.

Nuclear acoustic resonance. See Absorption/acoustic waves, ultrasonic; Nuclear magnetic resonance and relaxation.

Nuclear alignment. See Nuclear orientation.

Nuclear bombardment targets
- alkaline earth metal stearate, for CERN isotope separator ISOLDE 8=38768
- for bevatron, secondary beam extraction 8=33486
- for boson resonance obs. 8=24841
- gas, windowless for high power beams 8=33395
- liquid, circulating, for isotope on-line separator 8=38605
- manipulator developments 8=33367
- neutron generator target current integrator for wear meas. 8=47142
- optimum design for 14 MeV n yield 8=24946
- polarized p, horizontal cryostat 8=24939
- positive-ion beam target for accelerator 8=33398
- radiative capture obs., thick-target technique 8=33369
- reaction yield increased by accel. projectile between a series of targets 8=29396
- rotating neutron target system 8=33396
- Rutherford scatt. appl. to thickness meas. 8=46850
- thick, effect on p beam monitor reactions 8=25221
- thin rotating, heat transmission calc. 8=37780
- tritium-Ti target, rate of decrease of n yield in accelerators 8=33785
- water cooled for intense ion beams 8=33397
- Al^{27} (p, 3pn) Na^{24}, target thickness rel. to secondary particle prod. affecting p flux monitoring 8=33994
- Au-W thick, bremsstrahlung spectra, meas. 8=33621
- C(α, n) rate obs. in thick targets 8=43141
- H_2 liquid, mechanical refrigeration 8=46849
- Ni foils, thin, proton scattering, 15-90 keV 8=29432
- $La_2Mg_3(NO_3)_{12}$. $24H_2O$ crystal, 660 MeV p elastic scatt. 8=48924

Nuclear decay schemes. See Radioactivity/decay schemes.

Nuclear decay theory
- See also Beta decay theory; Nucleus/theory.
- α-decay, individual shell model 8=25171
- α-decay, microscopic theory and deformed nuclei hindrance factors rel. to struct. 8=29355
- α-emitters, predicted, in A < 200 region 8=38406
- α, for heavy nuclei reassessment of interaction between α and residual nucleus 8=33954
- α-recoil atoms conversion e lines deform. in elec. field 8=29287
- α, rel. to nuclear surface struct., barrier penetrabilities calc. 8=29262
- magic nuclei far from stability, p and n emission, prompt and delayed 8=38328
- μ-capture, "elementary particle" weak-interaction theory 8=33955
- n emission, delayed, systematics 8=38404
- odd-odd deformed nuclei, α decay to vibrational levels 8=47277
- super-heavy nuclei, radiation widths rel. to n capture and nucleosynthesis, mass formula 8=38324
- Z ~ 65 nuclei, high J states dominant α-decay, statistical model 8=38405
- Am^{241} α-decay rel. to Np^{237} levels obs. 8=33946
- As^{74}, matrix calc. by pairing model 8=42946

Nuclear emulsions. See Nuclear track emulsions.

Nuclear excitation
- See also Mössbauer effect; Nucleus/energy levels.
- analog state escape calc. of damping and escape width 8=25135
- collective states, coupling with particle and hole states, perturbation series approximation 8=38356
- compound nuclei, by slow neutrons, level density 8=38333
- deformed nuclei by spin-quadrupole forces, collective states 8=38329
- deformation as a function of Z number in pairing-plus-quadrupole model 8=25055

Nuclear excitation—contd
deformed odd nuclei, single-particle orbits $\Delta N = 2$ mixing 8=29270
dynamic collective theory appl. to photodisintegration of Ni 8=25209
e. m. interaction operators and nucleon-nucleon potentials 8=29278
E2 transitions 8=42823
fissioning symm. nucleus energy calc. using geometric model 8=38526
h. f. interactions caused by e hole formation obs. 8=47271
"heated" nuclei, mean radiative widths 8=29284
by high energy particles 8=33882
intermediate resonance, doorway state model 8=42982
isomers, cross-section depend. d(γ, γ^1) reaction, review of research, (1939-67) 8=33889
level density at 20 MeV 8=42811
light nuclei spectra, rotator model, rotation particle coupling effects 8=25050
multiple Coulomb, quantal effects 8=29281
multiple Coulomb, pulse approximation accuracy 8=29280
negative parity N isobars, rel. to quark model 8=25003
octupole vibrations in deformed heavy nuclei 8=42819
odd-mass nuclei, resonance fluorescence and absorpt. meas. of transition strengths, 0. 8-3. 0 MeV 8=42875
by pulsed-beam techniques, meas. of perturbed angular correlation 8=42810
resonances in $O^{18}(n, \alpha)C^{15}$, 7. 5, 8. 6 MeV 8=47326
by single-N-transfer, multipole sum rules appls. 8=25078
s-wave virtual states and resonances in R- and S-matrix terms, distinction 8=42803
(t, d) reaction at low energies, spectroscopic obs. of low-lying states 8=43050
$Ag^{107,109}$ by 42 MeV α scatt., obs. 8=43077
Al^{26}, spectrum of closely spaced levels, 2. 07 MeV 8=42851
Al^{27} and Al^{28} mean energy level width at high excitation energy 8=47237
Al^{27}, from resonance γ-decay in $Mg^{26}(p, \gamma)$, 9. 991 Me V and 10. 165 MeV levels 8=33903
$Al^{27}(p, \alpha)$ Mg^{24}, excitation function fluctuations 10. 9-19. 7 MeV 8=38473
$B^{10}(N^{14}, N^{13})B^{11}$, neutron tunnelling and nuclear spectroscopic factors extraction 8=43101
Be^7 compound nucleus, resonance parameters determined from cross sections of Li^6 (p; p, $He^4)Li^6$, He^3 8=42832
Be^8 resonance in $Li^7(p, \gamma)Be^8$, 1. 4-2. 5 MeV 8=47320
Bi^{208} from Bi^{209} (d, t), neutron-hole multiplets 8=38398
Bi^{208} from Pb^{207} (He^3, d), proton-particle multiplets 8=38398
Bi^{209} analogue resonances, proton decay of Pb^{208}, γ-ray transitions obs. 8=47264
C^2. nuclei. resonance energies and partial widths of quasimolecular states formed 8=43097
Ca^{40}, giant resonance excited by γ absorpt. 8=47307
$Ca^{40}(N^{14}, N^{13})Ca^{41}$, neutron tunnelling and nuclear spectroscopic factors extraction 8=43101
Ca^{42} from $K^{41}(He^3, d)$ reaction, particle hole states up to 5. 79 MeV obs. 8=47243
Cl^{38} isobaric analog states in Ar^{38} studied by p scatt. from Cl^{37} 8=25118
Cl^{36} isobaric analogues obs. in $Cl^{35}(p, \alpha_n)S^{32}$ 8=25230
Cu^{65}, resonance fluoresc. obs. 8=42883
$Cu^{65}(t, \bar{\alpha})Ni^{64}$, core excitation of 5^- state, 3. 856 keV 8=43066
Fe^{56} rel. to intermediate struct., n total cross section, 0. 5-1. 2 MeV 8=29469
Ge^{69}, hyperfine interactions of excited nuclear states, g factor meas. 8=42810
Hg^{197m} h. f. interaction caused by e hole formation 8=47271
$In^{113,115}$ by 42 MeV α scatt., obs. 8=43077
Ir^{193} core excitation 8=42918
Mg^{24}(p, 2p), spectroscopic analysis, 156 MeV 8=43024
Na^{23}(p, 2p), spectroscopic analysis, 156 MeV 8=43024
Nb^{91} obs. in $Zr^{90}(He^3, d)Nb^{91} \rightarrow Zr^{90}$ 8=25275
Ne^{10}, molecule-like structure from rotational bands study 8=47231
O^{16} from $C^{13}(He^3, \alpha)_{15\cdot1}C^{12}$ $T = 0, 1$ α states in O^{16} obs. 8=42840
O^{16}, giant dipole resonance, structure through obs. of $C^{12}(\alpha; n, p)O^{15}$, N^{15} 8=43084
O^{16}giant resonance levels excited by electron scatt. 8=42843
O^{16*}, molecule-like structure from rotational bands study 8=47231
$Pb^{207, 208}$ analogue resonances due to proton scatt, calc. 8=38466
Pb^{207} h. f. interaction caused by e hole formation 8=47271
Pb^{211} analog resonance obs. in $Pb^{208}(t, p)Pb^{210}$ 8=25158
Pr^{141} isobaric, analog resonance, transition to $2d_{5/2}$ ground state 8=42927
Ru^{100}, excited states study by decay of Rh^{100} 8=29321
Sb, odd mass isotopes, spectral props. calc. using core-particle-coupling 8=42894
$Sb^{121,123}$ by 42 MeV α scatt., obs. 8=43077
$Sc^{46}-Ti^{46}$, isobaric analog states in $Sc^{45}(He^3, d)Ti^{46}$ and $Ti^{47}(He^3, \alpha)Ti^{46}$ 8=25127
Sc^{49}, analog levels, fragmentation calc. comparison with expt. 8=42872
Si^{28}, giant resonance excited by γ absorpt. 8=47307
Si^{28}, nucl. reson. fluoresc. anisotropy meas. 8=30631

Nuclear excitation—contd
Si^{28}(p, 2p), spectroscopic analysis, 156 MeV 8=43024
Si^{29} by p scatt., p spin flip in 2^+ state obs. 30, 40 MeV 8=43009
$Sm^{148, 150, 152, 154}$, by Coulomb excitation with O^{16} 8=38387
$Sn^{112,116,118,120,122,124}$, Coulomb excitation by α at 10 MeV, obs. 8=42890
$Sn^{116,117,118,119,120}$, 34. 4 MeV α scatt., quadrupole and octupole 8=47352
Sn^{124}, Coulomb by N^{3+} rel. to energy levels, 44 and 48 MeV 8=29326
Ta^{181} 482 KeV state by stopping π, evidence 8=42912
$Te^{122,130}$, Coulomb by N^{3+} rel. to energy levels, 44 and 48 MeV 8=29326
$Ti^{48}(p, \gamma)V^{49}$, γ-ray spectra of analogue resonances 1, -1. 4 Mev 8=42806
U^{235}, 22 MeV, n fission products obs. 8=25281
U^{236}, fission fragment mass and charge distrib. 8=43117
U^{238}, p-wave resonance $E_n = 0.200$eV obs. 8=42928
V^{51} rel. to intermediate struct., n total cross section, 0. 5-1. 2 MeV 8=29469
$W^{182,183,184,186}$, Coulomb excitation of lowest states 8=42915
W^{183}, Coulomb excitation by protons and Mossbauer effect 8=47262
Y^{89}, $E_n = 4.2$ MeV, bound levels obs. 8=42886
Y^{89} for analog state in p-Sr^{88} scatt., calc. of damping and escape widths 8=25135
Zr^{90}, isobaric analog resonances in p + Y^{89} scatt. 8=25137
Nuclear explosions. See Explosions/nuclear.

γ-ray, X-ray and conversion e emission, obs. 8=38527
in gas conduit, deposition from laminar stream, models 8=34060
gases, short-lived isotopes separation, on-line system 8=38771
inert gases, isotopes decay schemes, on-line separator obs. 8=38545
neutrons, prompt, average number and energy calc. 8=34061
recoil in heterogeneous pyrocarbon structures of varying porosity 8=43127
semiconducting layer structures, fragment tracks 8=44487
separation and yield, ionic and decay props. meas. 8=38543
separation, focusing parabola mass spectrometer 8=43129
separation, mass spectroscopic, and short-lived radiations obs. 8=43130
separation, mass-spectroscopic principles and gas-filled separator 8=38544
in Sicral F$_1$, gas bubbles rel. to irrad. swelling 10^{14} n/cm^2 sec 8=44506
in Sicral F$_2$, gas bubbles rel. to irrad. swelling 10^{14} n/cm^2 sec 8=44506
trapping plant, testing with methyl iodide, experience 8=34111
tritium, diffusional release from BeO, on post.-irrad. annealing 8=25317
yield-mass distrib., ratio circuits 8=47364
n yield var. with fragment mass, semi-empirical curves 8=34063
Ag^{108}, p-induced, evaporated products, characts. calc. 8=25283
As^{83,84,85,87,} half-lives and chem. separation, obs. 8=38419
Be^7 fragments from p-irrad. Ta, Pb, U, obs. 8=43115
Br^{80}, p-induced, evaporated products, characts. calc. 8=25283
Ce^{144} determ. in coated fuel particles 8=47404
Cf^{242,243,244,245,246} production cross sections, from U^{233,234,235,236,238} + C^{12} reaction 8=43106
Cf^{252}, long range α fission props. of neutrons emitted 8=38541
Cf^{252}, long-range fragments yield obs. 8=42976
Cf^{252}, response of double-scintillator detectors 8=37790
Cf^{252}, spontaneous, light nuclei emissions 8=43125

Nuclear fission—contd
products—contd
Cf^{252}, spontaneous, prompt n and γ spectra, and level densities 8=25278
Cs^{137} determ. by β-γ coincidence counting while meas. γ ray spectrum with NaI(TI) analyzer 8=47360
Cs^{137} determ. in coated fuel particles 8=47404
I^{135}, yield ratios from U^{233}, Pu^{239,241} rel. to U^{235} 8=38540
Ir^{191,193}, by 42.2 MeV He^4, cross-section obs. 8=43119
K X-ray meas., bent-crystal spectrometer 8=34062
Kr, gas, mobility and trapping in UO$_2$ and UC fuel elements 8=25318
Kr^{90,91,92,93} from U^{238}O$_2$-stearate source, separation, γ spectra and decay periods, obs. 8=38549
Na^{22,24} fragments from p-irrad. Ta, Pb, U, obs. 8=43115
Na^{24} from p-irrad. noble metal and U targets 8=43116
Ne^{24} from p-irrad. noble metal and U targets 8=43116
Np^{237}, n-induced, fragments kinetic energy obs. 8=47357
Pb^{206} fission by He^4, fragments angular distribs., obs. 8=38527
Pu^{239}(d, pf), ang. correl. obs. 8=43070
Pu^{240}(n, f), subthreshold fission, resonance grouping structure 0.2-8 keV 8-38550
Ra^{226}, angular distrib. of fragments 8=25280
Ra^{226}, photofission, anisotropy of fragments 8=25285
Sr^{90} determ. in coated fuel particles 8=47404
Th^{232}, 1.5-3.3 MeV, n induced n yield obs. 8=38532
U^{233} thermal fission fragments meas. and charge distrib. obs. 8=29534
U^{235}, fission γ-ray spectra, anisotropy obs. 8=47365
U^{235} fission, x- and γ-ray spectra, 30-300 keV 8=38547
U^{235}, identification of 5.3-sec. Ag^{118} 8=43123
U^{235}, 0.4-3.3 MeV, n induced n yield obs. 8=38532
U^{235} photofission, 25 MeV, kinetic energies of pair fragments 8=38537
U^{235}, prompt α-rays angular anisotropy rel. to fragments energy, obs. 8=29537
U^{235} prompt emission, n induced fission, 7-14 MeV 8=29529
U^{235}, thermal-n, Ga^{77} identification and fractional chain yield 8=43113
U^{235}, thermal-n, identification of 5.0-sec. Pd^{117} 8=43124
U^{235}, 22 MeV excitation, obs. 8=25281
U^{235} $\bar{\nu}$ energy spectrum calc. 8=42992
U^{235,233} and Pu^{239}, comparison of n energy spectra 0.8 to 16 MeV 8=38536
U^{236}, by He$^+$, fragment mass and charge distrib. 8=43117
U^{238}, by 6-9 MeV n, mean kinetic energy obs. 8=25282
U^{238}, by 39MeV He^4, ternary fission evidence 8=43118
U^{238}, Ne^{22} ion induced, fragment mass distribution, γ-ray analysis 8=29539
U^{238}, neutrons, evaporation and fission spectra, 800 keV-14 MeV 8=34018
U^{238}, 14 MeV neutrons, cumulative yields 8=47361
U^{238}, proton induced, lifetime meas. using blocking in crystals 8=38533
U^{238}, p induced., n distrib. rel. to fragment mass 8=43122
U^{238}, ternary fission, fragment masses and α angular distrib., obs. 8=29536
93.15 wt%U^{235} subcritical cylinders, reactivity and prompt-n
U migration, decay products in minerals 8=48796
α-U, solid prods. segregation rel. to irrad. swelling 8=44507
in U-Mo 1, 1 alloy, gas bubbles rel. to irrad. swelling 10^{14} n/cm^2 sec 8=44506
in U-Mo-Al-Sn, gas bubbles rel. to irrad. swelling 10^{14} n/cm^2 sec 8=44506
UO$_2$ fuel particles, gas release rate rel. to fission density obs. 8=38592
in UO$_2$ fuel, solid elements anal. after burn-up 8=25286
UO$_2$ particle surface segregation of Mo and Ba 8=29538
in (U$_{0.85}$Pu$_{0.15}$)O$_2$ fuel, irrad., metallic fission-prod. inclusions, obs. 8=29557
Xe from U^{238}O$_2$-stearate source, separation and daughter activities 8=38549
Xe, gas, mobility and trapping in UO$_2$ and UC fuel elements 8=25318
Xe release from sintered UO$_2$ at low temp. 8=26624
Xe^{133} doping of metals 8=48766
Xe^{133} isomeric yield ratios from proton fission 8=47362
Z distrib., fine struct. rel. to closed shells and pairing, obs. 8=38548
Zr^{95} determ. in coated fuel particles 8=47404

uranium
buckling and migration area, sub. crit. meas. 8=38588
decontamination by reaction of U with SF$_6$ 8=43128
growth and elec. resistivity changes during burn up with thermal n.s. at 4.6°K 8=48933
migration, decay products in minerals 8=48796
in minerals, fission fragment tracks made visible by chemical etching 8=32185
neutron dosimeter 8=33794
proton induced binary and ternary fission, 3-24 GeV 8=34059
Cs yield in p-fission, mass spectram 128 $\leqslant$ A $\leqslant$ 144, 150 MeV 8=38542
Rb yield in p-fission, mass spectrom 83 $\leqslant$ A $\leqslant$ 98, 150 MeV 8=38542

Nuclear fission—contd
uranium—contd
U^{232}, n-induced, 5-1900eV, cross section obs. 8=29530
U^{233} aligned nuclei, low-temp, α ang. distrib., low-temp. obs. 8=30634
$U^{233,234,235,236,238}$, cross section, 1 keV-10 MeV 8=34057
$U^{233,235,238}$, delayed n precursor yields rel. to n abundance, obs. 8=38546
$U^{233,235,238}$, by 20-85 MeV protons, Xe^{133} isomer yields 8=47362
U^{235}, α-accompanied ternary, energetics 8=43110
U^{235}, α-accompanied ternary, Q values 8=43111
U^{235}, energy and charge distrib. 8=34054
U^{235}, energy distrib. of emitted α-particles 8=38539
U^{235} fission cross-section rel. to spin and energy 8=34049
U^{235} fission transition nucleus, struct. 8=43112
U^{235}, identification of 5.3-sec. Ag^{118} product 8=43123
U^{235}, n induced, prompt n emission, 7-14 MeV 8=29529
U^{235}, n induced rel. to transition state theory 8=29526
U^{235}, thermal, fragments meas. and charge distrib. obs. 8=29534
U^{235}, thermal-n, Ga^{77} identification and fractional chain yield 8=43113
U^{235}, thermal-n, identification of 5.0-sec. Pd^{117} product 8=43124
U^{235}, thermal, x-rays rel. to fragment mass, obs. 8=38529
U^{235}, 3MeV n-induced, ternary, ang. anisotropy of fragments 8=29531
U^{235}, tripartition, meas. of emitted α particle spectrum, low energy part 8=43126
U^{235}, 22 MeV excitation, fragments obs. 8=25281
U^{235} $\bar{\nu}$ energy spectrum calc. 8=42992
$U^{235,238}$, by $E_p = 1-9$ GeV, cross-section obs. 8=47359
$U^{235,238}$ in 1.03%enriched U - D_2O lattices, obs. 8=38585
$U^{235}O_2F_2$ aqueous soln., minimum critical thickness of water-refl. infinite slab 8=34052
U^{236}, by He^+, fragment mass and charge distrib. 8=43117
U^{236} n capture, resonance integral meas. 8=34056
U^{238}, by 18-21 MeV n, delayed n group yields 8=25279
U^{238}, by n, fission and evaporation n spectra, 800 keV-14 MeV 8=34018
U^{238}, by 6-9 MeV n, fragments mean kinetic energy obs. 8=25282
U^{238}, by 39MeV He^4, ternary fission evidence 8=43118
U^{238}, 14 MeV neutrons, cumulative yields 8=47361
U^{238}, D_2O moderated and diphyl cooled lattices ρ^{28} factor meas. 8=34077
U^{238}, e-induced, cross section 8=29533
U^{238}, nuclear explosion irrad., heavy-isobar yield rel. to supernovae reactions, obs. 8=38495
U^{238} photofission, asymmetry obs. and yields of $Cd^{115,117}$, Ag^{111}, Mo^{99} and $Ba^{139,140}$ 8=29532
U^{238}, ternary fission with α emission, 14 MeV n induced 8=29536
UO_2 fuel element, axial void form rel. to radial temp. gradient 8=43144
UO_2 fuel particles, fission-gas release rate rel. to fission density obs. 8=38592
UO_2 particle surface segregation of Mo and Ba 8=29538
$UO_2(NO_3)_2$-polyethylene mixtures, minimum critical U^{235} enrichment, obs. 8=34053
Nuclear fission reactors. See Nuclear reactors, fission.
Nuclear forces

binding energy calc. for light nuclei 8=47216
binding energy determined from hole line expansion method 8=47200
binding energy distrib. rel. to fission process 8=38320
binding energy, extended shell model semiempirical mass formula 8=38312
binding energy, far-unstable nuclei, formulae 8=38316
binding energy of ground and excited states with $A \leqslant 61$ 8=42798
binding energy, variational calc. with central Yukawa and vel. depend. 2-body pots. approx. 8=42797
bonding energy, for soft-core pots. with realistic N-N interacts. 8=25069
bound state of two and three nucleons, and wave function 8=38310
deformed nuclei, spin-quadrupole interaction, collective states excitation 8=38329
deformed nucleus potential, and rare-earth, actinide and super-heavy region appls. 8=38325
deuterons, four-parameter optical pot. 8=42826
effective N-N potential for Hartree-Fock calculation 8=33865
eigenpotential problem in the shell model 8=47203
equivalent local potential, new coupled equation 8=42980
fission barrier anomaly rel. to mass shell correction 8=38315
fission threshold and deform. energy, shell corrections 8=38308
Hamada-Johnston soft-core N-N pot. 8=42781
Hartree-Fock calcs. for finite nuclei with nonlocal pots 8=33864
heavy deformed nuclei, surface delta interaction 8=47199
hypertriton n-p tensor interactions from Λ-p scatt. 8=25012

Nuclear forces—contd
isoscalar pairing-force problem, isospin invariation 8=42777
Λ-N interaction from binding energy calcs. on $_\Lambda He^6$ 8=38399
light nuclei, four-body correlations 8=42783
matter, independent pair Fermi model 8=47211
matter, 2-particle correls. without using thermodynamic Green's functions 8=25062
neutron separation energies, systematics 8=25071
n-n interaction, charge depend. study and violation of charge symmetry 8=24864
N-N interaction, density depend. rel. to isotope effect in nuclei 8=42802
rel. to N scatt., optical non-local pot. calc. 8=33985
N-N potential, and boson exchange theory 8=38300
N-N from γ-ray emission following neutron capture 8=33921
N-N interaction and dipole states rel. to photonuclear reactions 8=33861
N-N pairing correlations, interacting through charge independ. forces 8=29266
N-N separable potential 8=42776
odd-odd nuclei, residual n-p interact. in quasi random phase approx. 8=42791
odd spherical nuclei, N-N surface delta interaction, degenerate model 8=29265
potential in nucleus central derived from 2N tensor force 8=38297
potential, optical model, isospin depend. from n cross-sections obs. 8=29267
potential radius, isotope shift calc. 8=25044
potentials, velocity-dependent, for large nuclei 8=25045
proton pairing energies 8=25070
quadrupole in pairing-plus-quadrupole model 8=25054
review 8=38290
role of nonstatic character of N-N interact. in singlet-even states 8=25043
separation and pairing energies, spherical nuclei, semi-empirical calc. 8=38298
Scotti-Wong pot. modified, rel. to N-N scatt., deuteron problem and nuclear matter calcs. 8=24881
single particle parity-nonconserving pot. including OPE forces and 2-body correlations 8=38301
at small distances, combining of large distance meson theory, and phenomenological descripts. at small distances 8=24865
soft core potential for two-nucleon interacts. 8=24882
structure calcs. using realistic two-body interacts. fitting N-N scatt. data 8=25063
tensor used to derive central depend. pot. 8=38297
three-body long range forces shown to be negligible 8=42792
rel. to three-body system 8=33863
2-level system interacting by pairing forces, boson expansion method 8=25046
Volkov's in Hartree-Fock and Hartree-Fock-Bogolyubov calcs. for p shell nuclei 8=33868
C^{14}, tensor component, evidence from β, γ data 8=42835
C^{14}, velocity-dependent interaction calc. 8=25100
Ca^{40}, Hartree-Fock potential scatt. 8=25106
Ca^{40}, optical pot. rel. to N scatt., 10-20 MeV 8=33985
Cl^{38}, potential from residual n-p interaction 8=47239
H^3, binding energy and charge radii 8=33893
He binding energy, variation calc. using two-body central velocity-dependent potential 8=42824
He^3, binding energy and charge radii 8=33893
He^3, Faddeev eqns. and Coulomb effects 8=42829
He^3 spin-orbit pot., spin-flip meas. 8=47228
$_\Lambda He^6$, binding energy calc. rel. to Λ-N interaction 8=38399
K^{40}, potential from residual n-p interaction 8=47239
$_\Lambda Li^6$ binding energy calcs. for p-shell 8=38399
Li^6, model Hamiltonian with harmonic central force and tensor reaction 8=33894
in Li^6, residual two-body N-N interact. rel. to wave function anal. 8=25094
N^{14}, tensor component, evidence from β, γ data 8=42835
N^{14}, velocity-dependence interaction calc. 8=25100
3N system binding energy 8=38319
rel. to $Ni^{58}(p, d)Ni^{57}$ form factors calc., pseudo potential 8=33999
O^{14}, tensor component, evidence from β, γ data 8=42835
O^{16} binding energy, first order 8=33866
O^{16} binding energy per nucleon calc. 8=25102
O^{16}, Hartree-Fock potential scatt. 8=25106
O^{18}, binding energies of spin O states, anomaly 8=25101
O^{18} shell model, exponentially velocity-dependent potential 8=42785
Nuclear fusion

cubic crystals, ultrasonic saturation, dislocation motion, influence 8=36260
dehydro-α-lapacone, double reson. 8=29810
dense gases, spin relax. and collision freq. 8=34669
deuterated compounds 8=49628
diamagnetic susceptibilities determ. 8=34904
diatomic gases, relax., collision theory 8=38913
1, 2 dibromoethane, rot. isomerism study 8=47646
1, 1-dibromo-3-fluorobutadiene-1, 3, energies of conformations, n. m. r. study 8=47631
2, 6-dibromopyridine, oriented mols. 8=43403
1, 2, dichloroethane, rot. isomerism study 8=47646
1, 1-dichloro-3-fluorobutadiene-1, 3, energies of conformations, n. m. r. study 8=47631
diethyl methylphosphanite, hydrolysis, n.m.r. study 8=27727
dihalobenzenes, p.m.r. and C^{13}-H satellite spectra 8=38917
1, 5-dimethylnaphthalene, and bromo-derivatives 8=38926
p-dioxane/CCl_4 binary mixture, proton mag. relaxation 8=39425
diphenyl picryl hydrazyl solns. in org. liqs., dynamic polarization of solvent protons and F nuclei 8=25951
di-tert-butyl-nitroxide liq. free radical. time dependent interactions, p relaxation study 8=48207
double irradiation circuit 8=46526
double, partial-saturation in systems with internal rotation 8=29812
double, periodically pulsed, theory 8=28638
double resonance, line broadening theory, sudden and adiabatic approx. 8=42043
double, systems of two- and three-spin 1/2 nuclei 8=29810
dynamic polarization in conjugated polymers 8=39434
dynamics of centres with S=I=1/2, and double resonance 8=36232
electrolyte diamag. solns., dipolar spin relax. 8=25952
electrolyte diamag. solns., intermolec. proton relax. rate 8=25957
electrolyte solns., form factor of spherical specimen vessels 8=34916
electrolyte solns., paramag. ions effect on Li^7 n. m. r. line 8=34915
electrolyte solns., spin relax., correl. times and viscosity 8=34927
electron dipole dipole interaction, expl. evidence of effect 8=40966
electron spin-echo obs. of E_1^1 centres in crystalline quartz 8=44486
enantiomers in optically active liq. crysts. 8=39422
ethane, liquid, nuclear spin relaxation 8=39428
ether/CCl_4 binary mixture, proton mag. relaxation 8=39425
ethyl derivatives, C^{13} and H^1 chem. shifts 8=29818
ethyl phthalate, molecular rotation restriction rel. to temp. 8=43877
ethyl-alcohol mixtures, proton spin-lattice relax and viscosity 8=43770
ethylene, spin-spin consts. calc. 8=25640
fast reaction rates study 8=49944
ferric complexes in acid solns., p. m. r. 8=43879
ferric complexes with desoxyribonucleotides, p. m. r. 8=43880
ferroelectric phase transitions, study by d.m.r. 8=49358
ferromagnetic alloys, dilute 8=49642
in ferromagnets, theory 8=40964
fluorobenzenes, monohalosubstituted 8=38922
fluoroberyllate complexes in soln. 8=48209
fluorocarbons, dynamic polarization in soln. 8=34911

Nuclear magnetic resonance and relaxation—contd
fluorodurene, crystalline, rel. to molecular reorientation movements 8=27256
fluoroform, gaseous, p spin-lattice relax. density depend., obs. 8=34667
fluoro-organic solns. of free radicals, nuclear-electron interactions and molecular motion 8=39436
2-fluoropyridine solns., solvent and temp. depend. 8=48224
free radical recombination, torsional motion obs. 8=38939
free radical solns. of toluene, nuclear mag. relax. 8=39439
free radicals in crystals, electron resonance and ENDOR spectra 8=40969
frequency decade ND30M in spectroscopy 8=46512
frequency shift in lowest Born approximation 8=46513
gas, spin diff., mag. field effect 8=43698
ginkgolides and derivatives, data 8=48216
glassy thermophosphate, of F^{19} 8=45121
glycerol, mag. relaxation and correlation 8=39430
gramicidine S in soln., structure 8=34332
growth effect rel. to signals in earth's mag. field 8=30529
halomethanes, struct. and electronic effect on C^{13} reson. 8=47700
high resolution spectra, quantum mech. and algebraic anal., computer prog. 8=42046
hydrate of SF_6, dielec. props. and n.m.r. 8=49342
hydrates, crystalline, rel. to H atom position determ. 8=44219
hydration of Al(III) and Ga(III) ions, O^{17} n. m. r. 8=30540
hydrocarbon, saturated, p-p geminal coupling constant, calc. 8=47692
hydrocarbons, planar, long-range trans and cis coupling constants, analysis 8=47691
hydroxyapatite, single crystal 8=40981
hyperfine mag. fields and elect. field gradients caused by mag. impurities in metals 8=40962
ice, hexagonal, proton spin-lattice relax. 8=49644
inhomogeneous broadening and Suhl-Nakamura interaction 8=40956
insulin and A and B chain S-sulphonates, p reson., 220 MHz 8=39441
Knight shift and pseudopotentials 8=45129
line shapes in free precession at high sensibility 8=48213
liquid, alloys, Knight shift comment on WBF theory 8=39421
liquid crysts., effect of sample spinning 8=30530
liquid crystal, rel. to chem. shift anisotropy 8=30411
liquid-crystal solvents, shielding anisotropics of solutes 8=43875
liquids, effects of molec. rot. diffusion on relax. 8=39426
liquids, electron-nucleus interactions in molecules 8=47693
liquids, relax. time, intermol. contribution, hydrodynamic interaction effects 8=34923
liquids, spin-lattice relax., theory 8=39427
in liquids, spin-lattice relax. time rel. to molec. rotation and re-orientation 8=30531
in liquids, study of molecular motion by relax. times 8=30399
luminescence centres, inorganic, ENDOR, rel. to emission, meas. 8=41178
magnus expansion applications 8=40961
medium effects, liqs. consisting of nonpolar, mag. isotropic mols. 8=48208
melting obs. 8=48259
metal single crystals, pulsed n.m.r. 8=40959
metals, Knight shift, review 8=27494
methanol and methanol-d_3 adsorbed on porous glass, proton relaxation times 8=47699
methyl derivatives, C^{13} and H^1 chem. shifts 8=29818
methyl fluoride, gaseous, p spin-lattice relax. density depend., obs. 8=34667
methyl group, narrowing due to coherent zero-point motion 8=25635
methyl groups undergoing tunnelling rotation, line shapes 8=49650
methyl, isolated tunelling group, proton second moment 8=40989
methyl silane, isomeric derivs., rel. to differences in phys. props. 8=43925
methylamines, solid 8=40990
micas, characterisation by p.m.r. 8=40985
minute metallic particles 8=40894
molecular parameters, semiempirical calc. 8=43405
molecular reorientation in liquids 8=39433
molecular reorientational motion in "classical" liquids 8=39292
molecules adsorpt. on SiO_2 gel, n.m.r. signal shift 8=39462
molecules, nonlinear, spin-rot. mag. relax. 8=29808
mol. with p-p interaction, line-shape with approx. equal spins 8=34370
multiple-pulse expts. 8=24263
m-nitrobenzene, ^1H-^1H coupling constants 8=25641
multispin molecules with dissimilar nuclei, relaxation 8=47694
nuclear polarization and relaxation by paramag. porous surfaces 8=48475
nitro azulenes 8=43410
nitroxide free radical, proton resonance at 310 MHz 8=43415

Nuclear magnetic resonance and relaxation—contd
noble metals, solute Knight shifts rel. to rigid band theory 8=45117
non-electrolytes in liq. state, relaxation times T_1 and T_2 obs. 8=48211
optically induced Overhauser effect in soln. 8=48210
organometallic cpds. of groups IV and IIb 8=38925
orientation of molecules adsorbed on solid surfaces, n.m.r. obs. 8=39615
oriented mols., anal. methods 8=43403
oriented mols., effect of sample spinning 8=30530
ortho-hydrogen, solid below T_λ spin-lattice relaxation 8=45124
Overhauser effect, n.m.r. signal profile and width 8=31890
overhauser effect, quantum-statistical theory 8=40968
α-oxalic acid dihydrate, d.m.r. and molec. struct. 8=49638
paraffin, liquid, in rotating mag. field 8=25958
paramagnetic crystals, proton spin-lattice relax. in high fields and low temps. 8=31889
paramagnetic solids, of C^{13} 8=31888
paramagnets, relax. rel. to e-spin pair-correl. 8=36259
pentaerythritol, deuterated, rel. to structural investigations of H bonds 8=43926
pentafluorobenzene 8=34373
phenoxy radicals 8=43411
phenyl and ethinyl derivatives of Ge and Si 8=36268
platelets of Sn particles layered with SiO, supercond., particle size effect 8=44735
poly-β-alanine, rel. to transitions, obs. 8=45112
poly-γ-benzyl-L-glutamate, linewidth rel. to mol. wt. 8=43873
polychlorotrifluoroethylene, low mol. wt., rel. to mol. motion, 77-300°K 8=45118
poly-1, 3-dioxolane, spectra, and dielectric dispersion 8=41003
polyethylene, oligomeric, rel. to conformational struct. in aromatic nonaromatic solvent mixtures obs. 8=43765
polyethylene oxide solns., proton relax. 8=30538
polylentadiene, chlorinated 8=38914
polymers, chemical shift in proton reson. spectra, using rotating sample 8=49626
polymers, oriented, effect of elongation 8=31914
polymethylbenzenes, p mag. relaxation 8=49654
polymethylsorbate 8=40984
polypeptides, molecular weight effect on n. m. r. manifestation of helix-coil transition 8=25637
polypropylene films rel. to mol. motion, CCl_4 effects, 140-373°K 8=48510
(1:1)poly(styrene-co-methyl acrylate) rel. to comp. and microstruct., obs. 8=43773
polytetrafluoroethylene, effect of temp. of post irrad. heat treatment 8=49640
polytetrahydrofuran, spectra, and dielectric dispersion 8=41003
Pound-Watkins type spectrometer, 100 Mc 8=37544
1-propanol, relax. 8=30535
protein solns., proton mag. relaxation, dependence on viscosity and temp. 8=39435
proton accelerator, energy meas. 300-2050 keV 8=33430
proton spin relax. in paramag. ion solns., D isotope effect 8=30536
protons bonded to B^{10}, quadrupole collapse of spin multiplets 8=34372
protons in free radicals, d.n.p., relaxation and paramag. shifts 8=38915
PVC, chlorinated 8=38914
pyrazine, oriented in nematic phase 8=34913
pyridine, anal. of spectrum using different methods 8=29821
pyrrole-dimethyl sulphoxide, H-bonding 8=25644
rapidly-rotating solids 8=40960
rare-earth metals and alloys, ferromagnetic, rel. to hyperfine interactions 8=36280
rare earth metals, ferromag. heavy, indirect spin relax. 8=45132
rare-earth metals, heavy, indirect spin relax. 8=31915
rare-earth-Pt alloys, of Pt^{195} rel. to conduction-electron polarization 8=36279
relaxation in gases and liquids 8=39437
relaxation in 3-spin systems, Overhauser effect of F and C-13 in radical liquid media 8=39424
resolution of chemical shift in solids 8=40963
r.f. resonances, study of nuclear and electron magnetic moments 8=43212
Rochelle salt, deuterated, d.m.r. and dielectric relaxation 8=49651
ruby, Al^{27} dynamic polarization by e reservoir temp. transfer, 1.8°K 8=31892
ruby: Al^{27}, nuclear paramag. acoustic absorption at 4.2°K 8=40914
ruby, Al^{27} structures under dynamic nuclear polarization 8=45111
solids, deuteron resonance and quadrupole interactions 8=49664
solids, extremely narrowed n. m. r. applications 8=27509
solids, linewidth transition and torsional oscillations 8=31940
in solids, magnetization loss on irradiation with r. f. field in single-shot passage 8=27495

Nuclear magnetic resonance and relaxation—contd
in solids, spin dynamics rel. to artificial line narrowing and Zeeman spin-spin relax. 8=27496
solids with two spin types, signals 8=36255
solvent effects on chem. shifts 8=43878
spectra, effect of reorientations about second-order axis 8=46515
spectra, methods of analysis 8=37541
spectrometer permanent magnet with columnar crystal material 8=33152
spectroscopy, pulsed fast recovery probe and receiver 8=36256
spin coupling constants, calc. using σ M.O. theory 8=47690
spin-echo orientation for gaseous diffusion obs. 8=39240
spin exchange between identical configs. of one mol. 8=43404
spin-lattice relax. times by tone-burst modulation meas. 8=36258
spin-lattice relax. times, saturation recovery method 8=33149
spin lattice relaxation by paramagnetic impurities without spin diffusion 8=45108
spin relaxation, anomalous, near mag. transition 8=49582
spin relax. in gases, quantum corrections 8=37187
spin-relax. time in atomic translational-diffusion mechanism studies and order parameter calcs. 8=27498
spin systems, two interacting, in crystal, spectra and line shape 8=27497
starch, modified maize, p spin-lattice relax. time temp. depend., obs. 8=45135
steric factors of H-bonding 8=25639
superconducting compounds, M_3X-type, spin-lattice relax. rel. to energy band structure 8=36257
superconducting solenoid field calibration probe 8=31360
superconductors, Knight shift 8=27494
in superconductors, recent work 8=40957
superconductors, type II 8=40958
1, 2, 3, 4-tetrafluorobenzene 8=47701
tetrafluoroborate salts, ion motion and phase transitions 8=31905
tetrahydrofuran/CCl_4 binary mixture, proton mag. relaxation 8=39425
DL-threonine 8=43398
trans-1, 2-cyclohexylenedinitrilotetracetic acid solns., 5 $\leq$pH$\leq$14, obs. 8=30537
transition metal alloys, local susceptibilities exam. 8=49657
transition metal salts, transferred hyperfine interactions and spin deviations 8=31919
transition metals and alloys, rel. to spin-fluctuation-induced mass renormalization 8=31922
tropylium salts, molec. motion in solid 8=49659
1, 2, 4-trichlorobenzene, oriented mols. 8=43403
1, 3, 5-trideutero-benzene, liquid, proton spin-lattice relaxation 8=39429
trifluoromethylphosphonylchloride, F^{19} reson. 8=34330
3, 3, 3-trifluoropropyne in liq. cryst. solns. 8=34930
trimethylbenzenes, isomeric, between 4°K and m. p. 8=36276
2, 4, 6-trinitrotoluene, isomer determ. 8=30534
two-spin system, complex splitting of spectra 8=36277
DL-valine 8=43398
variable temp. probes, protection against damage by overheating 8=33154
N-vinyl cpds. 8=47671
viscous solns., paramag. relax. determ. 8=30532
water adsorbed on protein, proton relaxation 8=49649
water and D_2O in oriented rayon fibres, broadline 8=27508
water combined in solids 8=45123
water-dioxane mixtures, proton spin-lattice relax. and viscosity 8=43770
water in mesomorphic phases, d.m.r. 8=48220
weak field, applications of transient nuclear demagnetization 8=33148
o-, m-, p-xylene solid, tunneling effect and hindrance pot. 8=31924
Zoelite Linde 13x, temp. depend. of mag. proton and cation reson. 8=49656
Ag solvent, Knight shifts in alloys, origin 8=30528
AgI, of halogen isotope 8=49636
Al^{27}, zero field resonances, in Al containing Zn impurity 8=49631
Al, Knight shift and pseudopotentials 8=45129
Al powder, spin-lattice and spin-spin relax. times rel. to press. 8=45110
Al, powdered: Al^{27}, line narrowing expts. 8=49630
Al III coordination no. in aq. solns. determ. by p.m.r. 8=39431
$AlCl_3$ aqueous solution, rel. to proton transfer between hydration and solvent H_2O 8=34931
$AlCl_3$ in aq. solvent mixtures, p.m.r. coordination number study 8=25954
$Al(NO_3)_3$, aq. soln., hydration no. determ. 8=48215
AlSb, elastically deformed, rel. to elec. field gradients at nucleus 8=31909
AsF_6^- anion in non-aq. solns., spin-lattice relax. 8=34928
Au-V:V^{51}, localized mag. moment 8=27514
BH_3 and trihalide complexes with organic bases, variable temp. 8=38916

Nuclear magnetic resonance and relaxation—contd
B_2O_3, cryst. and vitreous, rel. to structure 8=48634
BaO-B_2O_3 system, B^{11} spectra rel. to struct. 8=27499
Be, Knight shift rel. to Fermi surface 8=27500
Be(II) coordination no. in aq. solns. determ. by p.m.r. 8=39431
C^{13} and N^{14} data from proton spectra by double irradiation method 8=37537
C-liquid adsorption system, H^1 and F^{19} n. m. r. lineshift study 8=30766
$C^{13}H_3NC$, struct. determ. 8=34336
CH_3CN, CH_3CN/CD_3CN solid solns, proton spin-lattice relax., 8=40975
$(CH_3)_2O$ polar molecule, electronic screening effect and relax., perturbed by foreign gases 8=29815
C_6H_6 on silica gel, proton spin relax. 8=29814
$CaAl_2Si_2O_8$: Al^{27}, obs 8=40972
CaF_2: paramag. impurities, of F^{19}, temp. and impurity conc. dependence 8=40974
CaF_2 with Ce impurity, dipolar nucl. relax. 8=45119
CaF_2 : F^{19} longitudinal relaxation, field dependence 8=49634
CaF_2 : Mn^{2+}, F^{19} nuclear spin-lattice relaxation 8=49633
CaF_2:Yb^{3+}, ENDOR meas. rel. to crystal field splitting of Yb^{3+} in cubic sites 8=27501
CaF_2, Yb^{3+} and Tm^{2+} transferred hyperfine interaction, F^{19} ENDOR obs. 8=36266
Cd, Knight shift, temp. depend. 8=41002
$CdCr_2Se_4$, of Cr^{53} and Se^{77}, and magnetization temp. dependence 8=31895
$CdCr_2Se_4$, of Cr^{53} and Se^{77} at 4. 2°K 8=31896
$CeCr_2S_4$, of Cr^{53} at 4. 2°K 8=31896
CeF_4, solid, chemical shift anisotropy 8=40980
of Cl^{35} in solution of paramagnetic ions 8=48214
Co alloys, with impurities of 4d and 5d elements of group VIII, n.m.r. 8=49642
Co films 8=40976
Co, single-domain, relax. rates 8=31897
$CoCl_2 . 6D_2O$, of Cl^-, para- and antiferromagnetic state 8=36261
$CoCl_2 . 2H_2O$, antiferromagnet, 1. 3° to 12°K 8=31898
$CoCl_2 . 6H_2O$, of Cl^-, para- and antiferromagnetic state 8=36261
$CoCr_2O_4$, of Co^{59} rel. to hyperfine field of Co^{2+}in tetrahedral site 8=27502
$CoCr_2S_4$, of Cr^{53}, temp. and d.c. mag. field depend. of reson. freq. 8=36262
Co-Ni alloys, Co^{59} resonance satellite lines rel. to mag. disturbance by solute Ni atoms 8=31899
Co-Rh alloys, relaxation rates, and enhanced susceptibilities 8=31499
Co_3S_4, of Co 8=31901
$CrBe_{12}$, paramagnetic and ferromagnetic state, hyperfine fields meas. 8=45115
Cs form of zeolite 8=27510
Cs, Knight shift and pseudopotentials 8=45129
$CsMnCl_3 . 2H_2O$, rel. to antiferromagnetism 8=36275
$Cs_2MnCl_4 . 2H_2O$, rel. to antiferromagnetism 8=36275
Cu acetate hydrate, proton relax. of methyl group at low temps. 8=45109
Cu alloys, dil., ground-state of mag. impurity problem 8=45116
Cu formate tetrahydrate, antiferroelec. 8=44269
Cu formate tetrahydrate, d. m. r. and molec. struct. 8=49638
Cu liquid solvent, Knight shifts in alloys, origin 8=30528
Cu, spin-lattice relax. time in temp. range 3 × 10^{-3} °K to 2 × 10^{-2} °K 8=31902
Cu(II)2, 2′-dipyridine aq. solns, O^{17} linewidth 8=34926
$CuCl_2 . 2H_2O$, antiferromagnetic, proton relaxation 8=49635
$CuCl_2 . 2H_2O$-d_x, deuteration effects on PMR and antiferromagnetism 8=36264
Cu-Co alloy, of Co^{59} 8=40978
$CuCo_2S_4$, of Co 8=31901
$CuCr_2S_4$, of Cr^{53}, $Cu^{63, 61}$, Cu, temp. and d.c. mag. field depend. of reson. freq. 8=36262
$CuCr_2Se_4$, Cu Knight shifts 8=31901
$CuCr_2Te_4$, Cu Knight shifts 8=31901
$CuCr_2Te_4$, ferromag., of Te^{125} hyperfine field at 1. 4°K 8=27503
$CuCr_2X_4$ (X = Se, Te), Cu Knight shift 8=31901
Cu:Fe, rel. to singlet ground state of Fe 8=31900
CuI(Br), of copper and halogen isotopes 8=49636
$Cu(NH_3)_4SO_4 . H_2O$, PMR rel. to antiferromag. ordering 8=36263
Cu $(NH_3)_4$ $SO_4 . H_2O$, proton double resonance and temp. of electron spins, liq. He temp. 8=40979
$Cu(NO_3)_2 . 3H_2O$, PMR rel. to antiferromag. ordering 8=36263
$CuSO_4 . 5H_2O$ proton spectra down to 0. 3°K antiferromagnetic linear chain 8=49637
$Cu_{1-x}M_xFe_2O_4$, (M = Cu, Zn, Cd), Mossbauer resonance of Fe^{57}, 4. 2°K–1000°K 8=31907
Cu_2S, of copper isotopes 8=49636
$CuSeO_4 . 5H_2O$ proton spectra down to 0. 3°K antiferromagnetic linear chain 8=49637
DF and DCl, calc. D quadrupole coupling consts. 8=38921
D_2O, deuteron spin lattice relaxation 8=48217
D_2O, O^{17} enriched, spin echo O^{17} T_1 and T_2 obs. 8=48212
Dy, of $Dy^{161, 163}$ rel. to relax. mechanisms 8=27504

Nuclear magnetic resonance and relaxation—contd
DyAl garnet, of Al^{27}, quadrupole splitting and paramag. shifts 8=31893
Dy-Gd, of Dy^{163}, rel. to hyperfine interactions 8=36280
EuFe garnet, of Fe^{57}, rel. to sublattice magnetization 8=40839
EuO, of Eu^{115} 8=49641
EuP, of P^{31} rel. to Eu^{3+} spin $\langle S(T) \rangle$ temp. dependence 8=31904
EuS, of Eu^{115} 8=49641
EuSe, of Eu^{115} 8=49641
F^{19} chem-shifts B, P(III), phosphoryl and thiophosphoryl halides 8=43406
F^{19} in NbF_6^-, spin relax. and chem. exchange effects 8=34914
F^{19} in solns., dyn. nucl. polarization expts. 8=34910
F-containing crystals, rel. to electronic structure calcs. 8=27506
F, dynamic polarization of free radicals in fluorocarbon solns. 8=48221
F, in exchanges between tetrabutylammonium hexafluorophosphate and BF_3 or PF_5 in CH_2Cl_2 soln. 8=25960
F^- and HF, aq. solns., F^{19}, effect of Cu^{2+} on relax. 8=48222
Fe alloys, with impurities of 4d and 5d elements of group VIII, n.m.r. 8=49642
Fe, pulsed, rel. to domain-wall dynamics 8=31621
Fe(III)N-methyl-N-phenyldithiocarbamate, and fluorophenyl derivatives 8=27507
Fe–Al alloys, detailed spin-echo spectra rel. to hyperfine interactions 8=31906
$FeCl_2 . 2H_2O$, antiferromagnet, 1.3° to 12°K 8=31898
$Fe(CN)_6{}^{3-}$, aq. soln., position and linewidths of resonances of cations 8=48225
$Fe(CN)_6^{4-}$, aq. solns., position and linewidths of resonances of cations 8=48225
Fe-Co alloys, of Fe^{57} and Co^{57}, rel. to hyperfine field distrib. 8=45120
Fe:Sb^{125}, mag. hyperfine fields and spin-lattice relax. determ. 8=31891
Ga, Knight shift 8=27505
Ga, Knight shift and pseudopotentials 8=45129
Ga(III) coordination no. in aq. solns. determ. by p.m.r. 8=39431
GaAs(Sb), elastically deformed, rel. to elec. field gradients at nucleus 8=31909
$Ga_2(SO_4)_3$, hydrated cryst., evidence of H_3O^+ ions 8=49643
Gd(III) ion in aqueous soln., temp. and freq. depend. of O^{17} signal, rel. to water exchange 8=43882
GdFe garnet, of Fe^{57}, rel. to sublattice magnetization determ. 8=40840
H-bonds, strong, n.m.r. study 8=48301
H-bonding, study by n.m.r., review 8=48219
HBr in DBr, solid solutions, relax. 8=36269
HBr, solid phases 8=49645
HCl aq. solns. of Co(II), O^{17} and Cl^{35} n. m. r. 8=30541
HCl and DCl, solid, and n.q.r. study of molecular motion 8=31903
HCl in DCl, solid solutions, relax 8=36270
HCl, solid, T, δH obs. 8=40965
HCl, solid phases 8=49645
$HClO_4$-$DClO_4$-H_2O-D_2O system, proton reson. 8=34920
$(HCO_3)_2^{2-}$ in $KHCO_3$, structure determ. 8=26032
HD, liquid, double resonance 8=34921
HD, solid and liquid, proton spin-lattice relax. 8=31908
HF, gaseous, F^{19} and H^1 reson. 8=29817
HF in H_2O and D_2O, F^{19} chem. shift 8=43874
HF, nuclear shielding and spin-rot. consts., vibr. corrections 8=38924
HI, solid phases 8=49645
H_3O^+ adsorbed by vermiculite 8=47695
H_2S, three solid phases, pulse and steady state n.m.r. 8=40982
He^3 optically polarized, meas. for pumping time rel. to temp. 8=47689
He^3, spin-lattice relax. time, temp. depend. 8=24055
Hg and alloys, liquid, Knight shift 8=39438
Hg crystal Knight shift at 1.2°K 8=49646
$HgCr_2Se_4$, of Cr^{53} adn Se^{77} at 4.2°K 8=31896
In, cubic phase 8=36271
In(III) coordination no. in aq. solns. determ. by p. m. r. 8=39431
InAs, elastically deformed, rel. to elec. field gradients at nucleus 8=31909
In-Pb alloys, dil., Knight shifts and elec.-quadrupole coupling 8=45125
In-Sn alloys, dil., Knight shifts and elec.-quadrupole coupling 8=45125
K binoxalate, d.m.r. 8=49611
K oxalate hydrate, partly deuterated, isotope effect in d. m. r. 8=45122
K, spin lattice relaxation 8=40926
K_2 malate, double reson. 8=29810
KBr, elec. field gradients at nuclei surrounding different subst. halogen ions, n.m.r. meas. 8=48314
KBr, meas. of distortion effects round substitutional ions. 8=36273
KCl, endor of F-centres 8=36272
KF, impure single crystal, nuclear quadrupole effects by pulsed double resonance 8=41012
KI, elec. field gradients at nuclei surrounding different subst. halogen ions, n.m.r. meas. 8=48314

Nuclear magnetic resonance and relaxation—contd
KI, meas. of distortion effects round substitutional ions. 8=36273
$KMgF_3$, perovskite-type crystals, rel. to electronic structure calcs. 8=27506
$KMgF_3:V^{2+}$, Mn^{2+} hyperfine interactions, transferred through unpaired spin on intervening ions 8=49647
$KMnCl_3 . 2H_2O$, rel. to antiferromagnetism 8=36275
K-Na liquid alloys, Knight shift obs. 8=25955
K–Rb liquid alloys, Knight shift obs. 8=25955
$KTaO_3$, of Ta^{181}, rel. to nuclear spin-acoustic phonon interaction 8=45126
KVO_3, V^{51} quadrupole coupling tensor 8=31923
Kr^{83}, local mag. field shift, obs. and theory 8=39226
LaF_3, of F, temp. depend., rel. to Schottky defects and diffusion of F ions 8=31048
LaF_3, tysonite-type crystals, rel. to electronic structure calcs. 8=27506
$LaF_3:Pr^{3+}(Nd^{3+})$, of F^{19}, relax. times, 150-800°K 8=45127
Li borates, glass and cryst., diffusion of Li^7 8=31007
Li form of zeolite 8=27510
Li, Knight shift and pseudopotentials 8=45129
Li, liquid, self-diffusion meas. 8=48112
LiCl solns., proton relax. 8=30533
$LiD_3(SeO_3)_2$, d.m.r. 8=49648
$LiD_3(SeO_3)_2$, d.m.r. and molec. struct. 8=49638
LiF, F-centres, hyperfine interaction constants, temp. dependence 8=35587
LiF: F^{19} and Li^7 resonance 8=40920
LiF:Fe^{3+}, crystal field distortions obs. 8=48810
$LiH_3(SeO_3)_2$, proton reson. 8=31910
$LiNbO_3$ 8=36274
$LiNbO_3$, ferroelec. 8=40987
$LiNbO_3$, ferroelectric, of Nb^{93}, quadrupole coupling const. 8=45128
$LiNbO_3$, of Li^7 8=40988
$LiTaO_3$, ferroelec. 8=40987
LuFe garnet, of Fe^{57}, rel. to sublattice magnetization determ. 8=40840
Mg^{25} in aq. soln., chemical shift 8=39440
Mg(II) coordination no. in aq. solns. determ. by p.m.r. 8=39431
MgF_2, rutile-type crystals, rel. to electronic structure calcs. 8=27506
MgO: Cr^{53}, ENDOR 8=40977
MnAs, of Mn and As, hydrostatic pressure and temp. dependence 8=31911
$MnCr_2O_4$, ferrimagnetic spiral, of Mn^{55} 8=45130
MnF_2, extremely narrowed, applications 8=27509
α-MnS, paramagnetic, of S^{33}, temp. dependence, 175-300°K 8=45131
MnSb, of Mn and Sb, hydrostatic pressure and temp. dependence 8=31911
$Mn_{2-x} Cr_x Sb$ (x=o, 0.03), spin-reorientation rel. to phase transform, 180-280°K. spin-echo obs. 8=36189
$Mn_2(CO)_{10}$, Mn^{55} spectrum, nuclear quadrupole coupling effects 8=49653
N^{15} formaldoxine, spin-spin interactions 8=43409
N-containing heterocycles, N^{14} quadrupolar relax. and H lineshapes 8=29819
N, N-di-sec-alkyl amides, slow rot. around alkyl-N bond 8=38927
ND_3, deuteron spin lattice relaxation 8=48217
$NH_4{}^+$, signs of coupling consts. and isotope shifts 8=29820
NH_4Cl, effect of impurities on spin-lattice relax. 8=40955
NH_4-NH_4 proton exchange in liq. NH_3 8=27675
Na form of zeolite 8=27510
Na, Knight shift and pseudopotentials 8=45129
Na–alkali alloys, liq. 8=48223
$NaBF_4$, ionic motion 8=31912
$NaD_3(SeO_3)_2$, d.m.r. 8=49648
$(Na_2, Ca)(AlSi_3O_3) . 5H_2O$ and $(Na_2, Ca)(Al_2Si_8O_{16}) . 6H_2O$, complex splitting of spectra 8=36277
NaCl, acoustic, rel. to plastic deformation 8=44320
NaCl, enhancement by e.s.r. 8=35029
$NaD_3(SeO_3)_2$, d.m.r. and molec. struct. 8=49638
$NaH_3(SeO_3)_2$ and seutero-cpd., and ferroelec. props. 8=27511
NaI, of I^{127}, intensity dislocation dependence 8=36278
Na-NH_3 liq. solns., dynamic polarization 8=34925
$NaNO_3$, of Na^{23}, orientation and temp. dependence 8=40991
Nb, type II superconductor, spin-lattice relaxation 8=41005
Nb-Zr, type II superconductor, spin lattice relaxation 8=41005
Ne, double resonance in He-Ne laser operating at 6328 Å π transitions 8=47502
Ni alloys, with impurities of 4d and 5d elements of group VIII, n.m.r. 8=49642
Ni ferrite, of Fe^{57}, relax. times and amplification of external field 8=36267
Ni(II) in aq. soln., primary solvation no. determ. 8=39423
Ni: Cd^{111}, (Ru^{99}), hyperfine fields at solutes from perturbed angular-correlation exam. above and below T_- 8=40992
$Ni[(H_2O)_6]^{2+}$, O^{17} hyperfine coupling consts., evidence for distortion from octahedral symmetry 8=49652
Ni:Mn^{54}, mag. hyperfine fields and spin-lattice relax. determ. 8=31891
O^{17} in aq. electrolyte and nonelectrolyte solns. 8=25956
OH surface groups, effect of adsorbed benzene mols. 8=38923

Nuclear magnetic resonance and relaxation—contd
Os^{189}, Larmor freq. rel. to H^1, and mag. moment 8=27512
P^{31} chem-shifts in P(III), phosphoryl and triphosphoryl halides 8=43406
P^{31} Overhauser effects, and simultaneous obs. of two kinds of nuclei 8=40993
PCl_3, $POCl_3$ and POF_3, liq., spin-lattice relax. and molec. motion 8=34912
Pb-Bi solid soln., indirect nuclear spin-spin interactions in Pb by spin echo 8=40996
Pb-Hg solid soln., indirect nuclear spin-spin interactions in Pb by spin echo 8=40996
Pb-In solid soln., indirect nuclear spin-spin interactions in Pb by spin echo 8=40996
PbTe, Knight shift calcs using augmented-plane-wave method 8=40995
Pd-Ag alloys, 1°-4°K 8=31913
Pd-Fe alloys, spin-lattice relax. time conc. dependence 8=36080
Pd-Pt alloys, susceptibility, correlation effects 8=40997
$PtAs_2$, of As^{75} and Pt^{195} 8=49655
Pt-Co(Fe) alloys, rel. to local moment saturation 8=31527
Pt-Ir alloy, Pt^{195} Knight shift, Ir susceptibility 8=40998
Pt-Mo alloys, Pt-rich, and satellite structure 8=27513
PtP_2, of P^{31} and Pt^{195} 8=49655
Pt-Pd alloys, of Pt^{195}, spin susceptibility 8=40998
$RbCoF_3$, rel. to spin-density space oscills. and hyperfine interaction 8=31917
$Rb_2MnCl_4.2H_2O$, of several nuclei 8=31916
$RbMnF_3$: F^{19}, nuclear acoustic resonance, dispersion mode saturation 8=41000
$RbNiF_3$, and magneto-optical studies 8=32023
$RbNiF_3$, rel. to exchange interaction exam., 8=41001
Rh:Co dilute alloys, Co Knight shift rel. to local exchange enhancement 8=35433
Rh:Co rel. to Rh 5s cond. band exchange polarization, obs. 8=36281
$Sc(Ni_{1-x}Co_x)_2$, line shape for Sc^{45}, rel. to hyperfine interacts. 8=45133
SI_2 type three-spin mol, nucl. spin-lattice relax. 8=47687
Si, dynamic nuclear polarization production using nonresonant Overhauser effect 8=30632
SiC:N, donor conc. dependence rel. to e. delocalization and e. system degeneracy 8=45134
SiH_3 derivatives, spectra 8=34918
SiH_4, liquid, p spin-lattice relax. time, obs. 8=34922
SiH_nD_{4-n}, liquid, p spin-lattice relax. time, obs. 8=34922
SiO_2-Al_2O_3, combined H_2O 8=45123
Sn^{119} crystal, pulsed, obs. 8=31918
Sn, white, Knight shift, temp. depend. 8=41002
SrF_2: paramag. impurities, of F^{19}, temp. and impurity conc. dependence 8=40974
SrF_2: Eu^{++}, F^{19} spin lattice relax. time angular depend., 4.2, 77 and 300°K 8=36265
TbAl garnet, of Al^{27}, quadrupole splitting and paramag. shifts 8=31893
Tb-Dy, of Tb^{159} and Dy^{163}, rel. to hyperfine interactions 8=36280
Tb-Gd, of Tb^{159}, rel. to hyperfine interactions 8=36280
Th carbides, C^{13} Knight shift 8=41004
Ti, in Ti-H systems 8=49658
TiCo alloys, comp. dependence at 295°K and 77°K 8=31920
$TiFe_{1-x}Co_x$:Co^{59}, line profile comp., temp. and stoichiometry dependence 8=31921
TiO^{2+}, ENDOR 8=41007
TiO_2: Mn^{4+}, ENDOR 8=41007
TIO_2: V^{4+}, ENDOR 8=41007
TmFe garnet, of Fe^{57}, rel. to sublattice magnetization determ. 8=40840
U carbides, C^{13} Knight shift 8=41004
UH_3, Knight shift and line width 8=49660
VCx, ($0.75 < x < 0.88$), line shape of V^{51} 8=45133
V_3Sn, type II superconductor, spin-relaxation of V^{51}, temp. depend. obs. 8=40970
VO^{2+} in N, N-dimethylformamide soln., line-broadening 8=39419
Va-Ga alloys, Knight shift of V^{51} and Ga^{71} 8=41006
Xe^{129,131}, local mag. field shift, obs. and theory 8=39226
YBAl garnet, of Al^{27}, quadrupole splitting and paramag. shifts 8=31893
$YH_{1\cdot96}$, absorpt. spectrum, memp. effects 8=31925
$ZnSiF_6.6H_2O$: paramag. impurities, of F^{19}, temp. and impurity conc. dependence 8=40974
$ZrC_{0\cdot32}H_{1\cdot2}$, absorpt. spectrum, temp. effects 8=31925
$Zr_{1-x}Gd_xZn_2$, rel. to localized mag. moments effect in $ZrZn_2$ 8=36180
$ZrH_{1\cdot9}$, absorpt. spectrum, temp. effects 8=31925
$ZrN_{0\cdot47}H_{0\cdot98}$, absorpt. spectrum, temp. effects 8=31925
measurement
analysis, quantitative, based on n.m.r. dispersion 8=49993
applications and present trends 8=42038
broad-line, resonant calibrator 8=24262
broad line spectrometer, improvements 8=46523
direct digital computation of n.m.r. moments from broad-line spectra of varying temps. 8=46524
double, localized saturation effects 8=46514
double resonance, freq. sweep spectrometer 8=33147
double resonance spectroscopy, developments 8=37536

Nuclear magnetic resonance and relaxation—contd
measurement—contd
free precession expts. in terrestrial mag. field 8=46518
gases, apparatus for study 8=39225
historical and theoretical background 8=46527
liquid sample holder for pressure meas. 8=34917
long transversal relax. time, obs. using spin-echo technique 8=48218
multiple reson. techniques 8=29813
p. m. r., tetramethylsilane as internal reference 8=34929
partial-saturation method in double n. m. r. 8=29812
phase transformations, solid-state, high-press technique for n.m.r. study 8=48362
proton freq. to free electron cyclotron freq. ratio. precision meas. 8=46520
pulse technique for weak signal detection 8=37542
r.f. gate with 140dB carrier suppression 8=42044
sensitive nuclear pulse apparatus with digital signal averaging for solids 8=46521
single side-band technique, applic. to proton stabilized F^{19} resonance 8=46522
spectrometer adaptation for heteronuclear double reson. 8=28639
spectrometers, high resolution, freq. swept proton stabilized 8=46525
spectrometer for spin-echo obs. 8=49625
spectrometer marker generator circuit 8=41916
spectrometer sweep synchronization to computer memory scan 8=42047
spectrometer using coaxial components 8=33151
spectrometer, X-band, for paramag. dispersion obs. and ENDOR meas. 8=46511
spectrometry for refined constitution analysis 8=49624
spin relax. in complex systems 8=37540
spin-lattice relax., adiabatic rapid passage timing 8=42048
superconductive spectrometer, high-resolution, Du Pont instrument general performance information 8=46517
terrestrial mag. field range high-resolution n.m.r. 8=46516
transmitter of high-power r.f. pulse 8=33153
water, nuclear mag. susceptibility, prepolarization method 8=25959
water, C^{17} enriched, spin echo O^{17} T_1 and T_2 obs. 8=48212
weak continuous mag. field sensitive n.m.r., expts. 8=46519
KBr, Br nuclei surrounding substitutional Cl ion, field gradient obs. 8=26403
Nuclear matter. See Nucleus/theory; Quantum theory/many-particle systems.
Nuclear orientation
dynamic polarization 8=38349
dynamic polarization and asymmetric e.s.r. in polycrysts. 8=35029
fluorocarbons, dynamic polarization in soln. 8=34911
free radical, dynamic polarization, spin-temp. model 8=25653
free radical solns. of toluene, dynamic nucl. polarization 8=39439
polarized photo absorpt. cross section 8=42987
ruby, polarization, and electron cross relax. 8=40905
ruby, Al^{27} dynamic polarization by e reservoir temp. transfer, 1.8°K 8=31892
semiconductor, polarization on e-heating in cyclotron resonance 8=35806
n. q. r. structures in dynamic polarization with inhomogeneously broadened e. s. r. line 8=27515
CaF_2: Tm^{2+}, 12% using optical pumping 8=30633
F^{19} in solns., dyn. nucl. polarization expts. 8=34910
F, dynamic polarization of free radicals in fluorocarbon solns. 8=48221
He^3, excited level aligning and orientating method 8=42828
He^3, polarization by liq. optical pumping 8=37337
Ho^{165}, rel. to total n cross-section 2-135 MeV 8=25151
Na-NH_3 liq. solns., dynamic polarization 8=34925
Sb^{124}, mag. moment from decay γ anisotropy 8=42891
Sb^{125}, γ-ray anisotropies obs. 8=42892
Si^{29} by optical electronic saturation and optical pumping 8=30632
Nuclear photoeffect. See Gamma-rays/effects; Nuclear reactions due to photons; Photons/interactions.

Nuclear quadrupole resonance—contd
- detector, coaxial bridge with helical line sample holders 8=46529
- n-dichlorobenzene, effect of pressure and temp. 8=49665
- halogen cpds., correl. with average mol. polarizability 8=29811
- metals, indirect nuclear quadrupole-quadrupole interactions through conduction electrons 8=41007
- in molecular crystals, rel. to thermal motions 8=27516
- nitriles, saturated organic, of N^{14}, coupling constants 8=25642
- nitrites, N^{14} study of NO_2^- ion 8=49666
- nuclear polarization, dynamic, with inhomogeneously broadened e. s. r. line, quadrupole structures 8=27515
- organotin dichlorides, coupling, rel. to nature of bonding to tin 8=41013
- pyridines, substituted, pyrimidine and pyridazine, of N^{14}, coupling consts. 8=25643
- pyrrole, cryst. 8=31929
- solids, quadrupole interactions and deuteron resonance 8=49664
- solids, review of quadrupole interactions 8=49662
- spectrometer, high level used for Cl n. q. r. 8=37545
- spectrometer, superregenerative, automatic coherence control 8=24264
- spectrometer using f.e.t. 8=28640
- spin echo, 2-freq., influence of asymmetry parameter 8=37546
- temperature control of spectrometer 8=46528
- 2, 4, 6- trichloroanisol, of Cl 8=41014
- 1, 3, 5-trichlorobenzene, rel. to mol. vibrations 8=27516
- triethylene diamine, pure n.q.r. 8=41015
- Al^{27}, zero field resonances, in Al containing Zn impurity 8=49631
- As_2Se_3 8=31926
- CBr_4 complexes with methyl-substituted benzenes and pyridines 8=36282
- $(CH_3)_3X\text{-}C \equiv C\text{-}Cl(X = C, Si, Ge, Sn)$. bonding props. 8=38912
- $C_2H_5SiCl_3$ mol. crystals, spectra multiplicity and spin lattice relax. time rel. to phase transforms 8=41010
- CsH_2AsO_4, spectra rel. to temp. 8=41009
- Cu_2O, supergenerative spectrometer temp. variations 8=31927
- GaM(M = Sb, As, P), spin-relax. time and chemial shift rel. to cavalence 8=31928
- HCl and DCl, solid, and n.m.r. study of molecular motion 8=31903
- $HGeCl_3$ mol. crystals, spectra multiplicity and spin-lattice relax. time rel. to phase transforms 8=41010
- I^{127}, spin echo, indirect spin-spin interaction beats 77°K 8=41011
- InM, (M = Sb, As, P), spin-relax. time and chemical shift rel. to covalence 8=31928
- KCl: Li^+, Cu^+, shifts of off-centre ions 8=45136
- $KClO_3$: Cl^{35}, resonance freq. temp. variation, use in temp. control of spectrometer 8=46528
- KF, impure single crystal, nuclear quadrupole effects by pulsed double resonance 8=41012
- KH_2AsO_4, As^{75} quadrupole interaction, critical temp. behaviour 8=45137
- KH_2AsO_4, spectra rel. to temp. 8=41009
- $LiNbO_3$, ferroelectric, n. m. r. of Nb^{93}, coupling constant 8=45128
- $Mn_2(CO)_{10}$, quadrupole coupling effects in Mn^{55} n.m.r. spectrum 8=49653
- N^{14} in five-membered heterocyclic compounds 8=25638
- $NH_4H_2AsO_4$, spectra rel. to temp. 8=41009
- $NaNO_2$, charge distrib. determ. of NO_2^- 8=48308
- $Na_2S_2O_6 \cdot 2D_2O$, motion of D2O molecules by n.q.r. 8=49669
- $NaSO_4$, Na^{23} quadrupole coupling 8=49667
- $PrCl_3$, of Cl^{35}, line splitting below 0. 4°K rel. to antiferromagnetic structure 8=36283
- $PtAs_2$, of As^{75} 8=49655
- RbH_2AsO_4, spectra rel. to temp. 8=41009
- Te crystals, I^{127} quadrupole coupling exam. 8=36284

nucleic-acid bases, irrad., yields of free radicals 8=49891
pyrimidine nucleosides, irrad., yields of free radicals 8=49891
I_2 reactions activated by radiative neutron capture in liq. hydrocarbons 8=41296
Nuclear reactions due to
alpha-rays
isomer prod. by 24 MeV bomard. of natural targets 8=47221
(α, γ) on low and medium 2 nuclei, cross sections and γ-spectra, 59 MeV 8=38462
(α, n), γ-ray angular distribution 8=34037
$(\alpha, 2n\gamma)$ rel. to applicability of statistical model description of ground state level intensities 8=38391
(α, xn) on heavy deformed nuclei, intermediate stages from γ-spectroscopy 8=25201
(p, n), γ-ray angular distribution 8=34037
$Al^{27}(\alpha, n)P^{30}$, obs., 8-25 MeV 8=25273
$Al^{27}(\alpha, 2p)Al^{29}$ obs., 8-25 MeV 8=25273
$Al^{27}(\alpha, p)Si^{30}$, obs., 10-25 MeV 8=25273
in Ar^{36}, α-cluster model 8=25049
$Au^{197}(\alpha, pn)Hg^{199}$, 25 MeV, rel. to conversion electrons 8=29361
$B^{11}(\alpha, Li^7)Be^8$, $E_\alpha = 42$MeV, differential cross-section obs. 8=43081
$Be^9(\alpha, 2\alpha)He^5$ differential cross sections at 28 MeV 8=29510
$Be^9(\alpha, 2\alpha)He^5$, quasi-free scatt., at 37 and 32 MeV 8=34040
Be^9 (α, n) C^{12}, calculated n spectra 8=38515
$Be^9(\alpha, n)C^{12}$, $E_\alpha = 6$-10 MeV, differential cross-section obs. 8=43079
$Be^9(\alpha, n)C^{12}$, 0.34-0.68 MeV, resonances obs. 8=25272
$C(\alpha, n)$ in thick targets 8=43141
$C^{12}(\alpha; n, p)O^{15}, N^{15}$, cross-section obs., 11.3-22.6 MeV 8=43084
$Br^{79}(\alpha, Zn)Rb^{81}$, decay obs. 8=25180
C, effective cross sections of reactions with 90 Mev α-rays 8=29515
C, rel. to effective cross-sections of fragments mass $A \geqslant 6$ 8=25271
$C^{12}(\alpha, 2\alpha)Be^8$, differential cross sections at 28 MeV 8=29510
$C^{12}(\alpha, 2\alpha)Be^8$, quasi-free scatt., at 37 MeV 8=34040
$C^{13}(\alpha, n)O^{16}$, 0.475-0.7 MeV, yield determ. 8=25272
$C^{13}(\alpha, n)O^{16}$, 3.5-6.5 MeV, ang. distrib. meas., set of J^π for O^{17} obtained 8=25103
$Ca^{40}(\alpha, \gamma)Ti^{44}$ levels obs. 8=25126
in Ca^{40}, α-cluster model 8=25049
$Ca^{40}(\alpha, t)$ and (α, He^3), cross sections rel. to DWBA calc., 56 MeV 8=34033
$Ca^{44}(d, p)Sc^{47}$, 760 keV level, mag. moment 8=25122
$Ca(\alpha, \gamma)Ti$, rel. to Ti^{44} first excited states 8=29306
Cd (α, xn), level systematics of Sn isotopes 8=38378
$Cl^{35}(\alpha, n)K^{38}$, rel. to β^+ decay of K^{38} 8=39361
$Co^{59}(\alpha, n)$, $E_\alpha = 8$-25 MeV, cross sections 8=29521
$Cr^{52}(\alpha, d)$, $(1g_{9/2})^2_{8+}$ excited state, $E_\alpha = 50$ MeV 8=38372
$Cu^{63}(\alpha, Zn)Ga^{65}$, decay obs. 8=25178
$D(\alpha, p\alpha)n$, energy spectra, deuteron break-up 8=47337
$Es^{253}(\alpha, p)$, Fm^{256} decay props. obs. 8=42977
$F^{19}(\alpha, Li^{6,7})O^{17,16}$, $E_\alpha = 42$MeV, differential cross-section obs. 8=43081
$F^{19}(\alpha, n\gamma\gamma)Na^{22}$, γ correl. obs. 8=25109
$F^{19}(\alpha, p\gamma)Ne^{22}$, $E_\alpha = 12.55, 13.55$ MeV, ang. correl. and lifetimes 8=29298
$F^{19}(\alpha, p\gamma)Ne^{22}$ at 10.80 MeV α energy, determ. of 5.14 MeV state lifetime in Ne^{22} 8=25108
$Fe^{54,56}(\alpha, d)$, $(1g_{9/2})^2_{8+}$ excited state, $E_\alpha = 50$ MeV 8=38372
$Fe^{54}(\alpha, t)$ and (α, He^3), Fe^{55} and Co^{55} analog states, obs. 8=29311
$Ho^{165}(\alpha, xn)$ $1 \leqslant x \leqslant 5$, total cross sections, 54 MeV 8=29523
$Ho^{165}(\alpha, xn)$ obs 8=29524
$Li^6 + \alpha \rightarrow 2\alpha + d$, 294 MeV α-particles 8=47353
$Li^7 + \alpha \rightarrow 2\alpha + t$ 29.4 MeV α-particles 8=47353
$Mg^{24}(\alpha, p\gamma)Al^{27}$, 3.00 MeV level of Al^{27}, obs. 8=38363
$Mg^{24} + \alpha \rightleftharpoons Al^{27} + p$ time-reversal invariance test 8=43088
N, effective cross sections of reactions with 90 MeV α-rays 8=29515
N, rel. to effective cross-sections of fragments mass $A \geqslant 6$ 8=25271
$N^{15}(\alpha, Li^{6,7})C^{13,12}$, $E_\alpha = 42$MeV, differential cross-section obs. 8=43081
$Na^{23}(\alpha, p\gamma)Mg^{26}$, branching ratios in Mg^{26} obs. 8=25112
$Ne^{20}(\alpha, \alpha'\gamma_{1.63})Ne^{20}$, $E_\alpha = 3.96$-6.08 MeV, γ excitation functions 8=38517
$Ne^{20}(\alpha, p\gamma_{0.44})Na^{23}$, $E_\alpha = 3.96$-6.08 MeV, γ excitation functions 8=38517
$Ni^{58,60,62}(\alpha, d)$, $(1g_{9/2})^2_{8+}$ excited state, $E_\alpha = 50$ MeV 8=38372
$O^{16}(\alpha, 2\alpha)C^{12}$, differential cross sections at 26 MeV 8=29510
$O^{18}(\alpha, \gamma)Ne^{22}$, e.m. deexcitation of Ne^{22} at 11.89 and 12.28 MeV 8=47240

Nuclear reactions due to—contd
alpha rays—contd
$O^{18}(\alpha, n\gamma)$ and (α, γ_0) rel. to Ne^{22} excited levels, $E_\alpha = 2.5$-5 MeV 8=42845
O, effective cross sections of reactions with 90 MeV α-rays 8=29515
$Sm^{150,152,154}(\alpha, Xn)Bd^{150-156}$, reaction mechanism for angular distribution of conversion electrons 8=47258
$Ti^{48}(\alpha, \alpha')$ at 31 MeV, octupole states systematics 8=43089
$Ti^{50}(\alpha, pn)V^{52}$, $Ti^{50}(\alpha, d)V^{52}$, rel. to β^+ decay of V^{52} 8=29361
$Tm^{169}(\alpha, xn)$ obs. 8=29524
$Tm^{169}(\alpha, xn)$ $1 \leqslant x \leqslant 5$, total cross sections, 54 MeV 8=29523
$24 \leqslant Z \leqslant 30$ nuclei, total cross sections rel. to A, 24.7 MeV 8=29518
$U^{235}(He^4)$, Coulomb excitation, 15-19 MeV 8=43105
$Zn^{64,66,68}(\alpha, d)$, $(1g_{9/2})^2_{8+}$ excited state, $E_\alpha = 50$ MeV 8=38372
cosmic rays
See also Cosmic rays/effects and interactions.
Aleph baryons, role 8=42734
elements and compounds, radiation lengths and critical energies 8=29387
with emulsion nuclei, anal. of azimuthal ang. distribs. of secondaries rel. to fireball prod. 8=29390
extremely high energy obs. 8=42733
fireball and jet prod. in photographic emulsions 8=29247
5.10^{10}-10^{12} eV with C and Fe 8=42728
fragmentation parameters of heavy nuclei on 'hydrogen' of nuclear emulsion 8=25031
with low energy transfer into soft component, ang. distrib. and transverse momentum 8=29239
multi-particle prod., calc. using inverse problem 8=42724
nucleon isobar prod. in emulsions, for low multiplicity interacts 8=33855
nucleon-nucleus model 8=42725
n prod. by μ at a depth of 150 m water equivalent in Pb, Cd, Fe, Al 8=38461
100 GeV π and N on C, Pb, cross-section obs. at 2000 m 8=42727
p + C interaction, 10^{10}-10^{12} eV, effective cross-section on 'Proton' satellites 8=25228
radio nuclides produced for tracers of atmospheric precipitation processes 8=50142
200 GeV, asymm. shower prod. 8=42718
200 GeV meas. of energy transfer to neutral pions 8=42730
Ni^{59} produced in meteorites and micrometeorites 8=43003
in O, 150 MeV–19GeV, spallation prod. of $Li^{6,7}$, $Be^{9,10}$, $B^{10,11}$, obs. rel. to these processes between cosmic rays in space 8=38156
deuterons
core excitation amplitude calc. in point d approx. 8=43060
Coulomb stripping on deformed nuclei below barrier 8=47340
(d, n), n generating tube 8=24949
(d, p), J-dependence for strong $l_n = 3$ transitions 8=25072
(d, p) excitation functions, transferred ang. momentum depend. 8=29495
(d, p) finite-range effects in direct reaction at low energies 8=43051
(d, p), isobaric analogues excitation, spectroscopic factors 8=38321
(d, p) stripping, p polarization calc. 8=25261
(d, p) stripping, Pearson and Coz theory 8=34025
(d, p) stripping reaction including charge exchange 8=34027
(d, p) stripping, spectrosopic factors from Butler-Born approximation 8=43049
(d, p) T-matrix element, general form in direct reactions 8=38448
(d, p), Tanifuji–Butler revised model 8=43047
$(d, p\gamma)$ and n capture γ-spectra rel. to mechanisms, 15 keV-15 MeV 8=25235
$(d, p\gamma)$ distinction between direct reactions from ang. correl. 8=34026
excitation of collective nuclear, with d disintegration 8=38499
optical pot. model and distorted-wave method 8=29492
particle transfer, as probes of particle unstable states 8=29496
proton polarization, BHMM theory 8=43048
stripping and pickup, $l = 3$, config. mixing and J dependence 8=43065
stripping, low-energy, sudden approximation 8=47341
stripping, polarized d, apparatus 8=29494
stripping reactions, ang. mom. transfer calc. using polarized d 8=25260
stripping theory, defence of Butler approach 8=43046
stripping theory, error in Butler approach 8=43045
$t(d, n)\alpha$ reaction, n yield, 14 MeV, α-counting 8=24946
triton energy spectrum from $He^3(d, t)2p$ 8=43005
$Al^{27}(d, \alpha)Mg^{25}$, direct and compound cross sections E_d=4 to 20 MeV 8=34032
$Al^{27}(d, He^3)$, 82 MeV 8=29428
$Al^{27}(d, p)Al^{28}$, total cross section and activation depth, 0.6–3.2 MeV 8=43061
$Al^{27}(d, p)$, 82 MeV 8=29428
$Al^{27}(d, p, \alpha)Al^{28}$, Mg^{25} differential absolute cross-sections obs. and compared with Hauser–Feshbach calcs. 8=38505
$Al^{27}(d, t)$, 82 MeV 8=29428
Al^{27}, 710 MeV rel. to optical model 8=38506

Nuclear reactions due to—contd
- **deuterons**—contd
  - $B^{10}(d, \alpha)Be^{8}$, 0.5-2.0 MeV, ang. distrib. of α obs. 8=25266
  - $B^{10}(d, p, \gamma)B^{11}$, 1.6-2.4 MeV p-$\gamma$ ang. correl. obs. 8=34030
  - $B^{11}(d, n)C^{12}$, neutron-gamma angular correlation measurements, 1.6-3.3 MeV 8=38502
  - $B^{11}(d, p\gamma)B^{12}$, 1.6 and 2.4 MeV p-γ correl. parameter, distortion parameter calc. 8=34036
  - Be(d, n), at 1 and 3 MeV, energy, ang. distrib. and yields of fast n 8=34029
  - $Be^{9}(d, p)$, polarized d, total ang. momentum transfer in stripping reaction, E ~ 8 MeV 8=47345
  - $Be^{9}(d, p)Be^{10}$, polarization-vector analysing power, 12 MeV 8=34031
  - $Be^{9}(d, p)Be^{10}$, polarized d, p asymmetry obs. 8=29494
  - $Be^{9}(d, p)Be^{10}$ polarized d induced, p asymmetry rel. to spin-orbit interaction, obs. 8=29503
  - $Be^{10}(d, p)Be^{11}$, polarized d, p asymmetry obs. 8=29494
  - $Bi^{209}(d, t)$, Bi^{208} single proton states obs. 8=38398
  - $C^{12}(d, n)N^{13}$, N polarization calc. 8=38503
  - $C^{12}(d, p)$ polarized d, total ang. momentum transfer in stripping reaction, E ~ 8 MeV 8=47345
  - $C^{12}(d, p)C^{13}$, γ-ray emission, 170 keV, plane polarisation 8=43058
  - $C^{12}(d, p)C^{13}$, j-forbidden reactions stripping 8=47346
  - $C^{12}(d, p)C^{13}$, N polarization calc. 8=38503

  - $C^{13}(d, t)$, $C^{12}O^{+}$ and 2^{+} spectroscopic factors, 12.1, 13.3 and 14.0 MeV obs. 8=47347
  - Ca^{40}, optical model parameters 8=29497
  - $Ca^{40}(d, p)Ca^{41}$, proton polarization, $E_d = 5$ MeV 8=43063
  - $Ca^{40}(d, p)$, polarized d, total ang. momentum transfer in stripping reaction, E ~ 8 MeV 8=47345
  - $Ca^{42,44}(d, p)Ca^{43,45*}$ with core excitation amplitude calc. in point d approx. 8=43060
  - $Ca^{48}(d, n)Sc^{49}$, ang. distributions obs. 5.5, 6.0 MeV 8=38508
  - $Cr^{50}(d, p)Cr^{51}$, level struct. determ. 8=42874
  - $N^{14}(d, n)O^{15}$, 2.9, 3.7 MeV polarization calc. by distorted wave theory 8=38509
  - $Ca^{40}(d, p)Ca^{41}$, asymmetry of p ang. distrib., with polarized d 8=29507
  - $Ca^{40}(d, p)Ca^{41}$, n strengths for $J = {}^{3}/_{2}{}^{+}$ states 8=33909
  - $Ca^{40}(d, p\gamma)Ca^{41}$, angular correl. of 3.209, 3.623 and 3.740 MeV states 8=29303
  - $Ca^{40}(d, t)$ and (d, He^{3}), cross sections rel. to DWBA calc., 28 MeV 8=34033
  - $Ca^{41,43,45}$ spectroscopic factor calc. 8=33871
  - $Ca^{42}(d, n)Sc^{43}$, E_d=5.15 MeV, obs. 8=34034
  - $Ca^{44}(d, p\gamma)Ca^{45}$, 5 MeV, level structure of Ca^{45} 8=38366
  - $Ca^{48}(d, He^{3})K^{47}$, 34.4 MeV, rel. to levels of K^{47} 8=25268
  - $Cr^{52}(d, He^{3})V^{51}$, 34.4 MeV, rel. to levels of V^{51} 8=25268
  - $Cr^{52}(d, p)$, polarized d, total ang. momentum transfer in stripping reaction, E ~ 8 MeV 8=47345
  - $Cu^{63,65}(d, He^{3})Ni^{62,64}$, spectroscopic factors and transferred angular momenta, E_d=34.2 MeV 8=34035
  - $D(d, n)He^{3}$, in n. pulse production 8=47150
  - $D(d,n)He^{3}$, recoil determ. of phosphor efficiency 8=29208
  - $D(d, n)He^{3}$, recoil particle detection mag. analyser 8=47179
  - $D(d, p)T$, $E_d = 80$ keV, polarized d effects 8=47343
  - $D(d, pd)n$, energy spectra, deuteron 8=47337
  - D, $E_d < 1$ MeV 8=34028
  - $Er^{166,168,170}(d, p)Er^{167,169,171}$ levels obs. 8=25152
  - $Fe^{54}(d, He^{3})Mn^{53}$, 34.4 MeV, rel. to levels of Mn^{53} 8=25268
  - $H^{2}(d, p)H^{3}$ for He^{4} states search, 3-11 MeV 8=38353
  - He^{3} energy spectrum from $t(d, He^{3})2n$ 8=43005
  - $He^{3}(d, t)2p$, p-p final state interactions, 36 MeV 8=43078
  - $Hf^{176,180}(d, p)Hf^{177,181}$, level spectra 8=42911
  - $Hf^{178,180}(d, t)Hf^{177,179}$, level spectra 8=42911
  - $In^{113}(d, 2n)Sn^{113}$, fractional distillation of active Sn^{113} 8=42954
  - $K^{39}(d, \alpha)Ar^{37}$, statistical model analysis, 4.55-5.32 MeV 8=47349
  - $Li^{6}(d, p)Li^{7}$, vector analysing power, j-dependence 8=47344
  - $Li^{7}(d, \alpha, \alpha)n$, rescattering effects, $E_d = 3.0, 3.2$ and 5.9 MeV 8=43057
  - $Mg^{24}(d, p)$, polarized d, total ang. momentum transfer in stripping reaction, E ~ 8 MeV 8=47345
  - $Mg^{24}(d, p)$, j-forbidden stripping reactions 8=47346
  - $Mg^{24,25}(d, n)Al^{25,26}$, 5.5 or 6 MeV, transitions of $Al^{25,26}$ obs. 8=25113
  - $Mg^{25}(d, p)Mg^{26}$ and $Mg^{26}(d, p)Mg^{27}$, mean energy level width of, Al^{27} and Al^{28} 8=47237
  - $Mg^{25}(d, p\gamma)Mg^{26}$, levels of Mg^{26} deduced 8=25112
  - $Mg^{26}(d, \alpha)Na^{24}$ and a new level of Na^{24} 8=38361
  - $Mo^{92}(d, p)Mo^{93}$, excited states obs. 8=25139
  - $N^{15}(d, n)O^{16}$, 3.2-3.8 MeV, n polarization obs. 8=43059
  - $Ne^{20}(d, n\gamma)Na^{21}$, n-$\gamma$ angular correlation 8=47348
  - $Ne^{20}(d, p)Ne^{21}$, p group cross sections 8=29506
  - $Ni^{58,60}(d, n)Cu^{59,61}$, differential cross-sects. 8=29308
  - $O^{16}(d, \alpha)N^{14}$, isospin-allowed differential cross-section obs. 8=29504
  - $O^{16}(d, n)F^{17,17*}$ cross sections, 2-3.5 MeV 8=38504
  - $O^{16}(d, p)$, j-forbidden stripping reactions 8=47346

Nuclear reactions due to—contd

  - $C^{13}(He^{3}, Be^{8})Be^{8}$, ground-state Be^{8}, differential cross-sections 8=43083
  - $C^{13}(He^{3}, d)N^{14}$, mechanism rel. to low-levels of N^{14} 8=43085
  - $C^{12}(He^{3}, p)$, N^{14} levels, 20.1 MeV obs. 8=47230
  - $C^{12}(He^{3}, p\gamma)N^{14}$, study of γ rays 8=47354
  - Ca^{37} prod. and delayed-p decay, 32 MeV 8=38414

Nuclear reactions due to—contd
helium-3—contd
$Ca^{40}(He^3, \alpha)Ca^{39}$, anomalous spectroscopic factors, 14-28 MeV 8=34042
$Ca^{40}(He^3, d\gamma)Ca^{39}$, low level struct. 8=25119
$Ca^{40}(He^3, n)Ti^{42}$ energy levels 8.5-10 MeV 8=38371
$Ca^{40}(He^3, p)$, Sc^{42} ang. distrib. and J^π, T assignment 8=42869
$Cl^{37}(He^3, \alpha)Cl^{36}$, S^{36} ground state analogue 8=29516
$Co^{59}(He^3, d\gamma)$, E = 18, 22 MeV, levels obs. 8=25131
$Cu^{65}(He^3, \alpha)$, $E_{He3} = 12$-32 MeV, Cu^{64} ang. distrib. obs. 8=43092
$F^{19}(He^3, Li^6)O^{16}$, relative spectroscopic factor and yield curves, 2.0-6.0 MeV 8=43087
$Fe^{54}(He^3, \alpha)Fe^{53}$, $E_{He^3} = 13.0$ MeV, analysis 8=29520
$Fe^{54}(He^3, p)Co^{56}$, p spectrum and angular distrib. rel. to Co^{56} levels, 18 MeV 8=29519
$Ge^{70}(He^3, d)As^{71}$, energy levels obs. 15 MeV 8=43093
$(He^3,)$ for Sb^{125} and $I^{127,129,131}$ orbital angular-momentum transfers and spectroscopic factors, 25 MeV 8=42893
$He^3(He^3, He^4)2p$, p-p final state interactions, 53 MeV 8=43078
$In^{113,115}(He^3, d)Sn^{114,116}$, p particle-hole pairs excitation, 4 MeV 8=34044
$K^{39}(He^3, d)$, Ca^{40} excited levels γ decay rel. to nature, obs. 8=33910
$K^{41}(He^3, d)Ca^{42}$ particle hole states up to 5.79 MeV obs. 8=47243
$Li^6(He^3, p\text{-}\alpha\alpha)$ below 2MeV 8=29513
$Li^7(He^3, p)Be^9$, n decay branching ratios 8=29358
$Li^7(He^3\{p, \alpha\})\{Be^9, Li^6\}$0.9-12 MeV rel. to unreported levels of Be^9, Li^6 8=25098
$Mg^{24}(He^3, p)Al^{27*}$, γ-ray transition and spin assignments to levels 8=42849
$Mo^{92}(He^3, \alpha)$ rel. to n hole states, 18 MeV 8=29319
Mo^{92} (He^3, d), rel. to p levels, 18 MeV 8=33918
$N^{14}(\tau, d)$, O^{15} levels and ang. distrib., $E_\tau = 11$ MeV 8=33900
Ne^{17} prod. and delayed-p decay, 32 MeV 8=38414
$Ne^{22}(He^3, d\gamma)$, Na^{23} $J^\pi = 1/2^+$ states e.m. decay branching ratio obs. 8=42847
Ni isotopes, (He^3, α) cross sections 8=29522
$Ni^{58}(He^3, d)Cu^{59,61}$, $E_{He} = 16.4$ MeV, level struct. determ. 8=42882
$Ni^{58}(He^3, He^{3\prime})$, optical model analysed, 51.3 MeV 8=43076
$Ni^{58}(He^4, \alpha)$, optical model analysed, 51.3 MeV 8=43076
$O^{16}(He^3, n)Ne^{18}$, double stripping anal., ang. distrib. and transitions 8=43086
$O^{16}(He^3, 2n)$, Ne^{17} delayed p decay, 33 MeV 8=38415
$O^{16}(\tau, \alpha)$, O^{15} levels and ang. distrib., $E_\tau = 11$ MeV 8=33900
$p(He^3, d)2p$, p-p final state interactions, 53 MeV 8=43078
Pb^{207} (He^3, d), Bi^{208} single proton states obs. 8=38398
$Pb^{208}(He^3, d)Bi^{209}$, level struct. obs. 8=42925
$S^{28}(He^3, 2n)$, S^{29} delayed p decay, 33 MeV 8=38415
$S^{32}(He^3, 2n)$, Ar^{33} delayed p decay, 33 MeV 8=38415
$Sc^{45}(He^3, d)Ti^{46}$, ang. distrib. obs. 8=25274
$Sc^{45}(He^3, d)Ti^{46}$, 15 MeV, levels of Ti^{46} 8=25127
Si^{25} prod. and delayed-p decay, 32 MeV 8=38414
$Si^{28}(He^3, p\gamma)P^{30}$, levels below 6 MeV obs. 8=25116
$Sn(He^3, d)$ rel. to Sb odd-odd isotopes levels, ⩽2 MeV 8=34043
$Sr^{88}(He^3, \alpha)$, rel. to n hole states, 18 MeV 8=29319
$Sr^{88}(He^3, d)$, rel. to p levels, 18 MeV 8=33918
Ti^{41} prod. and delayed-p decay, 32 MeV 8=38414
$Ti^{46,47,48,49,50}(He^3, He^4)$ $Ti^{45,46,47,48,49}$ neutron pick up and energy levels obs.: 18.2 MeV 8=43090
$Ti(He^3, H^3)$, "quasi-elastic" data rel. to isobaric-spin-dependent potential strength and shape 8=43091
$Ti(He^3, H^3)$, "quasi-inelastic" transition to excited isobaric
$Ti^{47}(He^3, \alpha)Ti^{46}$, 15 MeV, levels of Ti^{46} 8=25127
$Ti^{47}(He^3, d)V^{48}$, energy levels obs. 8=29517
$Ti^{48}(He^3, t)$, V^{48} levels obs. quasi-inelastic 25 MeV 8=38518
$U^{238}(He^3, \alpha)$, $|743\uparrow|$ Nilsson configuration in U^{237} obs. 8=34045
Zr isotopes, (He^3, α) cross sections 8=29522
Zr^{90} excitation functions and recoil ranges 8=43094
$Zr^{90}(He^3, \alpha)$ rel. to n hole states, 18 MeV 8=29319
Zr^{90} (He^3, d), rel. to p levels, 18 MeV 8=33918
$Zr^{90}(He^3, d)Nb^{91} \to Zr + p$, isobaric analog states of Nb 8=25275

$C^{12}(n, \gamma)C^{13}$, 2 γ-rays energy obs. thermal neutrons 8=38484
n–C total and free cross-sections 8=24952
$Ca^{40}(n, \alpha)Ar^{37}$, Ar^{37} diff. in CaO crysts. 8=39969
$Ca^{40}(n, d)K^{39}$, transitions angular distrib. rel. to shell model, obs. 8=29468
$Ca^{40}(n, p)K^{40}$, p spectra and ang. distrib. 8=25243
$Ca^{44}(n, \gamma)$, Ca^{45} levels, Q-value, thermal energies 8=38487
Ca, total cross-sections, at 14 MeV 8=38486

Nuclear reactions due to—contd
neutrons—contd
CaF_2 doped with UO_2, UC or U, neutron irrad. to give inert gases 8=34107
$Cd^{112}(n, 2n)Cd^{111m}$, cross section obs. 8=29475
Cd^{114}, 9.0 MeV γ emission, ang. distrib. asymmetry obs. 8=33921
Cd capture cross-section 8=29476
Ce, total cross-sections for energies 3.2 to 5.2 MeV 8=34009
$Cl^{35}(n, d)S^{34}$, transitions angular distrib. rel. to shell model, obs. 8=29468
Co^{59}, total cross section rel. to intermediate struct., 0.5-1.2 MeV 8=29469
$Co^{59}(n, 2n)Co^{58gm}$ isomeric ratio and total cross section 8=38489
Cr^{52}, total cross section rel. to intermediate struct., 0.5-1.2 MeV 8=29469
Cs^{133}, capture 0.2-3 MeV obs. 8=29472
$Cu^{63,65}(n, \gamma)$, 10-60 keV, γ averaged intensities 8=25247
$Cu^{63}(n, 2n)$ and (n, p) cross-sections, 16.6-17.7 MeV 8=29471
$Cu^{63}(n, 2n)Cu^{62}$, cross section determ. 8=25246
$Cu^{63}(n, 2n)Cu^{62}$ 13.9-14.7 MeV, excitation function obs., rel. to statistical theory 8=38488
Cu, radiative capture, E_n = 200 eV-16.5 keV, obs. 8=38490
$Eu^{151,153}$, n capture, radiative, obs. 8=29479
$Eu^{151}(n, \gamma)Eu^{152}$, conversion e coincidence spectra and low level scheme 8=47255
$F^{19}(n, \alpha)$, spectra and ang. distrib., spectroscopic factors, E_n,= 14.4 MeV 8=47328
$F^{19}(n, d)$, spectra and ang. distrib., spectroscopic factors, E_n = 14.4 MeV 8=47328
$F^{19}(n, d)O^{18}$, E_n=14.1 MeV, compound nucleus and direct effects 8=29465
$F^{19}(n, \gamma)F^{20}$, 73 γ-rays spectral lines obs. thermal neutrons 8=38484
$F^{19}(n, p)$, spectra and ang. distrib., spectroscopic factors, E_n = 14.4 MeV 8=47328
$F^{19}(n, t)$, spectra and ang. distrib., spectroscopic factors, E_n = 14.4 MeV 8=47328
$Fe^{54}(n, 2n)Fe^{53}$, 13.9-17.4 MeV cross-section obtained, compared to statistical theory 8=38488
Fe^{56}, total cross section rel. to intermediate struct., 0.5-1.2 MeV 8=29469
Fe^{57}, capture, rel. to low-energy levels 8=47246
Fe, capture, resonant γ scatt. obs. 8=25245
Ga^{69} $(n, 2n)$ cross section obs., 14.8 MeV 8=43043
$Ga^{70,72}$, slow n capture, γ-spectra rel. to levels, obs. 8=29316
$Gd^{155}(n, \gamma)Gd^{156}$, resonances, intensities of transitions to ground and first excited state 8=38389
$Gd^{157,158}(n, \gamma)$, conversion e detect. in thermal n counter 8=33813
Gd rel. to induced levels spacing, obs. 8=29347
Ge^{74}, capture 0.2-3 MeV obs. 8=29472
$H(n, \gamma)$, tissue autogamma dose calc. from spectrometer obs. 8=38067
$H^3(n, t)$ and $H^3(n, d)$ at 14.1 MeV, outgoing particles obs. 8=33769
Hg isotopes, (n, γ), reactor thermal n cross sections, obs. 8=34012
Ho^{165}, n capture, radiative, obs. 8=29479
$In^{113}(n, \gamma)In^{114}$, thermal n activation cross sections 8=29477
$In^{113}(n, 2n)In^{112g,m}$, cross sections, 14.7 MeV 8=34013
$In^{113}(n, 2n)In^{112m,g}$, prod. cross-section meas. by activation method 8=25248
$In^{115}(n, \alpha)$, 14.4 MeV, direct reaction 8=25249
$In^{115}(n, 2n)In^{114g,m}$, cross sections, 14.7 MeV 8=34013
$P^{27}(n, \gamma)P^{28}$, E_n=14 MeV, capture cross section and γ spectrum 8=29466
$K^{39}(n, 2\alpha)P^{32}$, 14 MeV, prod. cross-section for P^{32} 8=38494
$K^{39}(n, d)Ar^{38}$, transitions angular distrib. rel. to shell model, obs. 8=29468
$K^{39}(n, \gamma)K^{40}$, 29.4 keV γ-ray Mössbauer exam. 8=42859
K, total cross-sections, at 14 MeV 8=38486
$La^{139}(n, \alpha)Cs^{136}$ with polarized neutrons, asymm. of reaction 8=38491
La, total cross-sections for energies 3.2 to 5.2 MeV 8=34009
$Li^6(n, \alpha)H^3$, use of double pulsed ionization chamber 8=24512
$Li^6(n, p)He^6$, He^6 ground state transition dominance, 152 MeV 8=34007
$Li^7(n, n^3)Li^5$, bound n^3 search E_n = 14–19 MeV 8=43039
Lu^{176}, n capture, radiative, obs. 8=29479
Mg^{25}, capture γ-ray spectrum calc. 8=33886
$Mn^{55}(n, \gamma)Mn^{56}$, evidence for direct reaction mechanism 8=25244
Mn^{55} total cross section, parametric fit, 0.01 eV-50 keV 8=38477
Mn^{55}, total cross section rel. to intermediate struct., 0.5-1.2 MeV 8=29469
$Mo^{92}(n, 2n)Mo^{91m,g}$, prod. cross-section meas. by activation method 8=25248
$N^{14}(n, \alpha)B^{11}$ angular distributions obs. 14.9 MeV 8=43042
$N^{14}(n, \alpha)B^{11}$, levels obs., E_n = 14.1 MeV 8=43041
$N^{14}(n, \alpha)B^{11}$, 14.1 MeV, cross-section obs. 8=25239

Nuclear reactions due to—contd

- **neutrons**—contd
  - $N^{14}(n,\gamma)N^{15}$ 9.15 MeV doublet energies from prompt γ-ray spectra 8=42839
  - $Na^{23}(n,d)Ne^{22}$, E_n=14.1 MeV, compound nucleus and direct effects 8=29465
  - $Na^{23}(n,\gamma)$ circular polarization obs. 8=38485
  - Na^{24} in blood activation, calc. from spectrometer obs. 8=38067
  - Na in body activation, emergency dosimetry 8=33765
  - Na, total cross-sections, at 14 MeV 8=38485
  - $Nb^{93}(n,\gamma)Nb^{94}$, levels obs. 8=25138
  - Nb^{93}, (n, 2n) cross-section obs., 14 MeV rel. to magic n number effect 8=29473
  - $Nd^{143}(n,\gamma\alpha)$, thermal, α transition obs. 8=34014
  - $Ne^{20,22}(n,\gamma)Ne^{21,23}$, thermal neutron capture 8=47329
  - $Ni^{58}[(n,d)+(n,np)+(n,pn)]Co^{57}$, cross section obs. 8=29475
  - $Ni^{58}(n,p)Co^{58m+g}$, cross section obs. 8=29475
  - $Ni^{58}(n,p)Co^{58gm}$ isomeric ratio and total cross section 8=38489
  - $Ni^{58}(n,2n)Ni^{57}$, cross section obs. 8=29475
  - $Np^{237}(n,\gamma)Np^{238} \xrightarrow{\beta} Pu^{238}$, yield calc. 8=29480
  - Np isotopes, n capture in thermonuclear explosions 8=25252
  - $O^{16}(n,\alpha_0)C^{13}$, angular distributions obs. 14.9 MeV 8=43042
  - $O^{16}(n,\alpha)C^{13}$, differential cross sections for 15-19 MeV 8=47327
  - $O^{16}(n,\alpha)C^{13}$, 14.1 MeV, cross-sections obs. 8=25240
  - $O^{16}(n,\gamma)N^{16}$ as means of meas. the O content of metals 8=32167
  - $O^{18}(n,\alpha)C^{15}$, 7.5, 8.6 MeV obs. 8=47326
  - O, total cross-sections for energies 3.2 to 5.2 MeV 8=34009
  - Os^{192}, capture 0.2-3 MeV obs. 8=29472
  - $P^{31}(n,\gamma)$ circular polarization obs. 8=38485
  - $P^{31}(n,2n)$ cross sections obs., 14.8 MeV 8=43043
  - $P^{32}(n,p)S^{31}$, fast-n dosimetry by Cerenkov radiation meas. 8=33798
  - Pd^{108}, γ-ray spectrometer 8=47068
  - Pd isotopes, (n,γ), reactor thermal n cross sections, obs. 8=34012
  - Pr, total cross-sections for energies 3.2 to 5.2 MeV 8=34009
  - Pt, capture γ-rays, levels of Pt^{196} 8=38492
  - Pt^{198}, γ-ray spectrometer 8=47068
  - $Pu^{238}(n,\gamma f)$, obs. in neutron-induced fission 8=43114
  - Pu^{242}, nuclear explosion irrad., heavy-isobar yield rel. to supernovae reactions, obs. 8=38495
  - $Rb^{85,87}$, (n, 2n) cross-section obs., 14 MeV rel. to magic n number effect 8=29473
  - Rh, activation foil n personnel dosimeter 8=33795
  - $Rh^{113}(n,\alpha)$, 14.4 MeV statistical and direct reaction 8=25249
  - Ru^{96}, (n, 2n) cross-section obs., 14 MeV rel. to magic n number effect 8=29473
  - $S^{32}(n,p)P^{32}$, fast-n dosimetry by Cerenkov radiation meas. 8=33798
  - $S^{32,34}(n,d)P^{31,33}$, 14 MeV cross-sections and DWBA analysis 8=25241
  - S activation dosimetry and ionization chamber comparison, 3 and 15 MeV 8=38079
  - $Sb^{121}(n,2n)Sb^{120g}$ and Sb^{120m}, isomer ratios and cross sections of isomeric pair product 8=25250
  - $Sc^{45}(n,\gamma)Sc^{46}$, low level struct. 8=25121
  - Sc^{46}, reactor n capture cross-section 8=47330
  - Si^{28}, E_n=21.3 MeV, d, α ang. distrib. obs. 8=29467
  - $Sm^{144}(n,2n)Sm^{143m,g}$, , prod. cross-section meas. by activation method 8=25248
  - $Sm^{149}(n,\gamma)Sm^{150}$, rel. to energy levels 8=29333
  - Sn isotopes, (n,γ), reactor thermal n cross sections, obs. 8=34012
  - $Sr(n,\gamma)$, γ energies and intensities obs. 8=34011
  - Sr^{86}, (n, 2n) cross-section obs., 14 MeV rel. to magic n number effect 8=29473
  - $Sr^{90}(n,\gamma)Sr^{91}$ obs. for reactor n 8=29474
  - $Sr^{90}(n,p)Y^{90}$ obs. for reactor n 8=29474
  - $Tb^{159}(n,\alpha)Eu^{156}$, 14.2 MeV, rel. to evaporation theory 8=25251
  - $Te^{122}(n,\alpha)Sn^{119}$, 14.2 MeV rel. to evaporation theory 8=25251
  - Te, isomeric cross sections E_n = 14.8 MeV 8=47332
  - Th^{232} fission due to neutrons with energies 1.38, 1.51, 1.65, 1.90, 2.37, 2.87, 5.6 MeV 8=38531
  - $Th^{232}(n,\gamma)$, energy depend. of capture cross section, 0.1 to 3.4 eV 8=38493
  - Th^{232}, total cross section and reduced n widths, $\leqslant$ 3 keV 8=29347
  - ThO_2 rods, effective reson. integral temp. depend., obs. 8=34017
  - Ti^{48} n capture, 341 keV transition, multipolarity 8=25125
  - $Ti^{48}(n,\gamma)Ti^{49}$, γ-γ coincidence and angular correl., obs. 8=29470
  - Tl^{202}, (n, 2n), cross-section for production of isomeric state 8=38395
  - $Tm^{169}(n,\alpha)Ho^{166}$, 14.2 MeV, rel. to evaporation theory 8=25251
  - U^{237} absorption cross section 8=29481
  - U^{238}, evaporation and fission n spectra, 800 keV-14 MeV 8=34018
  - U^{238} multiple capture, $Fm^{257,259}$ and Md^{259} prod. in Cyclamen explosion 8=38496
  - β $U^{235}(n,\gamma)U^{236}(n,\gamma)U^{237} \xrightarrow{\beta} Np^{237}(n,\gamma)Np^{238} \xrightarrow{\beta} Pu^{238}$, yield calc. 8=29480
  - U^{238}, nuclear explosion irrad., heavy-isobar yield rel. to supernovae reactions, obs. 8=38495
  - $U^{235,238}$ radiative capture and fission in 1.03% enriched U - D_2O lattices, obs. 8=38585
  - U^{235} slow neutron resonance spins 8=33944
  - U isotopes, n capture in thermonuclear explosions 8=25252
  - V^{51}, total cross section rel. to intermediate struct., 0.5-1.2 MeV 8=29469
  - $V^{51}(n,\gamma)V^{52}$, γ-γ coincidence and angular correl., obs. 8=29470
  - $W^{182,183,184,186}$ and natural, effective reson. integrals, reactivity obs. 8=34015
  - $W^{184,186}$ in natural W, reson. integrals, activation obs. 8=34016
  - Y^{89}, (n, 2n) cross-section obs., 14 MeV rel. to magic n number effect 8=29473
  - $Yb^{168}(n,\gamma)Yb^{169}$ level struct. obs. 8=42909
  - Xe isotopes, (n,γ), reactor thermal n cross sections, obs. 8=34012
  - $Zn^{64}(n,2n)$cross section obs., 14.8 MeV 8=43043
  - Zr^{90}, (n, 2n) cross-section obs., 14 MeV rel. to magic n number effect 8=29473

Nuclear reactors, fission
  - ANNA assembly, reln. between stable period and prompt n time constant 8=34091
  - breeder, Na-cooled, cavitation 8=29560
  - with core of cylindrical elements, press. drop and coolant vel. distrib. 8=39268
  - critical buckling, approx. determ. 8=38559
  - damage flux in critical assemblies, rel. to design of inpile thermionic reactor 8=28504
  - DIDO and PLUTO, hall tritium monitoring system 8=29565
  - EBR-II, n counting-mean-square voltage channel performance 8=47157
  - economics of explosively released energy conversion to electricity 8=25287
  - economies of nuclear power 8=47370
  - fail-safe solid state safety system with dynamic logic circuits 8=25321
  - fuel elements, cooling fin surface geometry 8=24000
  - fuel elements, herringbone cooling fin designs 8=24002
  - gas coolant moisture detection, dewpoint device 8=47932
  - gas cooled, development 8=47391
  - gas cooled, use of N^{16} for outlet channel temp. meas. 8=47435
  - Gewsthacht, n dose-rates, p-recoil, rein and BF_3 counters obs. 8= 33807
  - in-pile calorimeter for simultaneous meas. of n-induced and γ-induced energies 8=25319
  - instrumentation, to 1968, review 8=28967
  - JRR-3 dynamics meas. by pseudo-random binary signals 8=34094
  - kinetics expts. interrelation, theory and obs. 8=38573
  - laminar instability, in gas-cooled passages 8=25809
  - mirror, ion loss by collisions 8=30021
  - moderators, applic. for isotopes 8=43245
  - neutron convertor for investigation of n scatt. and attenuation 8=29543
  - neutron cross section for (n, γ) reactions 8=34012
  - neutron flux detector 8=43148
  - neutron flux meas., γ-compensated ionization chambers 8=47156
  - neutron noise, external control loop. 8=38589
  - neutron number fluctuations 8=38552
  - neutron scatt., triple-axis spectrometer 8=33828
  - neutron spectrometry by transmission meas. 8=24980
  - n transport calcs, use of method of 'expected leakage probability' 8=38581

Nuclear reactors, fission—contd
  - noise, γ-ray obs. 8=34095
  - Orgel-type cluster, internal conversion ratio obs. 8=25305
  - power level monitoring with Cherenkov counter 8=47436
  - power monitoring by plasma microwave diagnosis 8=47432
  - problems for economic power generation 8=47367
  - reflected, pulsed n reactivity meas, interpret. with Cohn model 8=43139
  - radiation heating, adiabatic and steady state calorimeters for meas. 8=47434
  - radioisotope production in JRR-3, n irradiation conditions 8=24947
  - review of nuclear power 8=47369
  - shutdown reactivity, asymmetric n source meas., auxilliary params. 8=38593
  - spherical, critical radius, use of spherical harmonics. approxs to n transport eqn. 8=38580
  - subcritical, modified pulsed source expt, theoretical anal. rel. to reactivities 8=43135
  - subcritical, reactivity calc. by Garelis-Russel formula, spectral correction 8=25298
  - subcritical system, reactivity meas., spatial depend 8=25320
  - tangential channels from lifting of core, ratios of n fluxes 8=34093
  - temperature control of cooling gas in radiation loop 8=29554
  - water-cooled 8=47390
  - ZR-3 critical assembly, rel. to WWM-SM core development 8=34092
  - Na flowmeter, in-core permanent-magnet, calibration and stability 8=48013
  - U^{238}, D_2O moderated and diphyl cooled lattices ρ^{28} factor meas. 8=34077
  - UO_2-H_2O lattices, reactivity pulsed source obs. diffusion theory analysis 8=34065
  - Xe poisoning during shutdown, optimum control using min. energy 8=38587
- **materials**
  - actinide cpds, elec. and thermal props. 8=27233
  - anthracene oil components as coolant 8=49965
  - boiling water loops for irradiation of water-cooled fuel elements 8=47415
  - bubbles growth rate in transient boiling 8=48049
  - buckling and migration area, sub-crit. meas. 8=38588
  - burn-up determ. in zero power expts., by γ-spectrometry 8=25304
  - canning material, high strain fatigue at high temp. 8=35628
  - canning materials for water cooled power reactors 8=43145
  - ceramic fuel elements, design rel. to irrad. damage effects and materials coupling 8=25312
  - ceramics, isothermal irrad. assembly for fast n damage 8=35597
  - ceramics, radiation damage processes and defect cluster growth 8=31129
  - circulation loops for gas-cooled fuel elements 8=47416
  - cluster lattices, enriched UO_2 and PUO_2/UO_2 fuels, obs. of buckling reaction coeffs 8=43142
  - coated-particle fuels, influence of irrad. on stability 8=47425
  - coated particles, system of crack configs., theory 8=29561
  - container of Ta for liquid Pu alloys, corrosion, O, N impurity effects 8=47412
  - coolants, liquid-metal, heat transfer coeffs., effect of variable wall heat flux 8=25309
  - critical mass of reactor fuel in water 8=34101
  - diffusion rates in inorganic materials 8=48772
  - diphenyl, -m-and p-terphenyl, phys. props. for heat transfer calcs. as coolants 8=30422
  - displacement damage rates in differing reactor types 8=47408
  - fission product distribution in coated fuel particles, determination 8=47404
  - fuel, assessment of requirements, conts. heat output, fuel lifetime, toxicity and reprocessing 8=47423
  - fuel, burn up determ., using isotope separator 8=29567
  - fuel element consumption state meas. using γ-ray semiconductor spectrometers 8=47403
  - fuel element shapes compared 8=47419
  - fuel element thermal stress simulation, graphite furnace 8=34112
  - fuel elements, He cooled, heat transfer rel. to surface roughening, in-pile obs. 8=34104
  - fuels, corrosion rate at interface with its can, rel. to extraction 8=29563
  - fuels, inert fission-prod. gas bubbles nucleation, irrad. effects 8=31109
  - fuel inserts for gas-cooled reactors, disintegration with oxidizing acid mixtures 8=47431
  - fuel, irradiated, non-destructive inspection by n radiography 8=46769
  - fuel meltdown, study by fast neutron hodoscope 8=47164
  - fuel particles, coated, fission prod. release, diffusion model 8=38591
  - fuel particles, coated, thermal cond. 8=47410

Nuclear reactors, fission—contd
  materials—contd
    fuel, performance test code 8=34106
    fuel recycle optimization, linear and quadratic programming 8=47397
    fuel reprocessing, Uranyl-hydrogen system, cation exchange equilibria 8=47409
    fuel reprocessing, UO_2 from uranyl nitrate-TBP soln. 8=47413
    fuel spheres, irradiated, swelling meas. by micro-radiography 8=34102
    fuels, thermal diffusion 8=48776
    fracture for thin sheets 8=29558
    gamma-ray absorpt. coeffs. for H, C, H_2O, Al, Ar, Fe, Mo, Pb and U 8=47411
    graphite and neutron wave propagation; effect of Bragg cut-off energy 8=47375
    graphite bricks, unsteady heat conduction 8=28401
    graphite, grade A reactor, n-irrad. at 80°K and annealed at temps up to 300°K, e.s.r. 8=45081
    graphite in ANNA reactor, diffusion parameters $<\Sigma_a V>$ and D 8=34073
    graphite, mech. props meas. before and after n-irrad. 8=26789
    graphite, neutron irrad. obs. 8=43143
    graphite, oxidation anisotropy 8=41239
    graphite, reactor temp. and atm. effects rel. to appls. 8=25312
    graphite, reaction with H at high temp. and press. 8=47422
    Hastelloy, neutron irrad. effects on stress rupture and creep 8=47400
    inert gases, fission gases, release from UO_2 fuel rods 8=34108
    irradiation capsules for coated particles 8=47414
    irradiation, physical effects 8=29564
    liquid metal depth meas. equipment for recovery of spent fuel. 8=38594
    meta-terphenyl, e radiolysis, temp., intensity and post irad. effects, 1.35 MeV 8=36624
    neutron thermal wave propagation and effect of Bragg continuum in graphite 8=47374
    oxides, disintegration effect on power curves in fast reactors 8=47424
    pebble bed reactor, statistical space distrib. of fuel elements calc. program 8=43146
    Sicral F_1, irrad. swelling rel. to fission gas bubbles, 10^{14} n/cm² sec 8=44506
    Sicral F_2, irrad. swelling rel. to fission gas bubbles, 10^{14} n/cm² sec 8=44506
    spherical fuel elements in pebble bed reactor, reson. absorpt. 8=43147
    steel as stainless as reactor material, embrittlement by He prod. in (n, α) reactions 8=47406
    steel, embrittlement sensitivity to n irrad., depend. on uncombined N conc. 8=47405
    superheat fuel elements, seven-rod clusters, micro-parameters 8=25314
    Zircalloy, in-reactor creep rel. to dislocation climb 8=35728
    Zircaloy-2 oxidation in kinetics and mechanism, 350–500°C 8=32106
    Zircalloy-2 pressure tubes, in-reactor creep rel. to n flux, temp. and stress, obs. 8=35733
    Zircalloy-2, uniaxial in-reactor creep rel. to pre-treatment, 200–400°C 8=35729
    Zircalloy-2, ZrH precip. habit planes, obs. 8=44098
    Zircalloy-4, irrad.-enhanced strain relax., 2.4×10^{14} nv > 1 MeV 8=35732
    Zircalloy-4, ZrH precip. habit planes, obs. 8=44098
    Au, natural, effective reson. integrals, reactivity obs. 8=34015
    B compounds in gas cooled reactors, compatibility with graphite 8=29559
    Be moderator, decay const. and diffusion lengths, calcs. by two theories 8=38590
    Be, reactor material, neutron population predictions 8=38454
    BeO compacts, n-irrad., kinetics of escape of He 8=25316
    BeO, diffusional release of tritium on post-irrad. annealing 8=25317
    BeO, thermal diffusion parameters determ. 8=25308
    BeO, thermal diffusion parameters, determ. by pulsed n method 8=25307
    BeO-graphite compatability, 1500°C, Li^6 distribution 8=34100
    BeO_2, reactor conditions and irrad. damage effects rel. to appls. 8=25312
    CaO formation and diffusion of Ar^{37} under neutron bombardment 8=39969
    Co^{60}, props. of encapsulating materials 8=47421
    He loop for irradiation experiments on fuel pins 8=47417
    Hg boiling corrosion of steel boilers, inhibition with Ti and Zr 8=47426
    I and P^{31} concs. in primary water cooling circuit of WWR-S type 8=34105
    Pu^{239} fission cross-section, channel theory 8=34049
    Pu^{239}, mag. moment 8=42930
    $Pu^{239,241}$, meas. of n scatt. resonances 8=43037
    Pu^{240} subthreshold fission cross section, structure due to intermediate states 8=38528

Nuclear reactors, fission—contd

neutrons in water, energy dependent Milne problem 8=47382
neutrons, thermal, Albedo and Milne's problem 8=29550
nuclear resonance spacings, synthetic kernels calc. 8=38342
power reactor dynamics, on-line statistical identification 8=34083
power tilting, static, due to manufacturing tolerances, statistical analysis 8=38567
prompt decay const. transform. to static reactivity 8=34090
reactivity calibration, flux transients digital anal. 8=34078
reactivity-coeff. distribs, 3-dimens, appl. of synthesis techs. 8=38558
resonance reactors, intermediate structure 8=47371
rod bundles, parallel-flow, turbulent-flow mixing, model 8=34068
slab, n extrapolation distance 8=25296
SHE critical assembly, meas. of space dependent transfer function of critical assembly 8=47387
stability, homogeneous 8=34079
static reactivity from prompt decay consts. 8=34090
stresses, dynamical, in elements of fast pulse reactor core, numerical calcs. 8=29546
temperature coeff. rel. to parameters 8=43133
thermal, criticality, Monte Carlo calc. 8=38565
thermal/fast neutron ratio, obs. 8=47380
transfer function meas., higher space modes excitation 8=34070
zero-power describing function valid at all freqs. 8=29542
Pu critical expts. analyses 8=25293
U^{238}—graphite lattices, resolved neutron resonance integrals 8=29551
U^{238}-metal fuel rod lattice in H_2O and C, n intermediate reson. absorpt. 8=34086
U^{235}–H_2O, group diffusion eqns., using Green's functions 8=29549
$U^{238}O_2$ fuel rod lattice in H_2O and C, n intermediate reson. absorpt. 8=34086
Nuclear reactors, fusion
fast, review 8=47368
pulsed, plasma confinement expts. 8=25288
stellarator, twisted figure 8 and racetrack, injected plasma confinement 8=30111
Nuclear relaxation. See Nuclear magnetic resonance and relaxation.
Nuclear-solid interactions. See Mössbauer effect; Solids.
Nuclear spallation
cosmic rays, galactic, p-fragmentation rel. to Be/B dating, $6 \leq Z \leq 26$ 8=38176
heavy hypernuclei, from K$^-$ at 800 MeV/c 8=25166
n emission, delayed, precision fragments 8=38404
emulsion nuclei, 5 GeV/c $\bar{p}$, fragment emission, fireball model 8=38065
nuclides far off stability line prod., rates 8=38442
rel. to $Z \leq 5$ elements prod. in universe, p cross sections, obs. 8=32390
Z ≥ fragments prod. at > 0.5 GeV, theory 8=29382
Ag, p-induced fission-like disintegrations, and model, 25 GeV/c 8=34003
rel. to B origin in solar system 8=36990
rel. to Be origin in solar system 8=36990
Br, p-induced fission-like disintegrations, and model, 25 GeV/c 8=34003
C^{12}, p induced, cross sections obs. review 8=29436
C, by p, Li, Be and B prod., ≤ 600 MeV 8=29438
rel. to H^2 origin in solar system 8=36990
He^4, p induced, cross sections obs. review 8=29436

Nuclear spallation—contd
rel. to Li^{6,7} origin in solar system 8=36990
Li^{6,7}, Be^{9,10}, B^{10,11} prod. by p in O, 150MeV-19GeV rel. to cosmic ray reactions in space 8=38156
N, by p, Li, Be and B prod., ≤ 600 MeV 8=29438
N^{14}, p induced, cross sections obs. review 8=29436
O, by p, Li, Be and B prod., ≤ 600 MeV 8=29438
O^{16}, p induced, cross sections obs. review 8=29436
Pb, by p, light Tl and Hg isotopes prod., 3 GeV 8=38394
Pb, p induced, 3-24 GeV 8=34059
Si, by p, Na mass spectrum 20 ≤ A ≤ 25, 150 MeV 8=38542
Nuclear track emulsions
α-acetylaminoacrylic acid-N-vinylpyrrolidone copolymer-gelatin for fast-n dosimetry 8=33800
computer processing of data 8=46985
cosmic ray detector aboard Gemini 8=42705
cosmic ray stars, statistical evaluation of connecting lines 8=38113
2, 4-disulphonic acid benzaldehyde polyvinyl acetal-gelatin for fast-n dosimetry 8=33800
$\bar{p}$ elastic scatt. rel. to nuclear optical model params., 3 GeV/c 8=43000
e.m. cascade energy meas. 8=38135
e.m. cascades, lateral and ang. struct. 8=38137
fast-particle energy estimation from ionization meas. 8=47114
Fowler-Perkins parameter meas. for sensitive determ. of cosmic ray charge and energy spectra 8=42708
heavy-ion track widths meas. 8=44488
inclined track projections 8=37805
p interactions, 6.2 and 28 GeV/c with fast d, t prod. 8=38099
jet and fireball prod., by 10^{12}-10^{13} cosmic ray particles 8=29247
light-element ion paths in NIKFI-YaZ photoemulsion 8=46984
microscope, semiautomatic, for measuring track ionization parameters 8=46983
μ interactions, inelastic, 5 GeV/c 8=25213
neutron dosimetry by scanning edge effects and track length meas. 8=33804
neutron personnel dosimetry, thermal and intermediate energy, body backscatt. effects 8=33803
neutron spectra determ. from recoil tracks 8=47161
photographic films, 17 types sensitivity to ionizing rad. in near earth missions 8=28993
π interactions, 16.2 GeV/c with fast d, t prod. 8=38099
proton recoil scanning, sampling bias 8=24542
proton track meas., photographic scanning 8=46981
resolution of 7-60 keV electron images 8=37722
response to 7-60 keV electrons 8=37721
review 8=33393
with synthetic polymers, for fast n dosimetry 8=47152
Ag nuclei fragmentation by 13.8 GeV/c p, identification of emitted particles 8=34002
Br nuclei fragmentation by 13.8 GeV/c p, identification of emitted particles 8=34002
K^- interactions, prod. of He^8 hammer tracks obs. 8=25022
$\bar{p}$-N interaction, analysis of obs. 8=42641
Nucleation. See Clouds; Crystallization; Freezing.
Nucleic acids. See Macromolecules.
Nucleons and antinucleons
See also Neutrons and antineutrons; Protons and antiprotons.
Core radius investigated in d electrodisintegration 8=33842
double emission after bound pion absorption 8=38299
dynamical status from P_{11} π-N scatt. amplitude 8=42551
e. m. form factors, comp. with π-N and N-N scatt. and 1 and 2π exchange contrib. 8=24879
e. m. radius, new sum rule, rel. to Compton effect 8=37918
electromagnetic struct. 8=33739
enrgy determination of high energy nucleons by absorpt. calorimeter 8=38139
in fission, non radiative transitions probab. 8=29527
form factor, axial-vector, meas. in e + N → e + N + π + π, current algebra and PCAC 8=33738
form factors, e. m., fitting in vector-dominance model 8=42620
form factor, e.m., rel. to vector boson resonances 8=29165
form factor, exponential decrease rel. to equal-time commutator definition ambiguities 8=33652
form factor rel. to extended structure 8=29140
isovector form factor prediction 8=38050
magnetic moment, anomalous from meson field theory 8=29180
magnetic moments, bootstrap model calc. 8=42623
magnetic moment, cross-section sum rules for Compton scatt. 8=42622
mass, sum rule 8=42621
meson field oscills. model rel. to e excitation spectrum, e.m. props. 8=29180
motions in nucleus, literal truth of shell model 8=33869
N and π e. m. radius difference 8=38055
$N\bar{N}$ annihilation at rest, symmetry model tests 8=24894
$N\bar{N}$ charge exchange scatt. model, Regge-pole model 8=24888
N-$\bar{N}$ pot. from single-meson exchange, adaptation of Bryan-Scott pot. 8=24896

Nucleons and antinucleons—contd
N(eé)N* form factors model dependent 8=38056
N*, N sizes compared 8=29216
N* production by neutrinos 8=25004
N* prod. in π(K) + p → π(K) + N*, Regge pole model, N* matrix elements 8=33839
pairs, and literal truth of shell model 8=33870
πN coupling constant determ. 8=33754
p-n mass difference 8=38058
photoprod., meson field model 8=29180
polarization prediction in Regge trajectory interference theory of π^+p scatt. 8=33687
sum rule relating magnetic moment to pion photoproduction amplitude 8=42364
S-matrix calc., many-body theory 8=33977
trinucleon, short-range correls. using spatial part of S-state wave function 8=25013
interactions
air nuclei, models for e.a.s. calc. 8=38217
Compton effect at low energy 8=47129
electroexcitation of baryon resonances, relations between form factors 8=42661
e + N → e + N + π + π, current algebra and PCAC calc. of N axial-vector form factor 8=33738
γ + N → N + V°, cross sections 8=24852
γN → VN, vector-meson prod., conspiracy relations 8=38026
γNN*, form factor rel. to π° electroprod., 0.05-0.4(BeV/c)^2 8=33670
isoscalar pair-force problem, isospin invariance 8=42777
KN, superconvergence relations 8=29115
$\overline{K}$N, superconvergence relations 8=29115
K^-N → Λπ, 1900-2, 215 MeV Y_1^*(1910), $J^P = 5/2^+$ 8=33841
K^- + N → Y + M, amplitude determ. in quark model 8=33703
ΛNN in p-shell hypernuclei, 3-body repulsion rel. to binding energies 8=29350
mesons, pseudoscalar, photoprod., Regge pole model 8=29127
meson-nucleon, very-high-energy polarization theory 8=37963
meson + N → γB for determ. of e. m. couplings of MN resonances 8=37916
$\bar{N}$N, theoretical models, reln. to NN interact. 8=24895
ν + N → B + (π) + μ, polarization correl. between B and μ calc. 8=29091
nuclear emulsion, p-N, π-N, at high energy, d, t prod. 8=38099
with nuclei, 100-1000 GeV, intranuclear cascade 8=42530
photoproduction of ρ, η and ω mesons, and double π 8=33667
πN, 4 GeV/c, in propane bubble chamber 8=47107
π-N inelastic, central and peripheral, 17.2 GeV obs. 8=24783
πN, superconvergence relations 8=29115
π-N transverse momentum at 17.2 GeV 8=24784
π-N vector meson prod., Lorentz pole structure 8=29171
πN → η N* (1236), O(3, 1) symmetry analysis 8=24785
πN → NW, W prod. cross-section, one pion model 8=38022
πN → ππN for calc. of S-wave ππ phase shift 8=29144
π + N → ρ + N*, ang. decay correls. at 8 GeV 8=24781
π + N → ρ + N* → N + 3π, Regge-pole model 8=24780
πN → $\omega_{3/2}$*, (1236), Lorentz pole analysis 8=37974
π^-N, 17.2 GeV/c, heavy nuclei surface neutron richness K, π, prod. 8=42535
π photoproduction cross-sections, perturbation theory 8=42513
pN, Ep = 20 GeV, secondary asymmetric separation obs. 8=29186
p-N in p reactions in C, 24 GeV/c, energy of prod. n obs. 8=29439
$\bar{p}$-N interactions in photo-emulsions, obs. 8=42641
potential, effect of nonstatic character in singlet-even states 8=25043
Y-N, final state, low energy obs. 8=33838
interactions, nucleon—nucleon
above 3 GeV/c range, main theoretical ideas compatible with expt. data 8=24869
binding energy of 3N system 8=38319
Born phase shifts and relativistic terms from three treatments of vector meson field 8=24872
bremsstrahlung prod. rel. to off-energy-shell props. of a potential 8=24871
bremsstrahlung, soft-photon theory 8=42625
charge depend. study and violation of charge symmetry 8=24864
forces at small distances, combining of meson theory and phenomenological descriptions 8=24865
γ N → VN, kinematical singularities and zeros 8=42448
as test of group theory schemes, conservation laws and analyticity struct. of S matrix 8=24866
I = 1, low energy anal. rel. to e.m. effects and phase shifts 8=24867
meson exchange adiabatic local pots. model, consistent with theory and expt. 8=24868
nuclear matter and non-static character 8=42774
in nuclear structure calc, for binding energy and density 8=25063
$N\bar{N}$ annihilation cross sections, isospin dependence 8=24893

Nucleons and antinucleons—contd
  interactions, nucleon-nucleon—contd
    $N\bar{N}$, superconvergence relations 8=29115
    $N\bar{N}$, isospin-one mesons on Regge trajectories 8=24677
    N-$\bar{N}$ pot. from single-meson exchange, adaptation of Bryan-Scott pot. 8=24896
    NN $\rightarrow$ NNW, W prod. cross-section, one pion model 8=38022
    NN $\rightarrow \pi$d, phase-shift analysis 8=38053
    $\bar{N}N \rightarrow \pi\rho$, saturation of superconvergence relations, sum rules and form factors 8=33740
    $\bar{N}N \rightarrow \pi\omega$, saturation of superconvergence relations, sum rules and form factors 8=33740
    $N\bar{N} \rightarrow Y\bar{Y}$, high energy, $O_{3.1}$ symmetry 8=38057
    $N + \bar{N}^* \rightarrow \pi + \pi$, superconvergence sum rules 8=29183
    particle-hole dipole transitions, exchange Majorana pot. 8=24877
    phase shift anal. using single-particle-exchange Feynman diagrams 8=24874
    potential violating parity 8=24876
    one-boson exchange pseudo scalar-vector-scalar meson theory 8=24751
    relation with $\bar{N}N$ interact. theoretical models 8=24895
    $^1S_0$ differences, non-e.m., rel. to charge independence 8=42624
    Schrödinger eqn., soln. with vel.-dependent pot. 8=24461
    separable potential 8=42776
    smooth interactions and meson theory 8=33741
    state of knowledge 1967, overview and conference summary 8=24870
    superconvergence relations 8=29115
    from vector and scalar meson fields having direct and deriv.-type couplings to nucleons 8=29167
    velocity-dependent potential 8=25097
    weak. pot., effect of second class currents on form 8=24875
    He^6, excited bound states, deformed orbits calc. 8=25093
  scattering
    antilepton scatt., polarization dependence calc. 8=42462
    charge exchange scatt., partial wave analysis of ρ Regge amplitude 8=24779
    Compton, finite energy sum rules for Pomeranchuk trajectories 8=24694
    Compton, low-energy theorems 8=33606
    Compton scatt., rel. to calc. of $\pi^\circ \rightarrow 2\gamma, \eta^\circ \rightarrow 2\gamma$ decay rates 8=33663
    coupled eqns., random phase approximation 8=42997
    electron elastic scatt., form factors and vertex amplitudes 8=47086
    e, meson field model for spectrum 8=29180
    Glauber theory tested in π-p, π-d, 0.46-2.67 GeV/c 8=29139
    Hartree-Fock generalized approximation for nucleon one-level nucleus scatt. 8=29418
    impulse approx., 150-180 MeV off light nuclei, polarization-asymm. difference 8=25215
    inelastic, calc. on generalized optical model 8=47312
    kinematic singularities and MacDowell symm. rel. to boson-fermion reactions 8=29047
    knockout exchange contrib. 8=42999
    KN dispersion sum rules, agreement between Regge behaviour and low energy parameters 8=37988
    K-N, finite energy sum rules and crossover problem 8=24832
    KN, finite-energy sum rules, Regge-exchange amplitudes rel. to polarization and K^+n charge exchange 8=33710
    KN finite-energy sum rules rel. to A_2 trajectory no-compensation mechanism 8=42612
    KN low energy with complex singular pot. 8=24829
    $\bar{K}$N low energy with complex singular pot. 8=24829

structure, research at CERN 8=29261
structure, Schrödinger eqn. validity and high energy expts. appls. 8=29268
surface neutron richness deduced from $\pi \cdot N$ at 17.2 GeV/c 8=42535
velocity-dependent potentials, scatt. props. rel. to IS state 8=24651
velocity-dependent potl., Hamiltonian operator 8=42780
Ag, surface n excess, K^- capture obs. 8=34022-3
Bi^{209}, muonic, hyperfine structure rel. to nuclear magnetism distrib. 8=33940
Br, surface n excess, K^- capture obs. 8=34022-3
Ca^{40} charge distrib., e scatt. obs., 750 MeV 8=29304
$Ca^{40,48}$, charge density distrib., shell model 8=25120
Cd^{114}, 9.0 MeV γ ang. distrib. asymmetry, following polarized n capture 8=33921
$Er^{164,166,167,168,170}$, neutron resonance obs. 8=25153
Eu^{155}, polarization in metallic Sm, from anisotropy of γ-quanta accompanying decay 8=38388
H^3 form factors and interactions 8=42825
He, structure, p-He scatt. angular distrib., 1 GeV 8=33845
In^{115}, possibility of α-clustering on surface 8=25249
Li^6, residual two-body N-N interact. rel. to wave function and harmonic oscillator 8=25094
Li^8 evaporation in 10.1 GeV/c K^- + Ag and K^- + Br nuclei 8=29488
O^{16}, ground state calc. using Hartree-Fock and realistic N-N interacts. 8=25063
Pb^{208}, radius of neutron distrib. calc. method 8=33937
Sn^{119m} Mössbauer source γ quanta correl. props. 8=37923
U^{235}, $K_o + 2$ and $K_o - 2\gamma$ vibrational bands 8=43105
electric moment
See also Molecules/nuclear coupling.
ethylsulphate, e.p.r. obs. for nuclear quadrupole moments of $Tb^{157,158,160}$ 8=42907
first 2^+ states of even nuclei, quadrupole moment calc. 8=25090
hexadecapole interaction, comment on magnitude 8=47224
hexadecapole moment effects in multiple Coulomb excitation 8=42877
hexadecapole-phonon interaction 8=47225
quadrupole, deformed even-even and odd nuclei, $148 \leqslant A \leqslant 192$ 8=29288
quadrupole effective charge, Pauli principle effect 8=33892
quadrupole for 1p shell nuclei, Hartree-Fock and Hartree-Fock-Bogolyubov calcs. 8=33868
quadrupole in pairing-plus-quadrupole model 8=25055
quadrupole, meas. by reorientation effect, correction 8=25091
quadrupole, rotator model, rotation particle coupling effects in light nuclei 8=25050
quadrupole transition rates, seniority four → - two states, comparison with phonon states 8=42822
Ca^{44}, quadrupole, from decay of second 2^+ state 8=38368
$Cd^{110, 112, 114, 116}$ quadrupole of spherical even-even nuclei 8=38376
Co isotopes, treated as p hole coupled to quadrupole vibr. of Ni isotopes 8=25129
Co^{59} low levels, quadrupole moment and h. f. s. 8=38664
Cs^{134} quadrupole moment obs. 8=25145
Dy^{161}, 74.5 keV level, meas. using Mossbauer effect 8=25150
$Eu^{151,153}$, quadrupole Eu II spectrum obs. 8=47495
Gd^{155}, 86.5 and 105.3-KeV states, obs. 8=42906
$Gd^{155,157}$, ratio of quadrupole moments 8=33930

Nucleus—contd
electric moment—contd
He^3, meas. with supercond. mag. shield 8=29000
K^{40}, quadrupole moment from resonance radiation obs. 8=38365
Ni^{61} low levels, quadrupole moment and h. f. s. 8=38677
Np^{37}, quadrupole moments ratio for isomer and ground states 8=33945
O^{17}, quadrupole, for det. of effective change in O^{18} 8=38359
Os^{189} quadrupole moment obs. 8=25155
Pb^{208}, 3-state static quadrupole moment calc. 8=47265
$Pd^{104, 106, 108, 110}$ quadrupole of spherical even-even nuclei 8=38376
$Pt^{194,196,198}$ first 2^+ states static quadrupole moments 8=38393
$Rb^{85,87}$ quadrupole, from optical double resonance obs. 8=34151
$Re^{185,187}$, ratio of quadrupole moments 8=47263
$Ru^{98, 100, 102}$ quadrupole of spherical even-even nuclei 8=38376
Sc^4 γ-γ cascade rel. to quadrupole interaction in $BaTiO_3$ 8=42868
$Tb^{157,158,160}$, quadrupole, from e.p.r. expt. on yttrium ethylsulphate 8=42907
$Te^{122, 124, 126, 128, 130}$ quadrupole of spherical even-even nuclei 8=38376
$W^{182,184,186}$, quadrupole, first excited states obs. 8=42914
energy levels

    - Ca^{41}, 3.209, 3.623 and 3.740 MeV, (d, pγ) angular correl. obs. 8=29303
    - Ca^{41,43}, from Ca^{42,44}(p, d) ground state wave function Ca^{42,44} obs. 26.5 MeV 8=38475
    - Ca^{42}, energy spectrum and transition rates explained 8=42865
    - Ca^{42} from K^{41} (He^{3}, d) reaction, particle hole states up to 5.79 MeV obs. 8=47243
    - Ca$^{42-50}$, (t, p) excited, Ca^{48} O^{+} states rel. to shell model, obs. 8=33938
    - Ca^{43}, forbidden M1 transitions 8=42864
    - Ca^{43}, γ spectra obs. 8=43027
    - Ca^{43,45} spectroscopic factor at 10 MeV calc. 8=33871
    - Ca^{44}, excitation energies and spin assignments 8=47317
    - Ca^{44}, second 2^{+} state, decay obs. 8=38368
    - Ca^{45}, from Ca^{44}(n, γ) thermal energies 8=38487
    - Ca^{45} lifetimes, branching ratios multipole mixing ratio obs. in Ca^{44}(d, pγ)Ca^{45} 8=38366
    - Ca^{48}, from Ca^{48}(p, p$'$), e. m. de-excitation of 4.51 MeV level 8=47242
    - Ca^{50} J$^{\pi}$ = 1^{+} assignment to 1848 KeV level 8=42943
    - Cd^{107} analogue resonances from (p, p) and (p. p$'$) 8=33922
    - Cd^{107} $\rightarrow$ Cd^{106} 2^{+} state analogue resonances from (p, p) and (p, p$'$) 8=33922
    - Cd^{110}, from Ag^{110m} decay 8=47288
    - Cd^{114}, multiple Coulomb excitation, electric hexadecapole moment 8=42877
    - Ce^{138}, decay of 2.2 hr. Pr^{138}, reinvestigation 8=29368
    - Ce^{140} from La^{140} decay, γ energy and intensity obs. 8=33963
    - Ce^{140}, 3^{+} $\rightarrow$ 4^{+} $\rightarrow$ 2^{+} cascade, intermediate state half-life, obs. 8=29329
    - Ce^{141}, p polarization in Ce^{140}(p, p) 8=42901
    - Ce^{142} from Pr^{142} decay obs. 8=38432
    - Cf^{251} high-lying band obs. 8=42974

- **Nucleus**—contd

    - Fe^{58}, shell model calc. 8=25128
    - Fr^{219,220}, Ac^{223,224} α-decay spectra obs. 8=33943
    - Fr^{221}, from Ac^{225} α-disint., mag. spectrography 8=25163
    - Ga^{69} resonance fluorescence, E = 1107, 872, 574 keV 8=25132
    - Ga^{70,72}, low-lying, slow n capture γ-spectra obs. 8=29316
    - Ga^{72} from Zn^{72} decay obs. 8=25177
    - Gd, n induced levels spacing, obs. 8=29347
    - Gd^{152,154} E2 transition conversion electron particle parameters 8=47257
    - Gd^{153} obs. from Tb^{153} electron capture decay 8=42903

Gd^{154}, energy shift of γ-rays in presence of μ in 1s state 8=42902
Gd^{154}, from decay of E^{154}, EO/E2 transitions and electric monopole strengths calc. 8=42904
Gd^{155}, 86.5 and 105.3-KeV states, spins and moments 8=42906
Gd^{155}, intensities of γ-transitions to ground and first excited state in 23 resonances of Gd^{155}(n, γ) 8=38389
Gd^{155,157}, non-rot. states elect. hyperfine interaction determ. by Mossbauer technique 8=33930
Gd^{156} K = 2 state rel. to asymmetric-rotor model 8=47226
Gd^{159}, 26 ns isomeric state at 68 keV, decay obs. 8=29335
Gd^{156}, 289 and 1513 keV, half-lives obs. 8=25148
Gd^{160}, 75 keV level, pulsed-beam lifetime meas. 8=33927
Ge^{71}, 175 keV state, g-factor 8=47248
Ge^{74}, from As^{74} decay 8=42947
H^{4}, widths of two levels evidence for third 8=38351
He^{3}, excited level aligning and orientating method 8=42828
He^{4}, ground state, single-particle model calc. 8=29228
He^{4} states search using H^{2}(d, d) and H^{2}(d, p)H^{3} at 3-11 MeV 8=38353
He^{4} T = 1 states, single-pole dominance in transition mechanism, from Li^{6}(π^+, pp) obs. 8=42831
He^{4}, O^{+} state obs. in 150-400 MeV e scatt. 8=24724
He^{6}, excited bound states, deformed orbits calc. 8=25093
He^{6}, 1.71 MeV (2^{+}) state, three body decay 8=25021
Hf^{177}, 250 KeV level rot. and g factor 8=38390
Hf^{177,179,181}, from (d, p) and d, t), spectroscopy 8=42911
Hf^{178} 2^{+} β-vibrational state E2 + M1 decay 8=33934
Hf^{178}, long-lived isomeric state at ~2.5 MeV 8=42966
Hf^{179}, decay of isomeric state 8=47261
Hf^{181} analogue states, from p + Hf^{180} scatt. obs. 8=33933
Hg$^{192, 194, 196, 198}$, γ-spectra obs. 8=38394
Hg^{199}, L$_{\pi}$ electron-γ correl. giving mixing ratio for 50 keV transition 8=25157
Hg^{200}, from Au^{200} β decay, obs. 8=42969
Hg^{200}, M1 and E2 in 2$_1^+$, mixing ratio 8=42921
Ho^{165}, orientation effect on total n cross section 2-135 MeV 8=25151
I isotopes, lifetimes and g meas. by Xe magnetized ferromag. foil 8=38401
I$^{127, 129, 131}$ from (He^{3}, d), orbital angular-momentum transfer and spectroscopic factors, 25 MeV 8=42893
I^{128}, odd-odd nuclei excited by radiative capture of neutrons 8=42898
I^{133} from decay of Te isomers 8=25186
I^{133}, from Te^{133g,m} β decay, obs. 8=42897
In density, superconductivity effects in 8=25074
In^{111} from decay of 35 min Sn^{111} 8=38423
In^{113}, 393 keV transition, K-conversion coeff. 8=33923
In^{115}, de-excitation γ-spectra rel. to vibr. states, 900-1600 keV 8=29323
In^{117}, from Cd^{117} → In^{117} 8=42889
In^{117}, 748, 659, 587 keV, lifetime obs. 8=25141
Ir^{191}, 129 keV level, magnetic moment obtained from γ-scatt. 8=47303
Ir$^{192\mathrm{M}}{}_{1}$, spectra, conversion electron, γ, X for isomeric transitions 8=33966
Ir^{193} absolute transition probs. and lifetime meas. obs. 8=42916
Ir^{193}, core excitation 8=42918
Ir^{193}, E2-M1 mixing ratio of 73 KeV level, no evidence for T-nonconservation 8=25156
Ir^{193} spin and conversion coeff. 8=38439
Ir^{194} obs. 8=42919
K^{37}, from reactions on Ca and Ar, widths and positions 8=42858
K^{39*} collective core excitation, from K^{39}(d, d$'$) obs. 8=33908
K^{40}, from Ar^{40}(He^{3}, t), 2-particle 2-hole states 8=42860
K^{40} Mossbauer meas. 8=42859
K^{41}, properties of several states near 8.9 MeV 8=47241
K^{47} from Ca^{48}(d, He^{3}), 34.4 MeV 8=25268
Kr^{81}, from Rb^{81} decay obs. 8=25180
La^{140} energy spectrum description in terms of unified model 8=38385
Li^{6} J = B^{+}, T = O from d—He^{4} elastic scatt., Ed = 0.2-10.3 MeV 8=43052
Li^{6}, T = o, generation of lowest as collective band 8=33894
Li^{6,7}, (Li^{7}, t) and (Li^{6}, α)excited, rel. to α- and d-cluster transfer. 26 MeV 8=38524
Li^{6,7}, N pair distrib. in ground state from π absorpt. 8=25095
Li^{7}, resonances obs. in He^{4}-H^{3} 8=24937
Lu^{170}, intrinsic and collective, Hf^{170} e capture decay obs. 8=29340
Lu^{170,172} E1 transitions, Nilsson model 8=42913
Lu^{175}, dipole trans. effects in internal conversion 8=33932
Mg^{23}, from Mg^{24}(p, d) in 2s-1d shell, obs. 8=43023
Mg^{23} J$^{\pi}$ = $\frac{1}{2}^{+}$ states branching ratio of e.m. decay, Ne^{22}(He^{3}, dγ) obs. 8=42847
Mg^{24}, axial and triaxial deformed Hartree-Fock solns. 8=25111
Mg^{24} dipole transitions, isospin selection rule 8=29300
Mg^{24}, excited by 100-260 MeV e, obs. 8=47311

Nucleus—contd
energy levels—contd
Mg^{24}, from C^{12}(O^{16}, $\alpha\gamma$), spin and parity obs. 8=38362
Mg^{24}, from (p, 2p) at 156 MeV 8=33993
Mg^{24} giant dipole resonance, from Na^{23}(p, γ), 4-12.4 MeV 8=43022
Mg^{24,26}, Doppler-shift lifetime meas. 8=25110
Mg^{25} excited states, branching and mixing ratios 8=29301
Mg^{26} branching ratios of transitions obs. after Mg^{25}(d, pγ)Mg^{26}, Na^{23}(α, p)Mg^{26} 8=25112
Mg^{26}, from Al^{26} β-decay, T = 2 component in ground state 8=47282
Mg^{26}, lifetimes from p scatt., rot. bands mixed 8=33902
Mn^{53} from Fe^{54}(d, He^{3}), 34.4 MeV 8=25268
Mn^{55}, total n parametric fit, 0.01 ev-50 keV 8=38477
Mo^{92}, n hole states and configuration mixing, 18 MeV(He^{3}, α) obs. 8=29319
Mo^{92}, p levels, 18 MeV (He^{3}, d) obs. 8=33918
Mo^{93} excited states, obs. 8=25139
Mo^{93}, n decay of isobaric analogue resonances 8=29320
Mo^{94} levels, decay from Tc^{94} isomers 8=38374
Mo^{96} from Nb^{96} decay 8=25183
N^{13}, from C^{12}(p, γ), lowest T=$\frac{3}{2}$ state 8=29440
N^{14}, axially deformed single-nucleon Hartree-Fock orbitals 8=42838
N^{14}, deduced from C^{12}(Li^{6}, α), 20 MeV 8=25277
N^{14} first excited state energy rel. to O^{14} Fermi decay 8=33958
N^{14}, from C^{13}(He^{3}, d), first five states 8=43085
N^{14} from (p, α), spin obs. 8=43020
N^{14}, from O^{16}(d, α), isospin allowed 8=29504
N^{14}, spectroscopic and configuration assignments 8=47230
N^{15}, core polarization effects 8=29294
N^{15} doublet at 9.16 MeV, γ decay branching ratios obs. 8=33898
N^{15} from N^{14} (n, γ), prompt γ-ray spectra obs. 9.15 MeV doublet 8=42839
Na^{21}, first excited state, lifetime obs. 8=25107
Na^{23}, from (p, 2p) at 156 MeV 8=33993
Na^{23} J$^{\pi}$ = $\frac{1}{2}^{+}$ states branching ratio of e.m. decay, Ne^{22}(He^{3}, dγ) obs. 8=42847
Na^{24} at 1.5 MeV, from Mg^{26}(d, α)Na^{24} 8=38361
Na^{24}, 0.563 MeV level, γ polarization obs. 8=38485
Nb^{91} analog states elastic proton decay widths, shell-model calc. 8=47250
Nb^{92} analog state from Nb^{93}(p, d) 8=33919
Nb^{94}, levels and configurations, obs. 8=25138
Nc^{20} from Li^{6}(O^{16}, d), ang. distrib. and α widths obs. 8=34048
Nd^{142} from Pr^{142} decay, 508 KeV γ populating level at 2084 KeV obs. 8=38433
Nd^{142} from Pr^{142} decay obs. 8=38432
Nd^{144}, from Nd^{143}(n, γ α), α transition obs. 8=34014
Nd^{144} isotopes, internal pair formation in electric dipole transitions, 1.49, 2.18 MeV 8=47256
Nd^{150}, energy shift of γ-rays in presence of μ in 1s state 8=42902
Nd^{150}, 131 keV level, pulsed-beam lifetime meas. 8=33927
Ne^{18}, from O^{16}(He^{3}, n), and transitions 8=43086
Ne^{20} ground state, weak-coupling width of 1p holes 8=42846
Ne^{20} scheme from F^{18,19} level energies obs. 8=38335
Ne^{21}, first excited state, lifetime obs. 8=25107
Ne^{21}, from Ne^{20}(d, p), obs. 8=29506
Ne^{21,23}, decay schemes, new parity states from thermal neutron capture 8=47329
Ne^{22}, from F^{19}(α, pγ), ang. correl. and lifetime obs. 8=29298
Ne^{22}, from O^{18}(α, γ), e.m. de-excitation of 11.89 and 12.28 MeV levels 8=47240
Ne^{22}, from O^{18}(α, nγ), α, γ_0) and (α, α), 11.7-13.0 MeV 8=42845
Ne^{22}, lifetime of 5.14 MeV state 8=25108
Ne^{28}, configuration mixing model 8=33878
Ni^{56}, from Ni^{58}(p, t), excitation to 8.5 MeV, obs. 8=47247
Ni^{58}, mean lifetimes of 16 2^{+} states obs. 8=25130
Ni^{58}, 4^{+}, mixing coeffs. of one and two-phonon states 8=38444
Ni^{60}, 13 MeV p scatt. obs. 8=25131
Ni^{61}, and lifetimes, Cu^{61} decay obs. 8=29315
Ni^{62,64} from Cu^{63,65}(d, He^{3}), E$_{d}$=34.2 MeV 8=34035
Ni, Cu, Cr^{52}, Fe^{54}, Ti^{50} comparison from p-scatt. 8=29430
Ni isotopes spectra, quasi-particle configuration mixing calc. 8=33913
Ni, 58 $\leqslant$ A $\leqslant$ 64 8=29344
Ni, HF technique applied to calc. energy spacings and e.m. props 8=25085
Ni rel. to Fe^{54}, from polarized p-scatt. 8=29431
Np^{237}, excited levels by α-decay of Am^{214} 8=33946
Np^{237}, n induced resons., obs. 8=29348
O^{+}-O^{+} vibrational excitation, transition matrix elements from muonic X-rays 8=38344
O^{15}, core polarization effects 8=29294
O^{15}, from N^{14}(τ, d) and O^{16}(τ, α), ang. distrib. E$_{\tau}$ = MeV 8=33900
O^{16}, ave. lifetimes 8=47233
O^{16}, elec. levels and transition rates 8=29293
O^{16}, even parity rot. bands, and elec. quadrupole transition rates 8=42841

    four-body correlation, Bethe-Faddeev eqn. solved with Day's approx. 8=47201
    G(2) group, Clebsch-Gordan series 8=29264
    $\langle\gamma^2\rangle$ and spectroscopic factors from DWBA 8=33874
    Hartree-Bogoliubov theory with projection method 8=42784
    Hartree-Fock calc. on shell structure of heavy spherical nuclei 8=29274
    Hartree-Fock calc. using effective N-N potentials 8=33865
    Hartree-Fock problem with subsidiary conditions and random phase approx. 8=33859
    Hartree-Fock standard ang. momentum projection calc. 8=33897
    Hartree-Fock state stability condition against four-body correlations 8=38341
    "isonuclei" and double-π charge exchange mechanism 8=33862
    Kerman's band mixing, rel. to isomer shift in Eu^{153} 8=25147
    level density, superconductivity effects in 8=25074
    light nuclei, four-body correlations 8=42783
    magnetic dipole transitions, l-forbidden 8=42821
    masses, shell-model semi-empirical equation 8=33875
    matter calc., hard core in 2-nucleon potential 8=25066
    matter, ground-state props. Λ_{11} approximation 8=25067
    matter, ground state props, method of Green's functions 8=47210
    matter, inelastic e scatt. response function calc. 8=29407
    matter, re-arrangement energy, e scatt. and (p, 2p) obs. calc. 8=29273
    matter, tensor forces effect on nucleon scatt. 8=42793
    matter, 2-particle correls. without using thermodynamic Green's functions 8=25062
    matter, use of 1-boson-exchange potl. model 8=42795
    motion, ideal collective coordinate concept 8=42769
    non-local pots., asymptotic behaviour of phase shifts 8=42782
    non-local potentials, bound states and Levinson's theorem 8=38296
    N-body ground state, upper bound, conditions on two-body potentials 8=42794

Nucleus—contd
  theory—contd
    nucleon–nucleon interaction's non-static character and nuclear matter 8=42774
    N-N potential, and boson exchange theory 8=38300
    nucleon-nucleon separable potential 8=42776
    operators in numerable Hilbert spaces 8=47196
    pair oscillator interaction form factors, elastic for antisymm. states 8=38292
    pairing Hamiltonian, single-intermediate-state approx. 8=42789
    PT invariance, tests for violation 8=38407
    quasiparticle approx., fluctuation-disssipation theorem 8=24596
    quasi-particle coupling to pair vibrations 8=33885
    quasiparticle gas model for < 40 MeV processes 8=29271
    quasiparticle random-phase-approx, residual n–p interaction 8=42791
    reaction matrix elements for closed-shell nuclei using realistic forces 8=33866
    reaction matrix, single-particle potentials 8=42786
    repulsive core effect on N scatt. in nuclear matter 8=38309
    repulsive forces, appl. of Fermi gas pair collision theory 8=32852
    Scotti-Wong pot. modified, rel. to N-N scatt., deuteron problem and nuclear matter calcs. 8=24881
    self-consistent core-particle coupling models, and its relation to phenomenological models 8=47205
    shell model, 1f, 2p, parentage coeffs. 8=33883
    single-particle orbitals parity-mixing and coeffs. of fractional parentage 8=29263
    space theory in free particles observables 8=29022
    spectroscopy and structure, conference, Khar'kov 1967 8=38294
    statistical, energy-density formalism appl. 8=42778
    structure, calcs. using realistic two-body interacts. fitting N-N scatt. data 8=25063
    sum rule, single particle 8=33858
    superfluid nuclear matter, statistical mechanics 8=23886
    symmetry energy of nuclear matter 8=25065
    Tam-Dancoff and second Tamm-Dancoff theories for even parity states of Sn compared 8=38380
    Thomas–Fermi calc. for semi-infinite nuclei, surface properties 8=42771
    three-body potential, pionic, comparable to two-body potential 8=42796
    three nucleon system, tensor forces and Faddeev equations 8=42775
    topology, mappings of type s, and strongly nuclear spaces 8=47208
    triton variational calc. for ground state energy with trial functions 8=47227
    two-N phase-shift-set discrimination, binary optical pot. 8=25047
    two-nucleon interaction as test of group theory schemes 8=24866
    unified reaction theory, asymptotic channel states and matrix equations 8=42788
    variational principles for self-consistent theory of collective motion 8=47206
    wave function, supermultiplet, fractional parentage decomposition 8=38293
    Wigner supermultiplet approximation, allowed β transitions 8=25175
    Ar^{36}, Hartree-Fock standard ang. momentum projection calc. 8=33897
    C^{12}, Hartree-Fock standard ang. momentum projection calc. 8=33897
    C^{12} short-range dynamical correls. from elastic e scatt. 8=38355
    Ca, even isotopes, self-consistent pairing calc. 8=42862
    Eu^{151}, ^{153}, charge distrib. rel. to muonic x-rays obs. 8=34194
    He binding energy, variation calc. using two-body central velocity-dependent potential 8=42824
    Li^{7}, Coulomb form factors 8=29289
    Ne^{20}, Hartree-Fock standard ang. momentum projection calc. 8=33897
    Ne^{20}, projected Hartree-Fock states, two-body pot. 8=29299
    O^{8} broken symmetry and mass relations 8=38317
    O^{16}, continuum struct., eigenchannel reaction theory 8=42842
    O^{18}, eqn. of motion of 2 neutrons 8=25101
    Pb^{206}, shell-model 8=25159
    Si^{28}, projected Hartree-Fock states, two-body pot. 8=29299
    Ti^{44}, Hartree-Fock standard ang. momentum projection calc. 8=33897
    U^{235} fission transition, structure 8=43112

Oceanography
      See also Liquid waves; Seawater.
    acoustic dit., linear array, sector coverage 8=23957
    acoustic propag., horizontal, fluctuation over short depth increments 8=36698
    acoustic ray transmission, pseudorandom bottom structure obs. 8=41329

Oceanography—contd
- acoustic wave propag. at ocean bottom, 2-700 miles, regular var. obs. 8=27863
- acoustic waves in SOFAR layer rel. to Love wave propag. along interface 8=32895
- Aleutian Island arc, mag. anomaly patterns and floor spreading 8=50218
- Arctic basin, ice-field drifts and currents 8=36684
- Atlantic, S., mag. anomalies and floor spreading 8=36897
- Barbados coral, Pb^{231} growth radioactive dating 8=36683
- bottom reverberation from deep explosions 8=50099
- breaking of waves, model integro-differential eqn. 8=30373
- conference, 1967 8=24279
- continental shelf wave propag. 8=32192
- convection, haline, induced by sea water freezing 8=41332
- current mapping by meas. of surface temp. discontinuities from Nimbus II 8=41335
- current rel. to tide, deep obs. off N. Californian coast 8=36690
- deep sea bed acoustic backscatt. at small grazing angles 8=50098
- deep sea bed acoustic transmission rel. to bulk and textural props. sediments 8=36691
- deep sea cores, paleomag. stratigraphy and micropaleontology 8=50102
- deep sea cores, sedimentation rate determ. by γ-ray spectrometry 8=27865
- divers speech during decompression causes of distortion 8=23972
- drogue diffusion, large scale 8=45434
- East Pacific rise, heat flow data, stat. anal. of scatter 8=50112
- explosions at ocean surface 8=28372
- explosions due to pressurized spheres at ocean surface 8=27867
- flow of inhomogeneous fluid at equator, nonlinear model 8=32195
- Great Lakes, wind-driven summer circulation 8=32188
- high-pressure pH sensor 8=45436
- hydrophone arrays, effect of phase errors 8=27862
- hydrophones, simple method of calibrating 8=36695
- Indian Ocean, mag. anomalies and floor spreading 8=36898
- interactions between ocean and atmosphere, model 8=36693
- Kwajelain and Entiwetok, Marshall Islands, sea level regression time series 8=36692
- Laplace tidal eqn. asymptotics, for neg. eigenvalues of equiv. depth 8=32193
- light fields and transfer in sea, survey of mathematical models 8=41333
- magnetic field of underwater mountains 8=45559
- microwave emission, effect of temp., angle of obs., salinity and thin ice 8=50113
- moon-earth system early history from waves in sandstones and calcarenites 8=50115
- navigation using two-component electromag. ship's log 8=27861
- noise, deep-sea, ambient, surface motion effect 8=36697
- noise, impulsive, resembling whale sounds, analysis 8=50100
- Norwegian sea, mag. obs. 8=50208
- oceanic circulation, nonlinear problems 8=36694
- oceanic circulation, wind-driven, overlooked aspect 8=41331
- oceanic currents, theory, exact soln. 8=27869
- oceans as source of ice nuclei 8=41337
- optical props of ocean, new method for study 8=32244
- Pacific beds, magnetic anomalies and floor spreading 8=36896
- planetary equatorial waves 8=50103
- radiance of sea and sky in i.r. window 800-1200 cm^{-1} 8=36689
- radiation field at great depth, calc. from Mie and transfer theory 8=41336
- radiative energy transfer, conference 8=23909
- radiative transfer in sea, expt. methods to meas. props. specified by theory 8=41334
- Ridge, Mid-Atlantic, comparison of earthquakes along median rift and offset fracture zones 8=50050
- ridges, mid-ocean, and geotherm distrib. during mantle convection 8=32172
- ridges, rel. to eustatic changes in sea level 8=41326
- sea-bed conductivity determ. from mag. field due to line source 8=27853
- sea bed quark detection 8=24741
- sea level, surface atmospheric press. and wind components, relation 8=36692
- sediment, deep-sea, velocity, obs. made while reflection profiling 8=32191
- sedimentation patterns of submarine canyons, modern deposits compared with Tertiary age 8=27872
- sedimentation rates of deep sea cores, comparison of paleomag. and ionium methods of determ. 8=50110
- sediments, Bering Sea, elect. resistivity 8=50108
- sediments, deep-sea, velocity from sonobuoy data 8=32190
- seismograph, ocean-bottom 8=50026
- shallow-water c.w. acoustic phase characts. 8=50111
- shipboard gravity meters, La Coste-Romberg performance (1963-1964) 8=36655

Oceanography—contd
- Sofar speed and axis depth contours, Pacific 8=50105
- sound attenuation in marine sediments 8=25961-2
- sound scatt. by ground inhomogeneities of ocean bed 8=50106
- storm generation of waves in earth's crust and atmosphere, meas. limitations 8=36666
- stratified ocean, inertial boundary currents, existence and struct. 8=45435
- submerged structure, rising, wall press. vars. in boundary layer 8=45432
- surface layer of ocean, daily temp. variations 8=27868
- surge and bore, undular, run-up rel. to slope and bottom roughness 8=50116
- thermocline strength fluctuations in coastal waters 8=32194
- tidal motion induced mag. and elec. fields at sea floor and coastal sites 8=45433
- tidal prediction, numerical methods and Thames model 8=27866
- tides in cruciform oceanic basins 8=36699
- tsunamis, gravity-wave system, nature and recent obs. 8=50104
- underwater acoustic pressure calc. 8=50101
- underwater convergence of acoustic waves obs. 8=27864
- underwater sound research before 1939 8=36696
- velocity and press. distributions, spectra relationship 8=27871
- waves, air-sea, excited by volcano Krakatoa, pulse propagation 8=27829
- waves on beach 8=50109
- waves, plane, diffraction by a circular island in rotating basin of const. depth 8=27870
- waves, surface gravity, linear and nonlinear motion (model) 8=39279
- Western Equatorial Pacific, two thermal fronts, obs. 8=41328
- wind-generated wave suppression by surface film, theory 8=48037
- $BaSO_4$ solubility in sea water 8=34783
- I, abundance in deep sea sediments 8=36688

Octet theory. See Elementary particles; Field theory, quantum.

Omegatrons. See Leak detection; Mass spectrometers; Vacuum technique.

Onsager relations. See Statistical mechanics; Thermodynamics.

Optical activity. See Optical rotation.

Optical constants
- See also under individual headings, e.g. Absorption/light; Reflectivity.
- anisotropic mats, from e.-energy loss expts. 8=49672
- film on substrate, reflection-transmission method for determ. 8=36289
- films in vacuo, meas. 8=36288
- glasses, indices of internal strains, glasses in optical glass catalogue 8=41096
- isotropic and uniaxial crystals, u.v., determ. using polarized light refl. power obs. 8=41018
- oxide films, on Ge 8=49721
- polystyrene, in vac. u.v. 8=41174
- reflectometer, double-beam type, for determ. 8=37684
- surface layers, thin, microstructures from ellipsometry 8=48439
- surface ripples, off-crest amplitude meas. 8=34727
- Ag-In alloys, dil., rel. to interband transitions and plasma oscills. 8=49699
- B, amorphous films, 0.6-6.0 eV 8=45174
- $Be_4O(CH_3\text{-}COO)_6$, in 600-1800 cm^{-1} range 8=45239
- Cu, uniaxial and hydrostatic strain dependence rel. to interband transitions 8=49724
- Cu-Au alloys, from transmission and reflection meas. 8=41082
- Cu_2O, and refl. rel. to lattice vibrs., 290°K 8=39873
- Fe-Ni films, and Faraday effect 8=36358
- Ge, nonlinear susceptibilities rel. to band model 8=45219
- nInAs(Sb) nonlinear susceptibilities rel. to band model 8=45219
- K, 0.5-4.0 eV ellipsometric obs. 8=41120
- MgO, from electronic band structure by pseudo-potential calc., 7-28eV 8=27587
- Mo, reflectance meas. 537-5770Å 8=27591
- Na, 0.5-4.9 eV ellipsometric obs. 8=41120
- Pt, from reflectance data 8=45216
- Re, reflectance meas. 537-5770Å 8=27591
- Rh rel. to h.f. polarizability and cryst. e states, 0.4-11μm 8=32026
- Sb_2S_3 films, meas. for diff. thicknesses 8=49748
- Si, nonlinear susceptibilities rel. to band model 8=45219
- Ta, reflectance meas. 537-5770Å 8=27591
- VO_2, 0.25 and 5eV, in semiconducting and metallic states 8=49760
- W, reflectance meas. 537-5770Å 8=27591
- Y_2O_3, in spectral region 0.25 to 9.6μ 8=49762

Optical dispersion. See Dispersion, optical.

Optical fibres. See Optical systems.

Optical films
- See also Filters, optical.
- antireflectant, behaviour, theoretical interpretation 8=42243
- beamsplitters, efficiency, in far i.r. Michelson interferometer 8=28850

Optical films—contd
- deposition of films thicker than 1μ on optical component surfaces 8=44034
- dielectric, as mirrors, windows and filters for laser work 8=49674
- dielectrics, thickness control during vacuum deposition 8=48433
- Fresnel formulae fabrication, props. 8=28847
- multilayers systems least squares method for automatic design 8=46671
- polariser in rotatory dispersion adapter 8=24370
- standard coatings with unchanging radiation props., prep. 8=49673
- B, amorphous, transitions 8=45174
- Ba and absorpt. props. 8=27560
- CuCl, density, refr. index and absorpt. coeff. 8=31982
- ThF_4, dispersion of refractive index and useful range of transparency 8=35184
- α- and β-$TiCl_3$, growing, thickness meas., and absorpt. spectra 8=36417

Optical filters. See Filters, optical.

Optical images
- See also Aberrations, optical; Holography; Resolving power, optics.
- bundles, flexible fibres, image forming, applications 8=46675
- curvature correction in images produced by concentric systems by means of fibre 8=42194
- degraded by diffraction and noise, restoration of resolution 8=28735
- diffraction, algebraic formulation for self imaging 8=46731
- diffraction, of point in focal and out of focus planes 8=42251
- distant source, in lens focus, random displacements due to refractive index vats. 8=24369
- distorted by atmosphere, electronic restoring system 8=42180
- electron, emulsion resolution for 7-60 keV 8=37722
- electrophotographic imaging with cholesteric liquid crystals 8=42279
- distortion, new theory 8=37638
- errors, finite, theory based on diapoint config. 8=46665
- finite sampling, effect in holography 8=28886
- formation and filtering, coherence and incoherence 8=37649
- formation, nonlinear transfer by phase contrast 8=37646
- grid formation using hologram with spatially incoherent illumination 8=42264
- holographic formation, equivalent-lens theory 8=46748
- holographic light flux, effect of photographic characts. 8=44272
- holographic recording props., comp. with photographic method 8=46746
- holographic, transmission by television 8=33293
- illuminance distribution calc. on bases of wave theory 8=42252
- imagery using coherent light, noise minimization 8=37628
- imaging through randomly inhomogeneous medium by wavefront reconstruction 8=28889
- luminance amplification in electro-optical systems 8=42261
- meridiurnal decentering effect on astigmatic ray bundles 8=37647
- photographic relief images 8=28883
- photographs, blurred, sharp-focus restoration by holographic methods 8=24433
- pseudoscopic, formation and inversion 8=28902
- quality assessment for system by comparison with synthesized image 8=37650
- quality in incoherent system, transfer function applic. 8=28736
- quality, theoretical prediction 8=28741
- radiographic, information capacity calc. 8=46770
- reflector, parabolic, source displaced from focus 8=33244
- shape definition, use of coherent optics 8=46669
- simultaneous viewing of image and stop aperture which scans image, six devices 8=42186
- spot diagram of max. sharpness 8=46666
- transfer function rel. to flare and method of meas. 8=28738
- trapezoidal distortion in projected images 8=42168
- two close objects, apparent separation and intensities 8=24368
- visual pattern, charact. features extraction by laser prod. Fraunhofer diffraction 8=33246
- visual, stabilization in vibrating environment, meas. and specifications 8=42172
- from wide angle lenses, asymmetrical, for 35mm photography 8=28910
- wind-tunnel model incidence meas. 8=28733
- CdS self-scanning sensor using high field domains 8=27317

Optical instrument testing
- aberrations, interferometric methods 8=28752
- alignment procedures and flatness testing 8=28746
- Fabry-Perot plates charting, Michelson interferometer meas. 8=28849
- flatness control in optical polishing 8=37652
- flatness, precision meas. 8=28752
- optical flats, contour determ. 8=37686
- refracting telescope, 16-inch, Hartmann results 8=28036

Optical instruments
- Some instruments are listed separately, e.g. Refractometers.
- amplifier, multi-path cell, 15 dB gain, $9\text{-}11\mu$ 8=24374
- angle-doubler for reflectance meas. in vacuum 8=37658
- angle-measuring instrument, specifications 8=41616
- autocollimator, AKF0.5, precision and accuracy of meas. 8=46673
- coelostat for Catania observatory 8=28163
- contact spherometers 8=42184
- converter for vel. meas. in boundary layer of high temp. gas 8=30244
- Corning Glass Works, review 8=37660
- correlator using laser beam diffraction by u.s. waves 8=28751
- crystal orientation goniometer 8=30814
- design for hostile environment 8=28758
- design procedure 8=28753
- design with computers, adaptive automatic correction tech. 8=28748
- diffraction gratings for meas. error in gear hobbing machine table drives 8=24373
- diffractometers, accessory for transferring crystal from one goniometer head to another 8=26345
- dispersion, adapter, rotatory 8=24370
- Fabry-Perot etalon, temp. regulation 8=28747
- Fabry-Perot resonator, with rapid sinusoidal detuning 8=46556
- Fresnel and sine wave zone plates 8=37690
- heliostat, simply-aligned 8=32416
- heterodyne detector, balanced, with oscillator and signal waves perp. polarized 8=42216
- heterodyne expts. with enclosed transmission paths 8=37651
- heterodyne receivers, broadband matching 8=28774
- hypervelocity impact expts. optical lever technique adaption 8=23945
- laser acoustic techniques for variable time compression, expansion and reversal of r.f. signals 8=28721
- laser windows, films and mirrors from dielectric materials 8=49674
- light guide consisting of glass fibres, technology of manufacture 8=28761
- light scatt. meas. in optical materials 8=42181
- loss meas. by He-Ne laser 8=28689
- lucite light pipes coupled to photomultipliers, efficient design 8=24371
- luminescent errors due to "thick" specimens, elimination 8=37657
- machining parts with diamond-tipped tools on metal-cutting lathes 8=45939
- micrometer, contactless, use in thickness meas. technique 8=41615
- modulator, photoelectroplating 8=37631
- open u.v. counter tubes, 900 to 1300Å, obs. 8=28759
- phase-meter 8=28662
- prism line-scanner for high-speed thermography 8=37322
- profile, two-dimensional, Hankel transform appl. 8=41630
- prod. of optical elements, workshop and industrial methods 8=28749
- radii of curvature of test glasses, 0.3 to 6m., meas. apparatus 8=28756

  alkali-halide crystals, in u.v. 8=27556
  alkali halides, second harmonic generation obs. 8=27555
  alkaline bromides, stability constants of Pb complexes 8=48148
  ammonium oxalate, non-linear props. and double refraction 8=36443
  ammonium pentaborate, nonlinear props., 8=41167
  amplification, nonlinear of propagation pulse 8=46646
  azamerocyanines, polarizability in region of absorpt. band 8=34851
  p-azoxyanisole liquid crystals, optical rot. obs. 8=43826
  beam self-trapping in molecular fluids for saturation of non-linear refractive index 8=30478
  benzene liquid, i.r. stimulated emission at 5μ by phonons obs. 8=43828
  cholesteric, circular polarization 8=48150
  cooling of crystals by transfer of laser radiation into atomic thermal vibrations 8=39900
  colloids, optical nonlinearities 8=34951
  corundum, transparent sintered, prep. and props. 8=45940
  cryptocyanine, alcohol soln., optical width var. during laser giant pulse generation 8=25921
  crystal, laser-illuminated, second harmonic and parametric generation, optimization 8=49671
  crystal, mol., i.r. vibr. line breadth rel. to reorientation 8=36292
  crystal, parametric gain near lattice resonance, theory 8=45141
  crystals, as backward wave light generators 8=24357
  diamond type semiconds and insulators, rel. to band struct. 8=44753
  diamond, Type II, u.v. transparency and abundance 8=49710
  9,10-dimethylanthracene in dimethylformamide: spectra of electrochemiluminescence 8=48177
  dye solns., third-harmonic generation, conc. and dispersion dependences 8=43819
  ferroelectrics, oxygen octahedra, nonlinear tensor coefficients 8=41017
  filament formation due to self-focusing of intense optical beam in liquid 8=43816
  films in vacuo, optical consts. meas. 8=36288
  films, thin granular 8=27521
  fluid, opalescent, spectrum of doubly scatt. light 8=39152
  Franz-Keldysh effect, high-freq. 8=31950
  gas mixtures, scatt. rel. to mol. correls. 8=34663
  gas particle cloud, homogeneous, emittance freq. averages 8=43693
  gases, Rayleigh scatt., finite-size effects 8=39219
  gaseous media, Raman and Brillouin effects stim. in emission and absorption 8=48155
  glass-ceramic, Cer-Vit, transmittance at u.v., visible, i.r. and sub-mm wavelengths 8=45165
  glass-ceramic mirror blanks, transparency under strain 8=41137
  glass, photochromic, produced by Ag^+ exchange 8=41140
  glass second harmonic generation obs. 8=27555
  glass, silicate-alumina, 600°C i.r. emission spectra 8=38842
  gyrotropic crystals, expression for component of reaction forces of Vavilov-Cherenkov radiation 8=31952
  inert gases, third-harmonic coeff. calc. 8=39214
  ionic crystals, lattice vibrs. 8=44287-8
  ionic crystal sphere, vibration modes 8=35374
  Kramers-Kronig relations, molecular spectra, liquids and solns. 8=48153
  leucosapphire effect of γ-radiation 8=41054
  light emission from Si p-n junctions 8=45286
  liquid, anisotropic molecular, in laser resonator 8=42071
  liquid, laser beam irradiated, optical gain 8=30477
  liquid mixtures, scatt. rel. to mol. correls. 8=34663

Optical properties of substances—contd
  liquids, beam self trapping by dielect, waveguide production 8=34843
  liquids, dense, Raman and Brillouin effects stim. in emission and absorption 8=48155
  liquids, emission from hydrodynamic cavitation 8=43813
  liquids, power-depend. distortion of i.r. beam from CO_2 laser 8=25916
  liquids, self-trapping of picosecond pulses in viscous liquids and glass 8=43810
  metal thin films, rel. to e transport 8=26954
  metals, anomalous skin effect for expts. at non-normal angles of incidence 8=49739
  metals, thermodynamic theory 8=27518
  mineral salt, aqueous sol., Kerr effect 8=34844
  modulators, Debye-Sears amorphous-solid wide-band, transfer characts. and freq. response 8=27522
  Mossbauer diffraction in crystals, quantum theory of γ-ray and x-ray optics 8=30636
  naphthalene, deuterated, optical anisotropy of excited state 8=25611
  nonlinear mats., evaluation by powder technique 8=45142
  nonlinear, self-focusing filaments, prod. mechanism 8=42153
  nontrionite, monodisperse sols., electrooptic effects 8=39459
  oil, synthetic immersion, for microscope objectives 8=39363
  opalescence, critical surface 8=25915
  organic crystal solns. generation due to ruby laser pulse 8=30479
  Perspex dosimeters, photosensitivity 8=42347
  phenanthrene crystallites in rigid 3-methylpentane spectroscopic study 8=49429
  photochromic glasses 8=41095
  photoselection, tandem two-photon processes 8=49692
  plane surfaces, evaluation of quality, technique 8=36286
  plasma resonance, review 8=49123
  plasmons in metal spheres, e. bombardment stimulation and radiative decay 8=45145
  polarizability tensor in cubic and hexagonal II-VI cpds. 8=27545
  polycyanacrylates and compositions based on chem. 8=48151
  polymers, electronic theory 8=29867
  polystyrene, filament struct. in laser beam trace 8=49784
  polystyrene films, far u.v. 8=27639
  potassium tartrate, second harmonic generation on ruby laser irrad. 8=45199
  quartz, synthetic, u.v. transmission 8=49751
  Raman effect, stimulated, in gases and liquids 8=43169
  rare earth ions in crystals, energy transfer, temp. depend. 8=45138
  recombination radiation in inorganic solids 8=31953
  rhodamine C solution, optical generation during excitation with pulsed light sources 8=30480
  ruby, effect of γ-radiation 8=41054
  saddle point transitions under crossed elec. and mag. fields 8=27543
  salicylanide, variation in absorpt due to equilibrium between rot. isomers and ionization 8=38903
  sapphire, colourless crystals, optical inhomogeneity 8=41055
  salicylidene aniline, photochromism 8=45302
  second harmonic generation, ang. structure 8=36377
  secondary spectrum of two-element lenses in i.r. 8=45144
  self-excitation of active plane-parallel layer, effect of metal lattices 8=31946
  self-focusing in disperse medium produced in laser 8=36310
  self-focussing of light, electrostriction effect 8=41046
  semiconductor plasma in elec. field, non-linear 8=31930
  solid, isotropic, polarization due to diffraction by u.s. waves 8=36302
  stim. Raman effect in liquids of diff. Kerr coeffs., effect of temp. on threshold 8=48156
  stress-optical meas. by intensity method 8=44510
  spatial synchronism in nonstationary processes of photon-echo type 8=49670
  spherulite, radial, Rayleigh-Gans scatt. 8=36447
  stimulated emission in solutions, use of cuvette 8=46704
  tandem two-photon processes, polarization correl. 8=49692
  trans-4-dimethylamino-4′-nitrostilbene, polarizability in region of absorpt. band 8=34851
  underwater optics, S/N concept 8=37695
  underwater rad. distrib. meas., directional photometer 8=42136
  III-V cpds., second order susceptibility calc. 8=27523
  III-V cpds, second-order susceptibility rel. to Miller coeff. and bond dipole moments 8=36314
  uniaxial absorbing crystals 8=27527
  Vavilov-Cherenkov radiation, integral expression for component of reaction force 8=31952
  water surface, radiation distrib. var. 8=34853
  X-ray interf. at distorted cryst. lattices 8=31951
  X-ray monochromators and resonators from single crystals 8=28928
  zinc-blende type semiconds and insulators, rel. to band struct. 8=44753
  Ag halides particles, bleaching 8=41094

Optical properties of substances—contd
Ag, second-harmonic generation 8=27548
AgBr, AgCland AgI, far i.r. reflection spectra 8=45167
AgCl, 2-21 eV, reflectivity obs. 8=36316
As_2Se_3 film, energy bandgap, reflectance and refractive index 8=31963
$(As_xSb_{1-x})_2Se_3$ film, energy bandgap, reflectance and refractive index 8=31963
$Ba_2NaNb_5O_{15}$, continuous parametric oscillation 8=36328
BeO, phonons, reflection and Raman spectra meas. 8=27561
$Bi_4Te_3O_{12}$ crystals, electrical-optical behaviour 8=27271
CaF_2, photo-effect, influence qf electric field 8=36337
$CaSO_4$, photo-effect, influence of electric field 8=36337
CaV_2O_6 8=30798
$Ca_2V_2O_7$ 8=30798
$Ca_3V_2O_8$ 8=30798
$Ca_5(PO_4)_3F:Nd^{3+}$, spectral and laser characts. 8=37620
Cd, Mg and Sn single crystals, opt. consts. from reflectance ratios 8=45164
CdS, oscillatory exciton emission 8=41077
CdTe, recombination radiation, evidence for superradiance 8=31971
CO_2 spectral transmission functions 8=30300
CO_2-H_2O vapour, optical-acoustic radiation, press. temp. effect 8=30298
CS_2, 4-photon amplification of quartz stimulated M-B scatt. components, obs. 8=43822
Cr black coatings, electrolytically deposited 8=45394
Cr, in the far u.v. 8=31978
Cr, Hf, Ni and Zr, polycrystalline, opt. consts. from reflectance ratios 8=45164
Cs_3CoCl_5, and magnetic and e.p.r. props. 8=31501
Cs_3ZnCl_5: Co^{2+}, and magnetic and e.p.r. props. 8=31501
Cu-isochromat at 10 kV 8=49714
Cu-Au alloys, transmission and reflection meas., 8=41082
CuCl film, density, refr. index and absorpt. coeff. 8=31982
Cu_2O, thin films, rel. to transport props. 8=31983
$Cu_{2-x}S(0 \leq x \leq 0.2)$, and elec. props. 8=49156
D_2O, absorpt. intensities, 4000-1000cm^{-1} obs. 8=34852
Fe films, and elec. props. rel. to absorpt. of bulk Fe 8=41085
GaAs, abs. coeff. at microwave and mm. freqs. 8=27568
GaAs laser diodes, photoelectric props. 8=49305
n-GaAs, modulation of opt. abs. at intrinsic edge by acoustoelectric domains 8=27570
GaP photodiode, strongly compensated p-i-n junction 8=40509
GaP: Cd-O complexes. 8=27648
GaP: Zn-O complexes. 8=27648
GaS semiconducting layer compound 8=44774
p-GaSb, optical modulation by acoustoelect. domains 8=31991
GaSe, semiconducting layer compound 8=44774
Ge, far i.r. modulation, crossed-field, free carrier 8=41093
Ge, optical difference mixing 8=31995
GeSe, and photoelectric props.. in energy range 0.5-1.5eV 8=49727
$GeSe_{0.75}Te_{0.25}$, optical absorption 8=31994
He, liquid, with excess electron, theory 8=34854
He-Ne plasma afterglow rel. to 2s and 2p decay velocities 8=30080
α-HIO_3 crystal, soln. grown, nonlinear obs. and appl. 8=32000
H_2O, absorpt. intensities, 4000-1000cm^{-1} obs. 8=34852
H_2O vapour spectral transmission function 8=30300
In_2O_3, sputtered films, near i.r. 8=40470
InSb, coherent emission from e-hole plasma without mag. field, obs. 8=32001
In_3Te_4 thin layers, rel. to structure and photoconductivity 8=39796
K film, for photons 3.96 to 9.69 eV 8=49731
KBr, F-aggregate bands, optical and thermal stability, half-widths and oscillator strengths 8=49732
KBr optical consts. from energy loss meas. 8=32003
KCl, dependence growth conditions and impurity effects 8=26401
KH_2PO_4, second harmonic generation using a laser 8=41102
$KLiSO_4$, second harmonic generation on ruby laser irrad. 8=45199
LaF_3-SrF_2:Nd^{3+}, induced emission at 300°K 8=27579
LiF, dependence on growth conditions and impurity effects 8=26401
$LiNbO_3$, birefringence and phase-matching temp. as function of melt stoichiometry 8=31433
$LiNbO_3$, melt-grown, second-harmonic generation rel. to comp. 8=41114
$LiNbO_3$, piezo- and thermo-optic behaviour 8=27582
MnTe, antiferromagnetic semiconductor, interpret. using magnon drag. 8=32009
$NaBrO_3$, second-harmonic light generation rel. to natural optical activity 8=45206
NaCl, dependence on impurity effects 8=26401
$NaClO_3$, second-harmonic light generation rel. to natural optical activity 8=45206
Nd self-focusing in disperse medium produced in laser 8=36310
Ni-Al alloys, colour rel. to composition, Fermi surface and Brillouin zones 8=45213
Pb, in the far u.v. 8=31978
$Pb_{1-x}Sn_xSe$, rel. to i.r. rad. generation and detection 8=43980
$Pb_{1-x}Sn_xTe$, rel. to i.r. rad. generation and detection 8=43980
$RbNi_{1-x}Co_xF_3$, Faraday rot. and bulk absorption 8=49555
PbO, and electrical props. 8=26948
PbO-La_2O_3-B_2O_3 glasses 8=45214
$(Pb_xSr_{1-x})TiO_3$ crystals, $x \approx 0.25$ 8=44139
Pd, electronic structure by photoemission and optical studies 8=31293
$PtSb_2$. also preparation and semiconducting props. 8=40479
Rb^{85} vapour, optically pumped, modulation of scattered light beam 8=37629
RbH_2PO_4, detection on laser illumination 8=45203
$Sb_xBi_{1-x}SJ$ and $SbS_xSe_{1-x}J$ 8=40670
Sb_xS_3 film, energy bandgap, reflectance and refractive index 8=31963
Se, trigonal, in polarized vacuum u.v. 8=45217
Se-Cd glass, nonlinear optics 8=32029
SnS, epitaxial film, and structure 8=44060
SnSe, epitaxial film, and structure 8=44060
SnTe epitaxial film, and structure 8=44060
Si, optical difference mixing 8=31995
UO_2^{+2}:Nd^{+3} laser glass, Ce-stabilized 8=28710
W, isochromat at 8kV 8=49761
Xe liquid, −59.0°C-16.5°C, refractive index and Lorentz-Lorenz function obs. 8=43809
Xe vapour, −59.C — 16.5°C, refractive index and Lorentz-Lorentz junction obs. 8=43809
Xe_2 compressed light source for pumping Nd glass laser 8=28709
YVO_4, an i.r. spectral emittance 8=32038
ZnO crystals, laser action under e.-beam pumping 8=49765
ZnO, intrinsic photo effect of dyes, spectral sensibilization mechanism 8=36428
ZnO, low dispersion layer 8=36429
ZnS, coherent fluorescence for excitation by 2 photon absorption 8=32063

Optical pumping
amplifier, quantum, gas mixture 8=24299
atomic system, dynamical eqns., irreducible-tensor-formalism of statistical operators 8=29634
double-pulse, for stimulated emission 8=24265
efficiency calc. by graphical method 8=42067
excited state mixing, collisionally induced 8=29631
h.v. transient pumping technique, prod. of 5-J 200 kW CO_2 laser pulses 8=33180
influence of gas laser on fluoresc. emitted by gas in magnetic field 8=47515
laser, by electrodeless h.f. discharge 8=33178
laser, by tubiular lamps fed by double current pulses 8=46539
laser generator rods, distrib., photographic meas. 8=24324
laser, heating change in active element 8=24325
laser, rel. to rod side surface matting 8=37598
laser resonator with radial gain profile, Gaussian mode 8=37563
lasers, solid, use of spherical reflector 8=46598
lasers with 2 photon pumping, employment in freq. conversion 8=33241
level-crossing meas., effects 8=25342
maser, intensity and freq. effects on Q of material 8=37548
non-uniform, loss in solid laser 8=37600
organic dye laser, flashlamp 8=46629
polymethane dyes, nineteen, stimulated emission over continuous range 710-1060 mμ 8=28713
polymethyl methacrylate rods containing rhodamine dyes, stimulated emission when flashlamp excited 8=28714
power supply for laser pumping source, optimum capacitance 8=42052
pulse generation, mode locked in passively switched lasers 8=28651
Raman effect induction 8=43207
Raman laser pulse generation by focusing ruby output on H_2 cell 8=28684
resonator, measuring Fabry-Perot with rapid sinusoidal detuning 8=46556
resonator with modulated Q, kinetics 8=37559
resonators and waveguides with infinite mirrors, modes 8=33121
resonators with partial polarizers, eigenstates of polarization 8=46559
r.f. resonances, study of nuclear and electron magnetic moments 8=43212
rhodamine dyes in polymethyl methacrylate rods, stimulated emission when flashlamp excited 8=28714
ruby and $CaWO_4$:Nb^{3+} crystals, effect of parameters of pumping light source and discharge regime on output of coherent radiation 8=24330
ruby laser, by Ar ion laser 8=28704
ruby laser giant pulse field development with saturating filter in resonator 8=42100
ruby, photon echoes rel. to irrad. intensity, and echo dephasing model, obs. 8=36321
ruby, population inversion and absorpt. power 8=24331
semiconductor thin-platelets, laser emission 8=46613

Optical pumping—contd
stimulated emission when emission wave beats with second-order scattered wave 8=33173
transformation of flash lamp emission by org. luminophore solns. in laser system 8=28650
two-level system, intense radiation, effect 8=24271
$Ba_2NaNb_5O_{15}$, continuous parametric oscillation 8=36328
CaF_2: Sm^{2+} crystal generation, spectrum-time studies for ruby laser excitation 8=41071
CaF_2: Tm^{2+}, 12% nuclear polarization production 8=30633
Cd(SeS) semiconductor thin-platelets, laser emission 8=46613
Cs in N_2, enhancement by quenching 8=47514
Cs rel. to absorpt. line-width and Ne buffer press., obs. 8=25374
Cs vapour, hyperfine, with mag. filters 8=38693
D atom g_J ratio meas. 8=38734
Eu^{3+} in crystals, elec.-dipole transitions rel. to solid-state i. r. quantum counter-amplifier mechanism 8=42137
GaAs semiconductor thin-platelets, laser emission 8=46613
Ga(AsP) semiconductor thin-platelets, laser emission 8=46613
H atom g_J ratio meas. 8=38734
He, double refraction 8=39216
He^3, liq. nuclear polarization expt. 8=37337
He^3, polarized, n. m. r. meas. for pumping time rel. to temp. 8=47689
He^3, radiooptical resonance 8=47517
Hg^{201}, and pulsating e.m. field effects on dispersion and absorpt. 8=43222
Hg-vapour, rel. to green-band emission 8=29944
K vapour, four wave parametric interaction 8=33177
$LiNbO_3$, pulsed parametric oscilln. and power limiting 8=42078
Na, precision frequency meas. of 0-0 transition 8=47524
Nd glass rod, using compressed Xe_2 light source 8=28709
Nd^{3+} doped calcium fluorophosphate 8=37620
$NH_4H_2PO_4$, by laser, rel. to optical parametric scatt. 8=45211
Rb, in weak mag. field 8=38709
Rb jet atomic clock 8=47525
Rb, $NdCl_3$ D_2 filter for student expts. 8=42196
Rb^{85} vapour, double-quantum resonant, light beam modulation 8=37629
$Rb^{85,87}$ atom g_J ratio meas. 8=38734
Rb^{87}, light shift due to virtual transitions 8=38708
SF_6 gas by CO_2 lasers, photon echoes, obs. 8=34282
Si, dynamic nuclear polarization production 8=30632
Sm^{2+} in crystals, elec.-dipole transitions rel. to solid-state i. r. quantum counter mechanism 8=42137
Optical quantum generators. See Lasers.
Optical rotation

electron linear accelerator switchyard beam monitor 8=33077
extreme u.v. mechanical collimator 8=46668
fibre components, struct. anal. and inspection, new method 8=42195
fiber polychromator for separating pulsed plasma emission lines 8=37662
fibers, geometric and waveguide props. 8=28760
flexible fibres, applications for light guides and image forming bundles 8=46675
Fourier transform analogue computer 8=28828
grazing-incidence aplanatic mirror systems 8=46660
hologram transmission bandwidth reduction by elimination of vertical parallex 8=28893
homodyne signal strength rel. to path length 8=42146
image converters and intensifiers, objective design 8=42178
image illuminance distribution, calc. of basis of wave theory 8=42252
image luminance amplification in electro-optical systems 8=42261
image quality assessment by comparison with synthesized one 8=37650
image quality, stray light effect 8=37645
imagery using coherent light, noise minimization 8=37628
information-processing, optimization by transcorrelation-function maximization 8=28740
i. r. optical communication systems 8=33250
i. r. polarizer 8=46738
laser acoustic techniques for variable time compression, expansion and reversal of r. f. signals 8=28721
laser beam expander for divergence correction 8=28743
laser beam scan enhancement through periodic aperture transfer 8=28659
lens, coherent transfer characts. 8=37648
lens, entropy transmission 8=46658
light intensity viewing port for crystal growth 8=42171
magnified interferometry of small displacements 8=41619
using meniscus lens mirrors 8=42149
meridional decentering effect on astigmatic ray bundles 8=37647
modulator, a. m., 3 stage, obs. 8=33240
multicomponent, randomly oriented, alignment to common coordinates 8=42174
multilayer systems, automatic design by least squares method 8=46671
radar system, sidelooking, with coherent optical processor, holographic analysis 8=37524
redirectors and refocusers effect on light transmission through aberrated and misaligned lenses 8=46662
replacement of single-lens components by two-lens components 8=42158
resonator, open, perturbation calc. 8=24366
resonator, open with spherical mirrors, transmission losses 8=24367

Optical systems—contd
resonator, stable and unstable, modes 8=37561
Ritchey–Chretien telescope corrector 8=42188
screen scintillation due to interference 8=46723
separation of variables and principal charact. coeffs. in systems with very thick components 8=42167
short light pulse generation, convenient method 8=24379
solar simulation for 1.5 diam. test objects, using 9 rad. sources and a mosaic mirror 8=28734
solid light funnel for phototube aperture increase 8=41976
sphere for directional reflectance meas. 8=46718
spherical aberrations, correction, optimal conditions, and optimal position of image plane 8=42162
with spherical aberration, quality 8=28739
split-image, division of field of view 8=42165
spot diagram of max. sharpness 8=46666
stereocameras for bubble chamber photographs, adjustment 8=46767
Strehl ratio, depend. on magnitude of variance of wave aberration 8=28731
transfer coefficients 8=42176
transfer function meas. by holography 8=37704
transfer function, meas. instrument 8=42175
transfer function rel. to flare and method of meas. 8=28738
two-component mirror and mirror-lens variable magnification systems 8=42150
viscosity of glass fibres with and without concentric glass casings 8=39631
wave aberration, evaluation of variance, direct approach 8=37640
waveguide, made of tubular gas lenses, beam deformation obs. 8=37639
waveguides, stability of light beam at bends 8=46642

Optics

second harmonic generation in two level systems, rel. to crystals 8=36287
second harmonic, mag. field induced, search using ADP and quartz 8=45140
self-focusing of intense beams 8=24351
statistical, random function model 8=37627
transfer function for image quality 8=28736
transfer function rel. to flare and method of meas. 8=28738
two-frequency generation, material with split metastable levels 8=24356
underwater, S/N concept 8=37695

Optics—contd
wave packet, kinetic behaviour 8=37625
geometrical
aperture, annular, with spherical aberration and coma, irradiance distrib. in diffr. patterns 8=42169
caustics, ratio of amplitudes on and away from smooth curve 8=32908
corner cube reflectors 8=42147
distortion theory 8=37643
double-wedge focusing device in image plane 8=42164
image errors, finite, theory based on diapoint. config. 8=46665
parallel-ray tracing through symmetrically crossed half-prisms in autocollimation 8=42154
ray optics in turbulent atmos., validity 8=32239
reflector, parabolic, source displaced from focus 8=33244
review with ref. to image formation by lenses using matrix methods 8=28725
scattering of strongly interacting composite particles 8=47030
skew rays, vectorial soln. from Fincke's formulae 8=24365

Orbital calculation methods
all-electron calc., approx. methods 8=25578
AMO method, spin degeneracy 8=34314
atom and molecule, superconductivity theory applic., biorbitals 8=34113
atomic, classical motion 8=25346
atomic-orbital bases, choice and definition 8=43265
atomic orbitals for molec. fragments in MO's 8=29785
atomic SCF calcs. correction to exchange pot. giving h.f. energies 8=38615
atomic wave functions, configuration-interaction method 8=25358
atoms, relativistic wave functions, screening constant calc. 8=38630
augmented separated-pair expansion 8=38624-5
biorbitals method 8=47491
bond-orbital, ab initio calc. 8=38891
CNDO calcs. on second-row mols. 8=47573
CNDO method in spectroscopy 8=29767
CNDO/2, ionization potentials calc. 8=47785
conjugate molecules spin props. calc. 8=29707
correlated pair functions in atoms and mols., new method of calc. 8=34114
corresponding orbitals and cofactors 8=47574-5
de Sitter group in molec. quantum mech. 8=25430
distinguishable electron method 8=34118
dyes, photosensitivive, HMO calcs. rel. to work function 8=40687
effective operators and spectrosc. props. 8=34115
electron repulsion integrals one and two centre, for π-electrons in double bonds 8=34218
electron shake-off, SCF wave functions appl. 8=38688
FEMO model, three dimensional, homonuclear diatomic 8=47577
Fermionic-Bosonic approx. in mol. quantum mechanics 8=43264
g-factor of d^3 configuration, covalency and theory 8=43962
ground state calc., orbital exponent 8=25487
Hartree-Fock exchange pot. for electron gas adaptation to atoms and solids 8=38617
Hartree-Fock method, unrestricted, density matrix 8=38797
Hartree-Fock perturbation theory, non-orthogonal formulation 8=25331
Hartree-Fock-Roothaan approx., derivates of energy 8=38799
Hartree-Fock theorem relating upper bounds for ground state energies of $(N+1)$ and N electron systems 8=38618
Hückel theory, self-consistent methods 8=38796
INDO method (immediate neglect of differential overlap) 8=34211
INDO spin unrestricted wavefunctions, spin contamination 8=47508
intermolecular orbital theory 8=27684
iterative extended Hückel theory 8=25432
Koopman's theorem, analysis 8=34116
LCAO–HCO method 8=47571
LCAO–SCF–CO method 8=47572
limited Gaussian basis sets for atoms and mols. 8=29571
localized MO's, method of steepest ascents 8=29700
localized orbitals, σ bonds 8=47578
MO-LCAO crystal field theory, diagram method 8=43931
MOs for large mols., from SCF matrices of related small mols. 8=47570
molec. wavefunctions calc. n.q.r. as check 8=29701
molecules with high period elements, allowance for polarization of atomic shells in MO LCAO calcs. 8=25429
multi-configuration SCF with non-orthogonal orbitals 8=43151
multi-open-shell config., Coulomb operator matrix 8=47440
multi-open-shell config., fractional parentage coeffs. 8=47441
natural orbitals and wavefunctions, perturbation theory calc. 8=38603
nitrovinylbenzoate mol, appl. to structural group interactions 8=34347
Pariser-Parr-Pople calcs for benzo- and naphthothiophenes 8=43355

Orbital calculation methods—contd
perturbation theory of extended Hartree-Fock approx. 8=47469
perturbed Hartree-Fock, force consts. and dipole moment derivatives 8=25425
π-electron computation, general parameters 8=25440
polyatomic mols., improving precision of MO calc. 8=25431
probability loss from arbitrary group of states, upper bound 8=42311
pseudopotential method tested on H atom 8=29595
reduced-density-matrix theory 8=38598
resonance integrals, approximations in semi-empirical calcs. 8=34210
SCF calc., basis sets 8=25622
SCF calcs. without SCF eqns. 8=47444
SCF methods, choice for coupling operators 8=29699
self-consistent field calcs. in zero differential overlap approx., range of applic. extended 8=34357
self-consistent perturbation theory 8=25326
separated-pair approx. and electron correl. 8=38623
Slater-Condon integrals calc. from Hartree-Fock function for atoms from He to Ar 8=34133
Slater-type orbitals, multicentre integrals of γ_{12}^{-1} 8=38600-2
spin-orbital forces and relativistic effect 8=38800
spin-spin contact Hamiltonian, symmetry props. 8=38632
synchrotron lattice, orbit const. computation 8=33438
tetrahedrally localized orbitals, correl. 8=34117
three-body problem solution 8=33315
two-particle density functions for spin-projected Slater determinant 8=47445
uniform localization of AO's and MO's 8=25428
unoccupied natural orbitals of two-electron wavefunctions 8=38599
valence-bond theory of contact nuclear spin-spin coupling 8=47565-6
wave function for Li, Be^+ and B^{++} 8=38672
Be, natural orbital and geminal expansions, from reduced density matrices 8=43182
H_2, numerical single-centre SCF function 8=47601
H_2^+, electronic terms and wave functions for large internuclear separation 8=43310
Li atom, ^2S ground state, Hylleraas wave function 8=38671
Li_2, wave functions and binding energies calc. using quantum defect method 8=25489
Li H, natural orbital and geminal expansions, from reduced density matrices 8=43182
TiO_6^{-n} units, localized, extended Huckel calcs. using set of K parameters 8=45225
ZnO: Cu^{2+}, molecular theory 8=43969
Orbitals. See Molecules/electronic structure.
Order—disorder transformations. See Phase transformations/solid-state.
Ordered structure. See Crystal structure; Solids/structure.
Organic compounds
See also Free radicals; Macromolecules; Plastics; Polymers; Waxes.
acenaphthenequinone, vibrational spectrum 8=43282
acenes, cryst. and in soln., absorpt. spectra in polarized light 8=32042
acetaldehyde absorbed onto silica gel, laser Raman spectra 8=25530
acetaldehyde, ionization and dissoc. by electron impact 8=39056
acetaldehyde reaction with N, mass spectrometric study 8=27710
acetals, depend. of geminal H-H couplings on solent and conc. 8=43831
acetic acid, ionization and dissoc. by electron impact 8=39056
acetic acid, monomer and dimer., vibr. calc. 8=25531
acetic acid, n scatt. spectroscopy of microscopic transport props. 8=30403
acetic acid, vapour phase esterification with ethanol, thermodynamic equilibrium 8=49837
acetone/CCl_4 binary mixture, proton mag. relaxation 8=39425
acetone condensation products, mass spectra 8=29840
acetone-d_6, intermediates in photolysis 8=49951
acetone, electro-osmosis, temp. dependence of rate constants 8=32130
acetone, freezing press. 8=50477
acetone, ionization and dissoc. by electron impact 8=39056
acetone, orthobaric data near crit. pt. 8=34956
acetone, scattering of ruby laser emission, large angle 8=48158
acetone-water mixture, thermometric analysis 8=27771
acetonitrile and NH_4 salts dipole-dipole interaction, spectral C ≡ N band shift obs. 8=30487
acetonitrile, Brownian rotatory motion rel. to dipole-dipole intermol. forces in vibr., 8=43827
acetonitrile: bromine 2:1 complex crystal structure 8=39826
acetonitrile-d_3, γ-irradiated, trapped electron and its reversible reaction, e.s.r. evidence 8=49955
acetonitrile, photoionization 8=47789
acetonitrile, spin-lattice relax. and molec. reorientation in liq. 8=30539

Organic compounds—contd
acetophenone-$SbCl_3$ complexes in CCl_4, i. r. spectra 8=34866
acetophenone in soln at 77°K, medium effects on time-resolved phosphorence spectra 8=45297
para-acetotoluidide crystals, monoclinic modification X-ray study 8=44262
3β-acetoxy-17α-hydroxy-16β-bromo-5α-pregnan-11, 20-dione, crystal and mol. structure 8=26459
acetylacetone, spectra and electronic structure 8=47651
acetyl chloride, gas phase and matrix photolysis 8=43419
acetylcholine and related mols. crystal structure 8=26460
acetylcholine ionic environment in the chemical transmission of nerve impulses 8=28201
acetylene-air flame, intensified by discharge, activation energy of origin of excited radicals OH, CH and C_2 8=45359
acetylene, and acetylene-methane mixtures, ion-mol. reactions 8=49852
acetylene and organic mixing gas in analyzer cell for spectra 8=49986
acetylene, combustion in shock waves, source of schlieren signals 8=49886
acetylene, cryst., i. r. and Raman spectra 8=27618
acetylene, flame, Cu conc., linear absorpt. method 8=27790
acetylene in solution, i. r. absorption band widths 8=34867
acetylene, ionization Frank-Condon factors 8=29982
acetylene. mol., two-centre calcs. 8=47632
acetylene monoderivatives, C ≡ C group oscillation and absorpt. band calc. 8=34300
acetylenes, monosubstituted, C ≡ C bond vibr. freqs. and absorpt. band intensities, calc. 8=34299
acetylene, monosubstituted, solns., C ≡ C group absorpt. band intensity rel. to intermol. H-band form. 8=34301
acetylene, reactions with 0. 5-1200keV positive ions 8=43491
acetylene-t_2, vibr. rot. spectrum 8=25529
acetylene, triplet states, by electron impact 8=34302
acid fluoroanhydrides, F^{19} n. m. r., chemishift variations 8=47696
acid-water-tricresylphosphate systems, liq-liq. equilibrium 8=25883
aconitase substrate, potassium dihydrogen isocitrate crystal structure 8=26462
acridine-biacetyl-benzene solns., triplet acridine form. by triplet biacetyl energy transfer, obs. 8=25925
acridine dyes in 2-chloroethanol, T* ← S bands in absorpt. spectra 8=30494
acridine, photoreduction in alcohols 8=32137
acridine, reactive state in photoreduction in ethanol 8=41284
acridines, cryst. and in soln., absorpt. spectra in polarized light 8=32042
acridizinium cpds., elec. cond. 8=49273
acrolein, photodissoc. 8=32135
acrylamide, γ-irradiated aq. solns, 77°K, e. s. r. 8=30524
acrylic acid, microwave spectra of rotational isomers 8=34303
acrylonitrile-metal complexes, i.r. spectra 8=38865
acryloyl fluoride, microwave spectrum 8=38864
acyclic methine group, n. m. r. proton chem. shifts 8=25636
2-acyl-1, 3-diketones, MO LCAO calcs. of electronic spectra 8=25588
adamantane crystal self-diffusion, n.m.r. and plastic-flow obs. 8=39988
adamantane, solid, phonons, torsons and rotational diffusion 8=35397
adamantane, van der Walls interactions and mol. crystal packing 8=35050
adenosine-3′-phosphate dihydrate, crystal and mol. structure 8=35361
adsorption on Zn electrodes, pot. vars. 8=36601
L alanine, deuterated, deuteron n.m.r. 8=31894
dl-alanine, γ-irradiated, optical annealing investigation by e.s.r. 8=44400
alanine soln., permittivity meas. below 1 MHz 8=28452
alcohol-aliphatic hydrocarbon solns, H bonding entropy and enthalpy, and ratio of molar vols. 8=43799
alcohol, H isotope exchange with mercaptan 8=36545
alcohol, u.s. dispersion of insoluble particles, obs. 8=39442
alcohols, as solvents for Hg 8=48071
alcohols, dielectric dispersion meas. using helix resonator 8=39405
alcohols, hydrogen bonding 8=48059
alcohols, liq. radiolysis, reactions of electrons 8=49964
alcohols, liq., solubility of inert gases, heats of evaporation and enthalpy 8=39319
alcohols, lower aliphatic, photoionization 8=47793
alcohols, n-long chain, monomol. films surface viscosity rel. to phase transitions, 15-30°C 8=30428
n-alcohols, rotary mobility, effect of Li^+ and Cl^- ions 8=34778
aliphatic amines, fundamental vibrs. calc. 8=38866
aliphatic ethers, i. r. and Raman spectra 8=29777
aliphatic ketones, electronic absorpt. spectra 8=32045
aliphatic mononitriles, i. r. spectra 8=38867
n-alkane mixture, adsorption 8=48102

Organic compounds—contd
n-alkanes, cohesive and adhesive energies, calc. 8=43779
alkanes, gaseous, light scattering, depolarization meas. 8=43694
n-alkanes in soln., diffusion coeffs. calc. 8=30452
ortho-alkoxyphenylhydrazones of trimethylene sulphone, dipole moments obs. in solutions 8=38868
alkyl aromatics, radiationless decay 8=32072
alkyl-(aryl)-chlorosilanes, thermal cond. obs. 8=48131
alkyl derivatives of benzene, photoisomerization 8=49949
alkyl-Hg(II) cpds., vibr. spectra 8=43350
alkyl phosphonates, P=O-group valence oscillation calc. 8=30618
alkyl radicals, spin density distrib. calc. 8=43416
alkyl radical, spin density distrib. unrestricted Hartree-Fock calc. 8=43417
alkylbenzenes, symmetrically substituted, dipole moments and dielec. relax. 8=34890
alkylferrocene, e. s. r. spectra 8=47680
alkylphenols, 5-component, i.r. spectroscopic analysis 8=34350
alkylpyridine complexes of transition metal cations, far i. r. spectra 8=29763
allene-h_4 and-d_4, vibr. rot. transitions from i. r. spectra 8=47633
allene, rotational barrier, SCF MO calc. 8=29764
allyl alcohol, microwave spectrum 8=25533
allyl bromide, multiple n. m. r. 8=29813
allyl cyanide, microwave dipole moment obs. 8=34304
alternant hydrocarbons, pairing theorem 8=47650
alternant hydrocarbons, rules 8=25584
amine-BF_3, i.r. absorption spectra of charge transfer complexes 8=25539-40
amine extraction of U^{233} from irrad. ThO_2 8=36634
amino acids, e.s.r. of free radicals in γ-irrad. crysts. 8=40907
amino acids in aq. soln., dielect. dispersion at 350-4000 MHz 8=30513
amino acids in CF_3COOH and CF_3COOD, p mag. reson., 200 MHz 8=39441
amino acids, γ-irradiated, e.s.r. and optical spectral investigation of defects 8=26634
α-amino acids, γ or X irrad., e. s. r. rel. to dissociative electron capture 8=36621
amino acids, mass spectra on photoionization 8=41299
amino acids, non-carboxylic aliphatic, structure determ. by computer-controlled diffractometer 8=35362
aminobenzenes, electronic struct., ground state 8=25534
amino benzene sulphonic acids, isomeric, i. r. spectra 8=29801
aminobenzoic acids, fluorescence quenching by dinitrobenzenes, 8=43846
o-aminobenzoic acid, mol. struct. by phase determ. and X-ray obs. 8=43359
α-aminoethylphosphonic acid, i. r. spectrum 8=47666
1, 2-0-aminoisopropylidene-α-D-glucopyranose, mol. conformations from crystal structure 8=25623
aminomethoxypyridine, u. v. absorpt. spectra 8=34356
aminopyrodines and deuterated analogues, i.r. spectra 8=43391
aminopyridines, fluoresc. 8=48169
p-aminosalicylicacid, epitaxy on quartz 8=48571
ammonium bis-μ-(d-tartrato)-distibate (III) crystal structure 8=39848
ammonium formate, crystal structure rel. to H bonding 8=26528
ammonium hydrogen monochloroacetate. n.q.r. 8=49668
ammonium oxalate, electro-optical effects 8=36442
ammonium oxalate, non-linear optics 8=36443
ammonium pentaborate, second harmonic of light production 8=41167
amphiphile aqueous liq. cryst. solns., structs. for M_1, M_2. V_1 and V_2 phases 8=30408
amphiphiles, lamellar solns., birefringence sign reversal 8=25919
amyl and isoamyl alcohol, refractive index, density and viscosity temp. derivatives 8=34803
amyl-alcohol, scatt. cross-section meas. 8=48065
aniline adsorbed from CCl_4 soln on Cab–O–Sil silica, i.r. spectra 8=48474
aniline, depolarized doublet of light scatt. from thermal shear wave 8=43817
aniline, dielec. relax. 8=43856
aniline, electronic struct., excited singlet states 8=25534
aniline, ht. of mixing in polar solvents 8=34821
aniline, nanosec. pulse radiolysis 8=49978
aniline solns., u.s. velocities, compressibilities 8=30469
anilines, ring-substituted, corrosion inhibition of Fe in H_2O 8=45377-8
p-(anisalamino)-phenyl acetate liq. cryst., elec. field effect on n. m. r. 8=34924
anisole, dielec. relax. 8=43856
anisoles, dielectric absorption and internal rotation in non-polar solvent 8=43859
anisol-nitrobenzene system, complex formation from spectral analysis 8=45347

Organic compounds—contd
anthracene, α-radiation damage studied by etching in benzene. 8=48826
anthracene, band gap from electron photoemission threshold energies 8=44640
anthracene, band structure determ. from e-photoemission of alkali-metals into anthracene 8=31283-4-5
anthracene blue fluorescence from triplet-exciton interaction magnetic field effects 8=41223
anthracene, carrier generation and transport under electron bombard 8=49084
anthracene, charge-transfer exciton and ionic levels 8=27254
anthracene, CH-bond moments 8=34343
anthracene, conduction band structure from photoemission 8=44639
anthracene, cryst growth from vapour with uniform distrib. of tetracene 8=30823
anthracene, crystalline, photo-ionization 8=31267
anthracene, crystalline, triplet exciton phosphorescence 8=27665
anthracene crystals, work hardening 8=26855
anthracene, current carriers mobilities, temp. depend 8=31396
anthracene in cyclohexane, nanosec. pulse radiolysis 8=32141
anthracene, Daydov splittings of intense transitions 8=35048
anthracene derivatives, electrical conductivity and optical absorption 8=49144
9, 10-d_2-anthracene, CH-bond moments 8=34343
anthracene-d_2(9, 10), i. r. vibr. spectrum, 400-3100 cm^{-1} 8=38869
anthracene, dimezo substituted, 1, 2 benzanthracene composite excimers 8=49821
anthracene, dislocations, direct obs. by X-ray topography and Burgers vectors determ. 8=31074
anthracene, dispersion, absorpt. and refl. curves, and exciton phonon interact. 8=41161
anthracene, dye-sensitized photoconduction 8=49427
anthracene, α, e-excited scintillation decay obs. 8=49832
anthracene, excimer emission at v. high press. 8=49823
anthracene, excit. states decay and intersystem crossing, obs. 8=25537
anthracene, 5–100μ thickness meas. from refr. index dispersion 8=32043
anthracene, fluoresc. in host crysts. at high press. 8=49822
anthracene, fluoresc. of doped crysts. at high press. 8=49824
anthracene, fluoresc. polarization quenching data 8=43845
anthracene, hole injection by electrochemical mechanisms 8=45376
anthracene, interaction with biacetyl in visible light 8=36618
anthracene, i.r. cryst. spectra 8=49768
anthracene, low-lying triplet excit. states, 0.4–1.0μ 8=25616
anthracene, low-mobility, electron and hole generation 8=40595
anthracene, luminesc. polarization and impurity mol. orientation 8=36531
anthracene molten, u.s. velocity var. with temp. 8=30470
anthracene oil components, radiochemistry 8=49965
anthracene in n-paraffins, electronic spectra rel. to phase transitions of solvent 8=25938
anthracence-perylene in benzene solns., fluoresc. energy transfer 8=39387
anthracene, phonon freqs. from X-ray scatt. by thermal agitations 8=26577
anthracene, photo-charge carrier generation, exciton–exciton versus exciton–photon interacts. 8=31298
anthracene, photoconductivity, injection-induced long-wavelength 8=27335
anthracene, photoconductivity, mag. field effect 8=27336
anthracene photo-oxide decomp., temp dependence 8=27694
anthracene, p n.m.r., anomalies using u.v. and blue light 8=40973
anthracene, polarization of triplet-triplet absorpt. 8=27621
anthracene $S_0 \rightleftharpoons T_1$ radiative transitions, mag. dipole contribs. calc. 8=25545
anthracene, scintillation pulses excited by α bombard., temp. pressure depend. 8=36526
anthracene, scintillation response to heavy charged particles, directional anisotropy 8=46870
anthracene, singlet exciton-exciton interaction, λ=315-405nm 8=44658
anthracene singlet–triplet transitions, triplet state assignments and spin-orbit coupling 8=25536
anthracene, solid, photo-dimerization by u.v. irradiation 8=41270
anthracene:tetracene, trapping of photo-carriers 8=36030
anthracene, triplet-triplet absorpt. spectrum and extinction coeffs., 3000-8000 Å 8=25926
anthracene triplet-triplet annihilation rate consts., flash photolysis meas., 430-553°K 8=25535
anthracene, two-photon absorpt. in cryst. and molecule 8=45237
anthracene vapours, fluorescence spectrum fine structure 8=47634

Organic compounds—contd
anthracene, Wannier excitons 8=26918
anthracene, X-ray excited, prompt and delayed fluoresc. 8=27666
9-anthraldehyde dimer, crystal structure 8=44263
anthranilic acid, crystal structure by X-ray diffraction 8=26464
9,10-anthraquinone and derivatives, emission spectra 8=43392
9,10-anthraquinone crysts., photoconduction 8=36031
anthraquinone mixed with superconducting metals, crit. temp. increases 8=27005
anthraquinone, optically induced Overhauser effect 8=48210
antifurfuraldoxime, crystal structure 8=26512
aromatic, γ-irrad. radical yield, e.s.r. obs. 8=49967
aromatic, photoelectron spectra and inner ionization pots. 8=34297
aromatics, polycyclic, vapour absorpt. spectra and ionization pots., 1120-3000Å 8=38860
aromatics $S_0 \rightleftharpoons T_1$ radiative transitions, mag. dipole contribs. calc. 8=25545
aromatics, triplet state lifetimes, delayed fluoresc. obs. 8=25610
aromatics, triplet-state lifetimes, effect of partial deuteration 8=34306
aromatic carbonyl cpds., perturbation of singlet-triplet transitions 8=34296
aromatic diterpenes, mass spectrometric studies 8=32152
aromatic free radicals, g-factors, precise meas. and correlation with π-orbital energies 8=47708
aromatic heterocycles, five-membered, C^{13} n.m.r. 8=47697
aromatic hydrocarbon crysts., triplet factor group states 8=27622
aromatic hydrocarbon solns, p-type delayed fluoresc. 8=30498
aromatic hydrocarbons, anharmonic contrib. to radiationless transitions 8=43342
aromatic hydrocarbons, diffusion in H_2O 8=48118
aromatic hydrocarbons, effect of alcoholic solvents on fluoresc. yield 8=48171
aromatic hydrocarbons in glassy soln., e.s.r. line shape rel. to triplet excitation 8=40902
aromatic hydrocarbons in glassy solns., phosphorescent e.s.r. spectra, dynamic effects in line-shapes 8=49596
aromatic hydrocarbons in soln., free carriers from triplet-triplet collisions 8=48201
aromatic hydrocarbons, liqs. in soln, and solid, charge injection 8=30518
aromatic hydrocarbons, localized benzene-like regions 8=47635
aromatic hydrocarbons, luminesc., oxygen quenching 8=48170
aromatic hydrocarbons, mixed crysts., orientation effects 8=27623
aromatic hydrocarbons, phosphoresc. triplet decay, high press. effects 8=49825
aromatic hydrocarbons, radiationless triplet decay and intersystem crossing, Franck-Condon factors 8=25527
aromatic hydrocarbons, solvent Stark effect and spectra shifts 8=39375
aromatic hydrocarbons, triplet state form. efficiencies 8=43832
aromatic mols. phosphoresc., paramag. reson. effects rel. to singlet-triplet admixing 8=27461
aromatic molecules, superconducting-type pair correlations 8=47636
aromatics in soln., delayed luminesc. and triplet quantum yields 8=25941
aryldiazonium cations, electronic structure 8=34363
aryl ketone-iodine complexes, spectra 8=43353
aryl-Hg(II) cpds., vibr. spectra 8=43350
aryl phosphates, P=O-group valence oscillation calc. 8=30618
aryl phosphonates, P=O-group valence oscillation calc. 8=30618
aryl sulphanilides, n-substituted, i.r. spectra 8=34307
azamerocyanines, optical polarizability 8=34851
azanologues of benzenoid hydrocarbons, polarization of electronic transitions 8=25548
azaporphyrin ion structures 8=34308
azaridines and N-deutero derivs., i.r. spectra and structure 8=34309
azines, complexes with Cd, Hg and Zn, prep. and infra-red studies 8=36432
p-azoxyanisole liquid crystals optical rot. identification of two forms 8=43826
p-azoxyanisole liquid crystal, struct. constant elect. fields 8=34771
p-azoxyanisol liquid crystals, structure in permanent and variable elec. fields, X-ray study 8=25881
p-azoxyanisole, liq. crysts., thermal cond. 8=34833
p-azoxyanisole, liq. crystal, X-ray structural in strong mag. field 8=39309
azoxybenzenes, liq. cryst., sound velocity and absorpt. and phase transforms 8=25882
azulene derivatives, anomalous emission spectra 8=43354

Organic compounds—contd
azulene, elec. field broadening of electronic transition 8=45238
azylene, molecular spectrum 8=34310
barium inosine-5′-phosphate, crystal structure 8=44265
1,2 benzanthracene, dimezo substituted-anthracene, composite excimers 8=49821
1,2-benzanthracene, triplet absorpt. and form. yield meas. 8=25401
benzene, adsorpt. on Aerosil, i.r. spectra 8=44076
benzene and deuterobenzenes, new force consts. 8=38871
benzene and its derivatives, spectra obs. 8=48172
benzene-carbon tetrachloride, shock-compressed liquid, brightness temp. measurement and P-T curves 8=48089
benzene, catalytic hydrogenation, effect of intraparticle temp. grads. 8=32121
benzene, CNDO calc. of electronic spectra 8=29767
benzene, condensed-pair and separated-pair models calc. 8=38870
benzene, crystalline, lattice energy in atom-atom approx. 8=35395
benzene, crystalline, quantitative obs. of optical obs. spectra 8=36435
benzene, cryst., $^1B_{2u}$ state, 4th forbidden factor group component 8=40266
benzene, crystal lattice energy and intermolecular potential 8=35396
benzene, cryst., electronic and vibr. exciton struct. 8=49115
benzene, cryst. exciton band, expt. determ. 8=31299
benzene cryst., interaction of two excitons 8=49114
benzene, cryst., Raman spectrum 8=27628
benzene crysts., site group splitting and orientational effects 8=27627
benzene-cyclohexane, electronic spectra of solid solns. 8=27624
benzene-cyclohexane mixtures, surface tension 8=44068
benzene derivatives, crystalline polysubstituted, study by several physical methods 8=49629
benzene derivatives, liq., light scatt. 8=34849
benzene derivatives, Raman spectra at 80°K 8=47637
benzene, deuterated, deuteron spin lattice relaxation 8=48217
benzene dimers, semiempirical MO calc. 8=34313
benzene, disubstituted, intramol. vibrations at l.f.s., calcs. from model 8=34317
benzene, effect of dissolved H_2O on current transport 8=30523
benzene, effect of solvents on u.v. spectra 8=34870
benzene, energy transfer in isotopically mixed crysts. 8=27668
benzene, enthalpy of mixing with CCl_4 8=39348
benzene evaporation rate in vacuum 8=39480
benzene, excited states, AMO calc. 8=34314
benzene, gas phase irrad., formation of fulvene 8=49950
benzene, gaseous, radiationless e relax 8=25546
benzene-halogen complexes, electrostatic contribs. to ground-state props. 8=29768
benzene + n-heptane system, excess isothermal compressibility and molar heat capacity 8=43794
benzene-hexane mixtures, adsorption isotherms 8=30782
benzene-hexane mixtures, adsorption rates 8=30783
benzene, higher excimer states 8=34872
benzene, highly polarized Raman lines, effect of intermolecular interactions on line shapes and depolarization factor 8=34858
benzene, in inert-gas matrix, higher excited states 8=49770
benzene isotopic mixed crysts., phosphorescence, fluorescence and absorpt. spectra 8=49771
benzene isotopic mixed crysts., trap-trap triplet energy transfer 8=36527
benzene, isotopic mixed crysts., triplet-triplet annihilation and delayed fluoresc. 8=41225
benzene, liq. and solid, intermolec. rotation from n.m.r. data 8=43963
benzene, liq., charge carriers, natural, mobility determ 8=43863
benzene liquid, i.r. stimulated emission at 5μ by phonons obs. 8=43828
benzene, liquid, proton spin-lattice relaxation 8=39429
benzene, liq. struct. from x-ray diffrn. 8=34764
benzene, liq. → solid transform., high pressure study 8=26327
benzene, long transversal relax. time, obs. using spin-echo technique 8=48218
benzene, matrix-isolation spectrum, temp. depend. 8=29769
benzene mols. adsorpt. effect on n.m.r. or surface OH groups 8=38923
benzene with Na atoms, absorpt. spectrum at 55-100°K 8=49769
benzene/NaCl system, proton relax. time 8=45114
benzene, nanosec. pulse radiolysis 8=49979
benzene, normal coords. for planar vibrs. 8=29766
benzene, orthobaric data near crit. pt. 8=34956
benzene, oscillator strengths for electronic spectra 8=29780

Organic compounds—contd
benzene, phosphoresc. decay, deuteration effects 8=49826
benzene photochemical oxidation in gas phase, free radical formation 8=41286
benzene, polyalkyl substitutes of, electronic u.v. absorption spectra 8=41162
benzene quinoline and phenol soln., complex form 8=25887
benzene ring substituents, spectroscopic consts. calc. 8=34311
benzene, singlet and triplet π electron states 8=25543
benzene $S_0 \rightleftharpoons T_1$ radiative transitions, mag. dipole contribs. calc. 8=25545
benzene, scattering of ruby laser emission, large angle 8=48158
benzene, SCF-MO-LC(LCGO) calc. 8=47624
benzene, shock wave compressed, refr. index obs. 8=39370
benzene sorbed on silicagel, proton relaxation, temp. depend. 8=49632
benzene, spin-lattice relax., press. depend. 8=39432
benzene, stimulated temp. light scatt., obs. 8=30481
benzene, sublimation energy 8=39495
benzene sulphochlorides, vibrations resonance interaction 8=47639
benzene, supercooled glassy, and polycrystalline states, Mossbauer obs. of mol. motion 8=43751
benzene, theory of cryst. spectra 8=49772
benzene to diacetyl triplet-triplet energy transfer in solns., obs. 8=34316
benzene, vapour fluoresc., press. depend. 8=47640
benzene, vapour fluoresc., yields below 0.1 torr 8=47641
benzene, viscosity, gaseous state 8=25835
benzenes, chlorinated, nonplanar group vibrs. 8=38872
benzenes, F-substituted, ionization potl. calc. 8=43868
benzenes, methyl-substituted, SCF-MO calc. 8=38897
benzenes, monosubstituted, CNDO SCF calcs. 8=25547
benzenes, monosubstituted, correl. of i.r. intensities with chem. reactivity 8=43253
benzenes, mono-substituted, dielec. relax. and enthalpies of activation 8=34889
benzenes, monosubstituted, p.m.r. 8=43407
benzenes, substituent effects on l.f. vibrs. 8=47642
1, 2-benzocoronene, triplet absorpt. and form. yield meas. 8=25401
benzodioxane-1, 4, O-substituted, luminescence spectra 8=48173
benzodioxane-1, 4, solvent effects on absorpt. spectrum 8=39376
benzodioxane-1, 4, 6-substituted, action of substituent structure on electronic spectra 8=47638
benzoic acid, H-bridge complexes, thermodyn. props. from u.v. absorpt. spectra 8=39349
benzol, double light scattering near critical point 8=48147
benzol, heat transfer in boiling rel. to state of heating surfaces 8=35001
benzonitrile-acetonitrile mixture, dielec. relax. 8=43856
benzonitrile, Brownian rotatory motion rel. to dipole-dipole intermol. forces in vibr., 8=43827
benzonitrile-propitrile mixture, dielec. relax. 8=43856
1, 12-benzoperylene at 4°K, line-width obs. in quasiline fluorescence spectrum 8=49827
1, 12-benzoperylene quasiline fluoresc. line-widths temp. depend., 4-175°K 8=36528
benzophenone, assignment of lowest triplet state of C = O group 8=25560
benzo phenone, luminescence at 77°K 8=41224
benzophenone, polarized absorpt. spectra 8=27630
benzophenone singlet–triplet transitions, triplet state assignments and spin-orbit coupling 8=25536
benzophenone + trichloroacetic acid mixture, dielec. props 8=48190
p-benzoquinone and derivatives, emission spectra 8=43392
p-benzoquinone, 2, 5-dihalogen derivs crystal structure 8=26466
p-benzoquinone, effect of solvents on u.v. spectra 8=34870
p-benzoquinone (H_4) and $(D)_4$, electronic spectra of crysts. at 4°K 8=27626
p-benzoquinone, n. m. r. oriented in nematic phase 8=34913
p-benzoquinone, n. m. r. spin coupling constants, calc. using σ M.O. theory 8=47690
n-benzoquinone, on TlI, surface charge-transfer groups form., obs. 8=36028
1, 4-benzoquinone radical in soln., e. s. r. spectral linewidth alterations, 20-80°C 8=47681
benzothiophenes, mol. orbital calcs. 8=43355
1, 2-benzotriazole, in acetone, p mag. reson. conc. depend., obs. 8=39420
4-benzoyl-amino stilbene derivatives, spectra on quasi-atomic chromosphere systems 8=47643
benzoyl thiophine, deformation angle determ. 8=34371
1, 12-benzperylene in crystalline n-paraffin soln., quasi-line spectra, temp. broadening, shift and line profiles 8=45240
benzpyrene in crystalline n-paraffin soln., quasi-line spectra, temp. broadening, shift and line profiles 8=45240
benzyl and substituted benzyltin cpds., i. r. spectra 8=29765
benzyl radical, assignment of excited states by three-step photoselection 8=25542

Organic compounds—contd
benzyl radical, polarization of vibronic transitions 8=25549
benzyl, vibrational frequencies 8=43361
betol, crystallization kinetics rel. to active impurities and centres 8=39667
biacetyl, fluorescence spectrum at 100°C, vibrational analysis 8=43347
bigeranyl tetrahydrochloride, triclinic, crystal and mol. structure 8=39827
binaphthyl, crystal structure and bond distances 8=26470
biphenyl in cyclohexane, nanosec. pulse radiolysis 8=32141
biphenyl, fundamental freqs., normal coords. 8=34349
biphenyl, solid soln. in cyclohexane, delayed fluoresc. 8=36529
biphenyl, vibr. spectrum and molec. config. 8=34348
biphenyl, vibr. symmetry coords. 8=43376
biphenylene, i.r. spectra 8=29770
biphenylene, electron impact and thermal fragmentation 8=39058
biphenylene, electronic spectra 8=27636
biphenylene, positive and negative ions, C^{13} hyperfine splittings 8=47650
bipyridil, α, α' and γ, γ' conjugations in cryst. and liquid states, Raman obs. 8=34355
2, 3-bis-(cis-chloro-1-methylcyclohexyl)-trans-2-butene, crystal and mols. structure 8=39830
bis(dimethylamine) boron chloride, crystal structure 8=39771
4, 4′-bis(dimethylamino)diphenylamine dihydro iodide, unit-cell dimensions and space group 8=26498
4, 4′ and 4, 2′-bis (α, α-diphenyl-β-hydrazyl)-3, 3′, 5, 5′-tetranitro diphenyl sulphones, e.s.r. 8=49595
bispiperidinium $Bi^{III}Br_5$, cryst. struct. 8=26546
bis(tetrahydroindenyl)Fe:tetracyanoethylene, d. c. resistivity rel. to press. and elec. field 8=27078
1, 4-Bis (2, 2, 6, 6-tetramethyl-4-hydroxy-4-piperidyl-1-oxyl) butadiene, stability up to 144°C 8=39417
bis(α-thiopicolinanilido)Cu(II), isotropy of hyperfine struct. from N atoms 8=27463
N, N′-bis(4-tolyl)-p-phenylenediamine iodide, crystal structure 8=26543
bis(trifluoromethyl)-peroxide, i.r. and Raman spectra 8=43366
bitumen and components, crystalline structure 8=48516
boroxine and trialkyl derivatives, aromaticity 8=47644
α-brassylic acid, crystal structure 8=26478
bromobenzaldehydes, i.r. absorpt. spectra 8=43834
bromobenzene, deuterated, deuteron spin lattice relaxation 8=48217
bromobenzene, liquid, proton spin-lattice relaxation 8=39429
p-bromo-benzoyldimethylamine, amido group structure 8=26465
bromocyclobutane, and 3 isotopic species, spectra and structure 8=29771
bromocyclobutane, i.r. and Raman spectra 8=25566
12α-bromo-11β-hydroxyprogesterone, crystal and mol. structure 8=39828
n-bromophenylsulphonyl chloride, i.r. absorption spectra in polarized light 8=41169
trans 1-bromopropylene, microwave spectrum 8=25550
bromostyrenes, liq. isomeric, i.r. absorpt. spectra 8=43841
2-bromo-2-p-tolylethyldimethylammonium bromide, crystal structure 8=26510
1-bromotriptycene $BrC_{20}H_{13}$, crystal and mol. structure 8=44266
5-bromouridine and dimethylsulphoxide 1:1 complex crystal and molecular structure 8=26471
bullvalene, crystal structure 8=39829
1, 3-butadiene, photodissoc. 8=32135
1, 3-butadienes, n.m.r. and conformations 8=38918-20
butane, charge transfer from p and H atom, cross-sections 8=38737
n-butane ionizing collisions and electron mean free paths obs. at 10^{-4} torr 8=34458
butane, reactions with H_3^+ 8=39057
n-butane 10^{-4} due to electron collision, calc. of mean free path 8=34458
t-butanol, gaseous, liquid and solid; absolute scatt. coeffs. of Raman spectral lines 8=43360
1-butanol-water system, nucleate boiling obs. 8=25998
butanone-2-oxime, association in various solvents 8=43763
1-butene, photodissoc. 8=32135
3-butenenitrile, vibr. spectra and rot. isomerism 8=25551
2-butenes, cis-trans isomerization, benzene photosensitization 8=49959
2-butenes, cis and trans, vibr. spectra 8=25552
2-butenes, n. m. r. and steric effects 8=47698
n-butyl alcohol, refractive index, density and viscosity temp. derivatives 8=34803
n-butylamine and N-deutero derivative, i. r. and Raman spectra 8=27620
n-butyl chloride, h.p. viscosity obs. 8=34793
butyl chloride (tertiary), liq. and cryst., far i.r. spectra 8=32044
butyl formate, dipole moment in dil. benzene, comparison with chloroformates, rel. to configs. 8=25555
butyl phthalate oil manometers, correction for variations in room 8=32646

Organic compounds—contd
  calcium dipicolinate trihydrate crystal structure 8=26473
  calcium hexa-antipyrine perchlorate, crystal and mol. structure rel. to other metal salts 8=44268
  carbamide phosphate, crystal structure 8=26475
  carbon tetrachloride, adsorpt. on graphite 8=48473
  carbon tetrachloride, high polarized Raman lines, effect of intermolecular interactions on line shapes and depolarization factor 8=34858
  carbon tetrachloride, i. r. spectrum, difference bands 8=38874
  carbon tetrachloride, liq., charge carriers, natural, mobility determ. 8=43863
  carbon tetrachloride, neutron diffraction 8=34761
  carbon tetrachloride, shock-compressed liquid, brightness temp. measurement and P-T curves 8=48089
  carbon tetrafluoride, octopole moment, from virial coeffs. 8=29849
  carbon tetrafluoride, rotational spectrum, collision-induced 8=47658
  carbonium ions, electronic struct. 8=38876
  carbonyl containing, vapour n ← π* luminescence in vapour 8=34199
  carbonyl group of semicarbazides, semicarbazones and pyrazolecarboxamides, i.r. absorption 8=47645
  carbonyl n → π* transitions, direction of polarization 8=27630
  carborane and derivs. gas e-diff. study 8=25553
  carboxylic acids, H-bonding, i.r. data 8=25554
  Carnauba wax thermoelectret, heterocharge on ionic addition 8=44879
  β-carotene, effect of adsorbed gases on semicond. 8=31397
  carotene films, effect of gas adsorpt. on absorpt. spectra 8=49773
  cellobiose, crystal structure confirmation 8=39838
  cellobiose frozen aqueous solutions, e. s. r. of free radicals 8=47707
  cellulose acetate films, i.r. spectra 8=32048
  cellulose derivatives, e absorpt 8=36436
  cellulose ethers, etherification from i.r. absorpts. obs. 8=27728
  cellulose, $KHCO_3$ contaminated, thermogravimetric and diff. thermal anal. 8=32095
  cellulose nitrate, etchable track formation 8=44492
  cellulose, permittivity and dielectric loss, optical meas with colloidal mass emitter 8=28766
  cellulose propylene phosphite, structure, transformation 8=38966
  α-cellulose, pyrolysis and decomp., reaction kinetics 8=32094
  cellulose sulphoester solns., optical anisotropy and molec. rigidity 8=34850
  cetyl alcohol, negative resistance between metal electrodes 8=40632
  charge-transfer and H-bonded complexes, spectra, internal compression effects in solvents 8=34864
  charge-transfer complexes, crystal structure and solid-state spectra 8=26166
  chars, O^{18}-labelled, i.r. spectra rel. to 1600cm^{-1} band origin 8=43345
  chloralkanes vibr. spectra and C-Cl charact. freqs. rel. to struct., calc. 8=34354
  n-chloranil, on TlI, surface charge-transfer groups form., obs. 8=36028
  chlorinated diphenyls, ion purification 8=45310
  α, β-chlorine naphthalene, vapour and soln. at 77°K, u.v. absorpt. spectra 8=32047
  chloroacetyl DL-alamine, e.s.r. of irrad. crysts. 8=36240
  chloroaniline, o, m and p, in benzene, dielec. props. temp. variation at microwave freqs. 8=48181
  1-chloroaziridine, microwave spectrum and struct. 8=25556
  m-chlorobenzene, ^{1}H-^{1}H coupling constants 8=25641
  chlorobenzene in p-xylene; permittivity. complex: calc. from CWCN maser meas. 8=48179
  chlorobenzene, stimulated Mandel'shtam-Brillouin scatt. threshold, 0.35, 0.69 and 1.06μ 8=32032
  chlorobenzenes, effect of D substitution on Cl n. q. r. 8=27517
  chlorobenzenes in rigid solns., polarization of phosphoresc. 8=27669
  p-chlorobenzonitrile, i.r. absorpt. spectrum 8=43357
  p-chlorobenzonitrile, near-u.v. absorpt. spectrum 8=43357
  chlorobenzotrifluorides, electron absorpt. spectra 8=43358
  3-chloro-5-(3-dimethylaminopropylidene)-5H-dibenzo[a, d]cycloheptane, structure 8=26487
  2-chloroethanol, microwave spectrum 8=25557
  bis-β-chloroethyl-vinyl-phosphonate, γ-induced polymerization, mechanism, obs. 8=49913
  cis-1-chloro-fluoropropene, microwave spectra and molec. consts. 8=34320
  chloroform, orthobaric data near crit. pt. 8=34956
  chloroformates (alkyl and phenyl), dipole moments in dil. benzene, and configs., comparison with butyl formate 8=25555

Organic compounds—contd
  chloromethanes, X-ray emission spectra 8=47653
  o-chlorophenol binary liq. mixtures, excess u.s. absorpt. 8=34842
  chlorophyll, fluoresc. polarization quenching data 8=43845
  chlorophyll-ligand interactions, from n. m. r. 8=29850
  chlorophyll, optical transitions, anisotropy 8=34258
  2-chloropropene-1, 3-d,, internal rot. and vibr. 8=25558
  2-chlorotropene, crystal and mol. structure 8=26476
  cholesteric liq. crystals, optical rotatory power, theory 8=43812
  cholesteric liquid crysts., phase change elec. field induced, 10^5 V/cm 8=34766
  cholesteric liquid crystals, structure distortion by a mag. field 8=30407
  cholesteryl, and derivs., liq. crysts, dielec. props. 8=34893
  cholesterol derivatives, liq. cryst. struct. 8=48069
  cholesterol film, negative resistance between metal electrodes 8=40632
  cholesterol-type liq. cryst., light scattering meas. 8=25882
  cholesteryl 2-(2 ethoxyethoxy) ethyl carbonate Brillouin scatt., 20-60°C 8=48146
  cholesteryl 2-(2-ethoxyethoxy)ethyl carbonate, liq. crystal, refractive index obs. 8=30482
  chromophores, intramolec. energy transfer between triplet states 8=41157/8
  chromophores, u. v. soln. spectra and solvent interactions 8=25927
  chrysene, CH-bond moments 8=34344
  chrysene, delayed luminesc., growth and decay 8=32073
  chrysene, low-lying triplet excit. states, 0.4-1.0μ 8=25616
  chrysophane oxides, N-derivatives, i.r. and u.v. 8=36437
  cinnoline, vapour spectrum 8=25559
  coal, 7 types; magnetic susceptibilities obs. 8=49478
  cobaltocene: tetracyanoethylene, d. c. resistivity rel. to press. and elec. field 8=27078
  complexes, electron donor-acceptor. gas-phase spectra 8=38905
  complexes, monomeric charge-transfer, review of elec. props. 8=26942
  conducting and semiconducting, properties and applic. 8=49271
  copper acetate hydrate, proton relax. of methyl group at low temps. 8=45109
  copper formate tetrahydrate, d.m.r. and molec. struct. 8=49638
  copper formate tetrahydrate, paramag. line width 8=36242
  copper monochloroacetate 2.5 hydrate, unit cell dimensions and density obs. 8=44270
  coronene in cryst. matrices, effect of thermal treatment on spectra 8=45242
  coronene in n-paraffins, elecronic spectra rel. to phase transitions of solvent 8=25938
  corrin analogue, synthetic, spectrum and electronic struct. 8=25561
  corrin skeleton of vit. B_{12}, and its precorrinoid intermediate crystal structure 8=26479
  cosin, luminescent centres, relax. of local time 8=39388
  cryptocyanine, alcohol soln., optical width var. during laser giant pulse generation 8=25921
  cryptocyanine solns., laser-flash spectra 8=48162
  crystal and mol. struct. from triplet states mag. reson. spectra 8=27449
  crystal growth, from vapour phase, technique 8=39662
  crystal growth rate retardation in capillaries 8=26261
  crystal solns., optical excitation by ruby laser pulse 8=30479
  crystal violet films, photocapacitance and photocurrent "memory" 8=36032
  in crystalline phases, i. r. spectroscopy rel. to dielec. constant transitions 8=27617
  crystals, polymorphic transform. process 8=26090
  cumene, h.p. viscosity obs. 8=34793
  cumene, structure determ. by gas e-diffr. rel. to nature of conjugating system 8=25587
  cyanoacetylene, direct l-type doubling transitions 8=34323
  cyanoanthracene solns., vitrous, optical absorpt. temp-dependence 8=43823
  cyanocarbons, electron capture 8=34457
  cyanocobalamin monoacid deriv., n-diffr. study 8=25676
  cyanamide, vibr. spectra 8=48710
  cyanine dye soln., stimulated emission 8=48154
  cyclic alkanes, fragmentation of skeletal bonds in mass spectra 8=29824
  cyclic aromatic hydrocarbon radicals and ions,
  cyclic vicinal dihalogenides, vibr. spectra 8=34324
  trans-1, 3-cyclobutane dicarboxylic acid, crystal structure 8=26484
  cyclobutanol, i.r. and Raman spectra 8=25566
  cyclobutanone-2-t, vibr. excited photodecomp. 8=41288
  cyclobutyl monohalides, conformational behaviour 8=25563
  cyclohexane, liq. and in soln., vac. u. v. photolysis 8=27763
  cyclohexanol, h.f. u.s. wave delay time meas. by phase comparison method 8=44314
  trans-1, 2-cyclohexylenedinitrolotetraacetic and solns., 5≤pH≤14, n. m. r. obs. 8=30537
  cyclononanone, polymorphism study by X-rays, n. m. v. and diffr. thermal anal. 8=30714

Organic compounds—contd
cis, cis, cis, -1, 4, 7-cyclononatriene $AgNO_3$ adduct crystal and mol. structure 8=26485
cyclooctane analogues, crystal structure and ring conformations 8=26483
cyclooctanone, crystalline, crystal and mol. props. of phases rel. to disorder 8=26091
cyclooctanone, polymorphism study by X-rays, n. m. v. and diff. thermal anal. 8=30714
cyclooctatetraenyl radical anion, electronic spectrum 8=25658
cycloparaffin hydrocarbons, diffusion in H_2O 8=48118
cyclopentadienyl anion, SCF-MO-LC(LCGO) calc. 8=47623
cyclopentadienyl iron sulphide, crystal and mol. structure 8=26537
π-cyclopentadienyl molybdenum tricarbonyl chloride, crystal structure 8=26488
cyclopentene, far i. r. spectrum and ring puckering 8=34325
cyclopentene, rot.-vibr. interaction and barrier to ring inversion 8=38878
paracyclophanes, substituted, hindered rot. 8=34326
cyclopropane, SCF-MO-LC(LCGO) calc. 8=47625
cyclopropane-H_6, i.r. spectra 8=43363
cyclopropanecarboxaldehyde, microwave spectrum 8=25562
cyclopropane ring systems, anisotropy of diamag. susceptibility 8=25619
cyclopropanes, symmetry species correl. and group freqs. 8=25564
cyclopropanone, microwave spectrum 8=29774
cyclo-propene, -1, 2-d_2, Raman, vapour and solid phase i.r. spectra obs. 8=43362
cyclotetratriacontane, and mol. structure 8=39831
L-cysteine, crystal and mol. structure 8=44271
cytochrome c, Mössbauer spectra of Fe atom 8=48331
decylhexaoxyethylene glycol monoether + water systems, heat of mixing obs. 25°C 8=48126
dehydro-α-lapacone, double n. m. r. 8=29810
demissidine hydroiodide, $C_{27}H_{46}INO$, crystal structure 8=26489
deoxycholic acid clathrates with naphthalene phenanthrene and benzanthracene structures 8=26491
desoxyribonucleotide complexes with Fe, p. m. r. 8=43880
diacids, saturated aliphatic, crystal structure comparative study 8=26494
diacetyl sensitized luminesc., benzene and toluene triplet-triplet energy transfer, obs. 8=34316
N, N-di-sec-alkyl amides, slow rot. around alkyl-N bond 8=38927
dialkyl disulphides, vibr. spectra 8=43349
dialkyl ketones, protonated, (dialkylhydroxycarbonium ions), proton spectra mag. reson. spectra 8=38907
4, 4′-di-n-alkyloxy azobenzenes, principal molec. polarizabilities 8=48068
dialkyl sulphides, electronic spectra 8=29762
dialkyl-Tl(III) cpds., vibr. spectra 8=43351
diaryl disulphides, vibr. spectra 8=43349
diazines, CNDO calc. of electronic spectra 8=29767
orthodiazines, electronic states and radiationless processes 8=27667
diazonium salts in acid soln., photodecomposition quantum yields 8=45397
diazonium salts, $o\text{-}CH_3OC_6H_4N_2Cl.\ FeCl_3$ and $[(CH_3)_2NC_6H_4N_2Cl]_2.\ ZnCl_2$ structure 8=26492
diazulenium azulene perchlorate, X-ray analysis 8=26495
dibenzothiophene sulphone, crystal structure 8=39832
1, 3-dibenzoylacetone, spectra and electronic structure 8=47651
dibenzoylmethane, spectra and electronic structure 8=47651
paradibromobenzene-paranitrochlorobenzene solid solns., single crystal study 8=26040
1, 1-dibromo-3-fluorobutadiene-1, 3, energies of conformations, n. m. r. study 8=47631
1, 2, dibromoethane, rot. isomerism, n. m. r. study 8=47646
4, 12-di(bromomethyl)[2, 2] metacyclophane, crystal structure 8=26472
1, 4-dibromonaphthalene, electronic Zeeman meas. 8=27629
2, 6-dibromopyridine, n.m.r. of oriented mols. 8=43403
p-di-tert-butylbenzene, π e chord symmetry in crysts., 20°K 8=30648
di-n-butyl diselenide, vibr. spectra 8=43349
di-tert-butyl nitroxide, C^{13} isotopic splitting const. 8=30525
di-tert-butyl-nitroxide liq. free radical, time dependent interactions, e.s.r. and p. relaxation study 8=48207
dicarboxylic acid esters, intramol. mobility and dielec. relax. 8=43340
dicarboxylic acids, $COOH[CH_2]_{2n+1}COOH$ crystal and mol. structure 8=26478
n-dicarboxylic acids, far i.r. spectra 8=27631
n-dichlorobenzene, n.q.r., effect of pressure and temp. 8=49665
dichlorocarbene, i. r. spectrum in solid Ar 8=29775
3, 6-dichloro-2, 5-diaminobenzoquinone-(1, 4), crystal and mol. structure 8=26493
1, 2-dichloroethane, h.p. viscosity obs. 8=34793
1, 2-dichloroethane in various solvents potential barrier 8=43855
cis-dichloroethylene, Raman line intensities and depolarizations, calc. 8=34321

Organic compounds—contd
trans-dichloroethylene, Raman line intensities and depolarizations, calc. 8=34321
1, 2, dichloroethane, rot. isomerism, n. m. r. study 8=47646
1, 2-dichloroethane, vibr. excited, from Hg-photosensitized dichloromethane 8=27761
1, 1-dichloroethylene, Raman line intensities and depolarizations, calc. 8=34321
1, 1-dichloro-3-fluorobutadiene-1, 3, energies of conformations, n. m. r. study 8=47631
dichlorofluoromethane, ice and water clathrates, dielec. props. 8=27255
dichloromethane, Hg-photosensitized, vibr. excited dichloroethane prod. 8=27761
2, 2-dichloro-4, 4, 6, 6, tetraphenylcyclo triphosphazatriene, crystal structure 8=26542
dichlorotoluenes, near-u.v. electronic absorpt. spectra 8=43400
2, 5-dichloro-1, 4-xylene and 4, 5-dichloro-1, 2-xylene crysts., cryst. structure and i.r. vibr. spectra 8=39833
dicyanodiacetylene Σ_g^+ modes, vibr., thermodynamic functions, internal fields and Raman intensities 8=26031
9-dicyanomethylene, -2, 4, 7-trinitrofluorene crystal structure 8=26481
Diels-Alder quinone adducts, charact. i.r. absorpt. bands 8=25924
diethylamine hydrate, $12(C_2H_5)_2NH.104\ H_2O$, crystal structure 8=26505
trans-15, 15-diethyl-15, 15-dihydropyrene, crystal structure at −160°C 8=26552
diethylether, coordination compounds with $MgBr_2$, $ZnCl_2$ and AlX_3=Br, Cl), i.r. spectra 8=25569
diethyl methylphosphanite, hydrolysis, n.m.r. study 8=27727
diethylmethylsulphonium cpds., i. r. spectra 8=29776
NN′-diethylpyrazinium fluoroborate, e.s.r. spectra, line widths and second order structure 8=39414
3, 3′-diethylthiatricarbocyanine laser, time-resolved stimulated emission spectra 8=28712
diferrocenyl and derivs., crystal and mol. structure 8=26497
diffusion pump oil DC-705, δ-η anal. of secondary electron emission 8=48196
difluoroacetone, symmetrical, rotational isomerism 8=29783
difluoro-1-1-chloro-1-ethane, microwave spectrum 8=25575
difluorodiazirine, dipole moment of π^* state 8=25579
2, 2-difluoro-1-methylcyclopropane, microwave spectrum 8=29792
difluorostilbene derivs., crystal and mol. structure 8=26559
diglycine. aq. solns., u. s. absorpt. 8=48142
diglycine nitrate, crystal structure determ. of ferro-and paraelectric phases 8=48685
diglycine soln., permittivity meas. below 1 MHz 8=28452
dihalobenzenes, p.m.r. and C^{13}-H satellite spectra 8=38917
2, 6-dihalogeno-p-benzoquinones, singlet-triplet absorpt. 8=38873
dihydrothymine, cryst. and molec. struct. 8=30918
1, 4-dihydroxyanthraquinone, i. r. and optical spectra 8=3430
2, 5-dihydroxy-para-benzoquinone, i. r. and u. v. absorpt. spectra 8=34318
3β, 17α-dihydroxy-21-bromo-5α-pregnan-11, 20-dione, crystal and mol. structure 8=39834
dihydroxyfumaric acid dihydrate crystal structure 8=39835
p-diiso-propylbenzene, π e chord symmetry in crysts., 20°K 8=30648
beta-diketone negative ions, triplet state e. s. r. 8=47682
2, 5-dimethoxysemiquinone anion radical solvation by protic and aprotic solvants 8=45258
9, 10-dimethylanthracene in dimethylformamide: spectra of electrochemiluminescence 8=48177
dimethylamine, microwave spectrum 8=25599
dimethylamine, microwave spectrum 8=47660
4-dimethylamino-4′-nitrodiphenyl fluoresc. in binary soln., phosphor-impurity group centres props., 77°K 8=36532
dimethylammonium chloride crystal structure rel. to H bonding 8=26525
2, 6-dimethyl-p-benzosemiquinone, e. s. r. in t-pentanol and 1, 2-dimethoxy-ethane, rel. to ionic assoc. 8=34908
8, 8′-dimethyl binaphthyl, crystal structure and bond distances 8=26470
2, 6-dimethyl-4-bromo-N-methyl-anti-benzaldoxime isomer 8=26512
2, 3-dimethylbutadiene, molec. struct. 8=43375
dimethyl cadmium, indirect nucl. spin coupling consts. 8=43408
2, 6-dimethyl-4-chloro-N-methyl-anti-benzaldoxime, crystal structure 8=26511
dimethylcyclohexanes, as solvents for Hg 8=48071
dimethyl (9-fluorenyl) sulphonium bromide, X-irrad., e.s.r. of trapped radicals 8=31883
2, 5-dimethyl furan, vib. spectra 8=43368
1, 3-dimethyl-[1, 7]-heptahydropyrimido[1, 2-a][1, 3, 5] triazine-2-thione-4-one 8=26553
dimethyl NPX_2(X=F, Cl, Br), i.r. and Raman spectra in gas, solid and liq. phases 8=43372

Organic compounds—contd
1, 5-dimethylnaphthalene, and bromo-derivatives, n. m. r. 8=38926
dimethylphenylarsine, vibr. spectra 8=43381
NN′-dimethylpyrazinium fluoroborate e. s. r. spectra, line widths and second order structure 8=39414
1, 3-dimethyl-2-thioxo-4-oxo-1, 2, 3, 4, 6, 7, 8 hepta-hydro-pyrimido [1, 2-a] [1, 3, 5] triazine, crystal and mol. structure 8=48686
dimethyline sulphonyl chloride, $(CH_3)_2NSO_2Cl$, mol. structure 8=25607
2, 2′-dinitrobiphenyl ether and sulphide radical anions, e. s. r. and intramolec. spin exchange 8=34369
N, N′ -dinitroethylenediamine, crystal structure refinement 8=39836
dinitrotetramminecobalt(III) complexes, i. r. spectra 8=45241
p-dioxane/CCl_4 binary mixture, proton mag. relaxation 8=39425
p-dioxane, Raman spectra 80-300°K rel. to phase transform. at 272. 9°K 8=41163
dioxane, rel. to toluene scintillators max. H_2O conc. 8=43844
1, 3-dioxolane, far i. r. spectra 8=25567
diphenyl crystals, void formation process kinetics 8=26709
diphenylamine-nitrobenzene system, complex formation from spectra analysis 8=45347
9, 10-diphenylanthracene, as fluoresc. standard 8=39391
9, 10-diphenylanthracene, laser action 8=46630
diphenyl-α, α' dipyridyl, solid solns., single crystal study 8=26040
diphenyl, heat transfer in boiling rel. to state of heating surfaces 8=35001
1, 6-diphenyl-hexatriene-1. 3. 5. luminesc. polarization and impurity mol. orientation 8=36531
2, 5-diphenyloxazole in benzene, toluene, p-xylene and mesitylene, excimer, fluoresc. solvent-solute energy transfer 8=25940
N, N′-diphenyl-p-phenylenediamine, influence of impurities on electrical conductivity 8=40333
N, N′ -diphenyl-p-phenylenediamine iodide, crystal structure 8=26543
diphenyl picryl hydrazyl solns. in org. liqs., dynamic polarization of solvent protons and F nuclei 8=25951
diphenyl-Tl(III) cpds., vibr. spectra 8=43351
$\alpha\alpha'$ and $\gamma\gamma'$ dipyridol in n-paraffins, structural spectra of phosphorescence 8=36530
disodium inosine-5′-phosphate, crystal structure 8=44265
disordered molecular crystals, X-ray and NQR investigations 8=26454
di(tetramethylammonium)bis(maleonitriledithialato)CuII, X-ray and e. s. r. studies 8=35364
para-dithiane, i.r. absorpt. spectrum at 15°K, fine structure mechanism 8=27632
dithiodiglycolic acid, irrad. at 4. 2°K, ion formation 8=40917
n-dodecanol, adsorpt. on defined rutile surfaces from soln. in p-xylene and n-heptane 8=35196
2-dodecylaminoethanol salts, effect of counterions on micellar props. 8=39289-91
dosimetry, Mrad techniques for p synchrotron 8=46925
DPPH, adsorpt. on catalysts 8=27736
DPPH, conc. solns. in org. solvents, e.p.r. at 3000 MHz as fn. of temp. and dissolved gas 8=48206
duclauxin, structure from monobromo-deriv. crystal and mol. structure exam. 8=44272
durene, photocond. of pure monocrysts. 8=49428
dye, Eastman 9860, electronic transition picosec. lifetime obs. using Nd glass laser 8=43346
dye solns., conc., spectroscopy of intermolecular interactions 8=29841
dye solution laser, cryptocyonine in glycerol and CAP in ethanol, time-resolved spectra 8=33230
dye solutions, optical third-harmonic generation conc. and dispersion dependences 8=43819
dyes, cyanine, sensitizing induced Raman scatt. in nitrobenzene 8=34871
dyes, for Q-switch laser, fluoresc. and bleaching 8=28693
dyes, lasing props. 8=46629
dyes, oriented in glass matrix, polarized absorpt. 8=49767
dyes, quadrupole moments, π-electron theory 8=43268
EDTA, Ba chelate form. study by ultrasonics 8=25914
eperuic acids, config. at C(13) from p-bromophenacyl ester of labdanolic acid structural analysis 8=39840
epoxide ring systems, anisotropy of diamag. susceptibility 8=25619
epoxy resins, thermal expansion, 2°-300°K obs. 8=35443
erbium ethylsulphate, odd-parity cryst.-field parameters 8=48307
erythrosin luminescent centres, relax. of local temp. 8=39388
ethane, ab initio bond-orbital calc. 8=38891
ethane -Ar mixture, ionization coeffs. and sparking voltages 8=25701
ethane-Ar mixtures, u.s. vel. dispersion interferometry 8=47966
ethane, charge transfer from p and H atom, cross-sections 8=38737

Organic compounds—contd
ethane-1, 1, 1-d_3, near-i. r. spectrum 8=25570
ethanes (d_0-d_6), mass spectra 8=47446-7
ethane dissociative ionization 8=29976
ethane, ionization energies 8=34459
ethane, ionizing collisions and electron mean free paths obs. at 10^{-4} torr. 8=34458
ethane, liquid, nuclear spin relaxation 8=39428
ethane, low-temp. virial coeffs. 8=34643
ethane, mobility of electrons, photoelectrically generated 8=39223
ethane dinitrile (cyanogen) condensed in solid N_2 and Ar, luminescence 8=25455
ethanol, adsorpt. on defined rutile surfaces from soln. in p-xylene and n-heptane 8=35196
ethanol-n-decanol mixtures, vapour press. 8=48284
ethanol-ethyl halide mixtures, u.s. relax 8=30471
ethanol, heat transfer in boiling rel. to state of heating surfaces 8=35001
ethanol–H_2O mixture vapour press. isotope effect 8=48283
ether/CCl_4 binary mixture, proton mag. relaxation 8=39425
ether, ketone acid, amine addition products, spectroscopy 8=38880
ethers of aliphatic and aromatic acids, optical parameters of absorpt. band 8=30493
ethionamide hydrobromide, antitubercular cpds. crystal structure 8=26503
ethionamide hydrochloride, antibulercular cpds. crystal structure 8=26502
ethyl acetate, distillation from acetoacetate, liquid/vapour equilib. data 8=25989
ethyl-alcohol mixtures, proton spin-lattice relax and viscosity 8=43770
ethyl alcohol, press. oscills. accompanying heat transfer in tubes 8=34832
ethyl alcohol, shock wave compressed, refr. index, obs. 8=39370
ethyl alcohol, structure and thermodynamic props. from i.r. spectra 8=30401
ethyl alcohol, trans rotamer obs. and rotational consts. meas. 8-34 Gc/sec 8=43364
ethylamine and N-deutero derivative, i. r. and Raman spectra 8=27620
n-ethylaniline, near-u.v. absorpt. spectrum obs. 8=43352
ethyl chloride, HCl and CH_3 hindered-rot. lines, Schottky barrier tunnelling obs. 8=34327
ethyl derivatives, C^{13} and H^1 n. m. r. chem. shifts 8=29818
ethyldimethylsulphonium cpds., i. r. spectra 8=29776
ethyl formate, microwave spectrum and rotational isomerism 8=25572
ethyl free radicals, reactions with SO_2, 28-75°C 8=49848
2-ethyl, 1-hexanol and isoamyl bromide binary solns., complex permittivity 8=48191
ethyliodide, microwave double reson. spectra 8=25634
ethyl iodide mols., spin polarization calc., 300-400 eV 8=34214-5
ethylphenols, electronic absorpt. spectra 8=43385
ethyl phthalate, n.m.r., molecular rotation restriction rel. to temp. 8=43877
ethyl sulphate, Nd^{3+} in lattice, mag. anisotropy and field parametrization 8=43932
ethylvinyl ethers and their S- and N-containing analogues, e.s.r. spectra 8=38909
ethylene and perdeuteroethylene, far u. v. spectra 8=25573
ethylene catalytic hydration on Cr^{3+} and Ti^{3+} doped corundum 8=32122
ethylene, charge transfer from p and H atom, cross-sections 8=38737
ethylene, electrochem. oxidation, oscillatory kinetics 8=49939
ethylene glycol droplets, evaporation rel. to coating of n-dibutylphthalate 8=48272
ethylene, liq., self-diffusion 8=30451
ethylene, n. m. r. spin-spin consts. calc. 8=25640
ethylene, oscillator strengths for electronic spectra 8=29780
ethylene, oxidation by photolysis of NO_2 8=36615
ethylene, photochemistry, spectroscopic basis 8=27760
ethylene, rotational barrier, SCF MO calc. 8=29764
ethylene, SCF-MO-LC(LCGO) calc. 8=47626
ethylene, 6 molecules and 1 ion at 300°K, mean square vibr. amplitudes calc. 8=25571
ethylene, thermal gas phase bromination at room temp., kinetics 8=49863
ethylene, u. v. spectra assignments 8=47667
ethylene-vinyl acetate copolymers heat capacity, —190—250°C 8=24028
ethylenes, methyl-substituted, electronic transitions 8=47647
ethylenebidiguanide silver (III) nitrate, crystal structure 8=26501
ethylenediamine oligomer in soln., dielec. props. —100 to 60°C 8=39404
ethylene glycol aqueous soln., heat transfer in turbulent pipe flow, effect of Prandtl number on temp. profile 8=30367
ethylene glycol-methanol (cellulose membrane) syst., permeation and ultra-filtration 8=25904

Organic compounds—contd
ethylene imine, i. r. absorpt. spectra at 90 and 10°K 8=25568
ethylenimine, reactions to C–C double bonds 8=32097
ethylene oxide, ethylene oxide d_4, spectra vibrational analysis and potential constants 8=38877
ethylene oxide, microwave double reson. spectra 8=25634
eugenol, permittivity and relax. time rel. to pressure 8=39395
evaporation by laser irradiation, obs. 8=39494
ferrihaemoglobin, g factor anisotropy rel. to dynamical Jahn-Teller effect 8=36234
ferrocene, electronic struct. 8=29782
ferrocene, matrix-isolated absorpt. and luminesc. spectra 8=49775
five-membered rings, electronic spectra, CNDO calc. 8=38862
fluoranthene and derivatives, anomalous fluoresc. 8=30500
fluoranthene, CH-bond moments 8=34343
fluoranthene, moment directions of electronic transitions 8=34329
fluorenon, absorpt. bands, elec. field effects 8=34328
fluorescein, aq. soln., pulse radiolysis 8=49969
fluorescein, fluoresc. polarization quenching data 8=43845
fluorescein, luminescent centres, relax. of local time 8=39388
fluorine compounds, bond dissociation energies 8=47702
m-fluoroaniline, liq., i.r. spectrum obs. 8=43833
fluoro-aromatics, phosphoresc. cpds., h.f.s. in $\Delta m=2$ transitions 8=31851
o-fluorobenzene, photoexcit. triplet state yield rel. to vibr., gas-phase obs. 8=25630
fluorobenzenes, monohalosubstituted, n.m.r. 8=38922
fluorocarbons, dynamic polarization in soln. 8=34911
fluorocarbons, high-temp. reaction kinetics 8=41247
fluorocarbons in soln., dynamic polarization of F nuclei 8=48221
fluorochloromethanes, X-ray emission spectra 8=47653
fluorodurene, crystalline, molecular reorientation movements 8=27256
fluoroform, gaseous, p spin-lattice relax. density depend., obs. 8=34667
fluoro-naphthalene, vapour and soln. at 77°K, u.v. absorpt. spectra 8=32047
p-fluorophenol, emission spectrum obs. 8=43384
fluoro-phosphines, n.m.r., signs of F-P coupling consts. 8=40994
2-fluoropyridine solns., n.m.r., solvent and temp. depend. 8=48224
formaldehyde, all-electron calc. 8=25578
formaldehyde derivatives, phosphoresc. lifetimes, 8=25473
formaldehyde, dipole moment of triplet state 8=25580
formaldehyde, elec. field induced spectra 8=25582
formaldehyde, elec.-field-induced spectra 8=38881
formaldehyde, excited states, nonempirical calcs. 8=47648
formaldehyde, molec. g value and susceptibility tensors 8=29784
formaldehyde, normal-coordinate, anal. of singlet excited state 8=43367
formaldehyde, struct., using wavefunctions of double minimum potentials 8=25507
formaldehyde, 3500Å $^1A_2 \leftarrow {}^1A_1$ transition 8=25581
formaldoxime N^{15}, nuclear spin-spin interactions 8=43409
formamide-dioxane liq. system, theromdyn, props. 8=34825
formamide, X-ray diffr. of liq. 8=39306
formate, electrochem. oxidation, oscillatory kinetics 8=49939
formyl fluoride, dipole moment of π^* state 8=25579
freon-12, impurity in Ar, influence on laser-induced breakdown 8=39000
Freon-22-dibutylphthalate soln, heat transfer in boiling on horiz. tube 8=34999
Freon 22, 113 and 142, thermal cond. meas. by regular regime method 8=34824
furan, anomalies in Pariser-Parr-Pople calcs. 8=38882-3
furan, i.r. absorpt. spectra of liq. and crystalline forms 8=43836
furan, methyl-substituted, vibration spectra 8=43368
furan mol. applic. of self-consistent field calc. in differential overlap approx. 8=34357
furfural, photochem., vapour phase 8=32134
gadolinium hexa-antipyrene iodide suppression of spin-lattice relaxation Raman spectra 8=40951
galactose, amorphous, enthalpy and spec. ht., 15-45°C, rel. to mol. structure 8=30966
γ-irradiation, short-life free radical formation and stabilization by nitroso scavengers 8=49980
gaseous, X-ray spectra, carbon emission 8=47652
gelatine gels, elec. cond. and melting 8=34962
gentibiose frozen aqueous solutions, e. s. r. of free radicals 8=47707
ginkgolides and derivatives, n.m.r. data 8=48216
glasses, used as trapping matrices, viscosities 8=49065
gliotoxin, crystal structure at -150°C, 8=26508
glucose, amorphous, enthalpy and sp. ht., 15-45°C, rel. to mol. structure 8=30966
β-D-glucose, crystal structure confirmation 8=39838

Organic compounds—contd
glutaric acid, X-irradiated, polymorphic transforms. rel. to free radical recombination 8=29828
glyceride-water mixture, mesomorphic phase and micelle structure 8=25966
glycerine, scatt. cross-section meas. 8=48065
glycerine, shock wave compressed, refr. index. obs. 8=39370
glycerol, dipole moment 8=34331
glycerol, elastic consts., press. depend. 8=34841
glycerol, mag. relaxation and correlation 8=39430
glycerol, supercooled glassy and polycrystalline states Mossbauer obs. of mol. motion 8=43751
glycerol-water mixture, acoustic absorpt. below 1MHz 8=34840
glycerol, X-ray scatt. rel. to density fluctuations, calc. from compressibility 8=25879
glycine, aq. solns., u. s. absorpt. 8=48142
glycine, γ-irrad., e.s.r. of free radicals formed 8=31844
glycine, irrad. crysts., e.s.r. 8=49610
glycine, partially and completely deuterated, d.m.r. 8=49628
glycine soln., permittivity meas. below 1 MHz 8=28452
glycine sulphate, ferroelectric, temp. depend. of refractive index n_α 8=45243
glycocyanine hydrobromide, 3 dimens. Patterson and heavy atom phased Fourier synthesis 8=44274
gramicidine S in soln., molecular structure from n. m. r. obs. 8=34332
grisan derivatives in monolayers 8=39611
guanidine chromium suplhate hexahydrate, dilution splitting of Cr^{3+} absorpt. lines 8=41164
guanidine, matrix-isolated, i.r. spectrum 8=25583
Hafner's hydrocarbons, substituted, anomalous emission 8=48175
halobenzene photoconductive solns, enhanced conductivity on X-irradiation, 8=43866-7
haloethanes, dielec. relax. in soln. 8=48184
halogenated benzenes, triplet states 8=27625
2-halogenoalkylammonium halides, N-substituted space grouping 8=26510
halomethanes, C^{13} n. m. r., struct. and electronic effects 8=47700
heptaoxyethylene glycol monohexadecyl ether, micellar props. in aq. solns. 8=30559
p-n-heptylhydroxybenzoic acid, liquid crystal, nematic and smectic phases, domain formation 8=34769
heterocycles, five-membered, N^{14} nuclear quadrupole reson. 8=25638
heterocyclic anions, N^{14} hyperfine coupling factors 8=34340
heterocyclic aromatic cpds., molec. fragments, atomic-orbital calc. 8=29785
heterocyclic compounds, i. r. investigations 8=38861
hexabromobenzene singlet–triplet transitions, triplet state assignments and spin-orbit coupling 8=25536
hexachlorocyclohexane, bond mag. anistropies from diamag. meas. 8=31515
hexachloroethane, X-irradiated, polymorphic transforms rel. to free radical recombination 8=29828
n-hexadecane, thermal decomp. 8=45342
hexafluoroacetone-hexafluorobiacetyl mixtures, luminesc. energy transfer 8=48168
hexafluorobenzene, photoexcit. triplet state yield rel. to vibr., gas-phase obs. 8=25630
hexafluoropropylene copolmer, γ-irradiated, photoinduced and thermal radical conversions 8=49953
hexamethylenetetramine aq. solns., differential diffusion coeffs. 8=30446
hexamethylenetetramine-water, solvent-solute interactions 8=41254
n-hexane, dielec. const. rel. to pressure and temp. 8=39396
n-hexane, enthalpy of mixing with CCl_4 8=39348
hexane, in liquid ionization chamber, quality factor 8=37787
n-hexane, light emission, electrically stressed 8=39383
hexane, liquid ionization chamber for dosimetry 8=37786
n-hexane, non-linear dielec. susceptibility obs. 8=34888
hexane, stimulated Brillouin scattering, anti-Stokes components origin 8=25922
hexanes (normal, neo and 3-methyl-pentane), e.s.r. obs. of radicals formed by ionizing radiations 8=25659
hexanitroethane, thermal decomposition in gaseous phase 8=49879
hydrazides, substituted, C–Br bond 8=49780
hydrazidones, substituted, C–Br bond 8=49780
hydrazine, explosive instability, photochem. effect 8=27732
hydrazine, i. r. spectra, vib. anal., and force consts. 8=45244
hydrazine, liq. vapour press, thermal props, surface tension in significant struct. theory 8=43755
hydrazine, photodissoc. 8=32135
hydrocarbon, aromatic, electroluminescence in liquid phase below optical excitation threshold 8=30497
hydrocarbon binary mixtures, adsorpt. at liq.-vapour interface 8=48041
hydrocarbon binary mixtures, correlation of critical props. 8=48250
hydrocarbon fuel/air mixture, ignition in laminar supersonic boundary layer 8=32969

Organic compounds—contd
hydrocarbon fuel cells, electrocatalysts 8=46355
hydrocarbon glasses, electron trapping sites, saturation and removal 8=40082
hydrocarbon glasses, radiation-induced trapped electrons 8=45401
hydrocarbon radicals, spin-extended PPP SCF spin densities 8=47649
hydrocarbon, saturated, p-p geminal coupling constant, calc. 8=47692
hydrocarbon-TCNE complexes, absorpt. spectra, effects of press. 8=36433
hydrocarbons, absorption spectrum similar to dinegative ion 8=38884
hydrocarbons and monochloro derivatives, field-ionization mass spectra 8=47796
hydrocarbons aromatic, quasilinear phosphoresc. spectra 8=36524
hydrocarbons, CNDO calc. of nuclear spin-spin coupling 8=47663
hydrocarbons, conjugated radicals, ground states, MO calc. 8=38885
hydrocarbons, dimers in vapour phase 8=34388
hydrocarbons, electronic states, config. interaction calc. 8=25585
hydrocarbons, F-substituted, n. m. r. spin coupling constants, calc. using σ M.O. theory 8=47690
hydrocarbons, gaseous, photochemical oxidation mechanism, e. s. r. invest. 8=36616
hydrocarbons, I_2 reactions activated by radiative neutron capture 8=41296
hydrocarbons in solvents, vapour-liq. equilib. at low temp. and high press. 8=39481
hydrocarbons, ion impact, charge and proton transfer 8=29984
hydrocarbons, liq. radiolysis, scavenging mechanism 8=27765
hydrocarbons, molecular reactions with electron donating solvents 8=36550
hydrocarbons, molec. struct., floating spherical Gaussian orbital model 8=38886
hydrocarbons, n-irradiated at 14 MeV, linear energy transfer 8=43033
hydrocarbons, planar, long-range trans and cis coupling constants, analysis 8=47691
hydrocarbons, quadrupole moments, π-electron theory 8=43268
hydrocarbons, sat., diff. in coal, meas. 8=48775
hydrocarbons, unsaturated, vibrational spectra 8=47621
hydrocarbons, valence-bond theory for mols., radicals, and ions 8=29786
hydrocarbons, vapour-phase fugacities 8=39481
hydroxy- and methoxybenzaldehydes, dielec. relax in benzene solns. 8=39400
9, 10-hydroxy-borazaro-phenanthrene, crystal structure 8=26540
2-hydroxy-1-phenazine carboxylic acid from pseudomonas aureofaciens, mol. and crystal structure 8=26541
hydroxyurea, crystal structure 8=26511
hydroxyl radical kinetics, deuterium isotope effects 8=27707
imidazole, far-i.r. spectra and H-bond freqs. 8=41165
imidazole, i. r. and Raman spectra 8=29787
indene, substituted, spectroscopic study 8=36440
insulin and A and B chain S-sulphonates, p mag. reson., 220 MHz 8=39441
1-iodofluorenone oxime, e. s. r. in soln. 8=34907
ions in aq. soln., C isotope effect on electrolytic dissoc. 8=29669
n-iso-alkoxybenzal-1-aminonaphthalene-4-azobenzene derivs. mixture liq. crystal formation 8=39308
isoamyl bromide and 2-ethyl 1-hexanol binary solns., complex permittivity 8=48191
isoamyl bromide, dielec-props. of low-temp. liq 8=48188
isobutane, e. s. r. obs. of radicals formed by ionizing radiations 8=25659
isobutylalcohol, dipole moment 8=34331
isobutyric-acid-water system, diffusion coeff. obs. near critical soln. conc. 8=39341
iso-eremolactone, crystal and mol. structure 8=44273
isonitrose-acetyl, derivatives of amines, morphological, optical and X-ray study 8=26533
isoprene, structure determ. by gas e-diffr. rel. to nature of conjugating system 8=25587
isopropylalcohol, dipole moment 8=34331
isopropyl-4-phenol, crystal structure 8=26539
p-isopropyltoluene, π e chord symmetry in crysts., 20°K 8=30648
isoxazole, microwave spectrum 8=25613
ketene, g values and paramag. susceptibility 8=25589
ketones, infrared absorpt., temp. effect 8=34319
ketones, saturated, optical activity, theory 8=38888
ketones, solvent effects in u. v. spectra 8=34876-7
labdanolic acid, config. at C(13) from its p-bromo-phenacylester structural analysis 8=39840
lanthanum ethylsulphate:Er^{3+}, spin-lattice relax. times 8=45089
lead n-butylxanthate, disordered crystal structure 8=39855
lecithins, some structural studies 8=26517

Organic compounds—contd
leucrocristine methiodide dihydrate, mol. structure by anomalous scatt. methods 8=25590
lincomycin hydrochloride, crystal structure 8=26518
liquid crystal mixtures, structural and stability characts., x-ray exam. 8=39310
liquid mixtures, concs., by internal filling counters 8=27817
liquids, apparatus for crystallization, orientation and conservation for routine crystal studies 8=26214
liquids at liq. N temp:Mn atoms stabilized by condensation method e. p. r. spectra 8=30526
low-viscosity insulating oil, formation of partial discharges on points 8=30504
lubricating oils, and component fractions, viscoelastic relax. spectra 8=34698
malachite green films, photocapacitance and photocurrent "memory" 8=36032
malates, cell dimens., from X-ray powder diffr. 8=39841
malonic acid, γ-irrad., e.p.r. separation of overlapping spectra 8=40927
maltose frozen aqueous solutions, e. s. r. of free radicals 8=47707
mannose, amorphous, enthalpy and sp. ht., 15-45°C, rel. to molstructure 8=30966
mass spectra, metastable ion detector 8=43152
matter, radio thermoluminescence, crystalline nature 8=41220
α- and β-mercaptoesters, skeletal rearrangement on electron impact, mass spectra 8=47456
mercapton, H isotope exchange with alcohol 8=36545
mercury di-n-hexyl, liquid: radiolysis to identify composition 8=49976
mercury-organic crystals, R-Hg-X, Hg-X bond regularity rel. to structure 8=30616
mesitylene-benzonitrile liq. mixture, conductance showing charge-transfer interacts. 8=30515
metal complexes, mag. circular dichroism 8=27616
metal complexes, mag. circular dichroism, interpretation 8=27614
metal halide complexes, mag. circular dichroism 8=27615
metal-metal carbonyl derivatives, X-ray study 8=26474
methallyl iodide, rotational isomerism 8=43370
methanal azine, electronic absorpt. spectrum 8=34337
methane, ab initio bond-orbital calc. 8=38891
methane adsorbed on γ-alumina, radiolysis at 77°K 8=41290
methane-air mixture, spectrochem. analysis by three-colour Schlieren system 8=28737
methane-ammonia mixture, laser discharge emission spectral obs. 8=33190
methane, and deuterated, gaseous, collision induced absorpt. in far i. r. 8=47657
methane, and deuterated, rotational spectrum, collision-induced 8=47658
methane-argon mixtures, thermal diffusion rel. to atomic mass distrib. 8=43709
methane-Ar system, solid-liquid equilib. diagram 8=25978
methane, charge transfer from p and H atom, cross-sections 8=38737
methane, in chemiluminescent reactions involving H, atomic N, and H_2, N_2 and Ar 8=41245
methane, compressed, i. r. spectra, rot. correl. functions and intermolecular torque calc. 8=38894
methane, crystalline, creep meas. 8=40190
methane, equilibrium combustion products, thermodynamic props. computer calc. 8=27730
methane, gaseous, scattering of slow neutrons and intermolecular interactions 8=38898
methane I^{129} derivatives, Mössbauer effect 8=48332
methane in solid Ar, nuclear spin conversion and vibr.-rot. spectra 8=27634
methane, ionization energies 8=34459
methane, i.r. spectra of liq. and solid solns. in inert gases 8=25932
methane, laser-excited vibr. fluoresc. and energy transfer 8=25605
methane, liq., self-diffusion 8=30451
methane, low-temp. virial coeffs. 8=34643
methane, mol., intrapair correl. energy 8=38893
methane nuclear r.f. spectrum obs. 8=47588
methane, octopole moment, from virial coeffs. 8=29849
methane, photoionization, mass spectra 8=29986
methane, Raman laser emission, combination freq. generation 8=25598
methane, reaction with hydride ion, MO theory 8=27678
methane, SCF-MO-LC(LCGO) calc. 8=47628
methane, solid, thermal conductivity, 20-80°K 8=30990
methane, solubility of water in compressed CH_4 8=30302
methane theta-pinch discharges, triplet-singlet excitation rate coeff. calc. for C V ions 8=38662
methane-Xe mixtures, charge exchange 8=47792
methanes, halogen-substituted, Raman spectra in gaseous state 8=25591
methanes, substituted, molec. consts. calc. 8=25595
methanes, tetra-substituted anomalous dielec. dispersion in low-temp. phases 8=49326

Organic compounds—contd
methaneselenol, vibr. spectrum 8=25602
methanesulfonanilide, crystal structure 8=39843
methanol-acetaldehyde mixtures, H atom and proton transfer 8=34444
methanol and methanol-d_3, adsorbed on porous glass, proton relaxation times 8=47699
methanol-cyclohexane mixtures, light scatt. near crit. soln. temp. 8=39371
methanol-n-decanol mixtures, vapour press. 8=48284
methanol, effect on stress-corrosion cracking of Ti and Ti–Al–Mo–V 8=40184
methanol ion-mol. reactions, ion cyclotron reson. 8=27709
methanol-d_1, irrad., isotopic comp. of H prod. 8=32136
methanol, mm wave spectrum, torsion-vibr.-rot. interactions 8=47654
methanol, n scatt. spectroscopy of microscopic transport props. 8=30403
methanol-water mixture, thermometric analysis 8=27771
p-methoxy benzylidene-p′-cyanoaniline, X-ray study of nematic cryst. state 8=48067
methoxyl group, detection by i.r. spectroscopy 8=47661
methoxyl group, e.s.r. hyperfine interaction 8=29807
methoxynitropyridine, u.v. absorpt. spectra 8=34356
methoxypyridine, u.v. absorpt. spectra 8=34356
methyl acetate-water mixture, thermometric analysis 8=27771
methylacetylenes C_3D_4, Raman rotational spectra 8=47662
methylacetylenes C_3H_4 Raman rotational spectra 8=47662
methyl alcohol, adsorption on γ-Al_2O_3, privilege ads. of hydroxyl, n.m.r. obs. 8=39615
methyl alcohol, dielec. dispersion 8=43857
methyl alcohol, scatt. cross-section meas. 8=48065
methyl alcohol soln. in heptane, lamination on ions as nuclei 8=37800
methyl alcohol, structure and thermodynamic props. from i.r. spectra 8=30401
methyl alkàli halides, new mol. type, i.r. spectra 8=47656
methylamine-NH_3 gas mixtures, heat cond. 8=34644
methylamines, internal rot. effects in i.r. spectra 8=47655
methylamines, solid, n.m.r. 8=40990
methyl aromatic hydrocarbons, i.r. spectra and conformation of CH_3 group 8=29789
methyl-bearing cpds., proton second moment 8=40989
methyl BF_2, gas-phase i.r. spectra, fine struct. due to int. rotation 8=29793
methylborazines, SCF-MO calc. 8=38897
methyl bromide, photolysis, high-energy CH_3 radicals 8=49961
methyl bromide, vibration-rotation spectra, near 6000 cm^{-1} 8=47659
methylchloride-ethylchloride, thermal cond., 273-1173°K 8=47962
methyl chloride, perturbations in ν_4 band 8=34334
methyl chloride pure and with Ar, ethyl chloride, or Ne, thermal cond., 273-1173°K 8=47962
methylchloride, $2\nu_5$ band near 2880 cm^{-1}, parallel component 8=43374
methyl chloroform, microwave spectra, internal rot. dipole moment and struct. 8=29773
methylcyanide, and solid solns., proton spin-lattice relax., 8=40975
methyl cyanide, direct l-type doubling transitions 8=34323
methylcyclohexane, freezing press. 8=50477
methylcyclopentane, liq. radiolysis 8=45407
methylcyclopropane, microwave spectrum 8=47665
methyl derivatives, C^{13} and H^1 n.m.r. chem. shifts 8=29818
N-methyldiphenylamine, on TlI, surface charge-transfer groups form., obs. 8=36028
methyldiphenylarsine, vibr. spectra 8=43381
methylethyl ketone-water system, nucleate boiling obs. 8=25998
methyl fluoride, gaseous, p spin-lattice relax. density depend., obs. 8=34667
methyl fluoride, i.r. spectra 8=43371
methyl free radicals, reactions with SO_2, 25-164°C 8=49847
2-methyl furan, vib. spectra 8=43368
methyl-α-D-glucopyranoside crystal structure 8=39845
methyl group, electronic rel. to steric effects 8=25593
methyl group, n.m.r. narrowing due to coherent zero-point motion 8=25635
methyl groups undergoing tunnelling rotation, n.m.r. line shapes 8=49650
methyl halides, i.r. absorpt. intensity rel. to electron cloud distrib. 8=43373
methyl halides, linewidths of rot. spectra 8=38889
methyl halides, molec. struct. 8=25596
methyl halides, prebreakdown ionization currents, between parallel electrodes 8=25708
methyl halides, vibr. anharmonicity 8=38895
3-methyl 2, 4-heptanediol, u.s. and dielec. relaxation 8=48189
methyl-heptanols, pressure depend. of assoc. from dielec. props. 8=39394
N-methyl-hydroxylammonium-chloride, crystal structure 8=26511

Organic compounds—contd
methyl iodide, i.r. liq. band shapes 8=39379
methyl iodide, partition coeff. between vapour and H_2O 8=48073
methyl iodide, resonances perturbing ν_5 band 8=25594
methyl iodide, pyrolysis using hot W wire 8=36577
methyl ion, charge transfer dissociative reaction with propylene 8=34445
methyl-3-isopropyl-2-phenol, crystal structure 8=26539
methyl-3-isopropyl-4-phenol, crystal structure 8=26539
p-methyl-2′-methoxybutylbenzene, π e chord symmetry in crysts., 20°K 8=30648
methyl oleate, γ-induced oxidation 8=41293-4
3-methylpentane glass, γ-irrad., e.s.r. of trapped electrons 8=27483
methyl phenanthrene, ionization and dissoc. by electron impact 8=47797
methylphosphonic acid, i.r. spectrum 8=47666
N-methylpyrol, microwave spectrum and mol. props. 8=29798
methylstannane, i.r. spectra 8=43369
methylurea-water, solvent-solute interactions 8=41254
methyl vinyl ether, microwave spectrum 8=29790
methylvinylsulphide, vibr. spectra 8=38899
methylzinc methoxide, crystal structure 8=26529
methylzinc t-butyl sulphide crystal structure 8=26529
methylated dimeric trihalide of aluminium, Coriolis coupling coeffs. 8=43348
methylene, reaction with C_2H_5Cl in gas phase 8=45345
methylene reaction with 2-butane, photochemistry 2-butane photochemistry 8=27759
methylene blue, effect on growth of $Pb(NO_3)_2$ crystals from soln. 8=39679
methylene group, e.s.r. study of hindered roation in $[(C_6H_5)_3P^+ - CH_2]$ radical in crystalline matrix 8=49616
methylene fluoride, molec. g-values and mag. susceptibility 8=34339
micrococcinic acid bis-4′-bromoanilide, crystal and mol. structure 8=26531
molecular complex formation in excited state with short-wave absorbent aromatics 8=47629
molecular complexes emission rel. to charge transfer triplet states, obs. 8=25526
molecules triplet states excit. and low-energy e impact spectrometry 8=25528
molecules triplet states de-excit. in condensed media rel. to mol.-host interactions 8=26029
monobromoduclauxin, crystal and mol. structure rel. to duclauxin structure 8=44272
monochloroethylene, Raman line intensities and depolarizations, calc. 8=34321
monoctadecyl phosphate monolayer desorpt. from air water interface, kinetics 8=30442
mono-deuterobenzene p-derivs., ν(CH) and ν(CD) 8=34315
monoethanolamine, absorpt. of CO_2, optical study of interfacial turbulence 8=32093
monoisopropyldiphenyl, heat transfer in boiling rel. to state of heating surface 8=35001
monomethylammonium perchlorate, crystal structure 8=26522
monoselenoparaldehyde, crystal structure rel. to mol. conformation 8=35365
mylar, S^{32}, Cl^{35}, Br^{79} and P^{27} ion beam stopping powers 8=44508
myristic acid dipole moment in gaseous monolayer at air water interface, obs. 8=30438
myxin, crystal structure at −160°C 8=44277
naphthacene, fluorescence in mag. fields 8=41226
naphthacene in n-paraffins, electronic spectra rel. to phase transitions of solvent 8=25938
naphthalene and d_8-naphthalene mixed crysts., phosphoresc. spectra 8=32074
naphthalene anion in soln., e.p.r., ion pairing effects 8=39416
naphthalene, CH-bond moments 8=34343
naphthalene crystal, band structure, effects of H atoms 8=31291
naphthalene, Davydov splittings of intense transitions 8=35048
naphthalene, delayed luminesc., growth and decay 8=32073
naphthalene, detailed exciton band struct. 8=26919
naphthalene, deuterated, optical anisotropy of excited state 8=25611
naphthalene + 1, 4-dicyanobenzene, triple complex formation 8=48176
naphthalene, effect of solvents on u.v. spectra 8=34870
naphthalene, elastic constant tensor temp. dependence, 20-80°C 8=26856
naphthalene, excimer emission at v. high press. 8=49823
naphthalene, excitation exchange and optical spin polarization in triplet state, e.s.r. study 8=47686
naphthalene, exciton band, expt. determ. 8=31299
naphthalene, fluorescence and absorpt. conc. depend. in n-heptane, cyclohexane 77°K 8=49830
naphthalene, fluoresc. of doped crysts. at high press. 8=49824
naphthalene in soln., monomer and excimer phosphoresc. 8=30501
naphthalene, luminesc. polarization and impurity mol. orientation 8=36531

Organic compounds—contd
naphthalene mixed crysts., phosphoresc. and delayed fluoresc. 8=32075
naphthalene, optical spin polarization in triplet state 8=45298
naphthalene, quenching of triplet state 8=34341
naphthalene, rel. to toluene scintillators max. H_2O conc. 8=43844
naphthalene single crysts., radiation damage 8=40083
naphthalene, singlet and triplet π electron states 8=25543
naphthalene soln. in cyclohexane, $^1B_{3u}$-state, singlet-singlet absorpt. spectrum and intersystem crossing 8=43839
naphthalene, temp. gradient optimization for single crystals 8=44137
naphthalene, theory of cryst. spectra 8=49772
naphthalene, thermal expansion from X-ray meas. and expansion tensor calcs., 78-325°K 8=26596
naphthalene thermo-electret, pure and naphthol-doped, glow peak analysers 8=49378
napthalene, triplet-triplet extinction coeff., 4130 Å 8=25926
naphalene, vapour absorpt. spectrum rel. to e transitions, 30 000-53 000 cm^{-1} 8=38900
naphthalene, vibr. symmetry coords 8=43376
naphthalenes, isotopic, vibr. amplitudes calc. 8=43377
β-naphthol, triplet state, acidity determ. by e. p. r. 8=34342
1, 4-naphthoquinone and derivatives, emission spectra 8=43392
naphthothiophenes, mol. orbital calcs. 8=43355
1, 4-naphthoquinone, vapour absorpt. spectrum 8=43393
N-(α-naphthyl)-carbazole in soln., phosphoresc. 8=43849
natural orbitals, and expansion coeffs., direct calc. 8=29604
natural products, analysis by Raman spectroscopy using laser excitation 8=27793
natural products, crystal structures rel. to stereochemistry 8=26457
neopentane, methyl group librations, n scatt. obs. 8=34345
nitriles, saturated, N^{14} nuclear quadrupole coupling consts. 8=25642
n-nitroaniline, cryst., stimulated Ramn scatt. spectrum fermi reson. splitting, 77°K 8=41160
nitroaniline, in benzene, dielec. props., temp variation at microwave freqs. 8=48181
nitroanilines in ortho, meta and para states, u. s. velocity var. with temp. 8=30470
nitro azulenes, n.m.r. 8=43410
nitrobenzene, depolarized doublet of light scatt. from thermal shear waves 8=43817
nitrobenzene, scattering of ruby laser emission, large angle 8=48158
nitrobenzene, elec. cond. 8=34898
m-nitrobenzene, ^1H-^1H coupling constants 8=25641
nitrobenzene-n-hexane mixtures, u. s. absorpt. near critical region 8=25912
nitrobenzene, induced Raman scatt., sensitizing by cyanine dyes 8=34871
nitrobenzene, liq., X-ray scattering 8=43760
nitrobenzene, Stokes freq. gain on Rayleigh wing, obs. and calc. 8=39364
nitrocellulose powder, ignition by shock wave 8=23950
nitroglycerin powder, ignition by shock wave 8=23950
nitromethane, gas-phase i. r. spectra, fine struct. due to int. rotation 8=29793
5-nitro-6-methyluracil, e.s.r. of γ-irrad. cryst. 8=49615
nitroparaffins, solvent effects in u. v. spectra 8=34876-7
m-nitrotoluene, depolarized doublet of light scatt. from thermal shear waves 8=43817
1-nitro-4-trifluoromethoxybenzene anion radicals, ion pairing 8=39415
nitrovinylbenzoate, structural group interactions, MO calcs. 8=34347
nitrogen derivatives, stereochemistry from gas e-diffr. study 8=25608
nitrogen heterocyclics, ionization potentials 8=39060
nitrotriacetatoaquochelate of Nd(III), crystal structure 8=26415
nitroxide radicals from diethylhydroxylamine, dioctylhydroxylamine and N-hydroxypyrrolidine, e. s. r. obs. 8=25655
n-nonane, sound propag. vel. meas. 8=39361
norbormide, stereochemistry from X-ray investigations 8=26165
nucleic purines, e struct. of first excit. triplet state, calc. 8=25621
nucleic pyrimidines, e struct. of first excit. triplet state, calc. 8=25621
nucleoside derivs, struct. and chem. substitution effects, rotatory and dichroism studies 8=43434
n-octadecanoic acid film on metal oxide, wettability rel. to heat treatment 8=48050
octadecanol monolayers, retention of solvent 8=39613
n-octadecyl alcohol film on metal oxide, wettability rel. to heat treatment 8=48050
n-octadecylamine film on metal oxide, wettability rel. to heat treatment 8=48050
octadecylamine on steel and glass, desorpt. and exchange, obs. 8=30768

Organic compounds—contd
octahydroxycyclobutane, molec. and cryst. struct. 8=44267
n-octanol, adsorpt. on defined rutile surfaces from soln. in p-xylene and n-heptane 8=35196
octanols, pressure depend. of assoc. from dielec. props. 8=39394
octyl alcohols, dielec. props. and intermolec. assoc. 8=30508-
octyl alcohols, isomeric, association, press. depend., dielec determ. 8=48182
octyl alcohols, liq. struct. transform 8=39296
octylbenzoic acid, liq. cryst., ferroelec. behaviour 8=25882
octyl hexaoxyethylene glycol monoether + water systems, heat of mixing obs. 25°C 8=48126
oil, detection on surfaces in vac. systems using ellipsometer 8=39255
oil, synthetic immersion, for microscope objectives 8=39363
olefins, liq., radiolysis 8=27766
olefins, u. v. spectra assignments 8=47667
organo-hectorites, sorption, swelling and intracryst. porosity 8=30779
organometallic cpds. of groups IV and II b, C^{13} n.m.r. 8=38925
organo-montmorillonites, sorption, swelling and intracryst. porosity 8=30779
organophosphorus cpds., C^{13} and P^{31} mag. double resonance obs. 8=43401
organophosphors, photoluminesc. reabsorpt. 8=36525
organotin dichlorides, nuclear quadrupole coupling 8=41013
organotrichlorosilanes, l. f. vibs. 8=47620
Oseksuat oils, narrow-boiling range, temp. depend if thermal cond. 8=30461
oxalic acid dihydrate-d, d.m.r. 8=49628
α-oxalic acid dihydrate, d.m.r. and molec. struct. 8=49638
oxalyl halides, near u. v. absorpt. spectra 8=25612
oxazole, and derivatives, excimer formation 8=29796
oxide layers from reactive cathode sputtering, texture from X-ray obs. 8=39711
palladium-8-mercaptochinolinates, crystal structure 8=39842
palmitic acid dipole moment in gaseous monolayer at air/water interface, obs. 8=30438
paraffin, liquid, n.m.r. in rotating mag. field 8=25958
paraffin, surface charge density meas. and contact electrification 8=49379
paraffin wax n havitzers, optimum design, obs. 8=42649
paraldehyde, laser Raman spectra 8=25530
pentaerythritol, deuterated, structural investigations of H bonds, by n. m. r. 8=43926
pentafluorobenzene, n. m. r. 8=34373
n-pentane, diffusion in polystyrene rel. to second-order transition above glass point 8=44398
n-pentane, H formation in radiolysis 8=41291
n-pentane, radiolysis of liq. 8=49971
pentane, scatt. cross-section meas. 8=48065
pentanes (normal, iso and neo), e. s. r. obs. of radicals formed by ionizing radiations 8=25659
perbromocyclopropane, vibr. spectra 8=25565
perchlorocyclopropane, vibr. spectra 8=25565
perfluorocyclopropane, vibr. spectra 8=25565
perhydrotriphenylene (PHTP) + n-hydrocarbons; + chloroform; + cyclohexane, inclusion cpds. structure 8=30920
peroxidase and derivs., Mössbauer spectroscopy 8=29823
perspex spheres, shock wave propag., reply to comments 8=35734
perylene, CH-bond moments 8=34344
perylene, cryst. spectra at high press. 8=41168
β-perylene, crystal structure and bond distances 8=26470
perylene, in crystalline n-paraffin soln., quasi-line spectra, temp. broadening, shift and line profiles 8=45240
perylene molecular crystal, electronic spectra calc. 8=40249
perylene-N in N-dimethylaniline, fluoresc. quenching via charge transfer 8=34885
phenanthrene-biphenyl mixed crysts., sectra and struct 8=41159
phenanthrene, CH-bond moments 8=34344
phenanthrene, delayed luminesc., growth and decay 8=32073
phenanthrene, excimer emission at v. high press. 8=49823
phenanthrene, excit. states decay and intersystem crossing, obs. 8=25537
phenanthrene, fluoresc. of doped crysts. at high press. 8=49824
phenanthrene in soln., monomer and excimer phosphoresc. 8=30501
phenanthrene, ionization and dissoc. by electron impact 8=47797
phenanthrene, low-lying triplet excit. states, 0.4-1.0μ 8=25616
phenanthrene, matrix isolated crystallites in rigid 3-methylpentane photoelec. props. 8=49429
phenanthrolines, deactivation of excited states 8=43383
phenanthrolines, fluoresc. and phosphoresc. spectra 8=43382
phenazine, singlet–triplet transition in mag. field 8=31296

Organic compounds—contd
phenazine/N-oxyphenazine mixed crystals habit changes 8=48522
phenazine singlet-triplet transitions, triplet state assignments and spin-orbit coupling 8=25536
phenazines, cryst. and in soln., absorpt. spectra in polarized light 8=32042
phenol, fluoresc. polarization quenching data 8=43844
phenol, H-bonding with vinyl derivatives 8=43379
phenol-nitrobenzene system, complex formation from spectral analysis 8=45347
phenol, rot. coeffs., contrib. of internal rot. 8=47668
phenol, struct. in ground and first excited state 8=25614
phenol, 2750Å electronic band system 8=43378
phenolic binary complexes, fluoresc. and hydropholic bonds 8=43850
phenoxy radicals, n.m.r. 8=43411
phenylamines, ⌊C-N⌋ and ⌊N-H⌋ bond valencies 8=47622
1-phenyl-6-benzyl-7, 7-dichlor-3, 5-diaza-bicyclo-1,2,2-hepten-5-on-2, crysts. atomic struct., obs. 8=35363
phenylcyclopropane, structure determ. by gas e-diffr. rel. to nature of conjugating system 8=25587
phenyl derivatives of Ge, As, and Sb, i. r. spectra 8=34352
phenyl and ethinyl derivatives of Ge and Si, proton mag. reson. 8=36268
phenyldichlorophosphine oxide, structure determ. by gas e-diffr. rel. to nature of conjugating system 8=25587
phenylgermane, i. r. and Raman spectra 8=25615
phenyl group IV-A cpds., l.f. vibr. spectra 8=38901
γ-phenyl-pyridene derivatives, u. v. absorpt. spectrum 8=29797
phenyl salicylate, cryst. growth retardation in capillary tube, obs. 8=35247
phenyl salicylate, growth, unit cell dimensions 8=44280
phenyl-2, 1, 3-thio(seleno)diazoles, vibrational spectro 8=43356
o-phenylenebis(dimethylarsine) 8=43381
m-phenylene-bis-phenylmethylene, quintet mol., spectra 8=47669
p-phenylenediamine cations, u. v. spectra, dimerization of radicals 8=25657
p-phenylenediamine-chloranil charge-transfer complex, mag. excitations 8=31880
p-phenylenediamine:tetracyanoethylene, d. c. resistivity rel. to press. and elec. field 8=27078
pheophytin and derivatives for Q-switching of ruby lasers 8=46605
phosphobenzol, crystal structure 8=48687
phosphoenol pyruvate, monocyclohexylammonium salt, crystal structure 8=26544
phospholipids, some structural studies 8=26517
phosphorescence and delayed fluoresc. in solns., kinetics and chem. appls. 8=25936
phosphors structure and luminescence 8=41221
photo iso pyrocalciferyl-m-bromobenzoate, crystal structure 8=26469
phthalazine, n-π* transitions 8=41170
phthalic acid distribs, infrared spectroscopic determ. of isomers 8=34346
phthalimide derivatives, radiationless transitions, activation energy determ. 8=34879
phthalimides, polarisation in fluorescence spectrum, temp. dependence 8=30502
phthalocyanines, polycryst., visible spectra 8=36444
picene, low-lying triplet excit. states, 0.4-1.0μ 8=25616
piperazine hexahydrate, cryst. struct. 8=39846
piperidine, microwave spectrum 8=25617
pivaldehyde, microwave spectrum 8=25618
plastic crystals, similarities of grain growth with metals 8=39657
polarization quenching by excitation transfer 8=43844
polar vapours, thermal cond. obs. 38°-200°C 8=34657
polyenes, oscillator strengths for electronic spectra 8=43386
porphin type cpds., NH oscills. found, problem of internal H bond 8=34353
porphyrin diacids, molec. and cryst. struct. 8=44282
porphyrins, Stark effect 8=43388
porphyrins, Zeeman effect 8=43387
potassium acid maleate, l.f. Raman spectra 8=27633
potassium-chloranil, mag. transition in 210-260°K region 8=31535
potassium dihydrogen isocitrate, aconitase, substrate, crystal structure 8=26462
potassium hydrogen diformate, crystal structure rel. to H bonding 8=39837
potassium hydrogen fumarate, X-ray analysis 8=44275
potassium oxalate monoperhydrate, crystal structure 8=26535
potassium oxalate monoperhydrate, $K_2C_2O_4.H_2O_2$, crystal structure 8=26535
potassium tartrate, second harmonic generation on ruby laser irrad. 8=45199
proflavine, photoreduction in aqueous solution by steady light 8=49962
proline-chloranil complex, formed by interact. in buffered aqueous ethanol 8=36571

Organic compounds—contd
propane, ab initio bond-orbital calc. 8=38891
propane, chemisorption on Pt, effect of pre-adsorbed water 8=27738
propane diffusion flame, C particles size and temp. distrib., i.r. obs. 8=46257
propane ionizing collisions and electron mean free paths obs. at 10^{-4} torr 8=34458
propane, liquid, refr. index, 17.4-65.8°C, 4358, 5461 and 5791Å 8=30483
propane, liq., self-diffusion 8=34812
propane-O_2-Al flame, heat transfer characts. rel. to Al seeding 8=32973
propane-O, K_2CO_3 seeded plasma in m.h.d. duct, pot. distrib., obs. 8=39084
propane-O_2-N_2 detonation products, elec. conductivity at cm. wavelengths 8=27731
propane, reactions with H_3^+ 8=39057
propane, self-inhibited pyrolysis 8=36570
propane, solid, reaction with T atoms 8=27770
n-propanol-benzene-ethylene glycol system, ternary liquid phase equilibrium 8=48079
1-propanol, n. m. r. relax. 8=30535
1-propanol-water mixture, thermometric analysis 8=27771
propargyl alcohol, internal rot. from microwave spectrum 8=43389
propargyl alcohol, microwave spectra for isotopic forms 8=25532
propargyl amine microwave spectra for isotopic forms 8=25532
propene, solid, reaction with T atoms 8=27770
propionic acid, microwave spectrum 8=25620
n-propylamine and N-deutero derivative, i.r. and Raman spectra 8=27620
n-propyl ether, h.p. viscosity obs. 8=34793
propylene, ab initio bond-orbital calc. 8=38891
propylene-Ar system, liq.-vapour phase equilib. and solubility 8=39479
propylene, charge transfer reactions with Ar^+, Kr^+, and CH_4^+ 8=34445
propylene, deuterated, microwave spectrum and internal rot. 8=43390
propylene, ion-mol. reactions 8=43492
propylene-Kr system, liq. -vapour phase equilib., and solubility 8=39479
pyperine, supercooled, dipole polarization activation 8=39403
pyranthrone, crystal structure rel. to that of flavanthone 8=26550
pyrazine, n. m. r. oriented in nematic phase 8=34913
pyrazine, phosphorescence, at 4.2°K 8=36534
pyrazine, SCF calc. 8=25622
pyrazine, SCF wavefunction, all-electron 8=34360
pyrazine, spin-lattice relax. and low temp. phosphoresc. decay 8=36535
pyrazole 3(5) and 4 isomer derivs., u. v. and i. r. absorpt. spectra 8=34361
pyrazolecarboxamides, i. r. abs. of carbonyl group 8=47645
pyrene, carrier photogeneration and luminescence processes 8=40679
pyrene, CH-bond moments 8=34343
pyrene, flash excited absorpt. spectrum 8=43840
pyrene, fluoresc. of monomer in solid soln. 8=45300
pyrene in biphenyl, delayed excimer fluoresc. 8=32076
pyrene in cyclohexane and ethanol, delayed luminesc. and triplet quantum yields, obs. 8=25941
pyrene in n-paraffins, electronic spectra rel. to phase transitions of solvent 8=25938
pyrene-iodine complex, a.c. conductivity rel. to temp. 8=44700
pyrene, low-lying triplet excit. states, 0.4-1.0μ 8=25616
pyrene, luminesc. in soln. and mixed crysts. 8=25942
pyrene molecular crystal, electronic spectra calc. from Davydov decay 8=40248
1, 1-pyrene-pyromellitic dianhydride, structures at 110-300°K 8=26554
pyridazine, e distrib. at N atom by N^{14} quadrupole coupling consts. meas. 8=25643
pyridazine, vibr. spectra 8=25933
pyridine-alcohol solns., light scatt. and intermolec. interacts. 8=34857
pyridine, anal. of n. m. r. spectrum using different methods 8=29821
pyridine-benzonitrile liq. mixture, conductance showing charge-transfer interacts. 8=30515
pyridine, CNDO calc. of electronic spectra 8=29767
pyridine Cu(II) chlorobenzoates, mag. props. 8=36072
pyridine derivs., ν(CH) bands near 3000 cm^{-1}, i. r. absorpt. study 8=29799
pyridine mol. applic. of self-consistent field calc. in differential overlap approx. 8=34357
pyridine-paraffin solns., light scatt. and intermolec. interacts. 8=34857
pyridine, photoexcit. triplet state yield rel. to vibr., gas-phase obs. 8=25630
pyridine, SCF calc. 8=25622
pyridine, SCF wavefunction, all-electron 8=34359

Organic compounds—contd
pyridine-trinitrotoluene liq. mixture, conductance showing charge-transfer interacts. 8=30515
pyridines, substituted, e distrib. at N atom by N^{14} quadrupole coupling consts. meas. 8=25643
pyridinyl diradicals, stable, intramolec. assoc. 8=43424
pyridoxine hydrochloride, crystal structure 8=26551
pyrimidine, e distrib. at N atom by N^{14} quadrupole coupling consts. meas. 8=25643
pyrimidines, polysubstituted, i. r. spectra in 700-200 cm^{-1} range 8=47670
pyrolysis using hot W wire 8=36577
2-pyrone, struct. of electron impact fragments 8=39061
pyrrole-dimethyl sulphoxide, n. m. r. and H-bonding 8=25644
pyrrole mol., applic. of self-consistent field calc. in differential overlap approx. 8=34357
pyrrole, n.q.r. 8=31929
pyrrole, wavefunction, ground-state 8=34358
quaternary ammonium salts displaying anticholinergic activity, crystal structure 8=39847
p-quaterphenyl layers, meas. of space charge limited currents 8=31427
p-quaterphenyl, space charge limited currents 8=49274
quinine bisulphate, as fluoresc. standard 8=39391
quinoline and isoquinoline, at liq. N$_2$ temp., i. r. spectra and interpret. of fund. vibrs. 8=34362
quinoline, depolarized doublet of light scatt. from thermal shear waves 8=43817
quinonediazide cations, electronic structure 8=34363
quinoxaline triplet state excit. and radiative decay paths rel. to mag. interactions 8=25624
radioluminescence rel. to mol. excitation kinetics, obs. 8=39384
rare earth ethyl sulphates, specific heat, mag. contribution 8=44343
rhodamine-B film, photocapacitive effect 8=40680
rhodamine B in ethylene glycol, fluoresc. meas. of photon flux 8=46653
rhodamine C solution, optical generation during excitation with pulsed light sources 8=30480
rhodamine dyes in polymethyl methacrylate rods, stimulated emission when flashlamp excited 8=28714
rhodamine films, photocapacitance and photocurrent "memory" 8=36032
rubidium oxalate monoperhydrate, $Rb_2C_2O_4 . H_2O_2$, crystal structure 8=26535
rubrene, cryst. spectra under press. 8=49779
rubrene, liquid, with luminophor, electroluminescence 8=43848
salicylaldehyde mol. obs. of infrared spectrum 8=43394
salicylanilide, u.v. spectrum 8=38903
salicylic acid and salts, luminescence polarization diagrams 8=32077
N-salicylideneaniline hydrolysis in H_2O-methanol 8=48164
salicylidene aniline, photochromism 8=45302
salol, crystal growth rate retardation in capillaries 8=26261
salutaridine methiodide, cryst. structure 8=44276
Schiff bases, aromatic, lattice parameters and space groups 8=26456
scintillators conference, 1966 8=45250
Seignette salt cryst., surface electroluminescence 8=41228
selenophene, microwave spectrum 8=43395
semicarbazide hydrochloride, e.s.r. of γ-irrad. crysts. 8=49604
semicarbazides, i. r. abs. of carbonyl group 8=47645
semicarbazones, i. r. abs. of carbonyl group 8=47645
semiconductor, photoconductivity meas. in SHF band 8=49406
semiconductors, book review 8=27140
semiconductors, e.s.r. g-shift mechanism due to conjugated π-electrons 8=44747
semiquinones, O^{17} hyperfine components in e.s.r. spectra hyperfine splitting constants and line width variations 8=40942
silacyclobutane, i. r. spectra and ring puckering 8=29800
silicone rubber, C-black filled, elec. cond. rel. to uniaxial stretch ratio 8=26752
soap films, solvation forces 8=27686
sodium salicylate, fluorescent emission band shape interpretation 8=45303
sodium salicylate, luminescence, temp. effects 8=45301
sodium salicylate on MgO, diffusion indicator in far u.v. 8=49778
starch-iodine complex, metallic nature 8=31869-70
stearic acid, monolayer, polarization effects in reflection spectra 8=37683
stearic acid on steel and glass, desorpt. and exchange, obs. 8=30768
stearic acid, reaction with Ca^{2+} ions at air/water interface 8=41264
steroid conformations 8=25626
stilbene, anisotropic, in scintillation response for neutron directional meas. 8=47154
stilbene derivatives, electrical conductivity and optical absorption 8=49145
trans-stilbene, 5–100μ thickness meas. from refr. index dispersion 8=32043

Organic compounds—contd
stilbene powder, Raman line intensities and dispersion effects elimination, obs. 8=36445
stilbene response to internally generated protons 8=47169
stilbene, scintillation γ and n spectrometer, $E_n \geq 0.1$ MeV 8=33821
stilbene, scintillation n counter, 2.5 MeV 8=33817
stilbene, scintillation n counter with γ discrimination 1–10 MeV 8=33822
structure of π-electron chain with bridging struct. at each end, study of elec. cond. mechanism 8=26893
succinonitrile, elastic consts. in plastic phase 8=44611
sucrose growth and habit rel. to adsorbed impurity effect 8=26266
sulpholane/Hg interface, specific adsorpt. rel. to elec. double layer 8=30396
Teflon, high finish polishing 8=37096
terpene alcohols and related cpds. i.r. spectra 8=39381
para-terphenyl crystal structure 8=26560
meta-terphenyl, e radiolysis, temp., intensity and post irrad. effects, 1.35 MeV 8=36624
para-terphenyl, 5–100μ thickness meas. from refr. index dispersion 8=32043
p-terphenyl, space charge limited currents 8=49274
dl-α-terpineol e-transfer oxidation by manganic acetate, 100°C 8=49881
testosterone: mercuric chloride 2:1 complex, crystal structure and absolute config. 8=44283
tetra alkyl metals, total ionization cross section 8=25719
tetrabenznaphthalene, CH-bond moments 8=34344
tetrabenzonaphthalene, MO calcs. 8=34312
1, 2, 3, 4-tetrabromo-1, 2, 3, 4-diphthaloylcyclobutane, cryst. and molec. struct. 8=48688
tetrabutylammonium hexafluorophosphate, F exchange with BF_3 or PF_5 in CH_2Cl_2 soln., n. m. r. obs. 8=25960
tetracene, charge-transfer exciton and ionic levels 8=27254
tetracene, cryst. fluoresc., temp. depend. 8=36536
tetracene, cryst. spectra under press. 8=49779
tetracene, 5–100μ thickness meas. from refr. index dispersion 8=32043
tetracene, fluoresc. in host crysts. at high press. 8=49822
tetrachloroethylene, cavitation bubble dynamics 8=25850
tetrachloroethylene, u.s. cavitation using pulsed n source 8=25849
1, 2, 3, 4-tetrachloro-5-exomercaptobicyclo (2, 2, 1) hept-2-ene. spin coupling consts. of SH proton 8=43412
tetrachlorohydroquinone, structure rel. to H bonding system 8=30619
4, 5, 9, 10-tetrachloro-2, 7, 11, 12-tetrathia, 1, 3, 6, 8, tetrazatricyclo dodeca-3, 8, diene 8=26496
tetracyanocyclobutane, crystal structure 8=39854
tetracyanoethylene, i. r. polarized spectra of charge transfer complexes, rel. to vibr. assignment 8=38879
tetracyanoethylene, on TlI, surface charge-transfer groups form., obs. 8=36028
tetracyanoethylene-Pt complex, cryst. and molec. struct. 8=34322
7, 7, 8, 8-tetracyanoquinodimethan: N, N, N′, N′-tetramethyl-p-phenylenediamine 2:1 complex, crystal structure 8=39852
tetracyanothiophene, crystal structure 8=39850
tetraethylammonium perchlorate, elec. cond. in valeronitrile 8=48197
1, 2, 3, 4-tetrafluorobenzene, n. m. r. 8=47701
tetrafluoroethylene copolymer, γ-irradiated, photoinduced and thermal radical conversions 8=49953
2, 4, 4, 6-tetrahalogenocyclohexa-2, 5-diene-1-one crystal structure 8=26482
tetrahalophthalic anhydride complexes with aza-aromatics, spectra 8=38902
tetrahydrofuran and deutero-substitutes, vibration spectra 8=43397
tatrahydrofuran/CCl_4 binary mixture, proton mag. relaxation 8=39425
tetrahydrofuran, far i. r. spectra 8=25567
tetrahydronaphthalene with acetone, diethylether or ethylbromide, adsorpt. on solids 8=48477
tetrahymanone, crystal structure 8=26562
tetraiodethylene, vibrational spectra and force consts. 8=43396
tetramethyl ammonium chloride in D_2O, polarization effects in reflection spectra 8=37683
tetramethyl ammonium hydroxide pentahydrate, crystal structure 8=26505
tetra methylammonium-uranylchloride, spectra 8=41166
tetramethylbiphosphine-bis(monoborane) crystal and mol. structure 8=39851
N, N, N′, N′-tetramethyl-p-diaminobenzene iodide, crystal and mol. structure 8=26524
tetremethylethylene, intermediates in photolysis 8=49951
N′-tetra methyl-p-phenylenediamine in soln, biphotonic ionization 8=43861
tetra-methyl-n-phenylenediamine, on TlI, surface charge-transfer groups form., obs. 8=36028
2, 2′, 6, 6′-tetramethylpiperidine-4-ol-1-oxy radical, e.s.r. and susceptibility, obs. 8=25661

Organic compounds—contd
2,2′,6,6′-tetramethylpiperidine-4-one-1-oxy radical, e.s.r. and susceptibility obs. 8=25661
2,2,6,6 tetramethyl 4-piperidinol 1-oxyl, sp. ht. 1.3°–74°K 8=30969
(2,2′,5,5′-tetramethylpyrrolidine-3-one-1-oxy) radical, e.s.r. and susceptibility, obs. 8=25661
tetramethylsilane, as internal reference for p.m.r. 8=34929
tetramethyl tin free radical form., e.s.r. detection 8=34382
tetranitromethane, thermal decomposition in gaseous phase 8=49879
tetraphenylbutadienes, effect of intramolec. twisting on fluoresc. 8=39390
tetraphenylphosphonium bis(tetracyanoquinodimethanide), crystal structure 8=39853
tetraphenylporphin and Ag deriv. solid solns., growth and structures 8=26034
s-tetrazine, geom. struct. from 5515Å transition 8=25627
s-tetrazine, visible spectrum 8=25628
thienothiophenes, isomeric; electronic spectra 8=43399
thioacetamide as ion donor for PbS growth in silica gels 8=48555
thioacetamide-S-oxides, crystallography 8=48689
thiobenzophenone anion radical, formed by light excitation in (n, π^*) band 8=29827
thiophene, monoalkyl substitutes, scatter and i.r. absorpt. 8=34364
β-thiophenic acid, disorder from 3D-X-ray exam. 8=26499
thiourea and deuterated deriv., crystal structures by n-diffr. above and below ferroelec. transition 8=44251
thiourea derivatives, X-irrad., e.s.r. 8=31886
thiourea, thermal expansion anisotropy in paraelectric phase 8=26597
DL-threonine, n.m.r. 8=43398
L-threonyl L-phenylalanine p-nitrobenzylester hydrobromide, structures 8=26468
thulium acetylacetonate, Mossbauer effect in structure determ. 8=43959
thulium benzoate, Mossbauer effect in structure determs. 8=43959
thulium oxinate, Mossbauer effect in structure determ. 8=43959
titanium tetramethoxide, crystal and mol. structure 8=44284
titanocene derivs, $(C_5H_5)_2TiCl_2$ and $C_5H_5TiBr_3$, mol. structure by gas e-diffr. 8=25629
tolane-diphenyl mercury solid solns., single crystal study 8=26040
toluene, adsorption on silica, n.m.r. obs. 8=39615
toluene, higher excimer states 8=34872
toluene, nanosec. pulse radiolysis 8=49979
toluene, photoexcit. triplet state yield rel. to vibr., gas-phase obs. 8=25630
toluene, scattering of ruby laser emission, large angle 8=48158
toluene, stimulated Brillouin scattering, anti-Stokes components origin 8=25922
toluene scintillators, max. H_2O conc., dioxane and naphthalene effects 8=43844
toluene, Stokes freq. gain on Rayleigh wing, obs. and calc. 8=39364
toluene to diacetyl triplet-triplet energy transfer in solns., obs. 8=34316
tomatidine hydrobromide and related steroidal sapogenins, crystal structure 8=26563
tosyloxylupinane rearrangement product, structure determ. 8=26564
transition-metal organometallic cpds., mass spectra 8=39053-5
S-triazine, lattice energy calc. 8=26578
s-triazine, low temp. phase transition 8=48411
tribromobenzene singlet–triplet transitions, triplet state assignments and spin-orbit coupling 8=25536
tributylphosphate, association with H_2O 8=34775
trichloroacetic acid + benzophenone mixture, dielec. props 8=48190
2,4,6-trichloroanisol, n.q.r. of Cl 8=41014
1,3,5-trichlorobenzene, mol. vibrations from NQR exam. 8=27516
1,2,4-trichlorobenzene, n.m.r. of oriented mols. 8=43403
trichlorofluoromethane, ice and water clathrates, dielec. props. 8=27255
tricycloquinazoline, and $CuCl_2$ complex crystal structures 8=26486
1,3,5-trideutero-benzene, liquid, proton spin-lattice relaxation 8=39429
triethanolamine, AgBr recrystallization and photosensitivity effects 8=30821
triethylamine-I_2 complexes, dipole moment, dielec. meas. 8=30511
triethylamine in water, hypersound velocity and dispersion near critical stratification point 8=48143
triethylammonium:tetracyanoquinodimethan complex, semicond. electronic cond. 8=27139
triethylsulphonium cpds., i.r. spectra 8=29776
triethylene diamine, pure n.q.r. 8=41015
trifluoromethyl iodide laser, Q switching and mode locking 8=37576
trifluoromethylphosphine, microwave spectrum, molec. struct. 8=25574
trifluoromethylphosphonylchloride, prep. and props. 8=34330
3,3,3-trifluoropropyne, n.m.r. in liq. cryst. solns. 8=34930
triglycine, aq. solns., u.s. absorpt. 8=48142
triglycine fluoberyllate, electrocaloric effect and dielec. constant 8=27291
triglycine selenate ferroelectric props. at high hydrostatic pressures 8=40622
triglycine selenate, optical indicatrix rotation in phase transition region 8=27638
triglycine selenate, spontaneous polarization, permittivity and sp. ht. temp. dependence 8=44890
triglycine sulphate crystals; isomorphous with ferro-electrics, i.r. spectra 8=49774
triglycine sulphate, Cu^{2+} e.p.r. rel. to bonding, obs. 8=36243
tri-glycine sulphate: Cu^{2+}, n.m.r. 8=36241
triglycine sulphate, deuterated, solid soln. prep., ferroelec. props. rel. to conc. 8=49377
triglycine sulphate, domain and defect structs. in ferroelec. and paraelec. phases, obs. 8=31031
triglycine sulphate, domain twins in growth 8=27292
triglycine sulphate, domains, change in width with time 8=31437
triglycine sulphate, elec. resist., effect of atmospheric humidity 8=35985
triglycine sulphate, electro-optical props. near phase transitions 8=27637
triglycine sulphate, ferroelec., anomalous sp. ht. near Curie pt. 8=39923
triglycine sulphate, ferroelectric domains and dislocations interactions 8=27287
triglycine-sulphate ferroelec. group, temp.-induced changes in the 575 cm^{-1} band at phase transition 8=36438
triglycine sulphate, fundamental absorpt. edge temp. dependence, room temp. -62°K 8=41172
triglycine sulphate, γ-irrad., e.s.r. of free radicals formed 8=31844
triglycinesulphate, γ-irradiated, optical annealing investigation by e.s.r. 8=44400
triglycine sulphate, interaction of defect and domain structures in ferro- and paraelectric states 8=40620
triglycine sulphate and isotypes, ferroelec. transition mechanism from i.r. spectra 8=27290
triglycine sulphate and isotypic crystals, solid solns., ferroelectric phase transition 8=27293
triglycine sulphate, optical indicatrix rotation in phase transition region 8=27638
triglycine sulphate, permittivity at 20 kHz obs. 8=44889
triglycine sulphate, polarization in d.c. field and resistivity determ. 8=40618
triglycine sulphate, polarization process, ultrasound effects under static conditions 8=35986
triglycine sulphate, pyroelec. effect for rapid temp. change in Curie pt region 8=31443
triglycine sulphate, second harmonic generation, ferroelectric domain structure influence 8=35977
triglycine sulphate, specific heat in region of Curie temp. 8=35430
triglycine sulphate, surface sparks 8=40623
trilaurin, kinetics of cryst. growth from melt 8=26255
trimethylamino borontrichloride, crystal and mol. structure 8=44264
trimethyl aluminium dimer 8=43348
trimethylammonium chloride, crystal structure rel. to H bonding 8=26526
trimethylbenzenes, isomeric, solid, n.m.r. between 4°K and m.p. 8=36276
trimethylene selenide, ring-puckering vibr. 8=29802
trimethylene sulphide, $(CH_2)_3S$, crystals, i.r. absorpt. and Raman spectra 8=41171
tri-n-alkylsulphonium halides, osmosis 8=30454
trinitrobenzene cryst. complexes, high press. spectra 8=27635
trinitrofluorenone cryst. complexes, high press. spectra 8=27635
trinitrotoluene, equation of state, Debye-Einstein construction method 8=48728
trinitrotoluene, transition conduction zone behind shock wave front, time interval 8=49068
triphenylarsine 8=43381
triphenylarsine, mol. addition compounds with SnX_4 (X=halogen), i.r. spectra, stretching vibs. freq. shifts 8=25631
triphenylphosphine, and complexes, vibr. spectra 8=43380
triphenylphosphine, mol. addition compounds with SnX_4 (X=halogen), i.r. spectra, stretching vibs. freq. shifts 8=25631
triphenylphosphine oxide, and complexes, vibr. spectra 8=43380
triphenylphosphine sulphide-I_2 complex, cryst. struct. 8=44281
1,5,9-d_3-triphenylene, CH-bond moments 8=34344
triphenylene, CH-bond moments 8=34344
triphenylene, delayed luminesc., growth and decay 8=32073

Organic compounds—contd
triphenylene-d_{12}-Rhodamine B solids solns., triplet-singlet energy transfer kinetics, obs. 8=36533
triselenoparaldehyde, crystal structure rel. to mol. conformation 8=35365
tris(α-diimine)Fe(II) complexes, calc. electronic struct. calc. 8=43365
tris-oxalato Cr(III), low temp. emission spectra 8=27670
1, 3, 5-trithiane, crystal structure 8=26565
tropylium salts, molec. motion in solid 8=49659
trypaflavine, photoluminesc. quenching by rhodamine in glycerine solns. 8=48174
tryptamine derivs, preliminary X-ray data 8=39839
tryptophan in mixed polar solvents, photo-induced trapped electron rel. to photobleaching, 77°K 8=36446
tryptophan solns., photo-induced trapped electron behaviour at 77°K 8=25935
$\alpha\beta$-unsaturated ketones, u. v. and i. r. spectra 8=29788
uracil, valence-electron density maps 8=48620
uranine, mol. plus solvation shell vol. in glycerol-ethyl alcohol and glycerol-H_2O solns., obs. 8=34285
uranyl acetate/triphenylphosphine oxide complexes, crystal structure 8=44259
urea and deuterated urea, vibrational spectra, force constants and mean amplitudes of vibrs. 8=38904
urea, as structure breaker for water 8=48085
urea soln., permittivity meas. below 1 MHz 8=28452
urea/thiourea inclusion cpds, gen. structural principle 8=48691
urea-urease mixture, u. s. relax. obs. 8=48144
urethanes, substituted, C–Br bond 8=49780
urotropin and Br, I complexes, vibr. spectra and bond strengths, 4000-350cm^{-1} 8=49781
DL-valine, n.m.r. 8=43398
vanadyl porphyrin complexes, luminesc. 8=45299
vandyl acetylacetonate, effect of co-ord. to sixth posn. on e.s.r. 8=43872
varnish on Fe and Pt anodes, elect. characts. 8=49916
N-vinyl cpds., n. m. r. and i. r. spectra 8=47671
vinyl acetylene, i. r. absorpt. band, electro-optical parameters 8=34365
vinyl bromide, deuterated, i. r. spectra 8=47672
vinyl chloride, passive Q switching of CO_2 laser 8=28679
vinyl diacetylene, i. r. absorpt. band, electro-optical parameters 8=34365
vinyl fluoride, vibr. anal. 8=25632
vinylphosphonic acid dichloride γ-induced polymerization, mechanism, obs. 8=49913
vinylidene fluoride, molec. g values and paramag. susceptibility 8=29803
vit. B_{12}, corrin skeleton and its precorrinoid intermediate crystal structure 8=26479
water dioxane, mixtures, proton spin-lattice relax and viscosity 8=43770
Wurster's blue iodide, crystal and mol. structure 8=26524
xanthene dyes in 2-chloroethanol, $T^* \leftarrow S$ bands in absorpt. spectra 8=30494
X-H bond stretching vibr. intensities in gas to CCl_4 solns. transition, obs. 8=34298
p and m-xylenes, liq. thermodydnamic props, calc. with significant struct. theory 8=43767
o-, m-, p-xylene solid, tunneling effect and hindrance pot. 8=31924
o-xylol, scattering of ruby laser emission, large angle 8=48158
Ag complex, bis(8-hydroxyquinoline)Ag(I) pyridine solvate, cryst. and molec. struct. 8=39765
Ag halide complexes, far i. r. spectra 8=27619
Ba methacrylate dihydrate, polymerization by X-rays 8=27741
BF_3-amine, i.r. absorption spectra of charge transfer complexes 8=25539-40
$BF_3S(CH_3)_2$, Raman and i.r. spectra 8=25541
CBr_4 complexes with methyl-substituted benzenes and pyridines, n. q. r. 8=36282
C–C, C = C and C–H bonds, electron densities 8=26009
CCl_4, with acetonitrile, absorpt. of CN 8=34319
CCl_4, carbonyl C=O and vinyl C-H groups, valence oscills. 8=30493
CCl_4, dielect. const. rel. to pressure and temp. 8=39396
CCl_4, elec. cond. at 65-160 kbar, obs. 8=34903
CCl_4, evaporation and condensation coeffs., maximum values 8=43915
CCl_4, graphite oxidation inhibition 8=27696
CCl_4-Na, K flames, chemiluminesc., C_2 high-press. bands excitation mechanism, obs. 8=38816
CCl_4, non-linear dielec. susceptibility obs. 8=34888
CCl_4, polarization in refl. shock waves 8=43858
CCl_4, rel. to polypropylene mol. motion, 140-373°K 8=48510
CCl_4, Raman intensity in various solvents 8=30488
CCl_4, shock wave compressed, refr. index, anomalies, obs. 8=39370
CCl_4, vibr. relax. and u.s. attenuation 8=39360
$CD_3^+ + CD_4 \rightarrow C_2D_5^+ + D_2$, reaction kinematics 8=38963
$CD_4^+ + CD_4 \rightarrow CD_5^+ + CD_3$, reaction kinematics 8=38962
$(CD_3)_2C{=}O$, torsional vibr. spectra 8=25601
$(CD_3)_2NH$, torsional vibr. spectra 8=25601

Organic compounds — contd
CF_2, unstable mol., microwave spectrum 8=25468
CF_3, struct. calc. 8=47664
$(CF_3)_4As_2$, vibr. spectra and struct. 8=25604
CF_3COOH-$HCOOH$, H-bond, microwave rotation spectra 8=25577
CF_3H, reaction with O atoms, rate const. 8=36568
$(CF_3)_2PF_3$, i. r. spectra and struct. 8=25576
CF_3PF_4, i. r. spectra and struct. 8=25576
CF_3SF_5, vibr. spectra 8=25516
CF_4, far-i. r. absorpt. spectrum 8=29772
CF_4, growth of ionization currents 8=29983
C–H, C–C, C = C bonds, electron densities 8=26009
CH-radicals, h.f.s. null field reson. 8=43418
CH^+, $^1\Delta \rightarrow {}^1\Pi$ and $^3\Sigma \rightarrow {}^3\Pi$ band systems 8=38942
CHF_3, quadrupole moment, from microwave spectral broadening 8=29729
CHO^+, ht. of formation 8=36557
CHO^+ ion-mol. proton transfer reactions 8=49869
CH_2-CDCl, Raman line intensities and depolarizations, calc. 8=34321
CH_2I_2, crysts. n scatt. rel. to mol. and lattice vibr., obs. 8=35385
CH_2X, hybrid orbital force field calcs. 8=29781
CH_3, struct. calc. 8=47664
CH_3Br, reaction with O atoms, rate const. 8=36568
CH_3CCH, linewidths of rot. spectra 8=38889
$CH_3CH{=}CH_2$, far i. r. torsional vibr. spectra 8=25601
CH_3CH_2Br, far i. r. torsional vibr. spectra 8=25601
CH_3CH_2Cl, far i. r. torsional vibr. spectra 8=25601
$(CH_3CD_2)_2O$-AlX_3(X=Cl, Br) coordination compounds 8=25569
CH_3CN, linewidths of rot. spectra 8=38889
CH_3CN. 2HCl, crystal structure by n-diffr. 8=26530
$(CH_3)_3CNCO$, vibr. spectra 8=29732
CH_3Cl, reaction with O atoms, rate const. 8=36568
$C^{13}H_3Cl$, vibr.-rot. bands 8=29794
CH_3D, elec. dipole moment 8=38896
CH_3D, matrix-isolated, i. r. obs. of nuclear-spin-species conversion 8=38830
CH_3I, crysts. n scatt. rel. to mol. and lattice vibr., obs. 8=35385
CH_3I reactive scatt. with Rb atoms, asymmetry 8=47728
$C^{13}H_3NC$, struct. by n. m. r. determ. 8=34336
CH_3NF_2 and CD_3NF_2, i. r. spectra, rot. coupling between vibrs. 8=25597
$4(CH_3)_3N.41H_2O$, cryst. struct. 8=39844
$(CH_3)_2O$ polar molecule, electronic screening effect and relax., perturbed by foreign gases 8=29815
CH_3OPCl_2, vibr. spectra 8=38892
CH_3SiHD_3, i. r. spectrum 8=25603
CH_3SiHD_3, i. r. spectrum 8=34338
$(CH_3)_3X - C \equiv C - Cl$(X = C, Si, Ge, Sn), n.q.r., bonding props. 8=38912
CH_4 and CD_4, fluid, phys. props. 8=30588-9
CH_4 and CD_4, Br^{82} isomeric-transition-induced reactions 8=45410
CO group, assignment of second singlet 8=32045
$COBr_2$, vibr. intensities 8=38875
$COCl_2$, vibr. intensities 8=38875
COF_2, thermodynamic props., 12°K to b. p. 8=30573
COF_2, vibr. intensities 8=38875
C_2Br_2, i. r. spectra and vib. mode assignments 8=45236
C_2Cl_2, i. r. spectra and vib. mode assignments 8=45236
C_2F_6, growth of ionization currents 8=29983
C_2H_4 chemisorpt. on metals, heat of reaction, expt. and theory 8=36585
C_2I_2, i. r. spectra and vib. mode assignments 8=45236
C_2H_5I and CH_3CD_2I, fragment ions from X-irrad. 8=47795
C_2H_5OD–D_2O mixture vapour press. isotope effect 8=48283
C_2H_6, CH_3CD_3, and C_2D_6, i. r. torsional spectra 8=29778-9
C_4F_8, unimolec. decomposition, shock tube-mass spectrometer study 8=45321
$(C_4H_9)_2SnO$, resonance scatt. of γ-quanta, ang. distrib. for component of quadrupole doublet 8=39511
$(C_5H_5)_2TiAl(C_2H_5)_2$, crystal and mol. structure 8=26504
C_6H_4-containing cpds., dielec. relax. 8=30505
$[(C_6H_5)_3FC_4]_2$, isomerization 8=39642
$C_6D_5GeCl_3$, vibr. spectra 8=34351
$C_6H_5GeCl_3$, i. r. and Raman spectra 8=25615
$[(C_6H_5)_3P^+ - CH_2]$ radical in crystalline matrix, hindered rotation of CH_2, e.s.r. study 8=49616
$(C_6H_5)_3Sn. Mn(CO)_5$, cell constants and space group determ. 8=26467
C_6H_6 in silica gel, proton spin relax. 8=29814
C_6H_{12} vapours, u.s. propag. for large freq. /press. 8=43691
C_7H_{12}, mono- and bicyclic isomers, mass spectra 8=39059
$C_{24}H_{10}$, cryst. struct. 8=39856
$C_{26}H_{26}O_2$, cryst. struct. 8=39856
Ca stearate Langmuir films, I-V-temp. characts. and cond. mechanism, obs. 8=44902
Ca tartrate, doped and undoped, gel growth obs. 8=35246
Co acetate tetrahydrate, absorpt. spectrum 8=32046
Co formate, crystal structure 8=26507
Cu acetate monohydrate, anomalous mag. and optical behaviour 8=36434
Cu(II) alkanoates, structure by X-ray analysis 8=26463

Organic compounds — contd
Cu(II) azo complexes in soln., e.p.r. to delocalized mag. electron 8=25950
Cu diethyldithiocarbamate, paramagnetism 8=49485
Cu(II)2, 2′-dipyridine aq. solns., n. m. r. and e. p. r. 8=34926
Cu formate tetrahydrate, antiferroelec., deuteron n. m. r. 8=44269
Cu hexamethylene-dithiocarbamate, struct., X-ray obs. 8=30919
Cu phthalocyanine, α and β forms, crystal structure 8=26545
α-Cu phthalocyanine, e.s.r. 8=49608
Cu phthalocyanine, i.r. emission from cryst. 8=41021
Cu(II) pyridine complexes, e.p.r. in soln, glasses and polycryst. state 8=27469
Cu salicylate hydrate, OD-structure from X-ray investigations 8=26480
Dy elthyl sulphate, paramag. relax. Mossbauer study 8=27472
Eu β-diketone chelates, synthesis, and fluoresc. of cryst. and in soln. 8=32071
Eu chelates, in water-methanol solns., luminesc. spectra 8=30499
Eu chelates, luminesc., D isotope effects 8=30503
Fe oxalate and isotypic cpds, OD-structure from Guinier patterns 8=26534
Fe(III)N-methyl-N-phenyldithiocarbamate, n. m. r. 8=27507
Fe(III) N, N-dialkyldithiocarbamates, Mössbauer effect 8=48329
Gd chelates soln., organic ligand, laser action 8=24349
HCCH, isotopic, force const. displays 8=43302
H^3-labelled, free radical formation by autoradiolysis, e.s.r. study 8=47709
$[HgOSi(CH_3)_4]_2$, crystal structure 8=48683
Ho ethylsulphate, absorpt. and Zeeman effect of $^5I_8 \rightarrow {}^3K_8$ and $^5G_4$ transitions 8=49777
I_2 charge-transfer complexes, far i. r. intensities 8=25586
ICl charge-transfer complexes, far i. r. intensities 8=25586
ICN charge-transfer complexes, Raman intensities 8=48163
K acid phthalate, spherically bent cryst., soft X-ray specroscopy 3 to 30Å 8=32033
K oxalate hydrate, partly deuterated, isotope effect in d. m. r. 8=45122
K phthalocyanine, crystal structure 8=26545
K_2 tetranitroethide, cryst. struct. 8=26561
KH bisphenylacetate, H bonding and crystal structure 8=26514
Li-acetylene, electronic struct. 8=34255
Mg phthalocyanine, films, barrier effect, photoconductivity 8=40678
Mn acetate tetrahydrate, absorpt. spectrum 8=49740
$Mo_3O_4(C_5H_7O_2)(C_2H_5O)_3$, crystal structure 8=26461
N-containing heterocycles, N^{14} quadrupolar relax. and H lineshapes 8=29819
N-phosphorylcreatine hydrate, disodium salt, crystal structure 8=44279
NH. . . H intramolec. H bonds 8=25609
$(NH_4)_2$ dimolybdomalate, crystal structures 8=26521
Na alkyl sulphates, ideal gaseous behaviour at oil/water inteface 8=30395
Na dodecyl sulfonate, adsorpt. on α-Al_2O_3 rel. to heat of immersion 8=49854
Na dodecyl sulphate, equilib. adsorpt. by wool 8=30780
Na hexodecylsulphate, equilib. adsorpt. by wool 8=30781
Ni dimethylglyoxime, spectral shift for high press. meas. 8=50477
Ni glyoximates, origin of colour 8=27535
OD, Zeeman effect in (0, 0) band 8=38848
$OP(OCH_2)_3CCH_3$, cryst. struct. 8=44278
P complexes, P^{31} overhauser effect 8=40993
$Pb(CH_3)_4$, fragment ions from X-irrad. 8=47795
$Rb_2C_2O_4 \cdot H_2O_2$, rubidium oxalate monoperhydrate, crystal structure 8=26535
Rh formate, crystal structure 8=26507
Sc formate, crystal structure 8=26507
$Sn_3(CH_3)_4Fe_4(CO)_{16}$, crystal and mol. structure 8=26537
Tb chelates, luminesc., D isotope effects 8=30503
Ti methoxide, crystal and mol. structure 8=26523
with VB group elements, vib. spectra rel. to freq. changes 8=34294

Orthicons. See Electron tubes.

Oscillations
See also Electromagnetic oscillations; Liquid oscillations; Piezoelectric oscillations; Vibrations.
anharmonic oscillator, perturbations effects, teaching demonstration 8=41803
balance, lever equal-arm, testing and adjusting by oscillation period 8=45953
bar, deflection meas. by microwave interferometry 8=37238
beam-envelope, in orbital accelerators 8=33465
betatron, control by on-line computer 8=33466
chain, composed of two homogeneous parts, small oscills. 8=41647
circular cylinder in elastico-viscous fluid 8=47930
coherent, in synchrotron, damping technique 8=33443
dynamic systems with imperfect boundaries, wave motion and stability 8=23923

Oscillations—contd
elastic isotropic half-space in which transverse velocity is min. at some depth and monotonous in rest 8=46148
electro measuring app. with strings, stability of mobile part 8=33009
ferrites, resonant elastic, excitation at non-linear ferromag. resonance 8=49064
finite radial, of spinning cylinder 8=37244/5
fluid in cavity in rotating solid body 8=46018
fluid, viscous, non-homogeneous 8=47931
forced, conducting, viscous liquid 8=33118
gas masses, adiabatic pulsations and convective unstability 8=50321
gas, nonlinear, resonant tube closed at one end 8=30266
giant, line width rel. to nonlinear de Haas-van Alphen effects 8=31489
high-freq., of thin elastic variable-thickness layer 8=41813
laser, giant pulse tandem using Nd doped glass 8=42075
model suspended in stream, active damping 8=46143
molecular-beam maser, quenching 8=46531
neutron stars, torsional 8=45762
one dimensional oscillator, quasirandom 8=46016
pressure, meas., dynamic charact. of transducers connecting channels 8=45963
quartz, longitudinal and transverse acoustic osc., method of exciting 8=48723
quartz plates, stress depend. of freq. 8=49049
relaxation in avalanche diodes 8=49299
shell, cylindrical, filled with fluid, surrounded by elastic medium 8=41816
sinusoidal, generator for 0.01 to 100 Hz range 8=41912
sphere in elastic solid, rectilinear 8=23928
sphere in elastic solid, torsional 8=23927
sphere in viscoelastic fluid, prod. of secondary flow 8=39155
stars, radial adiabatic pulsation, asymptotic soln. 8=45684
'summed and differential types', in vib. system under parametric excitation 8=32877
synchrotron, Moser transform. appl. 8=33439
3rd order, initial conditions for obs. 8=32866
tori, freely supported, hollow; circumferential axisymmetric oscills 8=32878
torsional of two-layer cylindrical rod, calc. of associated internal friction 8=28362
in two-phase mixture, elec. and mag., damping and dispersion 8=40600
water surface in tank, resonance obs. 8=34724
water surface in tank, resonance theory 8=34723
wave film type, of quantized thickness, propagation 8=46149
CdS photoconductor, l.f., induced by i.r. quenching 8=44934
n-Ge, hot carrier, spatial depend. 8=44786
Sn–SnO–Sn Josephson junction, relax. oscills. 8=40412
Y Fe garnet, standing-spin-wave modulation of reflected microwave power 8=40847

Oscillistor effect. See Semiconductors.

Oscillistors. See Semiconducting devices.

Oscillographs. See Electrical measurement.

Oseen method. See Flow; Hydrodynamics.

Osmium
balls, thermionic emission and vacuum work function 8=31467
Fermi surface anal. from galvanomag. props. 8=43027
Os^{187}, conc., spectrographic determ. of isotopes 8=36635
Os^{189}, Larmor freq. rel. to H^1, and mag. moment 8=27512

Osmium compounds
OsF_6, electron diffr. and molec. struct. 8=38858
Os-Ir alloy with dissolved Fe, solute resistivity temp. dependence 8=40318

Osmosis
electro, temp. dependence of rate constants for acetone and deionized water 8=32130
ethylene glycol-methanol (cellulose membrane) syst., diffusion permeabilities 8=25904
interfacial mass transfer in membrane transport in batch dialyzer 8=48120
ion exchange membranes 8=25901
ion transport, Nernst-Planck eqns. and electroneutrality 8=39345
maleic anhydride-styrene copolymer in tetrahydrofuran, osmolic press. rel. to mol. dimens., obs. 8=43776
membrane systs., ternary, transport processes 8=25903
osmometry with diffusible polymers 8=34819
polyvinylpyrrolidone solns., equilib. at high pressures 8=39347
tri-n-alkysulphonium halides, aq. solns. 8=30454
$Cu_2[Fe(CN)_6]$ membranes, H_2O transport kinetics 8=48121
He isotope solns, pressure and enthalpy 8=28436
He solns, isotropic irreversible osmotic relax. 8=24037

Overhauser effect. See Nuclear magnetic resonance and relaxation.

Oxidation
alloys, linear, comp. changes 8=32092
benzene in gas phase, photochem., and radical formation 8=41286
Chromium molybdenum steels, CO_2 oxidation resistance, effects of chem, comp., mech. treatment and remelting 8=45339
diols by titanous peroxide system, e.s.r. 8=32117

Oxidation—contd

- ethylene, by photolysis of NO_2 8=36615
- ethylene, electrochem., oscillatory kinetics 8=49939
- formate, electrochem., oscillatory kinetics 8=49939
- graphite, anisotropy 8=41239
- graphite, inhibiting effects of Cl and CCl_4 8=27696
- graphite, pyrolytic and isotropic, in atomic O, and O_2, kinetics to 2100°K 8=36556
- graphite, structure after thermal oxidation 8=44167
- hydrocarbons, gaseous, photochemical, mechanism, e.s.r. invest. 8=36616
- magnetite to γ-Fe_2O_3, mechanism rel. to Fe^{2+} diffusion, kinetics 8=27702
- metal dibonde composites, oxidation resistant, synthesis 8=45317
- metals, at high temp., influence of specific area and core dimension changes 8=36551
- metals, growth of thick scale layers, effects of size and shape of specimen 8=36552
- metals, rate-constant determ., low-temp., using discontinuous film resistance changes 8=49883
- methyl oleate, γ-induced 8=41293-4
- molten salts containing CuCl, by gaseous O_2, kinetic data 8=32102
- noble metals and alloys, cathodic reduction kinetics rel. to Tafel slope 8=45380
- silicide films on Nb chromised, titanised and chromo-titanised 8=35176
- steel, austenitic 20% Cr/25% Ni/Nb-stabilized, structure of surface oxides formed in CO_2 at high temp. 8=41238
- steels, austenitic stainless, growth in oxidising gases 8=45338
- steel, Cr-Ni/Nb stainless, by CO_2, n-irrad. 580°-840°C obs. 8=27705
- steel in CO_2, and simultaneous carburisation rel. to transport in porous scales 8=48777
- steels, low alloy, in CO_2, and excrescence form. mechanisms, $\leqslant$ 550°C 8=32098
- steel, stainless, austenitic and ferritic, in CO_2, influence of 0.5%Y alloy addition 8=27704
- steel, transformer, hot-rolled, at 800-1180°C, and structure of oxide films 8=36561
- steel, transformer, hot-rolled, internal oxidation zone structure and props. 8=36562
- stress corrosion cracking, rate controlling step 8=44534
- styrene emulsion polymerization, i.r. spectroscopy 8=32125
- dl-α-terpineol by manganic acetate, e transfer, 100°C - 8=49881
- Zircaloy-2 in O and H_2O vapour, kinetics and mechanism, 350-500°C 8=32106
- Zircaloy-2, of surface layer, white spots rel. to struct. and orientation 8=35187
- Zircaloy-2 in water, 200°-300°C, obs. 8=27726
- in Ag, of dispersed Al, as hardening process 8=35649
- Al alloy, crude; production by reduction of bauxites 8=30956
- Al alloy, crude, production by reduction of Japanese colloidal earth 8=30955
- Al alloys, -vacancy production 8=26640
- $BaTiO_3$ crystals grown from KI flux, hydrogen reduction process 8=27695
- CO adsorbed on Ni 8=48487
- Co, 750° to 1000°C using inert Au spheroidal markers 8=49862
- CrS_x, at 1050°C, weight-gain kinetics 8=36558
- CrS_x-coated-Cr, at 1050°C, weight-gain kinetics 8=36558
- Cs, in flames 8=49877
- in Cu, of dispersed Be or Al, as hardening process 8=35649
- Cu (111) rel. to diffusion in Cu_2O films struct. defects obs. 8=44042
- Fe, film growth in neutral soln. 8=27706
- Fe, passive layer form., presence of H in outer layer 8=35171
- Fe, to form wustite($Fe_{1-y}O$), and composition-oxygen partial pressure diag., thermogravimetric determ. 8=36540
- Fe-18% Cr alloy, complex scale formation 8=45340
- Fe-Cr alloy, oxidized surface film interface 8=44074
- Fe-Cr alloys, study by glancing angle X-ray diffr. technique 8=49868
- Fe-Cr binary alloys 8=36559
- Fe-Cr-O system, low-temp, glancing angle X-ray diffraction film technique 8=27703
- Fe-Mn alloys, internal rate rel. to temp. 8=45336
- α-Fe_2O_3, chemical reduction to Fe_3O_4 and substrate-product topotaxy 8=26072
- α-Fe_2O_3 whiskers and twinned platelet, gaseous oxidation rel. to defect diffusion during growth 8=44150
- GaAs, thermal in range 400-530°C, struct. of layers 8=49870
- HfC, 1790-2000°K 8=45351
- In-Ag alloys, transition from internal to external 8=49874
- Ir, formation of surface "molecular clusters" 8=45343
- K, in flames 8=49877
- NH_3, in shock waves 8=41256
- Na, in flames 8=49877
- Nb, 450°-720°C, kinetics rel. to scale morphology 8=49878
- Nb, mechanism from oxygen diffusion meas. in Nb_2O_5 crystals and scales on Nb 8=48785

Oxidation—contd

- Nb, rate-constant determ., low-temp., using discontinuous film resistance changes 8=49883
- Nb-Ta alloys, kinetics, 550-1050°C 8=36566
- Ni and alloys, kinetics 8=27713
- Ni, oxide layer formation mechanism 8=45346
- Ni, rate-constant determ., low-temp., using discontinuous film resistance changes 8=49883
- Ni_3Al-Ni_3Nb system, scale formation from X-ray microstructural analysis 8=35276
- Ni_3Nb, scale formation from X-ray microstructural analysis 8=35276
- Ni-Y alloys, mechanism rel. to scale formation 8=41257
- Ni-Y, (0.05-5.0 at.% Y), oxidation mechanism 8=41257
- O_2 absorpt. in molten salts containing CuCl 8=32102
- Pd powder 8=41260
- Pt, ellipsometry of O-containing films 8=27754
- Pt surface of Na, K, rel. to thermionic emission of Na^+, K^+ 8=35549
- of Si, in pure O glow discharge, rel. to prod. of uniform and non-porous layers 8=35182
- SiC heater elements, sintered, ageing rel. to elec. ageing 8=49349
- SiC, sintered, heater elements, ageing rel. to elec. resistivity changes 8=31231
- $SiH_4(g) + 2O_2(g) = SiO_2(s) + 2H_2O(g)$, silica film formation 8=44055
- Ti, in boiling dilute H_2SO_4 and HCl, differences in oxide struct. 8=39602
- Ti, kinetics, effect of O_2 press. on growth of diffusion oxygen layer 8=36573
- Ti, rate-constant determ., low-temp., using discontinuous film resistance changes 8=49883
- U intermetallic cpds (with Si, Fe, Mn, Al), kinetics resistance and velocity 8=27721
- U quasitinary cpds, (with Si, Fe, Mn, Al), kinetics, resistance and velocity 8=27721
- UC surface to form UO., film, diffusion mechanism 8=39604
- UN, rel. to deformation, e-microsc. studies 8=27718
- UO_2 powders, in storage rel. to fabrication and irrad. props 8=45349
- US, low temp. behaviour 8=27719
- US-ZrS solid solns, low temp. behaviour 8=27719
- VO_2 in molten $VO_{2.5}$ soln., obs. 8=27724
- W, (112) face, and O_2 adsorpt. 8=26107
- Zr films, 300-500°C, film structure obs. by e. microscope 8=35186
- Zr in CO_2, prevention by Cr coating, $\leqslant$ 650°C 8=32107
- Zr, rate-constant determ., low-temp., using discontinuous film resistance changes 8=49883
- Zr, thin noble metal film effects 8=49882
- ZrC, 1130-2160°K 8=45351

Oxygen

- abundance in NGC7027 obs. 8=45713
- abundance in solar photosphere 8=28171
- absorption in melts containing CuCl, reaction kinetics 8=32102
- acoustic absorpt., effect of H_2, CO_2 or H_2O impurity obs. 8=39211
- adatoms on metal surface, work function and desorpt. energy 8=35193
- adsorption and reactivity with CdS powders, comp. with H,A gases 8=26135
- adsorption by metal surface from CO_2 kinetics 8=27735
- adsorption by Mo and Ti films, effect on resistance and work function 8=40322
- adsorption effect on spectral distrib. fine structure of CdS photocond. 8=44917
- adsorption on Ag films and reaction with co-adsorbed H, 8=39616
- adsorption on Ag(111), surface rearrangement study by LEED 8=26133
- adsorption on Al (100) face, LEED obs. 8=44072
- adsorption on Cu, and resulting surface structs., LEED studies 8=26136
- adsorption on Cu spherical crysts., resulting surface structs. 8=26099
- adsorption on Mo single cryst. face (100) 8=35195
- adsorption by Sb and Bi, rel. to surface reactivity 8=26106
- adsorption on Si, influence of elec. props. 8=27134
- adsorption on (110) and (113) faces of W 8=39622
- adsorption on W, and effects associated with thermal desorpt. 8=39626
- adsorption on W, Cs and Hg coadsorbate interaction with low energy electrons 8=39623
- atmosphere, effective heights and absorption coeffs. at 4.1 mm 8=27909
- atmospheric, abs. 1.3 to 0.23μ, and role of short-living 8=32236
- atmospheric, absorption of solar u.v. radiation 8=50128
- atmospheric emission, red at λ6300Å, rel. to geomag. activity 8=36750
- atmospheric, monitoring using metallized membrane polarographic electrode 8=27775
- atom, and molec., kinetics of attack of graphite, pyrolytic and isotropic 8=36556
- atom, atmospheric, spectral obs., twilight and at night 8=27949
- atom, auto-ionizing e energy spectra 8=39050

Oxygen—contd
atom diffusion through gases 8=49910
atom, fine-struct. level transitions, electron induced, as cooling mech. in ionosphere 8=32298
atom, four-level, resonance line problems and radiative transitions 8=38627
atom reactions with CH_3 radicals 8=49880
atom reactions with CH_3Cl, CH_3Br and CF_3H, rate consts. 8=36568
atom recombination rates, 3000 to 3800°K, direct shock tube meas. 8=29666
atoms, detected during γ-radiolysis of CO gas 8=36623
atoms, radiative combination by inverse dissoc. 8=38932
atoms, Rydberg orbitals calc. 8=29620
atomic, photoionization cross section meas. 8=29949
beam, reflection at Pt surface at different temps. 8=25668
λ Boo, abundance ratio Mg/O calc. from i.r. spectra 8=50286
cathodic reduction in fuel and corrosion cells 8=37374
charge transfer from p and H atom, cross-sections 8=38737
chemisorption and desorption on CdS, effect on surface photoconductivity 8=49413
chemisorption by V, isotherm-isobar kinetics 8=36584
chemisorption on graphon, kinetics, 450-675°C 8=45362
chemisorption on metals, expt. and theoretical results for heat of reaction 8=36585
chemisorption on Ni films, kinetics at adsorbate-adsorbent interface 8=27737
chemisorption states on ZnO and CdS 8=32118
chemisorption on ZnO, effect of d.c. electric field 8=49905
concentration in Si, i.r. spectrophotometric obs. 8=49992
convective diffusion in blood, rel. to membrane-type artificial lungs 8=43793
desorption from W substrate by e. impact 8=49901
diffusion in Nb_2O_5 crystal and scales on Nb rel. to Nb oxidation behaviour 8=48785
diffusion in Zr and Zr-Cu alloys, using $O^{16}(d, p)O^{17}$ reaction 8=31017
diffusivity in P stabilized b.c.c. Fe 8=44387
dilute, use in operation of intermed. temp. fuel cell 8=33030
dipole discharge, self-sustaining 8=38995
dissociated, heat transfer means., with catalytic flat plate 8=25826
dissociative ionization 8=29976
dissolved, effect on stability of Cu_2O surface film on Cu electrode in 3% NaCl aqueous soln. 8=41279
distribution coeff. in Ge, determ. 8=48779
dry graphite burning in stream, temp. meas. by spectrum-line reversal temp. 8=46256
on electron microprobe samples, gas jet decontamination 8=27808
emission line at 6300Å in night airglow, height profiles rel. to position 8=36800
excitation by 0.15-1.0 MeV protons 8=38847
5577 A line and continuum in night airglow 8=41392
γ-oxygen, vapour-condensation and neutronography 8=26260
green line λ 5577 in glow discharge, new emission mechanism 8=29625
HD 161817, high velocity star: abundance calc. from spectra 8=50282
hyperfine contact interaction calc. 8=43199
impurity in metals, determ. by $O^{16}(n,\gamma)N^{16}$ 8=32167
interferometric analysis of conc. in gaseous mixtures 8=49988
Ion IV, V, VI, emission spectra obs. 8=29605
ionic and molecular colision, absorpt. meas. in d.c. discharge 8=47740
ionization of mixture with water vapour, cross sections and mobilities of different species 8=39023
ionosphere D layer, metastable $O_2(^1\Delta)$, ionization by 1027-1118Å 8=32323
ionosphere D region, atoms and ozone associative detachment and dissociative attachment, l.f. obs. 8=32324
isotopes (O^{15}, O^{17} and O^{18}), bibliography of uses, 1963-66 8=34185
isotope exchange on Pt powder 8=41236
isotope meas. of SO_4 ions in water from lakes and rivers 8=50095
isotopic comp. in sulphate ions in Italian thermal springs 8=50093
isotopic composition var. in cave concretion 8=50096
liquid, dielec. permeability meas. at ca. −190°C rel. to liq. air permeability calc. 8=30512
luminescence during u.v. photolysis 8=34266
mass spectrometric analysis 8=36633
in mesosphere, role in governing electron conc. 8=27880
mesosphere, var. during auroral events 8=27938
metals, H, O, N joint determ., isotope method 8=27784
minimum conc. rel. to non-combustion region in diving atmospheres 8=49884
mobility in alkali feldspars, by autodiffusion and alkali atom exchanges 8=35477
mol., r.f. line broadening anomaly obs. at low pressure 8=29759
ordered arrangement in Zr-O interstitial solid soln. 8=35289

Oxygen—contd
π 'Ori', abundance ratio Mg/O calc. from i.r. spectra 8=50286
paramagnetic impurity molecules rel. to positron lifetime 8=29851
penetration into $CaF_2:Sm^{2+}$ 8=44382
α phase, absorption of light rel. to temp. and impurity conc. 8=49745
pressure depend. of min. ignition temp. of metallic mats. 8=36578
radiolysis and photolysis, vibr. excited O_3 8=36620
self diffusion coeffs. in monoclinic ZrO_2 8=35514
solid, at 4°K, absorpt. in range $(15-33) \times 10^3 cm^{-1}$, rel. to simultaneous transitions 8=32019
solubility in b.cc. Fe, and interstitial migration 8=48361
solubility in liquid Ag alloys 8=39313
solubility in liquid Ag 8=39317
sorption in Nb and Ta, kinetics, 1100 ~ 2000°C 8=49895
sound absorpt., effect of applied mag. field 8=39210
spectra, forbidden transitions rel. to O_4 dimer content pressure and temp. dependence 8=34273
thermal cond., mag. field gradient depend., obs. 8=39199
thermal conductivity rel. to mols. collision cross-section reson. in crossed mag. fields, obs. 8=34660
θ Hya, abundance ratio Mg/O calc. from i.r. spectra 8=50286
throughput in Al porous plug, combustion study 8=36580
traces in gases, meas. with solid electrolyte cells 8=41298
vacancies in $CaWO_4$, direct obs. 8=31047
vacuum u.v. absorpt. spectrum 8=34274
vapour press., effect on oxidation kinetics of Ti 8=36573
Venus atmosphere 8=32552
volume diffusion in CoO, meas. by proton activation of O^{18} 8=35483
X-rays, soft, absorpt. cross sections, calc. 8=45727
Zeeman effects for large quantum no.s and freqs. 5-20 MHz 8=47501
Zircaloy-2 oxidation kinetics and mechanism, 350-500°C 8=32106
Al films on Ta(110), interaction 8=35159
CdS {0001} surfaces, adsorption, and structure study, by LEED 8=30719
CO_2 laser-system, sealed-off, effect on gas composition 8=46584
in Fe, liquid, formation factor for alumina inclusions group 8=35651
Fe-3%Si, adsorption, rel. to surface and grain boundary energies 8=26102
in Ne-O laser, 3^3p level population inversion mechanism, obs. 8=28692
Ne-O_2, phase equilib., from 63°-152°K at 5000 psi 8=34981
$O(^1D)$, deactivation by O_2 8=47542
$O(^1D)$ gas-phase reaction with CO_2, rate const. 8=36614
O I lines $\lambda\lambda$ 1302-06, 1152Å, experimental oscillator strengths 8=50319
OI 5577 and 6300Å nightlow intensity, diurnal, seasonal and solar cycle vars. 8=32276
OI, 5577 and 6300 Å, nightglow, S. America photometric obs. 8=45498
[OI] 5577Å emission and continuum at 5300Å in night airglow 8=45499
OI λ 5577 line in night airglow, variations in width 8=27950
O I, improved atomic level values 8=47503
O1 solar forbidden lines wavelengths and equivalent widths, abundance obs. 8=37044
O III $2p^2$-$2p3s$ arrays, line strengths and transition probabilities 8=45915
O VII excitation by electron impact, theoretical rates 8=25378
O VIII solar emission spectrum obs. 8=28165
O-rich Si, Li diffused, annealing of e irradiation induced defect 8=26632
O^{16} ion beams, lifetimes and excited states for multiply charged ions 8=43217
μ-$O^{16,18}$ atoms 2p → 1s transitions and atomic radius, obs 8=34190
$O^{16}O^{18}$-O_2 mixture, diffusion, Senftleben effect 8=30316
O^{17} enriched H_2O and D_2O, spin echo O^{17} T_1 and T_2 obs. 8=48212
O^{17} hyperfine constants in e.s.r. spectra of semiquinones hyperfine splitting constants and linewidth variations 8=40942
O^{17}, n. m. r. in HCl aq. solns. of Co(II) 8=30541
O^-, associative detachment reactions, electron prod. 8=39051
O^- e detachment by e impact, cross-section obs. 8=39036
O^-, laser photodetachment, ang. depend 8=25713
O^-, prod. and extraction from h.f. source 8=46431
O^+ ion beams, abundance of excited ions 8=28582
O^+ ions, reaction with O_2 and N_2, temp. depend of rate coeffs. 8=29977
O^+ mobility in dry air, obs. 8=39027
O^+, photoionization cross-sections 8=39044
O^+, reaction with vibr. excited N_2 8=41253
O_2, ab initio calc. on 62 low-lying states 8=47614
O_2 absorption meas. in lower atmos. 8=36748
O_2, interaction with excited organic mols. 8=38956

Oxygen—contd
O_2, in Ar, effect on muonium, and on polarization of bound muon 8=42482
O_2 in dayglow, altitude profile in i. r. atmos. system 8=36797
O_2, in u.v. afterglow, Herzberg II emission spectra 8=34277
O_2 molecule, charge exchange with He^+ and Ne^+, 2-250 eV 8=38758
O_2 reactions with He^+ in upper atm. 8=27937
O_2, Rydberg absorpt. series and ionization energies 8=47615
O_2, Schumann-Runge bands, isotope effects on Franck-Condon factors 8=34271
O_2, spectral emissivity of Schumann-Runge bands 8=34275
O_2, Stark broadening in Schumann-Runge system 8=34272
O_2, Tanaka-Takamine Rydberg series 8=25512
O_2^-, elastic coupling in KCl 8=48337
O_2^- impurity reorientation in alkali halides 8=48822
O_2^- in NaF, e.s.r. and optical studies 8=45097
O_2^- state e spectra, obs. 8=34224
O_2^-, structure, free and in alkali halide 8=49704
O_2^+, auroral green line excitation by dissociative recombination, rocket expt. 8=41401
O_2^+ band excitation by e-impact (80-1500 eV) 8=25490
O_2^+ in E-region of ionosphere, effects of metal-ion layers 8=36858
O_2^+ ion beams, abundance of excited ions 8=28582
O_2^+, ions, excitation, lifetimes and decay cross-sections 8=34261
O^-_4, stability 8=25718
O-Cu, liquid phase diagrams 8=48074
O + O_2 combination kinetics 8=41258
O^- + N^+, ions, neutralization cross section, obs. 8=34455
O^+ and O^{++} in magnetosphere, concs. 8=50165
O_2 + H_2 mixtures, detonation, influence of molec. mass on limits 8=32115
O_2 and O, density in lower thermosphere above Sardinia, mass spectrometric determ. 8=27939
O_2 and O_1, number densities in thermosphere above Fort Churchill and Sardinia 8=36761
and α-Ti mixed crystals, lattice struct. rel. to hydrogenation, n diffr. obs. 8=35357
TiNb33, N addition rel. to supercond., microstruct. and workability, obs. 8=44742
TiNb40, N addition rel. to supercond., microstruct. and workability, obs. 8=44742
in UO_2, diffusion rel. to oxide films growth on UC, obs. 8=39604
W, adsorption on (110), (211), (111) and (100) planes, field emission study 8=30778
on W (110) and (100), interaction and desorption processes, mass spectrometry 8=35198
in Zr, diffusion inhibition by Cr coating, ≤650°C 8=32107
in Zr, up to 4.2 at. %, effect on tensile deform. 8=44609
in Zr, Mo, Hf, W, anal. by He^3 irrad. 8=27818

Oxygen compounds
oxalyl halides, u. v. absorpt. spectra 8=29795
oxides e microprobe analysis with oxide standards, correction factors 8=27810
oxyhalides, radiation phys. and chem. effects 8=31140
refractory oxide solid solns with fluorite, pyrochlore and perovskite, anionic conduction 8=49920
CO_2, O transfer to metal surface, kinetics 8=27735
OCN^-, ht. of formation 8=29980
OCN^- formation in gas-phase ion-mol. reactions 8=41259
OCS, anisotropy in mag. susceptibility and molec. quadrupole moment 8=25511
OCS, elec. dipole moment 8=47587
OD^- in KCl, ang. correlation function of rotator 8=43968
OF_2, double-ζ LCAO SCF MO calc. 8=29756
OF_2, ht. of formation 8=49864
OH^- and OD, spectra in solid Ne, evidence of rotation 8=32020
OH chemiluminesc. in H_2 + O_2 reaction in shock tube 8=49889
OH emissions in upper atmos., rel. to noctilucent cloud form 8=36794
OH, interstellar, stimulation by phonons 8=28094
OH in KCl, paraelectric resonance characts. 8=49345
OH, matrix-isolated, i.r. spectrum 8=34276
OH mol. doubling transitions obs. and calc. suitable for radioastronomy 8=43328
OH on MgO surface, i.r. spectros. 8=49894
OH, prod. in interstellar shock waves 8=28095
OH^- in KCl, ang. correlation function of rotator 8=43968
OH^+, $^3\Pi_i$ excited state, fine structure 8=29830
O-H_2 and HD solid mixtures, spin-lattice relax. time 8=27493
O_2AsF_6 and isotypes, structure from n-diffr. studies 8=25469
O_2SbF_6 and isotypes, structure from n-diffr. studies 8=25469

Ozone
atmosphere, absorption coefficient, Dobson spectrophotometer obs. 8=45465
atmospheric, absorption of solar u.v. radiation 8=50128
atmospheric content during ring Sun eclipse, 20 May 1966 8=50130
atmospheric content, Jan.-Mar. 1967, obs. 8=50132
atmospheric, 40 years research at Oxford, history 8=36723
atmospheric, mean absorpt. coeffs. rel. to Dobson spectrometer 8=47973

Ozone—contd
density distrib. in mesosphere in Japan, meas. by u. v. photometers 8=36719
distribution on isobaric surfaces from May 3, 4th (1963), rel. to aviation 8=36720
formation, var. across discharge gap 8=25700
fluctuations rel. to upper air perturbations 8=41348
i.r. spectrum 8=34278
ionosphere D-region, and O atoms, associative detachment and dissociative attachment, l.f. obs. 8=32324
in mesosphere, role in governing electron conc. 8=27880
mesosphere, var. during auroral events 8=27938
mesospheric, night meas. by obs. of u. v. airglow 8=36760
planetary distrib., latitude depend., meas. by earth satellites and u. v. spectra 8=36721
on silica gel, adsorpt. rel. to annealing temp., —80°C 8=30786
spectra, line by line calc. rel. to statistical model 8=43327
in stratosphere and mesosphere, quasi-biennial osc. 8=36714
stratospheric, Arctic and Antarctic, seasonal changes 8=45441
stratospheric-tropospheric exchange based on radioactivity, O_3 and potential vorticity 8=45448
transmission meas., appl. of new random model 8=38780
vibrational excitation in radiolysis and photolysis of O_2 8=36620
and zenith radiation depolarization 8=32273

pH. See Electrochemistry.
p—n junctions. See Semiconducting devices/p—n junctions.
P—V—T relations. See Equations of state.
Pair creation. See Electron pairs; and under individual particles, e.g. Mesons.
Palaeomagnetism. See Rock magnetism.

Palladium
atom, first $^3P_1$ state, h. f. s. and lifetime obs. 8=25379
collector in thermionic converter, comparison with Re 8=28487
crystal, anomalous vibr. and electronic sp. ht. 8=26575
degassing with CO or O_2, phase superstructure 8=48395
diffusion in Al, due to near surface effect 8=39964
electrocrystallization 8=41283
electrolytic deposits, internal tension rel. to current density and metal conc. in electrolyte 8=36610
electronic structure by photoemission and optical studies 8=31293
exchange interactions, strain depend. 8=45025
Fermi surface, effective mass 8=40250
films, adsorpt. and interact. of N_2 8=26138
films, orientation after deposition on NaCl 8=44085
$L\beta_2$-emission band rel. to electronic structure 8=41129
magnetic-moment meas. vs field and temp., rel. to exchange enhancement 8=31526
paramagnetic susceptibility calc. 8=49483
powder oxidation 8=41260
resistivity, elec., rel. to s-electron-paramagnon scattering 8=31323-4
sorption of NO, and mag. susceptibility 8=44075
surface annealing changes, effect on CO adsorption 8=48424
surface atoms, mean displacement 8=30935
thermal and elec. cond., e—e and phonon scatt. Lorenz numbers, 4-20°K 8=35462
Pd(100) surface, purity and structure from Auger spectroscopy and LEED 8=27355
Pd-H probe electrode as microreference electrode 8=36605

Palladium compounds
alloys, electronic structure rel. to band structure of pure metals 8=31294
resistance, electrical, at high pressures of gaseous H at room temp. 8=44697
oxidized complex with α-benzyldioxime, e. s. r. investigation 8=36248
Pd(II) complex, bis(N-isopropyl-3-methylsalicylaldiminato) Pd(II) crystal structure 8=26425
Pd—Ag alloys, n.m.r. 8=31913
Pd-Ag alloys with Gd and Nd impurities, resistance anomaly 8=31326
Pd_x—Ag_y: Cd(Nd), resistance anomalies rel. to matrix. comp. 8=31325
Pd-Au alloys, adsorpt. of H, electron-donation model 8=26139
$PdCl_2$ in molten eutectic $MgCl_2$-NaCl-KCl, voltammetry 8=32131
PdCr alloys, thermoelect. power 8=31450
Pd-Cu alloys, thermodynamic props. of formation 8=27714
Pd-D alloys, elec. cond. 4°-300°K obs. 8=40329
Pd-Fe alloys dil, Fe hyperfine fields, 1.3-4.2°K 8=31701
PdFe alloys, exchange interactions, strain depend 8=45025
Pd—Fe alloys, high-field susceptibility 8=40752
Pd-Fe alloys, high field susceptibility and nuclear spin-lattice relax. time conc. dependence 8=36080

Palladium compounds—contd
  Pd-Fe alloys, hyperfine field at Fe, mag. field dependence 8=36081
  Pd-Fe alloys, very dil., low temp. magnetization 8=36079
  Pd-Fe alloys, spin-wave stiffness constant field dependence 8=45026
  Pd-Fe, hyperfine coupling constants from nuclear sp. hts. down to 0.02°K 8=31495
  PdFe, ferromagnetic polarization, distrib. 8=36099
  PdFe, spontaneous magnetization 8=36172
  Pd_3Fe alloy, hyperfine interaction constants from nuclear sp. hts. 0.15-1°K 8=31504
  Pd-H alloys, elec. cond. 4°-300°K obs. 8=40329
  Pd_2MnAl, magnetic and chemical order rel. to order in Heusler alloys 8=31700
  Pd_2MnIn, Pd_2MnSn, Pd_2MnSb(Heuster alloys), order rel. to mag. and chem. order in Pd_2MnAl 8=31700
  Pd-Ni alloys, compressibility in ferro- and paramag. states 8=35715
  Pd-Ni alloys, dynamic susceptibilities 8=31491
  Pd:Ni dilute alloys, e specific heat conc. depend., local exchange enhancement model 8=35433
  Pd:Ni dilute alloys, low-temp. specific heat and ferromag., localized exchange enhancement model 8=35432
  Pd-x at.%Ni, (x⩾O), low temp. resistivity rel. to s-electron-paramagnon scattering 8=31323-4
  PdO-Ln_2O_3, phase relations in air 8=35123
  Pd-Pt alloys. n., susceptibility, correlation effects 8=40997
  $Pd(SO_3)(NH_3)_3$ crystal and mol. structure 8=26431
  PdSb in thin films, electron diff. study 8=30909
  PdSb, superconducting, containing dilute solutions of CrSb and MnSb 8=27029
  $PdSb_2$ in thin films, electron diff. study 8=30909
  $PdSb_3$ in thin films, electron diff. study 8=30909
  Pd_3Sb_5 in thin films, electron diff. study 8=30909
  Pd-20 at.%Si alloy, amorphization on irradiation with U^{235} fission products 8=31154
  Pd-Sn liq. alloys, struct. 8=48082
Paper
  permittivity and dielectric loss, optical meas. with colloidal mass emitter 8=28766
Paramagnetic resonance and relaxation
  See also Lasers; Masers.
  absorption meas. with RE-1301 radiospectrometer at 4.2°K 8=24261
  acetonitrile-d_3, γ-irradiated, rel. to trapped electron and its reversible reaction 8=49955
  acoustic paramag. resonance, 1-200 Mc/s, methods for study 8=49592
  acrylamide, γ-irradiated aq. solns, 77°K, e.s.r. 8=30524
  alkali-arsenate glasses e.s.r. rel. to γ-irrad. 8=45074
  alkali-germanate glasses, e.s.r. rel. to γ-irrad. 8=45074
  in alkali halides, O_2^- centers, electronic structure 8=49703
  alkali-phosphate glasses, e.s.r. rel. to γ-irrad. 8=45074
  alkylferrocene, spectra 8=47680
  alternant hydrocarbons, pairing theorem 8=47650
  alums, Ti^{3+} substituted, explanation from crystal-field origin rel. to structural details 8=43935
  α-amino acids at 77°K, e.s.r. after γ or X irrad. rel. to dissociative electron capture 8=36621
  amino acids, free radicals in γ-irrad. crysts. 8=40907
  amino acids, γ-irradiated, defect investigation 8=26634
  dl-alanine, γ-irradiated, rel. to optical annealing investigation by primary defects 8=44400
  anion radicals, electrolytically prod., study of phys. props and electronic struct. 8=43860
  apatite structure, paramag. centres 8=31848
  apparatus for e.p.r. solid state obs. of radicals formed in gas phase by 5 to 500 eV electrons 8=25652
  aromatic free radicals, g-factors, precise meas. and correlation with π-orbital energies 8=47708
  aromatic hydrocarbons in glassy soln., triplet excitation on transfer rel. to line shape 8=40902
  aromatic mols. and phosphoresc. vars. rel. to singlet-triplet admixing 8=27461
  aromatic phosphorescent hydrocarbons in glassy solns., e.s.r. spectra, dynamic effects in line-shapes 8=49596
  automatic field tracking magnetometer for meas. 8=46370
  barysilite, pyrosilicate and pyrogermanate isomorphs, e.p.r. of Mn^{2+} 8=40931
  1,4-benzoquinone radical in soln., spectral linewidth alterations, 20-80°C 8=47681
  beta-diketone negative ions, triplet state e.s.r. 8=47682
  biphenylene, positive and negative ions, C^{13} hyperfine splittings 8=47650
  4,4′ and 4,2′-bis (α, α-diphenyl-β-hydrazyl)-3,3′,5,5′-tetranitro diphenyl sulphones, e.s.r. 8=49595
  1,4-Bis-(2,2,6,6-tetramethyl-4-hydroxy-4-piperidyl-1-oxyl) butadiene, spectrum stable at room temp. 8=39417
  bis (α-thiopicolinanilido) Cu(II), isotropy of hyperfine struct. from N atoms 8=27463
  Bloch's magnetodynamic eq., two modifications and generalizations 8=47678
  blue proteins: Cu^{2+} 8=49782
  broadening of e.p.r. lines, and dynamic polarization of nuclei 8=40891
  calcite: Mn^{2+}, e.s.r. 8=40932
Paramagnetic resonance and relaxation—contd
  calcite, x-ray irradiated, of CO_3^- 8=49600
  calcite, Y^{3+}-stabilized Co_3^{3-} mol.-ion 8=49620
  cavity-coil config. for ENDOR expts. 8=42042
  cellubiose of free radicals in frozen aqueous solutions 8=47707
  chloroacetyl DL-alanine, irrad. cryst. 8=36240
  closed-shell molecules 8=25439
  colour centres, optical saturation 8=49586

  e.s.r. balanced detector spectrometer 8=33142
  ethylene-silica gel system, γ-ionization-polymerization obs. 8=32127
  ethylvinyl ethers and their S- and N- containing analogues 8=38909
  fast sensitive Smith chart plotter or microwave reflectometer 8=24260
  F-centre g shift values in divalent cpds., theory 8=40057
  felspars, X-irradiated, structure defects, e.p.r. exam. 8=26710
  ferricytochrome c, beef-heart 8=31865
  ferromagnetic metallic film, magnetoelastic waves, boundary-value-problems 8=40797
  ferromagnetic particles in airborne dust 8=36233
  fluoro-aromatics, phosphoresc. cpds., h.f.s. in $\Delta m=2$ transitions 8=31851
  fluoroberyllate glass, of Fe transition group ions 8=40922
  forbidden transitions ($\Delta M=2$) induced by axial crystal field 8=45073
  formamide, irrad., struct. of radical formed 8=32138
  free radical formation by autoradiolysis of radioactive labelled organic compounds, e.s.r. study 8=47709
  free radicals from γ-irrad. organic cpds, stabilized by nitroso scavengers 8=49980
  free radicals in crystals, electron resonance and ENDOR spectra 8=40969
  free radicals in soln., electron-electron double reson 8=38940
  free radical recombination obs. 8=38939
  free-radical solns., h.f.s. in weak fields 8=39418
  free radicals, polyoriented, spectra and interpretation 8=34378
  gentibiose, of free radicals in frozen aqueous solutions 8=47707
  glass borated, lattice defects, study 8=26628
  glass, V-containing, spectra of varadyl ion, hyperfine structure 8=40923

Paramagnetic resonance and relaxation—contd
glasses: Ag atom stabilized by X-rays 8=31114
glycine, γ-irrad., e.s.r. of free radicals formed 8=31844
glycine, irrad. crysts., resolution enhancement 8=49610
graphite, grade A reactor, n-irradiated at 80°K and annealed at temps up to 300°K, 8=45081
graphite, radiation damage annealing studies by ESR 8=26729
graphite, reactor damaged, charge of e.s.r. with annealing 8=36237
hydrocarbon glasses, radiation-induced trapped electrons 8=45401
hydrocarbons (isobutane, pentanes, hexanes), e. s. r. obs. of radicals formed by ionizing radiations 8=25659
hydroxyurea, irrad., struct. of radical formed 8=32138
hyperfine broadening of c. s. r. lines, particle complexes with strong exchange interaction 8=37535
ice and frozen H_2O_2 solns, irrad., l.f. spectra 8=40925
impurities in metals, perturbation method of calc. 8=49591
impurity centres in crystals, effect of applied elec. field 8=45070
impurity, e spin-lattice relax. 8=31842
insulators: rare earth ions, rel. to rare-earth ion interaction study 8=31775
interaction of two spin types, mag. depend. freq. shift 8=40892
1-iodofluorenone oxime radical in soln. 8=34907
isobutene–silia gel system, γ-ionization–polymerization obs. 8=32127
Jahn-Teller effects 8=38910
Jahn–Teller-splitting of absorpt. lines of ions in cubic lattice sites 8=31841
lanthanum ethylsulphate:Er^{3+}, spin-lattice relax. times 8=45089
line form of absorpt. in weak elec. field, calc. for cryst. symmetry Td 8=40898
linewidth near magnetic critical points, and u. s. attenuation 8=30939
liquids, nuclear quadrupole relax. 8=34907
Lorentzian lines, modulation-broadened, intensity determ. 8=43402
luminescence centres, inorganic, rel. to emission, meas. 8=41178
magnetic alloys dilute, line widths, theory 8=27460
magnetically ordered materials, Mossbauer spectra, rel. to atomic spin time fluctuations 8=30642
malonic acid, γ-irrad., separation of overlapping spectra 8=40927
maltose of free radicals in frozen aqueous solutions 8=47707
metal: dilute magnetic-ion system, localized magnetic moments study 8=27459
metals containing nonmag. impurities, temp. depend. of line width 8=49583
methoxyl group, hyperfine interaction 8=29807
methyl and deuteromethyl radicals adsorbed on Si gel, e. s. r. spectra rel. to tumbling 8=25660
methyl radicals, on porous glass surface 8=47684
3-methylpentane glass, γ-irrad., trapped electrons 8=27483
microwave-optical double reson. using circularly polarized light 8=41070
milli sec obs. by single shot sweep 8=46509
minute metallic particles 8=40894
Mössbauer spectra in presence of relax. 8=35030
muonium atom, e. s. r. rates close to splitting freqs., rel. to residual polarization 8=38773
naphthalene anion in soln., ion paring effects 8=39416
naphthalene, e.s.r. emission in phosphoresc. triplet state 8=45298
naphthalene, excitation exchange and optical spin polarization in triplet state, e. s. r. study 8=47686
naphthalene, quenching of triplet state 8=34341
β-naphthol, triplet state, acidity determ. 8=34342
5-nitro-6-methyluracil, γ-irrad. cryst. 8=49615
1-nitro-4-trifluoromethoxybenzene anion radicals, ion pairing 8=39415
nitroxide radicals from diethylhydroxylamine, dioctylhydroxylamine and N-hydroxypyrrolidine 8=25655
NN′-dimethyl and NN′-diethyl pyrazinium fluoroborate e.s.r. spectra, line widths and second order structure 8=39414
noble metal-rare earth, rel. to local moments 8=31882
non-insulating paramagnets, absorpt. and dispersion signal shape during h.f. modulation 8=49588
non-Kramers doublets, electric field induced transitions 8=49584
organic dompounds, γ-irrad., e.s.r. study of radical yield 8=49967
organic free radicals in solution, e.s.r. 8=48205
organic liquids at liquid N temp: Mn atoms stabilized by condensation method 8=30526
organic liquids: Mn atoms stabilized by condensation method 8=30526
organic semiconductors, g-shift mechanism due to conjugated π-electrons 8=44747
oxidation and fragmentation of aromatic radicals in solns. 8=32117

Paramagnetic resonance and relaxation—contd
peroxy radicals, produced by irradiation of tetrafluoroethylene-hexafluoropropylene 8=43422
phase transitions, e.s.r. study 8=49359
phenoxy radicals, C^{13} splittings 8=38947
p-phenylenediamine-chloramil charge-transfer complex. 8=31880
phonon avalanche in paramag. systems 8=23895
phosphate glass, Mo^{3+} doped 8=31879
phosphors: V (II-VI cpds.), rel. to luminesc. 8=45251
poly(α-methylstyrene), photolysis 8=27762
polycaprolactam, γ-irrad., e.p.r. and nature of saturation 8=27464
polyglycols, obs. 8=31868
polymer radicals in aq. soln. 8=34906
polymers, solid, secondary, free radical reactions during mech. damage 8=45361
poly (N-vinyl carbazole)-I complex, e.s. r. rel. to existence of charge-transfer state 8=27462
polystyrene, photolysis 8=27762
pyridinyl diradicals, stable free radicals 8=43424
pyrolytic aromatic polyimide, e.p.r. rel. to elec. cond. and struct. 8=26976
r.f. magnetic field meas. by e.p.r. in effective field 8=46366
radical formation in solutions 8=32117
radical ions of intermediate stability, e.s.r. 8=48204
radicals reaction kinetics, e.p.r. meas. 8=27690
randomly oriented triplets, h.f.s. in $\Delta m=2$ transitions 8=31851
rare gas matrix: Cd^+, Cr^+, Mn^+ by trapping donor and acceptor species and prod. photocurrent 8=40202
resonance lines, inhomogeneously broadened, second-order effects rel. to shape 8=45071
review, and description of new instrument 8=42045
rochelle salt, Cu-doped, electric shifts 8=49617
Rochelle salt: Cu^{2+}, rel. to bonding, obs. 8=36243
ruby: Cr^{3+}, Al^{27} nuclei dynamic polarization by spin–spin reservoir temp. transfer, 1.8°K 8=31892
ruby: Cr^{3+}, electron paramag. acoustic absorption at 4.2°K 8=40914
ruby: Cr^{3+}, non-linear elec.-field effects 8=40906
ruby: Cr^{3+} relaxation time, influence of impurities 8=40915
ruby cryst. with >1% Cr, e.s.r. 8=49598
ruby, electron cross relax. and nuclear polarization 8=40905
ruby, inhomogeneous line broadening 8=49597
ruby, of Cr ion-pairs, exchange-coupled, in excited optical state 8=31859
ruby of Cr^{3+} pairs, elec. field effect 8=40904
ruby, pseudo-Stark components widths rel. to appl. elec. field, ≤1400 kV/cm 8=31850
rutile, Cr-doped, microwave orientation 8=26184
saturation and spectral diffusion 8=49607
S_2^- centre in alkali-halides, paraelastic behaviour 8=45173
semicarbazine hydrochloride, γ-irrad. crysts. 8=49604
in semiconductors, problems 8=40897
semiquinones, O^{17} hyperfine components in e.s.r. spectra hyperfine splitting constants and line width variations 8=40942
silicate glass, irradiated, and thermoluminesc. and electron absorpt. spectra 8=41196
in solids, extreme narrowing techniques, application to e.s.r. 8=27458
solids, rel. to luminescence 8=31840
spectra, interpretation by vibronic mass effect 8=43252
spectrometer for low mag. field spin-lattice relax 8=46507
spectrometer, limiting sensitivity at high power levels 8=46503
spectrometer X-band, for paramag. dispersion obs. and ENDOR meas. 8=46511
spin conc. determ., error analysis 8=49590
spin-flip scatt. of conduction electrons from impurities 8=40893
spin-lattice relax., covalency effect 8=31843
spin-lattice relaxation in solids 8=49594
spin-phonon interactions in paramagnetic ion crystals 8=49593
spin packet width in nonuniformly broadened lines, meas. using double modulation method 8=40900
spin relaxation, anomalous, near mag. transition 8=49582
spin relaxation in magnetically ordered systems rel. to Mössbauer absorpt. spectra 8=43940
spin-spin coupling with n equiv. nuclei, polynomial coeffs. 8=34367
starch, γ-irradiated, e.s.r. of free radicals 8=49618
starch-iodine complex, metallic nature 8=31869-70
static mag. susceptibility meas. 8=46508
strain broadened spin resonance line shapes, broadening by point defects 8=49589
strong spin-lattice coupling, effect on e.p.r. spectra 8=40895
sym-trinitrobenzene anion, effect of Li cation on spin density 8=47714
tert-butyltropenyl radicals, mono- and tri- 8=38944
(2, 2′, 6, 6′-tetramethylpiperidine-4-01-1-oxy) carbonate, obs. 8=25661
2, 2′, 6, 6′-tetramethylpiperidine-4-one-1-oxy radical, obs. 8=25661

Paramagnetic resonance and relaxation—contd

- 2,2′,6,6′-tetramethylpiperidine-4-01-1-oxy radical, obs. 8=25661
- (2,2′,6,6′-tetramethylpiperidine-4-01-1-oxy) suberate radical, obs. 8=25661
- (2,2′,5,5′-tetramethylpyrrolidine-3-one-1-oxy)-3-azine radical, obs. 8=25661
- tetramethyl tin free radical form., e.s.r. detection 8=34382
- thiourea derivatives, X-irrad. 8=31886
- transient free radicals prod. by pulse radiolysis 8=49970
- transition-metal impurity in covalent complexes, rel. to covalency 8=35018
- trifluoromethyl radicals in inert-gas matrices 8=34381
- tri-glycine sulphate: Cu^{2+}, n.m.r. 8=36241
- triglycine sulphate: Cu^{2+}, rel. to bonding, obs. 8=36243
- triglycine sulphate, γ-irrad., e.s.r. of free radicals formed 8=31844
- triglycine sulphate, γ-irradiated, rel. to optical annealing investigation of primary defects 8=44400
- 2,4,6-triphenylpyryl radical 8=29832
- Tutton salts, spin–spin relaxation 8=31845
- two-cavity device as bimodal cavity 8=42041
- vanadyl acetylacetonate in benzene soln, effect of co-ord. to sixth posn. on g-value and hyperfine const. 8=43872
- viscous solns., paramag. relax. determ. by n.m.r. 8=30532
- yttrium ethylsulphate, obs. for nuclear quadrupole moments of $Tb^{157,158,160}$ 8=42907
- Ag, conduction-electron spin resonance obs. 8=31860
- AgCl: Cu^{2+}, Se(S) codopants 8=36235
- AgCl, detection of self-trapped holes 8=45075
- Ag:Mn, spin relax. of localized mag. moments and conduction electrons 8=31875
- AlF_3: Cr^{3+} 8=36236
- Al_2O_3, irradiated, e.s.r. of triplet state trapped hole pairs 8=40903
- α-Al_2O_3:Fe^{3+}, effect of applied elec. field 8=45070
- α-Al_2O_3. V^{2+}, Cr^{3+}, Mn^{4+}, hydrostatic press. effects, rel. to ion interact with lattice 8=45076
- Al_2O_3: V^{3+}, mm. wavelength and in intense field 8=49599
- $Al_2SiO_4F_2$: Fe^{+3} isotropic and dipolar contribs. to shfs tensor 8=36244
- B, zone-melted beta-rhombohedral, with low C content, photo-induced e.p.r. 8=40908
- B–C cpds, conc. dependence 8=31520
- B-C cpds, paramag. centre comp. dependence 8=45077
- BN, F-centres, e.p.r. spectral confirmation 8=35584
- BaF_2, n-irradiated, self-trapped holes 8=31854
- BaF_2:Gd^{3+}, cubic splitting temp. dependence, 77-950°K 8=40909
- $Ba(N_3)_2$, u.v. irrad. cryst. e.s.r. of N_2^- 8=27485
- BaO: Gd^{3+}, at 77, 4 and 2°K 8=45078
- BaO:Mn^{2+}, hyperfine coupling, temp. depend., and vibrational reson. mode 8=45079
- $BaTiO_3$-$BiFeO_3$ solid solns. rel. to dielec. and mag. phase transitions 8=27488
- $BaTiO_3$, of Gd^{3+}, in orthorhombic and rhombohedral phases 8=31852
- $BaTiO_3$, of substituting sites of rare earth ions 8=48818
- $BiFeO_3$, rel. to ferroelec.-antiferromag. props 8=27488
- CH-radicals, h.f.s. null field reson. 8=43418
- C_7H_6D radical, effect of D substituent 8=47706
- $[(C_6H_5)_3P^+ - CH_2]$ radical in crystalline matrix, hindered rotation of CH_2, e.s.r. study 8=49616
- $Cl + H_2 \rightleftarrows HCl + H$ reaction rate, e.s.r. detect. 8=49861
- $CaCO_3$:Gd^{3+}, absorpt. spectrum at 77°K 8=45087
- CaD_2: U^{4+}, u.s. absorption, freq. dependence 8=40946
- CaF_2, charge compensation of Ce^{3+}, Nd^{3+} and Sm^{3+} by interstitial H^- or D^- ions 8=49601
- CaF_2, n-irradiated, self-trapped holes 8=31854
- CaF_2, V_K centre, influence of Y and O on formation, e.s.r. obs. 8=40060
- CaF_2:(Am^{2+}, Cm^{3+}), zero-field splittings 8=30622
- CaF_2: Er^{3+} (Nd^{4+}), spin-lattice relaxation, effect of quasi-local vibrations 8=40910
- CaF_2: Eu^{2+}, hyperfine coupling of S-state ions, temp. depend 8=27465
- CaF_2: Eu^{2+} relaxation time meas. using optical Faraday rotation technique 8=49479
- CaF_2: Gd^{3+}, cubic splitting temp. dependence, 77-950°K 8=40909
- CaF_2: Mn^{2+}, hyperfine coupling temp. depend 8=31876
- CaF_2: Nd^{3+} ions in sites of tetragonal symmetry, direct one-phonon spin-lattice relaxation times 8=40938
- CaF_2: Nd^{3+}, spin-lattice interactions in uniaxially stressed crystal, e.s.r. obs. 8=40939
- CaF_2: Nd^{3+}, (U^{3+}) spin-lattice interactions in uniaxially stressed crystals 8=40912
- CaF_2: U^{3+}, spin-lattice interactions in uniaxially stressed crystal, e.s.r. obs. 8=40939
- CaF_2: U^{3+} ions in sites of tetragonal symmetry, direct one-phonon spin-lattice relaxation times 8=40938
- CaF_2: U^{4+}, ultrasonic, rel. to multiple phonon interactions 8=31853
- (Ca, Mg, Fe) CO_3: Mn^{2+}, e.s.r., allowed and forbidden transitions 8=40933
- CaO: Cu^{2+}, tunneling effect at 1.2°K 8=40916
- $CaWO_3$: Er, $^{3+}$, (Tb^{3+}), spin-lattice relax times, 1.5 to 30°K 8=36238

Paramagnetic resonance and relaxation—contd

- $CaWO_4$, defect sites identification from correlation of e.s.r. and thermoluminesc. meas. 8=31028
- $CaWO_4$, rel. to thermoluminescence meas. 8=49602
- $CaWO_4$: Er, Ce(Mn), electron-spin-echo phase memory limited by lattice relax processes 8=27466
- $CaWO_4$:V, charge compensation 8=31855
- $CaWO_4$:V, e.s.r. rel. to site occupances and charge compensation 8=45082
- $CaWO_4$: Yb^{3+}, microwave-optical double reson. using circularly polarized light 8=41070
- $CaWO_6$: Ce^{3+}, Yb^{3+}, spin-lattice relax., contrib. processes 8=40911
- $CdCl_2$: Ni^{2+}, spectra at 9 and 35 GHz 8=27468
- CdF_2, iron-group ions 8=31857
- CdF_2:Eu, transformation of Eu^{3+} to Eu^{2+} 8=27473
- CdF_2: Gd^{3+}, trigonal spectra obs. 8=49609
- $Cd_xHg_{1-x}Te$: Mn^{2+}, e.p.r. 8=40934
- CdS, e.p.r. of Cu^{2+} ion impurities 8=39779
- CdS, excitation and quenching dependence rel. to trapped electrons 8=27467
- $Cd_2V_2O_7$:Mn^{2+}, spin-Hamiltonian parameters 8=31856
- $CdWO_4$:Cr^{3+}, elec. field effects 8=45084
- $CdWO_4$: Fe^{3+}, lines splitting by elec. field, 320 kv/cm 8=40929
- $CdWO_4$:Gd^{3+}, at 24GHz 8=45083
- $CdWO_4$: Mn^{2+}, lines splitting by elec. field, 320 kv/cm 8=40929
- CeMg nitrate, spin-lattice relax. mag.-field dependence by resonant two-phonon process 8=31858
- CeO_2:Cm^{3+}, at 10 Gc/sec and liq. He temps. 8=27490
- CeO_2: Dy^{3+}, e.s.r. spectra 8=40918
- CF_3OOO radical 8=38941
- $CoCs_2(SO_4)_2 . 6H_2O$, relaxation 8=40913
- CoS_2 powder, above T_c 8=49603
- Cr-Cs alum crystal cross relax. obs. 660Hz-1MHz 8=27486
- $CrOF_5^{2-}$ ions, X- and Q-band spectra, comparison 8=38911
- CrO_4K_2, γ- and n-irradiated, e.s.r. 8=49605
- $CrO_4(NH_4)_2$, γ- and n-irradiated, e.s.r. 8=49605
- Cs_3CoCl_5, and optical and mag. props. 8=31501
- Cs_3ZnBr_5: Co^{2+}, exchange interactions in pairs of coupled Co^{2+} ions 8=49606
- Cs_3ZnCl_5: Co^{2+}, and optical and mag. props. 8=31501
- Cs_3ZnCl_5: Co^{2+}, exchange interactions in pairs of coupled Co^{2+} ions 8=49606
- Cu diethyldithiocarbamate 8=49485
- α-Cu phthalocyamine, org. semicond. 8=49608
- Cu(II) azo complexes, e.p.r. in soln. rel. to delocalized mag. electron 8=25950
- Cu II-Na-chlorophyllin chem. bonding from e.s.r. h.f.s. 8=34368
- Cu(II) pyridine complexes, e.p.r. in soln, glasses and polycryst. state 8=27469
- Cu(II)2,2′-dipyridine aq. solns., Cu linewidth 8=34926
- Cu^{2+} ions in tetrahedral crystal fields, linear elec. field effect 8=49585
- Cu: Mn, meas. of s-d admixture 8=40935
- Cu: T (T = Ti, Mn, Ni), conduction-electron spin relax., interpretation 8=31863
- $CuCs_2(SO_4)_2 . 6H_2O$, spin-lattice ht. transfer in pulsed mag. fields 8=31862
- $Cu(HCOO)_2 . 4H_2O$, line width 8=36242
- $CuSiF_6 . 4H_2O$ at 300°K and 90°K, obs. 8=45085
- $CuSnF_6 . 4H_2O$ at 300° and 90°K, obs. 8=45085
- DPPH, conc. solns. in org. solvents, e.p.r. at 3000 MHz as fn. of temp. and dissolved gas 8=48206
- Dy elthyl sulphate Mossbauer study 8=27472
- $ErAl_3$, Er spin relaxation from Mossbauer effect 8=31864
- Fe^{2+}, high spin, rel. to electronic factors 8=40921
- Fe^{2+}: MgO, spin-lattice relaxation by phenon avalanche 8=40941
- $Fe(CN)_5NO^{3-}$, hyperfine anal. 8=47683
- Fe-Cu, Fe-Ag, Fe-Li associates in II-VI cpds 8=27474
- $FeNH_4(SO_4)_2 . 12H_{20}$, Mossbauer spectrum, rel. to atomic spin time fluctuations 8=30642
- GaAs:Fe, at 77 and 300°K 8=31866
- $Ga_{0.85}Fe_{1.15}O_3$, mag. ordered, external elec. field effects obs. 8=31867
- GdAs, exchange-narrowed lines, 17–1400°K 8=31846
- GdBi, exchange-narrowed lines, 17–400°K 8=31846
- $GdCl_3$, exchange consts. derivation, high freq. meas. 8=40817
- GdP, exchange-narrowed lines, 17–400°K 8=31846
- GdSb, exchange-narrowed lines, 17–400°K 8=31846
- GdX_2(x = Rh, Ir, Mn, Pt, Al), g shift rel. to hyperfine fields 8=27475
- Ge, irradiated 8=27476
- H radical, conc. profile in H_2-O_2 flame, gas phase e.p.r. study 8=49892
- H recomb. rate at room temp., spectroscopic obs. 8=34377
- H_2, solid, radiation damaged, of atoms, at 4.2°K 8=40924
- $2(H_2Ca_2Mg_5(SiO_3)_8)$: Mn^+ at room temp. and 9.2GHz, crystal symn. effects 8=36245
- $HClO_4$, e.s.r. study spatial distrib. of H atoms after γ irrad. 8=49963
- HD, solid, radiation damaged e.p.r. of H atoms 8=40924
- H_2O vapour irrad. with 1 MeV He^+ 8=49968
- H_2SeO_3, γ-irrad. cryst. 8=31884

Paramagnetic resonance and relaxation—contd
n-InSb 8=27477
K, conduction-e.s.r., 0.5 G splitting, theoretical exam. 8=27478
$KBO_3.\frac{1}{2}H_2O$, three types of e.s.r. rel. to RO_2, O_3^- and O_2^- centres 8=45098
KCl, colloidal centre exam. 8=44477
KCl, F-aggregate centres 8=44478
KCl: Cd, uncoloured and coloured. 8=48876
KCl: Cu°, temp. depend. 8=45088
KCl: I, ICl^- V_K centre. 8=48875
$K_3Co(CN)_6$: Cr^{3+}, three-spin cross relaxation processes 8=27479
KBr: Li^+, shift broadening by internal strains on alloying KCl and KI 8=27480
$KMgF_3$: M^{2+}(M=Ni, Fe, Co), acoustic, rel. to magneto-elastic coeffs. of 3d impurity ions 8=31871
$LaCl_3$: Ce^{3+}, rel. to determ. interaction constants in $CeCl_3$ 8=36239
$LaCl_3$: Gd^{3+}, rel. to Gd^{3+} pair-interaction constants determ. 8=31775
$LaFeO_3$, rel. to weak ferromag. 8=27488
$La_2Mg_3(NO_2)_{12}.24H_2O$: Mn^{2+}, e.p.r. 8=40928
$La_2Mg_3(NO_3)_{12}.24H_2O$: Nd, spin lattice relax. rel. to Nd conc. and temp. 8=31872
$LaRu_2$: Gd^{+++}, and mag. susceptibility 8=31502
Li borate glasses and cpds. γ-irrad. 8=49612
Li, conduction-ESR g value meas. 8=27482
$LiAlSiO_4$, X-irradiated, and luminescence 8=40936
LiF, X-irradiated, [111] defect obs. 8=40006
LiF: Fe^{3+} 8=40920
LiF: Fe^{3+}, crystal field distortions obs. 8=48810
$LiNbO_3$: Cr^{3+}, acoustic paramag. reson., 4.2°K 8=44318
$LiNbO_3$: Cr^{3+}, polydomain crystal, hypersound absorpt. by Cr^{3+} 8=31873
$LiNbO_3$: Mn^{2+}, spacing of hyperfine sextet 8=45090
Li_2SO_4, n-irradiated, OH radical thermal decay e.s.r. study 8=27481
$M_2'''M_3''(NO_3)_{12}.24H_2O$: Gd, ($M'''$ = Bi or La; M'' = Zn or Mg), anomalous angular spectra 8=45080
MgO, spin-lattice relax. anisotropies, theory 8=31874
MgO: Cr^{2+}, acoustic 8=45092
MgO: Cr^{3+} (V^{2+}), of excited $^2E(3d^3)$ level 8=27484
MgO: Cr^{3+}, V^{2+}, of excited ^2E level 8=45091
MgO: Cu^{2+}, at 1.2°K, Jahn-Teller effect 8=27470
MgO: Fe^{2+}, spin-relaxation time temp. dependence, 4.2-13°K rel. to Fe^{2+} low-lying energy level 8=45086
MgO: Mn^{2+}, charge transfer at surface, e.s.r. study 8=48422
MgO: Mn^{2+}, e.s.r. at 1.3GHz 8=40930
Mn^{2+} in halide host cpds 8=36246
Mn^{2+} ion, hyperfine interaction depend. on Racah parameter 8=31877
Mo, arsenate complexes, spectrum, superfine structure 8=45099
Mo bronzes 8=40245
Mo cpds., containing dimeric and monomeric oxygen 8=47677
$MoOF_5^{2-}$ ions, X- and Q-band spectra, comparison 8=38911
N, metastable (^2D), spectrum 8=25386
NH_3OHCl, X-irradiated, e.s.r. of V_K centres, radical pairs and trapped NO 8=31878
NH_4 halides, new defect centre, motional effects, e.p.r. study 8=48879
NH_4Cl: Mn^{++}, temp. depend. 8=49614
NH_4Cl: VO^{2+}, linewidths 8=45103
$N_2H_4^+$, temp. depend. 8=47685
$(NH_4)_2SO_4$: Cu^{2+} 8=40940
NO_2, adsorbed on ZnO 8=48499
NO_2, in cryst. N_2O_4 matrix 8=45094-6
NO_2 in frozen solns. 8=45093
Na salt of 2,6-dimethyl-p-benzosemiquinone, e.s.r. in t-pentanol rel. to ion pairs 8=34909
$NaAlSi_3O_8$, X-irradiated, and luminescence 8=40936
$NaBO_3.H_2O$, three types of e.s.r. rel. to RO_2, O_3^- and O_2^- centres 8=45098
Na-Ca silicate glasses 8=30792
NaCl, enhancement of Na^{23} n.m.r. 8=35029
NaCl: Mn^{2+}, impurity distrib. coeff. meas., 8=48823
$NaClO_3$ γ-irrad. crysts., -196°C 8=49613
NaF, of O_2^-, and optical studies 8=45097
Nb centres in irrad. Nb glasses 8=40937
Ne, double resonance in He-Ne laser operating at 6328 Å π transitions 8=47502
Ni and α-benzyldioxime, oxidized complex 8=36248
Ni^{2+}: MgO, spin-lattice relaxation by phenon avalanche 8=40941
$NiSiF_6$ crystal, cross relax. obs. 660Hz-1MHz 8=27486
P in n-Si, strongly doped, hyperfine splitting rel. to compensation, obs. 8=27487
PH_4I, e.p.r. of I_2^- centres 8=31124
Pb halides, γ-irrad., e.s.r. of colour centres of trapped electrons and holes 8=36249
PbF_2: Gd^{3+} rel. to crystal field near Gd^{3+} ion 8=36250
PbF_2: Yb^{3+}, spin-lattice relaxation 8=36253
$Pb(Fe_{0.5}Nb_{0.5})O_3$, rel. to para- to ferroelec. transition 8=27488
$PbMoO_4$: Ce^{3+}, Yb^{3+}, spin-lattice relax., contrib. processes 8=40911

Paramagnetic resonance and relaxation—contd
PbSe: Gd, doping effects 8=44805
Pd, and α-benzyldioxime, oxidized complex 8=36248
Pr^{3+} in double nitrates, lineshapes 8=31881
S, liquid, obs. 190° -320°C 8=30527
Se film, e.p.r. study of distrib. of embedded Hg atoms 8=35179
Si cleavage faces, rel. to surface state 8=40943
n-Si, electron spin-lattice relax., conc.-and compensation dependence 8=27489
Si, of B, rel. to dislocation density 8=45101
Si surfaces, vacuum-crushed, air-crushed or mechanically polished, ht. treatment effects 8=39580
SiC: N, B, and unknown impurity doped, optical charge exchange exam 8=36251
SiF_2 e.s.r. 8=31885
SiO_2-Al_2O_3 catalysts, absorption of DPPH 8=27736
Si: P, broad saturation effect and background line 8=45100
SO_2^- radical ion, e.p.r. investigation 8=38948
$S_2O_6F_2 \rightleftarrows 2SO_3F\cdot$ free radicals in gaseous state 8=47711
SrF_2: Dy^{3+}, in cubic fields 8=36252
SrF_2: Gd^{3+}, cubic splitting temp. dependence, 77-950°K 8=40909
SrF_2: Tb^{3+}, and spin-lattice relax., 8=40944
ThO_2: Cm^{3+}, at 10 Gc/sec and liq. He temps. 8=27490
ThO_2: Dy^{3+}, e.s.r. spectra 8=40918
ThO_2: Er^{3+}, spin-lattice relaxation on cubic sites 8=40919
TiO_2, d^1 config. derived 8=45102
TiO_2: Cr^{3+}, structure determ. by e.s.r. 8=39823
TiO_2: Mo^{5+}, relax. temp. depend. 8=36247
TiO_2: V^{4+}, paramagnetic spin-lattice relaxation 8=40945
VCl_4, Jahn-Teller distortion 8=49619
VO^{2+} in N,N-dimethylformamide soln., line-broadening 8=39419
V_2O_5, of carriers, rel. to localized states 8=40947
V_2O_5-P_2O_5-WO_3 system glasses, rel. to elec. conduction mechanism 8=40291
YAl garnet: Fe^{3+}, pseudo-Stark line-splitting 8=31849
ZnO, effects of additives 8=36254
ZnO: Fe^{3+}, Mn^{2+}, rel. to cubic field parameter 8=45104
ZnS activated with Group IV elements, investigation of luminescence 8=49815
ZnS, CdS: Mn^{2+}, exchange-coupled pairs 8=45105
ZnS: Mn^{2+}, forbidden line obs. at ΔM = Z; ΔM = O, ±1 8=31887
ZnS/ZnSe mixed-crystals, of ^6S-station ions and delocalized electrons 8=26636
ZnSAg monocrystal, rel. to luminesc. 8=36523
ZnSe: Fe^{3+}, spectral lines rel. to Fe^{3+} in cubic and axial fields 8=40949
ZnTe: Pb, rel. to impurity state 8=35738
$ZnWO_4$: Cr^{3+} type crysts, "electronic" and "ionic" mechanisms 8=40948
measurement
autodyne quantum oscillator 8=33143
dispersion meas., as source of information 8=46505
electron-electron double reson. 8=38940
electron-electron double reson., freq. swept 8=40927
Gunn effect, application 8=40890
pulse radiolysis kinetics 8=49942
push-pull field modulation, advantage for minimizing absorption of "empty-cavity" 8=46510
resolution enhancement 8=49610
resonator, cavity, for studying e.p.r. with uniaxial
sample orientation servo 8=27457
single crystal, orientation method 8=49587
spectra, automatic mag. field calibrator 8=37382
spectrometer sensitivity redefinition 8=28637
spectrometer, under irradiation 8=46504
spectrometer with ruby maser preamplifier 8=33146
spectroscopy, rapid scanning of field, appl. to pulse electrolysis 8=33145
spin oscillator, microwave, line width 8=33144
triplet yield determ. 8=29806
Paramagnetism
See also Magnetic properties of substances/paramagnetic.
ferromag. thin films, superparamag. effects 8=36112
impurity in metals, cond. for localized mag. moment formation 8=31519
of ions in solids, axial-field-splitting, covalency effects 8=35046
Ising decorated lattice, 1 phase separated by 2 ferromagnetic phases 8=49493
metals, spin-, effect of electron-lattice interactions 8=36077
Mössbauer absorpt. spectra rel. to spin relax. 8=43940
spin-phonon excitations, kinematic interaction effects 8=36074
Parametric amplifiers. See Amplifiers.
Parent. See Nucleus; Radioactivity.
Parity
See also under individual particles, e.g. Mesons/spin and parity.

orbital, cyclotrons—contd
synchrocyclotron, phase motion perturbation by space charge 8=37820
synchrocyclotron, 300 MeV extraction system 8=33500
U-120, use in accel. of He^{2+} ions 8=47006
variable-energy, beam meas. 8=33505
variable-energy, design and construction 8=33451
Ge multiply-charged ions 8=46433
He^3 activation analysis machine 8=33470

Particle detectors
See also Bubble chambers; Cloud chambers; Counters; Ionization chambers; Nuclear track emulsions; Particle track visualization.
for aerosol sizing, optical, spurious consts prod. by sub-size particles 8=30560
aluminophosphate on glass, for n dosimetry 8=46920
collimators, focused, digital recording of line-source response 8=24702
computerized, time-of-flight, 1-60 MeV expt. 8=46844
concentric, for thermal n dose and rate meas. 8=38081
LET depend., for mixed radiation dose-equiv. meas. 8=33364
magnetic analyser for $D(d, n)He^3$ recoil 8=47179
magnetosphere satellite meas. suggestions 8=27946
Nuclear Science symposium, Los Angeles, Oct-Nov 1967 8=28968
on-line identification system 8=37778
Penning gauge with quenching circuit 8=37784
polytetrafluoroethylene, by anal. of free radicals prod. 8=28985
position-sensitive, linearity and resoln. 8=24521
semiconductor, current impulses 8=46887
semiconductor detectors in radiation protection and radiation meas., conference, Germany (1967) 8=33377
semiconductor, leakage current monitor 8=37775
semiconductor telescope, for satellite, e and p calibration 8=28025
solid-state, high-voltage supply circuit 8=37364
telescope arrangement for energy determ., particle identification 8=29456
time-constant determ. by selective amplifier 8=33365
Cd cut-off energies for finite filters 8=33366
Ge(Li), pulse height spectral decomp. 8=24533
Ge(Li), surface protective coating 8=46913
Ge(Li), X-ray energy region, charge collection efficiency 8=46915
Li^6 sandwich, for fast n spectrometry 8=38083
Li-Si counters for 4π β-spectrometer 8=24730
Si drifted, β-generated pulse time spread 8=29097
Si: Li, α and p beam response 8=38103
Si(Li), X-ray energy region, charge collection efficiency 8=46915

Particle focusing. See Particle optics.

Particle optics

chromatic aberrations of turnover quadruplet 8=37410
elect. field influence on charged particles in inhomogeneous mag. field 8=24130
electrostatic separation at high energies 8=28999
elliptical beams creating space charge potentials, calc. 8=33072
magnetic lens with period longit. field, equivalence with hexapolar magnet 8=37439
magnetic lenses, quadrupole, mag. centre and axes location 8=28564
magnetic optics theorems for spectrometers and beam transport systems design 8=28548
magnets for beam transport, focusing props. and params. choice 8=28520
mirror, electrostatic, cylindrical-field focusing 8=37411
neutron, beam collimation in total refl. tube 8=38078
non-bunched beam injection in accelerating cavity with circular iris, transient phenomena 8=28551
phase space beam analyser 8=33068
polarized beam, direct nuclear knock-out reactions 8=33976
p accelerator, space charge effects in quadrupole focusing system 8=33429
quadripolar doublet, phase acceptance 8=41951
quadripolar triplet, degeneration 8=28550
quadrupolar helicoidal focusing device 8=24132
quadrupole doublet, stigmatic, coeff. of spherical aberration 8=33070
quadrupole, spherical aberration compensation by octupole 8=33071
r.f. buckets, longitudinal effects 8=33097
stability in short quadrupole lens system 8=37414
synchrotron, weak-focusing, perturbation in resonant extraction 8=37819
symmetrical triplet composed of quadripolar lenses 8=28549

Particle optics—contd
tandem accelerator beam tube, computation 8=37817
trajectories in mag. fields, computation and expt. 8=37413
ultrarelativistic particles, separation in waveguide with EH_{11} hybrid wave 8=33073
wave packets beam, scatt. cross section 8=46400
Yuza-Rozhanskii condenser field, dispersion and focusing rel. to space charge 8=37412

Particle range
absorber, energy straggling distrib. 8=33603
alpha-rays, energy dissipation in finite cavity 8=47350
channeling of fast charged particles through crystals 8=31137
crystal ion trajectories, computer analysis 8=48901
electrons, energy losses in h.v. microscopes rel. to multiple inelastic scatt. 8=37417
electron stopping power, oscillating behaviour 8=48894
electronic stopping cross-section, Z_1 depend. 8=48893
heavy, energy loss correction for multiple scatt. 8=38519
ions, heavy, secondary electron yield 8=37801
ions, light, in heavy substs., computer calc. 8=48898
ions, low-energy, in solids, penetration depth and distrib. 8=31138
projectiles in amorphous solids, calc. 8=48896
proportional counter, multiwire for selecting stoppage in thin gas target 8=46857
proton channeling, angular limit to classical description 8=31134
recoil atoms in stopping materials 8=31136
spin-½ particle beam, depolarization in target 8=35592
universal range—energy relationship, approximation 8=31139
Ag foil with C layer, e energy loss obs. 8=35808
Ag, of 54.4 MeV α, energy loss obs. 8=48919
Al, of D^+, 5-80 keV obs. 8=48912
Au, chem. film technique 8=48920
Au, energy loss of 400keV p and 800 keV He^+ 8=49133
Au, of 54-4 MeV α, energy loss obs. 8=48919
Au, of D^+, 5-80 keV obs. 8=48912
Cu, chem. film technique 8=48920
Cu, e energy loss spectra rel. to plasmon states, 30-350 eV 8=35809
Cu, of 54.4 MeV α, energy loss obs. 8=48919
Cu-Au alloys, stopping power of 0.5 to 3.5 α-particles 8=44497
Ga in Si, anomalous penetration 8=48929
In in Si, anomalous penetration 8=48929
in KBr, fast protons energy loss, orientation dependence 8=35602
Pb^{206} 103 keV recoil, in pure and binary gases 8=29950
Ra^{224} recoil atoms in gases 8=34179
Si crystal, P^{32} ion implantation 8=48928
Si, ion channelling at 100-500 keV, obs. 8=48930
Tb, of 54.4 MeV α, energy loss obs. 8=48919
Tm, of 54.4 MeV α, energy loss obs. 8=48919
W, of ions, temp. dependence 8=48932
W single crystal, of Xe^{133} 40 keV ions 8=48935

Particle size
See also Surface measurement.
in aerosols, and conc., meas. by sound attenuation and dispersion 8=30563
aerosols optical counting, spurious consts prod. by high sub-size particle concs. 8=30560
aerosols, self-preserving 8=39458
Coulter counting, improving resolution by hydrodynamic focusing 8=39445
crystallizers with classified product removal, steady-state distrib. calc. 8=48528
in dispersions, distrib. rel. to heat and mass transfer 8=34936
distribution determ. using Fraunhofer holograms 8=24429
distribution meas. by X-ray scatt., comparison with results from N_2 adsorpt. and electron microscopy 8=26041
Doppler-shifted laser light meas. rel. to Stokes—Einstein relation 8=30552
entrainment of small particles by large sphere 8=34736
grain distrib. rel. to dimensions distrib. on grain section 8=43986
grain size and distrib. meas. 8=44153
grain size depend of linear heating curves for rare gas diffusion systems 8=26617
grain size effect on nature of Portevin-Lechatelier yielding 8=44516
imaged spheres, analyser 8=28218
latexes, by light diffr. 8=48237
maximum in two-phase nozzle flow, influence of liq. surface tension 8=34634
metallic alloys, distrib. in dispersed phases 8=26295
montmorillonite with adsorbed cations, by optical absorption 8=34943
oxides: CdO, CaO, MnO, NiO, rel. to lattice defects 8=48592
polybutadiene-styrene latex, meas. by flow ultramicroscopy 8=30543
in polydisperse suspensions, diameter distrib. determ. by small angle X-ray scattering 8=30553
polystyrene latex, meas. by flow ultramicroscopy 8=30543

Particle size—contd
  polyvinyl toluene latex, meas. by flow ultramicroscopy 8=30543
  powder, analysis by radioactive isotopes 8=43987
  powder grain size determ. from X-ray scatt. intensity 8=30843
  quartz sand, differential thermal analysis 8=26044
  sediment, rel. to compressibility 8=30556
  sedimentation anal., size distrib. 10-2000μ 8=34933
  separation of particles by controlled cycling, apparatus and theory 8=35065
  slurry systems, attrition resistance of solids 8=48233
  sphere dia., meas. by laser beam 8=32638
  unifrom charged, prod. from liq. droplets 8=48045
  ZnS, and morphology, effect of precipitating conditions 8=48565
  Ag colloid in gelatin, effect of shape on spectral absorpt. 8=39460
  α-Al_2O_3 powder, explosively shocked from X-ray line broadening analysis 8=44168
  Au crystals in polyvinyl alcohol films, X-ray obs. 8=30858
  Au, evaporated, multiple-twin struct. and deca- or icosahedron shapes 8=35317
  C in propane diffusion flame, i.r. spectroscopy 8=46257
  CdO, X-ray reflex broadening, rel to lattice distortion 8=48591
  Cr_2O_3 powder, Néel temp. depend. 8=40861
  α-Fe_2O_3 fine particles, spin flip temp. and lattice dilation dependences 8=27414
  FeC_x in carbon steel, coarsening at 720°C and 675°C 8=30691
  Fe-24%Ni-17%Cr-2%Ti, of γ' (Ni_3Ti) phase, effect on creep 8=49002
  β-FeOOH rod crysts. by light scatt. from streaming suspension, obs. 8=30549
  La Mer aerosol generator control 8=34947
  LiF ground powders, crystallite size from X-ray diffr. line-broadening profile analysis 8=48600
  MgO powder, explosively shocked, from X-ray line broadening analysis 8=44168
  Ni, electrodeposited, dependence on process conditions 8=26298
  Ni powder, determ. using variance as measure of line broadening 8=26296
  Sn layered with SiO, supercond., rel. to n.m.r. 8=44735
  Sn, 25Å radius in oxide film, superconductivity obs. 8=40388
  ThO_2, 4-20 μ microspheres from alcohol mixtures 8=25310
  ThO_2 microsphere production from alcohol mixtures 8=25310
  Ti alloys, equiaxed $\alpha + \beta$, determ. of β grain size 8=44170
  UO_2-Al_2O_3, grain growth in presence of liq. phase 8=44014
  in U-Pu mixed monocarbides, distrib. rel. to suitability 8=30664
Particle spectrometers
  See also Alpha-ray spectrometers, etc.
  bent crystal, for K X-ray meas. coincident with fission 8=34062
  correlated and single events, simultaneous analysis by sampling 8=46854
  cylindrical capacitor for relativistic particles 8=28566
  electrostatic analyser, cylindrical plate, charged particle transmission 8=24501
  energy resolution and focusing in inelastic expt. 8=33370
  ferroelectric detector, for differential energy spectrum of pulsed rad. sources 8=28971
  filter, time-dependent, S/N calc. 8=33386
  fluctuations, coeffs of gas mixtures used, minimalization 8=28969
  magnetic, accessory polarimeter 8=24496
  magnetic, appl. of position-sensitive solid-state detector 8=24503
  magnetic, for D(d, n)He^3 recoil detection 8=47179
  magnetic optics theorems for design appls. 8=28548
  magnetic spectrograph, constant-deviation, optimum parameters 8=46853
  magnetic, varying field, characts. 8=28970
  nuclear, pulse shaping by time-dependent filter 8=46339
  nuclear radiation spectra, elimination of pulse pile-up distortion 8=24504
  Nuclear Science symposium, Los Angeles, Oct-Nov 1967 8=28968
  satellite e.s. analyser for 1-100keV particles 8=50241
  scintillation, with multichannel pulse-height analyser, stabilization with light-flash reference peak 8=46852
  semiconductor, ballistic deficit and s/n ratio 8=24502
  semiconductor, timing unit 8=24518
  spark chamber inductive, mag. spectrometer detector 8=37788
  three-crystal-NaI pair spectrometer, efficiency calc. 8=24515
  Ge, calibration by Ra and decay products 8=37781
  Si, Li drifted and surface barrier, p irrad. resist., 2.3 MeV 8=28984
Particle track visualization
  See also Bubble chambers; Cloud chambers; Luminescence chambers; Nuclear track emulsions; Spark chambers.
Particle track visualization—contd
  aluminophosphate on glass, for n dosimetry 8=46920
  beam, dry photographic paper appl. 8=46982
  in binary liq. solns., under critical lamination, by precipitation on ions as nuclei 8=37800
  electrophotographic track determination system, spark chamber 8=46964
  in liquid H_2 chamber, algorithm applic. to computer programme 8=46961
  nuclear emulsion, proton recoil scanning, sampling bias 8=24542
  phosphate glass: Th or U, fission fragment registration 8=24538
Particle tracks

Ar-methane system, solid-liquid equilib. diagram 8=25978
β-Au-Cd alloys, structure of martensites 8=26035
Au-Cu-Zn alloy, martensitic θ-struct. 8=48633
Au-Sn system, liquidus 8=48072
BaO-TiO_2 system, new compound 8=48363
$BaSiO_3$-$BaGeO_3$, diagram 8=35092
$(Ba_xSr_yCa_z)MgSi_2O_8$: Eu, subsolidus, rel. to luminescence 8=49789
Bi trihalides, high-press. diagrams 8=39468
Bi-Au system, form. of simple cubic π phases 8=48402
Bi_2Se_3-Bi_2S_3, phase diagram. lattice constants 8=35094
$C_2H_5SiCl_3$ mol. crystals, rel. to n.q.r. multiplicity and spin-lattice relax. times 8=41010
$CaSO_4.H_2O$, chem. and polymorphic, X-ray obs. under hydrostatic press. 8=43901
Ca_2SiO_4, diagram, comments 8=39464-5
in Co molybdate hydrates, non-stoichiometric, structures of two phases 8=30916
in Co-Pb-Te system, (Co-Pb)Te as stable pseudobinary section 8=43995
Cr-Mo-Co steel, R-phase structure and comp. analysis 8=44001
CrO_2-Cr_2O_3 system, up to 35 kbar and 1500°C 8=43996
CsBr-RbBr system, composition of two phases 8=35096
CsCl-RbCl system, composition of two phases 8=35096
Cu-Ag-Zn ternary alloys, Hume-Rothery type, zeta-phase stability 8=30687
$CuAsSe_2$ film, and crystal structure from e. -diffr. exam. 8=39788
$Cu_xAu_{51-x}Zn_{49}$ alloys, β-phase stability 8=48368
CuCl, diag. up to 40 kbar 8=48253
Cu-CuO, liquid, miscibility gap 8=48075
CuBr, diag. up to 40 kbar 8=48253
CuI, diag. up to 40 kbar 8=48253
in Cu-16. 8% In alloy, structure and orientation of equilib. phase, δ-Cu_9In_4 8=39548
Cu-Mn-Sb system, magnetic 8=45056
Cu-O, liquid phase diagrams 8=48074
Cu-Sn system, γ and δ phases, self-diffusion coeff. and energies 8=35484
Dy-Pb system, phase diagram 8=39550
Er-H system 8=39551
Fe alloys containing S, reaction 8=41249
Fe-Al alloys, effect of K-state on mag. props and residual elec. resistance 8=49525
Fe-Mo system, phase identification using diffusion couples 8=48381
Fe-24%Ni-17%Cr-2%Ti, γ' particles of Ni_3Ti phase, size effect on creep 8=49002
Fe-W diagram, 0-45 at % W range 8=30692
Ge-C system at high press., absence of carbide formation 8=48382
$HGeCl_3$ mol. crystals, rel. to n.q.r. multiplicity and spin-lattice relax. time 8=41010
H-He system, press.-temp. co-ords of solid-liq.-vapour locus 8=43893
He^4, solid and liq., diag., below 1.2°K 8=37333
He-H vapour-liq. equilib. to 100 atmos. 8=43913
$HfSb_2$, atomic structure rel. to quasi-homologs 8=35360
Hg_3Te_3-Im_2Te_3 alloy system, phase diagram 8=30697
In-Te system, exam. of phase of comp. between In_2Te_3 and InTe 8=39796
Ir-Fe alloy, with Fe oxide at CO_2-CO atmos. at 1200°C 8=43999
K_2NbO_3F, separation from melts 8=48258
Li(Ag, Au). Li(Tn, Tl, Pb, Sb, Bi) system, Zintl phases, width 8=49102
$Li(Nb_{0.5}Fe_{0.5})O_2F$-$Li(Ta_{0.5}Fe_{0.5})O_2F$ system, and dielec props. 8=31435
$LiNbO_3$-$CdTiO_3$ system, solid solns. of ilmenite structure rel. to ferroelectricity 8=27278
$LiNbO_3$-$LiTaO_3$-$Fe(Mg)TiO_3$ system, X-ray exam. 8=27278
$Li_2O.SiO_2$-$LiO.Al_2O_3.4SiO_2$-SiO_2 system, metastable mixture 8=48386
$LiTaO_3$-$CdTiO_3$ system, solid solns. of ilmenite structure rel. to ferroelectricity 8=27278
Mg-Nd-Mn-Ni system 8=48387
Mo silicides, electron microprobe identification 8=48389
Mo-Mn steel, R-phase structure and comp. analysis 8=44001
NH_4F, 20°-340°C, 1-20 kbar 8=34960
in $Nb_2O_5.WO_3$-WO_3, structural investigations 8=39814
NbZn, μ-phase discovery, unit cell parameters 8=48392
Ne-Kr system, phase separation 8=43675
Ne-N, liquid-vapour, and supercritical excess vols., 66-114°K and < 3190 lb in $^{-2}$ 8=30592
Ne-O_2 from 63°-152°K at 5000 psi 8=34981
in Ni molybdate hydrates, non-stoichiometric, structures of two phases 8=30916
Ni-Cr-C-Si system, rel. to reinforcing phase 8=43976
Ni-In alloys, metastable b.c.c. phases formed on quenching 8=48408
Ni_4Mo, order and resulting substructure, electron diffraction and electron microscope study 8=44009
Ni_4Mo, ordering rel. to tetragonal superstruct. 8=26713

Phase equilibrium—contd
  Ni-W alloys, isolated metallide phases 8=39561
  Pb-Bi, metastable phases 8=30704
  $PbO-B_2O_3-SiO_2$, and liq. immiscibility 8=34749
  Pb-Sb, metastable phases 8=30704
  $Pb_{1-x}Sn_x$ Se alloys, comp.-temp. diag. 8=48594
  $Pb_{1-x}Sn_xTe$ alloys, T — x phase diagrams, and lattice parameter values 8=26077
  $PbTiO_3-PbMn_{2/3}W_{1/3}O_3$ system, solid solns., diag. 8=40616
  Pd, degassing with CO or O_2, phase superstructure 8=48395
  Pu alloys, phase diagrams 8=35080
  $RbNO_3$, diag. in 200-330°C and O-1500 atm. range 8=39469
  Rh–Be system, crystalline phases 8=48397
  Rh–Fe alloy, with Fe oxide at CO_2–CO atmos. at 1200°C 8=43999
  Sb–Au system, form. of simple cubic π phases 8=48402
  Sb–Ni system, form. of simple cubic π phases 8=48402
  Sb–Pd system, form. of simple cubic π phases 8=48402
  Sb–Te system 8=48398
  $SrCl_2-H_2O$, phase boundaries to 40 kbar 8=39467
  Ta-Mo-C alloys, phase diagram through melting range 8=39475
  $Ta_2O_5-TiO_2$ system 8=48403
  Tb-Hg, diag. 8=30706
  Th-ThAs system and lattice params. obs. 8=30577
  in Ti–Ag system, conc.-penetration curves for diffusion processes 8=35509
  Ti-Co system, complete diag., including results of solubility limits study 8=30709
  Ti–Nb–Sb–O system, rutile solid solutions, reaction diagrams 8=48404
  Ti-W-C alloys, phase diagram revision 8=39565
  UC–UN system liquidus and solidus, obs. 8=32083
  UCl_4-PbCl_4 diagram, thermal analysis obs. 8=30584
  U-H system, press.-comp.-temp. diagrams 8=30713
  UN–C system rel. to UN compacts prep., obs. 8=32083
  U-O system, nonstoichiometric oxides 8=48292
  $U-UAl_2-UCo_2$ system, phase diagrams 8=35128
  U-UAs phase boundaries, for thermal, X-ray and microscopic anal. 8=48406
  V-C system, and chem. diffusion above 1900℃ 8=36575
  VC–ZrC(HfC) systems, phase diagrams 8=48409
  V–Ga system, diagram 8=48407
  V–Ni alloys, metastable b.c.c. phases formed on quenching 8=48408
  V_5Sb_4, atomic structure rel. to quasi-hololog 8=35360
  W–C system, in cubic carbide phase 8=48410
  Y-C system, phase diagram 8=39569
  Yb-Hg, diags. 8=30706
  in Zn molybdate hydrates, non-stoichiometric, structures of two phases 8=30916
  Zn-Sn-Cd-Pb alloy, binary liq. phase occurrence 8=34786
  ZrB_2, struct. and orientation of second phase precipitates 8=35136
  $ZrBi_2$, atomic structure rel. to quasi-homologs 8=35360
  $ZrSb_2$, atomic structure rel. to quasi-homologs 8=35360
Phase meters. See Electrical measurement.
Phase transformations
  alkali halides, Born treatment using new van der Waals coeffs. 8=48246
  alloys, contactless thermal analysis, 20-2800℃ 8=28411
  aromatic liq. cryst. forming mats, heats and temps. 8=34772
  benzene, liq. → solid, high pressure studies 8=26327
  binary eutectic alloy system, solidification with time depend surface temp. 8=34967
  carbonized coal-tar pitch, microstruct. of coalesced mesophase 8=30576
  centres in deep supercooling 8=25987
  cholesteric liquid crysts., elec. field induced, 10^5 V/cm 8=34766
  complex solns. at low temp. 8=43903
  correlation functions near crit. point, structure 8=39464
  critical phenomena, review 8=34980
  diffusion eqn., pseudo-similarity solns. 8=23912
  earth's shell, and critical phenomena 8=50077
  entropy, communal, influence on liq. state reappearance 8=25976
  evaporation-condensation, system with 2 interphase surfaces and arbitrary condensation coeffs. 8=34976
  fluctuations, K-depend., above critical point, non-linear effect 8=23904
  hard molecule gas on Bethe lattice 8=28347
  liquid and saturated vapours near critical point, u.s. vel. to curve intersection 8=43802
  liquid crystals, polymesomorphic type 8=34770
  liquid-vapour, free-energy algebraic functions 8=48268
  mesophase, theory 8=39311
  metals, contactless thermal analysis, 20-2800℃ 8=28411
  n-paraffin solvents for anthracene, pyrene, coronene and naphthacene rel. to electronic spectra 8=25938
  nucleation in condensed phases, linked flux analysis 8=30570
  nucleation kinetics, generalized theory 8=48251/2
  particle prod., charged solid, from liq. droplets 8=48045
  plasma, quantum Couloumb, first order transitions, mech. 8=39068
Phase transformations—contd
  polyoctadecene-1, transition temps. and crystallinity 8=39635
  polypeptides, helix-coil transition, comparison of theories 8=43433
  silicate glasses, phase separation and submicroscopic structure 8=30787
  solid-liq., below 500°C, corrected press-temp. trajectories 8=48366
  spheres, local thermal and material transport, rel. to Reynolds numbers, turbulence and polar angle 8=34985
  three-component systems, and crit. pts. 8=48076
  transition metal chalcogenides, order of vacancies and non-stoichiometry 8=26635
  two-phase flow, press. grad. prediction using Reynolds flux concept 8=34984
  two-phase flow, techniques of anal. using Reynolds flux concept 8=34983
  two-phase flow with phase-change, conservation law 8=25789
  upper mantle C-region 8=50076
  water into ice VII by shock compression 8=48262
  water, liq. → solid, high pressure studies 8=26327
  Al, liquid, coordination number transforms, viscosity obs. 8=25866
  Al–Cu alloy, columnar to equiaxed, effect of mech. stirring in melt 8=48372
  Al-Cu, liquid, coordination number transforms, viscosity obs. 8=25866
  Al-Mg, liquid, coordination number transforms., viscosity obs. 8=25866
  Al-Si, liquid, coordination number transforms., viscosity obs. 8=25866
  Ar, coexistence curve shape near critical state from refractive index meas. 8=30590
  Au-Ge-Si alloy, glass-liquid transition 8=39470
  Bi nucleation of liquid, supercooling 8=48257
  CO_2 in crit. region, heat transfer by free convection from Pt wire 8=34823
  C_{16}–OH monomol. films rel. to surface viscosity, 15–30°C 8=30428
  C_{18}–OH monomol. films rel. to surface viscosity, 15–30°C 8=30428
  C_{20}–OH monomol. films rel. to surface viscosity, 15–30°C 8=30428
  C_{22}–OH monomol. films rel. to surface viscosity, 15–30°C 8=30428
  $CeO_{1.75}-La_2O_3$, high mobility due to tri-and tetravalent states of Ce ions
  Cu, ementation with Fe, kinetics and activation enthalpy 8=43898
  Fe nitrides, ϵ and ζ phases, Mŏssbauer effect study in neighbourhood of composition Fe_2N 8=30695
  Fe–Se system 8=48254
  He liquid, fluctuations and λ transition 8=32998
  He^4 near λ transition, Green's functions 8=32997
  in HeII films 8=24043
  HeII, second-order, Landau theory of thermal props. 8=33001
  $Li_2O.SiO_2-Li_2O.Al_2O_3.4SiO_2-SiO_2$ system, liquation isostructure and correl. 8=48255
  NH_4Cl, order-disorder transitions long range parameter by neutron diffraction 8=44242
  Pb liq., nucleated by solid Cu, Fe and Sb, under-cooling 8=43911
  Pb, nucleation of liquid, supercooling 8=48257
  Pb–Ag eutectic elloy, structure during solidification 8=26037
  Xe, specific heat near critical point 8=34977
 solid-state
  acetylene, i. r. and Raman spectra 8=27618
  adamantive structures, ternary, high pressure and temp. decomp. 8=30683
  aging problems in plastics 8=44612
  alloys, degree of order, steep gradient meas. 8=30669
  alloys, ordering, rel. to pressure, including volume depend on degree of long-range order 8=30673
  alloys with several transition pts., ordering structures, theory 8=30672
  Alni alloy, ageing rel. to coercive force and structural changes 8=35090
  Alni alloy, chem. comp. and magnetization ageing dependence, Mössbauer exam. 8=49514
  ammonium salts 8=35116
  amorphous polymers, glass transition region, anomalous cond. 8=26949
  austenite powders, electrolytic, absence of martensitic transforms. 8=35103
  austenitic alloys, hardening without martensitic transform. on ageing with plastic deform. at 600°C 8=35699
  β-brass, B2 superlattice antiphase domain growth kinetics 8=30689
  β-brass, order-disorder critical temp., pressure dependence 8=39547
  β_1-brass, metastable 8=35081
  bulk, hysteresis, inter-phase potential barrier mechanism 8=43990

Phase transformations—contd

solid-state—contd

butadiene-methyl (2-methyl-5-vinyl)-pyridinium iodide copolymers, obs. 8=48508

butadiene-styrene block copolymer 8=40194

cellular reaction, Cahn and Turnbull theories exam. and appl. to Pb-Sn alloys 8=30670

cellulose acetate, amorphous to cryst., i.r. spectra 8=32048

clay minerals, X-ray studies rel. to contact metamorphism 8=39571

cristobalite, polymorphic transform., impurity effects 8=26079

crystal structure, studies using composite reciprical lattice 8=26052

crystals in solid phase, morphology theory 8=26171

cyclooctanone, at −87°C and crystal and mol. studies of phases 8=26091

p-dioxane, at 279.2°K rel. to Raman spectra, 80-300°K 8=41163

disorder problems, theory of X-ray diffraction, correl functions 8=26328

displacement-type, of second kind, theory 8=43991

displacive, at. displacement rel. to Curie temp. and spontaneous polarization 8=44882

eutectoid decomposition theory assuming local equilib. and boundary diffusion 8=26051

faceted/nonfaceted eutectic structures 8=43992

ferrimagnets rel. to spin-reorientation 8=36181

ferroelectrics, soft, spectra-struct. correl. 8=27544

ferromagnetic binary alloys, effect on vapour pressure temp. dependence 8=35014

film deposition, during and after 8=39544-5

film, hysteresis, inter-phase potential barrier mechanism 8=43990

IV-VI cpds, at high pressures 8=35082

glutaric acid, X-irradiated, polymorphic, rel. to free radical recombination 8=29828

graphite, hexagonal to rhombohedral after grinding rel. to mag. props. 8=31497

graphite nitrates, order–disorder transform. around −20°C 8=35827

grinding effects using vibro-grinder, X-ray diffr. and e-microscope exam. 8=26286

hard carbon graphitization with CuO catalyst, kinetic study 8=27740

heat of transition for non-polar transforms., physical significance 8=35075

hexachloroethane, X-irradiated, polymorphic, rel. to free radical recombination 8=29828

ice and D_2O, phase diagrams at high press. 8=48383

ice III-IX, antiferroelec. phase 8=31438

inorganic crystals, under impact pressure 8=26057

intermetallic cpds of β-W structure, lattice instability rel. to supercond. 8=44721

manganic ferrites, rel. to crystal growth techniques 8=26257

martensite ageing in carbon-steels, microcalorimetric exam. 8=35105

martensite decomposition during tempering of quench-hardened steel, C conc. effects 8=35099

martensitic, in ferromag. alloy, mag-fields effects 8=35109

martensite in low carbon-steel, composite nature, crystallographic theory 8=26175

martensite nucleation in Ni-Fe alloys showing disrupture transform. kinetics 8=39555

mesomorphic states, phase identification, temp. scanning thermal anal. 8=48365

methylamines 8=40990

microscopic theory 8=35077

n.m.r. second moment study, high-pressure technique 8=48362

normal-to-supercond., detection for 10μ spheres 8=48367

nylon-6, α-γ phase, by stretching 8=30715

order–disorder effects on supercond. energy gap 8=31331

order-disorder, stabilization energies 8=35529

ordered phase structures, phenomenological theory 8=30671

organic crystals, polymorphic transform process 8=26090

perovskites, in high-temp. phase, on heating and n.-irradiation 8=39538

poly-β-alanine, water soluble and insoluble n.m.r. obs. 8=45112

polyethylene, oriented, rel. to plastic deform. 8=35137

polymethyl mechacrylate, secondary processes and activation energies, −150–75°C 8=44017

polypropylene, isotactic, γ–α transition, obs. 8=44018

polystyrene, atactic, second-order transition above glass point, obs. 8=44398

polystyrene films, glass transitions, i.r. transmission obs., 50-120°C 8=45247

polystyrene-benzophenone mixts., glass transition temps., obs. 8=44146

poly(vinyl acohol) films, glass transitions, i.r. transmission obs., 50-120°C 8=45247

poly(vinyl chloride-co-vinyl acetate) films, glass transitions, i.r. transmission obs., 50-120°C 8=45247

polyvinylidene fluoride, $\alpha \rightleftharpoons \beta$ transform. on stretching in temps., 20-150° and annealing 8=26155

Phase transformations—contd

solid-state—contd

pressure-induced, rel. to crystal radii 8=26054

pressure-temp. corrected trajectories, below 500°C 8=48366

1,1-pyrene-pyromellitic dianhydride, between 170-205°K 8=26554

quartz, anomalous sound absorption near λpt. in $\alpha \rightarrow \beta$ transition 8=26584

quartz, crystalline-amorphous, under fast n-irrad., X-ray diffr. studies 8=26146

quartz high-low inversion, lambda transition, thermodynamics 8=39563

quartz high-low inversion, vol. and compressibility rel. temp. at high press. 8=48401

quartz, structure changes in $\alpha \rightarrow \beta$ transform. and under n-irrad. 8=26080

quartz-glass-coesite system, under high-temp. and pressure 8=48400

rare-earth sesquioxides, metastable structure, formative mechanism 8=26056

second-order, unit cell deform., Landau theory 8=35079

seignettomagnetics, rel. to coupling of ferroelec. and mag. props. 8=27398

solid solns., order-disorder, effect on Mössbauer effect probability 8=35032

spinel ferrite lattice, cubic, to tetragonal, local Jahn-Teller distortions 8=26408

spinels, induced by Jahn-Teller effect 8=35076

spinels, types of order 8=39539

steel austenite lattice parameter changes rel. to intermediate transformation 8=35333

steel, cold-rolled, influence on recrystallization texture 8=39719

steel, directionally solidified, microsegregation of Ni and Cr 8=39552

steel, dynamic strain ageing, Charpy specimen behaviour 8=35686

steel, EI 702, ageing mechanism 8=35100

steel, EI 702, γ' and η' phase precip. or dissoln. on ht. treatment 8=43998

steel E 1702, γ^1-phase precip. mechanism, holding time effects at diff. quenching temps 8=35108

steel, martensitic, magnetic field effect 8=39554

steel, 9%Ni, struct. and growth characts. of bainite 8=44002

steel, quench-hardening, and austenitic grain struct. formation 8=35110

steel, stainless, entropy shock at transform. of first kind in mag. field 8=39553

steels, cast austenitic, on thermal cycling rel. to strength increase and grain size decrease 8=35698

steels, Fe–C and Fe–Ni–C rel. to martensite strength contributing factors 8=26815

steel U8, quenched, during tempering under high hydrostatic pressures 8=35679

succinonitrile, plastic phase 8=44611

talc, structural changes on heating 8=30699

tetracene, effect on fluoresc. 8=36536

tetrafluoroborate salts, n.m.r. 8=31905

thaumasite, $Ca_3H_2(CO_3/SO_4)SiO_4 . 13H_2O$, thermal decomposition, i.r. study 8=26065

ticonal, structure formation after themomagnetic treatment 8=35055

titanomagnetite to titanomaghemite, on cryst. surface 8=35125

transition energies by differential calorimetry, obs. 8=30674

transition metal oxides, centred around Nb_2O_5, non-stoichiometric mechanisms 8=26365

s-triazine, at low temp. 8=48411

X-ray apparatus, low temp. 8=35078

Ag–Al alloys, massive and martensitic, microstructure 8=48370

β-AgCd, ordering crit. temp., temp. dependence, from elec. resistivity meas. 8=30676

Ag-Cu-Zn-Cd system, univariant, equilibria formation by decomposition 8=30675

AgI, to 100 kbar, elec. cond. meas. 8=31311

AgI, rel. to ht. capacity 8=30961

α-AgI, low-temp. 8=43994

β-AgZn, ordering crit. temp., temp. dependence, from elec. resistivity meas. 8=30676

Al, transform. to brass-texture after cold rolling a cast strip 8=35264

in Al alloys with Si, Zn, Cu and Mg, relns reflected in viscosity conc. surves 8=34799

Al-4%Cu, $\theta' \rightarrow \theta$, effect of plastic deform. 8=48371

Al-Cu: MgSi, increase in ageing rate due to two impurity assoc. 8=35089

Al-Cu-Mn alloys, rapidly solidified, supersaturated solid soln. formation comp. and decomposition kinetics 8=35084

Al-Mg-Si alloy, ageing mechanism 8=35088

Al-60-78% Zn alloys, α^1-phase decomposition 8=35091

Al-Zn alloy, decomposition 8=30679/80

Al-25 wt.% Zn alloys, precip., effect of quenching conditions 8=26058

Phase transformations—contd

Bi, under high pressure 8=35093
$BiBr_3$, high-press. 8=39468
$BiFeO_3$-Pb$(Fe_{0.5}Nb_{0.5})O_3$ solid soln. system, X-ray diffr. exam. 8=39543
$BiFeO_3$-$PrFeO_3$ system, rel. to ferroelec. and mag. props. 8=26064
$Bi_{1-x}La_x(Fe_{0.98}Mn_{0.02})O_3$ solid solns., X-ray diffr. exam. 8=39542
Bi-Sn alloy, high pressure changes by n-diffractometry 8=26361
BiI_3, high-press. 8=39468
CO, order-disorder kinetics, molec. theory 8=39546
$CaCO_3$, and decomposition, effect of impurities 8=30682
$Cd_{0.11}Hg_{0.89}Te$, semi-metal → semiconductor transition induced by hydrostatic press. 8=27086
CdI_2, polytypism, interaction energy calc. 8=44012
CdO: Ga_2O_3, mixtures, order-disorder 8=39549
CdS films, epitaxial growth and polymorphic transforms. 8=26113
CdS thin films, amorphous to crystalline 8=43993
$CdTiO_3$, perovskite modification, structure changes over 20-1000°C 8=27242
$Cd_2Zn(PO_4)_2$ 8=35322
Cm_2O_3, up to melting point 8=35425
Co-akermanite system, high-temp. substitution effects 8=35095
$(CrFe)_{23}C_6$, austenization influence on Cr contents and Curie point 8=30684
CrH, hexagonal, to metallic Cr, crystallography and bonding relationships 8=48376
Cr-Ni-Fe solid solns., phase form and dimensions, on prolonged crystallization 8=26246
Cs-graphite lamellar cpds, rel. to Cs vapour press. and temp. 8=35011
CsBr-RbBr system, diagrams, equilib. between two phases 8=35096
CsCl allotropic type crystals, phase transformations 8=48377
CsCl-RbCl system, diagrams, equilib. between two phases 8=35096
$CsCl_2$ 8=26067
Cu-containing perovskites, high temp. X-ray exam. and dielec. meas. 8=27243
Cu formate tetrahydrate, paraelec.-antiferroelec. 8=44269
Cu oxides, phase fields and thermal expansion 8=30686
Cu-Al alloys, β-phase, transform. during continuous cooling 8=26069
Cu_3Au, ordered and disordered, low temp. dislocation mechanisms 8=31076
Cu-2%Be, ageing, nucleated, precip. phase space lattice, obs. 8=35271
Cu–2 wt.%Be alloy, ageing characts. with or without additional elements 8=35674
Cu-Be alloys, ageing rel. to thermodynamic props. 8=35098
in CuCl crystal prep. for optical purposes 8=26248
Cu_5FeS_4, stability of phases 8=35097
Cu-Ga alloy, feathery structure formation in massive transform. 8=30690
Cu-Ga alloy, massive phase, duplex nature and dislocation structure 8=30685
Cu-12.5 wt. %Ge solid soln., f.c.c. → h.c.p. transform. 8=26068
Cu-Ni system, Ferromag. ordering rel. to Debye temp. conc. depend., obs. 8=39913
Cu-S films, kinetics by new e-diffr. procedure 8=26082
Cu_2S–Ag_2S system, rel. to resistivity changes 8=48378
DBr, rel. to crystal struct. 8=26396
DCl, and crystal structure by X-ray and n-diffr. 8=26073
Eu mono-chalcogenides, at high pressures 8=26070
EuS, mag. eqn. of state and sp. ht. near Curie point 8=27405
Fe, α to h.c.p., kinetics study Mössbauer effect 8=43946
Fe, $\alpha \rightleftarrows \gamma$, effect on positive ion emission 8=44955
Fe, in $\alpha \rightleftharpoons \gamma$ region, positive-ion and electron emission 8=27363
Fe, $\alpha \rightleftharpoons \gamma$ transform., internal friction changes 8=40152
Fe, b.c.c., edge disloc.-impurity interaction force-distance curve calc. rel. to hardening model 8=26674
Phase transformations—contd
solid-state—contd
Fe carbides, thermally induced 8=44003
Fe chromites, X-ray and Mössbauer effect study 8=35101
Fe, electrodeposited, natural ageing effects rel. to deposition conditions 8=35104
Fe, high-purity, multiple $\alpha \rightleftharpoons \gamma$ transforms. effect on internal friction 8=35700
Fe, purification by γ-phase zone displacement along α-Fe bar 8=30825
Fe-Al alloys, order-disorder 8=39557
Fe-Al alloys, structure and mechanical props. 8=39720
Fe-C martensite, substructure and yield strength 8=26812
Fe-Co alloys in fine particles, order-disorder 8=39556
Fe–Cr system, athermal martensitic transforms. 8=44000
Fe-8%Cr-1.1%C alloy, bainite, crystallography 8=30693
Fe-Cr-C alloys, bainite, transmission e-microscope exam. 8=30694
FeF_3, cubic–rhombohedral transition, 410°C 8=44005
Fe–Mo alloys, ageing characts., precipitate growth 8=44004
Fe-Ni alloy isothermal compression up to 300 kb 8=49006
Fe-Ni binary martensitic transformation, effect of cyclic heat treatment 8=26071
Fe-Ni-Al-Ti, Laves phase of comp. $(Fe, Ni)_{2-3.5}(Ti, Al)$ 8=35106
Fe–Ni–Ti alloys, $\gamma \rightarrow \alpha$ and $\gamma \rightarrow \alpha \rightarrow \gamma$, texture changes rel. to Young's modulus 8=35701
Fe–Ni–Ti alloys, hardening without martensitic transform. on ageing with plastic deform. at 600°C 8=35699
Fe-0.025% N, enhanced aging due to γ-α transform 8=44577
Fe-Pd alloys, on annealing and plastic deformation rel. to mag. props. 8=35102
α-$Fe_2O_3 \rightarrow Fe_3O_4$, and topotaxial relations between substances 8=26072
Ga, high press. 8=48260
GaAsZn ternary diagram, role in source selection for Zn diffusion in GaAs 8=44390
Ge, amorphous, from cryst. form by Ar ion bombardment 8=39723
Ge, annealed and cleaved surfaces, structure 8=48419
GeO_2, hexagonal to tetragonal, kinetic changes when used in polishing slurry 8=39558
H, normal, 4.2 to 0.91°K, hexagonal close-packed to f.c.c. lattice 8=39795
H_2, f.c.c., oriental transition, nonexistence 8=35112
HCl, and crystal structure by X-ray and n-diffr. 8=26073
HCl, low-temp. phase, phonon freq. distrib. 8=35384
HI, n.m.r. 8=49645
He^3, b.c.c.-h.c.p., volume discontinuity obs. 8=37358
InSb(As, P), produced by Ga 8=48384
K graphite, order-disorder obs. 8=26074
KCN, high press. 8=48385
$KD_3(SeO_3)_2$, growth and dielec. anomaly 8=30698
$K_4Fe(CN)_6 \cdot 3H_2O$, polytypic, rel. to ferroelec. props., 0 to –100°C 8=31432
$K_4Fe(CN)_6 \cdot 3H_2O$, polytypic transition seq. in –45 to –25°C from dielec. meas. 8=40610
KI–AgI, high-cond. systems 8=48396
KO_2, and crystal structures 8=26075
KSCN, high press. 8=48385
La, $\beta \rightarrow \alpha$ transform., model 8=44006
LaC_2, rel. to structure changes 8=26405
LaSb, rel. to lattice rearrangement in 630-720°K range 8=39948
Li_3AlF_6, transition temps. estimation 8=36564
$LiNbO_3$, ferroelec. transitions, 20°-1170°C, X-ray obs. 8=30863
$LiNbO_3$, structural change rel. to ferroelec. transition from x-ray and elec. exam. 8=31435
Li_2SO_4-Na_2SO_4 phase diagram 8=39559
$LiTaO_3$, five transitions, high-temp., X-ray study 8=35978
Mg–Cd alloys, ordering effect on residual resistivity and mag. susceptibility 8=40321
Mg-Cd alloys, ordering from X-ray diff. meas, 50-220°C 8=35113
Mg–Zn alloys, age hardening characts., effects of 1%Au addition 8=26832
MgO-Cr_2O_3-Fe_2O_3 solid solutions at 1300°C in air 8=39529
α-Mn, second-order, Landau-Lifshitz theory, quant. vertification 8=30700
Mn steels, $\gamma \rightleftharpoons \epsilon^1$ and $\gamma \rightleftharpoons \epsilon$, dilatometric and X-ray diffr. exam. 8=35114
Mn-Au alloys, on deform. and ageing rel. to antiferromag props. 8=31776
NH_4 salts, neutron scatt. determ. 8=48393
NH_4Br, l.f. vibr. above and below transition 8=27596
NH_4Cl, l.f. vibr. above and below transition 8=27596
NH_4F, to 20 kbar 8=34960
NH_4I–AgI, high-cond. systems 8=48396
N_2-O_2 phase diagram 8=35117
NaCN, orthorhombic-cubic, high press. 8=30701
NaCl:$Pb(NO_3)_2$, on heat treatment at 300°C 8=26689
$NaNO_3$, sp. ht., thermal diffusivity and conductivity 8=48391
$NaNO_3$, thermodynamics of λ-transition 8=39560
NaO_2, and crystal structures 8=26075
Nb hydrides (deuterides), and structure exam. by n. diffr. exam. 8=39725
Nb, strain-ageing, oxygen dependence 8=26835

Phase transformations—contd
  solid-state—contd
    Nb-O, strain-ageing from resistivity meas. 8=26846
    Nb_3Sn, from X-ray diffr. at 300, 15.5 and 10.5°K 8=35118
    Ni steels, mag. field effects 8=30702
    Ni-2.2%Be, ageing, nucleated, precip. phase space lattice, obs. 8=35271
    $NiCr_2O_4$, tetragonal to cubic, structural parameters, 92-298°K 8=26076
    Ni_3Fe, ordering, rel. to tensile props. 8=44595
    P, yellow–black, polymorphic, h. p. thermal effect 8=30703
    Pb perovskites 8=26063
    Pb rich alloy of Pb-Sn-Sb ternary system, aging 8=26764
    Pb–Bi system, new phases found during annealing 8=35844
    PbI_2, polytypis, interaction energy calc. 8=44012
    $Pb_2(NiW)O_6$ synthesized hnder high pressures 8=35122
    Pb-Sb alloy, (to 2 wt.% Sb), ageing after quenching 8=35121
    Pb-Sn alloys, cell boundary diffusivity calcs from Cahn and Turnbull theories 8=30670
    PbTe, at high pressures 8=35082
    PbTe-SnTe system, diagram rel. to specific alloy composition growth 8=44140
    $PdO-Ln_2O_3$ system in air 8=35123
    RbI–AgI, high-cond. systems 8=48396
    $RbNiF_3$, at high press. to cubic perovskite struct 8=48661
    RbO_2, and crystal structures 8=26075
    Sb, shock-induced polymorphic, dynamic obs. 8=39562
    Sb, structure changes at high pressures, investigation 8=44010
    SbSI, ferroelectric 8=31436
    Se, amorphous → polycrystalline, and monoclinic → hexagonal, kinetics 8=26078
    Si, ion-bombard., amorphous phase form., temp. and channelling effects 8=48931
    SiC, cubic-hexagonal rel. to temp. and pressure 8=48399
    SiC, hexagonal to cubic, under influence of high press. and high temp. 8=35124
    SiC, polytypism, interaction energy calc. 8=44012
    SiO_2, amorphous to cristobalite 8=44011
    SiO_2-glass, α-β quartz transform., effects on Na^{22} diffusion 8=48794
    Sm, mono-chalcogenides, at high pressures 8=26070
    β-Sn, under pressure rel. to Mössbauer line shift 8=43941
    SnRe–SnSe system, diagram 300°, to 900°C 8=44013
    SnTe, at high pressures 8=35082
    SnTe-GeTe system, at high pressures 8=35082
    $SrTiO_3$, 110°K phase transition, soft-phonon at corner of Brillouin zone 8=39564
    $TaN-TiB_2$, hot-pressed, rel. to densification and wear resistance 8=49053
    Ta-O, strain-ageing from resistivity meas. 8=26846
    TeO_2, at high pressures ($p = 60$ kbar) 8=26081
    Ti–Ag system, rel. to diffusion process and conc.-penetration curves 8=35509
    Ti-Co system, solubility limit study by X-ray diffractometry 8=30709
    Ti-6%Mo alloy, quenched, structure study by electron microscopy 8=30869
    Ti-47%Nb, α-phase formation during heating in e-microscope 8=35119
    TiNi crystals, obs. in premartensitic states on cooling 200-0°C 8=30710
    TiNi, second-order, within irreversible critical range rel. to electronic transform 8=30708
    TiNi, shape-memory effect at 90°C after plastic deform. at room temp. rel. to martensitic transform 8=30707
    TiNi transition 8=30899
    Ti–Pd alloys solid solubility 8=35127
    Ti_2O_3, transition, crystallographic study, 390-470°K 8=48678
    Tl amalgams 8=48348
    TlSe films, kinetics by new e-diffr. procedure 8=26082
    Tl–Sn alloy, phase diagram in range 0–20 at.% Sn 8=35126
    Tm_2O_3, up to melting point 8=35425
    α-U at 4.2°K, obs. 8=39567
    U, $\alpha_0 \rightleftharpoons \alpha$ structural change between 35 and 43°K from elastic moduli meas. 8=40185
    U, quenching, and anomalous thermal arrest in β phase, origin rel. to cryst. struct. 8=35129
    U-Ir system 8=35133
    U–Mo(1.5%) alloys, by rapid coolling from γ-phase, form. of pearlitic and martensitic mats. 8=35130
    U_4O_9, cubic-rhombohedral transition at 65°C, order-disorder transform. at 1125°C 8=26083
    UO_{2-x}/UO_{2-x} + U phase boundary, for temp. down to 1210°C 8=30712
    U-Pu alloys, heat evolution obs. 8=25306
    U/10% Pu/10% Fz, changes on annealing 8=30711
    U-Rh system 8=35132
    U-Ru system 8=35131
    U_2Ti, irradiation induced 8=35134
    V carbides formation during $\gamma \rightarrow \alpha$ transform. of austenite in steel 2062 8=35135
    V steel, isothermal, diffraction patterns 8=39791
    V_2Ga_5, structural, thermal and resistivity meas. 200-800°C 8=39566
    VH_x, vibr. spectra in three phases by neutron scatt. 8=39878
    VO, electronic phase transitions 8=26084
    VO_2, electronic phase transitions 8=26084
    V_2O_3, electronic phase transitions 8=26084
    V_3Si, lattice softening 8=31107
    V_3Si, near supercond. temp., X-ray and sp. ht. obs. 8=39567
    V_3Si, sublattice distortion, search 8=26445
    V_3Si, superconducting, martensitic transform., e-transmission microscope study 8=26085
    V_3Si, tetragonal-cubic low-temp. transition rel. to density states effect at Fermi surface 8=39568
    W, C contaminated, (110) face metastable phase, obs. 8=39583
    W-Cr solid soln., decomposition from X-ray diffr. study 8=26086
    Y garnets, synthetic, high pressure decomp. 8=26087
    Yb, mono-chalcogenides, at high pressures 8=26070
    Yb–Zn systeml phase diagram from thermal, X-ray, metallographic and resistivity data 8=44015
    ZnF_2, and phases lattice params., ⩽130 kbar, 25 and 300°C 8=39570
    ZnS, allotropic, induced by mech. pressure 8=44016
    ZnS, polytypism, interaction energy calc. 8=44012
    Zn_2TiO_4, order-disorder transition, influence of non-stoichiometric substitutions 8=26088
    Zr, purification by β-phase zone displacement along α-Zr bar 8=30825
    ZrO_2, $\alpha \rightarrow \beta$, temp. and impurity cation effects 8=26089
    ZrO_2, during heat treatment of $ZrOCl_2.H_2O$ and $Zr(OH)_4$ 8=48357

Phosphorus
    abundance in solar photosphere 8=28172
    black, plate crystal growth from vapour phase at h.p. 8=30832
    chemical separation from $SiHCl_3$ and $SiCl_4$. 8=49998
    determination in phospho-silica films on Si substrates 8=49994
    diffusion in n-InAs, coeff. temp. dependence, 650–900°C 8=35496
    diffusion in Si at high-conc., precipitate formation 8=39983
    diffusion in Si, effect on Sn diffusion 8=48791
    diffusion in Si epitaxial layers, effects on defect structure, 4=48833
    diffusion in Si, vacuum method using $POCl_3$ as source 8=48792
    implanted in Si, impurity distrib. determ. 8=27131
    ion bombardment of SiO_2, distrib. and range 8=35604
    ions implanted in Si, distrib. 8=49266
    metastable atoms, from flash photolysis 8=29646
    segregation in steel, determ. by etching 8=30861
    yellow–black polymorphic transition, h. p. thermal effect 8=30703
    P^{31} chem-shifts in P(III), phosphoryl and triphosphoryl halides 8=43406
    P^{31} Overhauser effects, and simultaneous obs. of two kinds of nuclei 8=40993
    P_2, ground state reduced potential curves 8=29717
    in Se, effect on viscoelasticity 8=31230
    Si dopant, Hall effect and elec. cond. obs. 8=49268
    in n-Si, e.p.r. hyperfine splitting rel. to compensation obs. 8=27487
Phosphorus compounds
    diphosphates of heavy metals, i. r. spectra 8=36313
    halides, F^{19} and P^{31} chem. shifts 8=43406
    oxyhalide radicals, electronic emission spectra 8=43414
    polyphosphate, $[Na_3H(PO_3)_4]_x$, crystal structure 8=44239
    phosphate glass, Mo^{3+} doped, e.s.r. and optical absorpt. 8=31879
    phosphoryl cpds., i. r. intensity of PO bands 8=29760
    phosphoryl halides, F^{14} and P^{31} chem. shifts 8=43406
    phospho-silica films on Si substrates, nondestructive determ. of P 8=49994
    phosphosilicate glass film form. on SiO_2, comp. and struct. 8=44048
    thiophosphory halides, F^{14} and P^{31} chem. shifts 8=43406
    HPF_4, microwave spectrum 8=34279
    PBr_3 molecules normal oscillations, dynamic and reduced coeffs. 8=34283
    PBr_7, cryst. struct. and bonding, for Br_3^- ion, compared with $CsBr_3$ 8=44247
    PCl_3, spin-lattice relax., and molec. motion in liq. 8=34912
    PF_3, molecules normal oscillations, dynamic and reduced coeffs. 8=34283
    PF_5, far-i. r. spectrum 8=47617
    PF_5, F exchange with tetrabutylammonium hexafluorophosphate in CH_2Cl_2 soln., n.m.r. obs. 8=25960

Phosphorus compounds—contd
PHF$_2$ and PDF$_2$, microwave spectrum, molec. struct. 8=38849
PH$_4$I, e.p.r. of I_2^- centres 8=31124
PN, dissoc. energy 8=43413
P$_3$N$_5$ vaporization 8=43413
PO radical, analysis of vibr. and rot. structure 8=34280
PO, rotational analysis of u.v. systems 8=34281
PO$_2^-$, SCF matrix elements 8=47616
POCl$_3$, as source in vacuum method for P diffusion in Si 8=48792
POCl$_3$, i.r. spectrum at 77°K 8=49746
POCl$_3$, spin-lattice relax., and molec. motion in liq. 8=34912
POF$_3$, spin-lattice relax., and molec. motion in liq. 8=34912
PSCl$_3$, i.r. spectrum at 77°K 8=49746
PX$_5$, force fields 8=38850
V$_2$O$_5$–P$_2$O$_5$–WO$_3$ system glasses, elec. conduction mechanism from e.p.r. 8=40291

Photochemistry

acetone-d$_6$, intermediates in photolysis 8=49951
acetonitrile-d$_3$, γ-irradiated, trapped electron and its reversible reaction, e.s.r. evidence 8=49955
acetyl chloride gas phase and matrix photolysis 8=43419
acridine, photoreduction in alcohols 8=32137
acridine, reactive state in photoreduction in ethanol 8=41284
acridine-biacetyl-benzene solns., triplet acridine form. by triplet biacetyl energy transfer, obs. 8=25925
acrolein, photodissoc. 8=32135
alkyl derivatives of benzene, photoisomerization 8=49949
alkyl diradicals, formation and rotation about carbon-carbon bonds 8=27759
anthracene, interaction with biacetyl in visible light 8=36618
anthracene triplet-triplet annihilation rate const. flash photolysis meas., 430-553°K 8=25535
benzene, gas phase, formation of fulvene 8=49950
benzene oxidation in gas phase, radical formation 8=41286
benzyl radical, assignment of excited states by three-step photoselection 8=25542
1, 3-butadiene, photodissoc. 8=32135
1-butene, photodissoc. 8=32135
2-butenes, cis-trans isomerization, benzene photosensitization 8=49959
cometary radicals and ions, effects in production 8=50425
cyanogen azide, photolysis and reaction with F 8=29723
cycloadittions, intermolec. orbital theory 8=27685
cyclobutanone-2-t, vibr. excited photodecomp. 8=41288
cyclohexane, liq. and in soln., vac. u. v. photolysis 8=27763
diazonium salts in acid soln., photodecomposition quantum yields 8=45397
dichloromethane, Hg-photosensitized, vibr. excited dichloroethane prod. 8=27761
dithionate ions in soln., photolysis, rel. to optical spectrum of SO$_3^-$ radicals 8=49957
ethylene oxidation by photolysis of NO$_2$ 8=36615
ethylene, spectroscopic basis 8=27760
flash photolysis delay unit 8=41285
flash photolysis, high-intensity pulse light source 8=28771
flash photolysis lamp 8=42206
o-fluorotoluene triplet state yield rel. to vibr., gas-phase obs. 8=25630
furfural, vapour phase 8=32134
gases, luminesc. during u.v. photolysis 8=34266
hexafluorobenzene triplet state yield rel. to vibr., gas-phase obs. 8=25630
hexafluoropropylene copolymer, γ-irradiated, photoinduced and thermal radical conversions 8=49953
hydrazine, photodissoc. 8=32135
hydrazine, vac.-u. v. photolysis 8=36613
hydrocarbon glasses, trapped electrons, optical and e.s,r. spectra 8=45401
hydrocarbons, gaseous, oxidation mechanism, e. s. r. investigations 8=36616
methanal azine, free-radical prod. 8=34337
methyl bromide, photolysis, high-energy CH$_3$ radicals 8=49961
p-methylbenzyl radical formation from p-xylene 8=36617
methylene, formation and rotation about carbon-carbon bonds 8=27759
monofluorobenzene triplet state yield rel. to vibr. gas-phase obs. 8=25630
naphthalene + 1, 4-dicyanobenzene, triple complex formation in excited state 8=48176
photobleaching 8=27756
photobleaching, spectral conformity 8=27757
photolysis, flash, i. r. detection of transient species 8=37672
photoselection, tandem two-photon processes 8=49692
polar solvents, mixed, photo-induced trapped electron rel. to photobleaching study 77°K 8=36446
poly(α-methylstyrene), photolysis, e. s. r. 8=27762
polycaprolactam, stressed, degradation kinetics temp. dependence 8=45399
polyethylene torephthalate, stressed, degradation kinetics temp. dependence 8=45399

Photochemistry—contd
polymer fibres, stressed, degradation kinetics temp. dependence 8=45399
polymers, stressed, photodegradation kinetics 8=36619
polystyrene, photolysis, e. s. r. 8=27762
proflavine, photoreduction in aqueous solution by steady light 8=49962
pyridine triplet state yield rel. to vibr., gas-phase obs. 8=25630
radiation effects on explosive instability 8=27732
rhodamine C solution, optical generation during excitation with pulsed light sources 8=30480
silk, natural, stressed, degradation kinetics temp. dependence 8=45399
tetrafluoroethylene copolymer, γ-irradiated, photoinduced and thermal radical conversions 8=49953
tetramethylethylene, intermediates in photolysis 8=49951
toluene triplet state yield rel. to vibr., gas-phase obs. 8=25630
trifluoromethyl iodide laser, Q switching and mode locking 8=37576
triphenylene-d$_{12}$-Rhodamine B solids solns., triplet-singlet energy transfer kinetics, obs. 8=36533
triple complex formation in excited state 8=48176
tubular-flow reactors for complex nonchain kinetics 8=49954
Ag$_2$S-HgI$_2$, photochromic, bleaching kinetics 8=49952
Al borohydride, flash photolysis 8=25444
As, metastable from flash photolysis 8=29646
AsD$_3$, flash photolysis, AsD$_2$ $^2A_1$–$^2B_1$ band spectra 8=29713
AsH$_3$, flash photolysis, AsH$_2$ $^2A_1$–$^2B_1$ band spectra 8=29713
Ba(N$_3$)$_2$, u.v. irrad. cryst. e.s.r. of N$_2^-$ 8=27485
Br, selective, using ruby laser 8=41287
CF$_3$OOCF$_3$, prod. of CF$_3$OOO radical 8=38941
CN violet emission, shock heated CO$_2$-N$_2$ mixture, chemical model 8=29722
CsBr, additively coloured, optical bleaching and high-temp. transforms. 8=27758
CS$_2$-O$_2$ photolysis, lasing oscill. analysis showing new lines and selective excitation 8=46569
F$_2$O + H$_2$ flash photolysis for HF laser 8=37582
Ge electrodes, surface photoeffect 8=27753
H$_2$, photoionization, ion-mol. and chemi-ionization reactions 8=36611
HClO$_4$, γ-irradiated, spatial distrib. of H atoms 8=49963
HF chem. laser, using UF$_6$ 8=46590
Hg + Cl atom combination 8=49960
KCl, coloured additively, reaction and photocond., at low temp. 8=31457
NCN$_3$, flash photolysis 8=25495
N$_3$CN reaction with F$_2$ in Ar matrix 8=47712
NH$_3$, photoionization, ion-mol. reactions 8=36612
NO soln. in H$_2$O, D$_2$O, photolysis at 1849Å 8=49958
NiO, decomposition on photo-absorption 8=36567
O$_2$, flash photolysis, vibr.-excited O$_3$ 8=36620
O$_2$ + CO + M, vac. u.v. flash photolysis 8=45398
O(^{1}D) gas-phase reaction with CO$_2$, rate const. 8=36614
P, metastable from flash photolysis 8=29646
S$_2$ formation after flash photolysis of CS$_2$, COS, NO in presence of intert gas 8=49956
Sb, metastable from flash photolysis 8=29646
Tl halide photolysis, r.f. mass spectrometry 8=43490

Photoconductivity
anthracene, dye-sensitized 8=49427
anthracene, injection-induced long-wavelength 8=27335
anthracene, mag. field effect 8=27336
anthracene, rel. to charge-transfer exciton and ionic levels 8=27254
anthracene:tetracene, trapping of photo-carriers 8=36030
9, 10-anthraquinone crystals 8=36031
by carriers in nonparabolic band, strong light induced 8=27314
cell for r.f. heating temp. control 8=46276
conductance of semiconducting bar, effect of pulse of photoexcited carriers 8=27312
crystal violet films, photocapacitance and photocurrent "memory" 8=36032
diamond, spectrum 8=44914
diamond with Al acceptors, spectrum, photothermal ionization and photon-induced tunneling 8=44913
durene, pure monocrysts. 8=49428
flying-spot scanner, elect. props. of semiconductors 8=24383
gradual capture rel. to lifetime 8=49408
halobenzene solns, enhanced conductivity on X-irradiation, 8=43866-7
liquid, recombination problem, comparison of β- and photo-ionization 8=49399
'localized' in space charge region, calc. for Si and Ge type semiconds 8=31451
malachite green films, photocapacitance and photocurrent "memory" 8=36032
molecular crysts, recombination problem, comparison of β- and photo-ionization 8=49399
negatively thermally stimulated conductivity, obs. 8=40645
photosensors connected to CdS bulk oscillator, as optical image sensor 8=27317
polystyrene, excitation wavelength depend. 8=49430
pulse response of electro-optic modulators and photocond. detectors at 10.6μ 8=36001
pyrene, spectrum rel. to carrier photogeneration 8=40679

Photoconductivity—contd
- review of work done at Industrial Institute for Electronics Torun Brach 8=40644
- rhodamine films, photocapacitance and photocurrent "memory" 8=36032
- Schottky photodiode, voltage enhanced spectral response 8=31458
- superconducting metals separated by CdS film, tunneling effect 8=35848
- in semiconductor, exciton-exciton collision contrib. 8=36000
- semiconductors, deformed, many —valley (Ge and Si type), kinetics rel. to intervalley transitions 8=36002
- semiconductors, high photovoltages, origin 8=49401
- semiconductor, in presence of, band bendings on surface 8=40646
- semiconductors, light polarization depend., mechanisms 8=49405
- semiconductors, organic, meas. in SHF band 8=49406
- semiconductors, possiblity of negative conductivity in quantizing magnetic fields 8=49403
- semiconductors, spectral response, possibility of observing electron-phonon Umklapp-processes 8=27315
- semiconductors, transient process study using regenerative microwave system 8=49400
- in semiconductor without symmetry centre 8=49404
- steady-state, in presence of traps 8=49402
- tetracene, rel. to charge-transfer exciton and ionic levels 8=27254
- transistor photosensitivity control by light intensity and wavelength changes 8=35941
- $A_VB_{VI}C_{VII}$-type semiconductors, rel. to phase transforms. 8=27077
- AgBr crystals, quenching by constant background illum. method 8=40651
- AgBr, induced by Q-switched ruby laser 8=45255
- AgBr, photoexcited hole diffusion temp. dependence 8=49410
- Al/CdSe(or CdTe)/Au thin-layer structures, voltage-controlled bistable states 8=49303
- AgCl, induced by Q-switched ruby laser 8=45255
- $AgGaTe_2$, spectral characts., forbidden band width 8=40649
- $AgInTe_2$, spectral characts., forbidden band width 8=40649
- Ag_2O, spectra at 77°K 8=40650
- β-Ag_2S film, obs. 8=49152
- Au, thin films 8=36009
- B, zone-melted beta-rhombohedral, with low C content 8=40908
- $Bi_{12}GeO_{20}$, photo-induced carriers, transport processes 8=27318
- BiSCl, and optical absorpt. 8=32028
- CaF_2, synthetic, absorption 8=36338
- CaF_2/Na, synthetic, absorption 8=36338
- Cd chalcogenide epitaxial films, prep. 8=26115
- CdS, behaviour of holes and electrons, revealed by laser excitation 8=36012
- CdS, changes on ht. treatment, 100–600°C rel. to surface topography 8=35268
- CdS crystal, l.f. oscillations induced by i.r. quenching 8=44934
- CdS crystals, local centre formation in presence of free electrons and holes 8=36015
- CdS diodes, thin-film, heat treating in various ambients 8=27176
- CdS, e-beam excited, photocurrent saturation 8=31973
- CdS, e-irradiated, rel. to damage evaluation 8=40654
- CdS films, vapour-deposited, rel. to stoichiometry and impurity conc. 8=26114
- CdS, illuminated, rel. to thermoelectric power 8=35997
- CdS, induced impurity, spectral distrib., effect of i.r. quenching 8=44921
- CdS, intrinsic under unipolar injection conditions, agreement with calc. 8=44919
- CdS layers, chem. deposited, props. 8=44918
- CdS phosphors, microwave meas. 8=49426
- CdS, photocurrent props. under unipolar injection conditions 8=44920
- CdS, optically quenched, electronic fluctuation spectra 8=40659
- CdS, oscillatory depend. on photon energy 8=31452
- CdS, rel. to negative photomechanical effect 8=40137
- CdS, recombination kinetics 8=27645
- CdS, rel. to piezoelectric oscillations 8=27297
- CdS, slow recombination centres, parameters, effect of heat treatment 8=50655
- CdS, sonde characts. 8=49412
- CdS, spectral distrib. fine structure, effect of O adsorption 8=44917
- CdS, surface, effect of self-purification and polarity 8=40658
- CdS, surface, oxygen chemisorption and desorption influence 8=49413
- CdS thick films, chemically deposited 8=39589
- CdS, transient currents 8=40653
- CdS, trapping level disposition 8=49793
- CdS-type devices, temp. depend. 8=27337
- CdS-In contact region, dark current relax. obs. 8=44916
- CdS:P, i.r. quenching band, 2.15 eV 8=40657
- CdS+Te, small inertia photoresistors 8=36014
- CdSe crystal, rel. to 0.93μ luminescence 8=36482

Photoconductivity—contd
- CdSe films, field effect effective mobility freq. and temp. dependence 8=36016
- CdSe films, photocurrent saturation 8=44923
- CdSe influence of doped surface on spectral dependence 8=49417
- CdSe, on X-ray and vis. illumination 8=40656
- CdSe, rel. to i.r. luminescence $(\lambda_m = 1.2\mu)$ mechanism 8=45266
- CdSe, sonde characts. 8=49412
- CdSe(Te), X-ray excited, electron-hole generation energy 8=49418
- CdTe, due to exciton generation 8=36010
- Cs-Sb films, photoelectron attenuation length determ. 8=31455
- Cu phthalocyanine, field effect on carriers 8=36018
- Cu_2O, compensated, non-linear, in recombination centre cross section determ. 8=50660
- Cu_2O thin film 8=31983
- Cu_2O, long duration 8=36017
- CuCl, oscillatory depend. on photon energy 8=31452
- EuS(Se) 8=27320
- GaAs, due to exciton generation 8=36010
- GaAs films, polycrystalline, illumination-current, relax. and spectral characts. 8=27321
- GaAs, photo-excited, current osc. and high field domain vel. meas. 8=31374
- GaAs:Cu, recombination centres, parameters determ. from photoconductivity 8=36020
- $GaP_xAs_{1-x}GaAs$ n-n heterojunctions, photosensitivity spectra 8=36019
- GaP–Cu storage effects 8=49419
- Ge, assoc. with ionization of H-like acceptors 8=44954
- Ge, due to exciton generation 8=36010
- n-Ge, extrinsic surface spectrum 8=40663
- Ge, field electron-emissive photocells 8=40702
- Ge, group III and V impurities photothermal ionization spectroscopy, obs. 8=40662
- Ge, internal photo-elec. effect, quantum efficiency 8=49420
- Ge, irrads, in direct transition region, exciton dissociation 8=40664
- Ge, oscillatory magneto–, rel. to photon energy 8=40661
- Ge, spectra 8=44925
- Ge:In far i.r. photocond., detector, response time 8=32945
- Ge:Zn, Sb, photodielectric effect 8=27322
- In, I-V characts. on X-irradiation and at 6000 V 8=27325
- InAs-GaAs alloys, threshold and impurity levels rel. to comp., obs. 8=27324
- InGaAs:Cr rel. to InAs trap level, obs. 8=27324
- InGaAs:(Cr, Zn) rel. to trap and acceptor levels, obs. 8=27324
- InSb detector in far i.r. 8=40666
- InSb films, surface, and field effect 8=27326
- p-InSb, impurity spectra 8=44926
- p-InSb, surface photoconduction 8=44927
- n-InSb, kinetics, and noise spectrum 8=27327
- InSb, I-V characts. on X-irradiation and at 6000 V 8=27325
- InSb, peaks indicating photon absorpt. and excitation of electronic impurity states 8=40665
- InSb-GaSb alloys, threshold and impurity levels rel. to comp., obs. 8=27324
- In_3Te_4 thin layers, rel. to structure and optical props. 8=39796
- KCl, coloured additively, and photochemical reaction at low temp. 8=31457
- KCl crystals, coloured, deformed, rel. to dislocation–colour centre interaction 8=44928
- KCl:Zr, Z_2 centre 8=44929
- K-Sb-Cs photocathodes 8=36023
- Mg phthalocyanine, films, barrier height, mechanism 8=40678
- MoO_3, cryst. and film, activation energies and decay 8=32013
- PbI_2, spectra rel. to defect energy-level 8=44650
- PbO polycrystalline, rel. to SCL currents and trap distrib. 8=36024
- PbS, effect of temp. 8=44930
- PbS film, monocrystalline, photosensitivity 8=40667
- PbSe films, polycrystalline, meas. at 77°K rel. to mobility changes and heat treatment 8=27328
- Sb, I-V characts. on X-irradiation and at 6000 V 8=27325
- Sb_2S_3, X-ray illuminated, photocurrent distrib. 8=49422
- SbSeI, and optical absorpt. 8=32028
- SbSeI grown from gaseous phase, volatile component vapour pressure effects 8=35989
- SbSi compounds, props 8=49269
- SbSI grown from gaseous phase, volatile component saturation vapour pressure effects 8=36026
- Se crystal, trigonal, transient photoconductivity rel. to carrier behaviour 8=44933
- Se electrophotographic layers, current carrier drift mobilities 8=40671
- Se, hexagonal, and cond., effect of reactor irradiation 8=44809
- Se, hexagonal, internal photoeffect spectral distrib. on X-ray and u.v. irradiation 8=40672
- Se hexagonal, saturation photocurrent, temp. dependence rel. to band structure 8=40673
- Se, trigonal, photocurrent decay rel. to hopping recombination 8=36027

Photoconductivity—contd
- Si, bipolar, lifetime, influence of adsorbed Au, Sb and O_2 8=27134
- Si, field electron-emissive photocells 8=40702
- Si, γ-irrad., recombination lifetimes 8=49424
- p-Si, surface, rel. to illum. intensity and temp. 8=27330
- Si:Au, emission rates of Au acceptor level, photocurrent determ. 8=40674
- α-SiC(6H), high-resistivity, doped accidentally, rel. to a band scheme 8=35779
- p-SiC–n-CdS heterojunctions 8=40517
- SiC: N, B, and unknown impurity doped, optical charge exchange exam. 8=36251
- SnO_2: Zn, chemisorbed oxygen effect on conductivity 8=31391
- $SrTiO_3$, and Hall effect 8=40675
- $SrTiO_3$, anomalous temp. dependence 8=27331
- TlI, adsorbed organic mols. surface charge-transfer groups form., obs. 8=36028
- Te, fast photocond. by CO_2 laser radiation 8=40676
- ZnO crystal, spectral sensitization, electrochem. obs. 8=49425
- ZnO crystal, surface charge discharging on illumination and e. multiplication 8=49354
- ZnO, water vapour in ambient gas conc. dependence 8=27334
- $ZnO:Co^{2+}$, and optical absorpt. 8=36029
- ZnS phosphors, microwave meas. 8=49426
- ZnS:Ag, Ga, donor-acceptor pairs, and optical and photo-excited e.s.r. spectra 8=40677
- ZnSe, photoelectronic props. in p-type-Cu-activated and n-type-self-activated 8=45296
- ZnSe, rel. to intrinsic oscillations 8=27333

Photodisintegration. See Deuterons/photodisintegration; Nuclear reactions due to/photons.

Photodissociation. See Photochemistry.

Photoeffect, nuclear. See Gamma-rays/effects; Nuclear reactions due to/photons; Photons/interactions.

Photoelectricity—contd
Cu, rel. to temp. 8=36008
Cs-Sb film in photocathode formation, chem. comp. meas. using crystal-quartz microbalance 8=40683
GaAs layer diodes, props. and emission currents 8=49305
Ge, internal effect, quantum efficiency 8=49420
Ge p-i-n detectors, determination of compensated-region width by light probe 8=46899
Ge:Au photoresistors, surface charge effects in I-V characts. and excess noise 8=36034
GeSe, and optical props., in energy range 0.5-1.5eV 8=49727
He, liquid, photoeffect on negative charges, current wavelength depend. 8=28437
n-InSb, alternating voltage induction by modulated waves, 0.8-10 mm 8=49421
InSb photoresistors, optical heterodyne effect 8=36372
K-Sb film in photocathode formation, chem. comp. meas. using crystal-quartz microbalance 8=40683
Pb, γ cross-section determ. 50-208 keV 8=36004
PbS, chemically deposited, influence of impurities on photosensitivity 8=44931
PbTe films, temp. depend. of photoelec. parameters 8=40668
$Sb_xBi_{1-x}SJ$ and $SbS_xSi_{1-x}J$ properties 8=40670
SbSeI, internal photoeffect, range 83°-293°K 8=44932
SbSI, photodielectric effect 8=40669
Se electrophotographic layers, dark discharge mechanism 8=49423
Si epitaxial layers, meas. of electrical parameters 8=35915
Si photocells, electron bombardment rel. to props. 8=27329
Si photodiodes with demodulation props. independ of wavelength 8=49409
Si p-i-n detectors, study with travelling light probe 8=46888
Si p-n junction u.v. photocells 8=27338
Si solar cells in-flight performance, computer prediction 8=24086
Si solar cells, Li diffused, radiation damage self-healing 8=24091
Si solar cells, p irrad. damage thermal annealing, 4.6 MeV 8=24101
Si solar cells for multikilowatt arrays 8=24100
Si solar cells, n irrad. damage and Li effects, obs. 8=24095
n/p-Si solar cells charged particle irrad. degradation, base resist. effects, 1-25 ohm cm 8=24092
n/p Si solar cells micrometeoroid degradation simulation obs. 8=24094
Si: Li solar cells, efficiency and e irrad. damage annealing, obs. 8=24103
Si: Li solar cells, experience and future of 8=24104
Si: Li solar cells, present status 8=24090
p^+/n-Si: Li solar cells, status 8=24102
p/n-Si: Li and n/p-Si solar cells, comparison 8=24089
Sn, γ cross-section determ. 50-208 keV 8=36004
TlI, adsorbed organic mols. surface charge-transfer groups form., obs. 8=36028
U, cross sections in 80-150 keV range, calcs. 8=44912
W, γ cross-section determ. 50-208 keV 8=36004
ZnS, photodepolarization currents, shallow capture levels rel. to kinetics 8=27332

Photoelectromagnetic effects
contactless meas. method, rel. to lifetime in semiconductors 8=40648
gradual capture rel. to lifetime 8=49408
Dember voltage, ohmic contact effects 8=44911
$AgGaTe_2$, spectral characts. 8=40649
$AgInTe_2$, spectral characts. 8=40649
CdS, influence of surface 8=31453
p-CdTe, obs. rel. to orientation 8=44915
Cu_2O thin film 8=31983
Ge films, spectrum 8=27323
in n-Ge, in pulsed mag. fields 8=36021
n-InSb, photomagnetic effect of hot photoelectrons 8=36022
n-InSb, photomagnetic effect oscills. rel. to e heating 8=31456
$SrTiO_3$, photomagnetoresistance by dc method at 10°K 8=44976

Photofission. See Nuclear fission.

Photographic light sources. See Light sources; Photography.

Photographic materials
See also Nuclear track emulsions.
contrast coeff., vacuum u.v., depend. on incidence 8=24441
emulsions, resolution of 7-60 keV electron images 8=37722
emulsions, thick, verification of Wiener's expts. 8=46766
line photometry and influence of Eberhard effect 8=28795
paper, appl. to particle beam tracking 8=46982
paper, light scatt. rel. to halftone reproduction 8=28905
photographic negative manufacture with parallel lines for spark chamber. 8=33391
plates, background blackening due to ion irrad. 8=28903
solar recording films, modulation transfer functions and 'detectibility threshold' 8=28162
speck size distrib. of exposed photographic emulsion 8=24443
Ag halide emulsions, electron trap distribution and low temp. Herschel effect 8=35744
Ag and Ag halide grains, effect of bleaching 8=33295

Photographic materials—contd
AgBr, photoelectron drift, 40 to −100°C 8=36007
AgBr, recrystallization, effects of NH_3 and triethanolamine 8=30821
Au film, holographic grating prep. 8=33290

sensitivity
emulsion, comparative noise performance in holographic and conventional imagery 8=28901
emulsion, light-sensitivity centres, surface rel. to subsurface 8=37723
emulsions, response to 7-60 keV electrons 8=37721
emulsions, surface and internal sensitivity interaction 8=33296
films, 17 types sensitivity to ionizing rad. in near Earth missions 8=28993
increase in partial vacuum, rel. to holographic appl. 8=42281
orpigment layers, spectral distrib. 8=24442
AgBr dispersion, latent image formation and reduction-plus-sulphur sensitization 8=46765
AgBr, effects of NH_3 and triethanolamine 8=30821

Photographic process

  oxide crystals, ion bombard. damage 8=48888
  oxyhalides, mech. and optical effects 8=31140
  planar devices, surface and bulk effects of nuclear reactor radiation, comp. 8=31400
  plasma production from laser interaction with solid D targets 8=39064
  point defects in non-metallic solids, conference 8=31029
  polyethylene, γ effect on elec. cond. 8=40084
  polymers 8=35608
  polymethyl methacrylate, conductivity, permittivity 8=49597
  polymethylmethacrylate, thermal radiation during damage by laser light 8=30994
  polystyrene, dielectric breakdown, optimal thickness calc. 8=31417
  polystyrene, filamament struct. in laser beam trace 8=49784
  polystyrene, thermal radiation during damage by laser light 8=30994
  porcelain dielectric breakdown, optimal thickness calc. 8=31417
  proton damage of Ge(Li) detectors 8=46910
  quartz, dielectric breakdown, optimal thickness calc. 8=31417
  quartz, fused and cryst., laser prod. damage, 300°K 8=32031
  quartz rel. to density decrease 8=26722
  quartz, resonance frequency modification, various cuts 8=35418
  rel. to reactor materials 8=29564
  s. c. r., switching with ionized rad., model 8=27165
  semiconducting devices, damage, book 8=31399
  semiconducting layer structures, fission fragment tracks 8=44487
  semiconductor junctions, computer prog. for prediction of rad. damage 8=27146
  semiconductors, bandgap depend. and related features of ionization energies 8=27065
  shock wave structure effect 8=37253
  solar cell irrad. degradation and equiv. 1 MeV e flux, computer calc. 8=24085
  swelling of irradiated fuel spheres, meas. by microradiography 8=34102
  sytalls, degree of ordering increase 8=26147
  tetrafluoroethylene-hexafluoropropylene copolymers, prod. of peroxy radicals, e. s. r. 8=43422
  thermionic diode, Xe filled, V-I characts on exposure to nuclear rad. 8=28485
  thermionic diodes, Xe-filled, nuclear-irradiated elec. props., 8=46417
  thin films, hardening during vacuum deposition 8=48965
  transistors, oxide passivated, induced surface recomb. 8=27193
  transistors, response to pulse of ionizing rad., computer prog. 8=27190
  triglycinesulphate, γ-irradiated, optical annealing investigation by e.s.r. 8=44400
  Ag, internal friction after cold drawing and irrad. at low temp. 8=48986
  Al crystal, 50 keV Al^+, Cu^+ bombard., damage obs. 8=48910
  Al, plastically deformed, u.v. prestimulation effect on exoelectron emission 8=44942
  Al_2O_3, n-damage and macroscopic props. changes, review 8=44496
  Al_2O_3 rel. to low-temp. thermal cond. 8=26722
  γ-Al_2O_3, surface defect formation and annealing adsorpt. exam. methods 8=44024
  γ-Al_2O_3, surface defect formation and annealing, exoemission exam. methods 8=44025
  $BeAl_2O_4$, chrysoberyl, n-irrad., growth obs. 8=31145
  BeO, n-damage and macroscopic props. changes, review 8=44496
  BeO rel. to Be diffusion rate 8=26722
  C_4F_2:Mn, thermoluminescent, u. v.-induced second reading 8=45261
  Co, e bombard. at 20°K, point defects, elec. resistivity 8=48914
  GaAs tunnel diode, switching by transient ionizing rad. 8=27187
  Ge etched surfaces, u. v. irradiation, rel. to charge condition 8=35901
  Ge, surface damage rel. to exoelectron emission 8=40694

Physical effects of radiations—contd
- Ge(Li) γ detectors, fast n bombard. degradation 8=42453
- Cu–Co alloys, coherency loss 8=26036
- Fe, pure, reactor irrad. effect on surface struct. and corrosion 8=30720
- H_2 foil laser irradiation, plasma production 8=29995
- H_2, solid damaged, e.p.r. obs. at 4.2°K 8=40924
- HD. solid damaged, e.p.r. obs. at 4.2°K 8=40924
- KCl, radiation-induced macrodefects 8=26711
- LiF, F band, re-irradiation and annealing behaviour between 80°K and 300°K 8=49738
- LiF, radiation-induced macrodefects 8=26711
- MgO, n-damage and macroscopic props. changes, review 8=44496
- Mo, defects, thermal stability 8=40077
- NaCl, electron bombardment at 33.5-44 keV 8=48925
- NaOH ice, γ-irrad. electron traps 8=31153
- Pd–20 at.% Si alloy, amorphization on irradiation with U^{235} fission products 8=31154
- Si detecor, pulse height defects due to nuclear collisions 8=46896
- Si, ion-bombard., amorphous phase form., temp. and channelling effects 8=48931
- n/p-Si solar cells, charged particle degradation, base resist. effects, 1-25 ohm cm 8=24092
- Si, surface damage rel. to exoelectron emission 8=40694
- Si tunnel diode, switching by transient ionizing rad. 8=27187
- Si(Li) detector, response to high-energy particles 8=46898
- SiO_2 rel. to density and colour centres 8=26722
- Te, elect. cond. of single crystal, effect of reactor irradiation 8=31393
- U alloys, n-irradiated, swelling 8=44506
- Zr polycrystals, e-irradiated, low-temp. resistivity recovery 8=31158

- **decay**
  - in baryon-antibaryon model 8=24754
  - electromagnetic, rel. to meson-electromagnetic-Dirac field interactions 8=38015
  - of K° 8=47115
  - leptonic with Weinberg sectral function sum rules 8=42508
  - π°, prod. in K^{-} interaction with complex nuclei in bubble chamber 8=25254
  - $\pi^{\circ} \to 2\gamma$ derived from N Compton scatt. 8=33663
  - $\pi^{\circ} \to 2\gamma$, $\pi \to 2\gamma$ ratio rel. to SU_3 symm. breaking 8=24769
  - π° vector-meson dominance rel. to quark field $U_6 \otimes U_6$ commutation relations 8=33662
  - π^{+} and π^{-} lifetimes, precise comparison rel. to CPT 8=42509
  - π_{l2}, radiative corrections same as for π_{e3} provided π^{0} has vanishing 4-monentum 8=24770
  - $\pi \to e\nu\gamma$, form factor, Schwinger and quasilocal terms 8=47106
  - $\pi \to e\nu\gamma$, ρ and A_1 dominance 8=29176
  - $\pi \to \gamma \to e^{+}e^{-}$ used to meas. K decay parameters 8=33698
  - $\pi \to \gamma + e + \nu$, weak vector current conservation 8=37876
  - $\pi \to l\nu\gamma$, sum rule for use in calc. decay width in $A_2 \to \pi\gamma$ 8=33726
  - $\pi \to l\nu\gamma$ and A_1-ρ-π system 8=42609
  - $\pi \to l + \nu_1 + \gamma$ applic. of Cabibbo theory 8=24753
  - $\pi \to \mu + \nu$, Feynman diagram perturbation theory 8=29121
  - $\pi \to \pi' l\nu\gamma$ subtraction of amplitude in dispersion relation 8=33726
  - radiative corrections, including strong interaction effects 8=37967
  - semi-leptonic, phenomenological model 8=24771
  - as special relativity test 8=32791

Pions—contd
- **interactions**
  - air nuclei, models for e.a.s. calc. 8=38217
  - conspiracy, contributions of evasive, conspiring Regge-pion pole for different reactions 8=37909
  - d disintegration at high energy, covariant form of Austern model 8=25006
  - d disintegration, cavariant theory from threshold to 300 MeV 8=33843
  - $\gamma\pi \to 2\pi$, for $\pi \to 2\pi$ dissociation study in nuclear field 8=29122
  - high energy cosmic ray obs. in emulsion 8=42732
  - $K\pi$, existence of κ resonance 8=24861
  - on nuclei, A_1 prod. by diffraction dissociation 8=42608
  - π^{-}, e pair direct prod. in nuclear emulsion, 16.2 BeV/c 8=33645
  - π^{-} in heavy emulsion nuclei, strange particle prod. $p_{\pi} = 17$ GeV/c 8=33837
  - π-D, absorpt., exact iteration calc. 8=33673
  - π-He^{4} double charge exchange, cross section calc. 8=33674
  - π-nucleus, low energy, review 8=29482
  - $\pi + w \to \pi + \pi$, thin d double spectral function effects 8=24680
  - $\pi^{-}n \to p\pi^{-}\pi^{-}\pi^{\circ}$, $N\pi\pi$ enhancements, 5 GeV/c 8=33676
  - $\pi^{-}n \to \{P\pi^{-}\}\pi^{-}\pi^{\circ}$, nucleon isobars, 5 GeV/c 8=33675
  - π^{-}-Xe, π^{+} production at 9 GeV(c 8=47335
  - $\pi^{+}d$, search for $2\pi^{\circ}$resonance near 730 MeV 8=42532
  - $\pi^{+}d \to pp$, Miyazawas theory of π absorpt. 8=42531
  - Regge pole trajectory for πp, $K\pi$, $\bar{p}p$ interactions with $\Delta(1238)$ prod. 8=29217
- **interactions, pion—nucleon**
  - Bethe–Salpeter amplitudes decomposed into standard covariants and invariant amplitudes 8=37848
  - Bethe-Salpeter eqn., bound-state solns. 8=42534
  - charge exchange, Regge singularities 8=29130
  - inelastic, central and peripheral, 17.2 GeV obs. 8=24783
  - non-invariance, non-compact groups corresponding to SU(4), SU(6) 8=37843
  - non-linear Lagrangian models invariant under generalized chiral groups SL(4, C) and SL(12, C) 8=24752
  - in nuclear emulsion, with d and t prod., 16.2 GeV/c 8=38099
  - π^{-}, three-prong in propane chamber, with 4 GeV/c impulse 8=47107
  - $\pi^{+}d$ at 5.1 GeV/c, dipion system, ϵ° and g quantum number search 8=29128
  - $\pi^{+}d$, search for $2\pi^{\circ}$resonance near 730 MeV 8=42532
  - $\pi^{+}n$ 4, 5, π prod. 3.29 GeV/c 8=37983
  - $\pi^{-}N$, 17.2 GeV/c, heavy nuclei surface neutron richness, K, π, prod. 8=42535
  - $\pi N \to \eta N^{*}$ (1236), O(3, 1) symmetry analysis 8=24785
  - $\pi N \to NW$, W prod. cross-section, one pion model 8=38022
  - $\pi N \to \pi\pi N$, current algebra and coupling consts. 8=42533
  - $\pi N \to \pi\pi N$ for calc. of S-wave $\pi\pi$ phase shift 8=29144
  - $\pi + N \to 2\pi + N'$, theory 8=29129
  - $\pi + N \to \rho + N^{*}$, ang. decay correls. at 8 GeV 8=24781
  - $\pi + N \to \rho + N^{*} \to N + 3\pi$, Regge-pole model 8=24780
  - $\pi N \to \omega N^{*}_{3/2}$, (1236), Lorentz pole analysis 8=37974
  - $\pi N \to VN$ and γ photoprod., γ–V analogy model 8=33666
  - $\pi + N \to V + N$, vector meson prod., conspiracy relations 8=24846
  - $\pi N^{*} \to \rho N$, superconvergent sum rules 8=24786
  - $\pi^{-}N$, nuclear emulsions in magnetic field, 3.85 GeV/c 8=37975
  - $\pi^{-}N$, production of Ξ hyperons at 4.0 GeV/c 8=24999
  - π^{-}-Xe, at 9 GeV, rel. to π° prod. 8=37973
  - resonance prod., differential cross section 8=24843
  - soft-pion calc. of low energy parameters, unitarity correction 8=24796
  - superconvergence relations 8=29115
  - transverse momentum at 17.2 GeV 8=24784
  - vector meson prod. Lorentz pole structure 8=29171
- **interactions, pion—pion**
  - $\pi\pi \to N\bar{N}$ helicity amplitude relations 8=24658
  - vector meson exchange and continuation in ang. momentum 8=29166
  - vector meson prod., Lorentz pole structure 8=29171
- **interactions, pion—proton**
  - and single-π prod. amplitude rel. to current-algebra and PCAC model anomalies removal 8=33691
  - $\Delta(1238)$ prod., π trajectory Regge-pole analysis 8=29217
  - elastic, large-angle, differential cross-section angular var. 8=29191
  - high-momentum transfer collisions, influence of resonance form., Regge model 8=29132
  - multipion prod. 4-11 GeV/c configuration probability of charges rel. to statistical model 8=33672
  - $\pi p \to N(k+1)\pi$, Satz additive quark model for cross section 8=24808
  - $\pi + p \to \pi + N^{*}$, Regge pole model, N^{*} matrix elements 8=33839
  - $\pi p \to \rho N \to \pi\pi N$, ρ shape 8=38037
  - $\pi p \to \rho N^{*}$, energy- and momentum-transfer dependence of cross-sections 8=37981
  - $\pi^{-}p$, E = 11 GeV/c, analysis of 3, 4π systems with mass around 1.7 GeV/c 8=29133
  - $\pi^{-}p$, $A_2(1300)$ region structure, 6 GeV/c 8=38035
  - $\pi^{-}p$, ρ resonance prod. and decay, 2.05-3.22 GeV/c 8=42614
  - $\pi^{-}p$, $\pi\rho$ spectrum at 6.7 GeV/c 8=37979
  - $\pi^{-}p \to \eta n$, polarization and F/D coupling of N_{γ} (2650) 8=24793

Pions—contd

- **interactions, pion—proton**—contd
  - $\pi^- p \to \eta n$, SU(3) symmetry validity 8=37852
  - $\pi^- p \to \eta^\circ n$, 10 GeV/c obs. 8=29160
  - $\pi^- p \to \gamma n$, $N^{*\circ}$ e. m. couplings determ. 8=37916
  - $\pi^- p \to K_1^\circ K_1^\circ n$, 4 and 5 GeV/c obs. 8=42357
  - $\pi^- p \to \Lambda K^\circ \gamma$ rel. to meas. of the magnetic moment of Σ°-Λ transition 8=33835
  - $\pi^- + p \to N^{*-} + \pi^+$ PCAC constraint 8=33678
  - $\pi^- p \to N^{*+}\pi^-$ at 6 GeV/c 8=37980 $\hookrightarrow \pi^- p\pi^+$
  - $\pi^- p \to n$ + missing mass, 2.12 GeV/c particle mass determ. 8=38032
  - $\pi^- p \to p + MM^-$, differential cross section rel. to momentum transfer, 11.5 GeV/c 8=37976
  - $\pi^- p \to \pi^- p\eta^\circ$, A_2^- obs., 5 GeV/c 8=38036
  - $\pi^- p \to \pi^\circ n$, differential cross sections, optical
  - $\pi^- p, \to \pi^\circ n$, $K^+\Sigma^-$, Argand diagrams, bootstrap theories and Regge poles comparison 8=42443
  - $\pi^- p \to \pi^\circ n$, Regge-pole model with absorptive corrections 8=42536
  - $\pi^- p \to \pi^\circ n$, SU(3) symmetry validity 8=37852
  - $\pi^- p \to \pi^\circ n$, 2 to 5 GeV, polarization data interpretation using interf. model 8=24791
  - $\pi^- p \to \pi^\circ\pi^\circ n$, data about s-wave $\pi\pi$ scatt. 8=42541
  - $\pi^- p \to \pi^+\pi^- n$, E = 360, 430 MeV, isobar amplitude determ. 8=29134
  - $\pi^- p \to \pi^+\pi^- n$, 8, 16 GeV/c obs. 8=29131
  - $\pi^- + p \to \pi^+ + \pi^- + n$, N^{*-}(1236) prod. ang. distrib. 8=24782
  - $\pi^- p \to (p\pi^-\pi^-\pi^+)$, $p\pi^0\pi^-\pi^-\pi^+$, $n\pi^+(\pi^-\pi^-\pi^+)$, 5 BeV/c, mass spectrum of $\pi^-\pi^-\pi^+$ 8=37977
  - $\pi^- p \to p\rho^-\rho^\circ$, 8 GeV/c, evidence for new meson resonance in $\rho^-\rho^\circ$, 8 GeV/c 8=38023
  - $\pi^- p \to \rho^- p$, 4 GeV/c, absorpt. model with one-pion-exchange 8=47110
  - $\pi^- p \to \rho^\circ n$, 4 and 8 GeV/c comparison with $\gamma p \to \pi^+ n$, Vector dominance model 8=37972
  - $\pi^- + p \to \rho^\circ + n$, vector meson dominance analysis 8=24787
  - $\pi + p \to \phi + n$ followed by $\phi \to e^+e^-$, partial width obs. 8=33722
  - $\pi^\circ p \to \pi^\circ \Delta^{++}$(1238) Regge-pole model with absorptive corrections 8=42536
  - $\pi^+ p$ at 850 MeV/c, cross section obs. 8=24792
  - $\pi^+ p$, mass dependence of small angle differential cross section, 8 GeV/c 8=42542
  - $\pi^+ p, \rho^+$ and π^+ multipion resons., 1630 and 1720 MeV 8=33729
  - $\pi^+ p$, six prong jets, principal axis analysis rel. to resons., 8 GeV/c 8=33677
  - $\pi^+ p \to K^+\Sigma^+$, parity determ. of $K\Sigma N$ 8=24995
  - $\pi^+ p \to \pi^\circ N^{*++}$ Regge pole model analysis, 2.75-8.0 GeV/c 8=47109
  - $\pi^+ p \to \pi^+\pi^-\pi^0\Delta^{++}$, 3-4 GeV/c obs., H enhancement, kinematic origin 8=37978
  - $\pi^+ + p \to p + 5\pi$, role of baryon variables at 8 GeV/c 8=24790
  - $\pi^+ + p \to p + 6\pi$, role of baryon variables at 8 GeV/c 8=24790
  - $\pi^+ p \to \pi^+\pi^0 p$, spark chamber obs. 8=28990
  - $\pi^+ p \to \pi^+ p\gamma$, isobar Δ^{++} (1236) mag. moment meas. 8=24809
  - $\pi^+ p \to \pi^+ pp\bar{p}$, 8.4 BeV/c, resonance parameters of N isobar 8=24789
  - $\pi^+ + p \to \Sigma^- + K^+$, 1145 MeV/c, Σ^- polarization determ. 8=24996
  - $\pi^\pm p$, multiple particle prod., unitary-symmetrical statistical model, >1 GeV 8=33546
  - $\pi^* p$, at 900 MeV, differential cross-sections, search for zeta meson 8=42539
  - $\pi^* p$, 2.34GeV/c, 20,000 photographs scanned 8=24788
  - $\pi^* p \to \pi^+ p\pi^\circ$, 2.34 GeV/c obs. 8=24788
  - phase shifts, I = O, review of data of evidence for O^+ isoscalar s-wave resonance 8=24805
  - resonance formation influence on basis of infinite Regge recurrencies model 8=29132
  - ten-prong, at 8 GeV/c primary π^+-momentum, ang. correlations between pions 8=42540
  - 2πexchange contrib. to K^+-p potential 8=33708
- **production**
  - charged, collision of 600 MeV neutrons with element nuclei 8=37970
  - charged pair, in γp reaction, momentum spectrum and ang. distrib. 8=42514
  - cosmic ray N induced showers, 10^{12}-10^{14} eV 8=29250
  - by cosmic ray nucleons, 10^{14} ev 8=42690
  - in decay of mesons in baryon-antibaryon model 8=24754
  - double-pion photoproduction and isobaric model below 1 GeV 8=33668
  - double π photoprod. on nucleons, expt. and theory 8=33667
  - electro-, on p, radiative corrections obs. 8=24775
  - $e + p \to e^1 + \rho^\circ + p^1 \to \pi^+ + \pi^-$, analysis for ρ° prod. 8=24859
  - $e^- + p \to e^- + p + \pi^\circ$, differential cross-section near N* (1236) reson., obs. 8=33671
  - $\gamma + N \to N + \gamma$, modified PCAC hypothesis 8=42518
  - γp reactions, multipion with associated resonances 8=33669

Pions—contd

- **production**—contd
  - $\gamma + p \to \pi^+ + n$, n polarization obs. 8=24965
  - K* decay rel. to baryon model for bosons 8=33548
  - from meson which explains double-pole character of A_2^- (1300) 8=24857
  - multipion in $\pi^- p$ interactions, 4-11 GeV/c 8=33672
  - multiple, from $\bar{p}p$ annihilation 8=24943
  - multiple soft-π, PCAC theory 8=42516
  - $p + A \to A + N + n\pi$, in emulsion nuclei 8=25218
  - by p annihilation in emulsion, momentum spectrum and angular distrib., 3 GeV/c 8=42528
  - Photo-, calc. of Δ(1236) partial amplitude 8=33840
  - photo-, general method for deriving ang. correls. 8=24687
  - photoproduction amplitude, sum rule relating to nucleon anomalous magnetic moment 8=42364
  - photoproduction and π exchange in n-p scatt. 8=33770
  - photoprod. and $\pi N \to VN$ process, γ-V analogy model 8=33666
  - photoprod., conspiracy and evasion 8=42562
  - photoproduction, conspiracy and residue 8=42517
  - photoproduction cross-sections, perturbation theory 8=42513
  - photoproduction from B^{11}, O^{16}, nuclei treated as elementary particles 8=42511
  - photoproduction, generalized dispersion sum rules and A_2 trajectory 8=42519
  - photoprod, multipole analysis 8=24773
  - photoprod., ω Regge-pole residue functions 8=37968
  - photoproduction on Λ°, supercovergent sum rule 8=42512
  - photoproduction on nucleons, Regge pole model 8=29127
  - photoprod. on p, 500-1000 MeV 8=29189
  - photoproduction Regge-pole model 8=29124
  - in pN, Ep = 20 GeV 8=29186
  - π photoprod., 6.8-17.8 GeV on protons 8=42523
  - $\pi + N \to 2\pi + N'$, theory 8=29129
  - π^- from $\gamma p \to \pi^- N^{*++}$, k via "u channel," high-energy 8=42525
  - π^-, from Cu and U by 8 GeV/c protons 8=25231
  - π^- photoprod. on H, momentum distrib. rel. to ϕ and ρ° prod., 15 GeV 8=33724
  - π^-N interaction coherent production of $\pi^-\pi^\circ\pi^\circ$, 16 GeV/c 8=42521
  - $\pi^- p \to \pi^\circ n$, 2.4-3.8, 6, 10 GeV/c $N_{3/2}$, $N_{1/2}^*$ obs. 8=29160
  - π° electroprod. rel. to γNN^* form factor, 0.05-0.4$(BeV/c)^2$ 8=33670
  - π°, from $\gamma + d \to \pi^\circ + d$, around $N_{1/2}^*$(1525) reson. 8=33665
  - π°, from 1374 π^--Xe interactions at 9 GeV 8=37973
  - π° in K^- interactions with complex nuclei in bubble chamber 8=25254
  - π°, photo, below 234MeV, multipole analysis 8=24777
  - π^+ by linearly polarized γ, apparatus and method 8=29125
  - π^+, from γ + p, 500-800 MeV cross-section obs. 8=24776
  - π^+ from $\gamma p \to \pi^+ n$, k via "channel, high-energy 8=42525
  - π^+, high energy photoproduction without conspiracy 8=24778
  - π^+, in γ + p interaction, E_γ = 165-230 MeV, differential cross-section obs. 8=29126
  - π^+ in $\gamma p \to \pi^+ n$, 4, 8 GeV/c, comparison with $\pi^- p \to \rho^0 n$ in Vector dominance model 8=37972
  - π^+ in $pp \to pn\pi^+$, 0.5-0.7 GeV, calc. confirming peripheral model 8=33744
  - π^+ photoprod., absorptive correction, 2 ~ 4 GeV 8=37971
  - π^+ photoproduction and divergence conditions 8=24760
  - π^+ photoprod, conspiracy test 8=24774
  - π^+ photoproduction, double conspiracy 8=37969
  - π^+ photoprod. on p, cross-section up to 200 MeV 8=42527
  - π^+ photoproduction, π and conspirator residues and trajectories from continuous moment sum rules 8=4250
  - π^+, slow, in π^--Xe interaction at 9 GeV/c 8=47335
  - π^+ via ρ^+ Regge-trajectory exchange 8=42611
  - $\pi^+\pi^-$ photoprod., 1-2 GeV, obs. 8=29398
  - $p\bar{p}$ annihilation, ang. dist. 8=33761
  - in p-p collisions at 0.97 GeV, 1 π prod. anal. in one-boson-exchange model 8=24920
  - in p-p interacts, and partial-wave p-p absorpts, as function of energy 8=24901
  - p-p scatt., 1 GeV, effect on $^3P_0$, $^3P_1$ absorpt. 8=24933
  - $p\bar{p} \to \pi^+\pi$, 5.7 GeV/c 8=47137
  - $p\bar{p} \to 3\pi^+ 3\pi^- \pi^\circ$, 5.7 GeV/c obs. 8=24940
  - 3π decay, energy distrib. contruction 8=24756
  - in proton nuclear reactions, 450 MeV 8=33987
  - $\Sigma\pi$ pair prod. by K^- on emulsion nuclei 8=33836
  - single-π amplitude rel. to current-algebra and PCAC model π-π scatt. anomalies removal 8=33691
  - soft, from e, ν interact., anal. using current algebra 8=42515
- **scattering**
  - Adler self-consistency condition true if π trajector a member of a conspiracy 8=29136
  - Compton, low-energy theorems 8=33606
  - e, polarization and form factor 8=24767
  - e-π, polarization effects for ultrarelativistic electrons 8=37942
  - $K\pi$ amplitude rel. to K_{l3} decay 8=29149

Pions—contd
- **scattering**—contd
  - $K\pi$, using SU(3) ⊗ SU(3) algebra of currents, π, K pole dominance, κ meson predicted 8=29158
  - lengths from $K^+ \rightarrow \pi^\circ\pi^\circ\pi^+$ and $K_2^\circ \rightarrow \pi^+\pi^-\pi^\circ$ spectra obs. 8=29135
  - light nuclei, activation cross section obs., 80-280 MeV 8=25255
  - low-energy limit dispersion theory 8=42418
  - nucleus, optical-model π form factor 8=43044
  - τ-baryon ($^1\!/_2{}^+$), in formation on Regge exchanges 8=42543
  - π-D, elastic and inelastic, exact iteration calc. 8=33673
  - πd, 0.46-2.67 GeV/c obs., π^- cross-section higher than π^+ 8=29139
  - π-d, 200 MeV, contrib. of Δ_{33} virtual isobar to amplitude 8=42544
  - π-He scatt., Coulomb interference corrections 8=29389
  - π-He^4, impulse model theory 8=33679
  - πHe^4, 129, 140, 150 MeV/c cross-neutron obs., π charge radius calc. 8=33664
  - π-He^4, 139 MeV/c rel. to final state interaction effects in ${}_\Lambda H^4 \rightarrow \pi^- + He^4$ 8=25168
  - πN vacuum exchange amplitudes from sum rules 8=33682
  - $\pi\omega$, bootstrap anal. of ρ, and B mesons 8=42615
  - π-nucleus, low energy, review 8=29482
  - π-particle, antisymm. part of amplitude = universal constant X isotopic spin of particle 8=29136
  - πp, analyticity constraints, soln. by means of resonances and Regge trajectories 8=33680
  - $(\pi\text{-}\overline{Z})_{I=0,1}$ scatt. length 8=37984
  - $\pi^-d \rightarrow 2n\gamma$ for nn scatt. length obs. 8=42648
  - π^--He^4, 8 BeV/c, cross-section 8=29230
  - $\pi^- + p \rightarrow \pi^\circ(\eta^\circ) + n$, differential cross section at high energy 8=24682
  - π^+d, elastic and differential cross sections obs. 3.65 BeV/c 8=37985
  - π^+-He, double charge exchange obs. 8=33681
  - π^+-He^4, elastic, 610 MeV/c obs. 8=24794
  - $\pi^\pm$ + He, Coulomb distortion rel. to e.m. form factor, obs. 8=29117
  - $\pi^\pm$-Pb, inelastic, neutron halo existence, 700 MeV 8=38498
  - $\pi^\pm + He^4 \rightarrow \pi^\pm + He^4$, Coulomb distortion rel. to π e.m. form factor, meas. 8=29118
  - virtual Compton scatt., use of Weinberg sum rules 8=42545
- **scattering, pion–nucleon**
  - amplitude calc. using a field theory 8=24480
  - backward, isospin violation 8=37991
  - Bethe-Salpeter eqn. solns. in ladder approx. with Padé approximants 8=47112
  - charge exchange amplitude, divergence from ρ-dominance model 8=47111
  - charge exchange polarization and Gottfrid-Jackson absorptive corrections 8=33683
  - charge-exchange polarization, $\rho + \rho'$ model 8=42547
  - charge exchange scatt., partial wave analysis of ρ Regge amplitude 8=24779
  - chiral transformations 8=24686
  - coupling const. from spin-flip dispersion relation 8=33685
  - dispersion relations, backward 180°, applications 8=42548
  - dispersion relations, subtraction by means of canonical commutation relations 8=24798
  - dispersion sum rules, agreement between Regge behaviour and low energy parameters 8=37988
  - dispersion sum rules, Cauchy calc. and expt. 8=24797
  - d waves, partial, energy behaviour calc. 8=29141
  - dynamics, rel. to asymmetric fermion Regge trajectories 8=24678
  - 4π coupling constant 8=29120
  - Glauber theory tested in π-p, π-d, 0.46-2.67 GeV/c 8=29139
  - helicity amplitude relations 8=24658
  - kinematic singularities and MacDowell symm. rel. to boson-fermion reactions 8=29047
  - Liu-Okobo dispersion relation sensitive test of low energy data 8=29143
  - near-backward, finite energy sum rule appl. 8=37989
  - nonvanishing asymptotic total cross-sections 8=37990
  - 1 and 2 π exchange contribs. compared with N-e and N-N scatt. and phase shifts 8=24879
  - phase contours below 1.4 GeV and in Regge model 8=24795
  - phase shifts up to 1600 MeV of C.M.S. from Padé approx. 8=33684
  - $\pi N \rightarrow \pi N$ amplitude lower bound, crossed-channel unitarity calc. 8=33686
  - $\pi N \rightarrow \rho N$ regularity of limit $S \rightarrow \infty, t \rightarrow o$ 8=37993
  - P_{11} amplitude, rel. to dynamical status of nucleon 8=42551
  - P_{11}, dynamical model of broken SU(3) 8=42546
  - P_{11} π-N, phase shift analysis and N*(1400) daughter pole hypothesis 8=47113
  - rel. to π and N extended structures, high energies 8=29140
  - pole branching effect 8=37986
  - Regge pole parameters from dispersion relations of superconvergence type 8=42431
  - Regge trajectories, P and P^1, props. 8=42442
  - ρ-exchange force method at high energies in many-channel formalism 8=24892

Pions—contd
- **scattering, pion-nucleon**—contd
  - spin-flip amplitude sum rule 8=42549
  - rel. to structure analysis 8=29031
  - sum rule of superconvergence type and Regge pole model 8=37987
  - sum rules, new class from dispersion theory 8=33585
  - superconvergence and bootstrap, static models 8=24684
  - superconvergence relations, analyticity constraints 8=42406
  - superconvergent sum rules and determ. of Regge trajectories 8=29138
  - s and p partial waves, accounting for short-range effects 8=42552
  - s-wave length Adlers consistency relation 8=37992
  - s-wave scatt. lengths, current algebra and $\rho + \rho'$ dominance 8=24799
  - S_{31} wave analytic expression 8=24664
  - unitary impulse approx. method 8=29142
  - vanishing momentum transfer, SO(4) symmetry 8=42550
- **scattering, pion–pion**
  - amplitude, using current algebra and condition of elastic unitarity 8=29145
  - chiral transformations 8=24686
  - diffraction cross-section and π form factor 8=37964
  - dispersion sum rules, new for testing low-energy phase-shift analysis 8=42417
  - 4π coupling constant 8=29120
  - and $K \rightarrow \pi\pi l \nu_l$ 8=29149
  - lengths, former lower bounds violated 8=42563
  - length through current algebra technique, absence of Mandelstam variables 8=24802
  - low-energy, dominated by ρ in I = 1, J = 1, f° in I = 0, J = 2 8=33692
  - mass-shell current algebra calc., scatt. lengths and effective ranges 8=24804
  - N/D equation, crossing-symmetric, solns. 8=24801
  - phase shift anomaly and $K \rightarrow 2\pi$ 8=24815
  - phase shift calc., dispersion relations 8=24800
  - phase shift information from K_{l4} decay 8=29137
  - $\pi\pi$ bootstrap model, high- and low-energy amplitudes simultaneously calc. 8=37912
  - $\pi\pi \rightarrow \pi\pi$ and $\rightarrow N\overline{N}$ amplitudes lower bounds, crossed-channel unitarity calc. 8=33686
  - $\pi^\circ\pi^\circ$ D wave amplitude below threshold 8=37999
  - π°-π°, S-wave, models based on parametrization of inverse K-matrix element 8=37997
  - p-wave resonance at 308 MeV, self-consistent, bootstrap anal. 8=42615
  - Reggeized short range potential and resonance width 8=47036
  - rel. to π extended structure, high energies 8=29140
  - review 8=33690
  - s-wave, data from $\pi^- p \rightarrow \pi^\circ\pi^\circ n$ 8=42541
  - S-wave, I = 2 amplitude sum rule, I = 0 proved small and negative 8=38000
  - S-wave phase shift determ. from $\pi N \rightarrow \pi\pi N$ 8=29144
  - s-waves, low energy scatt. 8=24803
  - sum rules for partial wave amplitudes on basis of dispersion relations at fixed momentum transfer 8=37998
  - superconvergence relations, analyticity constraints 8=42406
  - Yo(1520) $\rightarrow \Lambda\pi\pi$, scatt. length rel. to triangular diagram contribution 8=38097
- **scattering, pion–proton**
  - differential cross-sections, Regge theory appl. to backward angles other than cos 0*-1 8=42557
  - elementary length, upper limit estimation 8=24601
  - inequalities satisfied by a function of the amplitude 8=33576
  - optical model, back-scatt., E_{π^+} = 2-8 GeV 8=33974
  - p polarization obs. 8=33757
  - P + P′ Regge model, superconvergent dispersion relation 8=37994
  - π^-p, at 180°, 1.6 to 5.3 GeV/c, differential cross section 8=42556
  - π^-p charge exchange, n polarization calc. due to ρ-Regge pole and cut. 8=42427
  - π^-p charge exchange with ρ trajectory 8=37953
  - π^-p obs. at 8, 16 GeV/c, Regge-pole fit 8=37995
  - π^-p polarization parameter, 220 to 390 MeV, 70° to 180° angles 8=42558
  - π^--p, 6 GeV/c, 8 GeV/c obs. 8=42553
  - π^-p, 229-390 MeV, polarization parameter meas. 8=24812
  - $\pi^- p \rightarrow \pi^- p\gamma$, role of $\gamma 3\pi$ interaction 8=24807
  - $\pi^- p \rightarrow \pi^\circ n$, 561-2,106 MeV/c obs. 8=24811
  - $\pi^- p \rightarrow \pi^\circ n$, mean backward differential cross section prediction down to 2 GeV/c 8=42562
  - $\pi^- p \rightarrow \pi^\circ n$, secondary Regge contributions to total cross-section 8=37996
  - $\pi^- + p \rightarrow \pi^+ + \Delta^-$, modified 2π exchange model 8=42408
  - π^+p, dip u ≈ - 0.15 (GeV/c), interference of N_α, N_γ fermion Regge trajectories 8=33687
  - π^+p, 1.7–7.8 GeV/c, cross-section without Regge-pole theory 8=33688
  - $\pi^+ p \rightarrow N^+\rho^\circ$, absence of dip in differential cross section at 8 GeV/c 8=37982
  - $\pi^\pm$-p, backward, data on Regge trajectory functions N_2 and Δ_δ 8=42434

Pions—contd
- **scattering, pion-proton**—contd
  - $\pi^{\pm}p$, backward elastic, possible zero at wrong-signature sense point 8=42555
  - $\pi^{\pm}p$ backward, 1.5-3.0 BeV/c obs. 8=24806
  - $\pi^{\pm}p$, dips in differential cross sections at $t = 3\ (\mathrm{GeV}/c)^2$ at 180° at 2.1 GeV/c 8=42554
  - $\pi^{\pm}p$, elastic, 2.3 to 4.0 BeV/c, cross-sections and backward peaks 8=42560
  - $\pi^{\pm}p$ high energy bakcward scatt., data extrapolation and Reggeized baryon exchange model 8=42562
  - $\pi^{\pm}p$, 0.46-2.67 GeV/c obs. 8=29139
  - $\pi^{\pm}p$, Regge-pole analysis of backward peaks 8=24810
  - $\pi^{\pm}p$, 6-17 GeV/c, structure obs. 8=42561
  - $\pi^{\pm}p$, wide angle, 4 to 10 GeV/c, cross-sections and anal. 8=42559
  - Regge parameters, relation derived, one-parameter fit to cross-section 8=33689
  - 30 GeV. e. m. effects on cross-section 8=37952

Plasma — contd
kinetics in uniform elec. field 8=30019
kinetics, sub-relativistic 8=30002/3
Landau pole sites 8=43498
laser beam refraction, interferometry obs. 8=43541
laser prod. for simulation of particle accel. in solar flare 8=29998
laser-produced from solid D targets 8=39064
laser production in air and air/D_2, and high-temp. meas. 8=47799
layers, continuous and stationary, artificially produced, theory 8=30005
leaky-wave beams of multiply layered plasma media 8=30049
Lorentz gas model, a.c. elec-conductivity 8=25735
Lorentzian, inhomogeneous, diffusion and conductivity tensors, non-linear terms calc. 8=30025
magneto-active, relativistic, quasilinear resonant diffusion eqns. 8=47819
magnetoionic medium, lossless, symmetry props. of dyadic Green's function 8=30076
magnetoplasma, compressible electron-ion, wave prop. 8=47842
magnetoplasma, Maxwellian and non-Maxwellian, collision freq. parameters 8=39066
magnetoplasma, radiation of microwaves 8=28600
magnetoplasma, radiation resistance of elect. dipole 8=25758
magnetoplasma, radiation resistance of insulated current filament 8=25757
magnetospheric, density, determ. by use of long-period geomag. micropulsations 8=50167
Maxwellisation by confined electroacoustic waves 8=47847
metal, laser vaporized, electron emission and dispersion 8=44940
microparticle, many-field model 8=29988
model, computer investigation of magnitudes 8=39072
molecular, ions and radials prod. 8=43493
neutralising electrons, sheath 8=43523
nonlinearity of relationship between current density and electric field strength, due to strong electric field 8=46351
non-neutral, Poisson eqn. and soln. 8=34465
optically dense, absorpt. and emission coeffs., radial distribs. 8=30078
parametric excitation from thermal fluctuation at plasma-drift wave frequencies 8=43574
particle interactions, theory 8=30017
particle kinetics, book 8=25721
perturbation, r.f., effect on e density and energy distrib. profiles 8=43519
pinch discharge., parameters for prod. of ionizing radiation 8=29930
plasma-vacuum boundary, radiation pressure 8=39105
plasmons rel. to transverse wave interactions 8=30129
populations of excited states of ions, analysis, and applic. to electron temp. and density obs. 8=30027
positive column, with change in discharge current, non-stationary process 8=25695
primeval fireball recombination theory 8=45596
probe shot noise reduction by collisions 8=43550
production, high temp. and press., using laser 8=29994
production in upper atm. by h.f. discharge feasibility 8=38978
propane-O, K_2CO_3 seeded, in m.h.d. duct, pot. distrib. and electrode voltage drop, obs. 8=39084
properties of high-current discharges 8=43440
quantum Coulomb, first order phase transitions, mech. 8=39068
quantum, pair distrib. function exchange term. 8=47807
quasi-classical, pseudopotential 8=43522
quiescent, with high electron temps., production 8=29992
radial distribution functions at zero particle separation 8=39070
radial distrib. function, quantum mechanical calc. 8=29999
radial distribution of emitters, electronic analogue for Abel inversion 8=30070
radiation and antiradiation conditions 8=47800
radiation from elec. and mag. current density sources 8=34488
radiation transport, atomic plasmas 8=34509
radiative energy transfer, conference 8=23909
radio emission, nonthermal, generation by coherent plasma waves 8=30130
r.f. radiation, photomultiplier radiometer 8=43540
rarefied from broadening of auto-model motions for quasi-neutral plasma 8=39071
ray formation during separation of electric contacts, avoidance 8=29935
reabsorption spectral line shape, multistage approach to calculation 8=30079
reflection of impulse plasma from metallic surface 8=43494
relativistic, of pregeometrical, pretensorial character 8=28327
relaxations, unified theory, physical interpretation 8=28545
resistivity, longit. rel. to enhanced transverse diffusion 8=30028
ring approximation, kinetic eqn. 8=25730
rot. in hollow cathode discharge 8=29885
scalar elec. cond. calc. at low ionized, accuracy 8=34476
scattered energetic particles, distribution function 8=43496
second harmonic generation in current density by nonuniform microwave fields 8=25734
seeded flame, conductivity meas. 8=47853
shear viscosity for Debye-Hückel plasma 8=39080
sheath round wedge excited antenna, effect on admittance 8=42033
shock-produced, electromagnetically driven, electron densities meas. by microwave reflection 8=25720
shock production, wave vel. rel. to initial gas press., drive current and mag. field 8=43529
shock wave front isomagnetic jump at critical Mach number 8=39089
shock-wave generation in rarefied gases by laser impact on Be targets 8=47833
shock wave in Ne-Li, change of sign inside shock transition layer 8=30046
shock wave of Z-pinch discharge, dynamics 8=34410
shock wave, turbulent, effect of ion wave-electron interaction 8=43528
solar-wind, turbulence, viscosity and dissipation obs. 8=45889
spark, effect of cylindrically converging shock wave 8=25745
spectra, Doppler and Stark broadening 8=30092
spectral line broadening, by electron collisions, theory 8=43157
spectral lines profile, emitted by optically thin layer 8=47846
spectral line shift obs. 8=34507
spectral line Stark broadening in strong elec. and mag. fieds 8=25340
spectral separation by fiber polychromator 8=37662
stable, and weakly unstable, kinetic theory 8=25723
Stark broadening, transition from quasi-static to impact electron contrib. 8=43158
stationary nonthermal, population of atom and ion excited levels 8=39069
statistical particle acceleration in random fields 8=46396
statistical thermodynamics 8=30009
streaming along uniform mag. field boundary effects for diffusion 8=30015
streaming in transverse magnetic field, transport and cuto-off 8=30022
streaming, radiation from oscillating mag. dipole 8=30050
stress tensor, in high freq. e.m. field and considering collisions 8=47798
structure, between plane insulating walls for arb. ratio of ion-atom m.f.p. to plasma spacing 8=30001
tail sheet in atmosphere and magnetospheric radiation belt 8=45495
temp. calc. from spectral line quadratic strength distrib. 8=47810
temperature from x-ray emission, meas. 8=30007
temperature, limit attainable, by cyclotron resonance heating in mag. mirror 8=30122
temperature meas. from broadening and shifting of spectral lines of V, Cr, Mn, Fe, Co and Zn 8=47813
temperature rising at discontinuous surface 8=47811
thermal conductivity, effects of electron interactions 8=43505
thermal nonequilib., diffusion and thermodiffusion coeffs. in stationary e.m. field 8=47817
in thermionic converter, ion current density and energy loss rate 8=28496
in thermionic converter, transport eqns rel. to spacing effects, energy losses 8=28494
θ-pinch conical discharge, cond. and temp. 8=43506
Tokamak, flux distribution of emitted fast atoms meas. by charge exchange 8=43501
toroidal weakly ionised magneto-plasma 8=30032/3
transient electron growth due to e.m. wave, intense and suddenly applied 8=43504
transient response and collision data determ. 8=25731
transport processes, eqns. 8=30018
transport processes, 2nd order contributions 8=43513
turbulent, d.c. conductivity 8=30031
turbulent heating by e.m. waves 8=47814
turbulent, transfer coeffs. 8=30023
turbulent (weakly), electron coeff. viscosity in strong mag. field 8=43514
turbulent, weakly, kinetic theory, fundamental eqns. 8=43503
turbulent (weakly), quasilinear theory including microscopic fluctuation fields and coherent waves 8=43512
uhf emission from interaction with e beam 8=30048
Vlasoc eqn. modification, relativistic 8=39065
Vlasov eqn. time reversability, one-way behaviour of Landau's solutions 8=34463
Vlasov, linearized motion and non-trivial constants 8=47816

Plasma—contd
- Vlasov, lowerbound to kinetic energy in terms of mean-density fluctuations 8=30016
- Vlasov, test charge effective potential, inverse 3rd power law 8=43499
- vortices, production of stable system 8=47826
- wave number spectrum analysis 8=47801
- in waveguide, flux deformation due to ponderomotive force 8=30105
- Z-component, correl. function convergence 8=47803
- Al, laser-induced, ion energy and abundances 8=36051
- Ar arc, excitation and ionization rel. to equilib. disturbance 8=29942
- in Ar at. beam from arc source, elec. props. 8=47545
- Ar column, ion temp., charge exchange and coulomb collision 8=39077
- Ar, dense, weakly ionized, kinetic energy exchange 8=47805
- Ar, density decay by three-body electron-ion recombination 8=47882
- Ar, disintegrating in impulse discharge, e-densities 8=43458
- Ar flows, radiating relax. 8=25741
- Ar gases, light emission on laser irradiation 8=29906
- Ar, interferometric meas. in 8mm band 8=38989
- Ar, ionization waves, characteristic pots. rel. to press. and current for three types 8=25742
- Ar, in e.m. shock tube, origin of 2 regions, from shock heating, and driver discharge 8=25714
- Ar plasma-beam discharge stimulated emission, 4545-5145Å 8=28673
- Ar, r.f., local thermodynamic equilib. obs. using emission spectroscopy 8=43508
- Ar, shock tube meas. and theory 8=34485
- ArII spectrum, line shift obs. 8=34507
- Ar-K-plasma, electron temp. meas. by line reversal method 8=39075
- Au, laser-induced, ion energy and abundances 8=36051
- CO_2 laser, influence of Xe 8=33181
- Cs, in thermionic converter, distrib. anal. rel. to electron thermal cond. 8=28495
- Cs, seeded with Ar, ion species present, relative abundance and ion signals 8=29987
- Cs, thermal, e heating in h.f. elec. field, obs. 8=30008
- Cs vapour, light emission on laser irradiation 8=29906
- Cu, laser-induced, ion energy and abundances 8=36051
- H, broadening of spectral lines of excited states 8=34505
- H, conductivities elect. and thermal, and effective current density meas. 8=43518
- H, decaying highly ionized, neutral atom density determ. by photoabsorption 8=43545
- H, dense, spectral and total radiation calc. 8=34508
- H, equations of state 8=47806
- H, formed by neutral injection, Fokker-Planck eqns. for electron and ion distrib. soln. 8=34470
- H, heating by fast large amplitude magnetoacoustic wave, investigation 8=47839
- H, ionized, equation of state determ. by Monte Carlo method 8=30000
- H-like ions in plasma, variable ionization equilib. 8=30004
- H-like ions in plasma, variable ionization equilib. alkali-like 8=30004
- H, non-thermal population densities meas. 8=29996
- H, partially ionised, non-Maxwellian deviation of fast electrons, effects on ionisation equilib. 8=47804
- H, preparation of Ge and Si layers by transport
- H, rad. below 800Å rel. to photo-ionization of H_2 8=34529
- H, radiation from flat isothermal layers, 1-100 atm, 0.6-20 eV, 0.1-100 cm 8=47837
- H, radiative decay spectra, T-tube obs. 8=30057
- H, relax. of occupied levels, considering reabsorpt. of rad. 8=34495
- from H_2 foils, laser-produced 8=29995
- H_2-He isothermal, equilib. spectra, calc. 8=43544
- He^3, disintegrating, in impulse discharge, e-densities 8=43458
- He afterglow, ion-electron recomb. coeff. 8=39038
- He, containing trace of Cs, phys. props. 8=47818
- He discharge, negative glow characts. effect of u.h.f. field 8=43453
- He, electron temp. from spectral line intensities, effects of cascading and metastable atoms 8=34468
- He, highly ionized, decay mechanics 8=43516
- He, laser ionized to 10 atm, afterglow shape, electron density and 6328Å absorption 8=34504
- He, non-equilibrium, optimum seeding with Cs 8=29997
- He, press. build-up 8=29990
- He, rad. below 800Å rel. to photo-ionization of H_2 8=34529
- He, Stark broadening of 3889 and 5016Å, obs. 8=47841
- He-Ne, afterglow, different vel. of 2s and 2p Ne 8=30080
- K, absolute density measurement 8=30093
- K, potential noise study by Q-machine 8=47891
- K-seeded non-eqilibrium, effect of bulk gas on elect. cond. 8=25732
- Li, in arc discharge, exam. from emission spectrum 8=47778
- N_2 laminar jet, mean temp. determ. 8=34469
- NO magneto-, electron energy relax. 8=47815

Plasma—contd
- Ne discharge, 2-32 mm Hg, steady state positive column 8=29899
- Ne, interferometric meas. in 8mm band 8=38989
- Ne, negative conductivity 8=25733
- SF_6 arc, transport props, from temp. meas. 8=39012
- in Xe pulsed arc, radiative and thermal energy transfer, and balance 8=39090
- Zn-Ar, in local thermodynamic equilib., 4000 to 50 000°K, composition 8=47809
- **confinement**
  - accumulation between mixed field accelerator and pulsed mag. mirror 8=30110
  - area waves in theta pinch 8=43584
  - boundary layer between warm, streaming plasma and confined mag. field 8=34520-1
  - compression leading to prod. of intense magnetic field 8=30125
  - current density rel. to mag. trapped particle equilibrium 8=43560
  - cusp injection experiment 8=47867
  - cyclotron resonance heating in mag. mirror, limit of plasma temp. 8=30122
  - discharge, electrodeless, high press., influence of mag. field on plasmoids 8=43444
  - double emitter sheath, density of trapped positive ions 8=34525
  - equilibrium in mag. field 8=25769
  - equilibrium of pinch in toroidal const. mag. field and helical h.f. mag. field 8=43597
  - flute-like mode, favourable mag. curvature, v. low density 8=34544
  - fusion reactors, pulsed, expts. 8=25288
  - galactic, by mag. fields, kinematic theory 8=41527
  - large chamber with 3.5 kGs field, characts. 8=34531
  - lens, magnetoactive, calc. 8=41986
  - magnetic mirror machines, r.f. supplemented, charged particle containment 8=39126
  - magnetic mirror, statistical particle acceleration 8=46396
  - magnetic mirror traps, motion of separate charged particles, exptl. investigations 8=47870
  - magnetic moment for linear multipoles, 1st and 2nd order corrections 8=43559
  - magnetic moment under short-wave electrostatic perturbations, comments 8=30106
  - magnetic moment under short-wave electrostatic perturbations, reply to comments 8=30107
  - magnetic rough walls, end loss reduction 8=30121
  - magnetic shielding of current feeds 8=43566
  - magnetic trap, closed, electron stochastic acceleration in a.c. field elect. 8=43563
  - magnetic trap from spherical multipole 8=47868
  - magnetic well, ion temp. gradient instability 8=34532
  - mag. wells produced by beam current, interchange instability 8=34533
  - magnetized, boundary conditions at plane electrode 8=47865
  - in microwave quasipot. 3-dimens. trap 8=30108
  - by mirror, flute oscs rel. to incoherently precessing ions 8=43565
  - mirror systems, equilibrium relation between press., current density and mag. field 8=30123
  - mirror trap, electron beam-plasma discharge instability 8=43564
  - mirror, turbulent, heating by axially driven current 8=43561
  - negative V^{11} system and its equilibrium 8=47869
  - neutral sheet stability 8=34526
  - quadrupole, linear, nonclassical particle loss, obs. 8=43556
  - rotating-field r.f. pulse generators 8=34523
  - rotating mag. field punch 8=25770
  - self-trapping and redshift of incoherent light in stellar plasma 8=45726
  - sheath, collisionless near electrode, surface effects on structure 8=30112
  - Skornyakov trap, field line trajectories 8=43562
  - snowplough model, 2 dimens. axisymmetric, current sheath dynamics 8=34527
  - stellar, self-trapping effect for line-width of red-shifted light 8=45648
  - stellarator trap, trapping in 8=34524
  - stellarator, twisted figure 8 and racetrack 8=30111
  - stochastic instability of trapped particles 8=39122
  - teaching demonstration, metal tube deform. by pulsed mag. field 8=30116
  - tennis ball seam coil field calc. and design 8=30124
  - thermonuclear fusion, problems for economic power generation 8=47367
  - theta pinch, adiabatic end loss, 8=43554
  - θ-pinch conical discharge, cond. and temp. of plasmas 8=43506-7
  - theta pinch, conical, in mag. guide field, plasmoids in nonlinear Alfven wave 8=43555
  - theta pinch device, high-temp., low mag.-field, diagnostics 8=30117
  - θ-pinch end loss, meas. using He-Ne laser 8=30115
  - theta-pinch, experimental study 8=47866
  - theta pinch field, time of H=O, peaking strip 8=39125
  - theta pinch, generation and motion of plasmoids in mag. field with mirrors 8=43557

Plasma—contd
- **confinement**—contd
  - theta pinch, ion and electron temp. meas. using laser forward scatt. 8=39114
  - theta-pinch, laser diagnostics 8=43552
  - θ-pinch, mag. field meas. by laser beam Faraday rotation 8=37583
  - θ-pinch, Scylla IV, mag. field and density integral product from Faraday rot. 8=34530
  - Θ-pinch, two-step, heating with low-energy capacitor battery 8=39124
  - θ-pinches at temps. in million deg. range, simulation of corona and solar spectra 8=39109
  - toroidal column, thin skin finite beta, hydromag. equilibrium 8=30109
  - toroidal. effect of resist. inertial forces, viscosity, and press. anisotropy on stationary equilibrium 8=30119
  - toroidal high-β plasma, equilibrium 8=30113
  - toroidal octupole, effect of field up to 360 Gauss 8=30118
  - toroidal pinches surrounded by pressureless plasma, equilibrium 8=30114
  - toroidal quadrupole and octopole configs., comparison 8=43558
  - toroidal quadrupole, levitated, fluctuations, azimuthally localized 8=30136
  - trapped particle instability, stabilization by finite orbit effect 8=39123
  - virtual electrodes in cylinder, formation and stability 8=47864
  - Z pinch, non-cylindrical, discharge development 8=43553
  - Ar, sheath, reflection of ion-acoustic waves 8=47876
  - Ba, in Q-machine, self-luminosity 8=34522
  - Cs, lifetime in Q-device 8=47871
  - H ions, high energy, nonadiabatic trapping in mag. mirror machine 8=30120
  - H_2 arc, pulsed high current, pinch effect 8=29943
  - H_2, initial plasma of θ-pinch, photo-ionized by Li filled z-pinch 8=34528
  - H_2, mag. well in coil, obs. 8=30126
  - K, in mirror mag. field, flute oscs. 8=43565
  - K, lifetime in Q-device 8=47871
  - Li filled, z-pinch, for photoionization of H_2 as initial plasma for θ-pinch 8=34528
- **devices**
  - accelerator, h.f., self consistent field and power absorption from electron cyclotron resonance 8=30184
  - accelerator, quasi d.c., with 2 disc electrodes, for injection into mag. field 8=43608
  - accelerator with inductive store 8=34567
  - arc torch, projection system for cathode obs. 8=39144
  - coaxial injector, cond. and e temp. diagnostics 8=39143
  - coaxial injector, operational conditions 8=39142
  - diocotron instability, effect of inductive and capacitive walls 8=41950
  - diode, density distribution rel. electron temp. for ionization equilibrium 8=43606
  - diode, electron-ion collective oscillations at high and low frequency 8=30127
  - diodes, low-voltage arc mode, Monte-Carlo simulation 8=43607
  - duoplasmatron, extraction and emission theory 8=24164
  - duoplasmtron, ion sources 8=46435
  - duoplasmatron source of negative tritium ions 8=46432
  - duoplasmatron source for thin film sputtering 8=48442/3
  - gun, coaxial, acceleration obs. 8=47892
  - homopolar azimuthal current excited by equilibrium rot. 8=24170
  - induction-coupled plasma for high-temp. chem. reactions, design model 8=34568
  - jet, equipped with inexpensive atomizer, improved performance 8=47894
  - jet for discharge gap short-circuit 8=39148
  - jet, interaction with mag. field, current sheet meas., 8=39145
  - jet, scattering spectrum of e.m. wave 8=47895
  - jet temp. and output rel. to current and mass flow 8=43613
  - Langmuir probe obs. of He ion diffusion and conversion 8=43449
  - m.h.d. channels, overflow currents on insulator walls calc. 8=30035
  - m.h.d. generators, plasma parameter meas., review 8=25762
  - m.p.d. thruster, spatial surveys of potential distrib. 8=39121
  - mirror, ion loss by collisions 8=30021
  - molecular ion injection type mirror device (HX), spectra of r.f. radiation 8=30061
  - multipole machine, l.f. instabilities rel. to toroidal mag. field 8=39140
  - plasmatron a.c. arc, dynamic characts. 8=29940
  - plasmatrons, plasma parameter meas., review 8=25762
  - plasmatron, vortex configuration for high current operation 8=30176
  - Q-machine, potential noise in K plasma, obs. 8=47891
  - Q-machine, single-ended with pulsed emitter 8=43611
  - source, coaxial, energy distrib. of H ions, impurity effect 8=30177

Plasma—contd
- **devices**—contd
  - source, conical, electrodynamic acceleration 8=34566
  - source, conical induction, accel. 8=30178
  - source, inductive with reduced impurity content. 8=25784
  - source of molecular ions, multimomentum 650 mA for producing trapped plasma 8=43609
  - source, vacuum apparatus for 8=30180
  - space propulsion concepts, conf. Polo Alto, (1965) 8=41480
  - stellarator, stochastic electron acceleration for low density plasma production 8=43563
  - strong current accelerator with closed electron drift 8=47893
  - theta pinch, high-temp., low mag.-field, diagnostics 8=30117
  - toroidal discharge, current, plasma turbulence due to convective instability 8=30169
  - TP-D machine, oscillations 8=39141
  - Ar h.f. burner, temp. distribution in torch 8=30179
  - Ar jet, atmos. press., test of local thermodynamic equilib 8=39146
  - Ar jet, under expanded, continuum and line rad., rel. to abs., Boltzmann and Saha temp. 8=43612
  - Ar jet, vel. distrib. meas. by BN particles 8=30181
  - Ar, r.f. source for m.h.d. expts, ballistic and spectroscopic study 8=43610
  - Ar torch, electron density in jet nozzle, from Thomson and Rayleigh scatt. 8=34517
  - Ar torch, linewidths, and transition probabilities 8=43181
  - Cs diode, ionic species identification 8=39149
  - Cs diode, seeding with Cd and Hg 8=28475
  - Cs m.h.d. arc jet, operating 4-12 kW at 1000G mag. field strengths 8=39147
  - H_2 source, action of 3cm microwaves 8=34565
  - Hg jet, supersonic, charge exchange of polarized ions 8=39039
  - N jet, temperature determ. by spectroscopic methods 8=30183
  - N_2 jet, i.r. emission spectrum 8=30182
  - Ne diode, low-voltage arc mode, predominant ionization and loss mechanism 8=47779
  - Ti source, nonlinear effects in operation 8=34569
- **electromagnetic wave propagation**
  - absorption in accelerators, with static and h.f. mag. field, rel. to density of injection 8=25749
  - alkali, microwave coherent forward scattering by acoustic waves 8=43536
  - anisotropic, 9 × 9 matrix treatment 8=30058
  - antenna admittance calc. for plasma similar to E-region of ionosphere 8=36903
  - antenna cylindrical in compressible plasma, current distrib. 8=28626
  - antenna, cylindrical monopole, current distribution, frequency effect 8=33139
  - aperture antennas, effects of plasma in near field region 8=24240
  - bounded, influence of temp. 8=47843
  - beam-plasma system, rel. to forbidden zone 8=43537
  - boundary, interaction with parallel external electron beam 8=43539
  - bounded, streaming instability of coupled longit and transverse modes 8=25752
  - bremsstrahlung, free-free, with anisotropic electron vel. distribution 8=30063
  - Brillouin scatt., applic. to ionospheric irregularities 8=41429
  - characteristic waves, interference phenomena 8=39096
  - circularly polarized, dispersion with parallel elect. and mag. fields 8=43532
  - cold homogeneous, rel. to mag. field 8=46473
  - columns, scatt. cross section calc. 8=39107
  - conductivity, r.f., basis of density and collision freq. meas. 8=43546
  - coupled e.m. and e acoustic wave eqns. 8=30053
  - coupled wave eqns for compressible electron-ion magnetoplasma 8=47842
  - current distrib. on cylindrical antenna in plasma column, expt. and theory 8=24249
  - cyclotron, emission and absorpt. in non-equilib. plasma 8=39104
  - cyclotron harmonic waves, nonlinear interactions 8=43575
  - cylinder, non-linear scattering 8=39093
  - cylindrical column, guided waves below gyro frequency 8=39092
  - cylindrical, interaction with plane e.m. waves 8=47845
  - cylindrically inhomogeneous, e.m. wave scattering 8=25753
  - demodulation of a.m. radiowaves at resonance 8=30054
  - diffraction of plane waves on ideally conducting disc in spherically-symmetric plasma 8=25747
  - dipole radiation, numerical solution 8=24248
  - dispersion eqns. for waves parallel and perpendicular to applied field 8=34491
  - electron beam-plasma system in mag. field, and linear amplification 8=39102
  - electron concentration in acoustic waves, microwave obs. 8=43526
  - electron, hot, in mirror field, microwave burst accompanying instability triggering 8=30062

Plasma—contd
electromagnetic wave propagation—contd
electron-photon Compton interactions rel. to radiation distrib. 8=39067
emitter, slotted wedge shaped, in anisotropic plasma, field distrib. 8=30073
em. oscs from interact with density modulated plasma beam 8=39094
Epstein profile across static mag. field 8=39103
excitation of optical and acoustic waves on conducting cylinder 8=47834
far field, due to incidence of supraluminous oscills. on inhomogeneity 8=34502
harmonic components. reflected from free space interface at plasma resonance 8=25750
harmonic generation in ionized slab, effect of collisions 8=43533
hot, attenuation of plane right circularly polarized waves along axial mag. field 8=34503
hot, microwave absorption near electron cyclotron freq. 8=30064
hydromagnetic waves in cold plasma, self-trapping and instability 8=43593
infinite cylindrical antenna, theory 8=37525
inhomogeneous, ion cyclotron instabilities in mag. field 8=43605
input admittance method of plasma diagnostics 8=34515
interaction, nonlinear. in constant mag. field 8=25754
ion effects in ionospheric propagation at v. l. f. (< 1.5 KHz) 8=24255
ion scatt., radial, in H_{11} waveguide 8=39108
layer, r.f. props. 8=43534
l. f. ionization of alkaline plasma 8=47840
light scatter and depolarization 8=30065
long gas discharge, microwave phenomena 8=47774
magnetic current source in plasma with half-space configuration, soln. through similarity principle 8=34498
magnetized, cold, nonlinear interaction 8=43535
magnetized nonuniformly, cyclotron resonance absorption 8=30051
magnetoactive, ellipsoidal antenna reactance 8=28632
magneto-active plane layer, transparency for obliquely incident plane e.m. wave 8=25748
magnetoionic medium, lossless, symmetry props. of dyadic Green's function 8=30076
magnetoplasma, annular slot admittance calc. 8=37523
magnetoplasma pulsed transmission 8=34493
magnetoplasma, vertically stratified, with rad. sources in layered medium 8=42034
magnetosphere, guidance along field aligned stratum 8=32262
microwave cond. in mag. field, particle-orbit theory 8=39083
microwave diagnostics 8=34490
microwave noise emission by gas discharge plasma 8=25756
microwave scattering from plasma column in rectangular waveguide 8=43531
microwaves. refraction. obliquely incident on plasma slab 8=34496
nonequilibrium, radiant energy loss, method for ang. and freq. integrations 8=34489
nonlinear anisotropic time-dependent, transverse wave 8=34500
nonlinear resonance, localized e. s. mode, calc. 8=47838
partially-filled coaxial line, analysis 8=42028
in plasma waveguide, wave amplification rel. to electron beam passage 8=24233
pressure anisotropy effect 8=34492
radiation characts. of pulsed discharge plasma in vacuum 8=29883
radiation from column, pulse stimulated 8=25755
radiation, radial intensity distrib., determ. 8=39095
radiative transfer, rel. to atomic transitions, spectra line shapes and collisional rates 8=39099
r. f. rad. from high-energy molec.-ion injection type mirror device 8=30061
re-entry transmission using modulated electron beam device, simulation 8=36906
reflection and refraction in homogeneous mag. fields 8=43538
reflection and transmission, parallel polarizations 8=34499
reflection from moving layer placed in stationary mag. field 8=30059
reflection, inhomogeneous layers 8=43530
refractive index, effective 8=25751
refractive index eqn., relativistic 8=30068
resonant scatt. by structures and body scatt. in medium 8=37495
scattering by cylindrical irregularity in ionosphere and exosphere 8=45520
scattering by field aligned columns, homogeneous cylindrical 8=30056
scattering by inhomogeneous cylinder 8=47844
scattering by inhomogeneous plasma ellipsoid 8=30072
scattering by warm enclosed cylindrical plasma 8=47835
scattering from inhomogeneous collisionless plasma 8=39100
scattering of plane wave by piece uniform plasma with a zero layer 8=30071

Plasma—contd
electromagnetic wave propagation—contd
self-trapping and self-focusing 8=39098
stability, linearly polarized wave travelling perp. mag. induction 8=34501
stellar, dispersion relation 8=41528
surface wave over thin layer on perfectly conducting ground plane 8=30055
surface waves on column, nonlinear excitation 8=30077
surface waves on columns, anomalous attenuation, explanation 8=39097
symmetric body in cylindrical plasma, radiation pattern 8=24238
synchrotron radiation prod. by electrons, growth rate derived 8=34497
Thomson scatt., continuum theory 8=39091
transformation and scatt. in strong elec. field 8=30060
travelling 10^9Hz, nonlinear interaction with ionic sound waves 10^4Hz 8=30047
turbulent, effective dielec. tensor 8=30074
vacuum u.v. rad. at temps > 20 000°K, spectral anal. rel. to astrophys. 8=39109
Vlasov, relativistic, dispersion relations 8=30066
warm drifting, refractive index for oblique incidence 8=30067
in waveguide, cylindrical, filled with isotropic plasma with slowly varying electron density 8=39106
waveguide excitation of slab, time harmonic analysis 8=28618
in waveguide, gap coupling and appl. to amplifiers 8=42024
waveguide, hollow plasma, characts. 8=24235
waveguide phased array, radiation in anisotropic plasma 8=24239
waveguide refl. coeff. meas. 8=30052
Ar, shock ionized in mag. field, microwave attenuation 8=29960
Ar, shock-prod. skin-depth effect of microwave reflection and transmission 8=25743
Bi, magnetoplasma, u.h.f., propag. vel. 8=49124
$CO_2 : N_2 :$ Ar mixture, meas. of rad. from shock heated stagnation zone, rel. to Martian probes 8=41569
Cs discharge, radiative energy loss 8=34494
H, at 10^5°K, optical emission from α particle and Fe ion slowing down 8=43542
H, dense, spectral and total rad. calc. 8=34508
H, reabsorpt. of rad. rel. to ionization and recomb. 8=34495
H + 10% He, at 5×10^4 K, optical emission from α particle and Fe ion slowing down 8=43542
magnetohydrodynamics
acceleration using inhomogeneous static mag. and h. f. electromag. field 8=30036
adiabatic invariant, nearly periodic Hamiltonian systems 8=28251
axial current, modulated, energy loss calc. 8=34482
behaviour in presence of pulsed or steady magnetic mirrors 8=34481
boundary between stream and dipole mag. field 8=43511
boundary characts. in ducts, influence of flow core boundary conditions 8=30038
channels, overflow currents on insulator walls calc. 8=30035
coaxial flow, 2D, finite conductivity effect 8=30040
cold, hydromagnetic waves, reductive perturbation method 8=43524
collisionless anisotropic, hydromag. wave propag. 8=34484
collisionless anisotropic, jump conditions for finite discontinuities 8=34480
collisionless, hydrodynamic equations, strong mag. field equivalence to m.h.d. equations 8=30042
convection, low press., heated underneath 8=39087
cumulation near zero field line 8=39085
dispersion relation, effect of neglecting Hall term in generalized Ohms. law 8=25739
electric discharge, self-sustained, in supersonic gas flow in transverse mag. field 8=25740
e.m. wave interaction, nonlinear, in constant mag. field 8=25754
energy converter channel, one dimensional flow 8=30041
flow-past profiles, relativistic 8=24183
Friedrich diagram considering Hall effect 8=25736
gyromag. separation constants behaviour 8=25737
gyroradius fluid eqns., finite, guiding centre derivation 8=34483
induced voltage for conducting ring interaction with axially symmetric mag. field 8=47829
inert gases, in generator, prod. of plasma with electron temp. > gas stagnation temp. 8=37448
instability, electrostatic-hydromag. cross stream, propag. perp. to mag. field 8=43601
instability for drift across mag. field 8=30174
instability due to ion temp. gradients 8=30163
magnetospheric, wave instabilities in non-neutral plasma-beam system 8=27942
motion and cavity formed by corpuscular flux incident on a line current 8=25728
m.p.d. thruster, spatial surveys of potential distrib. 8=39121
positive column, diamagnetism 8=34411

Plasma—contd
  magnetohydrodynamics—contd
    power extraction from high speed flow through mag. field 8=24082
    quasi-linear theory of shock-wave thickness 8=30045
    Shafranov-Kruskal instability in discharge, h.f. stabilization 8=39139
    sheet, Alfven speed, infinite diffusion limit of flow 8=30034
    shock wave with conductivity jump 8=33119
    solar wind, magnetized, free molecule flow in lunar vicinity 8=37058
    stability of cyclinder rel. to penetration depth of circular polarization mag. field 8=25782
    tennous flow in mag. field 8=47831
    theory, Maxwell-Boltzmann treatment 8=39086
    waves, non-linear, possibility of driving by transverse secular mag. field 8=39088
    waves in cylindrical column 8=47830
    waves, reductive perturbation method for nonlinear propag. 8=32679
    Ar in generator channel entrance, stabilization time 8=30037
    Ar, linear pinch discharge, acceleration by propag. current sheet 8=34415
    Ar II, arc, e. temp. meas. 8=43525
    BaO$_2$ for ionization enhancement in m.h.d. channel 8=30043
    He, flowing, magnetoacoustic waves 8=25738
    He, in T-tube, flow deceleration in transverse mag. field, obs. 8=47832
  measurement technique
    afterglow, very low e. density meas., microwave diagnostics 8=47848
    antenna input admittance rel. to properties 8=34515
    charge exchange meas. of emitted fast atoms flux distribution 8=43501
    coaxial injector, cond. and e temp. 8=39143
    collision frequency, by analysis of prop. phase constant of T.E.M. wave 8=39116
    correlations determ. by photon counting 8=39115
    correlator, high speed 8=34506
    density and collision freq., from r.f. cond. meas. 8=43546
    density and temp. fluctuations by optical spectroscopy 8=25759
    density fluctuations rel. to diff. coeff. by freq.-swept, one-bit digital correlator 8=47854
    density, spatial distribution from e.m. phase shift 8=43549
    electrical cond. by circuit methods, role of capacitance between coil and plasma 8=47822
    elect., thermal props., momentum, pressure, radiation review 8=30092
    electron-beam probe, influence of secondary electrons 8=30100
    electron collision frequency by open plasma resonators 8=47852
    electron collision freq., effective, spatial distrib. determ. by microwave method 8=25764
    electron densities, using 337 μm CN laser interferometer 8=47856
    electron density, by analysis of prop. phase constant of T.E.M. wave 8=39116
    electron-density, by reflection meas. using microwave bridge 8=39112
    electron density profiles from laser scatt. 8=30082
    electron-density profile, microwave meas. appl. to Hg-vapour discharge positive column 8=39113
    electron density, using gas laser in a homodyne arrangement 8=25761
    electron temp., by He spectral line intensities, effect of plasma conc. 8=30084
    electrostatic probe in combustion products, new technique 8=39119
    harmonically resonating rf, microwave scattering technique 8=39101
    homogeneous, r. f. diagnosis 8=34510
    homopolar, velocity profile of components 8=30086
    interferometer with colour film for electron density meas. 8=30094
    ion and electron temp. meas. in theta pinch using laser forward scatt. 8=39114
    ion-density probe, flat-plate 8=30098
    jet, e density by laser interferometer 8=30085
    jet, pulse, spectroscopic diagnostics 8=34511
    Langmuir probe for electron-density meas. in very low density plasma, ion-current collection mechanism 8=39118
    Langmuir probe, high-impedance with capacitive coupling 8=47858
    Langmuir probe, spherical, charact. of ion collection in drifting Maxwellian distribution 8=25765
    Langmuir probe, transient response at low press. 8=30097
    Langmuir probe, Xe discharge ~ mTorrs 8=30104
    laser diagnostics of theta-pinch plasma 8=43552
    laser, He-Ne, meas. θ-pinch end loss 8=30115
    laser scatt. for meas. of ion temp. 8=39114
    m.h.d. generators and plasmatrons, review 8=25762
    manometer, pulsed, for gas press. in mag. field var. direction and magnitude 8=43548
    microwave beam investigation of turbulent plasma 8=30172

Plasma—contd
  measurement technique—contd
    microwave cavity, freq. shift meas. 8=28604
    microwave diagnostics 8=39117
    microwave diagnostics, from interaction of e. m. waves and plasma 8=34490
    microwave field point meas. method 8=47851
    microwave, for nuclear reactor power monitoring 8=47432
    microwave phasemeters, p. c. m., review 8=30087
    noble gas, high press., temp. and electron density 8=43547
    piezoelectric probe for direct press. meas. 8=30096
    potential determ. by RF probe 8=25766
    probe, cylindrical, free molec., theory rel. to surrounding sheath 8=34519
    probe, electrostatic, characts. 8=47859
    probe, electrostatic, natural vibration freq., elec. field effect 8=47860
    probe, elliptic, resistance in uniform mag. field 8=30102
    probe, hot Langmuir, characts. 8=30103
    probes, inductive loop, elect. 8=30092
    probe, influence of e attachment 8=34518
    probe, spherical, ion collection expt. 8=43551
    probes, three symmetrical, generalization to plasmas with high potential gradients and densities 8=25767
    pulsed discharge simulator 8=34399
    radar interferometric width determ., turbulent column 8=47857
    r.f. impedance probes 8=36854
    refractive methods, interferometry, Schlieren and shadograph photography, Faraday-rotation, review 8=34516
    resonance in harmonic generation process, microwave scattering technique 8=39101
    resonance probe, boundary theories 8=30095
    resonance probes, impedance 8=47861
    Rogovskii loop for current of nsec duration 8=47850
    satellite mass-energy spectrometer for space ions 8=32563
    seeded flame, conductivity meas. 8=47853
    shock tube temperature, by X band rectangular waveguide probe 8=30091
    spectroscopy, multichannel Fabry-Perot with Fresnel lenses 8=30089
    spherical electrostatic probe in stationary weakly ionized plasma, asymptotic theory 8=30101
    Stark and Zeeman transient shifts, Fizeau interferometer meas. 8=30088
    streaming, ion and electron temp. and density using asymmetrical probe techs. 8=47863
    striations, moving, potential var. meas. 8=30083
    temperature from light depolarization 8=30065
    temperature, 5000°-50 000°K, spectral determ. 8=34513
    θ-pinch, mag. field by laser beam Faraday rotation 8=37583
    u. v. emission lines Doppler breadth, multichannel Michelson interferometer 8=30090
    volume recomb. coeffs. from atomic flux emergence 8=47849
    X-band (3cm) interferometer using 90°unbalancing, for electron density decay 8=25763
    Ar, jet, electron density from Thomson and Rayleigh scatt. 8=34517
    Ar jet velocity distrib. use of BN particles 8=30181
    Ar II magnetoplasmadynamics arc, electron-temp. using relative line intensities 8=43525
    Al electromagnet with portholes 8=46384
    Be, created by laser beam, e. density profile by interferometry 8=25760
    Cs. Langmuir probe meas., technique 8=30099
    D ion component from differential n spectrum 8=34512
    D pulse discharge, inverted spectral lines for temp. 8=29895
    D, temp. meas. by escape velocity 8=34514
    H emission energy spectrum 2 keV-1 MeV, meas. and display 8=38646
    HF resonant probes, theory and practice 8=47862
    He, electron temp. from relative line intensities, effects of cascading and metastable atoms 8=34468
    He reflex discharge, e-density and temp. meas. by cw Ar$^+$ laser light scattering 8=38991
    in Hg vapour discharge, Langmuir paradox in electron energy distribs. 8=34419
    Xe discharge, ~ mTorrs, Langmuir probe suitable charge range 8=30104
  oscillations
    acoustic waves, energy density 8=47878
    Alfvén wave prod. due to decay instabilities of helicons 8=40277
    Alfvén waves, compressional, propag. below ion cyclotron freq. 8=30146
    Alfven waves, excitation of red and violet satellites at instability 8=47883
    alkali-vapour arc, at anode 8=43461
    area waves in theta pinch 8=43584
    azimuthally localized fluctuations in levitated toroidal quadrupole 8=30136
    beam-generated waves, absorpt. in inhomogeneous plasma 8=47885
    beam-plasma bounded system with sharp interface between 2 media, small amplitude 8=43590
    bulk wave mode excitation, Fourier soln, inhomogeneous wave eqn. 8=30131

Plasma—contd
- **oscillations**—contd
  - coherent waves excitation and nonthermal r.f. emission prod. 8=30130
  - collisionless, non-isothermal 8=30042
  - cyclotron harmonic waves, nonlinear interactions 8=43575
  - dispersion rels. for longit. and transverse wave propag. perp. h.f. elect. field 8=43571

  - in cylindrical wave propag. in collisionless, magnetized, self-gravitating plasma 8=30143

Plasma—contd
stability—contd
decay instability of electron wave into lower and upper hybrid freqs. 8=30160
diffusion, density and temp. fluctuation of neutral meas. by optical spectroscopy 8=25759
discharge, l. p. in transverse mag. field 8=34404
drift-cyclotron instability of plasma in inhomogeneous h. f. field 8=34562
drift-dissipative instabilities, theory 8=47889
electric field effects on weakly ionized plasma 8=30171
electron beam, critical current 8=34557
electron beam-plasma system two stream instabilities control by modulation, obs. 8=43599
electron cyclotron instability, second azimuthal mode 8=34552
electron, hot, in mirror field, microwave burst accompanying triggering 8=30062
electron, loss-cone, effect of temp. 8=43602
equilibrium of pinch in toroidal const. mag. field and helical h.f. mag. field 8=43597
flute instability at confined boundary influence of imperfect boundaries 8=23923
flute oscillations in presence of elec. field 8=43598
flute perturbations in h. f. e. m. field 8=34558
gas lasers, influence of instability in operation 8=46574
general plasma equilibria, formal theory 8=30161
helical instability of hollow column in mag. field with shear 8=30175
helical waves, excitation in positive column 8=34414
h.f. magnetic field effect, on instabilities 8=39132
high-freq. flute-like instabilities in multicomponent plasma 8=30166
hydromagnetic, book review 8=25780
hydromagnetic-electrostatic, cross stream, propag. perp to mag. field 8=43601
hydromagnetic equilibrium of thin skin finite beta toroidal column 8=30109
hydromagnetic waves in cold plasma, self-trapping and instability 8=43593
inhomogeneous, instability induced by thermonuclear reactions products 8=25783
inhomogeneous two-stream instability 8=30165
instabilities, analysis using Krook-type collision integral 8=30155
instability, balloon compensation in toroidal system 8=34560
instabilities due to electron beam interact., form. of h.f. waves 8=47884
instabilities due to two-lumped vel. distrib. across mag. field, computer expt. 8=30173
instability for drift across mag. field 8=30174
interchange instability, low-freq. limit 8=30167
of ion-acoustic waves, if amplitude of solitons exceeds critical value 8=30154
ion beam interacting with rarified gas 8=28580
ion cyclotron, convective and absolute in mirror machines 8=30164
of ion cyclotron modes in mag. field, rel. to inhomogeneity 8=43605
ionized weakly, in nonuniform mag. field, mode amplitude and freq. shift 8=34472
ionospheric, l.f., theoretical discussion 8=45527
with isotropic vel. distrib. function, not Maxwell, unstable to small perturbs. 8=39137
Larmor radius and collisional effects on combined Taylor and Kelvin instabilities in composite medium 8=43596
longitudinal disturbance, theory 8=39135
l. f. interchange instability in "average minimum-B" config. 8=34555
magnetic drift, collisionless, with field curvature and non-uniform temp. 8=43591
in magnetic field, radial, as e cyclotron frequency approaches plasma frequency 8=30022
magnetic mirror trap, electron beam-plasma discharge 8=43564
magnetic moment under short-wave electrostatic perturbations, comments 8=30106
magnetic moment under short-wave electrostatic perturbations, reply to comments 8=30107
mag. trapped particle equilibrium rel. to current density 8=43560
magnetic well, ion temp. gradient instability 8=34532
mag. wells produced by beam current, interchange 8=34533
magnetized, rel. to ion temp. gradients 8=30163
magnetoactive, moving inhomogeneities, lifetime and spreading 8=36840
Maxwellian, second-order perturbation, computer expts. 8=43595
modes, overstable, in current carrying slabs due to resistivity gradients 8=43521
moving plasma, oscillation spectra and growth rate calc. 8=34534
moving striations in positive columns, origin 8=47748
multipole machine, l.f. instabilities rel. to toroidal mag. field 8=39140
neglected, involving bounce resonance 8=47890
non-potential oscillations, effect of current 8=34559
non-uniform, oscillation and turbulence 8=34554

Plasma—contd
stability—contd
occurrence in relatively weak fields 8=47887
plasmoid, ion-cyclotron instability 8=47886
resonant interchange mode, nonlinear evolution 8=30168
sheaths in mag. field 8=34564
soliton formation from perturbations 8=34535
stationary configs, near cylindrical, conds of hydromag. stability 8=39138
strongly inhomogeneous plasma, influence of finite "temp" upon stability 8=34553
synthetic, longitudinal stability 8=34563
theta pinch, generation and motion of plasmoids in mag. field with mirrors 8=43557
toroidal, stationary equilibrium theory including resistivity, inertia and viscosity 8=47888
toroidal, effect of resist. inertial forces, viscosity, and press. anisotropy on stationary equilibrium 8=30119
toroidal high-β plasma, equilibrium 8=30113
toroidal pinches surrounded by pressureless plasma, equilibrium 8=30114
toroidal, resistive instabilities obs., 8=39136
trapped particle instability, stabilization by finite orbit effect 8=39123
turbulence due to electron beam interaction, u. h. f. emission spectrum 8=30048
turbulence in high-current toroidal discharge due to convective instabilities 8=30169
turbulent, amplitude fluctuation of microwave beam 8=30172
turbulent, ion heating investigated with magnetic trap 8=34561
turbulent, weakly, kinetic-theoretical approach to fluctuations 8=39134
two-component columns, drift instabilities 8=43604
two-stream instabilites 8=43600
two-stream instability for longit waves 8=25781
Ar-Co, ionization instability in crossed elec. and mag. fields, obs. 8=34556
Ce, density perturbations, propag., 8=43594

anelasticity theory due to glide-dislocations motion 8=48943
anti-plane strain, relax. round sharp groove rel. to fracture initiation 8=32766
austenitic alloys, effect in physical props. during ageing 8=35699
beams, indeterminate, elastoplastic analysis under reverse loadings 8=37135
α-brass, effect on absolute thermopower 8=31447
α-brass, single and bi-crystals, rel. to stress corrosion cracking 8=26799
clamped beam with end constraints, permanent deform., anal. as system of one deg. of freedom 8=23838
clamped beams, expt. study of permanent deform. with and without constraints against axial motional ends 8=23839
compression, between parallel plates 8=23852
concrete slabs, reinforced 8=41728
creep theory, contact problems 8=41713
crystals, real, elasto-plastic deform. stages, classification 8=26756
cubic yield condition for compressible bodies 8=48961
clyinders, load limit rel. to geometry 8=28272
cylindrical shell, orthotropic, stability to axial compression, external press. and bending moment 8=32752
cylindrical shells, buckling with increasing load 8=41721
cylindrical shells, dynamic pulse buckling under lateral press., theory 8=32712
damping, correction to critical strain amp. 8=48957
damping recovering, comment on used Granato-Hikata-Lucke eqn. 8=48956
diaphragms, square, bulging and failure under hydrostatic press 8=37155
discs rotating, solid or with central hole, work hardening material 8=26762
elastic-plastic medium, elastic wave propagation 8=23935
extensible circular arch with axial forces, finite deforms 8=41719
f. c. c. crystals, dislocation structures, kinetics 8=31067
fracture, nature in relation to total potential energy 8=26768
front propagation in traction, velocity parameters 8=32768

Plastic deformation—contd

- glass-plastic under plane-problem conditions 8=49023
- graphite, creep strain effects on microstructure at 2500°C 8=44163
- hydrostatic ring test for strain meas. 8=35619
- ice, effect of H disorder 8=35569
- ideal material, plane strain extrusion through concave dies 8=23850
- kapron (nylon), necking and orientation effects 8=31248
- Lüdens front number effect on yield point 8=32767
- metals, max. shears after pear-shaped method of cold-welding 8=37099
- metals, mechanism dependence on strain and temp. 8=26629
- metal polycrystals, rel. to ferromag. resonance 8=31811
- metal, yield-stress curve and working props. 8=40087
- α-Nylon 66, cryst., (010) [100] slip mechanism, obs. 8=40199
- plates, circular, variable thickness, creep bending 8=37153
- polycrystals, ductile-to-brittle transition, effect of solute elements and temp. 8=31177
- polyethylene, molecular mechanism 8=44615
- polyethylene, oriented, texture changes rel. to twinning, slip and phase tranforms 8=35137
- polymers, local strains theory 8=31235
- pulse-loaded rate-sensitive structs., dynamic response 8=41806
- rigid-plastic annular plate under dynamic loads, deflections 8=41811
- rigid-plastic clamped beam, with end constraints, interact. anal. of permanent deform. 8=23837
- shear forming, build-up and diametral growth control 8=48955
- shell cylindrical, of ideal plastic material 8=46062
- shells, long, cylindrical, subject to uniform pressure and ring force 8=41665
- shell, spherical, under large deflections 8=32758
- shock resistance of metals, effect of deformation speed 8=41714
- in soils, soft, volume and shear deform. rel. to shock waves 8=40109
- stamping of plate with rigid stamp, charge limits theory 8=35620
- strain analysis, iterative methods, convergence 8=41730
- superplastic diaphragm, theory and expt. 8=28269
- torsion, of hollow cylinders, length change rel. to texture 8=44523
- transformer steel, change of blast-furnace structure in mag. field 8=40153
- viscoelastic media, eqns. of three-dimens. deform. 8=28275
- viscoplastic cylindrical shell, buckling due to impulsive load 8=32770
- yield point loading criterion, optimum 8=32753
- yielding behaviour of mats and structs., class of one-dimens. models 8=23835
- yielding of V-notched tension bars with circular ccts 8=32762
- AgCl, rel. to strains and dislocations 8=26662
- Al alloy, yield surfaces, prestraining effect, exptl. study 8=40127
- Al crystal, rel. to u.s. propag. 8=31191
- Al, during very high speed cutting 8=44539
- Al macrocrysts., grain boundary props., EPMA-Kossel obs. 8=30856
- Al, oxide coated, rel. to photostimulated exoelectron emission, obs. 8=36039
- Al, rel. to exoelectron emission, photostimulated, temp. effect 8=44943
- Al, rel. to exoelectron emission, pre-stimulated by u.v. or electron bombardment 8=44942
- Al rods and tubes, annealed, waves, exptl. data 8=40126
- Al sheets, local effects on fatigue crack growth rate 8=35652
- Al, stored energy measurement showing recovery stages 8=26784
- Al-4%Cu, by cold rolling, effect on $\theta' \to \theta$ transform. 8=48371
- Al-Mg alloys, yield stress effects on prismatic dislocation loop diam. and density 8=40033
- Al-NbAl$_3$ dispersion phase alloy, 20-450°C 8=44546
- AlSb, rel. to dislocation slip and twinning 8=44443
- Al 78 wt. % Zn alloy, superplastic, and dislocation climb. 8=44538
- Au, quenched, rel. to vacancy clustering 8=31045
- Au$_4$V, ferromagnetic, rel. to mag. disorder 8=27399
- CdS, influence of light 8=35670
- Co, hexagonal, rel. to dislocation arrangement 8=48853
- Cr, effect on Néel temp. 8=45055
- Cu alloys, rel. to Hall constant changes, order and stacking fault energy 8=44689
- Cu crystal, n-irradiated, radiation hardened, critical shear stress temp. and strain rate dependence 8=31196-7
- Cu crystals, macroscopic localization, during alternating torsion 8=44567
- Cu, effect on absolute thermopower 8=31447
- Cu, effect on yield surfaces 8=44564
- Cu, neutron irradiated, cyclic deformation 8=26801
- Cu, n-irradiated, rel. to active crystal length in yield region 8=40054
- Cu-Ni alloys, affected volume and temp. rise in discontinuous slip 8=40147

Plastic deformation—contd

- Cu-Ni alloys, internal stresses rel. to work hardening 8=31194
- Fe, cold, rel. to post-diffusion of C at 350°C 8=35490
- Fe, effects on X-ray diffr. line intensities, with and without annealing 8=35332
- Fe, polycrystals, magnetic after effect rel. to plastic deform. 8=36143
- Fe, rel. to X-ray diffr. line intensity changes 8=44166
- Fe, rolling textures rel. to deformation mechanism and sample orientation 8=26820
- Fe-Cr alloys, cold, rel. to post-diffusion of C at 350°C 8=35490
- Fe-Cr alloys, effect on hydrogen permeability temp. dependence 8=35489
- Fe-Ni-Ti alloys, effect on physical props. during ageing 8=35699
- Fe-Pd alloys, rel. to structural transforms and mag. props. 8=35102
- Fe-Si alloys, cold, rel. to post-diffusion of C at 350°C 8=35490
- Ge, epitaxial, effect on packing defects 8=31099
- Ge, p- and n-doped, rel. to prod. of p-n junctions 8=44835
- n-Ge, rel. to acceptor level position 8=35891
- KBr, effect on F-centre thermal stability 8=35586
- KCl, by dislocation motion, with charge flow 8=35961
- KCl, effect on F-centre thermal stability 8=35586
- KCl, rel. to dislocation structure formation 8=31080
- LiF crystals, and annealing rel. to thermal conductivity 8=30989
- LiF, on pressure sintering rel. to densification 8=35070
- LiF, quenched, translations slipping mechanism 8=26828
- LiF, rel. to dislocation structure formation 8=31080
- LiF, rel. to pt. defect formation 8=44403
- Mg, textured rel. to anisotropy 8=44587
- MgAl$_2$O$_4$ spinel, rel. to stoichiometry, along slip system {110} <110> 8=31216
- MgO, on pressure sintering rel. to densification 8=35070
- NaCl crystal, rel. to u.s. propag. 8=31191
- NaCl, effect on F-centre thermal stability 8=35586
- NaCl, effect on photothermal stability of F-centres 8=35590
- NaCl, on pressure sintering rel. to densification 8=35070
- NaCl, rel. to acoustic n.m.r. 8=44320
- Nb crystals, yielding and slip at room temp. 8=26696
- Nb, rolled, orientation distrib. of crystallites 8=35275
- Ni alloys, effect on Curie point and magnetization 8=40823
- Ni, strongly deformed, onset of uniaxial anisotropy after mag. annealing 8=36216
- Pb cylindrical bars, elastic-plastic deform. pulse propag., 8=44596
- Pt, effect on defect production and recovery 8=39997
- Pt-1at%Co(Fe) alloys, effect in elec. and mag. props. and Mössbauer spectra 8=31327
- Si, by indentation and scratching under light load 8=40180
- Si, rel. to parallel arrays of pure edge dislocations 8=40044
- Ti, mechanism rel. to impurity obstacles 8=44604
- α-Ti, 0-600°K, mechanisms 8=49057
- Ti-8% Al, mechanism rel. to impurity obstacles 8=44604
- TiNi, rel. to shape memory effect at 90°C, and martensitic transform. 8=30707
- in WC-Co alloy fracture, rel. to microstructure 8=26851
- WC-Co alloys, particle dispersed system, recovery processes 8=44606
- Zn crystals, on alternating torsion, macrolocalization characteristics 8=35726
- Zn macrocrysts., grain boundary props., EPMA-Kossel obs. 8=30856
- Zn, rel. to twinning and slip by indentation at 5 kg loads 8=31056

Plastic flow

See also Rheology.

- alkali halide crystals, yield pressure dependence 8=44550
- α-brass, incubation period at start of flow obs. 8=31200
- α-brass, surface hardening, preferential, in early stage II 8=40145
- coagulation structures, solid-like, thixotropically hardened, viscosity 8=40090
- fracture, generalized pyramidal, and yield criteria 8=41712
- h.c.p. polycrystals, ductile-brittle behaviour theory 8=26757
- ice, as mech-for rate of decrease of surface area 8=35073
- at indentation of rigid punch with smooth bases, solution with envelope of slip lines 8=32759
- plane rapid flows, polar-like 8=32760
- plane rapid, with polar-like vel. fields 8=32761
- plastic-viscous conductor, vel. profile of motion through slot in mag. field 8=37446
- steel, age-hardened containing γ' precipitates, tensile yield mechanism 8=49014
- steels, strain-aged, discontinuous yielding grain-size dependence 8=26809
- strip and sheet bending at large deform. exceeding elasticity interval 8=23842
- surface, rel. to crystal symmetry 8=26761
- visco-, circular cylindrical shells 8=28277
- yielding of axially symmetric bars, non-symmetric V-notch 8=32756

Plastic flow—contd
Al, ductile-brittle transition in presence of Hg-3% Zn or Sn-10% Zn liq. 8=35656
Al, ductile-brittle transition temp., in liq. metals, strain-rate depend. 8=35657
Al-Mg alloy, yield point phenomenon 8=40123
Al-Mg-Zn alloy, precip.-free zone effects 8=26785
Be, h.c.p. polycrystals, ductile-brittle behaviour theory 8=26757
Cu, ductile deformation mode, anomalous X-ray transmission exam. 8=26648
Cu, single crystals, flow stress, temp. dependence 8=40142
Cu, surface hardening, preferential, in early stage II 8=40145
Cu whiskers, thickness depend. of behaviour 8=40148
Fe, pressurized, yielding phenomena 8=31206
Fe, stresses, effect of annealing after wet H treatment 8=49018
Fe whiskers, flow, 4-300°K 8=49032
Fe-21%-Cr-0.05%C alloy, ductile fracture mechanism, 20-600°C 8=26819
Fe-3%Si, and critical shear stress and plastic flow 8=44568
$KCl:Ba^{2+}$, yield pt. rel. to Ba^{2+} impurities 8=31079
Mo, creep properties at 650-750°C 8=35707
Pb, polycryst., under simple shear, rel. to grain size and deform. 8=35713
Ta-Re alloy, yielding, rel. to conc. and temp. 8=40182
Th, effect of C content on flow stress 8=44603
Ti circular diaphragm, rel. to anisotropy 8=35720
TiX, (X = Fe, Ni, Co or combinations), relative ductilities 8=26848
Zn circular diaphragm, rel. to anisotropy 8=35720

Plasticity

Plastics—contd
  solid-plastic dispersion system, fluidity 8=34938
  structures, free vibrations 8=28263
  tape, for detection of shock waves 8=23944
  thermoplastics, torsional creep meas. 8=35624
  track detectors for cosmic rays 8=38117
  vinyl, dispersion and absorption of transverse waves 8=49069
Platinum
  adsorption of CO, i.r. spectrum 8=48488/9
  anode, varnish deposit, elect. characts. 8=49916
  anodic films, ellipsometry 8=27754
  chemisorption of propane, effect of pre-adsorbed water 8=27738
  corrosion in autoclave liners during hydrothermal crystal growth reactions 8=49855
  damage rate meas., by electron irradiation 8=31155
  defect production and recovery, plastic deformation and Au substitution effects 8=39997
  electrical-decoration of Si surface for e.-microscope exam. 8=40496
  electrical and thermal cond. c.f. Ag 8=30987
  electrode, Ag nuclei form. 8=49948
  ellipsometric investigation of anodic films 8=41282
  Fermi surface, effective mass 8=40250
  film, resistance change due to CO adsorption 8=49169
  films on W, structure, work function and adsorpt. of Cs 8=35178
  films, sputtered, oriented growth 8=44049
  films, thermal treatment effect on props 8=44698
  ion microscope tips smoothing by field evaporation, 10 and 78°K 8=39708
  n-irradiated hardening 8=35716
  liquid, interact with transition metal carbides, rel. to their decomposition 8=27715
  magnetic-moment meas. vs field and temp., rel. to exchange enhancement 8=31526
  optical functions deduced from reflectance data 8=45216
  paramagnetic susceptibility calc. 8=49483
  powder, isotopic exchange of O_2 8=41236
  proton beam interactions, K_2^c, γ prod. obs. 8=33709
  quenched, polyhedral voids and prismatic dislocations, e- and field-ion-microscope exam. 8=31086
  radiography using channeled α-particles rel. to defect obs., 8=48830
  surface, appearance of Na, K impurities 20-1100°C 8=35549
  surface ionization of alkaline halide molecules 8=36062
  surface, Na atom ionization coeff. absolute meas. 8=31476
  surface, reflection of molecular beams, at different temps. 8=25668
  temperature meas. using metal ribbon X-ray furnace 8=32978
  thermal cond. and elec. resistivity, 100 to 900°C 8=48763
  thermionic emission of Na^+, K^+, oxide reaction effects 8=35549
  thermometers, resistance, sensitivity 8=28428
  vacancies, divacancies and impurities, thermal quasi-equilib. 8=48813
  wires, thermionic props. 8=36061
  X-rays, ultra-soft, absorption, experimental and theoretical study 8=25364
  Pt^{195} in rare-earth-Pt alloys, n. m. r. rel. to conduction-electron polarization 8=36279
  Pt^{4+}, luminesc. in octahedral complexes 8=36505
  Pt-Ge contact catalysis of germane thermal decomp. 8=32123
  Pt/Pt-10% Rh thermocouple, accuracy of calibration 8=46267
  Si-supported, i. r. absorpt. of adsorbed CO 8=30773
Platinum compounds
  alloys, electronic structure rel. to band structure of pure metals 8=31294
  Magnus' Green salt analogues, semiconductivity 8=40480
  $K_2[Pt(N)_6]$ structure 8=26402
  Pt-ammine complexes, far i.r. spectra 8=43330
  Pt dithizonate in CCl_4, nonlinear abs. of light, positive and negative saturation effects 8=34856
  Pt(II) complex of ethylenediaminedithiocyanate C- and N- substituted, i.r. spectra 8=43329
  $PtAs_2$, n.m.r. of As^{75} and Pt^{195} 8=49655
  PtC, spectrum 8=25513
  PtCo alloys, surface charge distrib. rel. to field ion image formation 8=27366
  Pt-50% Co alloy, uniaxial mag. anisotropy induced by tempering under stress 8=31702
  Pt-Co ordered crystals mag. props. rel to crystallite distrib. (texture) 8=36175
  Pt-1 at% Co(Fe) alloys, elec. and mag. props. plastic deformation effects 8=31327
  Pt-Co(Fe) alloys, local-moment saturation from n.m.r. obs. 8=31527
  Pt-Cu alloys, thermodynamic props. of formation 8=27714
  Pt_3Fe alloy, hyperfine interaction constants from nuclear sp. hts. 0.15-1°K 8=31504
  Pt_3Fe, ordered, mixed antiferromag. ferromag. state 8=31789
  Pt-Ir alloys, n.m.r., meas., susceptibility, Knight shift 8=40998
Platinum compounds—contd
  Pt-Mn alloys, atomic structure and ferromagnetism 8=26432
  Pt-Mo alloys, Pt-rich, n. m. r. of Pt^{195} and satellite structure 8=27513
  PtO_2, synthesis and props. 8=35205
  PtP_2, n.m.r. of P^{31} and Pt^{195} 8=49655
  Pt-Pd alloys, n.m.r. of Pt^{195}, spin susceptibility 8=40998
  PtSb evaporation at 900°C and Sb vapour species determ. 8=30608
  $PtSb_2$, preparation, semiconducting props. 8=40479
Pleochroism
  aliphatic ketones, dichroic ratio 8=32045
  circular dichroism rel. to rotatory dispersion, expt. verification 8=41044
  dichroism, magnetic circular and optical rotatory dispersion meas., applic. 8=33257
  magnetic circular dichroism, meas. apparatus 8=27615
  magnetic circular dichroism, theory 8=27542
  metal complexes, mag. circular dichroism 8=27616
  metal complexes, mag. circular dichroism, interpretation 8=27614
  metal halide complexes, mag. circular dichroism 8=27615
  nucleoside derivs, circular dichroism studies rel. to chem. substitution 8=43434
  poly-L-alanine in soln., u.v. circular dichroism 8=43824
  poly-L-serine in soln., u.v. circular dichroism 8=43825
  polynucleotides, circular dichroism, theory 8=29865
  quartz, smoky, anomalous, rel. to atomic structure 8=27608
  $[(C_6H_5)_3FC_4]_2$ isomers, dichroism 8=39642
  n-Ge, dichroism of microwaves due to hot electrons 8=35903
  $IrBr_6^{2-}$ complexes, mag. circular dichroism 8=49730
  $IrCl_6^{2-}$ complexes, mag. circular dichroism 8=49730
  KCl, mag. circular dichroism rel. to R centre transitions. 8=48874
  Lif, magnetic circular dichoism of R′ centre 8=48878
  $RuBr_6^{3-}$ complexes, mag. circular dichroism 8=49730
  n-Si, dichroism of microwaves due to hot electrons 8=35903
Plexiglas. See Plastics.
Plutonium
  atom, configuration-interaction integrals 8=38679
  cooperative electron transition at 66°K, evidence 8=44632
  fuel for thermal reactors 8=47402
  hemispherical emittance, effect of surface cond. and temp. 8=30993
  Ignition behaviour 8=45353
  microcracks elimination by chill casting and heat treatment 8=31228
  reactor fuel, liquid, viscosity, heat of fusion and melting 8=47407
  α-Pu, microstructs. formed at press. over 30 kbar, by thermal treatmetns 8=35281
  Pu-Be (α, n) sources, n yield increases 8=47428
  Pu^{239} in irrad. samples, non-destructive assay, Pb spectrometer 8=36650
  Pu^{239}, diffusion in α-Al_2O_3, meas. by α-absorpt. method 8=35480
  Pu^{239} fission cross-section rel. to spin and energy 8=34049
  Pu^{240} Auger effect, L_2-subshell yield obs. 8=38715
  $Pu^{3+,4+}$ in CaF_2, optical spectrum 8=31968
Plutonium compounds
  alloys, binary, ignition behaviour 8=45353
  alloys, corrosion of Ta container, O, N impurity effect 8=47412
  alloys, liquid viscosities 8=39330
  alloys, phase diagrams 8=35080
  Pu-α-Be calibrated 4.43 MeV γ source 8=37925
  δ-Pu-Ba alloys, elastic consts. and specific heats below 300°K, temp.-depend. 8=44598
  PuC_2, high temp. sructure by X-ray diffraction 8=44196
  Pu-Co-Ce liquid metal in Ta container determ. of Ta mass transfer 8=47420
  $Pu(C_2O_4)_2 . 3H_2O-Th(C_2O_4)_2 . 2H_2O$, mag. susceptibility 8=36073
  PuF_4 neutron source, spectrum obs. 8=42650
  PuF_6, electron diffr. and molec. struct. 8=38858
  Pu-Fe alloys, electron-probe microanalysis of Fe 8=36647
  Pu-Ga alloys, electron-probe microanalysis of Ga 8=36647
  δ-Pu-Ga alloys, interdiffusion coeff. obs. 350°-517°C 8=35504
  Pu-3.3at.% Ga alloy, growth of large crysts 8=26263
  PuO_2, magnetic susceptibility 8=40753
  $Pu^{238}O_2$ neutron spectrum 8=34099
  PuO_2, thermal conductivity from diffusivity measurements 8=35463
  PuP, thermal conductivity and ht. capacity 8=44368
  PuS, thermal conductivity and ht. capacity 8=44368
  Pu_3Zn_{22}, crystal structure 8=26433
  $(U, Pu)O_2$ solid soln. production and Pu distribution 8=29562
Pockels effect. See Electro-optical effects.
Point defects. See Crystal imperfections.
Point groups. See Crystal structure, atomic.
Poiseuille flow. See Flow; Hydrodynamics.
Poisson ratio. See Elastic constants.
Polar cap absorption. See Electromagnetic wave propagation/ionosphere.
Polar cap glow. See Airglow.

Polarimeters
- automatic electronic, for 350-700 nm, ZEP66 8=46739
- charged-particle, accessory for mag. spectrometer 8=24496
- Compton, appl. to γ polarization meas. 8=33617
- Compton, asymmetry ratio, computer calc. 8=33615
- Compton, optimal sensitivity, computer calc. 8=33616
- high-speed stellar, electronic circuitry 8=50270
- prisms for use with lasers 8=33158
- proton scatt., for isobaric analogue state spin meas. 8=42640
- pulse discharge, light polarization meas. apparatus 8=24425
- spectropolarimeter, astronomical, three-channel photoelec. 8=36921
- transmission-microscope polariscope for photoelasticity 8=33283
- He liquid, for fast n, analysing power calc. 8=33820
- He liquid, for fast neutrons, description 8=33819

Polarized light
- See also Double refraction; Optical rotation; Photoelasticity; Polarimeters.
- analyzer, far u.v., for rocket use 8=41486
- cholesteric material, circular 8=48150
- circular polarizer for Lyman-α flux 8=28880
- correction factors for polarized spectroscopy 8=24426
- crystal orientation goniometer 8=30814
- depolarization rel. to stimulated Raman scatt. intensity 8=29695
- in dielectrics, transparent, study of stresses and failure under laser irrad. 8=40547
- diffracted by u. s. waves in isotropic solids 8=36302
- ellipsometry for modulated reflection studies of surfaces 8=31937
- Fourier spectrometer, field of view and resolution 8=28826
- glass matrix of ordered liq. crysts. 8=49767
- holographic recording of polarization effects 8=28878-9
- interferometer beamsplitters, thin-film far i.r., polarization props. 8=28851
- interferometer, using props. of plane waves in isotropic and anisotropic media 8=28856
- i.r., near, MgF_2 Soleil compensator 8=37699
- i.r. polarizer 8=46738
- laser, anisotropic, Poincaré sphere calc. 8=33170
- laser, single mode, in transverse mag. field 8=37568
- light wave polarization in optically active crystals 8=31947
- microscopes, AMPLIVAL POL-D and AMPLIVAL POL-U, new types 8=42192
- near i. r., polarizing grid efficiency 8=24427
- nebula IC 446 8=45715
- optical activity meas. technique using holography 8=28887
- parallel Wood's anomalies of optical gratings 8=28868
- photoelectric polarization of self-activated phosphors on ZnS and CdS bases 8=36006
- in photoluminescence of solutions 8=39386
- prisms, cutting, rational utilization of geometry of Iceland spar crystals 8=42159
- pulse discharge, polarization meas. apparatus 8=24425
- quarter wave plate achromatization and linearization of retardation us. wavelength 8=41056
- Rayleigh–Cabannes scatt. in dry air 8=30301
- reflection spectra, polarization effects 8=37683
- resonator, eigenstates of polarization 8=46559
- rotation of plane due to weak inhomogeneity of medium 8=46740
- selectively, due to absorption by elongated Ag particles in glass 8=41051
- skylight, effect of conc. turbid layer 8=36743
- skylight neutral points over smooth water 8=50118
- spectrometer, Fourier, Z-cut uniaxial cryst. plate between circular polarizers 8=28802
- spiral galaxies, refl. and absorpt. contributions 8=28116
- tandem two-photon processes, polarization correl. 8=49692
- tetracyanoethylene, i. r. spectra of charge transfer complexes, rel. to vibr. assignment 8=38879
- thickness of transparent film, calc. from ellipsometric obs. 8=30734
- transmission through metal foil, rel. to plasma resonance 8=27531
- variable stars, obs. 8=32455
- CN laser, far i.r., charcts. 8=46582
- $CaWO_4$: Yb^{3+}, microwave-optical double reson. using circularly polarized light 8=41070
- Cd isotope, radiation (2288 Å) emitted by optical reson. 8=25359
- Eu chalcogenides, obs. of ferro- and antiferromag. domains 8=31613
- He, from e impact, obs. 8=29641
- Nd glass laser emission 8=42111
- Pt anodic films, ellipsometry 8=27754

Polarography. See Chemical analysis/electrochemical.

Polarons. See Crystal electron states/polarons.

Polishing. See Surface texture.

Polonium
- Po^{210} α source, neutral excitation of superfluid He 8=24045

Polonium compounds
- No entries

Polyelectrolytes. See Electrochemistry; Polymers; Solutions.

Polymerization
- activation energy, dipolar groups, determ. 8=49912
- anthracene, solid, photo-dimerization by u.v. irradiation 8=41270
- bio-β-chloroethyl-vinyl-phosphonate, γ-induced, mechanism, obs. 8=49913
- butadiene, radiation-induced in emulsion, $RhCl_3$ additive effects 8=44081
- copolymers of methylmethacrylate with methacrylic acid 8=39917
- cyanoanthracene solns., vitrous dimerization rel. to optical absorpt. temp. dependence 8=43823
- ethylene–silica gel system, γ-induced, e.p.r. obs. 8=32127
- ionomers, physical structure 8=30796
- manganic acetylacetonate and related chelates, vinyl polym. initiation 8=32124
- molecular mass distrib. calc. 8=32126
- nonstationary, statistics 8=36588
- polyacetaldehyde, depolymerization of amorphous films in vacuum, 40-80°C 8=45364
- radiation effects at low temp. 8=27742
- styrene emulsion, i.r. spectroscopy, oxidation effect 8=32125
- ternary copolymerization, asymmetric propagation 8=36589
- vinylphosphonic acid dichloride, γ-induced, mechanism, obs. 8=49913
- AlF_3, vapour dimerization 8=30607
- Ba methacrylate dihydrate, by X-rays 8=27741
- by H atoms from elec. discharge 8=32101
- HCN, adsorbed on porous glass 8=48491

Polymers
- See also Plastics.
- α-acetylaminoacrylic acid-N-vinylpyrrolidone copolymer-gelatin emulsion for fast-n dosimetry 8=33800
- acetylene series, luminesc. spectra 8=32079
- activation energy for conduction 8=35831
- addition to non-Newtonian pseudo-plastic liq., effect on mass transfer on circular cylinder 8=30423
- adhesives, for metals, effect of elec. field appl. during bonding on strength 8=31185
- adsorbed layer on TiO_2, thickness determ. 8=39620
- adsorption on TiO_2 8=48494
- aklylacrylates-methacrylic acid copolymers, later particles and films struct., obs. 8=26156
- amorphous linear, fracture theory inc. viscoelastic and plastic props. 8=31249
- amorphous, molec. ordering above glass temp., viscosity obs. 8=39633
- amorphous, strength and hardness, temp.-time charact. 8=31234
- amorphous, tearing strength 8=31237
- amorphous, thermal expansion and compressibility 8=39926
- anomalous cond. in glass transition region of amorphous polymers 8=26949
- atomic parameters of chain, eqn. of repeat angle 8=25685
- bonds, under mechanical stress, i.r. spectroscopy 8=43437
- butadiene acidic and basic copolymers mixtures, H-bonding rel. to elastic props., obs. 8=48506
- butadiene acidic and basic copolymers mixtures, H-bonds mech. lability, obs. 8=48507
- butadiene and isoprene, block- and statistical co-polymers, structural features, radiothermoluminesc. invest. 8=47734
- butadiene copolymer mixtures, ionic bonds, obs. 8=48508
- butadiene copolymers, ionic bonds mech. lability, obs. 8=48509
- butadiene-lithium methylacrylate copolymers, ionic bonds, obs. 8=48508
- butadiene-methacrylic acid copolymers, H-bonding rel. to elastic props., obs. 8=48506
- butadiene-methyl (2-methyl-5-vinyl)-pyridinium iodide copolymer, ionic bonds, obs. 8=48508
- butadiene-styrene block copolymer, viscoelasticity 8=40194
- butadiene-2-methyl-5-vinylpyridine copolymers, H-bonding rel. to elastic props., obs. 8=48506
- calf thymus DNA, elec. cond. 8=40295
- cellulose, Du-Pont K116-207, fracture toughness, obs. 8=44614
- cellulose film, dimens. stability rel. to orientations of phases 8=39634
- cellulose I and II acetylation reactivities, viscosity and X-ray diffr. obs. 8=45325
- cellulose, sorption and diffusion 8=30785
- chain, intrinsic viscosity, excluded volume effect 8=34788
- chain mol. wt., effect on crystallization and melting 8=44108
- chain, translational diffusion 8=48114
- chains, even moments of end-to-end distance 8=47738
- chains, Kerr const. calc. 8=38972
- chains, strain birefringence, theory 8=38971
- chromatography, gel permeation, stochastic model 8=45415
- complexes, charge-transfer, review of elec. props. 8=26942
- conjugated, dynamic polarization 8=39434
- copolymers, graft, i. r. spectra 8=29871
- copolymers of methylmethacrylate with methacrylic acid, thermodynamic props. 8=39917

Polymers—contd
copolymers with F atoms, CH_2 group absorpt. bands 8=34394
crystalline films, optical transmission obs. 8=45245
crystallinity, conference, Arizona, USA, 18 Jan 1966 8=35204
crystallinity, definition rel. to X-ray diffr. obs. 8=44092
crystallinity, thermal meas. 8=44093
crystallization, by chain folding, two-dimens. model 8=39663
crystallization, temp. depend. rel. to nucleation mechanism 8=44109
cyclic polyene with $4n\pi$ electrons, theory of diamag. anisotropy 8=25434
deformation, local strains theory 8=31235
dielectric consts. and losses of polar and non-polar insulators in sheet form, 4.2-300°K 8=27253
diffusible, appl. to high-speed osmometry 8=34819
diffusion in dil. solns., increase in sensitivity of meas. 8=48117
diffusion meas. using Zeiss Schlieren equip. 8=48113
dilute polymer solutions, impact tube meas. 8=48015
dilute solns., flow-time fluctuations in capillary viscometer 8=30431
dilute solns., orifice plate calibration 8=25889
dispersion curves and freq. distrib., single-chain model 8=38975
2,4-disulphonic acid benzaldehyde polyvinyl acetate-gelatin emulsion for fast-n dosimetry 8=33800
electrical cond., carrier mobility theory 8=40593
electrical cond. meas., difficulties 8=40592
electronic cond. theories rel. to eka- and rubi-conjugation 8=26878
epoxide, hardened, electron-microscopy of struct. 8=35292
ethylenelpropylene copolymer, ductility of single crysts. mats. obs. 8=44616
ethylene-methacrylic acid coplymers, i.r. spectra 8=41173
ethylene-silica gel system, γ-polymerization, e.p.r. obs. 8=32127
excluded volume, asymptotic soln. 8=38976
excluded volume problem, variational calc. 8=29870
excluded vol., self-consistent-field calc. 8=34395
fibrillar structures in solutions and in films 8=26153
fillers and pigments, structure forming mechanism 8=35202
film-coated bodies, rolling friction and adhesion 8=31186
films, dielectric breakdown 8=40564
as free-layer damping treatment for vibrating bodies 8=32874
frequency distributions of random polymers 8=47736
gelatin-glycerol system, viscoelast., isochronal temp. conc. diagram 8=44618
geometry of chains 8=25684
glasslike and crosslinked, proliferous growth 8=48505
H-bonded, electrical conductivity 8=40295
helical, spectral effects of electronic interactions 8=29868
helix → coil transition, transitory regimes 8=43432
high linear, plasticity by meas. viscosity of wire samples 8=31169
high-molecular biopolymers, diffusion meas., method and apparatus 8=48116
insulating particles adhering to Se, force rel. to triboelec. and surface charges 8=49045
ionic cond., weak-electrolyte theory 8=40590
isobutene-silica gel system, γ-polymerization, e.p.r . obs. 8=32127
kapron (nylon), deformation, necking and orientation effects 8=31248
light scatt. in binary mixed solvents 8=30472
light scatt., multiple-order, by ringed spherulites 8=45246
linear chains, correl. between excluded vols. and virial coeffs. 8=29864
linear, dilute soln., viscoelastic flow stability 8=25845
liquid silicates, ionic equilibria 8=34787
macromolecular chemistry, Prague, Aug.-Sept. 1965 8=34392
maleic anhydride-styrene copolymer, viscosity and osmolic press. in tetrahydrofuran rel. to mol. dimens. 8=43776
mechanical props at low temp., review 8=26738
melts, kinetics of wetting of surfaces 8=39283
membrane, gas diffusion depend. of time lag on conc. 8=30321
membranes transport processes 8=26049
α-methylstyrene-methyl methacrylate copplymer, dielec. props., stretching effects, 125-150°C 8=49356
molecular mass distrib. calc. 8=32126
molecular wt. determ. by equilib ultracentrifugation 8=38967-8
nylon 4, lattice spacings and morphology, obs. 8=44285
nylon-6, α-γ phase transition by stretching 8=30715
α-Nylon 66, cryst., plastic deform. rel. to (010) [100] slip. obs. 8=40199
Nylon 66, doubly oriented, elec. cond. rel. to direction, 23-150°C 8=27257
nylon 66, elec. cond. 8=42095
nylon 66, spherulite deform. in cold drawing, 20°C 8=44097
nylon, thermal conductivity, 1.2-20°K rel. to ht. transport mechanism 8=44362

Polymers—contd
oriented, effect of elongation on n.m.r. 8=31914
oriented, elasticity, macromol. segmental mobility dependence 8=35735
oriented, intercrystallite layer density from X-ray difr. 8=35290
Perspex dosimeters, photosensitivity 8=42347
phenol sulphonic acid formaldehyde type membranes, electro-osmosis and streaming pots. 8=27745
physical effects of radiations 8=35608
plane polygonal, translational diffusion coeff. 8=34817
plasticity by meas. viscosity of wire samples 8=31169
polarizability, molecular, rel. to rotations 8=34220
polyacenequinones, cond. enhancement by substituting heterocyclic acenes 8=27141
polyacetaldehyde, depolymerization of amorphous films in vacuum, 40-80°C 8=45364
polyacetaldehyde, vibr. assignments from neutron scatt. 8=48712
polyacetylene, linear, elec. cond. Seebeck voltage rel. to O content 8=31398
polyacrylic acid, aqueous solutions, viscometric studies of u.v. irradiation 8=34794
polyacrylonitrile films, deposition, semicond. and photoelec. props., obs. 8=39605
polyacrylonitrile, neutron scatt. 8=25686
polyalkylacrylates later particles and films struct., obs. 8=26156
poly-α-methylstyrene in cyclohexane, and temp. rel. to microtactivity, obs. 8=43750
poly-α-methystyrene in toluene, second virial coeff. rel. to microtactivity, obs. 8=43750
poly(α-methylstyrene), light-scatt. and mol. wt. distrib. 8=48152
poly(α-methylstyrene), photolysis, e. s. r. 8=27762
poly-α-methylstyrene, stress relax. 8=40198
polyamides, elastic consts. in tension and compression 8=31242
poly-benzyl-L-glutamate, conformation of adsorbed layers 8=39612
poly-β-alanine, water soluble and insoluble n. m. r. rel. to transitions, obs. 8=45112
polybutadiene, chlorinated, n.m.r. 8=38914
polybutadiene, radiation-induced in emulsion struct., added $RhCl_3$ effects 8=44081
polybutadiene-styrene latex, particle size meas. by flow ultramicroscopy 8=30543
1,2-polybutadiene, viscoelastic props., 5-50°C 8=44613
polybutene-1, isotactic, crystallization nucleation, obs. 8=44122
polycaprolactam, γ-irrad., e.p.r. and nature of saturation 8=27464
polycaprolactam, melting props. and density rel. to cryst. morphology, obs. 8=43907
polycaprolactum, stressed, photodegradation kinetics temp. dependence 8=45399
polycarpamide, creep of unoriented cryst. film, vel. rel. to stress 8=40196
polychlorotrifluoroethylene copolymer films, crystallization 8=39680
polychlorotrifluoroethylene, low mol. wt., n. m. r. rel. to mol. motion, 77-300°K 8=45118
polycyanacrylates and compositions based on chem., optical props. 8=48151
polydimethylsiloxane blends, viscosity 8=30433
poly (dimethyl siloxane), eqn. of state for elasticity 8=26858
polyester resin based coatings, correl. between internal stresses and thermal props. 8=30759
polyether coatings, structure and props; influence of substratum 8=35188
polyethylene, behaviour of dielectric props. rel. to freq. 8=44875
polyethylene, creep of unoriented cryst. film, vel. rel. to stress 8=40196
polyethylene crystal nucleation, droplet expt. 8=44128
polyethylene, crystallized from diluent mixtures, enthalpy 8=34966
polyethylene, crystallized, lattice defects and crystallite size 8=39990
polyethylene crysts., chain folding, vibr. analysis 8=44305
Polyethylene, dielec. losses at cryogenic temps. 8=49355
polyethylene, dielectric strength subject to polarity reversals 8=35954
polyethylene, e-irradiated, fluorescence by Hg lamp 8=24729
polyethylene enthalpy, —150 —150°C 8= 24028
polyethylene, enthalpy of fusion and crystallinity 8=30578
polyethylene, extended-chain lamellae, origin 8=44094
polyethylene films, stretching processes, X-ray diffr. studies 8=26859
polyethylene, folded-chain crysts., density and ht. of fusion 8=35248
polyethylene, γ-irradiation effect on elec. cond. 8=40084
polyethylene, highly anisotropic, low density, creep 8=40197
polyethylene, lamellar struct. from m. p. and branching determ. 8=44096
polyethylene, linear fractions, mol. dispersed eutectic systems 8=44095

Polymers—contd
polyethylene, mech. props. rel. to mol. chain mobility, $\leq$ 40 000 psi 8=44620
polyethylene, multiple-order light scatt. rel. to spherulite lamellae twisting 8=45246
polyethylene, non-linear viscoelastic behaviour 8=40195
polyethylene, normal and deuterated, neutron scatt. 8=26579
polyethylene, oligomeric, conformational struct. in aromatic nonaromatic solvent mixtures n.m.r. obs. 8=43765
polyethylene oxide solns., proton mag. relax. 8=30538
polyethylene, oriented, plastic deform. and phase transforms 8=35137
polyethylene, plastic deform., molecular mechanism 8=44615
polyethylene, Poisson's ratio incompression 8=31245
polyethylene, structure during orientational stretching 8=35293
polyethylene supermolecular struct., reorientation effects, X-ray obs. 8=26157
polyethylene, surface charge density meas. and contact electrification 8=49379
polyethylene, surface wave propagation 8=35736
polyethylene terephthalate, crystallization behaviour 8=26206
polyethylene terephthalate, dielec. losses at cryogenic temps. 8=49355
poly(ethylene terephthalate) fibres, amorphous orientation and crystallite form., obs. 8=44175
polyethylene terephthalate, oriented, deformation bands 8=31244
polyethylene terephthalate, stressed, photodegradation kinetics temp. dependence 8=45399
polyethylene, thermal conductivity, 1.2–20°K rel. to ht transport mechanism 8=44362
polyethylene, transparency at mm. and sub-mm. wavelengths 8=44876-7
polyethylene, visco-elastic props., at high pressure 8=40189
polyethylene, volume expansion and melting temp. range 8=39472
polyethylene, I-doped, elec. cond. enhancement 8=40596
polyethyleneglycol adipate based, thermal expansion of solid and solns., obs. 8=26595
poly(fluoralkyl acrylates), permittivity and loss meas. 8=40594
polyformaldehyde, antifriction props. 8=31246
poly (4-methyl pentene-1), dielec. losses at cryogenic temps. 8=49355
poly-γ-benzyl-L-glutamate, elec. cond. 8=42095
poly-γ-benzyl-L-glutamate film, planar layered structure obs. 8=26131
poly-γ-benzyl-L-glutamate in soln., conformations 8=48096
poly-γ-benzyl-L-glutamate, proton resonance spectral linewidth rel to mol. wt. 8=43873
polyglycine, vibr. spectra 8=39880
polyglycols, e.p.r. obs. 8=31868
poly-i-butyl methacrylate, bulk and shear relax. processes 8=40193
polyimide films, noncryst., mech props. rel. to mol. struct., obs. 8=44619
polyisobutylene in cyclohexane and benzene, viscosity rel. to conc., obs. 8=30427
polyisobutylene in polybutene oil, intrinsic viscosity gradient depend., obs. 8=43775
polyisobutylene, viscoelasticity of v. dil. solns. 8=39329
poly-L-alanine spherilites, light scattering patterns 8=41175
poly-L-alanine spherulites, morphology 8=35291
poly-L-alanine, u.v. rotation in soln. 8=43824
poly-L-proline II, crystal structure 8=26547
poly-L-serine, u.v. rotation in soln. 8=43825
polymer-solvent-nonsolvent systems phase equilib., cluster model calc. 8=43900
polymethacrylic acid, aqueous and methanol solns., small-angle X-ray scattering 8=25888
polymethane dyes, nineteen, stimulated emission over continuous range 710-1060 mμ 8=28713
poly(methyl acrylate), mol. wt. and dimens. in ethyl acetate, obs. 8=43773
polymethylbenzenes, p mag. relaxation 8=49654
polymethylene, pyrolysis, intramol. radical transfer, obs. 8=45344
polymethyl methacrylate, breakdown, laser-induced 8=40566
polymethylmethacrylate, brittle fracture, study by stress wave propag. and reflection 8=44531
polymethylmethacrylate, const. strain rate failure and creep failure, compared with theory 8=31249
polymethylmethacrylate, crack orientation, laser destruction, stress effect 8=40191
poly(methyl methacrylate), creep compliance and secondary processes activation energies, –150–75°C 8=44017
poly(methyl methacrylate), crystal mounting adhesive 8=31233
polymethyl methacrylate, irradiated, electrical props. 8=40597
polymethyl methacrylate rods containing rhodamine dyes, stimulated emission when flashlamp excited 8=28714
polymethylmethacrylate, stereoregular, internal rot. in side groups 8=38969

Polymers—contd
polymethylmethacrylate, surface wave propagation 8=35736
polymethylmethacrylate, thermal radiation during damage by laser light 8=30994
polymethylmethacrylate, triplet absorpt. and form. yield meas. 8=25401
polymethylsiloxanes, thermal degradation 8=35189
polymethylsorbate, n.m.r. 8=40984
poly-n-butyl methacrylate in chlorinated diphenyl, dilute solns., normal stress effect 8=39333
poly[N, N′-(p, p′-oxydiphenylene) promellitimide], pyrolytic, elec. cond. rel. to struct. and unpaired spin conc. 8=26976
polynucleotides, optical props., theory 8=29865
poly(N-vinyl carbazole)-I complex, e.s.r., Hall effect and transport props. 8=27462
polyoctadecene-1, transition temps. and crystallinity 8=39635
poly-1, 3-dioxolane, n.m.r. and dielectric dispersion 8=41003
poly-2, 2′-octamethylene-5, 5′-dibenzimidozole amorphisation in annealing, obs. 8=26158
polyolefins, Br cpd. effects on thermal degradation at 400℃ 8=36583
polyoxymethylene extended chain crysts., refr. index m.p. and density, X-irrad. effects, $< 4.8 \times 10^7$ R 8=44509
polyoxypropylene, structural transform. under large deform. by uniaxial tension, wide temp. range 8=35203
polypeptide solns., u.s. absorpt. and helix-coil transition 8=48145
polypeptides, helical, optical absorpt., theory 8=25680
poly propylene fibres, structural changes in stretching process 8=49067
polypropylene, isotactic, $\gamma-\alpha$ solid–solid transform., obs. 8=44018
polypropylene, isotactic, -organic diluent systems, phases and thermodyn. interactions, obs. 8=43899
polypropylene lamellae grown from dil. α-chlornaphthalene solns., twinning 8=35218
polypropylene, light scatt. 8=49783
polypropylene melt, elastic behaviour 8=39261
polypropylene, melts rheological props. rel. to mol. wt. distrib. obs. 8=43721
polypropylene, mol. motion, CCl_4 effects, 140-373°K 8=48510
polypropylene, stretching technique for X-ray detector windows 8=50476
polystyrene aq. suspension, angular distribution of scatt. light 8=25964
polystyrene, atactic, heat capacity rel. to annealing, 10–360°K 8=44345
polystyrene, atactic, n-pentane diffusion rel. to second-order transition above glass point 8=44398
polystyrene-benzophenone mixts., glass transition temps., obs. 8=44146
polystyrene, breakdown when subject to ionizing radiations, optimal thickness calc. 8=31417
polystyrene, brittle fracture, study by stress wave propag. and reflection 8=44531
polystyrene, chain dimens. temp. depend. below O point, cyclohexane soln. viscosity obs. 8=43774
polystyrene, crack orientation, laser destruction, stress effect 8=40191
polystyrene, diffusion in polystyrene, effect of mol. wt. 8=30450
polystyrene-diphenylmethane soln., electrolytic cond. rel. to conc., temp and field 8=39412
polystyrene, filament struct. in laser beam trace 8=49784
polystyrene, film-forming solutions 8=44065
polystyrene films, far u.v. optical props. 8=27639
polystyrene, films i.r. transmission rel. to glass transitions, 50-120°C 8=45247
polystyrene in good and theta solvents, viscosity rel. to conc., obs. 8=30427
polystryrene latex, particle size meas. by flow ultramicroscopy 8=30543
polystyrene latex particles in La, Nd and Th nitrates, electrophoretic mobilities 8=49923
polystyrene lattices refr. index, suspension light scatt. meas., 589, 546 and 436 mμ 8=34934
polystyrene, light scatt. 8=49783
polystyrene melt, elastic behaviour 8=39261
polystyrene, optical constants in vac. u.v. 8=41174
polystyrene, photocond., excitation wavelength depend. 8=49430
polystyrene, photolysis, e.s.r. 8=27762
polystyrene, solns. in benzene u.s. absorpt. 8=43807
polystyrene-solvent-methanol system, phase equilib. rel. to cluster model, obs. 8=43900
polystyrene sub-micron particles, electrical mobility 8=43888
polystyrene sulphonic acid, i.r. spectra as function of degree of hydration 8=48165
polystyrene, surface charge density meas. and contact electrification 8=49379
polystyrene, thermal props., low-temp., radiation-induced cross-links effects 8=26606

Polymers—contd
- polystyrene, thermal radiation during damage by laser light 8=30994
- (1:1)poly(styrene-co-methyl acrylate), mol. wt. and dimens. in ethyl acetate, obs. 8=43773
- polystyrenesulfonic acid membranes, dielec. props. rel. to adsorbed H_2O 8=49357
- polystyrenesulphonate membrane forms, optimum ionic electret 8=44878
- polytetrafluoroethylene dielectric props. 8=35952
- polytetrafluoroethylene, mech. props. rel. to mol. chain mobility, ≤ 60 000 psi 8=44620
- polytetrafluoroethylene n.m.r. spectra rel. to temp. of post-irrad. heat treatment 8=49640
- polytetrafluoroethylene oxide crystal packing and molecular configuration 8=35366
- polytetrahydro furan, n.m.r. and dielectric dispersion 8=41003
- poly(tetramethylene oxide), high-mol. wt., crystallization and melting 8=44134
- polythene films, ionization by giant laser pulses 8=40720
- polythene, laminated, dielec. breakdown in voids 8=40591
- polyurethane-cyclohexanone soln. viscosity temp. depend. obs. 8=26595
- polyurethane foams, mech. props, effect of cell membrane 8=48243
- polyurethane, thermal expansion of solid and solns., obs. 8=26595
- polyvinyl acetate latex films, particle packing 8=48471
- polyvinyl alcohol, dehydrated fibre, i. r. spectra 8=34396
- polyvinyl alcohol, electronic absorpt. spectra 8=30492
- polyvinyl-alcohol fibres, structural features characterized by electrokinetic potential 8=26154
- poly (vinyl alcohol), films i. r. transmission rel. to glass transitions, 50-120°C 8=45247
- polyvinyl alcohol, films, Au crystal X-ray sizing 8=30858
- polyvinyl alcohol, water vapour sorpt., crystallinity effect 8=30784
- polyvinyl butyral, critical surface tension with alcohols and hydrocarbons, composition effects 8=30731
- polyvinyl chloride, conformational struct. from vib. anal. 8=43436
- poly (vinyl chloride-co-vinyl acetate), films i. r. transmission rel. to glass transitions, 50-120°C 8=45247
- polyvinyl chloride, dielec. losses at cryogenic temps. 8=49355
- poly(vinylidene fluoride), α- and β-crysts. fundamental modes, i. r. obs. 8=44306
- polyvinylidene fluoride, X-ray studies of crystal structure, orientation and supramol. structure 8=26155
- polyvinylpyrrolidone solns., osmotic equilib. at high pressures 8=39347
- polyvinyltoluene aq. suspension, angular distribution of scatt. light 8=25964
- polyvinyl toluene latex, particle size meas. by flow ultramicroscopy 8=30543
- poly-w-undercanolactum, dielec. losses at cryogenic temps. 8=49355
- porous sphere molec. model, hydrodynamics 8=29866
- proton resonance spectra, obs. of chem. shift using rotating sample 8=49626
- PVC, chlorinated, n.m.r. 8=38914
- PVC, dielec background loss power temp. law polymethylmethacrylate 8=31426
- radicals in aq. soln., e. s. r. 8=34906
- random, vibr. anal. 8=38970
- rigid solutions, molecular orientation of luminophors 8=32078
- rubeanato-Cu co-ord. polymer, cryst., mag. and elec. props., c. f. with amorphous form 8=27385
- semiconductors, band conduction and fluctuations 8=27066
- semidilute solns., quasielastic neutron scatt. 8=30419
- silk, natural, stressed, photodegradation kinetics temp. dependence 8=45399
- solid, secondary free radical reactions during mech. damage 8=45361
- solution, drag on sphere 8=30432
- solution, light scatt. photometry 8=46652
- solution viscosity rel. to concentration 8=48125
- solutions, comblike branched mols., statistical thermodynamics 8=39324
- solutions conc., normal stresses in simple shear flow, molec. theory 8=34699
- solutions, dilute, onset of drag reduction in turbulent flow, molec. approach 8=30368
- solutions, eqns for combined simple and sinusoidal shearing 8=34801
- solutions, flow birefringence and polydispersity 8=39368
- solutions, flow props., kinetic approach 8=39334
- solutions, turbulent drag-reduction 8=30364
- solutions, viscosity, non-Newtonian intrinsic, ellipsoidal model 8=43778
- spectra, i. r., vibr. band intensities and terminal group effects, calc. 8=29857
- spherulite, film, Rayleigh-Gans light scatt. 8=36447
- spherulite growth rate, temp. depend. 8=39681
- starch, modified maize, p spin-lattice relax. time temp. depend., obs. 8=45135

Polymers—contd
- statistical mechanics, integral eqn. for excluded-vol. effect 8=29869
- stressed, photodegradation kinetics 8=36619
- styrene-butadiene copolymers in soln. viscoelastic props. 8=25891
- styrene-methyl methacrylate copolymer in good and theta solvents, viscosity rel. to conc., obs. 8=30427
- styrene-methyl methacrylate random copolymers, dilute soln. props. 8=39323
- sulphurised polymer carbons, form, bonding and behaviour 8=35016
- supramolecular structure, obs. methods 8=30795
- surface tension of molten liquids 8=48105
- tear strength increase 8=49066
- teflon, Poisson's ratio in compression 8=31245
- tetrafluoroethylene-hexafluoropropylene, irradiated, e.s.r. of peroxy radicals 8=43422
- vinyl, mean dimens., effect of side-group interactions 8=29863
- vinyl, optical rotation, theory 8=38973
- viscoelastic, homogeneous submicrocavitation fatigue processes 8=31181
- viscosity, entanglement effects 8=48100
- viscosity, theory with hydrodynamic interaction and excluded vol. 8=47737
- war and friction, effect of C fibre reinforcement 8=40192
- zig-zag chains, randomly folded, vibr. freq. 8=47735
- B cpds., C and H microdeterm. 8=36628
- C fibre reinforced, wear in high vacuum environment 8=35636
- Co(II) di-n-alkylphosphinate polymers, structure and prep. 8=30797
- Na-CMC aqueous soln, 0. 3wt. % Na, viscoelastic props. 8=34700
- Si cpds., C and H microdeterm. 8=36628
- Zn(II) di-n-alkylphosphinate polymers, structure and prep. 8=30797

Polymorphism
- See also Crystal structure.
- cerborate with aragonite isotypes 8=48515
- chlorite, new modification and its possible polytypes, X-ray structural exam. 8=26174
- cyclononanone, study by X-rays, n. m. v. and diff. thermal stability 8=30714
- cyclooctanone, study by X-rays, n. m. v. and diff. thermal stability 8=30714
- elements and simple cpds., temp. and pressure dependence, theory 8=26053
- families, main and subclasses and homeotypes of structure types 8=26162
- glutaric acid, X-irradiated, transforms. rel. to free radical recombination 8=29828
- hexachloroethane, X-irradiated, transforms rel. to free radical recombination 8=29828
- lecithins, from lecithin-water phase analysis 8=43435
- mesomorphic states, phase identification, temp. scanning thermal anal. 8=48365
- polytype structure, stacking sequence determ., calc. method 8=26172
- rare earth borate isotypism 8=48657
- rare-earth sesquioxides, metastable structure, formative mechanism 8=26056
- silicates, layer, some rare polytypes, X-ray exam. 8=26174
- Bi_2Te_3II, high-temp and pressure polymorych, lattice parameters 8=30681
- Cd_3As_2, high-press., retention at atmos. press. and temp. $< 150\,^{\circ}K$ 8=26066
- CdI_2, polytypism as high-order transformation 8=44012
- CdI_2 polytypism, dislocation theory 8=26180
- CdI_2 rhombohedral polytype 12R 8=39644
- Ce-alkali metal tungstates, rel. to hydrothermal crystallization 8=26259
- Ga, identification of metastable forms 8=35111
- KCN, high press. 8=48385
- KSCN, high press. 8=48385
- in $NH_4[SC(S)(NH_2)]$ 8=48517
- NaCN, high press. 8=30701
- NaSCN, high press. 8=30701
- Nd-alkali metal tungstates, rel. to hydrothermal crystallization 8=26259
- PbI_2, polytypism as high-order transformation 8=44012
- Pr-alkali metal tungstates, rel. to hydrothermal crystallization 8=26259
- SiC, conversion of cubic to hexagonal as fn. of temp. and press. 8=48399
- SiC, polytypism as high-order transformation 8=44012
- SiC polytypism, dislocation theory 8=26180
- Ta_2O_5, effect of oxide additions 8=48403
- $VOSO_4 . 5H_2O$ 8=49759
- ZnS, polytype formation rel. to periodic slip processes 8=44461
- ZnS, polytypism as high-order transformation 8=44012

  thermalization in inert-gas moderator 8=34177
  triplet annihilation, correl. with struct. of organic liqs. 8=30406
  in Al_2O_3 powder ortho-positronium annihilation and form. rel. to specific area 8=49130
  in Ar, liquid, zero-point motion rel. to bubble formation 8=30388
  in H_2, liquid, zero-point motion rel. to bubble formation 8=30388
  in He, liquid, zero-point motion rel. to bubble formation 8=30388
  in MgO powder ortho-positronium annihilation and form. rel. to specific area 8=49130
  in Ne, liquid, zero-point motion rel. to bubble formation 8=30388
  in SiO_2 powder ortho-positronium annihilation and form. rel. to specific area 8=49130
Positrons
  See also Electron pairs; and Electrons, which include both negative and positive electrons when the differences between them are of no special significance.
  annihilation, by O_2 molecules as paramag. impurity, rel. to long lifetime 8=29851
  annihilation, from positronium negative ion, wave function calc. 8=40287
  annihilation in In and Sb, rel. to ang. distrib. of annihilative γ-quanta 8=49128
  annihilation in α, β Sn 8=49131
  beam production in electron linear accelerator 8=33426
  cosmic ray p-e^+ flux ratio calc. 8=42685
  crystal, single, scatt. rel. to lattice struct. 8=48889
  distribution equilib. function in e. m. cascade 8=38207
  electron-positron g-factor comparison, crossed-field prod. 8=33628
  $e^-e^+ \rightarrow A\bar{B}$ processes with polarised beams 8=33646
  e^+-p, e-p scatt., ratio obs. equal to unity up to $(5\ GeV/c)^2$ 8=42639
  $K^+ \rightarrow e^+ + \nu_e$, branching ratio 8=42574
  lifetime meas. in solids, time-amplitude converter 8=24526
  in metal hydrides, lifetimes 8=40286
  ν-$e^\pm$ interaction, μ production, exam. using two- and four-component theory 8=29090
  polarized, annihilation in Ni and Fe 8=49129
  production in electron bombardment of tungsten 8=33642
  slow, annihilation in He, theory 8=38740
  in solids, single-particle wave functions, assumption-independent, appl. to annihilation angular distribs. 8=44669
  source, linear accelerator, magneto-optical adaptions 8=42353
  storage rings, development and prospects 8=33509
  in Al single-particle wave functions, assumption-independent, appl. to annihilation angular distribs. 8=44669
  H-positron scatt. resonance mechanism 8=38722
  I^{123}, upper limit to positron decay 8=42955
  PbF_2 crystal Cherenkov shower detector 8=33613
  in Si, single-particle wave functions, assumption-independent, appl. to annihilation angular distribs. 8=44669
Potassium
  abundance in solar photosphere 8=28172
  abundance, with U and Th, in peridotite inclusions in basalts 8=50012
  active ionic transport through biological membrane, opposite to Na ions 8=50461
  atom, autoionizing states, metastable, identified 8=43244
  atom-electron scatt., elastic spin-exchange, expt. and close-coupling calc. 8=47538
  atom reactions with Cl, in crossed beams 8=49875
  atom, spin-exchange cross-sections for K^{39} atoms 8=43239
  atomic beam, crossed with Cs atomic beam, spin change collisions 8=47534
  atomic beam, electron scatt., oscill. strength and absolute differential cross-sections 8=43242
  atomic beam, scatt. on CO_2 molec. beam, time-of-flight anal. 8=38952
  atomic beam source for 0.2-45eV 8=43240
  conduction-ESR, 0.5Gsplitting, theoretical exam 8=27478
  content determination in fuel rich air-H_2 flames 8=49990
  crystal lattice freq. distrib. function and sp. ht. calc. 8=44300
  deposition on W emitters in field emission microscope, flicker noise and surface migration 8=44936
  diffusion from soda-potash-baria glass into refractories 8=48780
  electron scatt., energy loss spectra, quantitative comparison with dielectric theory 8=26727
  equation of state, theory, and calc. of thermal parameters 8=30973
  films, LEED exam 8=48453

Potassium—contd
- films, optical props. for photons 3.96 to 9.69 eV 8=49731
- fluorescence, quenching cross-sections, determ. by flame tech. 8=29617
- Hall coeff., field-dependent, rel. to Fermi surface 8=26969
- helicon-wave resonances in Hall coeff. determ. rel. to surface-mode loss 8=44682
- internal friction and relax. peaks in oxygen contaminated samples 8=49029
- ion adsorpt. on Mo, 960-1200°K 8=30770
- ion channelling in NaCl and KCl lattice, computer analysis 8=40075
- magnetoresistance, rel. to band structure 8=44691
- magnetoresistance, strain-dependent 8=49166
- melting curve up to 80 kb 8=34961
- mixtures with N_2, H_2, HD and D_2, mixing and quenching 8=29836
- nuclear spin lattice relaxation 8=40926
- optical constants, ellipsometric obs. 8=41120
- oxidation in flames 8=49877
- pair interaction, phase change 8=35027
- plasma confinement lifetime in Q-device 8=47871
- plasma, K-seeded non-equilibrium, effect of bulk gas on elect cond. 8=25720
- plasma, potential noise obs. by Q-machine 8=47891
- resistance, electrical 8=49167
- r.f. size effect rel. to Fermi surface meas., 8=44645
- solar, profiles photometric obs. 8=37024
- spin waves 8=31659
- structure in liquid state 8=39307
- superconductivity predictions from phonon spectrum and e.-phonon interactions 8=44719
- thermoreflectance spectrum in visible and near u.v. region 8=41101
- u.s. attenuation, 2.5-77°K rel. to dislocation motion effects 8=39894
- vapour charge exchange source of polarized H^- 8=33099
- vapour condensation in presence of Ar or He, effect on heat transfer 8=25993
- vapour, laser pumping four wave parametric interaction 8=33177
- vapour, photoionization absorpt. continua 8=29973
- vapour, proton charge exchange, $E_p = 2.5$-22 KeV 8=38761
- vapour, rel. to disruption of glassy C 8=49888
- vapour, thermal cond., 550-820°C, 0.005 to 1.3 atm., meas. by coaxial cylinder method 8=47965
- vapour, thermal cond. 841 to 1241°K, 0.022 to 0.94 kg/cm² 8=47964
- in Ar plasma, plasma with K, electron temp. meas. by line reversal method 8=39075
- K^+, diff. in $LiSO_4$, 590-820°C 8=39977
- K^+, ionization to K^{2+} by electron impact 8=39047
- K^+, scatt. by Mo, ang. depend. of energy spectra of secondary ions 8=40719
- K_2, pseudopotential theory calc. 8=38838
- KNb_3O_8, mica like, dielect. props. 8=40568
- K-Sb-Cs photocathodes 8=36023

Potassium compounds
- absorption, far i.r., due to U-centres and F-centres 8=44480
- apophyllite crysts., growth mech. study by surface microstructs. 8=26211
- diffusion, reciprocal and self-, along dislocations 8=26620
- graphites, formation and structure 8=30904
- halide crystals, phonon scatt. by U centres, thermal conductivity meas. and theory 8=44301
- impurity anions effects on elec. conductivity 8=40570
- muscovite dehydration, mechanism 8=49876
- muscovite heated in vacuum, superstructure phase, electron microscopy study 8=26190
- muscovites, harmonic, epitaxic power temp. dependence 8=26279
- K binoxalate, d.m.r. 8=49611
- K graphite, order-disorder transformation obs. 8=26074
- K oxalate hydrate, partly deuterated, isotope effect in d.m.r. 8=45122
- in K persulphate soln., corrosion inhibition of Cu 8=45332
- K solutions, unsaturated, in melted KCl, thermodynamics 8=48060
- K_2 malate, double n.m.r. 8=29810
- KAg_4I_5, ht. of formation 8=48396
- $KAl(SO_4)_2$ $12H_2O$ crystal growth and dissolution rates 8=48537
- $KAl(SO_4)_2 . 12H_2O$, n.m.r. 8=40983
- $KBO_3 . {}^1/_2H_2O$, e.s.r., rel. to RO_2, O_3^- and O_2^- centres 8=45098
- KCN, hindered rotation of CN^-, above 168°K 8=26030
- KCN, melting and polymorphism to 44 kbar 8=48385
- KCNO, bonding and stability 8=26006
- $KCOF_3$, i.r. transmission spectra 8=27600
- K_2CO_3, aq. soln., applic. for admission of ionizing into duct of MHD generator 8=46360
- K_2CO_3 soln., acid differentiation, rel. to hydrothermal crystal growth 8=26213
- $K_3CO(CN)_6:Cr^{3+}$, ${}^2E \leftrightarrow {}^4A_2$ transition 8=31979
- $KClO_3 : Cl^{35}$, n.q.r., use in temp. control of spectrometer 8=46528
- K_2CoF_4, absorpt. spectrum, compared to $KCoF_3$ 8=45197

Potassium compounds—contd
- $K_2Cr_2O_7$, spectral line structure at 2°K 8=34253
- $K_2Cr_2O_7$, triclinic, cryst. struct. 8=35337
- $K_2CuCl_4 . 2H_2O$, hyperfine parallel resonance 8=27454
- $K_3[Cu(NO_2)_5]$, crystal structure from i.r. and vis. absorpt. spectra 8=30901
- KD_2PO_2, automatic thermostatic control 8=31431
- KD_2PO_4, Curie temp. shift on hydrostatic pressure, theoretical explanation 8=40818
- KD_2PO_4, dielec. and electromechanical props. near phase transition 8=27275
- KD_2PO_4, specific heat, temp. dependence 8=44338
- KF, impure single crystal, nuclear quadrupole effects by pulsed double resonance 8=41012
- KF, neutron-irrad., diffusion and release of Ar gas 8=35498
- KF, u.v. reflectivity spectra 8=36374
- $K_3Fe(CN)_6$, Mossbauer h.f.s. and internal mag. field, 0.025-0.04°K 8=37330
- $K_4Fe(CN)_6$, Mössbauer radiation scattering by nucl. resonance, diffr. and interference effects 8=26025
- $K_4Fe(CN)_6 . 3H_2O$, dielec. constant and birefringence rel. to polytypic transforms, 0 to −100°C 8=31432
- $K_4Fe(CN)_6 . 3H_2O$, phase transition sequence in −45 to −25°C from permittivity and polarization meas. 8=40610
- KH, pseudopotential theory calc. 8=38838
- $KH_2Al_2(SiO_4)_3$, (muscovite), isomorphic substitution distribution 8=35338
- KH_2AsO_4, critical temp. behaviour of As^{75} quadrupole interaction 8=45137
- KH_2AsO_4, i.r. absorpt. by H-bonds in cryst. 8=27598
- KH_2AsO_4, n.q.r. spectra, rel. to temp. 8=41009
- $KH_2AsO_4(KD_2AsO_4)$, electro-optic and dielec. constants 8=49369
- $KH_2AsO_4(KD_2AsO_4)$, piezoelec. and elastic constants 8=49368
- $KHCO_3$, structure of $(HCO_3)_2^{2-}$ ion 8=26032
- KH_2PO_2, automatic thermostatic control 8=31431
- KH_2PO_4, Curie temp. shift on hydrostatic pressure, theoretical explanation 8=40818
- KH_2PO_4, electroluminescence 8=49804
- KH_2PO_4, electro-optical props. near phase transitions 8=27637
- KH_2PO_4, ferroelec. mode temp. depend., Raman scatt. obs. 8=36376
- KH_2PO_4 ferroelec., vibrational mode disappearance from n. time-of-flight spectra 8=44299
- KH_2PO_4, generation of second harmonic oscills. using a laser 8=41102
- KH_2PO_4, i.r. absorpt. by H-bonds in cryst. 8=27598
- KH_2PO_4, long-range ferroelec. domain interactions, optical obs., 8=49367
- KH_2PO_4-model, modified to include external field 8=27262
- KH_2PO_4, (100) and (101), faces growth rate dependence on Al ions and pH of soln. 8=48547
- KH_2PO_4 parametric light generator, electro-optical tuning, obs. 8=41103
- KH_2PO_4, precipitates and dislocations exam. by X-ray diffr. microscopy 8=26691
- KH_2PO_4, specific heat, temp. dependence 8=44338
- KH_2PO_4, spontaneous scatt. of intense light, quantum theory 8=27538
- KH_4PO_4, ferroelec., l.f. oscills. from Raman spectra study 8=36378
- KH_2PO_4 and KD_2PO_4, ferroelec. Curie temp. pressure-dependence 8=27274
- K_2HPO_3 acqueous solns., lattice energy from ultrasonic velocity 8=25880
- KI, breakdown, laser-induced 8=40566
- KI, Bremstrahlung passage, energy losses rel. to beam collimation and crystal thickness 8=31310
- KI crystal, colour centre form. by e beam pulse 8=44475
- KI, doped, far i.r. absorption 8=49734
- KI, electric field grad. at nuclei near substitutional ion, n.m.v. meas. 8=36273
- KI electric field gradients at nuclei surrounding different subst. halogen ions, n.m.r. meas. 8=48314
- KI, electrical conduction in impure crystals rel. to vacancy migrations 8=40576
- KI, F-centre form. by u.v. irrad. 8=44479
- KI, V band preferential bleaching 8=44476
- KI film, reflection and absorpt. spectra in u.v. 8=32025
- KI, luminscence of α-centre, polarization 8=27654
- KI, neutron-irrad., diffusion and release of Ar gas 8=35498
- KI, optical transmittance curves, room temp., 0.2 to 3.0μ 8=45187
- KI, paraelastic behaviour of S_2^- 8=48336
- KI, reciprocal and self-diffusion along dislocations 8=26620
- KI, Schottky defect formation energy, from dissolution of impurity containing precipitates 8=35536
- KI soln., oxidation by ultrasonic cavitation 8=37278
- KI, ultrasoft X-ray spectra of iodine rel. to band structure 8=41105
- KI:Ag Greek absorp. bands 8=36323
- KI:Ag^+, far i.r. props. of lattice resonant modes rel. to isotope shifts 8=36393
- KI–AgI, high-cond. solid systems 8=48396

Potassium compounds—contd

- $KI:Cl^-$, (Br^-), i. r. lattice vibration absorpt. by gap and resonance modes, theory 8=27576
- KI: Cu, phosphor, complex activation centres 8=45277
- KI: In, Zeeman effect of A absorption bands 8=45200
- K_2IrCl_6, mag. ordering from n. diffr. exam. 8=40870
- KI: NO_2^-, Raman spectra, impurity induced 8=41106
- KIO_4, metaperiodate, thermal expansion 8=35444
- KI–Tl crystals, thallous ion centers 8=41108
- KI: Tl, luminescence, host sensitized 8=27653
- KI: Tl, recomb. luminesc. and F scintillations 8=36493
- $KLiSO_4$, second harmonic generation on ruby laser irrad. 8=45199
- $KMgF_3$, crystal growth, perovskite struct. 8=30830
- $KMgF_3$, i. r. transmission spectra 8=27600
- $KMgF_3$, perovskite type crystals, NMR and electronic structure 8=27506
- $KMgF_3:M^{2+}$(M=Ni, Fe, Co), acoustic paramagnetic resonance rel. to magnetoelastic coeffs. of 3d impurity ions 8=31817
- $KMgF_3$: V^{2+}, Mn^{2+}, hyperfine interactions, transferred, through unpaired spin on intervening ions 8=49647
- $K_2Mn(C_2O_4)_2 . 2H_2O$, crystal chemistry data 8=48512
- $KMnCl_4 . 2H_2O$, NMR and antiferromag. props. 8=36275
- $KMnF_3$, absorpt. spectra of Mn^{2+} 8=41109
- $KMnF_3$, anomalous elasticity at 184°K 8=26827
- $KMnF_3$, crystal growth, perovskite struct. 8=30830
- $KMnF_3$, heat capacity rel. to magnetic spin 8=44340
- $KMnF_3$, i. r. transmission spectra 8=27600
- $KMnF_3$, paramagnetic susceptibility, semi-empirical expression by Padé approximant 8=27386
- $KMnF_3$: Eu^{3+}, luminescence spectra, spin-wave sideline 8=27655
- K_2MnF, heat capacity rel. to magnetic spin 8=44340
- K_2MnF_4, zero-point spin reduction 8=27445
- $K_2Mn_2(SO_4)_3$, langbeinite structure, growth and electro-optical props. 8=39678
- K_xMoO_3, electronic struct. 8=40245
- $K_2MoO_2F_4$ struct., e diffr. obs. 8=30903
- KNH_2, in liq. NH_3, absorption spectra 8=39380
- KNO_2, phase boundaries below 500°C 8=48366
- KNO_3, behaviour at high-temp. 8=49370
- KNO_3, heat capacity, enthalpy and entropy 8=44339
- KNO_3, molten, vib. freqs. by i. r. emission spectroscopy near 600°C 8=38842
- KNO_3, I-II phases, i. r. absorpt. spectra rel. to internal interaction 8=27597
- KNO_3, phase-III, stable and metastable, ferroelec. props., pressure dependence 8=27273
- K–Na liquid alloys, Knight shift obs. 8=25955
- $K_xNa_{1-x}Fe_7O_{11}$, ion mobility 8=48782
- $KNbO_3$, atomic displacements rel. to real structure determ. 8=30887
- $KNbO_3$, e-microdiffr. exam. 8=26430
- $KNbO_3$, spontaneous polarization, elec. field and field gradient calcs. 8=27269
- KNb_3O_8, mica like, dielect. props. 8=40568
- K_2NbOF_5, crystal structure by e-diffr. 8=26404
- K_2NbO_3F, separation from melts 8=48258
- $K_2[Ni(C_2O_4)_2] . 6H_2O$, i. r. spectrum 8=36380
- $KNiF_3$, i. r. transmission spectra 8=27600
- $KNiF_3$, lattice vibration rel. to magnetic ordering 8=48706
- $KNiF_3$ and K_2NiF_4, electron-magnon interaction, effect on absorption band 8=41127
- K_2NiF_4, electronic absorption spectrum 8=41110
- $K_{0.23}NiO_{1.8}$ struct., e diffr. obs. 8=30902
- $K_2Ni_2(SO_4)_3$, langbeinite structure, growth and electro-optical props. 8=39678
- KO, K_2O_2 as impurities on Pt, at 20-1100°C, W, 20-700°C 8=35549
- KO_2, phase transforms and crystal structures 8=26075
- $K_2O-B_2O_3-Al_2O_3$ system glasses, structural units 8=35201
- KOH, solubility of ZnO and electrolytes elec. cond. and vapour press., 10-145°C 8=45373
- KOH, and KOH-ZnO electrolytes, conductivity, 36 to -66°C 8=45372
- K_2O-SiO_2 glasses, comp. vars. in e microanalysis rel. to surface damage, obs. 8=30865
- K_2PtBr_6, luminesc. 8=36505
- K_2PtCl_6, luminesc. 8=36505
- $K_2[Pt(N)_6]$ structure 8=26402
- K-Rb alloys, Zener relaxation 8=49030
- K–Rb liquid alloys, Knight shift obs. 8=25955
- K_2 Rb_2, photon interactions, 3,000-1,100Å spectral range, u.v. cross sections obs. 8=43315
- K_2ReBr_6, mag. ordering from n. diffr. exam. 8=40870
- K_2ReCl_6, mag. ordering from n. diffr. exam. 8=40870
- KSCN, crystal structure refinement from redetermined data 8=44222
- KSCN, melting and polymorphism to 44 kbar 8=48385
- K_2SnCl_6:Pt, luminesc. 8=36505
- $KSnF_3 . \frac{1}{2}H_2O$ crystal structure 8=39798
- $KSr_2Nb_5O_{15}-LaNb_3O_5$ system, ferroelectric props. 8=40611
- $KTa_{0.65}Nb_{0.35}O_3$, lamellae origin 8=48519
- $KTaO_3$, absorpt. edge, elect. field depend 8=32004
- $KTaO_3$, ferroelectric phase transitions, lattice-dynamical theory, elastic and dielectric anomalies 8=27284
- $KTaO_3$, i. r. and Raman spectra 8=27599
- $KTaO_3$, nuclear spin-acoustic phonon interaction 8=45126
- $KTaO_3$, thermal conductivity temp. and field dependence rel. to Cochran modes 8=26605
- KVO_3, V^{51} quardupole coupling tensor 8=31923
- $KY(MoO_4)_2$, structure from growth forms and x-ray diffraction 8=48655
- $KY(WO_4)_2$, crystal structure 8=39797
- $KZnF_3$, i. r. transmission spectra 8=27600

potassium bromide

- breakdown, laser-induced 8=40566
- Bremstrahlung passage, energy losses rel. to beam collimation and crystal thickness 8=31310
- conductivity, elec., ionic, in pure and doped mats. 8=27248
- crystals in organic liquids, interfacial energy calcs. rel. to abrasive wear and adhesion 8=30724
- diffusion of Br, rel. to dislocations and grain boundaries, by isotopic exchange 8=35497
- dislocation motion, velocity temp. and shear-stress dependence 8=26681
- dislocation multiplication 8=26686
- dislocation pinning by lattice defects 8=26680
- electric field grad. at nuclei near substitutional ion, n.m.r. meas. 8=36273
- electric field gradients at nuclei surrounding different subst. halogen ions, n.m.r. meas. 8=48314
- electrical conduction in impure crystals rel. to vacancy migrations 8=40576
- electrolytic colouration, influence of dislocations 8=44469
- electron avalanche, breakdown obs. 8=31421
- electron avalanche, mobility and lifetime obs. 8=31269
- energy loss spectrum, excitons 8=44659
- excitons, longit and transverse, optical absorpt. 8=41107
- F-aggregate bands, optical and thermal stability, half-widths and oscillator strengths 8=49732
- luminescence M-centre 8=41199
- mean inner potential calc. method 8=30629
- mean inner pot. meas. by electron diffr. 8=30628
- neutron-irrad., diffusion and release of Ar gas 8=35498
- optical consts. from energy loss meas. 8=32003
- orientation dependence of fast protons energy loss 8=35602
- plastically deformed, F-centre thermal stability rel. to dislocation density 8=35586
- refractive index and transmittance from asymmetric interferograms, 20-400 cm^{-1} 8=28844
- Schottky defect formation energy, from dissolution of impurity containing precipitates 8=35536
- thermoluminescence, photostimulated, 50-250°K 240-700 mμ 8=27652
- ultrasonic vibrations, generation and reception 8=35988
- volume exansion by $U \rightarrow F$ and $U \rightarrow \alpha$ transforms., photoelastic meas. 8=26826
- X-irradiated, Frenkel defect formation at 8°K 8=40005
- X-ray thermal diffuse scattering by transverse lattice waves 8=44221
- Br nuclei surrounding substitutional Cl ion, field gradient obs. by n. m. r. 8=26403
- KBr:Ag, Greek absorpt. bands 8=36323
- KBr(I), F-centre form. by u.v. irrad. 8=44479
- KBr: In, Zeeman effect of A absorption bands 8=45200
- KBr-KCl solid solutions, luminesc., intrinsic, induced by X-ray 8=41198
- KBr:Li^+, far i. r. props. of lattice resonant modes rel. to isotope shifts 8=36393
- KBr: Li, resonance shift broadening by internal strains on alloying KCl and KI 8=27480
- KBr:Li^+, u.s. velocity and attenuation, temp. and stress dependence, 1.6–77°K 8=35417
- KBr:OH^-, OD^-, dielectric relaxation 8=49344
- KBr:$SrCl_2$, polarisation effects by thermal depolarisation method 8=27245
- KBr: Tl, recomb. luminesc. and F scintillations 8=36493
- KBr:Tl, (In), mono- and di-molecular recombination in luminescence, elec. field 8=45276
- KCl-KBr solid solns., p-irradiated, F-centre generation comp. dependence 8=31117
- KI:Tl, (In), mono- and di-molecular recombination in luminescence, elec. field 8=45276
- KOD doped, dielec. relax. 8=27247
- KOH doped, dielec. relax. 8=27247

potassium chloride

- acoustic emission, rel. to microscopic deform. model 8=26582
- angular correlation functions for OH^- and OD^- 8=43968
- breakdown, laser-induced 8=40566
- Bremstrahlung passage, energy losses rel. to beam collimation and crystal thickness 8=31310
- cationic vacancy displacement during coloration on divalent impurity addition, from conductivity meas. 8=35535
- charge flow during plastic deform., rel. to motion of dislocations 8=35961
- colloidal centres, optical, e.s.r. and elec. exam. 8=44477
- colourability, deformation effects, room temp. 8=31119
- coloured additively, photochemical reaction and photoconductivity, at low temp. 8=31457
- coloured, deformed, photoconduction rel. to dislocation–colour centre interaction 8=44928

Potassium compounds—contd
potassium chloride—contd
compressibility isothermal, meas. by capacitance method 8=49031
conductivity, elec., ionic, in pure and doped mats. 8=27248
crystal growth technique for 10^{-9} mol/mol purity 8=39665
crystals in organic liquids, interfacial energy calcs. rel. to abrasive wear and adhesion 8=30724
crystal polarization by voltage pulses, 100°–350°C 8=40580
crystal structure and mech. and optical props. growth conditions and impurity effects 8=26401
crystallization from acqueous solution, calorimetric study 8=44132
defect interactions in cryst. 8=26633
density changes on γ-irradiation 8=40129
deposition of Au and Ag films, crystal orientation 8=44085
diffusion of Bi ions in cryst. 8=48781
dipped-cathode arc light source for spectroscopy 8=28840
diffusion of protons in aq. soln. 8=48115
dislocation mobility and microhardness dependence on F-centre density 8=26690
dislocation motion, velocity temp. and shear-stress dependence 8=26681
dislocation multiplication 8=26686
dislocation pinning by lattice defects 8=26680
dislocation structure formation by plastic deformation 8=31080
doped crystals, reaction, with H_2 rel. to dislocation decoration mechanism 8=31081
elastic coupling of O_2 centre 8=48337
elect. cond. Teltow 4-defect theory examined 8=27225
electrical conduction in impure crystals rel. to vacancy migrations 8=40576
electron emission due to bombardment with inert gas ions 8=40686
electronic spectra 8=26909
excitons, electronic structure 8=40264
excitons, longit and transverse, optical absorpt. 8=41107
exoelectron emission, photostimulated, external elec. field effects, obs. 8=36041
F-aggregate centres, optical, e.s.r. and elec. exam. 8=44478
F-centres, endor of 8=36272
F centres, simultaneous production and bleaching 8=26720
F_R colour centre 8=26717
film, reflection and absorpt. spectra in u.v. 8=32025
fracture surface as function of crystallographic direction and treatment method 8=44593
grain boundary mobility, meas. technique 8=40052
hardening by F_A centres 8=44583
hardening by n- and γ-irradiation from critical shear stress analysis 8=49037
impure crystals, refractive index and electro-optical effect 8=32005
inert gas depth distrib., sputtering obs. 8=48923
i. r. spectra, temp. dependence, ionic conductivity 8=36381
L bands, absorpt. cross-section for transition from F-center ground state 8=48877
luminescence, M-centre 8=41199
luminescence, X-irradiated crystals under mehcanical impact 8=36491
melted, with unsaturated K solns. thermodynamics 8=48060
neutron-irrad., diffusion and release of Ar gas 8=35498
photostimulated electron exoemission on excitation by electron irradiation 8=40708
plastically deformed, F-centre thermal stability rel. to dislocation density 8=35586
polarisation effects by thermal depolarisation method 8=27245
proton energy loss crystal orientation dependence rel. to lattice effects 8=35598
R-centre transitions from mag. circular dichroism 8=48874
radiation-induced macrodefects 8=26711
r.f. spectra by elec-resonance method, rel. to struct of mol. 8=43316
refractive index and absorpt., far u. v. obs. 8=27592
Schottky defect formation energy, from dissolution of impurity containing precipitates 8=35536
secondary electron emission from porous layers, influence of applied fields 8=36057
solutions in H_2O-alcohol, elec. cond. at high press. 8=39407
spiral patterns and closed loops on etched cleavage faces 8=48525
thermal annealing, Frenkel defect recombination 8=40166
ultrasonic vibrations, generation and reception 8=35988
water evolution on heating in vacuum 8=41263
whiskers, X-irradiated, F-centre accumulation 8=35585
X-irradiated, Frenkel defect formation at 8°K 8=40005
X-irradiated, i.r. absorpt. spectra 8=41104
X-ray scatt. rel. to dislocation density and distrib. 8=45198
CN^- doped, u. s. vel. and absorpt. 8=44316
Cl^- channeling, computer analysis 8=40075
Eu^{2+} doped, optical absorption 8=36379
K^+ channeling, computer analysis 8=40075
KCl: Ag^+, transitions, electronic, of impurities, symm. assignment by two-photon-induced emission 8=36494
KCl: Ba^{2+}, dislocation velocity stress-dependence and yield pt. rel. to Ba^{2+} impurity effect 8=31079
KCl: Cd, uncoloured and coloured, optical, elec. and e.s.r. exam., 8=48876
KCl: $Cu^°$, e.p.r. spectrum, temp. depend. 8=45088
KCl: Cu^+, Ag^+, impurity ion distrib. coeff. on crystallization from melt 8=39674
KCl: Eu, vacancies and dislocations rel. to dopant conc. 8=40001
KCl: H^- interstitial ion, electron-excess colour centre polaron model appl. to U, centre 8=40061
KCl : HF_2^-, broadening of i.r. peak 8=49733
KCl(I), F-centre form. and ICl^- V_K centre due to u.v . irrad. 8=44479
KCl: I, ICl^- V_K centre, optical and e.s.r. exam., 8=48875
KCl: I, luminescence from ICl^-V_K-centre-electron recombination and localized exciton decay 8=27651
KCl: In, F-scintillations, luminesc. kinetics 8=36492
KCl: In, Zeeman effect of A absorption bands 8=45200
KCl-KBr solid solns., p-irradiated, F-centre generation comp. dependence 8=31117
KCl–KBr with Pb admixture, absorption spectra and fluorescence 8=49735
KCl-KI solid solns., decomposition effects on spectral characts. 8=36395
KCl–KI solid solutions, optical absorption 8=49736
KCl: Li, impurity-phonon interactions exam. by sp. ht. meas., rel. to tunneling phenomena 8=44628
KCl: Li, u. s. velocity and attenuation, temp. and stress dependence, 1.6–77°K 8=35417
KCl: LiCl, paraelectric resonance 8=40548
KCl-LiCl, KCl-NaCl, and KCl-KBr, fused mixtures, elect. conductivity and ion conduction activation energy 8=3051
KCl: Li^+, Cu^+, n. q. r. shifts of off-centre ions 8=45136
KCl/NaCl aq. soln., heat of mixing 8=32989
KCl: OH, acoustical paraelec. resonance 8=27246
KCl: OH, dipole interaction through phonon field 8=40577
KCl: Pb, light scattering temp. dependence, 128–298°K 8=45207
KCl: Pb(Ca), impurity ion effect on crystal structure 8=26642
KCl: Pb, F-scintillations, luminesc. kinetics 8=36492
KCl and RbCl, mixed, coloured, L_1 band forbidden transition 8=31118
KCl-RbCl mixed cryst., diff. coeffs. 8=39975
KCl:RbCl, L_1 absorpt. band, new Mollwo-Ivey law 8=36375
KCl: Tl, recomb. luminesc. and F scintillations 8=36493
KCl: Tl, two-e correlation in impurity centres in model pot. approx. 8=32049
KCl : Sr, Z_2 centre, photocond. 8=44929
Li^+ doped, u. s. vel. and absorpt. 8=44316
Na^+ channeling. computer analysis 8=40075
NaCl-KCl, solid solns., decomposition effects on spectral characts. 8=36395
O_2^- and OH^- centres, appl. of point defect theory 8=48800
OH doped, paraelectric resonance characts. 8=49345
Potential energy, gaseous molecules. See Molecules/intermolecular mechanics.
Potential energy, single molecules. See Molecules/internal mechanics; Molecules/vibration.
Potentiometers. See Electrical measurement.
Powder diffraction cameras. See X-ray crystallography/apparatus.
Powder metallurgy. See Metallurgy; Sintering.
Powders
See also Granular structure; Particle size; Sintering; Surface measurement.
in aqueous soln., grain enlargement rel. to crystal production 8=39655
austenite, electrolytic, absence of martensitic transforms. 8=35103
corundum bed, fluidized by vibs. or gas flow, comparison of heat transfer coeffs. 8=39448
dielectric behaviour and struct. of boundaries in highly compressed crystalline powders 8=49325
diffusion parameters in mixture model 8=35472
ferric oxide, influence on ferrite synthesis 8=45035
ferromagnetic, susceptibility calcs. in weak field, model 8=40800
filling particles, form factors meas. rel. to charact. size of each particle 8=39533
fluidized beds, radiative heat transfer with immersed body 8=39456
glass, compression under 10-65 kbar pressure, rel. to optical and mechanical props. 8=40164
grading rel. to dispersion and compactness by means of diffracted intensity 8=43985
grain size determ. from X-ray scatt. intensity 8=30843
of ice spheres, rate of decrease of surface area, rel. to plastic flow 8=35073
i.r. transmission spectroscopy samples, prep. 8=42239
luminescent, deposition by electrophoresis 8=45388
metal compacts, pressure distrib. meas. 8=48950
metallic, echo phenomenon 8=27448
mischmetal-Co alloy, coercivity milling dependence 8=31597
mixture, analysis by photosensitive transformer bridge 8=43984

Powders—contd
mixtures, diffuse reflectance spectrophotometric analysis 8=36636
permittivity calc. for determ. of dielec. constant of crystallites in powder 8=49324
quartz sand, differential thermal analysis, particle size effects 8=26044
radio activity meas. when insoluble in liquid scintillator counter 8=47278
Raman effect, stimulated, observations 8=49684
Raman spectra, laser 8=49685
reactor bed of coated fuel particles, thermal cond. 8=47410
reflectivity meas., Perkin-Elmer attachment 8=28824
Reststrahlen filter, low temp. props. in far i.r. region 8=42197
shear strength, split-ring annular cell meas. 8=35611
sieve, micromesh, u.s. appl. 8=35066
spectrochemical anal., d. c. arc fusion method 8=32154
steel, 18/8 stainless, corrosion and powder formation 8=43983
stilbene, Raman line intensities and dispersion effects elimination, obs. 8=36445
ultramicrotomed, X-ray peak profiles rel. to deformation structures 8=48585
X-ray fluoresc. anal. 8= 32163
X-ray fluoresc. anal., grain size effect 8=45419
Al, nuclear spin-lattice relax. times rel. to press. 8=45110
Al_2O_3, ortho-positronium form. and annihilation 8=49130
B, non-cryst., atomic radial distrib. function, from X-ray diff. studies 8=26043
C, elec. discharge sintering and graphitization 8=30667
Cr_2O_3, Néel temp. depend. on particle size 8=40861
Fe-Co alloy, mag. permeability meas. at 400-40 000 Mc 8=40810
Fe_2O_3, compacts, shrinkage in range 800-1000°C, effect of additives 8=35067
LiF, ground, microstrain and crystallite size determ. from X-ray diffr. line-broadening profile analysis 8=48600
MgO, ortho-positronium form. and annihilation 8=49130
Pd, oxidation 8=41260
SiO_2, ortho-positronium form. and annihilation 8=49130
WC and WC-Co mixed, sintering, effect of 15-45 kbar pressure 8=39536
ZnO, thermoluminesc. spectrum 8=32065
ZnS phosphor, electroluminescence enhancement using resin binders 8=41217
ZnS-type, a.c. electroluminesc 8=36521

Praseodymium
monochalcogenides, antiferromag props., 4-1300°K 8=31761
Pr V, ionization energy calc. and 12 lines, 840-2250 Å obs. 8=47504
Pr^{3+}, absorpt. spectrum and energy levels in hydrated crysts. 8=45215
Pr^{3+} in double nitrates, mag. resonance line shapes 8=31881
Pr^{3+}: $LaCl_3$, i. r. quantum counters, improved sensitivity 8=32940
Pr^{3+} in LaF_3, spontaneous emission probabilities for excited states 8=49805

Praseodymium compounds
Pr-alkali metal tungstates, hydrothermal synthesis and morphology 8=26259
$PrCl_3$, Cl^{35} NQR line splitting below 0. 4°K rel. to anti-ferromagnetic structure 8=36283
$PrFeO_3$-$BiFeO_3$ system, structural transitions rel. to ferroelec. and mag. props. 8=26064
$Pr_2W_2O_9$, structure and hydrothermal synthesis, obs. 8=39636
$PrWO_4Cl$, hydrothermal synthesis and struct., obs. 8=39815

Precipitation
See also Atmosphere/precipitation.
ageing stress- and strain-, terminology 8=31162
in alloys, shape changes by diffusion in dislocation stress field 8=26649
cellular, boundary diffusion limited, anal. of kinetics 8=48533
coherency loss of growing precipitates by prismatic punching of dislocation loops 8=26651
hailstones, artificial, external and internal struct. 8=35228
hardening by coherent particles, review 8=48980
hardening, diffusion in stress field dislocation 8=39537
mangesioferrite, from MgO:Fe solid soln., and coarsening 8=44007
nucleation in condensed phases, linked flux analysis 8=30570
powder-grain enlargement in aqueous soln. 8=39655
semi-coherent precipitates, interfacial structure, electron microscope investigation 8=26656
steel E 1702, of γ^1-phase, mechanism rel. to holding time effects at diff. quenching temps. 8=35108
steel, EI 702, η-phase, mechanism 8=44008
steels, Fe-C and Fe-Ni-C, in hardening rel. to martensite strength 8=26815
thoria, arc-melted, e-microscope obs. 8=30867
vacancies assoc. with pre-precips. 8=31033-4
Al-base Cu, neutron irrad. 8=48379

Precipitation—contd
Al-25 wt. % Zn alloy, effect of quenching conditions 8=26058
Al-Ag alloys, continuous, influence on growth kinetics of cellular reaction 8=39540
Al-Cu alloy, grain boundary precip. 8=26708
Al-Cu-Cd alloys, θ'-precip., vacancy cluster mechanism 8=35085
AlF_3 layer formation on quartz: Al impurity during 3½ yrs. ageing after HF treatment 8=49900
Al-Fe alloy of Fe, Mossbauer study 8=30678
in Al-Fe alloys, morphology and kinetics 8=30677
rel. to Al-0. 04 wt % Fe recryst. and recovery, Fe precip., obs. 8=39664
in Al-Fe-Si alloys, morphology and kinetics 8=30677
in Al:(Fe, Si) sheet, influence on texture formation during final anneal 8=35267
Al-Ge solid solns., and stacking faults 8=31096
Al-Zn-Mg alloy 8=35087
$CaCl_2$ in NaCl 8=48390
CdS : Au, after annealing 8=48375
CdS : Cu, after annealing 8=48375
in Cr, of Cr_2N, effects on brittle-ductile transition temp. 8=44561
Cr-Mo-Co steel, of R-phase, structure and comp. anslysis 8=44001
of Cu in Si, kinetics, near room temp. 8=30705
Cu 1. 79 wt. % Be, discontinuous of γ-phase, orientation 8=43997
Fe, commercial, mechanism, and nature of decomposition products in age hardening 8=40155
FeC_x in carbon steel, particle coarsening at 720°C and 675°C 8=30691
$Fe(OH)_3$, adsorpt. and coprecipitation of Ag 8=48478
KH_2PO_4, precipitates and dislocations exam. by X-ray diffr. microscopy 8=26691
Li, in Si, nucleation and growth 8=44105
in Mo-Fe(8wt. %) alloy, of Mo_6Fe_7 lamellae, and Fe-rich soln at lower temp. 8=35115
Mo-Mn steel, of R-phase, structure and comp. analysis 8=44001
$(NH_4)H_2PO_4$, precipitates and dislocations exam. by X-ray diffr. microscopy 8=26691
Nb-O-N supersaturated solid solns., of oxides and nitrides in annealing, obs. 8=30831
Ni-Al alloys, γ' precip. coarsening 8=35120
Ni 25%-Cr 20%-Nb 0. 7% stainless steel, precips. comp., obs. 8=30805
Si crystals with oxygen and carbon impurities, of SiO_2 and SiC on ht. treatment 8=39702
Si, of B after max. solubility determ. 8=48345
Si-O solid soln, rel. to periodicity changes and anomalous X-ray transmission 8=36409
SiO_2 into $H_2Si_2O_5$ for chem. analysis of glass 8=45413
SiP, on high-conc. P diffusion in Si 8=39983
SnSb in Pb rich alloy of Pb-Sn-Sb ternary system, rel. to aging 8=26764
δ-Su_9In_4, equilib. phase inCu-16. 8% In alloy formed on precip. 8=39548
Ti-22 at. % Nb/Cu composite conductors, of ω particles rel. to critical current densities 8=40419
UO_2-Al_2O_3, grain growth in presence of liq. phase 8=44014
in US crystals, e-microscope exam. 8=35286
V carbides, during $\gamma \rightarrow \alpha$ transform. of austenite in steel 2062 8=35135
ZnS, effect of conditions on particle size and morphology 8=48565
ZrB_2, of second phase particles, struct. and orientation 8=35136
ZrH in Zircalloy-2 and -4, habit planes, obs. 8=44098

Pressure
See also Atmospheric pressure and density; High-pressure phenomena and effects; Radiation pressure; Vapour pressure.
alloys spin density wave to antiferromagnetic transitions pressure effect 8=31767
distribution on cone-cylinders in hypersonic flow 8=34631
drop, in viscous liquid, by sphere setting, Reynold's no. 0. 2 to 21, 000 8=39263
gas, fissioning, pressure wave generation, method of characteristics analysis 8=39170
gas fluidized beds, fluctuations 8=48230
gases, meas. with Mcleod gauge 8=39248
mechanical, rel. to production of imperfections 8=26658
residual gases, partial press. for various means of pumping 8=39242
In N, liq., decreasing effect on bubble growth 8=34738

Pressure measurement
See also Manometers; Vacuum gauges; Vapour pressure measurement.
α-ray gauge for high altitude balloons 8=45964
ballastless diaphragm differential gauge 8=45966
Bayard-Alpert vacuum gauge modification 8=39252
control device for high-vacuum apparatus 8=48004
differential, strain-gauge transducer 8=32642
dual-range mercury/oil manometer 8=28224
dynamic, in gas reaction 8=45319

Pressure measurement—contd
- fluids, at solid boundary, instrument 8=30197
- gas discharge, spectral methods 8=38980
- gas, strain-gauge transducer, control unit 8=28223
- gases, condensible and non condensible with Mcleod gauge 8=39248
- high press., by spectral shift of Ni dimethylglyoxime 8=50477
- high-press., capacitance and resist. piezometers 8=39401
- improvement and development in U. S. S. R. 8=45962
- indicator, differential, calibration technique 8=32645
- ionization gauge, readout system 8=43712
- liquid metals, by automatic manometer 8=48011
- liquid sample holder for n. m. r. 8=34917
- metal powder compacts, distrib. meas. 8=48950
- ocean submerged structure, rising, wall press. vars. in boundary layer 8=45432
- oscillations, dynamic charact. of transducers connecting channels 8=45963
- piezoelectric gauge, miniature, for time dependence of shock waves 8=46174
- of plasma, by piezoelect. probe 8=30096
- plasma, neutral gas, in mag. field var. direction and magnitude, manometer 8=43548
- rapidly changing, method 8=45965
- sealed electrochem. cells, internal press. 8=33035
- thermocouple manometric transducers, thermal rating 8=45961
- transducer for liquid (gas) 8=48012
- transducer for turbulence hydrodynamics 8=28226
- turbulence, wall pressure, orifice hot-wire probe 8=28225
- ultra-high vacuum prod. and meas. 8=39256
- He liquid, transducer for vel. meas. 8=32995
- He^3, expt. thermomolecular press. ratio down to 0.3°K 8=28438
- He^4, var. with temp. 8=37354

Prisms, optical
- coplanar mirror prisms, wedge error and zero error, approx. formulae 8=42151
- dove and right angle, making and testing 8=42235
- Iceland spar 8=42160
- laser, solid, with Kerr cell shutter, appl. 8=24285
- line-scanner for high-speed thermography 8=37322
- polarimeters for use with lasers 8=33158
- polarizing, cutting, rational utilization of geometry of Iceland spar crystals 8=42159
- reflecting, tetrahedral, wedge error and deflection error 8=24362
- ruby laser, speed of Q-switching 8=24332
- for spectra-Fabry-Perot, linear transformation, viewer 8=28834
- spectrometers, calibration with echelle grating 8=33267
- symmetrically crossed half-prisms in autocollimation, parallel-ray tracing 8=42154
- transfer coeffs. in prism system 8=42176

Probability
- See also Random processes; Statistical analysis.

$\bar{p}p \to \bar{n}n$, 50-180 MeV, ang. distrib. obs. for 215 events 8=24942
quark model rel. to discrepancy in h.f.s. of H 8=33743
radio sources, compact, synchrotron emission 8=45756
spectator p study in $\pi^+d \to \pi^+\pi^-\pi^\circ pp$ at 3.65 BeV/c 8=42529
absorption
quality factor in water phantom, depth distrib. 8=33758
angular distribution
asymmetry from reaction $Ca^{40}(d, p)Ca^{41}$ with polarized d 8=29507
cyclotron meas., accidental coincidence background reduction 8=29005
organic scintillator for fast n detect. 8=24979
$C^{12}(e, e'p)$ rel. to p momentum distrib., obs. 8=29413
$Ca^{40}(d, p\gamma)Ca^{41}$, angular correl. 8=29303
$Ca^{40}(n, p)K^{40}$, spectra obs. 8=25243
$O^{16}(\gamma, p_0)N^{15}$, giant resonance obs. 8=29403
$Pu^{239}(d, pf)$, ang. correl. obs. 8=43070
detection, measurement
accelerator, energy meas. 300-2050 keV by n.m.r. 8=33430
aurora, moderate storm, >50 keV rocket obs. 8=32283
delayed protons, counter telescope and transmission detector 8=38414
energy estimation from ionization meas. in nuclear emulsions 8=47114
monitor reactions, effect of thick targets 8=25221
nuclear emulsion track meas., photographic scanning 8=46981
$\bar{p}$ beam purity meas. using δ-ray spectrum 8=47138
range-energy spectrometer for 6-100MeV p 8=50245
satellite spectrometers for 100keV-6MeV p 8=50244
semiconductor detector telescope for satellite, calibration 8=28025
from stripping reactions 8=29494
telescope, meas. from fast n-reaction 8=29456
rel. to ultra-n deficient nuclei identification 8=38424
Al^{27} (p, 3pn) Na^{24}, p flux monitoring, influence of secondary particles 8=33994
CsI(Tl) scintillator for low energy 8=46877
Ge(Li) detector, with side entry geometry 8=46910
Si diode dosimetry 8=38064
Si: Li detector response 8=38103

Protons and antiprotons—contd
effects
alloys, strained, on work function 8=44938
channeling, angular limit to classical description 8=31134
channelled, as probe to generate charact. X-rays rel. to impurity atoms location in cryst. matrix 8=40009
channelling through crystals 8=31137
diamond bombardment, chem. reactions 8=45406
d(p, n)2p, polarization transfer calc., Ep = 30–150 MeV 8=38101
energy loss in KBr, orientation dependence 8=35602
fast, (6.3 MeV), penetration in solid, theory 8=31133
metal foils, rel. to diffusion-out of rare earth impurities on heating in vacuum, 1500-2800°C 8=40081
secondary particles, ang. and momentum distrib., in reactions $p + \text{nucleus} \to p + \pi^+ + \pi^- + \text{nucleus}$, 20–23 GeV 8=47314
structure determs. by protonography 8=26363
10 MeV, on natural targets, 12 isomers obs. 8=47214
Ag films, on resistance, –13 to –158°C 8=40302
Ag, stopping power for 3.75–5.5 MeV p, using (p, n) obs. 8=43030
Al, blistering on 10-200 KeV irradiation 8=40070
Be^7 fragments from irrad. Ta, Pb, U, obs. 8=43115
Cd, stopping power, for 3.75–5.5 MeV, p, using (p, n) obs. 8=43030
Cu, strained, on work function 8=44938
$F^{19}(p, \alpha\gamma)O^{16}$ reaction, proton channelling rel. to γ-ray yield 8=29448
He, e ejectron cross sections calc. 8=34452
He–CO_2 mixture, energy loss freq. distrib. of 43.7 MeV protons 8=29663
In, stoppping power, for 3.75–5.5 MeV p, using (p. n) obs. 8=43030
K vapour, charge exchange, E_0 =2.5-22 keV 8=38761
KBr, fast protons energy loss, orientation dependence 8=35602
in KCl, energy loss orientation dependence rel. to lattice effects 8=35598
KCl-KBr solid solns., F-centre generation rel. to comp. dependence 8=31117
N_2 bombard, Ep=0.56-1.7 keV, spectrum obs. 8=43322
$Na^{22,24}$ fragments from irrad. Ta, Pb, U, obs. 8=43115
Na^{24} from irrad. noble metal and U targets 8=43116
in NaCl, energy loss orientation dependence rel. to lattice effects 8=35598
NaF crystals, R_N and N centre formation at liq. N_2 temp. 8=48883
Ne^{24} from irrad. noble metal and U targets 8=43116
Ni films, at 850 keV on mag. props. 8=36168
Pt, 1.5 in., K_α° and γ prod. 8=33709
Si solar cell damage thermal annealing, 4.6 MeV 8=24101
Si spectrometers, Li drifted and surface barrier, 2.3 MeV 8=28984
Si surface barrier detector damage 8=46897
Si surface-barrier detectors, effects of damage by 0.8-5.0 MeV protons 8=46918
Sn, stopping power for 3.75–5.5 MeV p, using (p. n) obs. 8=43030
interactions
See also Nuclear reactions due to/protons.
annihilation, multineutral state production 8=24944
emulsion nuclei, 5 GeV/c $\bar{p}$, fragment emission, fireball model 8=38065
$e + p \to e^1 + \rho^\circ + p^1 \to \pi^+ + \pi^-$, analysis for ρ° prod. 8=24859
$e^- p \to e^- n\pi^+$, pion form factor evaluation 8=37966
γp in H, ϕ and ρ° prod. cross sections, 15 GeV 8=33724
γp, multipion prod., η°, N^{*++} ρ^- and ω° resonances 8=33669
$\gamma + p \to n + \pi^+$, 500-800 MeV cross section obs. 8=24776
$\gamma + p \to \pi^\circ + p$, recoil p polarization, γ_E = 240–420 MeV 8=33756
$\gamma + p \to \pi^+ + n$, vector meson dominance analysis 8=24787
$\gamma + p \to \pi^+ + n$, E_γ = 165-230 MeV, differential cross-section obs. 8=29126
$\gamma + p \to \pi^+ + n$, n polarization obs. 8=24965
$\gamma p \to \pi\rho n$, 4, 8 GeV/c, comparison with $\pi^- p \to \rho^0 n$ in Vector dominance models 8=37972
Kp with Δ(1238) prod., π trajectory Regge pole analysis 8=29217
K^-, Λ° production, 6 GeV/c 8=38087
K^- p, K*(890)(1420), prod. obs. comparison with Regge pole model 8=33732
K^-p, Λ prod. cross-section, 10 GeV/c 8=33834
K^- p at 1.33 GeV/c, 2-body final states 8=42588
K^-p, 1.7-2.7 BeV/c, Ξ^-, Ξ^* prod., spin and decay parameters 8=24997
K^-p, 5.5 GeV/c, Ω^- prod. obs. 8=29213
K^- p, 6 GeV/c, cross-sections obs., density-matrix elements estimate 8=33705
$K^- p \to \gamma\Lambda$, rel. to isospin props. of e. m. interactions, predictions of quark model 8=37916
$K^- p \to \bar{K}N\pi$, 1.33 GeV/c, $\bar{K}^*(890)N$, $N^*(1236)\bar{K}$ and $Y_0^*(1520)\pi$ prod. 8=33706
K^+ p, 5.5 GeV/c, K(13)) prod. 8=38024
K^+ p at 9 BeV/c, hyperon prod. 8=24991
K^+ p, S = 2 boson resonance in mass region 1.0-3.1 GeV search 8=38045

Protons and antiprotons—contd
interactions—contd
$K^+p \rightarrow K^+\pi^+n$, double peripheral model 8=29156
Λ-p, low energy obs. 8=33838
meson-proton coherent prod. and deck effect best with deuterium 8=24911
np, 14-27 GeV/c, total cross-section and Glauber screening protection 8=29196
in nuclear emulsion, with d and t prod., 6.2 and 28 GeV/c 8=38099
photoproduction of η, theoretical cross section 8=24838
photoproduction of K, π, Regge-pole model 8=29124
photoprod. of π°, 500-1000 MeV, p polarization obs. 8=29189
photoprod. of π° on p, 500-1000 MeV, p polarization obs. 8=29189
photoproduction of π°, η°, 6-17.8 GeV 8=42523
photoproduction of π^+, absorptive correction, 2 ~ 4 GeV 8=37971
photoproduction of π^+, conspiracy test 8=24774
Photoprod of π, calc. of Δ(1236) partial-wave amplitude 8=33840
photoproduction of π on Λ , superconvergent sum rule 8=42512
π electroprod, radiative corrections obs. 8=24775
$\bar{p}$-nuclei, ^{8}Be emission cross-section; 5 GeV/c 8=47132
p-n final state interacts. in d(p, 2p)n and p(d, 2p)n reactions 8=24902
$p + n \rightarrow \Delta^{++} + \Delta^-$, exchange mechanism 8=24917
$\bar{p} + n \rightarrow W^- \rightarrow e + \bar{\nu}_e$, form factors and polarization 8=42642
pN, Ep = 20 GeV, secondary asymmetric separation obs. 8=29186
$\bar{p}$N annihilation, multiple particle prod., unitary-symmetrical statistical model 8=33546
$\bar{p}$-N interactions in photo-emulsions, obs. 8=42641
polarized, as nuclear probes 8=47313
πp, multipion prod., 4-11 GeV/c statistical model 8=33672
πp with Δ(1238) prod., π trajectory Regge-pole analysis 8=29217
$\pi p \rightarrow \rho N^*$, energy- and momentum-transfer dependence of cross-sections 8=37981
$\pi^- p$, A_2(1300) region structure, 6 GeV/c 8=38035
$\pi^- p \rightarrow \eta n$, polarization and F/D coupling of N_ν
$\pi^- p \rightarrow \eta^\circ n$, 10 GeV/c obs. 8=29160
$\pi^- p \rightarrow \gamma n$, $N^{*\circ}$ e.m. couplings determ. 8=37916
$\pi^- p \rightarrow K_1^\circ K_1^\circ n$, 4 and 5 GeV/c obs. 8=42537
$\pi^- p \rightarrow n$ + missing mass, 2.12 GeV/c particle mass determ. 8=38032
$\pi^- + p \rightarrow N^* + \pi^+$ PCAC constraint 8=33678
$\pi^- p \rightarrow \pi^- p\eta^\circ, A_2^-$ obs., 5 GeV/c 8=38036
$\pi^- p, \rightarrow \pi^\circ K^+ \Sigma^-$, Argand diagrams bootstrap theories and Regge poles comparison 8=42443
$\pi^- p \rightarrow \pi^\circ n$, 2 to 5 GeV, polarization data interpretation using interf. model 8=24791
$\pi^- p \rightarrow \pi^\circ n$, Regge-pole model with absorptive corrections 8=42536
$\pi^- p \rightarrow \pi^\circ \pi^\circ n$, data about s-wave ππ scatt. 8=42541
$\pi^- p \rightarrow \pi^+\pi^- n$, E = 360, 430 MeV, isobar amplitude determ. 8=29134
$\pi^- + p \rightarrow \phi + n$ followed by $\phi \rightarrow e^+e^-$, partial width obs. 8=33722
$\pi^- p \rightarrow p(\pi^-\pi^-\pi^+), p\pi^\circ(\pi^-\pi^-\pi^+), n\pi^+(\pi^-\pi^-\pi^+)$, 5 BeV/c, mass spectrum of $\pi^-\pi^-\pi^+$ 8=37977
$\pi^- p \rightarrow p + MM^-$, differential cross section rel. to momentum transfer, 11.5 GeV/c 8=37976
$\pi^- p \rightarrow p\rho^-\rho^\circ$, 8 GeV/c, evidence for new meson resonance in $\rho^-\rho^\circ$ enhancement 8=38023
$\pi p \rightarrow \rho^- p$, 4 GeV/c, absorpt. model with one-pion-exchange 8=47110
$\pi^- p \rightarrow \rho^\circ n$, 4 and 8 GeV/c comparison with $\gamma p \rightarrow \pi^+ n$, Vector dominance model 8=37972
$\pi^- + p \rightarrow \rho^\circ + n$, vector meson dominance analysis 8=24787
π° photoprod. below 234MeV multipole analysis 8=24777
$\pi^\circ p \rightarrow \pi^\circ \Delta^{++}$(1238) Regge-pole model with absorptive corrections 8=42536
$\pi^+ p$ at 850 MeV/c, cross section obs. 8=24792
$\pi^+ p \rightarrow K^+ \Sigma^+$, parity determ. of KΣN 8=24995
$\pi^- p \rightarrow \pi^+\pi^-\pi^0\Delta^{++}$, 3-4 GeV/c obs., H enhancement, kinematic origin 8=37978
$\pi^+ p \rightarrow \pi^+ pp\bar{p}$, 8.4 BeV/c, resonance parameters of N isobar 8=24789
$\pi^+ + p \rightarrow \Sigma^- + K^+$ 1145 MeV/c, Σ^- polarization determ. 8=24996
production of ρ^0, ang. distrib. obs. 8=37914
p-T, review, spin-orbit effect negligible 8=29222
secondary particles, ang. and momentum distrib., in reactions $p + \text{nucleus} \rightarrow p + \pi^+ + \pi^- + \text{nucleus}$, 20-23 GeV 8=47314
T[p, p(γ)(n)]T, He^4, He^3, diff. cross section extrema due to excited state of He^4, Feymann diag. 8=24914
$\Sigma^- p$ capture $\Sigma^\circ n/\Lambda^\circ n$ ratio and $\Sigma^- - \Lambda^\circ$ mass difference 8=38092
Σ^--p, low energy obs. 8=33838
Σ^+-p, low energy obs. 8=33838
He^3 photodisint., two-body, calc. 8=25018
O_2, excitation by 0.15-1.0 MeV p 8=38847

Protons and antiprotons—contd
interactions, proton—proton
bremsstrahlung cross-sections using separable nuclear interact. 8=24899
bremsstrahlung emitted at 61.8 MeV 8=24898
bremsstrahlung prod. at energies between 1 and 10 MeV, rel. to $^1S_0$ state 8=24908
bremsstrahlung prod., calc. using pot. model and initial and final scatt. wave functions 8=24900
bremsstrahlung at 10.5 MeV, obs. 8=24906
bremsstrahlung at 20 MeV, 35°, obs. 8=24903
bremsstrahlung at 20 MeV, 35°, theory 8=24904
bremsstrahlung obs. at 52.3 MeV 8=42633
bremsstrahlung, 61.7 MeV, obs. 8=24905
charge asymmetry comp. with n-n data, rel. to energy difference between He^3 and H^3 8=24950
collision, Regge-pole model for ρ°, ω° prod. 8=24858
collisions, 1-32 GeV/c, data compilation 8=24863
deuteron prod., differential cross-sections, 1.5 to 3 GeV 8=42668
K^+ prod., 2.85, 2.4 BeV obs. 8=29188
nucleon isobar prod. at 3-7 GeV/c 8=42634
one π prod. anal. in one-boson-exchange model 8=24920
π-production amplitudes and partial-wave p-p absorpt. below 1.5 GeV 8=24901
polarized targets and p and $\bar{p}$ beams, for direct testing of CPT invariances 8=24909
$p\bar{p}$ annihilation, meson prod., quark model 8=29103
$\bar{p}p$ annihilation, multiple particle prod., unitary-symmetrical statistical model 8=33546
$\bar{p}p$ rel. to total cross-section 1.3 GeV/c struct., 1.2-1.6 GeV/c 8=33760
$\bar{p}p$ with Δ(1238) prod., π trajectory Regge-pole analysis 8=29217
$p + p \rightarrow d + \pi^+$, differential cross sections calc. 8=33745
$pp \rightarrow \Delta^{++}p\pi^-$, 6.6 GeV/c double Regge-pole analysis 8=24912
$\bar{p}p \rightarrow KK3(4)\pi$, analysis of results with prod. of various mesons, 1.2 GeV/c 8=33759
$\bar{p}p \rightarrow \bar{n}n$, branching in the j-plane 8=38063
$pp \rightarrow nN^*_{1238}$ rel. to $N^*_{1238} \rightarrow p\pi^+$ decay 2.8-10 GeV/c 8=38096
$pp \rightarrow NNk\pi$, Satz additive quark model for cross section 8=24808
$p\bar{p} \rightarrow \pi^+\pi$, 5.7 GeV/c 8=47137
$pp \rightarrow \pi^+\pi^-\pi^\circ$, at rest 8=38042
$n\bar{n} \rightarrow \pi^+\pi^-\pi^\circ$ obs. ρπ. 3π final states 8=33762
$p\bar{p} \rightarrow 3\pi^+3\pi^-\pi^\circ$, 5.7 GeV/c, ρ, A_1, A_2, ω obs. 8=24940
$pp \rightarrow pn\pi^+$, 0.5-0.7 GeV, calc. confirming peripheral model 8=33744
$pp \rightarrow pp\pi^+\pi^-$ at 8.1 GeV/c, cross section obs. 8=24915
$pp \rightarrow \Sigma^+K^\circ p$, cross-section calc. 8=24913
$pp \rightarrow \Sigma^+K^+n$, 5 GeV/c cross-section obs. 8=24913
s-wave shape-dependent parameter P, Q of effective range expansion, 0-10 MeV 8=42631
seconcary spectra, non resonant, at 30 BeV/c, resulting from central and peripheral interacts. 8=24910
6 GeV/c, (Nπ), (Nππ) isobar contrib. obs. 8=29187
6.92 BeV/c, YN resonances not obs., $N^*_{3/2}$ (1236), Y_1^* (1385) obs. 8=24916
total cross section compared with n-p 8=29196
magnetic moment

horizontal cryostat for targets 8=24939
$K^- p$ elastic scatt., 1.4-2.4 GeV/c 8=38017
Lamb-shift source, enhancement by static field methods 8=37436
phasotron accelerator beam depolarization calc. 8=37824
πp elastic scatt. at 550-1025 MeV 8=33757
π photoprod, of recoil p 8=24773
π° photoprod. 500-1000 MeV obs. 8=29189
$\pi^+ p$, 2-4 GeV/c, different from prediction from adding resonant and Regge exchange amplitudes 8=33688
polarimeter for isobaric analogue state spin meas. 8=42640
(p, p) asymmetry, 20 MeV obs. 8=24938
in pp elastic scatt. with fixed momentum transfer 8=47133
in p-p elastic scatt. with fixed momentum transfer 8=47133
in pp scatt. expts. at 150 and 600 MeV by Orsay group, survey of results 8=24923
recoil form $\gamma + p \rightarrow \pi^\circ + p$ 8=33756
sources 8=24161
from Ba^{138}(p, p) at 9.6-12.0 MeV 8=42901
and C_{nn} meas. using polarized target, at energies between 0.5 and 1.2 GeV 8=24923
C^{12} stripping obs. 8=25238
from $Ca^{40}(d, p)Ca^{41}$, E_d = 5 MeV 8=43063
from Ce^{140}(p, p) at 9.6-12.0 MeV 8=42901

- **Protons and antiprotons**—contd
  - **polarization**—contd
    - He^3 elastic scatt., Ep = 30 MeV, obs. 8=29192
    - He^4, 10 MeV scatt., obs. 8=43006
    - Li^7(p, α)He^4, rel. to ang. distrib. 8=25226
    - Li^7(p, α)He^4, E_p = 3-10 MeV, analysing power 8=29437
    - from Sn^{116,118,120}(p, p), 6.7–9.5 MeV 8=43015

    - πp, obs. of p polarization 8=33757
    - πp, Regge parameters, relation derived, one-parameter fit to cross-section 8=33689
    - π^-p obs. at 8, 16 GeV/c, Regge-pole fit 8=37995
    - π^-p, 229-390 MeV, polarization parameter meas. 8=24812
    - π^--p, 6 GeV/c, 8 GeV/c obs. 8=42553
    - $\pi^-p \rightarrow \pi^-p\gamma$, role of $\gamma 3\pi$ interaction 8=24807
    - $\pi^-p \rightarrow \pi^\circ n$, secondary Regge contributions to total cross-section 8=37996
    - $\pi^-p \rightarrow \pi^\circ n$, 561-2, 106 MeV/c obs. 8=24811
    - $\pi^-p \rightarrow \pi^\circ n$, 2.4-3.8, 6, 10 GeV/c $N_{\delta\Lambda}$, $N_{1\Lambda}$* obs. 8=29160
    - π^+p, dip u ≈ - 0.15 (GeV/c), interference of N_α, N_γ fermion Regge trajectories 8=33687
    - π^+p, 1.7–7.8 GeV/c, cross-section without Regge-pole theory 8=33688
    - $\pi^\pm$-p, backward, data on Regge trajectory functions N_2 and Δ_δ 8=42434
    - $\pi^\pm$p, dips in differential cross sections at t = 3 (GeV/c)^2 at 180° at 2.1 GeV/c 8=42554
    - $\pi^\pm$p, Regge-pole analysis of backward peaks 8=24810
    - $\pi^\pm$p, 0.46-2.67 GeV/c obs. 8=29139
    - $\pi^\pm$-p, 6-17 GeV/c, structure obs. 8=42561
    - $\pi^+p \rightarrow N^+\rho^\circ$, absence of dip in differential cross section at 8 GeV/c 8=37982
    - $\pi^+p \rightarrow \pi^+p\gamma$, isobar Δ^{++} (1236) mag. moment meas. 8=24809
    - $\overline{p}$, elastic, by emulsion nuclei rel. to optical model params., 3GeV/c 8=43000
    - pn, charge exchange, branching in j-plane 8=38063
    - p-n, polarization and spin-correl. meas., rel. to phase-shift anal. 8=24955
    - pn, pp, Chou-Yang diffraction model, proton and neutron form factors proportionality obs. 8=47140
    - p-T obs. 300-990 KeV 8=29185
    - from quartz, Rutherford, orientation depend. 8=44504

- **Protons and antiprotons**—contd
  - **scattering**—contd
    - Rutherford scatt. by He, Ne and Ar 8=38754
    - t-p, 147-530 MeV obs., possible resonance 8=25007
    - 30 GeV, e.m. effects on cross-section 8=37952
    - Al^{27}, 6.4 MeV, excitation functions, fluctuation analysis 8=29442
    - Ar^{40}, resonances near 1.1 MeV 8=47241
    - B^{11}(p, p), (p, p$'$), cross-sections and polarizations obs. 155 MeV 8=43007
    - Ba^{138}(p, p), polarization, E = 9.6-12.0 MeV 8=42901
    - Be^9(p, p)Be^9 near the threshold for Be^9(p, n)B^9, 2.21 MeV, structure obs. 8=43014
    - C, polarization obs. 8=47136
    - C^{12}, E_p = 152 MeV, inelastic, impulse-approximation calc. 8=47315
    - C^{12}, elastic and inelastic at 1 GeV, WKB calc. 8=25223
    - C^{12} optical model calc. at 152 MeV 8=42998
    - C^{12} optical-model pot., phenomenological, energy dependence 8=29429
    - C^{14}, elastic scatt., 12.54 MeV level obs. 8=43004
    - C^{14}, Ep = 1–2.7 MeV, differential cross section obs. 8=43008
    - Ca^{40}, control and spin-orbit optical potential calc. 40 MeV 8=43011
    - Ca^{40}, inelastic, Sc^{41} two particle-one hole states, obs. 8=33905
    - Ca^{40}, microscopic description 8=29422
    - Ca^{40} optical-model pot., phenomenological, energy dependence 8=29429
    - Ca^{40} (p, p^1), polarization and cross section DWBA calc. of 3$^-$ level, exchange terms effect 8=33996
    - Ca^{40}, E_n = 155 MeV, optical-model analysis 8=29428
    - Ca^{42,44}(p, p$'$), shell-model form factors, analysis, 22.9 MeV 8=43010
    - Ca^{43}(p, p$'\gamma$)Ca^{43}, γ spectra obs., 2.550, 3.235, 3.605 MeV 8=43027
    - Ca^{44}, elastic and inelastic at 17.5 MeV, levels obs. 8=47317
    - Ce^{140}(p, p), polarization, E = 9.6–12.0 MeV 8=42901
    - Cl^{37} 1-18 MeV, isobaric analog states of Cl^{38} 8=25118
    - Cr^{52} (p, p$'\gamma$), p spin-flip in 2$^+$ level, 11 MeV 8=33989
    - Cr^{52}, polarized p elastic and inelastic scatt., asymmetry, 18.6 MeV 8=29430
    - Cu^{63}, polarized p elastic and inelastic scatt., asymmetry, 18.6 MeV 8=29430
    - Cu^{63,65}, excitation functions, search for p-n channel coupling near threshold for (p, n) reaction 8=25225
    - Cu^{63,65}(p, p$'\gamma$)Cu^{63,65}, γ-ray de-excitation obs. 6.5 MeV 8=43012
    - Cu surface, E_n = 40-120 keV, obs. 8=47135
    - Fe^{54}, polarized inelastic scatt. asymmetry, calc. 8=29431
    - Fe^{54} (p, p$'\gamma$), p spin-flip in 2$^+$ levels, 11 MeV 8=33989
    - Fe^{56}, excitation functions, search for p-n channel coupling near threshold for (p, n) reaction 8=25225
    - H atom, Sturmian coupled-state calc. 8=38736
    - H-bonds, neutron scatt. 8=24963
    - p-H with variable effective charge, cross sections calc. 25 keV 8=38752
    - H^3–p, 3–11 MeV, no sharp structure 8=24937
    - p-He nuclei, angular distrib. rel. to nucleus struct., 1 GeV 8=33845
    - He^3, Ep = 30 MeV, polarization obs. 8=29192
    - He^4, elastic scatt. rel. to diffr. approx., 600 MeV 8=33746
    - He^4, optical model calc. at 152 MeV 8=42998
    - He^4, 10 MeV, polarization obs. 8=43006
    - p-He^4, nucleons released at 660 MeV 8=25227
    - p-He^4, 1.7 BeV/c, cross-section calc. 8=29230
    - p-He^4, spin dependence, and test for existence of Regge cuts 8=42635
    - Hf^{180}, Hf^{181} analogue states and structure obs. 8=33933
    - $La_2Mg_3(NO_3)_{12} \cdot 24H_2O$ crystal, E_p = 660 MeV, obs. 8=48924
    - Li^6(p, p), Be^7 compound nucleus, resonance parameters determined from cross-sections 8=42832
    - Li^{6,7}(p, p), (p, p$'$), cross-sections and polarizations obs. 155 MeV 8=43007
    - Mg^{24}, E_p = 155 MeV, optical-model analysis 8=29428
    - Mg^{24} optical model calc. at 152 MeV 8=42998
    - Mg^{24}(p, p$'$), collective-model analysis, 49.5 MeV 8=47316
    - Mg^{26}, level lifetimes and mixed nature of rot. bands 8=33902
    - Mn^{55}, excitation functions, search for p-n channel coupling near threshold for (p, n) reaction 8=25225
    - N^{14}(p, p), (p, p$'$), cross-sections and polarizations obs. 155 MeV 8=43007
    - Nb^{91} analog states elastic proton decay widths, shell-model calc. 8=47250
    - Ni foils, thin, 15-90 keV energies 8=29432
    - Ni, polarized inelastic scatt. asymmetry, calc. 8=29431
    - Ni^{58}, central and spin-orbit optical potential calc. 40 MeV 8=43011
    - Ni^{58} optical-model pot., phenomenological, energy dependence 8=29429
    - Ni^{58,62,64}, polarized p elastic and inelastic scatt., asymmetry, 18.6 MeV 8=29430
    - O^{16}, elastic and inelastic at 1 GeV, WKB calc. 8=25223
    - Pb^{204,206,207} (p, p), (p, p^1), isobaric analog resonances, 10-16 MeV 8=38397
    - Pb^{206,207,208} rel. to collective excitations, 24.5 MeV 8=29435
    - Pb^{207,208}, excitation of anologue states, calc. 8=38466

Protons and antiprotons—contd
scattering—contd
Pb^{208}, central and spin-orbit optical potential calc. 40 MeV 8=43011
Pb^{208} (p, p^{I}), polarization and cross section DWBA calc. of 3$^-$ level, exchange terms effect 8=33996
Pb^{208}(p, p')Pb^{208}, 4$^-$ lowest state configurations 8=33936
Pb^{208}(p, p')Pb^{208}, Bi^{209} single-particle analogue resonances total width 8=33941
S^{32}, E$_p$ = 155 MeV, optical-model analysis 8=29428
Sc^{45}, elastic and inelastic at 17.5 MeV, levels obs. 8=47317
Sc^{78,80,82}(p, n) Br^{78,80,82}, excitation curve obs. 8=42884
Si^{28}, E$_p$ = 155 MeV, optical-model analysis 8=29428
Si^{28} optical model calc. at 152 MeV 8=42998
Si^{29} inelastically, proton spin flip in 2$^+$ state excitation, 30, 40 MeV 8=43009
Sm^{148}, elastic and inelastic rel. to spectroscopy appls., obs. 8=29434
Sm^{148,152} to 10-12 MeV, excitation of 2$^+$ levels, spin-flip probabilities 8=43016
Sm^{154}, elastic and inelastic rel. to spectroscopy appls., obs. 8=29434
Sn^{116,118,120}(p, p), energy levels obs., 6.7-9.5 MeV 8=43015
Sn^{118}(p, p')and Sn^{119}, cold nucleus, isobaric analogue resonances E = 8.2-12.0 Mev 8=42801
Sn^{120}, central and spin-orbit optical potential calc. 40 MeV 8=43011
Sr^{88}, Y^{89} analog levels, calc. of damping and escape widths 8=25135
Ti^{46}, elastic and inelastic at 17.5 MeV, levels obs. 8=47317
V^{51}, 4.005-5.515 and levels of Cr^{52} 8=25224
W^{183}, Coulomb excitation and Mossbauer effect 8=47262
Y^{89} analog states elastic proton decay widths, shell-model calc. 8=47250
Y^{89}, isobaric analog resonances of Zr^{90} 8=25137
Y^{89}(p, p)Y^{89*}, rel. to isobaric-spin analogue resonances in Zr^{90} 8=43013
Yb^{173,175} (p, p) and (p, p') rel. to analogue states, obs. 8=29338
Yb^{174}, elastic and inelastic rel. to spectroscopy appls., obs. 8=29434
Zr^{90,92,94}(p, p'), E$_p$ = 12.7 MeV. obs. 8=29433
scattering, proton—deuteron
amplitude, real part obs. at 1 GeV 8=24928
bremsstrahlung obs. at 197 MeV protons 8=29182
differential cross-sections, proton polarization, elastic between 22-46.3 MeV 8=38464
spin dependence, and test for existence of Regge cuts 8=42635
scattering, proton-neutron. See Neutrons and antineutrons/ scattering, proton–neutron.
scattering, proton–proton
bremsstrahlung, coplanar and non-coplanar, potential model calc. 8=24907
bremsstrahlung cross-section in terms of quasi phases of pp off shell matrix 8=24930
differential cross-section meas. at 50 MeV 8=24918
differential cross section, polarization in p-p scatt., 98 MeV 8=38059
differential cross-sections and phase-shift anal., normalized at 50 MeV 8=24926
diffraction-like structure, large momentum transfer, 7 and 12 GeV/c 8=33749
diffraction model for asymptotic limit of cross section 8=24936
Elastic, differential cross section, 1 GeV 8=33845
elastic, high-energy, cross-section kinks 8=29190
elastic, large-angle, differential cross-section angular var. 8=29191
elastic, Pearson and Coz theory 8=34025
elastic $^1S_0$, velocity-dependent pot. parametrization 8=42637
e.m. effects on cross-section at high energies 8=37952
forward amplitude, spin independent, real part, 1.29, 1.39 and 1.54 GeV/c 8=33752
high energy fixed momentum transfer, polarization 8=47133
meson bremsstrahlungs model taking phase space into account 8=24758
Morse pot. of offshell $^1S_0$ 8=47134
narrow dips at large $|t|$, high-energy 8=33751
and np, phase shift anal. at 18.2 and 9.9 MeV 8=42627
partial wave amps, empirical, rel. to coupling consts of scalar and vector mesons 8=24748
phase-parameter multiple-energy fits for energy range 8 to 340 MeV 8=24934
phase-shift anal. and elastic scatt. matrix 8=24927
phase-shift anal. of data in 140 and 50 MeV region 8=24935
phase shift anal. in inelastic region, 400 MeV to few GeV, new scheme 8=29421
$^3P_0$, $^3P_1$ absorpt. violation of unitarity, 1 GeV 8=24933
polarization, depolarization and correl. meas. at 150 MeV and 600 MeV by Orsay group 8=24922
polarization, Wolfenstein parameters meas., 430 MeV 8=33753
(p, p) and (p, p'), Cd^{107} analogue resonances obs. 8=33922
$\bar{p}$p elastic 63-175 MeV, cross-section obs. 8=24941
$\bar{p}$-p, elastic scatt. cross section and angular distribution obs. 6.9 GeV/c 8=38060

Protons and antiprotons—contd
scattering, proton—proton—contd
p$\bar{p}$, high energy fixed momentum transfer, polarization 8=47133
(p, p), length calc. from (He^3, d) 8=43005
p-p, optical model, Gaussian pot. 8=33747
p-$\bar{p}$, optical model, Gaussian pot. 8=33747
$\bar{p}$-p scatt., partial-wave analysis and optical model, E$_p$ = 50-180 MeV 8=33750
$\bar{p}$p with Δ(1238) prod., π trajectory Regge-pole analysis 8=29217
p$\bar{p}$, 5.7 GeV/c, elastic 8=47137
p-p, 6 GeV/c obs. 8=42553
$\bar{p}$p → $\bar{n}$n, 50-180 MeV, ang. distrib. obs. for 215 events 8=24942
Regge-pole fit 8=38061
$^1S_0$ phase shift anal. with np data rel. to charge splitting 8=24929
$^1S_0$-wave, approx. analytical soln. 8=24932
S-wave scatt., vacuum polarization effects 8=33748
Serber's model at high energy transfer, anal. with Bakamjian-Thomas theory 8=42636
off shell scatt. in $^1S_0$ channel, computed cross-sections for energies around 5 MeV 8=24919
spin-correlation parameter meas. and comparison with phase-shift models 8=24925
spin-spin correl. C$_{NN}$, 305-415 MeV obs. 8=42638
Wolfenstein amps at t = 0, phase shift dual. rel. to meson-nucleon coupling 8=24931
1-400 MeV phase-shift energy depend. 8=33754
9-330 MeV twelve models 8=38062
350-750 MeV, scatt. matrix determ. up to 450 MeV 8=33755
600-650 MeV, phase-shift anal. and determ. of most probable set 8=24873
at 0.97 GeV, anal. in one-boson-exchange model 8=24920
C$_{NN}$ meas. at 5 energies, 305 to 415 MeV, comp. with theory 8=24924
C$_{NN}$ parameter and polarization meas. using polarized target, 0.5 to 1.2 GeV 8=24923
antiprotons
annihilation, four-prong, 1.2 GeV/c 8=38066
annihilation in liquid hydrogen, multineutral state production 8=24944
beam purity meas. using δ-ray spectrum 8=47138
cosmic ray $\bar{p}$-e$^+$ flux ratio calc. 8=42685
by emulsion nuclei, elastic scatt. rel. to optical model params., 3GeV/c 8=43000
$\bar{p}$N annihilation, multiple particle prod., unitary-symmetrical statistical model 8=33546
$\bar{p}$-N interactions in photo-emulsions, obs. 8=42641
$\bar{p}$p annihilation cross sections, multi-π prod. 8=24943
$\bar{p}$p annihilation, multiple particle prod., unitary-symmetrical statistical model 8=33546
$\bar{p}$-p, elastic scatt. cross section and angular distribution obs. 6.9 GeV/c 8=38060
$\bar{p}$p elastic scatt., 63-175 MeV, cross-section obs. 8=24941
$\bar{p}$p interactions rel. to total cross-section 1.3 GeV/c struct., 1.2-1.6 GeV/c 8=33760
$\bar{p}$-p scatt., partial-wave analysis and optical model, E$_p$ = 50-180 MeV 8=33750
$\bar{p}$-p-scatt., 6 GeV/c obs. 8=42553
$\bar{p}$p → $\pi^+\pi^-\pi^\circ$, at rest 8=38042

    - remainder theorem, general 8=46797
    - restrictions on particle position operators 8=42387
    - S-limit Schrodinger eqn., numerical soln. 8=29596
    - scattering from separable non-local potential, rel. to phase shift, elastic 8=33337
    - Schrodinger, construction of solvable potentials 8=33319
    - Schrödinger eqn. for three-electron atoms, Euler-angle reduction 8=47461
    - Schrödinger equation, kinetic energy as a perturbation 8=46805
    - Schrödinger eqn., study by phase eqns of bounds and props of functionals 8=46799
    - Schrödinger eqn. with α/r central pot., factorization by finding ladder operators 8=34129
    - Schrodinger eqn. with singular pots., props. of wave function 8=28946
    - Schrödinger, exact soln. for pot. scatt. compared with Born approx. 8=33587
    - Schrodinger, for interactions with exchanges 8=37742
    - Schrödinger, for Li atom, numerical soln. 8=29579
    - Schrodinger like for 2 fermion system applied to $q\bar{q}$ 8=29104
    - Schrodinger, low-energy expansion of S(k) matrix for spherically symp. pot. 8=28939
    - Schrodinger, many-particle systems 8=33317
    - Schrodinger operator in exterior domain, scattering 8=33336
    - Schrodinger operator, spectral functional, asymptotic behaviour 8=33316
    - Schrodinger, solutions and eigenvalues 8=37741
    - Schrödinger, soln. with vel.-dependent pot. 8=24461
    - Schrodinger theory, potential producing phase shift below 11/2 8=33327
    - Schrödinger, time-independent, bound states rel. to solitons 8=24464

Quantum theory—contd
wave equations—contd
Schrödinger, two-dimens. analogue to H atom 8=34131
spacelike and timelike at infinite momentum, coupling 8=42309
spin-$\frac{1}{2}$ particle polarization calc. 8=37739
spin-1, field, satisfied by e.m. current coordinates 8=47010
spinor currents and baryon-meson symmetry 8=42483
spinor, finite charge renormalization 8=24485
spinor sign change under Zπ rot., observability 8=42300
teaching, wave function, meaning and matter waves reality 8=42305
thought expt. for position meas. 8=33313
three-body problem solution 8=33315
two-electron wave function expansion coefficients, perturbation theory 8=46794
two-electron wavefunctions, unoccupied natural orbitals 8=38599
two types of meas. theory 8=33326
variational calculations "best" lower bound 8=24463
waveguide, appl. of theory of double soln. 8=42025
WKB method, generalized, second approx. 8=42310
B^{++} new type of wave function 8=38672
Be^{+} ion, new type of wave function 8=38672
Li atom, new type of wave function 8=38672
Li atom, ^2S ground state, Hylleraas function calc. 8=38671
Quarks. See Elementary particles.
atmospheric, cyclic reflection mechanism 8=24741
baryon-antibaryon interactions, strangeness-exchange, quark model 8=33659
baryon model, quarks-on-springs 8=33733
baryon model with d-wave forces, energy spectrum for baryons and their resonances 8=38046
baryon resonances D-wave decays, SU(6) × O(3) quark model 8=29215
baryons, higher, SU(6)XO(3) model of decay 8=33735
β-decay, α-order corrections proved finite 8=33630
rel. to bootstrapping and local current 8=29073
charge-commutation relations, saturation of covariant sum rules 8=29108
cosmic ray production, estimate 8=24636
cosmic rays at sea level, large area proportional detectors 8=38126
current divergence and equal-time commutation, quark model 8=33529
detection in solids, limits of possibility 8=47099
Dirac and anti-Dirac particles, bound state problem 8=42359
elastic scatt. model with factorizability assumption 8=29112
$ep \rightarrow eN^*$, quark model, form factors 8=33631
$\eta \rightarrow 2\gamma$ model 8=24835
factorization model, large momentum transfer scattering 8=37945
form factor model with energy depend. mixing angle 8=29039
and group theory 8=37847
hadron dynamics in $U(6) \otimes U(6)$ 8=33648
hadron-hadron scattering model at high energy, sum rule 8=33653
hadron resonance decay model 8=42494
hadron struct. and interactions, quark models 8=29103
K resonance decay model 8=33731
loss from quasars, reinterpretation of spectrum 8=45781
mass and Fermi gas nuclear model 8=24743
meson-baryon interactions, strangeness-exchange, quark model 8=33659
meson prod., neutral vector and pseudoscalar in meson-baryon interactions 8=37957
model, $A_1 \rightarrow \rho\pi$ decay 8=29175
model and relation between differential cross-sections 8=42492
model calc. of hadron decay rates, mesons annihilating into vacuum 8=42497
model calcs. of meson-baryon scatt. 8=24765
model for high energy elastic scatt. 8=37947
model for magnetic moments of baryons calc. 8=38048
model for N-N scatt., inequality 8=24891
model for resonance decay 8=42493
model for soft-pion meson decay 8=24755
model, leptonic decays and exchange current of baryons 8=47126
model, negative parity N isobar excitation 8=25003
model of interaction of elementary particles, and additional reson prod. at hadron scattering 8=47101
model, rel. to cross-sections of prod. of hadrons, and spin correls. 8=37951
model, semirelativistic for mesons 8=42360
model sum rule in photoproduction, violation 8=24659
models tested in $\pi^- p \rightarrow \gamma n$, $K^- p \rightarrow \gamma\Lambda$ 8=37916
octet state, assignment of Roper resonance 8=47124
p model, rel. to discrepancy in h.f.s. of H 8=33743
particle symmetry interpretation 8=47015
photoproduction model 8=42495
$q\bar{q}$ system solved by means of Schrodinger-like relativistic eqn. for 2 fermions 8=29104
refractice index and transmittance from asymmetric interferograms, 20-400 cm^{-1} 8=28844
Quarks—contd
relativistic two-particle Hamiltonian, bound states 8=47039
sakaton rearrangement interactions and high energy hadron-hadron scatt., model agreement 8=47103
Satz additive model, for high multiplicity processes 8=24808
search, unsuccessful, for fractionally charges particle in cosmic rays 8=42490
in solid, $< 10^{-17}$ per nucleaon expt. deduction 8=24742
superconvergence relations, saturation with qq states 8=24669
s-wave model for baryons and their resonances 8=25000
tachyons, faster than light, exptl. search 8=42388
terrestrial, mag. levitation electrometer search 8=29013
two in bound system, Bargmann-Wigner eqns. 8=37946
U_6 composite model for baryons and resonances 8=47100
$U_6 \otimes U_6$ field commutation relations rel. to vector-meson dominance in π° decay 8=33662
unsuccessful search for $^2/_3$e charged particle in cosmic rays 8=42489
Quartz
acoustic wave generation by electrostrictive mixing of light waves 8=45162
α-quartz crystal, refractivity interpret. 8=49756
α-quartz, elastic coeffs. and moduli, polarizing tensor 8=49048
α-quartz, extraordinary optical phonons, directional dispersion 8=45221
α-quartz, piezoelectric constant calc. using Born's theory 8=27300
α-quartz, Raman spectrum excitation by Hg discharge 8=49753
amorphous, density fluctuations rel. to X-ray scatt. 8=25879
amorphous substrates, moving mask growth of single-crystal Si films 8=26126
breakdown when subject to ionizing radiations, optimal thickness calc. 8=31417
brittle crystals, microhardness rel. to dislocation mobility 8=26796
coloured varieties synthesis and pigment distribution 8=26264
to correct u.v. wavelength 8=37724
crystal microbalance, direct gravimetric calibration 8=23793
crystalline, n.m.r. electron spin-echo obs. of E_1^1 centres 8=44486
crystalline, stimulated Mandel'shtam-Brillouin scatt. threshold, 0.35, 0.69 and 1.06μ 8=32032
crystals, artificial, overgrowth of holes 8=39700
density, radiation damage effects 8=26722
diffusion of H_2 in irrad. quartz 8=48790
dispersion in vac. u.v. from interference in thin parallal plate 8=32034
elastic constants of α-modification, calc. from model 8=44599
elastic moduli, third-order, pulse-echo interferometric obs. 8=49050
electron diffr. exam. 8=35355
epitaxy of p-amino salicylicacid 8=48571
ϵ-colour centre formation mechanism and kinetics 8=48885
fused, and $Gd_3Fe_5O_{12}$, chem. interaction 8=41251
fused, far i.r. absorpt. rel. to inherent disorder 8=49681
fused, reflectance in vac. u.v., obs. 8=27558
glass, X-ray exam. of structure 8=39629
heat-pulse propag. in α-modification, phonon dispersion effects on pulse-shape 8=48753
high-low inversion, volume and compressibility rel. temp. at high press. 8=48401
hydrothermal crystallization kinetics 8=26230
interstellar grains, extinction curves 8=28096
inversion, high-low, lambda transition, thermodynamics 8=39563
i.r. rotation obs. 1.85-4.00μ 8=36403
knick-band indexing using the X-ray universal stage 8=26714
laser-illuminated, interferometric analysis and separation of three Brillouin scattering components 8=36408
laser irrad. damage and stimulated Mandel'shtam-Brillouin scatt., 300°K 8=32031
laser-stimulated, hypersound parametric amplification Brillouin effects 8=26583
microbalance for oil diffusion pump backstreaming meas. 8=39243
microwave phonons, second-harmonic generation 8=30950
natural and synthetic, fault-surfaces from X-ray exam. 8=26707
non-linearities, and isochronism defect 8=27301
optical activity, temp. dependence in visible spectrum 8=49755
optical second harmonic generation, mag. field induced, search 8=45140
phonons, 10 GHz, method of excitation 8=48723
piezoelectric appl. to microwave mixing 8=49382
plano-convex plates, meas. of vibration modes 8=46141
Pockels effect, meas. at 9GHz 8=41144

Quartz—contd
- quartz-glass-coesite, phase transforms. under high-temp. and pressure 8=48400
- quartz, in stimulated Mandel'shtam-Brillovin scatt., elastic nonlinearity effects 8=41036
- quartz production of crystalline-amorphous phase transform, X-ray diffr. exam. 8=26146
- resonance frequency modification, various cuts, particle irrad. 8=35418
- resonator, electrode optimum sizes and shapes 8=37246
- Rutherford scattering of protons, orientation depend. 8=44504
- sand, differential thermal analysis, particle size effects 8=26044
- shock-loaded x-cut, mech. and piezoelectric props. 8=26844
- smoky, anomalous pleochrism rel. to atomic structure 8=27608
- sound absorption near λ pt. in $\alpha \rightarrow \beta$ transition 8=26584
- specific heat and enthalpies of change of phase; meas. 8=46286
- spherically bent cryst., soft X-ray spectroscopy 3 to 30Å 8=32033
- stress dependence of freq. of oscillator plates 8=49049
- stress gauge, shorted guard-ring development 8=37110
- structure changes in $\alpha \rightarrow \beta$ transform. and under n-irrad. 8=26080
- structural defects, delineation by selective etching 8=44428
- surface and bond-forming props., applic. in processing technique 8=48427
- synthetic, Al impurity capture during crystal growth, effect of supersaturation and temp. 8=44424
- synthetic, birefringence, 1500 to 3000 Å 8=41056
- synthetic crystals, homogeneity of refractive index 8=35207
- synthetic, etch patterns on habit and fracture prism faces 8=35224
- synthetic, with high u.v. transmission 8=49751
- thermoluminescence, rel. to defects due to γ-irrad. 8=49812
- thermometer with digital readout, —40 - +230°C 8=24023
- thin film capacitor by r.f sputtering on Al and counter-electroding, props. 8=44059
- toroidal sectioning machine 8=41607
- u.s. attenuation, unirrad., and neutron irrad., 8=39897
- u.s. vibration, X-ray topography 8=48722
- u.s. wave, propag., phase vels 8=48724
- welding with CO$_2$ laser 8=33179
- Z-cut, phonon lifetime meas. by two successive light pulses 8=44323
- AlF$_3$ layer formation during 3½ yrs. ageing after HF treatment 8=49900
- Co-doping during synthesis, and opt. props. 8=48556
- α-SiO$_2$, changes in electric field 8=44600

Quartz resonators. See Acoustic transducers; Piezoelectric oscillations; Resonators.

Quasars. See Cosmic radiations, radiofrequency; Cosmology; Galaxies; Stars.
- absorption-line spectra obs. TON 1530, PKS 0237-23, PHL 938 8=50387
- absorption lines, systematic identification 8=45791
- angular size variation with red-shift 8=50389
- collapse and anticollapse 8=50327
- Compton effect inverse, stimulated term rel. to distance of quasars 8=28134
- cosmic ray source, interaction with photons 8=42714
- cosmological model test in obs. from opposite directions 8=28030
- detection, by reflecting telescope at Herstmonceux, Sussex 8=50267
- diameters of some at wavelength of 66.9 cm 8=36988
- directed emission model 8=36987
- distance rel. to compact n star studded galaxies redshifts 8=28112
- ejected, assocs. and parent galaxies struct. obs. 8=45772
- energy of relativistic particles and mag. fields, ratio of full to minimal 8=32511
- evolutionary properties, luminosity-volume test 8=36985
- forbidden line excitation 8=45790
- formation, rel. to non-linear eqs. of spherical collapse 8=50258
- Japanese obs. 8=32615
- matter-antimatter model, prediction and obs. of γ-ray flux 8=45789
- M87, γ-ray obs. 8=45789
- optical continuum, physical processes responsible for radiation, possible obs. tests 8=45787
- optical spectrum due to inverse Compton process 8=45780
- Parkes 2134 + 004, unusual radio spectrum 8=50388
- PHL 938 absorption-line spectra obs. 8=50387
- PHL 938, photoelec. line intensity obs. 8=45786
- PKS 0237-23, absorption-line spectra obs. 8=50387
- PKS 0237-23, absorpt. spectrum obs. 8=45792
- PKS2251 + 11, line intensity obs. 8=45786
- polarization, circular, observed limits at radio freq. 8=28133
- proton synchrotron emission 8=45756
- quasi-stellar objects with absorption lines 8=28132
- radio emission, flux densities at λ 5.2 cm 8=41552

Quasars—contd
- radio galaxies in an early stage 8=32521
- radio sources opposite, cosmological test 8=50378
- red-shift-law, and for radio galaxies 8=45793
- with redshifts larger than 2.2, predicted colour-indices, U–B and B–V values 8=28131
- relativity theory, multitemporal, appl. 8=46076
- Sagittarius A, 1415, 2695 MHz obs. 8=45785
- Seyfert and N-type galaxies and quasars, common source 8=45778
- spectral red-shift, gravitational interpretation 8=45788
- stellar head-on collision theory 8=45619
- 3C249-1, photoelec. line intensity obs. 8=45786
- 3C 273, optical luminosity fluctuations 8=32522
- 3C 273, optical luminosity fluctuations, randomness 8=36986
- 3C273, spectrum anomaly, 1.6μ 8=45783
- 3C273B, γ-ray obs. 8=45789
- 3C345, optical brightness and polarization var. 8=32519
- spectra optical, absorption features 8=45784
- spectrum, reinterpretation with quark losses 8=45781
- TON 1530 absorption-line spectra obs. 8=50387
- variable, intensity rel. to wavelength 8=32520

Quasi-particles. See Excitons, Magnons, Phonons, Polarons, etc.

Quenching, optical. See Luminescence.

Quenching, thermal. See Heat treatment.

RS coupling. See Atoms; Spectra/atoms.

Racah coefficients. See Quantum theory.

Radiation

See also Acoustic radiators; Bremsstrahlung; Cherenkov radiation; Electromagnetic waves; Electrons/radiation; Emissivity; Radiative transfer; Stars/radiation; Sun/radiation; Sunlight.
- in air, rel. to coupling of normal chem. nonequilib. shock wave 8=39182
- from annular slot in compressible plasma, theory 8=30075
- from black body, weakly heated, meas. of atmos. absorption 8=32228
- coherence, partial, calculus for space-coherent e.m. radiation 8=37449
- compressible grey gas, flow near plate impulsively set in motion, finite Mach number 8=43686
- diffraction field of nearby source, h.f. 8=23810
- emissive and absorptive power of trapezoidal grooves 8=23987
- flame radiant props meas. by radiometer without condensing agents 8=28408
- gas behind shock front, maximum of nonequilibrium emission 8=30299
- gas layer, cond.-rad. interact., appl, of nongray gas model 8=34659
- gravitational, metric logarithmic terms from radiative corrections 8=28299
- gravitational, outgoing/incoming mixture, mass transfer from source 8=32804
- light on solid surface, plasma reson. emission 8=35802
- microwave, from magneto-plasma 8=28600
- in multi fluid system, effects of shock wave struct. 8=39016
- in nongray gas, coupled with conduction and convection, effects on entrance region flow 8=25827
- nonstationary field, Duhamel's principle 8=33233
- optical, absolute values meas. 8=37632
- particles, charged, in waveguides with gyrotropic filling 8=41939
- in plasma, cylindrical, radial intensity distrib., determ. 8=39095
- plasma, harmonic generation from e beam interaction 8=30048
- point source in strongly focussing medium, modal solution 8=23808
- proton gyrofrequency band emissions obs. from OGO2 8=36821

stopping cross-section meas. in C using recoil ions from radioactive decay 8=29658
synchrotron, zero-gradient, radiation dose and induced activity obs. (1965-66) 8=33468
transmutations of nuclei, book 8=33950
2-forbidden β transitions, spectrum calc. 8=25172
Wigner supermultiplet approximation, allowed β transitions 8=25175
$Ac^{224} \xrightarrow{\alpha} Fr^{220}$ 8=47299
Ac^{225} α-disintegration, Fr^{221} levels mag. spectrography obs. 8=25163
$Ag^{105} \rightarrow Pd^{105}$, multipolarity of some transitions 8=33961
Al^{26} β-decay, $T = 2$ component in Mg^{26} ground state 8=47282
Al^{26} in terrestrial rock, induced by cosmic-ray muons search 8=41324
$Al^{28,29}$, from p reaction on Si, excitation functions 8=42942
Am^{241} α-disintegration obs. 8=25198
Am^{243} α-decay obs. 8=42975
Ar^{37}, trace amounts, apparatus for meas. 8=47283
As^{74}, β-decay, nuclear matrix pairing-model calc. 8=42946
As^{74}, ϵ/β^+ ratio 8=42941
Au^{193}, using internal conversion obs. 8=25193
Au^{199} half-life of 55 KeV M2 transition 8=42920
Au^{200} decay, γ obs. attributable to Hg^{200} 8=42969
$B^8 \rightarrow e^+ \nu Be^8$, calc. of ν spectrum rel. to solar neutrinos 8=45888
$Ba^{128} \rightarrow Cs^{128} \rightarrow Xe^{128}$, γ-ray spectrum obs. 8=42956
Ba^{133} decay energy, redeterm. 8=25189
Ba^{133} decay, KX-γ directional correl. 8=42957
Ba^{133} KX-ray γ-ray directional correl., zero anisotropy obs. 8=38417
Be^7, from p reaction on Si, excitation functions 8=42942
Bi^{207}, conversion ratio for 570 and 1064 KeV transition obs. 8=33967
Bi^{210}, β^- decay, autoionization 8=29373
$C^{12} + C^{13}$, angular distributions and excitation junctions obs. 10-30 MeV 8=38523
C^{16}, delayed-n decay, obs. 8=38463
Ca^{44}, second 2^+ state, decay obs. 8=38368
Ca^{47} β decay from $Ca^{46}(n, \gamma)$ 8=38416
$Cd^{109} \rightarrow Ag^{109}$ decay, internal conversion 8=38421
Ce^{146}, γ spectrum and β decay theory 8=42959
Cf^{252}, long-range fragments yield obs. 8=42976
Cl^{38}, β, γ-transitions obs. 8=29359
Cl^{38} decay, first forbidden β transitions, $\beta-\gamma$ ang. correl. 8=29360
Co^{60}, β end-point energy obs. 8=29363
Cr^{51}, β-decay, internal bremsstrahlung 8=29362
Cs-137 in humans, meas. in 1958-67 8=41605
Cs^{137}, β end-point energy obs. 8=29363
Cs^{137}, doubly forbidden β-spectra 8=47292
Er^{169}, β^- decay, auto-ionization 8=29373
F^{18}, from p reaction on Si, excitation functions 8=42942
Ga^{68} β-decay rel. to Zn^{68} levels spins and energies 8=33915
Ge^{69}, from $Ga^{69}(d, 2n)$, γ-spectrum obs. 8=25132
He^8, delayed-n, β and γ emission obs. 8=38414
$Hf^{178}2^+$ β-vibrational state E2 + M1 decay 8=33934
In^{113} γ-decay, 393 keV transition, K-conversion coeff. 8=33923
Ir^{194m}, 32 ms, γ-ray spectrum obs. 8=42919
K^{42} decay, first forbidden β transitions, $\beta-\gamma$ ang. correl. 8=29360
$La^{134,136}$ decay obs. and γ spectra 8=42958
Li^9, delayed-n decay, obs. 8=38463
Mg^{27}, from p reaction on Si, excitation functions 8=42942
N^{15} decay 8=29294
N^{17}, delayed-n decay, obs. 8=38463
Na^{22}, electron capture ratio to positron emission 8=47281
Na^{22}, ϵ/β^+ ratio 8=42941
$Na^{22,24}$, from p reaction on Si, excitation functions 8=42942
Nb^{90m}, decay consts, effect of changes in chem. state, press. and supercond. state 8=42950

Radioactivity—contd
$Nd^{141g,m}$, γ spectra obs. 8=42960
$Ni^{57,65}$, β-γ (CP) correlation measurements, deduced Coulomb matrix elements 8=42944
$Np^{230,229}$ production from $U^{233}(p, xn)$ 8=33968
$Np^{238} \xrightarrow{\beta^-} Pu^{238}$ 8=29480
$O^{14} \xrightarrow{\beta^+} N^{14*}$ Fermi decay ft value calc. 8=33958
O^{15} decay 8=29294
P^{32}, β helicity meas. method 8=24718
P^{32} prod. in $K^{39}(n, 2\alpha)P^{32}$, 14 MeV identified by its β-decay 8=38494
Pa^{231}, new α-decay lines with energies, 5631, 5027, 5009 KeV 8=38412
$Pb^{211} \rightarrow Bi^{211}$, γ spectrum obs. 8=47266
$Pr^{142} \rightarrow Ce^{142}$, γ rays obs. 8=38432
$Pr^{142} \rightarrow Nd^{142}$, γ rays obs. 8=38432
$Pr^{142} \rightarrow Nd^{142}$, 508 KeV γ populating level at 2084 KeV 8=38433
Pr^{144}, first forbidden unique correl., inner bremsstrahlung correction 8=47254
$Pr^{144} \xrightarrow{\beta^-} Nd^{144}$, γ rays energies precision meas. 8=38434
Ra^{224} recoil atoms in gases, ranges 8=34179
Rb and Sr isotopes in granite, post-crystallization movement rel. to feldspar alteration 8=50081
Rb^{88} decay, first forbidden β transitions, $\beta-\gamma$ ang. correl. 8=29360
Rb^{91} β and γ spectra obs. 8=25181
$Re^{186,188} \rightarrow Os^{186,188}$ $K = 2$ states, asymmetric-rotor model disfavoured 8=47226
Rn decay products, diffusion coeffs. and mean free paths in air 8=38441
Se^{75}, γ-γ angular correlation 8=33916
Si^{28} nuclear resonance fluorescence in Al single crystals 8=30631
Sn^{113} KX-ray γ-ray directional correl., zero anisotropy obs. 8=38417
Sn^{113} source, from $In^{113}(d, 2n)$, fractional distillation 8=42954
Sr and Pb, isotopes evolution model with crustal material recycling through mantle 8=36682
Sr^{85} KX-ray γ-ray correl., zero anisotropy obs. 8=38417
Tc^{94} isomers, decay to Mo^{94} levels 8=38374
$Te^{107,108,109,110}$, α-and delayed p-decay, obs. 8=38424
Te^{111}, β^+ p coincidence meas. 8=47290
Te^{127} β decay, excitation of I^{127} in Te crystal, rel. to quadrupole coupling 8=36284
Te^{130} double beta decay, half life obs. 8=38426
$Te^{133g,m}$ β-decay and I^{133} level struct. obs. 8=42897
$Th^{233} \rightarrow Pa^{233}$ internal conversion electron spectrum 8=42979
Th^{227} α-decay, Ra^{223} recoil atoms charge, obs. 8=29379
Tl^{204}, β end-point energy obs. 8=29363
U, new γ log for direct determ. in ores 8=32184
U^{233}, amine extraction from irrad. ThO_2 8=36634
$U^{237} \xrightarrow{\beta} Np^{237}(n, \gamma)Np^{238} \xrightarrow{\beta} Pu^{238}$ yield obs. 8=29480
Xe^{127}, hyperfine interaction, pressure effect 8=47291
Zn^{62} 9.3-h, Cu^{62} levels obs. 8=42945
Zn^{65} KX-ray γ-ray directional correl., zero anisotropy obs. 8=38417
Zn^{69m} β-decay, conversion coeff. and K-fluoresc. yield obs. 8=38418
dating. See Radioactive dating.
decay periods
α-emitters, $Z > 50$ and $N < 126$, tables 8=38413
fission fragments, primary, meas. 8=38543
measurement and 13 isotopes obs. 8=42940
nuclei embedded in magnetized ferromag. foil, meas. 8=38401
36 nuclides, obs. 8=33957
Ag^{118} product of U^{235} fission, obs. 8=43123
Al^{26m}, precision meas. 8=42939

    $Kr^{90,91,92,93}$ from $U^{238}O_2$-stearate fission source, obs. 8=38549
    La^{128} isomer, $Sn(N^{14}, xn)$ and $Sb^{121}(C^{12}, 5n)$ prod., obs. 8=38522
    Lu, rel. to Yb^{168} energy levels 8=42910
    Md^{259}, predictions rel. to thermonuclear explosion abundance obs. 8=38496
    Mg^{23}, precision meas. 8=42939
    $Mg^{24,26}$ levels, Doppler-shift lifetime meas. 8=25110
    Mg^{25}, 3.400 MeV level 8=29301
    Mn^{54}, obs. 8=33959
    Na^{19}, delayed p decay, $F^{19}(He^3, 3n)$ obs. 8=38415
    Ne^{17}, delayed p decay and spectrum, $O^{16}(He^3, 2n)$ obs. 8=38415
    Ne^{19}, precision meas. 8=42939
    Ne^{22}, 3.35 to 6.35 MeV levels 8=29298
    Ne^{22} 5.14 MeV state 8=25108
    Ni^{58} 2^+ states, mean lifetime obs. 8=25130
    Ni^{61}, 283 keV level 8=29315
    No^{256}, α-energy and half-life obs. 8=25199
    O^{16} obs. 8=47233
    Os^{180} intermediate level half-life 8=47298
    Pb^{206} isomeric state, time interval analysis meas. 8=25083
    $Pb^{208}(p, 3p)$, spectra obs. 8=42971
    Pd^{117} product of U^{235} thermal-n fission, obs. 8=43124
    Pm^{143} first excited state obs. 8=25146
    Pr^{138}, 2.2 hour, reinvestigation 8=29368
    Pu^{244}/xenon, for achondritic meteorites rel. to early solar system synthesis 8=45845
    Rb^{90-96} and β-decay derivatives, and Rb^{90} isomer, obs. 8=29367
    Rh^{105} 538 keV state mean lifetime obs. 8=25140
    S^{29}, delayed p decay and spectrum, $O^{16}(He^3, 2n)$ $Si^{28}(He^3, 2n)$ obs. 8=38415
    Sc^{43} 472 KeV excited state 8=42867
    Sc^{50}, log ft for β-decay; Sc^{50} energy levels calc. 8=42863
    Se^{77}, Nilsson versus shell models 8=29318
    Si^{27}, precision meas. 8=42939
    Si^{28} levels, Doppler-shift lifetime meas. 8=25110
    Si^{31} 8=29474
    Sn^{121} level spin obs. 8=38422
    Tb^{149} from $Au^{197}(p, X)$ 8=38476
    Te^{109}, delayed p emission, $Mo^{92}(Ne^{20}, 3n)$ and $Mo^{94}(Ne^{20}, 5n)$ obs. 8=38425
    Te^{111}, delayed p emission, heavy-ion reactions, obs. 8=38425
    Te^{125} 321 KeV $9^-/2$ state 8=38381
    Te^{130} double beta decay 8=38426
    Tl^{204}, 9.4 years obs., no evidence for short lived isomer 8=25194
    U^{235m}, effect of environment 8=25164
    V^{52} and β^- spectrum, obs. 8=29361
    Xe^{127m} and 125 and 175 keV γ transitions assignments, obs. 8=38427
    Yb^{165}, Tm^{165} levels obs. 8=42965
    Zn^{63}, precision meas. 8=42939
  decay schemes
    α-emitters, $Z > 50$ and $N < 126$, tables 8=38413
    fission fragments, primary, meas. 8=38543
    odd-odd deformed nuclei, α decay to vibrational levels 8=47277
    $102^{252,255}$ α-decay props. obs. 8=42978
    $Ag^{102,102m,103}$, $Ag^{107}(N^{14}, xn)$ and $Mo(B^{11}, xn)$ obs. 8=38428
    $Ag^{108}(T_{1/2} \geqslant 5$ years) γ spectrum 8=42953
    $Ag^{110m} \rightarrow Cd^{110}$ γ intensities 8=47288
    Al^{26}, closely spaced levels, 2.07 MeV 8=42851
    Al^{27} levels, spin assignments 8=42849
    Am^{241} in Th lattice, α-decay and Np^{237} Mössbauer spectrum 8=42929
    Ar^{33}, delayed-p decay, obs. 8=38414
    As^{70} to Ge^{70}, γ-ray spectrum obs. 8=42948
    $As^{74} \rightarrow Ge^{74}$, Se^{74} obs., additional γ-ray 8=42947
    $At^{210} \rightarrow Po^{210}$, e capture decay 8=25195
    $Au^{195} \rightarrow Pt^{195}$ conversion electrons need to study levels of Pt^{195} 8=38392
    $Ba^{125,127}$, $In^{115}(N^{14}, xn)$ and $Sb^{121}(B^{11}, xn)$ obs. 8=38428
    $Ba^{131} \rightarrow Cs^{131}$, γ-ray spectrum, new transitions obs. 8=38429
    Bi^{208} 2.5 ms isomeric state, j-forbidden transition 8=42924
    $Bk^{243-249}$, rel. to energy level diagrams of daughter nuclei 8=42974
    Ca^{37}, delayed-p decay, obs. 8=38414
    Ca^{50}, β-decay to 1848 KeV level, resolution of discrepancy 8=42943
    $Cd^{115m} \rightarrow In^{115}$, γ spectra obs. 8=25184
    $Cd^{117} \rightarrow In^{117}$, rel. to In^{117} energy level determ. 8=42889
    $Ce^{143} \rightarrow Pr^{43}$, β-γ ang. correl. obs. 8=38431
    $Ce^{145,146}$ and total β-decay energy, obs. 8=38430
    Cf^{249}, rel. to energy level diagrams of daughter nuclei 8=42974
    Co^{56}, γ-γ coincidence obs. 8=29364
    $Co^{57,58}$ prod. in photo-reaction on Cu^{63} 8=29405
    Co^{58}, excited levels branching ratios, $Fe^{58}(p, n)$ obs. 8=29313

Radioactivity—contd
  decay schemes—contd
    Co^{123}, $In^{115}(C^{12}, 4n)$ obs. 8=38428
    $Cs^{132} \rightarrow Ba^{132}$, Xe^{132} obs. 8=42899
    $Cu^{61} \rightarrow Ni^{61}$ 8=29315
    Dy^{159m} 115μs obs. 8=38436
    Dy^{165}, β-decay, new γ transitions 8=47296
    $Dy^{165,165m}$ 8=47295
    E^{154} to Gd^{154}, EO/E2 transition probability ratios calc. 8=42904
    Er^{171}, Tm^{171} level scheme, γ-ray spectrum obs. 8=47259
    Eu^{144}, rel. to Sm^{144} 1659 and 2481 KeV levels population in (p, p^1), obs. 8=38435
    $Eu^{150} \rightarrow Sm^{150}$, γ-spectrum obs. 8=42963
    $Eu^{154} \rightarrow Sm^{154}$, Gd^{154}, γ spectra obs. 8=42962
    $Eu^{155} \rightarrow Gd^{155}$, rel. to Gd^{155} internal conversion coeff. at 86.5 KeV 8=42905
    Fm^{255}, rel. to energy level diagrams of daughter nuclei 8=42974
    Ga^{65} to Zn^{65}, obs. 8=25178
    Gd^{159}, 68 keV 26 nsec isomeric state 8=29335
    $Gd^{159} \rightarrow Tb^{159}$, γ energy obs. and Tb^{159} level scheme 8=29372
    $Ge^{77} \rightarrow As^{77}$ decay, γ spectroscopic obs. 8=29366
    $Hf^{170} \rightarrow Lu^{170}$ 8=29340
    Hf^{178} isomeric state with $K \geqslant 16$ 8=42966
    Hf^{180m}, studies 8=29341
    $Hg^{192,194,196,198}$, γ-spectra obs. 8=38394
    $Ho^{154} \rightarrow Dy^{154}$ by β-decay 8=42908
    Ho^{163}, by e capture from M and higher shells 8=42964
    $I^{119} \xrightarrow{\beta^+} Te^{119}$ and e capture, energy levels obs. 8=25188
    $I^{121} \rightarrow Te^{121}$, 58 transitions 8=25187
    $I^{123} \rightarrow Te^{123}$ obs. 8=42955
    In isotopes, γ-ray spectra 8=47251
    $In^{116m}1(5^+$, 54 min) 8=47286
    In^{192M_1}, L-X-ray and gamma conversion electron spectra 8=33966
    $Ir^{192} \rightarrow Pt^{192}$ 8=33935
    $Ir^{196g,196m} \rightarrow Pt^{196}$ γ transitions obs. 8=42967
    K^{43} obs. 8=43027
    $La^{140} \rightarrow Ce^{140}$, spin and parity of Ce^{140} levels obs. 8=33963
    Lu^{177}, Nilsson model rel. to 386 keV β-113 keV γ directional correl. obs. 8=29375
    $Lu^{168,168m} \rightarrow Yb^{168}$ 8=29339
    Mn^{56}, γ-γ coincidence obs. 8=29364
    Mo^{94}, n-decay, isobaric analogue resonances 8=29320
    $Nb^{94} \rightarrow Mo^{94}$, twice forbidden β-decay, matrix element calc. 8=42951
    Nb^{96}, negaton and conversion electron spectra 8=2518
    $Nd^{147} \rightarrow Pm^{147}$, β-γ and γ-γ coincidence obs. 8=29369
    Ne^{17}, delayed-p decay, obs. 8=38414
    $Ni^{57,65}$, β-γ (CP) correlation measurements, deduced Coulomb matrix elements 8=42944
    Os^{180} 8=47298
    $Os^{180,181}$, internal conversion coeffs. obs. 8=38438
    Os^{193}, beta decay populates excited states of Os^{193} 8=38439
    $Os^{193} \rightarrow Ir^{193}$, obs. 8=42916
    Pb^{211} β decay, γ-ray spectrum of Bi^{211} levels obs. 8=47267
    Pd^{109}, Ag^{109} energy levels using Ge(Li)-Ge(Li) coincidence obs. 8=47287
    Pm^{148}, directional β-γ correl. obs. 8=42961
    $Pr^{138} \rightarrow Ce^{138}$ 8=29368
    Pr^{139}, γ-ray spectra 8=47251
    Pt^{188}, obs. 8=38394
    Pt^{188} obs, resolution of ambiguities 8=42968
    Pu^{239}, rel. to energy level diagrams of daughter nuclei 8=42974
    Rb^{81}, from $Br^{79}(\alpha, Zn)$ and $Br^{79}(He^3, n)$, obs. 8=25180
    Re^{178} decay, conversion coeffs. obs., transition multipolarities calc. 8=38438
    Re^{186}, high energy γ-spectrum 8=29377
    Re^{188} to Os^{188}, γ-ray spectrum obs. 8=25192
    $Rh^{104m}(5^+$, 4.4min) 8=47286
    $Rh^{105g}(1^+$, 42 sec) 8=47286
    Rn^{222} in atmosphere, equilib. with daughters, obs. by α-pulse spectroscopy 8=32255
    Ru^{95}, and β- and γ- spectra, obs. 8=42952
    Ru^{100}, excited states study from Rh^{100} 8=29321
    Sb^{124}, disintegration scheme 8=47289
    Sb^{125} 8=38382
    Sb^{125}, β- and γ-spectroscopic studies 8=25185
    Sc^{43}, log ft obs. 8=43027
    Sc^{46}, β-branching ratio 8=47330
    $Se^{75} \rightarrow As^{75}$, energy and intensity of conversion electrons, obs. 8=25179
    $Se^{75} \rightarrow As^{75}$, γ-γ, e^--γ ang. correl. obs. 8=42949
    Se^{81m}, K conversion coeff. obs. for 102.7 keV transition 8=29370
    Se^{83m}(69 sec), branching ratios, β- and γ-spectra obs. 8=38420
    Si^{25}, delayed-p decay, obs. 8=38414
    $Si^{30}(p, \gamma)P^{31}$, 22 resonances 8=29444
    Sm^{143}, γ-ray spectra 8=47251
    $Sm^{143} \rightarrow Pm^{143}$, obs. 8=25190
    Sm^{148}, highly excited states, α-spectra 8=33929
    $Sm^{155} \rightarrow Eu^{155}$ 8=29334
    $Sm^{155}(\beta^-)Eu^{155}$, conversion electron spectrum 8=47293
    Sn isotopes, γ-ray spectra 8=47251
    Sn^{111}, 35 min, to levels of In^{111} 8=38423

Radioactivity—contd
decay schemes—contd
$Sn^{121,121m}$ level and spins 8=38422
Sn^{123}, β-decay, Sb^{123} level scheme 8=33926

  α-cellusose, pyrolysis and decomp., X-ray photographic obs. 8=32094
  anthracene photo-oxide decomp., temp dependence 8=27694
  aryl ketone-iodine complexes, equilib. consts. 8=43353
  association, gaseous, effects of dead space 8=49841
  bio-β-chloroethyl-vinyl-phosphonate, γ-induced polymerization, obs. 8=49913
  biochemical systems, differential microcalorimeter 8=27687
  chain reactions, $A + B \rightarrow C, C + D \rightarrow E$ syst. 8=49843
  Chapman-Enskog method 8=49849
  chemiluminescence, preannihilative 8=27692/3
  clays sintering, thermal analysis meas. 8=30665
  coagulation of compounds 8=48238
  combustion, nonpremixed systems near equilibrium 8=36579
  complex nonchain, tubular flow photoreactors 8=49954
  complex systems cont. irreversible steps, structure and anal. 8=32085
  conjugated systems, intermolec. orbital theory 8=27684
  cycloadditions, intermolec. orbital theory 8=27684-5
  diffusion and heterogeneous reaction 8=49910
  diffusion-controlled reactions, statistical anal. 8=34882
  direct meas. time range 10^{-6} to 10^{-8} sec. 8=49850
  dissipative systems, symmetry breaking instabilities 8=32836
  dissociation, Kossel model modification 8=25646
  dl-α-terpineol e-transfer oxidation by manganic acetate, 100°C 8=49881
  energetic atoms, collision density 8=41242
  energy distrib. of energetic atoms in gas 8=36626
  equilibrium point, stability and uniqueness 8=41233
  ethylene, electrochem. oxidation, oscillatory. 8=49939
  ethylene, thermal gas phase bromination at room temp. 8=49863
  fast reaction rates, n.m.r. study 8=49944
  fluorocarbon reactions, high temp. 8=41247
  formate, electrochem. oxidation, oscillatory 8=49939
  free-radical recomb., nonequilib. effects 8=27679
  graphite, pyrolytic and isotropic, attack by O-atom or O_2, to 2100°K 8=36556
  graphon chemisorpt. of O_2, 450-675°C 8=45362
  hard carbon graphitization with CuO catalyst, kinetic study 8=27740
  heterogeneous surface reactions, diffusion 8=41244
  n-hexadecane, thermal decomp. 8=45342
  hydride ion reaction with HF and H_2, MO theory 8=27676
  hydride ion reaction with NH_3 and CH_4 8=27678
  hydride ion reaction with H_2O, MO theory 8=27677
  hydroxyl radicals, deuterium isotope effects 8=27707

Reaction kinetics—contd
intramolecular regroupings, quantum theory 8=45320
iodination of 8 metals, effects of Co^{60} γ-irrad. 8=36555
ion-molecule reactions, energy partition 8=45323
ion-molecule reactions, nonequilib. effects 8=27679
light scatt. from chem. reactive fluid 8=32090
linearization of expt. curves, application 8=27680
magnetite oxidation to γ-Fe_2O_3, mechanism rel. to Fe^{2+} diffusion kinetics 8=27702
metal oxidation at high temp., rel. to specific area and core dimensions 8=36551
metal oxidation rate-constant determ., low-temp., from discontinuous film resistance changes 8=49883
methanol ion-mol. reactions, ion cyclotron reson. 8=27709
minerals sintering, thermal analysis meas. 8=30665
mixer for obs. in soln. 8=32086
molecular beams, use in 8=27683
multi-ionic reaction rates, strength independ. 8=49845
oxide-containing graphite arc electrodes 8=34436
in organic single cysts. mag. reson. meas. 8=27449
quantum dynamics of Morse oscillator 8=33333
R-matrix theory appl. in molec. scatt. cases 8=43427
radicals in flow capillaries, e.p.r. meas. 8=27690
rare-earth orthoferrites, calcination preparation technique 8=49865
reactivity correl. with i.r. intensities 8=43253
reactor, continuous flow stirred tank, limit cycle behaviour analysis 8=32081
relaxation effects on dielec. dispersion 8=48187
stearic acid and Ca^{2+} ions at air/water inferface, using surface viscometry 8=41264
substitution reactions in octahedral complexes, ligand field theory 8=45318
thermal unimolec., collisional energy transfer 8=27682
thermobalance for h.p. studies 8=45316
thermobalance, 0.1 mg sensitivity, $\leqslant$ 1,150°C 8=23792
unimolec. rate const., second-order, rapid calc. 8=32089
unimolecular breakdown, Lindemann-Hinshelwood mechanism 8=49842
unimolecular rate theory, adiabatic rotations 8=41243
unimolecular reaction rates, Monte Carlo calc. 8=25645
vapour phase esterification of acetic acid with ethanol, thermodynamic equilibrium 8=49837
vinylphosphonic acid dichloride, γ-induced polymerization, obs. 8=49913
Zircaloy-2 oxidation in O and H_2O vapour 350-500°C 8=32106
zirconium nitriding 8=44396
Ag_2S form. on AgBr cryst. 8=49853
Al on SiO_2, moisture effects, obs. 8=45328
$Ar^+ + D_2$ and $Ar^+ + H_2$ 8=45323
B, particulate, gas-phase chem. kinetics for burning in dry air 8=36581
CaF_2 hydrolysis, 1000-1120°C 8=49859
C-H-N-O explosives, detonation velocity prediction 8=41262
CHO^+ ion-mol. proton transfer 8=49869
CH_3I reactive scatt. with Rb atoms, asymmetry 8=47728
$Cl + H_2 \rightleftarrows HCl + H$, using e.s.r. detect. 8=49861
CN, e absorpt spectroscopy 8=27700
CN, excitation in active N_2 8=27699
CO, chemiluminesc. from flames 8=27698
Cs–O system, heats of formations 8=32096
CuF^+ complex, lifetime 8=48222
$F_2SO_3 + SO_3$, thermal reaction 8=45333
Fe oxide film growth in neutral soln. 8=27706
Fe_2S, thermal decomposition in fluidized bed 8=41250
H atom recombination, homogeneous rate 8=36563
H isotope exchange between alcohol and mercaptan 8=36545
H radical, conc. profile in H_2-O_2 flame, gas phase e.p.r. study 8=49892
H with graphite at high temp. and press. 8=47422
H-atom transfers, activation energies 8=27708
$H + D_2$, energetic atom reaction 8=41242
$H + NO_2$, free electron generation 8=49872
HF, dissociation in shock waves 8=25650
H_2–O_2 combustion in shock waves 8=32109
$H_2 + O_2$, luminous emission and combustion peninsula 8=45354
He^+, $He(2^3S)$, with vibr. excited N_2 8=41253
HgCl, dimerization 8=49960
Hg + Cl atom combination 8=49960
K, Rb and Cs reactions with Cl_2 in crossed beams 8=49875
$MgSO_4$, decomposition kinetics rel. to sample mass and processing press. 8=36565
N, active 8=38840
N-salicylideneaniline hydrolysis in H_2O-methanol 8=48164
$N + CH_3CHO \rightarrow HCN + H_2 + HCO$ rate constant 8=27710
NH_2^- ion reactions with triatomic mols. 8=29980
NO afterglow, chemiluminesc. rate consts. 8=38993
N_2 afterglow, temp. depend. of chemiluminesc. 8=27712
$N_2(A^3\Sigma_u^+)$, excitation of NO 8=25494
$N_2(A^3\Sigma_u^+)$, reaction with N atoms 8=25493
$N_2(A^3\Sigma_u^+)$ + Hg 8=34163

Reaction kinetics—contd
$N_2^+ + H_2$ and $N_2^+ + D_2$, low-energy ion-mol. reactions 8=27711
Nb oxidation, 450°-720°C, rel. to scale morphology 8=49878
Nb oxidation rate-constant determ., low-temp., from discontinuous film resistance changes 8=49883
Nb-Ta alloys, oxidation, 550-1050°C 8=36566
$Ne^+ \rightarrow Ne_2^+$ association rate obs. 300°K 8=39049
Ni and alloys oxidation 8=27713
Ni oxidation rate-constant determ., low-temp., from discontinuous film resistance changes 8=49883
O atoms with CH_3 radicals 8=49880
O atoms with CH_3Cl, CH_3Br and CF_3H, rate consts. 8=36568
O transfer from CO_2 to metal surface 8=27735
$O(^1D)$ gas-phase reaction with CO_2, rate const. 8=36614
$O + O_2$ combination 8=41258
O^-, associative detachment reactions, electron prod. 8=39051
O^+, with vibr. excited N_2 8=41253
O_2, interaction with excited organic mols. 8=38956
O_2 + CO + M, vac. u.v. flash photolysis 8=45398
$PbS + CdO \rightarrow PbO + CdS$, solid state 8=49839-40
S^- ion reactions with triatomic mols. 8=29979
Ti oxidation rate-constant determ., low-temp., from discontinuous film resistance changes 8=49883
UO_2 pellets fluorination by Fl to UF_6, 300–540°C 8=32104
V, engassing by O, and chemisorpt. 8=36584
VO_2 oxidation in molten $VO_{2\cdot5}$ soln., obs. 8=27724
$VO_{2\cdot5}$, molten, thermal dissoc., obs. 8=27724
$W(CO_6)$, thermal decomposition kinetics 8=45350
Zn^{65} drop extraction, between liq. metals and fused salts 8=27725
Zr oxidation rate-constant determ., low-temp., from discontinuous film resistance changes 8=49883
Reactors. See Nuclear reactors, fission; Nuclear reactors, fusion.
Re(h)binder effect. See Mechanical strength; Surface phenomena.
Recombination. See Ions, recombination; Semiconductors.
Recombination radiation. See Luminescence.
Recording
See also Sound recording.
all-glass membrane 10-760 torr manometer 8=41625
bubble chamber, photographs analysis by flying image digitizer 8=46960
cinematographic, of holographic interferrogram for time-dependent deform. 8=46760
corona discharge, peak-reading instruments 8=24062
digital, for mass spectra, system design theory 8=38604
digital system for Fourier-transform spectrometry 8=37677
dilatometer for –150° to +1500°C 8=28216
electron trajectories with analogue computer 8=46406
ferromagnet coercive force and magnetization, apparatus 8=49505
flowmeter for 1 ml/min. 8=30363
gas flowmeter, continuous automatic 8=43647
information storage system, energetic model 8=46390
internal mag. field of ellipsoidal specimen 8=46372
i. r. spectrometer, digital 8=24401
laser pulse, Q-modulated, memory tube appl. 8=46535
liquid surface temp., thermistor apparatus 8=37318
magnetic system, effective gap length estimation 8=28534
mass spectrometer ion current ratios, servo-amplifier 8=38610
pen drive, buffer power amplifier 8=41908
photographic, data transfer to computer-compatible mag. tape 8=42351
photomultiplier, pulsed monochromatic light, quantum yield meas. 8=24157
shock waves, detector and gated interval timer 8=41831
synchronous drum for n time-of-flight data 8=47155
two-channel data logger 8=37359
X-ray reflections, Weissenberg goniometer attachment 8=39756
Rectifiers
See also Electron tubes; Semiconducting devices.
inverter, single phase bridge, commutation 8=28461
metal-aluminium oxide contact, rectification at high temps. 8=40630
polar double membranes, I-V and I-time meas. 8=27748
polar double membranes, static effects 8=27747
power supply, s.c.r. preregulator 8=24068
s.c.r., model for prediction of switching with ionizing rad. 8=27165
thyristors, caused of instability and self-switching of p-n-p-n devices 8=27151
Si, impurities effect on reverse current charac. 8=49304
Te-Se-Cd struct., using Se single-crystal film 8=35930
Recrystallization (metals). See Heat treatment.
Red giants. See Stars.
Red shifts. See Astronomical spectra; Cosmology; Relativity/general.
Reflectance. See Reflectivity.
Reflection
See also Neutrons/reflection; X-ray reflection.
dielectric coating on opaque substrate, refl. of monodirect. flux. 8=31935
double Machian, of strong shock wave 8=23947
of electrons from standing light meas. 8=47089

Reflection—contd
flexural waves from intermediate rod of variable thickness 8=41826
Fresnel, at boundary of slab cont. scatterers, effect of radiative transfer 8=32936
plasma, impulse moving, from metallic surface 8=43494
semimetals, of electrons, specular, rel. to Sondheimer effect 8=26957
InAs solid solutions with $A^{II}B^{VI}$ type cpds., spectra 8=41099
Si, of electron pulses (20-1000 eV) 8=35605
acoustic waves
See also Echo; Reverberation.
absorbents, impedence calc. 8=46189
acoustic target, moving as equivalent of filter 8=32910
cardioid microphone meas. method 8=46190
phase determ. from underwater sediment 8=37266
moving fluid layer, theory and reflectivity calc. 8=37267
piston array, reception and refl. calc. 8=46182
plane plastic waves in presence of boundary plane 8=41832
pressure-release surface, expt. 8=46191
pulses, by plane interface 8=23963
transition-zone, theory 8=46184
acoustic waves, ultrasonic
birefringence in deformed isotropic elastic materials 8=46187
harmonics generated by finite-amplitude waves 8=48713
liquid-solid boundary, goniometry 8=48134
time distributions by visualization of airborne waves, effect of hall shape 8=23970
Cu single crystal, low index surface reflectivity 8=30944
electromagnetic waves
beam displacement at anisotropic optical system 8=24208
bianisotropic medium, at interface 8=28616
coefficient meas. for waveguide plasma parameters 8=30052
coefficient of inhomogeneous layer, determ. 8=46015
diffuse, from nonequilibrium medium 8=42012
electro-optical effects at medium-free space interface, static elec. field 8=28607
energy dissipated in absorbing plane parallel plate 8=33131
ferrites, imaginary index 8=46473
films, thin, after excitation of plasmons by e.m. waves 8=40272
freezing clouds, radiometric obs. 8=32224
impedance cylinder of arbitrary shape, asymptotic laws 8=46476
ionosphere, anisotropic and sharply bounded 8=50183
ionosphere, l.f. and v.l.f., coeff. calc. 8=42035
ionosphere, lower, l.f. and v.l.f. calc. 8=50185
lateral wave effect total internal 8=37477
layer radiation, effect of double metallic lattice with equal periods and diff. slots 8=33130
layered media reflecting rays between distant antennas, modified coeff. 8=28615
microwave reflectometer fast sensitive Smith chart plotter 8=24260
microwaves, by shock produced Ar plasma, skin depth effect 8=25743
at moving interface separating two media of different relative permittivities 8=24210
at moving interface separating two media of different relative permittivities 8=24210
at moving interfaces, of e.m. power 8=37476
multiple, in Michelson interferometry, velocity meas. correction 8=42017
piston, vel. and accel. due to e.m. waves 8=33129
at plane boundary of two homogeneous isotropic dielectrics, graphs of describing quantities 8=37479
plane, from perfectly conducting triaxial ellipsoid 8=46475
from plane stratified medium 8=28614
plane wave, incident on sandwiched dielectric reinforced by metal elements with complex shapes 8=24211
plasma, effective index 8=25751
plasma free space interface, harmonic components 8=25750
by plasma inhomogeneous layers 8=43530
on plasma in homogeneous mag. field 8=43538
plasma, shock-produced, electromagnetically driven, electron densities by microwave meas. 8=25720
radio, v.h.f. from star, by visible aurora 8=50170
radio waves, MF-HF band, by method glacier surface 8=24209
radiosignals, from complex shapes, statistical model 8=37478
semiconductors, in mm. range 8=31934
strip, h.f. condition 8=46477
surface, multimode, excitation 8=24212
surface X-ray reflection, anomalous, rel. to surface perfection dependence 8=27529
waveguide with losses and large number of discontinuities resultant refl. coeff. 8=24231
light
See also Mirrors; Optical films.
anthracene, rel. to exciton-phonon interact. and band struct. 8=41161
antireflectant films, theoretical interpretation of behaviour 8=42243
beam at plane interface 8=28845
beam self-trapping in molecular fluids for saturation of non-linear refractive index 8=30478

Reflection—contd
light—contd
B, β-rhombohedral, coeff. anistropy 8=41064
by cloud and dust layers, appl. of probability distrib. of photon optical paths 8=41362
clouds, rel. to particle size distribution 8=41367
coeff. determ., from inhomgeneous layer 8=46015
corner cube reflectors, optics 8=42147
crystal, anisotropic and isotropic medium, refl. laws at boundary 8=27525
diffuse nonequilibrium, in nonhomogeneous plane-parallel layer 8=28873
directional reflection meas. in integrating sphere 8=46718
electrodes in cylindrical spark chamber 8=37804
ellipsometry for modulated reflection studies of surfaces 8=31937
focon reflecting system 8=42124
glare impression, influence of luminance and geometry 8=33298
glass-backed photographic plates, secondary int. reflection, elimination 8=46762
graphite, electronic structure, optical study 8=31279
holograms, copying 8=33292
insulators, surface finish effect 8=27528
internal, total, 2 layer phase compensation 8=46716
intra-cavity reflector for gas laser Q control 8=28670
laser, by plasma, interferometry obs. 8=43541
laser material antireflection coating, single layer, mismatch 8=42060
lattice excited by ultrasonic waves, analytical calc. 8=36290
light source control system for electroreflectance studies on semiconductors 8=27062
metal rough surface, i.r. 8=31932
metals, single crystal and polycrystalline, optical const. determ. 8=45164
multiple internal, spectroscopy of adsorbed layer conformation in polybenzyl-L-glutamate 8=39612
phase-shift transform. props. 8=46719
by planetary atmos. with reflecting bottom surface 8=37005
polarization effects in reflection spectra 8=37683
powder, Perkin-Elmer spectrophotometer attachment 8=28824
prism, tetrahedral reflecting, wedge error and deflection error 8=24362
projector source enlargement 8=37667
quartz, fused, reflectance in vac. u.v., obs. 8=27558
reflectometer determ. principal angle of incidence and azimuth, theory 8=37682
reflector, parabolic, source displaced from focus 8=33244
reflecting surfaces, highly polished, comparison by holographic interferometry 8=31936
reflection echelon, effect of sinusoidal polish errors 8=24414
Rochelle salt crystals, vacuum u.v. spectra 8=36441
from scattering medium 8=42242
solids, double refr. meas. of anisotropy 8=30938
spectral, from wing of butterfly Morpho 8=46656
specular, from a rough surface, var. with incident angle 8=46717
specular reflection at ground, effect on light scatt. from Rayleigh atmos. 8=32242
spiral galaxies, polarization obs. 8=28116
transparent electrodes, internal reflect. spectra 8=41280
uniaxial absorbing crystals, reflectance 8=27527
u.v., rough and smooth surfaces, 1216Å 8=37698
water reflectance obs. rel. to refractive index and dielectric constant calc. 8=43752
$A^{III}B^{V}$ crystals, in determ. orientation 8=39645
Al film on glass, phase retardation meas. 8=31960
Al thin film, of synchrotron radiation 8=27549
Al, thin films, plasma resonance in reflection spectrum 8=30746
Ag film on glass, phase retardation meas. 8=31960
As_2Se_3 and $(As_xSb_{1-x})_2Se_3$ and Sb_xS_3 films 8=31963
Au, reflectance in vac. u.v., obs. 8=27558
[C-N] and [N-H] bonds, valencies in phenylamines 8=47622
CaO, i.r. dielectric response rel. to lattice vibrations 8=41075
CdS, photoreflectance spectra at fundamental absorption edge 8=45183
CdSe:Cu, rel. to fundamental absorpt. edge impurity conc. dependence 8=36349
Cu film on glass, phase retardation meas. 8=31960
Fe film on glass, phase retardation meas. 8=31960
Fe layers, thick evaporated, meas. rel. to gyroelectric and gyromag. consts. 8=36141
GaSb, i.r. spectra, band structure 8=41089
GeSi alloys, spectra in energy region 1.13 eV 8=36366
InAs crystals, in determ. orientation 8=39645
n-InAs, spectra rel. to conduction band structure determ. 8=35771
n-InSe, and absorpt. spectra, optical transitions 8=45196
LiF, improved Kramers-Kronig dispersion analysis of i.r. reflectance data 8=27580
Ni film on glass, phase retardation meas. 8=31960
Ni films, u.v., near Curie point 8=36399
Pt, ellipsometric investigation of anodic films 8=41282
Se films, thin, absorption and reflecting power, in fundamenetal absorpt. region 8=27605

Reflection—contd
light—contd
SnO_2, restrahl spectrum in static dielec. constant, determ., 8=49353
SrO, i.r. dielectric response rel. to lattice vibrations 8=41075
TlSe, spectrum beyond fundamental absorpt. edge 8=36423
VO_2 crystal, spectra in 1.4-6.0eV at 25, 59 and 62°C rel. to semiconductor-metal transition 8=41150
ZnS with one dimensional stacking faults, internal 8=45230
ZnSe, i.r. lattice vibrations 8=49764
ZnTe, i.r. lattice vibrations 8=49764
Reflectivity
See also Diffusion/light; Optical constants; Optical films.
ablation chars, visible and near i.r., from 2200 to 3500°K 8=36334
acoustic, of moving fluid layer, calc. 8=37267
bidirectional reflectance meas. for satellite calibration target in visible and near i.r. 8=41489
clouds of dust and smoke, plane-parallel, reflectance 8=39447
coefficient of inhomgeneous layer, determ. 8=46019
dielectric thin films as mirrors for laser work 8=49674
duralumin changes during laser pulse 8=45169
gas laser mirror, meas. 8=24297
graphite, visible and near i.r., from 2200 to 3500°K 8=36334
inert gases, liq., far u.v., cell meas. 8=34846
measurement using attachment to spectrophotometer 8=46691
metals, pure and alloyed, i.r. reflectances at low temp. 8=27526
photoreflectance effect mechanism 8=49676
powder, Perkin-Elmer spectrophotometer attachment 8=28824
reflectometer, double-beam type, for optical consts. determ. 8=37684
Scotchlite sheeting, in liq. H_2, obs. 8=36312
semiconductor layers, i.v., rel. to meas. of surface concs. and junction depths 8=49265
spatial total reflectivity, for determ. of radiation characts. as fn. of λ and temp. 8=49677
steel, changes during laser pulse 8=45169
transition metals, in vacuum u.v. rel. to dielec. constants and loss calcs. 8=41147
vacuum system meas., angle-doubler 8=37658
Ag film, absorbent and anisotropic, and transmissivity of light 8=49707
Ag, liquid, from thermal emissivity meas. 8=43821
Ag, Al, changes during laser pulse 8=45169
AgCl, 2-21 eV energy range 8=36316
Al_2O_3, reflectance, absorption and transmittance 8=41057
Al_2O_3, spectral reflectance 8=41128
As, infrared, magneto- rel. to interband transitions 8=26900
Au film, absorbent and anisotropic, and transmissivity of light 8=49707
BaF_2, spectra from (111)-cleavage plane, 78°K 8=45175
BaF_2, u.v. spectra 8=36374
$BaTiO_3$:1 at% La, semicond., polaron model and 0.7-7.4 μ 8=35878
Be, far u.v., rel. to 1/ϵ resonance 8=49709
C, visible and near i.r., from 2200 to 3500°K 8=36334
CaF_2, u.v. spectra 8=36374
$Cd_xCa_{1-x}O$, optical, and elec. props. 8=49137
$CdGeAs_2$, amorphous and polycryst., in 0.6-5.5 eV region 8=49712
$Cd_xSr_{1-x}O$, optical, and elec. props. 8=49137
CdTe, pure and In doped, free carrier effect 8=31974
CeO_2, spectral reflectance 8=41128
Cs, thermoreflectance spectrum in visible and near u.v. region 8=41101
CsBr in rock salt structure, reflectivity 8=45184
CsI in rock salt structure, reflectivity 8=45184
Cu, changes during laser pulse 8=45169
Cu_2O rel. to lattice fundamental vibrs., 290°K 8=39873
GaAs, change with excitation by laser radiation 8=36367
GaAs, electroreflectance rel to interband transitions 8=49728
GaAs, electroreflectance stress dependence rel. to electronic structure 8=49725
p-GaAs, rel. to hole masses, light and heavy 8=35886
GaAs, rel. to plasma reson. on non-equilib. carriers, 10.6μ 8=40454
(Ga, In)As, electroreflectance rel to interband transitions 8=49728
p-GaSb, rel. to hole masses, light and heavy 8=35886
Ge, change with excitation by laser radiation 8=36367
Ge, electroreflectance stress dependence rel. to electronic structure 8=49725
Ge, rel. to plasma reson. on non-equilib. carriers, 10.6μ 8=40454
InAs, electroreflectance rel to interband transitions 8=49728
K, thermoreflectance spectrum in visible and near u.v. region 8=41101
KF, u.v. spectra 8=36374
LiF crystals, far u.v. props., effect of polishing 8=41112
MgO, spectral and i.r. dispersion 8=41022

Reflectivity—contd
Pt, optical functions deduced from reflectance data 8=45216
Rb, thermoreflectance spectrum in visible and near u.v. region 8=41101
Se, trigonal, spectrum in vacuum u.v. 8=27606
Si, electroreflectance stress dependence rel. to electronic structure 8=49725
Si, rel. to plasma reson. on non-equilib. carriers, 10.6μ 8=40454
SiO_2, glassy, curve rel. to absorpt. 8=49754
SiP_2 and $SiAs_2$, reflectance meas. 8=40484
$SrTiO_3$, electrorefl. oscills. rel. to h.f. free-carrier mass 8=36415
$SrTiO_3$, near absorpt. edge 8=27609
TiO_2, spectral reflectance 8=41128
VO_2, in semiconducting and metallic states 8=49760
Y_2O_3, spectral reflectance 8=41128
Zn, basal-plane vacuum u.v. reflectance meas. 8=45233
$Zn_xHg_{1-x}Te$ solid solutions, fundamental spectrum 8=45232
ZnO, spectral reflectance 8=41128
Refraction
Michelson interferometer, for refractometry, and for absorpt. and spectroscopy 8=33272
random media, wave propag. 8=42005
acoustic waves
See also Dispersion/acoustic.
underwater horizontal propag., fluctuation, due to refraction 8=36698
acoustic waves, ultrasonic
No entries
electromagnetic waves
See also Electromagnetic wave propagation.
bianisotropic medium, at interface 8=28616
cylindrically stratified media 8=42013
electro-optical effects at medium-free space interface, static elec. field 8=28607
microwaves, obliquely incident on plasma slab 8=34496
new methods and results 8=37480
at plane boundary of two homogeneous isotropic dielectrics, graph of describing quantities 8=37479
refractive index, surface of magnetized medium 8=24214
rel. to earth satellite path meas., r.f. refr. in inhomogeneous medium 8=28635
screen with random inhomgeneities, field structure behind 8=37481
troposphere, fine scale struct. and refr. index meas. 8=32201
troposphere, psychrometer radiosonde 8=28601
troposphere, superrefractive with nontrapping surface layer 8=32252
light
See also Double refraction.
beam at plane interface 8=28845
birefringent media, Brillouin scattering 8=27537
n-butyl alcohol, temp. derivatives 8=34803
crystal, anisotropic, and isotropic medium, refraction laws at boundary 8=27525
glasses, refractometer determ. refr. index 8=37636
heat-transfer interferometry, error evaluation 8=28395
nonlinear media, self-focusing filaments, prod. mechanism 8=42153
plane surfaces, spectrum meas. 8=28846
by-pyrex vacuum coated surface, obs. 8=36319
rough surface obs. 8=36319
scalar wave in random medium, statistical props. calc. 8=42240
self-focusing pulses freq. spectrum broadening 8=28842
triglycine sulphate single crystal, rel. to temp. 8=36439
uniaxial absorbing crystals, reflectance 8=27527
by Al vacuum coated surface, obs. 8=36319
As_2Se_3 and $(As_xSb_{1-x})_2Se_3$ and Sb_xS_x films 8=31963
CdS active oscillator, focusing of laser beam 8=28882
Refractive index
α-quartz crystal, refractivity interpret. 8=49756
atmosphere, r.f. difference spectra 8=50153
glycine sulphate, ferroelec., temp. depend. 8=45243
plasma, for e.m. waves at oblique incidence, calc. 8=30067
of polarizable particle system, calc 8=24215
profiles in spherically stratified isotropic media 8=33128
radio, troposphere, variations, relation with meteorological conditions 8=50154
radio, troposphere, variations, spectral charact. 8=50155
$BaTiO_3$, temp. dependence 8=49708
Be atom, Hartree-Fock calc. 8=47485
He atom, Hartree-Fock calc. 8=47485
Ne atom, Hartree-Fock calc. 8=47485
$SrTiO_3$, temp. dependence 8=49708
Xe liquid and vapour, —59.0°C — 16.5°C, and Lorentz-Lorentz junction 8=43809
light
See also Dispersion, optical; Double refraction; Optical constants.
α- and β-$TiCl_3$, and absorpt. spectra 8=36417
amyl and isoamyl alcohol, temp. derivatives 8=34803
anthracene, 5–100μ thickness meas. from refr. index dispersion 8=32043
benzene, shock wave compressed, obs. 8=39370

Refractive index—contd
light—contd
benzodioxane-1, 4 soln., of solvent rel. to absorpt. spectrum of soln. 8=39376
cholesteryl 2-(2-ethoxyethoxy)ethyl carbonate, liq. crystal, obs. 8=30482
complex, in theory of hyperchromism 8= 39365
crystalline lens (rabbit), distribution model 8=46779
determ. with sample in form of sphere 8=28744
Duc de Chaulnes' method for determination 8=28729
electrostriction effect in solids rel. to self-focussing 8=41046
ethyl alcohol, shock wave compressed, obs. 8=39370
europium chalcogenides, meas. rel. to dispersion theory 8=49716
films, thin luminesc., rel. to porosity 8=36454
gases, having non-resonant absorpt. in microwave region, rel. to molecular polarizability, 8=47972
glass, fine annealing for homogeneity 8=41141
glass, mean reference for F and C achromatism, simplified expression 8=42161
glass powder, compression under 10-65 kbar effects 8=40164
glass, variation in strong field of ruby laser 8=41098
glasses, effect of mixed γ-n radiation 8=44493
glasses, reference index proposal 8=36410
glasses, rel. to composition 8=31996
glycerine, shock wave compressed, obs. 8=39370
group index for air 8=47967
interference filters, rel. to bandwidth 8=24376
interferometer for direct recording 8=28861
ionic crystals rel. to polarizabilities 8=36390
leucosapphire, grown from tungstate melts 8=39648
liquids, nonlinear, rel. to molecular light scatt. 8=43815
liquids, ruby laser-induced variation absolute meas., 8=43818
liquids, variation in strong field of ruby laser 8=41098
lithium niobate, melt-grown, rel. to comp. 8=41114
many-particle system, dielec. const. theory 8=37680
minerals, absorbing anisotropic, and absorpt. coeff. 8=41061
in optical density determ., correction factor 8=37681
optical glasses, meas. 8=37636
para-terphenyl, 5–100μ thickness meas. from refr. index dispersion 8=32043
plane surfaces, differential meas. 8=28846
plastic scintillator NE 102A, 5–100μ thickness meas. from refr. index dispersion 8=32043
polymers in binary mixed solvents 8=30472
polyoxymethylene extended chain crysts., X-irrad. effects, $< 4.8 \times 10^7$ R 8=44509
polystyrene lattices, suspension light scatt. meas., 589, 546 and 436 mμ 8=34934
polystyrene solns., , depene. on conc. and temp. 8=44065
propane, liquid, 17.4-65.8°C, 4358, 5461 and 5791 Å 8=30483
quartz, from asymmetric interferograms, 20-400 cm^{-1} 8=28844
quartz, ordinary and extraordinary, in vac. u.v., from interference in thin parallel plate 8=32034
quasi-monochromatic wave through dispersive medium, meas. 8=46713
random heterogeneities, rel. to dispersion laser emission, 8=37566
ruby, grown from tungstate melts 8=39648
seawater, Copenhagen, spec. refraction and dilutions, chlorinity, wavelength and temp. dependences 8=50114
secondary spectrum of two-element lenses in i.r. 8=45144
silicon polymer, glow-discharge deposited 8=49763
tetracene, 5–100μ thickness meas. from refr. index dispersion 8=32043
theoretical formulae from correlation functions 8=28876
thin films, and thickness obs. by ellipsometry 8=31931
trans-stilbene, 5–100μ thickness meas. from refr. index dispersion 8=32043
uniaxial absorbing crystals, reflectance 8=27527
water, calc. from reflectance obs. 8=43752
AgBr, colloidal, complex refr. index, near-u.v. 8=43891
Ar, gas, liq. and crit. state 8=47967
Ar, rel. to gas-liquid coexistence curve shape near critical state 8=30590
CaF_2-Tb_2O_3($Tb(OF)_3$)(TbF_3) solid solns., rel. to crystal chemistry 8=39640
CCl_4, shock wave compressed, anomalies, obs. 8=39370
CdS single crystals, rel. to temp. 8=45182
CO_2 cryodeposits on 77°K surface, from Bragg interference meas. 8=41068
CuCl film, obs. 8=31982
GaP, meas. between 0.545 and 0.70μ 8=41092
GaSb near energy gap, from diode laser modes temp. depend., 80°K 8=41088
K film, for photons 3.96 to 9.69 eV 8=49731
KBr, from asymmetric interferograms, 20-400 cm^{-1} 8=28844
KCl, far u.v. obs. 8=27592
KCl, impure crystals 8=32005
$K_2Mn_2(SO_4)_3$, langbeinite structure, rel. to electro-optical props. 8=39678
$K_2Ni_2(SO_4)_3$, langbeinite structure, rel. to electro-optical props. 8=39678

Refractive index—contd
light—contd
$LiNbO_3$, ordinary and extraordinary, variation with hydroatatic press. 8=27582
$LiTaO_3$, ferroelectric, 20-800°C, 468-644 mμ 8=41113
$LiTaO_3$, refr. indices, 20-800°C, 468-644 mμ 8=41113
NaCl, far u.v. obs. 8=27592
Nb_2O_5, insulating films 8=49763
$(NH_4)_2Mn_2(SO_4)_3$, langbeinite structure, rel. to electro-optical props. 8=39678
RO-TiO_2-SiO_2 systems (R = Ca, Sr, Ba, Zn, Cd), $\mu = 1.58-2.11$ 8=44079
$Rb_2Mn_2(SO_4)_3$, langbeinite structure, rel. to electro-optical props.. 8=39678
SiC, 6H polytype, 2.43-0.336μ 8=36407
Si_3N_4, insulating films 8=49763
$SnSe_2$, and absorpt. coeff. 8=45220
Ta_2O_5, insulating films 8=49763
ThF_4 films, dispersion 8=35184
$Tl_2Mn_2(SO_4)_3$, langbeinite structure, rel. to electro-optical props. 8=39678
ZnO, meas. room to liq. He temps. in region near absorpt. edge for $E \perp C$ and $E \parallel C$. 8=41154
ZnO, using interference technique 8=49763
ZnS, using interference technqiue 8=49763
Refractive index measurement
gas, dispersion, microwave dual-mode cavity 8=47969
glass and liquids, by precision refractometer 8=42190
i.r. interferrometric arrangement 8=42246
small changes, with interferometer 8=46722
troposphere, for e.m. waves, psychrometer radiosonde meas. 8=28601
Refractometers
for liquids and gases, automatic with digital or analog readout 8=28750
precision meas. 8=28752
PR2-PULFRICH type, universal precision instrument for glass and liquids 8=42190
Refractories. See High-temperature production and effects.
Refrigerators. See Low-temperature production.
Regge poles. See Scattering, particles.

  - Aleutian Island arc, anomaly patterns and sea floor spreading 8=50218
  - Atlantic, S., mag. anomalies and floor spreading 8=36897
  - anomalies assoc. with mid-oceanic rises, rel. to crustal spreading theory 8=50089
  - basalt, North Mountain, of Nova Scotia 8=32368
  - basalt samples from Bavaria 8=50232
  - Bulgarian andesites, stability and petrology 8=28013
  - deep sea cores, paleomag. stratigraphy and micro-paleontology 8=50102
  - Dotswood red beds, (Queensland), magnetization 8=28014
  - igneous rocks, remagnetization problems 8=50229
  - Indian Ocean, anomalies and floor spreading 8=36898
  - Juan de Fuca ridge and linear inverse problem soln. 8=28019
  - Keweenawan partial self-reversal, magnetization of Portage Lake lavas 8=32369
  - Keweenawan, partial self-reversal, magnetization of upper lavas and sediments and lower dikes 8=32370
  - late mesozoic dolerites from Spitsbergen, anomalous poles 8=50224
  - magnetic bed, residual magnetization change occasioned by explosion 8=50220
  - magnetite, at margins of crystallites. domain struct. behaviour 8=50225
  - magnetite, single domain, in pyroxene grains, rel. to total thermoremanence 8=50230

Rock magnetism—contd
  magnetometers, spinner, static charge elimination 8=50231
  marine anomalies, reversals, floor and continent movements 8=36899
  Maringouin formation, New Brunswick, diagenitic remanent magnetization of samples 8=32373
  mid-Atlantic Ridge crest anomalies form., dyke injections scatter 8=28016
  mineral, anomalously magnetic, in mag. props. 8=31595
  Monteregian Hills, paleomagnetism, new results 8=36895
  Pacific, anomalies and sea floor spreading 8=36896
  paleomagnetic field intensity, outline from 25 × 10^{-9} yr to present 8=28017
  paleomagnetism, book 8=45574
  palaeomagnetism, palaeozoic 8=45572
  Palaeozoic palaeomag. poles for Europe, synthesis and reliability of data 8=28015
  Pliocene basalts from S.W. U.S.A. 8=32371
  pyrrhotite samples, mag. phases 8=50222
  ridge, mid-oceanic, simulation of linear anomalies by dyke injection 8=36900
  suggested rotation of New Guinea 8=32372
  surveys spectral analysis and Carlsberg Ridge anomalies 8=28018
  Talchir series in central Indra, mean magnetization dirn 8=50219
  thermally activated mag. viscosity in multidomain particles of ferromag. subst., theory 8=50226
  volcanic rocks, tertiary, remanent magnetization rel. to paleo-intensities of geomag. field 8=45573
  volcanics of Reunion Island, palesmag. obs. 8=50221
Rockets
  Ablestar, orbital period increases (1966) 8=41483
  data handling system for solar X-ray meas. 8=50445
  E-region electron temp., rocket obs. 8=41444
  exhaust, drag coeff. small spherical particles 8=30569
  exhausts, i. r. radiant heat transfer from H_2O, CO_2, CO and C mixtures 8=41482
  high altitude obs. of electron density profiles in magnetosphere 8=50166
  in ionosphere D-region, meas. of height distrib. of electron density 8=32327
  laser beam attenuation and polarization rotation meas. through rocket plumes 8=50234
  motor chambers and exhaust plumes, meas. of gas and particle temps. 8=32977
  Nike Apache, D-layer sunrise electron obs. 8=27988
  orbiting Jupiter, difficulties 8=28021
  polarization analyzer, far u.v., for rocket use 8=41486
  Saturn auxiliary solid fuel motor exhaust, spectral radiance obs. 8=38815
  scale model exhaust, spectral radiance props. 8=38815
  space-propulsion systems, analysis of gascore reactors 8=47388
  for space research, review of technology 8=32380
  v.l.f. Doppler expt. for rocket obs. of ionosphere 8=45537
  [OI] 5577 Å emission and continuum at 5300 Å in night airglow, rocket obs. 8=45499
Rotating bodies
    See also Angular velocity measurement; Centrifuges; Earth/rotation; Gyroscopes.
  discs solid or with central hole, plastic deformation for work hardening materials 8=26762
  paraboloidal mirrors made by rotation method, surface shape investig. 8=46659
  precession types in rotary motion of rigid body 8=23817
  rigid, geometrical vector representation 8=32700
  satellite, magnetized equatorial, motion about own centre of mass 8=45579
  satellite, symmetric, in elliptic orbit, altitude instability 8=28022
  δ Scuti variable star, pulsation limitation 8=45687
  solid with fluid field cavity 8=46018
  sphere, deformation soln. 8=32698
  wheel, elastic, lateral force property in presence of thrust, exptl. study 8=41644
Rotation, molecular. See Molecules/rotation.
Rotatory power, dispersion. See Optical rotation.
Rubber
  chloroprene-vulcanizate blocks, crystalline structures 8=26145
  compression of cylinders by end loads, stability 8=44610
  crystallization in extension, kinetics 8=39683
  crystallization, stress-induced, light scattering obs. 8=39682
  dielectric props. and molec. struct 8=31425
  elasticity, eqn. of state 8=26858
  elastomers, fatigue fracture rel. to loading history 8=31178
  equilibrium compression, stress/strain relations 8=31251
  friction, effect of load on temp. and velocity depend. 8=31252
  gasket sizing and shaping technique 8=45932
  latexes, light diffr. 8=48237
  magnets, ferrite-loaded, props. 8=24111
  membrane permeability, elongation dependence 8=44397
  porous, axial compression of cylinders in torsion 8=31253
Rubber—contd
  vulcanizates, natural, filled with carbon black creep behaviour 8=26860
Rubidium
  atoms in flames, quenching of excited 5^2P atoms 8=34150
  atom reactions with Cl_2 in crossed beams 8=49875
  atom scatt. on Kr, total scattering cross sections 8=34178
  atom, time dependence of quantum-state amplitudes 8=38710
  atomic beams, reactive scatt. with oriented CH_3I 8=47728
  atomic clock as frequency standard 8=45958
  distribution between potassium feldspar and plagioclase simultaneously crystallized at 600°C 8=36627
  equation of state, theory, and calc. of thermal parameters 8=30973
  films, LEED exam 8=48453
  films, vacuum-condensed, photoelec. props. 8=44944
  fluorescence, quenching cross-sections, determ. by flame tech. 8=29617
  inert-gas collision excitation transfer cross-section calc. 8=47543
  isotope distrib. in p-reactions on U, Th, Ta 8=34001
  jet atomic clock, optical pumping 8=47525
  liquid near melting point, meas. 8=30421
  melting curve up to 80 kb 8=34961
  metal, indirect nuclear interactions, theory 8=43937
  optical pumping in weak mag. field 8=38709
  resonance radiation, quenching by gases 8=29626
  solar photosphere, abundance obs. 8=45894
  thermoreflectance spectrum in visible and near u.v. region 8=41101
  vapour, photoionization absorpt. continua 8=29973
  Rb^{85} vapour, double-quantum resonant, light beam modulation 8=37629
  $Rb^{85,87}$ atom g_J ratio meas. by optical pumping 8=38734
  $Rb^{85,87}$ atom, $8^2P_{3/2}$ state hyperfine structure and lifetime 8=34149
  $Rb^{85,87}$ hyperfine structure and lifetime of $7\,^2P_{3/2}$ state 8=34151
  Rb^{87} atom, light shift following optical pumping 8=38708
  Rb^{87} maser, theory rel. to relax. times 8=24266
  Rb^+, diff. in $LiSO_4$, 590-820°C 8=39977
Rubidium compounds
  halides, neutron irrad., rare-gas diffusion 8=40079
  K_2Rb_2 photon interactions, 3000-1100Å, spectral range, u.v. cross section obs. 8=43315
  $RbAg_4I_5$, ht. of formation 8=48396
  $RbAg_4I_5$, Ag diffusion rel. to high-conductivity in solid electrolyte 8=48787
  $RbBiF_3$ mag. props. meas. in strong pulsed fields at 4.2 and 77°K 8=40844
  RbBr-CsBr system, phase diagrams and comp. of phases 8=35096
  RbCl beam, state selection and focusing 8=38964
  RbCl crystal, phonon scatt. by U centres, thermal conductivity meas. and theory 8=44301
  RbCl, K-absorption, stress-induced effects 8=41132
  RbCl-CsCl system, phase diagrams and comp. of phases 8=35096
  $RbClO_4$ in dioxane-water mixtures, conductance meas. at 25°C 8=41274
  $RbCoF_3$, spin-density space oscills. and hyperfine interaction, from n.m.r. 8=31917
  RbF, electron irrad., colour centres. obs. with oven cryostat. 8=48880
  $Rb^{85}F^{19}$, h.f.s., Stark and Zeeman effects 8=25514
  $RbFeF_3$, Fe^{57} hyperfine structure from Mossbauer effect 8=31795
  $RbFeF_3$, : Fe^{2+} octahedral, magnetically induced elec. field gradients Mossbauer determ. 8=31794
  RbH_2AsO_4, crystal lattice parameters, temp. depend. and thermal expansion anisotropy 8=44348
  RbH_2AsO_4, n.q.r. spectra, rel. to temp. 8=41009
  RbH_2PO_4 crystal for laser freq. doubler 8=37557
  RbH_2PO_4, crystal growing, static method, optimal conditions 8=44142
  RbH_2PO_4, dielec. and electromechanical props. near phase transition 8=27275
  RbH_2PO_4, dielec. props. near phase transition pt. at u.h.f. 8=40617
  RbH_2PO_4, optical detection on laser illumination 8=45203
  RbI, crystal dislocations, selective etchant 8=31087
  RbI, dislocation pinning by lattice defects 8=26680
  RbI, F-centre form. by u.v. irrad. 8=44479
  RbI film, reflection and absorpt. spectra in u.v. 8=32025
  RbI, Schottky defect formation energy, from dissolution of impurity containing precipitates 8=35536
  RbI-AgI, high-cond. solid systems 8=48396
  RbI: Tl, exciton induced luminesc. in activator centre 8=26506
  $Rb_2MnCl_4 . 2H_2O$, nuclear spin-lattice relax. of several nuclei 8=31916
  $RbMnF_3$, absorpt. spectra of Mn^{2+} 8=41109
  $RbMnF_3$, broad-band fluorescence rel. to temp. 8=49811
  $RbMnF_3$ dielec. props. 8=40584
  $RbMnF_3$, fine structure in $^6A_1 \rightarrow {}^4T_1(^4G)$ obs.
  $RbMnF_3$, inelastic n. scattering near Neel pt. rel. to spin fluctuations 8=31796
  $RbMnF_3$, i. r. transmission spectra 8=27600

Rubidium compounds—contd
  - $RbMnF_3$, magnon-magnon interactions evidence 8=40875
  - $RbMnF_3$, nucl. and electronic spinwave excitation by parallel pumping 8=31835
  - $RbMnF_3$, spin correlations in paramag. state 8=49484
  - $RbMnF_3$: F^{19}, nuclear acoustic resonance, dispersion mode saturation 8=41000
  - $RbMnF_3$:Nd^{3+}, luminesc. anomalies near antiferromag. ordering temp. 8=32057
  - $Rb_2Mn_2(SO_4)_3$, langbeinite structure, growth and electro-optical props. 8=39678
  - $RbNO_3$ molten, optical determ of thermal cond. 8=39255
  - $RbNO_3$, phase diag. in 200-330°C and 0-1500 atm. range 8=39469
  - Rb_2NaTF_6, (T = Yb, Er, Ho, Y, Tb and Sm), crystal structure 8=44250
  - $RbNi_{1-x}Co_xF_3$, mag. and optical props. 8=49555
  - $RbNiF_3$, electron-magnon interaction, effect on absorption band 8=41127
  - $RbNiF_3$, high press. phase transform. and mag. susceptibility 8=48661
  - $RbNiF_3$, mag. structure 8=31737
  - $RbNiF_3$, magneto-optical and n.m.r. studies 8=32023
  - $RbNiF_3$, n.m.r. rel. to exchange interaction exam. 8=41001
  - $RbNiF_3$. spin-ordering on Ni ion substitution 8=31738
  - RbO_2, phase transforms and crystal structures 8=26075
  - Rb_2PtCl_6, luminesc. 8=36505

Ruby
  - coherent radiation from crystal, effect of parameters of pumping light source and discharge regime on output 8=24330
  - conductivity, electrical 8=49338
  - electrical conductivity, 20-850°C 8=27236
  - e.p.r. line broadening, inhomogeneous 8=49597
  - e.p.r. of Cr ion-paris, exchange-coupled, in excited optical state 8=31859
  - e.p.r., pseudo-Stark components widths rel. to appl. elec. field, ≤1400 kV/cm 8=31850
  - ferromagnetic interactions 8=49580
  - fluorescence dosimeter for pulsed ionizing radiation 8=45258
  - fluorescence, spatial distribution. R-line quantum efficiency 8=42101
  - frequency shifts, time-dependent, in pulsed laser spectroscopy 8=42054
  - growth from tungstate melts, morphology and optical props. 8=39648
  - laser, and Nd, beam superposition in freq. mixing 8=24333
  - laser at 78°K, generation threshold and axial mode distrib. 8=37601
  - laser, axial mode discrimination calc. 8=33197
  - laser, axial mode separation, generation kinetics and emission spectrum 8=24334
  - laser. coherence function determ. from diffraction 8=37607
  - laser crystal thermal deform. 8=24335
  - laser damage associated with liq. Raman freq. changer 8=42108
  - laser, defects, influence on radiation characts. 8=42105
  - laser, energy of giant pulse, dependence on crystal temp. 8=24329
  - laser excited, photon echoes irrad. intensity depend. and echo dephasing model, obs. 8=36321
  - laser, giant pulse production 8=42102
  - laser, giant pulsing, new method 8=37606
  - laser, in constant resonator Q mode, generation energy and threshold, engineering evaluation 8=42107
  - laser, internal scanning rel. to time charact. improvement 8=46611
  - laser light scattering exam., 8=41058
  - laser light, second-harmonic generation in Ag 8=27548
  - laser, limitation by adiabatic crystal heating 8=37602
  - laser loss meas. 8=28703
  - laser μsec pulse production 8=42114
  - laser, nanosec. pulse production 8=42106
  - laser, oscillation characts. by interaction between two lasers 8=42103
  - laser, passive Q-switched, rooftop prism cavity, single mode beam 8=46606
  - laser pulse, excitation of organic crystal solns. 8=30479
  - laser, pulsed passive optical shutter for reducing fluorescent output 8=24328
  - laser, pumped by Ar ion laser 8=28704
  - laser, Q-modulated, actuated by external signal, time characts. investigation 8=46609
  - laser, Q-switched, periodic pulse generation and diffraction limited osc. 8=28702
  - laser, Q-switching by natural chlorophyll and effect of solvents 8=33199
  - laser, Q-switching speeded by rotary prism 8=24332
  - laser, radial temp. distribution during pumping 8=39909
  - laser, relation between total energy and Q-switching time 8=24338
  - laser resonator filter, loss calc. 8=37603
  - laser, ring, for ultrashort pulses 8=33200
  - laser, self-Q-switching 8=37604
  - laser, single mode generation 8=33196
  - laser, single-mode giant-pulse 8=46607
  - laser, single pulse spectrum 8=42104

Ruby—contd
  - laser, time depend. of spectrum of modes 8=46610
  - laser, undamped regular spiking, in misaligned cavity 8=37605
  - laser with external tilted mirrors, field genesis and structure 8=37608
  - laser, with spatially homogeneous inverse population, generation kinetics, radiation spectrum and direction 8=46608
  - lasers, Q-switching by pheophytin and its derivatives 8=46605
  - light scatt. for quality evaluation 8=45170
  - maser preamplifier for e.p.r. spectrometer 8=33146
  - optical cooling by transfer of energy into atomic vibration 8=39900
  - optical props., effect of γ-radiation 8=41054
  - paramagnetic resonance of Cr^{3+}, non-linear elec. -field effects 8=40906
  - piezospectroscopic studies of exchange-coupled Cr^{3+} pion pairs 8=27646
  - population inversion and pumping absorpt. power 8=24331
  - R-line quantum efficiency and spatial fluorescence distribution 8=42101
  - spin-lattice relaxation and effect of Cr distribution on spin-lattice interaction 8=49621
  - synthetic, Cr nonuniform distribution, causes 8=40011
  - vapour scintillation, emission spectrum time scanning 8=34231
  - Al^{27} n. m. r. structures under dynamic nuclear polarization 8=45111
  - Al^{27} nuclei dynamic polarization by e reservoir temp. transfer, 1. 8°K 8=31892
  - with Cr > 1%, e.s.r. 8=49598
  - Cr^{3+} pair, mag. resonance, elec. field effects 8=40904
  - Cr^{3+} relaxation time, influence of impurities 8=40915
  - Cr^{3+} and Al^{27} in ruby, electron and nuclear paramag. acoustic absorption at 4. 2°K 8=40914
  - TiO_2 doping, reduction of laser prod. damage 8=33198

Russell-Saunders coupling. See Atoms; Spectra/atoms.

Ruthenium
  - electrolytic deposits, internal tension rel. to current density and metal conc. in electrolyte 8=36610
  - filter to select $AgK\alpha_2$ rad., appl. to topography 8=35306
  - surface structs., He field-ion microscopy, comparison with Re 8=26105
  - on $Fe(OH)_2$, ions and colloids sorption, obs. 8=44073
  - Ru^{99} in Ni, hyperfine fields at solute 8=40992

Ruthenium compounds
  - nitrosylrothenium, sorption on $Fe(OH)_2$ of ions and colloids, obs. 8=44073
  - Ru complex, tetraphenyl arsonium tetrachloro cis-diaquo ruthanate monohydrate structure 8=35351
  - Ru diethyldithiocarbamate and nitrosyl salt crystal and mol. structure 8=26375
  - Ru(II) complexes, absorpt. and luminesc. spectra 8=32027
  - Ru-Rh-Pd-Ag: Fe, resistivity, 1. 5-40°K 8=31328
  - $RuBr_6^{3-}$ complexes, mag. circular dichroism 8=49730
  - $[RuBr_2(CO)_3]_2$ crystal and mol. structure 8=26438
  - $RuNO(OH)(NO_2)_2(NH_3)_2$, crystal structure 8=26439
  - RuO_2, rutile structure, de Haas-van Alphen effect meas. 8=27382

Rutile. See Titanium compounds.

SC (sudden commencement). See Magnetic storms.

S-matrix theory
  - See also Dispersion relations.
  - analytic props. from causality conditions in interactions 8=29046
  - approximate formulation using direct mathematic methods 8=46840
  - bubble diagrams, singularity props. rel. to scatt. amplitudes 8=24491
  - causality groups, Zeeman and complex 8=33584
  - classical and quantum, in Born-Infeld two-dim. field model 8=46826
  - crossing-symmetric eqns., solns. proved by fixed-point theorem 8=42415
  - cluster decomp. in time separated non-relativistic scatt. expts. 8=28944
  - in 8-dimensional space by combining isotopic and Minkowskian space-time 8=47025
  - elements, determinantal method generalized to continuous eqns. 8=29063
  - forward scatt. amplitude reconstruction 8=24672
  - functional formulation, quasilocal terms 8=37757
  - functional, generalization for vector field with mass 8=37758
  - general analyticity struct., test using two-nucleon interact. 8=24866
  - high energy behaviour of scatt. amplitudes 8=33590
  - highly absorptive resonant wave, applic. to π-N 8=24664
  - invariant in generalized free field and Zachariasen model 8=28957
  - multichannel analytical properties on impulse complex plane 8=47032

S-matrix theory—contd
N-body problem, equal mass with δ-function interaction 8=29061
nucleon scatt., many-body theoretical calc. 8=33977
nucleon scatt., R-matrix and eigenchannel calc., comparison 8=42414
parametrization in nonorthogonal basis 8=29064
partial harmonics construction for central interact. 8=29062
perturbation expansion, elmination for Klein–Gordon double terms 8=37767
physical, connection between singularities with non-relativistic quantum field matrix elements 8=37759
poles, correspondence to unstable particles 8=33552
potential many-channel scatt., construction 8=29057
potential scattering, rel. to calculations based on Calogero's equation, unitarity 8=33339
production amplitude theorem for scatt. with isotopic spin 8=24665
Pugh eqns. derived 8=24486
quantum electrodynamics, comparison with perturbation calc. 8=24487
Regge pole discussion of S-matrix element behaviour 8=37906
relativistic in terms of wave functions 8=47031
scatt., non-relativistic, single-channel, Mandelstam symm. 8=24663
semi-classical approx. rel. to tree approx. 8=24492
singularities, sheet struct. and multiparticle amplitudes 8=24668
of strong interactions 8=37872
transformation and maximum props. rel. to structure and dynamical group of strongly interaction particles 8=37845
unitarity, in diffractional reactions 8=38443
Cu-Mn(Cr) alloy, magnetoresist. calc. using s-d model 8=26965
SU$_3$ group theory. See Elementary particles; Field theory, quantum/interactions, strong; Group theory.
Safety precautions. See Radiation protection.
Sakata model. See Elementary particles.
Samarium
antiferromagnetic props. from mag. moment meas. at 4.2°K 8=31706
ground level h.f.s. Stark effect obs. 8=29602
monochalcogenides, high pressure phase transformations 8=26070
spectrochem. and nephelauxetic parameters 8=43927
trivalent, in oxide glasses, absorpt. and luminesc. 8=36412
Samarium compounds
SmFe garnets, mag. props. from Mossbauer effect, 85-600°K 8=36196
$SmFe_2$, hyperfine field at Fe from Mössbauer effect 8=36146
$SmFeO_3$, mag. reorientation temp., hydrogen ht. treatment effects 8=40876
$Sm_{1-x}Tm_xFeO_3$, antiferromag. props. 78°-500°K 8=31797
Sampling. See Statistical analysis.
Sand
labelling with Cr^{51} 8=50092
quartz, differential thermal analysis, particle size effects 8=26044
-water mixture, rheological behaviour as function of conc. 8=30545
Satellites, artificial
Ariel III, description, orbit parameters, and characts. 8=41438
Aerial III, equipment for terrestrial radio noise survey 8=28026
Ariel III, spin axis direction from glints of solar reflections 8=36902
atmospheric 4.5μ meas., error sources 8=36747
atmospheric surface press. meas. using laser beam 8=45439
calibration target in visible and near i.r., bidirectional reflectance obs. 8=41489
communications in UHF band, scintillation fading out effects 8=45581
cylindrical, internal rad. environment, lab. study 8=32384
Discoverer 36, scintillation of 20 Mc/s radio signals rel. to spread-F 8=32354
dynamics, effect of elasticity 8=41640
earth, r.f. path meas., refraction errors calc. 8=28635
earth, stabilization, mag. and gravit. fields effects 8=32381
for earth's external gravity field determ. 8=27819
by earth's magnetic field, passive stabilization 8=32383
elastic, dynamics 8=45578
electrostatic analyser for 1-100keV particles 8=50241
Explorer 17 Langmuir probe, end effect 8=32320
free fall structure design 8=23818
FR-1, instrumentation 8=45582
geomagnetic field meas., suggestions 8=28004
gravity meter meas., comparison with satellite obs. results 8=50008
grid-sphere, orbital behaviour 8=28024
interference and noise, influence on design of receiving systems at < 50 MHz 8=50240
Satellites, artificial—contd
ionosphere, electron density, by ground-based obs. of radio signals from cosmic vehicles, review 8=41415
ionosphere, F region, electron-ion collision effect on wake structure 8=34443
ionospheric investigation using signals 8=50189
ionospheric, spherical, electrostatic pot-fields and wake 8=41414
at low perigee, for meas. of density variations 8=36767
magnetic analyser for 100keV-1MeV e 8=50242
magnetosphere expts., suggestions 8=32260
magnetospheric radio noise obs. from satellite 8=45496
meteorological, review 8=45438
meteorology, observing techniques 8=36704
movement study by intermediate orbit method 8=50237
motion about own centre of mass, magnetized equatorial 8=45579
motion, rel. to determ. of sectorial harmonics in geopotential 8=28003
Nimbus II, obs. of cloud systems in 7 spectral bands and 4 size scales 8=41338
Nimbus II, obs of sea surface temps. and ocean currents 8=41335
observation methods; visual, radio, radar and optical 8=50238
orbits, circular, stability in planet's gravitational and dipole magnetic fields 8=50236
orbit disturbances due to gravity anomalies anal. integration 8=45580
orbit, near-circular, contraction under air drag, rel. to day-to-night density variation 8=28023
orbits, plane, invariant curves 8=32385
Orbiting Astronomical Observatory, alignment of multi-component optical system to common coordinates 8=42174
OV3-3, electrostatic and e.m. wave detection 8=41490
perturbation methods appl. to resonance 8=32387
perturbation rel. to aerodynamic resistance 8=32386
photographic tracking 8=50235
range-energy spectrometer for 6-100MeV p
rotating, elastically connected rigid bodies, dynamics 8=41487
rotation in elliptical orbit 8=32382
satellite particle detector systems for cosmic rays 8=47183
scintillation spectrometer for relativistic e 8=50243
spectrometers for 100keV-6MeV p 8=50244
spinning, symmetric, in elliptic orbit, altitude instability 8=28022
Sun, crossed by unidentified object August 1966 8=45575
torque in non-inverse square gravitational field 8=32388
tracking, Minitrack system, effect of satellite interference 8=50239
for unknown parts of earth's gravity field from successive passages 8=41315
v.l.f. receiver parameters 8=32264
Scalers. See Circuits; Counting circuits.
Scandium
lattice params. and thermal expansion rel. to para-antiferromag. transition, 20-660°C 8=44253
Sc III spectra, principle series, transition probabilities in doublets 8=47506
Scandium compounds
halides subgroup, molecular vibrational freqs. calc. 8=29761
$(Sc, Er)VO_4$, lattice parameters and Miller indices, using computer programmes 8=44252
ScF_3, vapour press., enthalpies and entropies in range 1050°-1200°C 8=35015
$Sc(Ni_{1-x}Co_x)_2$, n.m.r. line shape of Sc^{45} rel. to impurities and vacancies 8=45133
ScO, red system, rot anal. 8=25518
Sc_2O_3, cryst. struct. 8=48673
Sc_2O_3:Nd^{3+} spectra, Stark splitting scheme and $^4F_{3/2}$ lifetime, 4.2–293°K 8=32017
$ScVO_4$, lattice parameters and Miller indices, using computer programmes 8=44252
$ScVO_4$: Eu^{3+}, luminescence rel. to Hamiltonians at Eu^{3+} site 8=41208
Scattering
alkali-inert gas interatomic pot. from scatt. data 8=47541
atoms, impact parameter treatment 8=38741
atoms in collisions, rel. to cross-section for electronic excitation 8=25387
central scatt. by two-phase systems, theory rel. to distrib. of diluted phase 8=26050
Coulomb functions, phases and amplitudes 8=37751
diffraction of nuclear particles on atomic nuclei, state mixing effect on cross-section 8=38444
diffuse, in crystal, periodic bond chain theory rel. to thermal vibrations 8=26005
Dirichlet, l.f. scalar, by general ellipsoid 8=41636
disortion-operator perturbation theory 8=42314
effect on radiative transfer in medium with absorpt. and emission 8=37227
elastic, from separable non-local potential, rel. to phase shift 8=33337
energetic atoms in gas, energy distrib. 8=36626

Scattering—contd
impact parameter representation, applic. to pot. scatt. and protons on H 8=46821
inelastic, based on microscopic nuclear descriptions, coupled channel treatment 8=47300
inelastic, semiclassical theory 8=46822
inverse, interpolation formulae in angular momentum plane 8=28938
iteration procedure to generate approx. 8=28947
Kondo system, Green's function perturbation technique 8=37755
metals with magnetic impurity, ordinary rel. to exchange 8=26863
molecular cross sections, exptl. determ. 8=29846
Mott, of electrons on Hg atom, obs. rel. to Lin theory 8=34171
multiple coherent, theory verification from Ne excitation expts 8=43224
multiple scatt. on plane layer of matter anal. including slowing down processes 8=40064
multiple turning-point, semiclassical calc. 8=28945
multiple wave theory, soln. of eqns. by smooth perturbation method 8=46001
non-local pots. asymptotic behaviour of phase shifts 8=42782
nuclear, Coulomb interference corrections 8=29389
one-dimensional, in configuration and momentum space, teaching film 8=37754
optical theorem in theory of multiple wave scatt. 8=37119
phase shifts calc. for spherically symmetric potentials 8=37753
polarization waves in liquids, exciton theory 8=34754
potential, angular momentum continuation of radial s-wave function 8=24468
potential many channel, construction of V, S matrices 8=29057
pot. nonrelativistic, Regge-pole analysis 8=28943
potential, nuclear Hartree-Fock spectra 8=25106
pot., singular, attractive, leading to nonself-adjoint Hamiltonians 8=33335
pot., values at origin in terms of S-wave phase shift and bound-state parameters 8=33330
pressure broadening of rot. and vibr.-rot. transitions 8=47558
quantum mechanical foundations 8=29395
radiant heating of an absorbing and scattering slab 8=46228
radiation, multiple, equivalence of isotropic and mono-directional source problems 8=36744
in radiative transfer, eqn. 8=32860
Raman, by polaritons 8=41032
Regge-type representations for Yukawa pot., partial-wave amplitudes 8=33595
resistivity anomaly due to mag. impurities, effect 8=44673
S matrices, classical and quantum in Born-Infeld field theory 8=46826
S matrix cluster decomp. in time separated non-relativistic scatt. expts. 8=28944
S-matrix, functional, generalization for vector field with mass 8=37758
S-matrix theory, functional formulation, quasilocal terms 8=37757
scalar massless waves on Schwarzschild singularity 8=36929
Schrodinger eqn. with singular pot. 8=28946
for Schrodinger operator in exterior domain, scattering 8=33336
time delay, collision lifetime matrix 8=41947
time correl. function formalism 8=29386
two-body collisions, method of moments 8=46820
2-body, non-local factorizable potential, with and without Coulomb repulsion 8=37752
yakawa potential, relation between scatt. amplitude for imaginary ang. mom. and pot 8=33571
II-VI crystals, of polaritons by phonons, rel. to absorption of light waves 8=27533
Rh-Fe, magnetic impurity, ordinary rel. to exchange 8=26863
acoustic waves
Brillouin, sound absorpt. effect on hypersonic vel. meas. 8=32912
cylinder containing one fluid and surrounded by another, creeping-wave analysis 8=32911
deep sea bed, backscatt. at small grazing angles 8=50098
by ground inhomogeneities of ocean bed 8=50106
moving elastic nonlinearity, Doppler effect 8=46192
shadow zone below isothermal layer 8=46193
by spheroid penetrable, exact soln. 8=23962
underwater explosion, reverberation meas. 8=50099
acoustic waves, ultrasonic
grains in polycrystalline aggregate, var. with elastic wave velocity 8=30936
Al cylinder, solid, circumferential waves 8=37268
electromagnetic waves
by atoms rel. to reson. radiation transfer 8=29635
backscatter ionospheric sounding, field strength 8=50190
backscattered by finitely cond. curved surface, depolarization 8=24228
backscattering, ionospheric, role of land and sea 8=27977

Scattering—contd
electromagnetic waves—contd
bistatic microwave probing of refractively perturbed clear atmos. 8=32254
Brillouin, in plasmas, applic. to ionospheric irregularities 8=41429
conductor, arbitrarily shaped, moving rel. to source 8=46487
conformal mapping application 8=37488
correlated signals from uncorrelated scatterers 8=37502
dielectric objects inhomogeneous along radius and angular coordinates, back scatter. cross sections 8=42021
electron wave eqn., Volkov soln. appl. 8=33633
in ferromagnetics, by sound, rel. to magneto-elastic coupling 8=40796
by free electron, effect of constant uniform mag. field 8=24726
by free electrons, freq. shift, quantum theory 8=42020
h.f., by impenetrable sphere 8=37501
in irregular media, multiple, statistical calc. 8=46485
Moon, radio scattering cross section, models in optical range 8=45803
non-linear, by plasma cylinder 8=39093
non-uniform e.m. field on any object 8=33133
particle, moving, theory 8=37496
plane monochromatic, by rough surface, statistical props. 8=24230
plasma, alkali, acoustic wave coherent forward scatt. microwaves 8=43536
plasma columns, field calc. 8=39107
plasma cylinder, inhomogeneous 8=25753
from plasma cylinder, inhomogeneous collisionless 8=39100
plasma cylindrical columns, field aligned homogeneous 8=30056
plasma ellipsoid, inhomogeneous 8=30072
plasma, inhomogeneous cylinder 8=47844
by plasma jet 8=47895
plasma, piece uniform with zero layer 8=30071
plasma, Thomson scatt., continuum theory 8=39091
on plasma turbulent oscillations 8=47881
plasma, warm enclosed cylindrical, calc. 8=47835
radio waves, MF-HF band, by method glacier surface 8=24209
reduction to potential theory 8=37499
ring laser, field spatial distribution rel. scatt. mechanism 8=42073
rough boundary between dielec. media 8=37498
from rough surface, freq. and spatial correl. 8=24227
slots on a sphere, scattered field 8=46486
by sphere, anomalous diffraction approx., range of validity 8=28617
by spheres, two perfectly conducting, h.f. method appl. for $r \geqslant \lambda/2$ 8=24229
spherical conducting shell with conical hole 8=37500
stratified bodies, invariant imbedding calc. 8=37497
troposphere, wind produced Doppler shifts 8=27921
two-dimensional, theory, advances 8=46464
Venus, backscatt. rel. to surface smoothness, 40 cm 8=45825
VHF propag. in Himalayan region, terrain scatt. 8=24250
v.l.f. radiowave scatt. in curved earth-ionosphere waveguide 8=27975
light
See also Diffusion, light; Raman spectra.
acetone, ruby laser emission, large-angle 8=48158
aerosols, backward scattering of laser radiation optical thickness dependence 8=34949
alkanes, gaseous depolarization meas., 8=43694
amplitude, exact near field, and evanescent waves 8=37696
aniline, thermal shear waves, depolarized doublet obs. 8=43817
antiferromagnet, spin-wave stimulated second-order Raman scattering 8=31944
atmosphere, at small angle distances from sun, spectral studies 8=50152
atmosphere, (semi-infinite) new formulation of Chandrasekhar's scatt. matrix 8=50119
in atmospheric surface layer, phase function 8=32241
benzene derivatives, liq., spectrum of depolarized light 8=34849
benzene, ruby laser emission, large-angle 8=48158
benzene, stimulated temp. scatt., obs. 8=30481
benzol, double, near critical point 8=48147
in binary mixtures, by fluctuations of conc., inelastic rel. to photon beating 8=25918
in birefringent media, Brillouin 8=27537
Brillouin, in maser molecular spectroscopy 8=38782
Brillouin, measurement of damping of hypersonic waves in solids, laser source 8=49686
Brillouin, stimulated, large and small angle, threshold condition 8=34661
Brillouin, stimulated thermal, obs. 8=28649
carbon black, struct. determ. 8=43885
chemically reactive fluid 8=32090
cholesteryl 2-(2 ethoxyethoxy) ethyl carbonate liquid crystal, Brillouin scatt., 20-60°C 8=48146
chlorobenzene, stimulated Mandel'shtam-Brillouin scatt. threshold, 0.35, 0.69 and 1.06μ 8=32032

Scattering—contd
- light—contd
  - cholesterol-type liq. cryst. 8=25882

    KH_2PO_4, spontaneous scatt. of intense light, quantum theory 8=27538
    LiF single-crystal centres, Raman spectra 8=49737
    $LiNbO_3$, Raman and Rayleigh, temp. dependence, 90-1100°K rel. to ferroelec. props. 8=27585
    $LiNbO_3$, spontaneous scatt. of intense light, quantum theory 8=27538
    $LiTaO_3$, Raman and Rayleigh, temp. dependence, 90-1100°K rel. to ferroelec. props. 8=27585
    MnF_2 rutile antiferromagnet, by spin waves 8=36387
    N, liquid, stimulated Raman scatt., photon distrib. in Stokes components 8=34855
    N_2, Rayleigh depolarized, as new probe of intermolecular forces 8=39212
    $NH_4H_2PO_4$, c. w. parametric scatt. with strong absorption in idler band 8=36394
    $NH_4H_2PO_4$, parametric scatt., on laser pumping 8=45211
    $NH_4H_2PO_4$, spontaneous scatt. of intense light, quantum theory 8=27538
    N:NO_2 and I_2, gaseous, stimulated thermal Rayleigh scatt., obs. 8=34665
    NaCl single-crystal centres, Raman spectra 8=49737
    NaCl, temp. dependence, 128-298°K 8=45207
    NaCl:Ca, flux temp. dependence, −140 to 150°C 8=32016
    Ne atom, Rayleigh scatt. and e. m. susceptibility 8=25375
    Pb-Ga, liq., critical opalescence, temp. depend. 8=48149
    Rb vapour optically pumped modulation of light beam 8=37629
    SiC, Raman first-order, on laser excitation 8=41139

Scattering—contd
  light—contd
    Xe atom, Rayleigh scatt. and e. m. susceptibility 8=25375
    Xe, depolarization meas., 8=43694
    ZnO, Brillouin, from shear waves in crysts. under high elec. fields 8=44325
  X-rays. See X-ray scattering.
Scattering, particles

    absorption model for K* prod. in K^- p, 10 GeV/c 8=33732
    algebra of factorized Regge residues, meson and baryon scale factors 8=42440
    amplitude forward obeys a dispersion relation 8=33576
    amplitude, "little group" decomposition using covariant variables 8=29052
    amplitude, non-oscillation, rel. to sum rules and Regge cuts. 8=33588
    amplitude, relativistic quasipotential type equation 8=37886
    amplitude singularities derived from unitarity rel. to bubble diagrams 8=24491
    analyticity in momentum transfer in pot. theory 8=37832
    by atoms, extended polarization pot. 8=25390
    Bethe-Salpeter eqn. Wick transformation modification with limited detours into complex energy plane 8=29053
    bootstrap hypothesis, Lagragian field theory 8=42444
    bootstrap of vector and tensor trajectories from superconvergence 8=33602
    bootstrap Reggeized, based on finite-energy sum rules and unitarity 8=37912
    bootstrap theories, Regge poles and Argand diagrams 8=42443
    bootstrapping, quark and local current 8=29073
    Born approx., disadvantages of first 8=33587
    causality conditions, analytical props. of S-matrix 8=29046
    charged, in thin monocryst, rel. to spatial regrouping of particle stream 8=40066
    classical, mechanics, relativistically invariant Hamiltonian 8=28249
    collision matrix, unitary pole resonance form 8=24667
    composite, influence of breakup channels 8=43095
    composite particle, generalized Lovelace equation in relativistic Faddeev formalism 8=37890
    composite, strongly interacting, geometrical optics 8=47030
    "Compton", theory of Reggeon Feynman diagrams 8=28964
    conspiracy of singularities in j plane 8=37888
    conspiracy problem, group-theoretical solns. 8=47047
    coupling consts., approximate bounds from analyticity 8=42400
    cross-section relations, systematics from quark model 8=42492
    cross sections and density matrices rel. to kinematical singularities 8=33570
    daughter trajectories, parallel, generation from superconvergence and Regge asymptotics 8=42435
    direct-channel amplitudes, Regge pole contribution 8=33597
    dispersion sum rules for forward scatt., new class 8=42417
    dispersion sum rules for non-decreasing amplitudes 8=24671
    double charge exchange, modified 2π exchange model 8=42408
    elastic, criterion of weak perturbing systems 8=24657
    elastic diffr., real nuclear and Coulomb phases 8=25204
    elastic, large momentum transfer, recurring minima 8=24661
    elastic, lower bound at fixed momentum transfer 8=47026
    elastic, two-particle, centre-of-mass calc. 8=42452
    elastic, unitary resonance form of collision matrix 8=42985
    elastic, upper limit and relation between total cross sections and s-amplitude 8=29055
    emitted by plane δ-source, spatial distrib. Fourier integral evaluation 8=32657
    e.m. polarization expressions 8=24662
    end point method, generalized, albedo problem 8=47379
    energetic, by plasma, distribution function 8=43496
    external, Regge trajectory determ. 8=42438
    Faddeev eqn. for 3-particles identical, with Yukawa pot. 8=33581
    Faddeev equation reduction to multichannel 2-particle Lippmann-Schwinger eqns. 8=29054
    Faddeev eqns., variational approach for three-body problem 8=29056
    fermion Regge poles and ratios between cross-sections of large angle scatt. 8=42441
    finite energy sum rules, misuses 8=37896
    forward matrix amplitude reconstruction 8=24672
    generalized unitarity and low energy theorems 8=37891
    Green's function having multiple poles and Bethe-Salpeter amplitude lightlike limit 8=37887

Scattering, particles—contd
Gribov-Pomeranchuk singularities at values of J with wrong signature 8=24676
Haag's theorem, generalization 8=24654
hadrons, high-energy currents model 8=29105
Hamiltonian, separable iterative method of construction 8=24653
heavy, energy loss correction for multiple scatt. 8=38519
helicity amp., applic. to dispersion relations and Regge-pole models 8=37961
helicity amplitudes kinematical singularities, definition of regularized 8=24658
helicity amps. removal of kinematic singularities and Reggeization 8=42426
helion and triton optical potentials 8=47338
high energy bounds, in Kinoshita-Loeffel-Martin method. 8=33577
high-energy collision theory 8=24656
high energy two-body and quasi-two-body, SU(3) symmetry validity 8=37852
inelastic, expt. energy resoln. and focusing 8=33370
inelastic processes, unitarity for matrix elements 8=37881
inelastic, rel. to incident spectrum broadening 8=40795
inelastic, space-time correls. in intensity, rel. to scatterer 8=43215
inelastic with secondary particle prod. at high energy. model 8=37889
inverse problem soln., 8=33572
with isotopic spin, proof of neccessity of prod. amplitudes 8=24665
kinetic eqns., quantum, many-particle theory 8=23882
Kohn variational method singularities 8=42403
large-angle elastic, perturbation calc. 8=29569
Lee model with Coulomb interaction 8=47029
Lorentz poles in equal-mass scatt. from analyticity and factorization 8=42416
low-energy, by long-range singular potentials 8=37882
low-energy, dispersion relations for high energy limits 8=37894
Low eqn. in Lee model, N/D solns. 8=47034
Mandelstam cuts, props. deduced from Feynman integrals 8=42424
many-body, analytical continuation under rot. from real to complex 8=29058
Marchenko formalism rel. to N/D eqns. 8=24670
massless, 2-body, analytical props. of helicity amplitudes 8=37910
matrix, in case of arbitrary number of channels, analytical props. 8=47032
Moliere theory improvements for 7°–20°, second approx. 8=47301
multiple, in Gaussian approx., small-angle treatment, systematic, improvement 8=26724
multiple of limited beam on plane layer 8=38446
multiple prod. processes, creation on peripheral trajectories 8=42394
multi-Regge-exchange model, elastic scatt. shadow 8=37883
multi-Reggeon model and Pomeranchuk exchange 8=42437
N-body problem, equal mass with δ-function interaction 8=29061
N-particle production amplitudes, necessity due to S-matrix theory 8=42410
N/D eqns. rel. to Gribov-Pomeranchuk singularity 8=24679
N/D eqns. singular, with vector boson exchange inelasticity, soln. 8=24673
N/D eqns. solved with Born approx. and compared with exact soln. of Schrödinger eqn. 8=33587
N/D in potential scatt. 8=33586
nonanalyticity at u = o in scatt. amplitude 8=33575
non-Regge singularities in helicity amplitudes 8=24676
by nuclei, at high energy, multiple diffr. theory 8=29385
on nuclei, high energy approx. 8=42984
one-channel N/D method, inelastic contributions 8=42421
one-particle-exchange model for low energy, many-channel case. 8=24763
overlap function, many-body theory 8=37880
partial-wave amplitudes, parameter-independent threshold corrections 8=42419
partial-wave unitarity integral evaluation and N/D method appls. 8=29065
phase contours and resonance poles and zeros consistency 8=24795
phase contours rel. to crossing symmetry 8=42402
phase contours rel. to zeros and high-energy behaviour 8=42401
phase shifts with cut-off parameter, approximation 8=47027
planet atmospheres, optically thick layers 8=50402
plasma in bithermal ionosphere, double scatt. 8=45531
pomeranchons, SU(3) assignment 8=24683
Pomeranchuk intercept, shift due to electromagnetism 8=29071
Pomeranchuk theory generalization at high energy 8=33590
Pomeranchuk trajectory built from nonresonating background at low energies 8=37903

Scattering, particles—contd
potential and S-wave scatt. amplitude calc. S-wave scatt. left hand cut 8=33583
potential; new approach, development concerning unitarity 8=33339
potential scatt., O_3 group space formulation 8=29049
potential strength, analyticity 8=24475
quasi-potential approach and expansion in relativistic spherical functions 8=33573
quasi-potential equations, relativistic, particles with spin 8=33574
radiative corrections, approx. for calc. 8=33569
real phase shift, channel coupling effect, using pole approx. to N/D method 8=47033
with rearrangement, truncated asymptotic method 8=25203
recoil atoms, range in stopping materials 8=31136
Regge amplitude for backward unequal mass, analyticity requirement 8=33596
Regge asymptotic behaviour, difficulties of use of finite energy sum rules 8=37896
Regge asymptotic behaviour, unitarity and analyticity 8=42399
Regge asymptotics and superconvergence generation of parallel daughter 8=42435
Regge boundary conditions on boots trapping 8=33600
Regge contributions, secondary in $\pi^- p \rightarrow \pi^\circ n$ 8=37996
Regge-cut effects estimation 8=37907
Regge daughter trajectories for Bethe-Salpeter eqn. 8=37911
Regge daughter trajectory in field theory model 8=42428
Regge exchange, modified and πN charge exchange polarization 8=33683
Regge exchanges, data from pion-baryon (spin $\frac{1}{2}^+$) scatt. 8=42543
Regge families in Wick-Cutkosky model 8=47035
Regge fermion trajectories N_α and N_γ interference to explain dip in $\pi^+ p$ cross-section 8=33687
Regge framework from π°, η°photoprod. on p, dominance of B° 8=42523
Regge model, double, and density matrix for single-particle prod. 8=37901
Regge-model for n-particle prod. cross-section 8=24681
Regge parameters, dispersion relations 8=33599
Regge pole discussion of S-matrix element behaviour 8=37906
Regge-pole fit, p-p scatt. 8=38061
Regge pole fit to $\pi^- p$ scatt., 8.16 GeV/c 8=37995
Regge pole mode and sum rule of superconvergence type 8=37987
Regge pole model for calc. of proton e. m. form factor 8=42629
Regge pole model for K* prod. in $K^- p$, 10 GeV/c 8=33732
Regge-pole model for particles whose mass goes to zero 8=29069
Regge pole model for $\pi^+ p \rightarrow \pi^\circ N^{*\circ\circ}$. 2.75–8.0GeV/c 8=47109
Regge pole parameters for πN scatt., from dispersion relations of superconvergence type 8=42431
Regge-pole pole, helicity amp. applic. 8=37961
Regge-pole residue, ω, in π photoprod. 8=37968
Regge-pole theory extrapolation to 50-1000 GeV/c range 8=33589
Regge pole theory forward and near forward limits 8=37993
Regge pole theory of composite states 8=33594
Regge poles, argand diagram and inelastic resonances 8=33593
Regge poles at high energy and SU(3) symmetry 8=24682
Regge poles for spinless particle in backward scatt. 8=42430
Regge poles, mixing with moving cuts 8=33591
Regge poles, the analytic S-matrix and nuclear democracy 8=37872
Regge recurrence generation, algebraical 8=33523
Regge residues, natural zeros 8=42429
Regge theory, anomaly in p polarization meas. for $\pi^+ p$ scatt., 2–4 GeV/c 8=33688
Regge theory, group theoretical approach to complex ang. mom. and signature 8=24674
Regge trajectories, conspiracy test for e and massive γ 8=42469
Regge trajectories in πp scatt. 8=33680
Regge trajectories, 3 high-lying vacuum proposed rel. to existence of 2^+ meson resonance 8=33714
Regge trajectories, nucleon and delta, applications of mass formula in broken $SL_{2,}$ 8=37904
Regge trajectories of non-strange mesons, contrib. to cross-sections 8=42432
Regge trajectories of resonances not yielding asymptotic behaviour 8=42433
Regge trajectories P and P^1, props. from πN, KN scatt. 8=42442
Regge trajectories threshold cusps 8=33598
Regge trajectory conspiracies for $\gamma N \rightarrow VN$ 8=38026
Regge trajectory coupling to integer spin particles, Feynman diagram model 8=29068
Regge trajectory families at nonvanishing energy 8=33592

Scattering, particles—contd
Regge-trajectory, line extrapolation of baryon exchange through mass spectra 8=42434
Regge trajectory model containing daughters 8=37899
Reggeization of U(6) ⊗ U(6) 8=42439
Reggeon diagram method for inelastic processes with arbitrary number of particles 8=37898
Reggeon graphs for inelastic processes 8=29072
relativistic 3-particle, contour-distortion method, extension 8=42412
resonance phenomena, partial wave amplitude related to threshold conditions 8=24655
ρ-π superconvergence, approximate saturation 8=38044
Rutherford elastic scattering experiment 8=25009
S- and P-wave, off mass shell extrapolation method 8=42376
S-matrix crossing-symmetric eqns., solns. proved by fixed-point theorem 8=42415
S-matrix elements in terms of Fredholm determinant generalized to continuous channels 8=29063
S-matrix of highly absorptive resonant waves 8=24664
S-matrix in nonorthogonal basis, parametrization 8=29064
S-matrix singularities, sheet struct. and multiparticle amplitudes 8=24668
S-matrix treatment, Mandelstam symm. 8=24663
S-reaction, complex ang. momentum plane, study of singularities 8=42425
scattering matrix parametrization, props. of diffraction cross-section 8=37878
singularities, kinematic of 2-body helicity amplitudes 8=33578
spin processes, $0 + \frac{1}{2} \rightarrow 1 + \frac{3}{2}$, O_3, symmetry 8=37900
spinless, ladder series convergence and Bethe-Salpeter equation 8=37884
spinless, study by collision lifetime matrix method 8=29051
for structure analysis 8=29031
superconvergence conditions for forward amplitudes, general method obtaining 8=33579
superconvergence relations, analyticity constraints 8=42406
superconvergent amplitude, diffractionlike possibility 8=37892
t channel threshold singularities eliminated from differential cross sections 8=37905
3-body Amado model, Faddeev perturbation 8=42413
3-body, amplitude calc. for Coulomb pot. 8=42411
3-body effects in deuteron n capture 8=43038
three-body problem, partial wave function method 8=29060
three-body, use of Faddeev eqns. 8=29056
three-particle K-matrix 8=29059
3-particle, momentum transfer dispersion relations 8=33582
three particle system with Coulombs interact., amplitudes 8=33580
2-body amplitude, crossing-symmetric var. principles 8=42409
two-body, breaking of generalized seniority 8=24641
2-body, low-energy photon emission 8=42447
2-body relativistic, kinematic broadening 8=47028
2-hadron elastic high-energy model 8=42407
unitary impulse approx. method for 3-particle 8=29142
by velocity-depend. pots, rel. to maintaining a ^1S state bound near zero energy 8=24651
W boson, Bjarken's asymptotic formula validity in perturbation theory 8=29050
wave packets beam, scatt. cross section 8=46400
by weak central potentials, calc. using modified Born approx. 8=24650
zero-angle amplitudes, high-energy behaviour 8=29070
$C^{12} + C^{13}$, angular distributions and excitation functions obs. 10-30 MeV 8=38523
$He^4(He^3, He^3)Be^7$ compound nucleus, resonance parameters determined from cross-sections 8=42832
$Ni^{58,60,61,64}$, He^3 scatt. obs. 8=29512
$O^{16} + O^{16}$ scatt. nuclear molecular potentials cross sections, angular distribution obs 8-30 MeV 8=43098
$O^{16} + Sm^{148, 150, 152, 154}$, Coulomb excited states obs. 8=38387
$Ru^{98,100,102,104} + O^{16}$ Coulomb excited states obs. 8=38375
Zr^{90}, t inelastic scatt. at 20 MeV, obs. 8=43055
$Zr^{90,91,92,94}$, He^3 scatt. obs. 8=29512

Schizons. See Elementary particles; Field theory, quantum/interactions, weak.

Schlieren systems
acetylene combustion in shock waves 8=49886
oblique shock wave interaction with supersonic projectile 8=46162
photography, subnanosecond, of laser-induced gas breakdown 8=29901
three-colour, for methane-air spectrochem. analysis 8=28737

Schottky defects. See Crystal imperfections/vacancies.

Schottky effect (noise). See Electron tubes; Fluctuations/electrical; Semiconducting devices.

Schrödinger equation. See Quantum theory/wave equations.

Schwarzschild space. See Cosmology; Gravitation; Relativity/general.

Scintillation. See Luminescence.

Scintillation chambers. See Luminescence chambers.

Scintillation counters. See Counters/scintillation.

Seals, glass-metal. See Glass-metal seals.

Seawater
acoustic backscatt. from bed at small grazing angles 8=50098
coastal waters, thermocline strength fluctuations 8=32194
conductivity, effect of freq. 8=48202
Copenhagen, spec. refraction and dilutions, chlorinity, wave length and temp. dependences 8=50114
microwave emission, effect of temp., angle of obs., salinity and thin ice 8=50113
over-saturation with $CaCO_3$, causes 8=50097
shallow, c.w. acoustic phase characts. 8=50111
surface layer of ocean, daily temp. variations 8=27868
surface temp. obs. by radiowave emission 8=50107
surface temp. meas. from Nimbus II, and posns. of ocean currents 8=41335
temperature inhomogeneities, 3-D characts. 8=32187
tidal displacement, rel. to geomagnetic field var. 8=28012
under Arctic ice, CO_2 content 8=41327
underwater acoustic pressure calc. 8=50101
wave 'set-down' and set-up 8=32189
waves on beach of uneven bottom 8=50109

Second sound. See Helium/liquid, sound propagation.

Secondary electron emission. See Electron emission/secondary.

Sedimentation
electrolytic flocculation, sediment compress. rel. to particle size 8=30556
floc formation, geometrical model using Smoluchocoski's rate eqn. 8=30566
helical macromols. in soln., size and shape determ. 8=30420
Hudson river, seismic refraction and borehole obs. 8=50045
kaolin, settle ability rel. to adsorpt. of surfactant 8=44071
in moving suspension, determ. of solid-phase conc. distrib. in boundary layer 8=34952
nonconducting solid spherical particles 8=39449
particle size distrib. determ. 8=34933
particles diffusing in stationary fluid between parallel plane surfaces 8=48236
power metallurgy, radioactivity isotope analysis 8=43987
spheres falling in viscous fluid, spatial distrib. 8=30546
underwater, acoustic reflection phase determ. 8=37266

Seebeck effect. See Thermoelectricity.

Seidel theory. See Aberrations, optical.

Seignette salt. See Rochelle salt.

Seignettoelectric materials. See Ferroelectric materials.

Seismic waves
See also Seismology.
attenuation rel. to dynamic viscosity, transient creep and ϕ calc. 8=27830
attenuation, with lens shaped molten inclusion or melt surrounding solid grains 8=36659
compressional pulse propag. in liquid sphere, wave theory 8=28364
compressional, vel. and rock density, correl. 8=27822
compressional vel. changes across stressed region, rel. to stress accumulation meas. 8=36673
earthquake source mechanisms in California-Nevada region from surface wave analysis 8=50020
rel. to earth's mantle inhomogeneities, vel. profiles obs. 8=27824
fields, three-dimens., due to Volterra dislocation imbedded in layered half-space 8=50060
high-resolution seismic uphole surveys at Lawrence Radiation Laboratory 8=50023
in layered medium, amplitude-distance curves, freq. depend. calc. 8=23933
long-period surface waves obs., rel. to structure of earth's mantle 8=41322
longitudinal wave amplitude rel. to focal depth 8=50027
Love waves propag. along homogeneous and heterogeneous media interface 8=32895
marine storm produced, limitation on determ. of wave vector 8=36666
optimal algorithms for discriminating interfering waves 8=50059
P attenuation and mantle Q structure 8=36669
P, diffr. and attenuation rel. to core-mantle boundary struct. 8=27842
P, short-period teleseismic, amplitude-distance curve 8=27827
P times from Greeley nuclear explosion 8=50049
P wave spectrum rel. to crustal thickness in central USA and Bolivia 8=50071
point-sources in layered media, theoretical seismograms 8=32176
Rayleigh wave propag. in elastic half-space, inhomogeneous in x and z co-ords 8=23936
Rayleigh wave propag. past step change in elevation, transmission and refl. coeffs. 8=46152
reflection detection, automatic 8=50053
reflections, average velocity calc. 8=41318
reflections, deep crustal at near vertical incidence 8=50054
reflected and refracted at boundary between transversely isotropic media, distribution 8=41825

Seismic waves—contd
  response calcs for composite structs, static and dynamic characts 8=32885
  SH, diffraction by earth's spheroidal core 8=27844
  shear waves multiply refl. from earth's core, rel. to rigidity and viscosity of core 8=36664
  signal generated noise, Eskdolemuir array, site dependence of records 8=46133
  surface motion, theoretical, from pulse transmission through layered elastic structs 8=32888
  surface wave particle-motion patterns rel. to freq., computer discrimination process 8=50033
  SV-wave rad. patterns, effect of elastically restrained boundary 8=50031
  travel time curve derivative dependence on epicentral distance, $dT/d\Delta$ 8=27826
  from travel-time curves, vel. cross-section soln. existence 8=27834
  velocity determ. in upper mantle, curvature corrections 8=27841
  viscoelastic medium, disturbances produced by impulsive torsional body forces 8=46150
Seismology

  earthquake risk in California, map from model and $\geq$ magnitude 4.0 obs. 8=27839
  earthquakes, effect of Hyderabad magnetographs 8=32365
  earthquakes in N. Iran, historical compared with recent activity 8=50030
  earthquakes, solar activity as triggering mechanism 8=27846
  earth strain observatory, signal processing system design 8=36671
  earth's strain, use of Michelson interferom. as sensor 8=27848
  earth tides, effect on long-baseline radio interferometry 8=45423
  earth upper mantle model from seismologic data 8=36672
  rel. to earth's upper mantle boundaries nature, deep-focus earthquakes hodographs 8=27833
  elastic sphere surface motion due to radial impulsive force and explosive point-source 8=36667
  fault-length and rupture velocity in small-magnitude earthquakes 8=50063
  faulting, shallow focus strike slip, rel. between stress drop, fault friction and crustal strength 8=36668
  geometrical, stability of inverse problems 8=50034
  ground waves, propag., study 8=37528
  high-resolution seismic uphole surveys at Lawrence Radiation Laboratory 8=50023
  Icelandic geysers, charact. activity patterns 8=50048
  Juan de Fuca ridge, refraction profiles 8=36658
  Lake Superior crustal struct., 1963 seismic expt., reinterpretation 8=32178
  layered sphere, model study of elastic wave propag. 8=32887
  longitudinal wave amplitude rel. to focal depth 8=50027
  magneto telluric soundings 8=36660
  in mantle, compress. and shear energies attenuation 8=27843
  mean-square criterion for calc. of arrays in seismic exploration 8=50028
  microseisms in 1 c/s range, struct., method of analysis 8=50024
  microseisms in 1 c/s range, struct., results of obs. 8=50025
  Mid-Atlantic Ridge, earthquakes along median rift and offset fracture zones 8=50050
Seismology—contd
  minimum microquake recording times to determ. short-term seismicity 8=50040
  model, interface problem 8=50056
  modelling, wideband piezoelect. transducer 8=50046
  ocean-bottom seismograph 8=50026
  1 km laser interferometer for earth strains 8=50061
  P and S wave study of discontinuities in upper mantle to West of Lake Superior 8=50065
  P wave attenuation and mantle Q structure 8=36669
  P-wave records, short period, computer synthesis from distant explosion sources 8=50038
  P wave signals, linear mode filtering from Rayleigh wave type noise 8=45424
  P wave spectrum rel. to crustal thickness in central USA and Bolivia 8=50071
  Parkfield earthquake, June 26, 1966, magnitude and source mechanism 8=50036
  Peru earthquake, Oct 17th, 1966, epicentre, maps, correl. between intensity and geol. factors 8=50039
  PKP in range $115° \leq \Delta \leq 140°$, travel times 8=50022
  point-sources in layered media, theoretical seismograms 8=32176
  point-sources in layered media, theoretical seismograms, numerical calc. 8=50021
  pulse propag. in elastic half-spaces, numerical soln. 8=27828
  reflection detection, automatic 8=50053
  reflections, deep crustal at near vertical incidence 8=50054
  refraction determ. water table and alluvium depth 8=50057
  refraction nomogram, multilayer 8=50051
  S waves, long-period, travel-time curves rel. to upper mantle struct. 8=36661
  sediments in Hudson river, refraction and borehole obs. 8=50045
  seismic equation of state and earth density models 8=27823
  seismicity calc. and seismic activity math. formulation 8=27835
  seismicity in vicinity of Ramapo fault near New York New Jersey border 8=50037
  seismicity, new determ. 8=45425
  seismograms of homogeneous, coreless, gravit. earth 8=27838
  seismograms, synthetic, basic eqns. using z transform 8=50058
  shallow earthquake in Himalayan foothills, P wave study rel. to crustal struct. 8=50068
  shock free oscills. spectrum, aftershock sequence effects 8=27831
  SH and SV, diffracted 8=45426
  sialic low-vel. channel in S. German Triangle, seismic refr. obs. 8=27836
  signal generated noise, Eskdolemuir array, site dependence of records 8=46133
  standing waves in layered fluid half-space, theory 8=32889
  strong tectonic earthquake, percursor 8=36665
  T phase source in Caribbean, Oct 24, 1965, comments 8=50041
  tectonic deformation and atmospheric press. waves, 28 March 1964 Alaskan earthquake 8=41317
  teleseismic microseismic noise, correl. function for vertical coup. of Earth motion 8=50032
  teleseismic response of array above non-uniform crust and equalization 8=27837
  teleseismic signals analysis and mantle struct. obs. 8=27845
  tide-generating forces and distrib. of intermediate and deep-foci earthquakes 8=41319
  transform fault concept, spherical surface, and verification with Africa-S. America data 8=36670
  turbidity of real media and investigation 8=50064
  underground explosions and earthquakes, diagnosing 8=27825
  upper mantle refraction surveys, curvative corrections 8=27841
  upper mantle structure in Canada, from seismic obs. using chem. explosions 8=32179
Selenium
  adhesion of insulating polymer particles, force rel. to triboelec. charge 8=49045
  amorphous, thin layers, voltage-current limits of spatial load 8=40482
  crystal growth 8=39685
  crystal growth by seeding under high-pressure 8=44143
  crystal, trigonal, transient photoconductivity rel. to carrier behaviour 8=44933
  electronic spectrum of trigonal 8=32030
  electrophotographic layers, current carrier drift mobilities 8=40671
  epitaxial deposition on Te, effects of evap. cond. on struct. 8=48457
  evaporation, vapour mol. comp. and Se_{1-8} appearance pots., obs. 8=43916
  film, single-crystal, in rectifying Te-Se-Cd structures 8=35930
  film, thin, vacuum-deposition illumination 8=30757

Selenium—contd
film, with embedded Hg atoms, distrib. study by e. p. r. 8=35179
films, amorphous, prep. by vacuum evap., crystn. by electron irradn. 8=39691
films, thin, absorption and reflecting power in fundamental absorpt. region 8=27605
granular, optical absorpt., phenomenological quant. descript. rel. to permittivity of bulk mat., 8=41135
hexagonal, conductivity and photocond., effect of reactor irradiation 8=44809
hexagonal, internal photoeffect spectral distrib. on X-ray and u.v. irradiation 8=40672
hexagonal saturation photocurrent temp. dependence rel. to band structure 8=40673
layers, specific resistance across normal section, local distrib. studies 8=49259
phase transformation kinetics for amorphous → polycrystalline, and monoclinic → hexagonal 8=26078
thermal expansion of thin layers, linear coeff. meas. and Ag impurity dependence 8=48746
trigonal, electronic spectrum 8=32030
trigonal, electro-optical effects at 1.15μ 8=36402
trigonal, morphology of spherulites and single-crystals rel. to crystallization process 8=44100
trigonal, optical absorpt. edge 8=27604
trigonal, optical props. in polarized vacuum u.v. 8=45217
trigonal, photocurrent decay rel. to hopping recombination 8=36027
trigonal, reflectivity spectrum in vacuum u.v. 8=27606
vaporization of cryst. and amorphous states, laser induced study of species in vapour 8=35006
vaporization, partial press of Se_2(g) 8=48285
viscoelasticity, P admixture effect 8=31230
vitreous, atomic arrangements by X-ray diffr. at 25 and −196°C 8=30793
Se electrophotographic layers, dark discharge mechanism 8=49423
Se-polypropylene glycol suspensions, thermal cond. meas. 8=43883
Se_2, dissoc. energy 8=38936
Se : Ag hexagonal evaporated films, struct. and props. 8=48458
Selenium compounds
CH_3SeH, indirect spin coupling 8=29822
H_2SeO_3, e.p.r. of γ-irrad. cryst. 8=31884
Se−Cd glass, nonlinear optics 8=32029
$Se(CH_3)_2$, indirect spin coupling 8=29822
SeF_6, i.r. spectra and force fields 8=25519
SeH_2, indirect spin coupling 8=29822
SeO, force consts. correl. with SO 8=38854
$SeOCl_2$:Nd^{3+}, absorption cross section for Nd^{+3} laser transition 8=46624
$SeOCl_2$:Nd^{3+} liquid laser, improvements 8=37624
$SeOCl_2$-Nd^{3+} liquid laser, Q-switched, 20°C 8=37623
$SeOCl_2$:Nd^{3+} liq. laser, stimulated emission in $^4F_{3/2} \rightarrow {}^4I_{13/2}$ transition 8=46628
Se-Te alloy, crystal growth 8=39685
$Se_xTe_{1-x}Hg$ solid soln., crystal growth and structure 8=26269
Self-diffusion. See Diffusion in gases, in liquids, in solids.
Semiconducting devices
See also Counters/semiconductors; Lasers; Masers.
analytical representations, effects of impurity concentrations 8=35925
bulk negative mobility, effect of field dependence of diff const. on small signal behav. 8=44827
capacitance, dynamic, direct meas. method 8=28451
capacitor, m. n. s., memory behaviour 8=40629
contacts, ohmic, for Gunn elements 8=49282
current flow, two-dimensional 8=49285
electroluminescence, review 8=36464
film, integrated monolithic, comprising conductor and insulator films, basic technology 8=44852
flying-spot scanner, electrical props. study 8=24383
Gunn device as broadband neg. resistance, v. h. f. and u. h. f. oscillators 8=27144
Gunn oscillator, GaAs, high efficiency 8=49283
Gunn oscillator, GaAs, wide range variable freqs. 8=40546
Gunn oscillators, X band, freq. modulation noise 8=27143
heterojunctions, abrupt n-n, computer soln. of depletion and accumulation layers and anal. 8=44841
heterojunction, semiconductor-dielectric, volt-ampere characts. 8=49287
infrared detector, avalanche, thermal noise behaviour 8=46227
i. r. detectors, Cu doped Ge 8=46226
i.r. detector, Ge:Cu, low freq. noise 8=32946
isotype heterojunction, Poisson equation soln. under zero-current condition 8=31401
junctions, metal-semiconductor tunnel, resistance anomalies 8=35918
junctions, prediction of transient and permanent rad. damage, computer program 8=27146
laser amplifier 8=33219
lasers, variable wavelength, as spectroscopy light sources, 1-20μ 8=28838
layer structures, fission fragment tracks 8=44487

Semiconducting devices—contd
liquid resistance thermometer for nuclear reactors 8=34110
'long'Gunn effect dev., osc. characts. rel. to internal inhomogenities 8=49278
microwave generators 8=27142
m.i.s. and m.i.o.s. types fromSi_3N_4-SiO_2 films on Si, characts. 8=49319
m.i.s., polarization effects in SiO_2 films on Si, review 8=44854
m. n. o. s. structs., radiation effects and elec. stability 8=35946
m. n. s. capacitor, memory behaviour 8=40629
MOS capacitors, radiation effects, determ. from conductance obs. 8=27204
MOS structure, photoelect. threshold, effect of heating under bias 8=27313
m. o. s. structures with Si containing metal surface impurities, elec. props. 8=35944
m.o.s. transducers with digital measurement capability 8=28909
m.o.s., use of sputtered SiO_2 for multilayer, interconnects 8=44855
motion due to self-heating, holographic detection 8=49279
parallel diodes, or thyristors with current sharing transformers, current distribution calc. 8=31405
particle spectrometers, ballistic deficit and signal/noise ratio 8=24502
physics, and circuits of application, book 8=49284
p-i junctions, penetration of energetic ions 8=44490
p−i−n detector for pulse shape discrimination 8=46951
p-i-n-n^+ junction waveguides, use for phase-matching in optical second harmonic generation 8=33136
planar, surface and bulk effects of nuclear reactor radiation, comp. 8=31400
radiation damage, book 8=31399
radiation detector, electron avalanche and using Goods theorem for branching 8=33376
thermistor hygrometer, soil moisture free energy meas. 8=50090
thermistor with negative temp. coeffs. in Mn_2O_3-NiO-Cu_2O system 8=49280
thermocouple, Peltier coeff. determ. from initial steepness of V-I characts. 8=40635
thermoelectric, performance at constant heat flux 8=49397
thickness meas. of thin films 8=44029
thin-film active devices, use of CdS and CdSe films 8=48444
III-V compounds, appl. to integrated circuits and arrays 8=44856
thyristor triggering by displacement and leakage currents 8=40521
transducers, electromechanical conversion efficiency, thin film on delay rod 8=23956
trigger circuit, s.c.r., for ignition discharge 8=49277
tunnel junction, quantum size effect 8=35935
two-layer struct. impedance expressions, anal. of spiral-shaped curves 8=35917
varactor, as microwave generator, design and performance 8=27142
wafer in magnetic field, resistance calculation 8=44829
Au-Ag bonds, ultrasonically joined, purple-plague formation 8=48771
Au−n−Si, contact, potential barrier 8=35924
CdS, light demodulator with u. s. amplification 8=27216
CdS-metal barriers from photo-voltage meas. 8=40511
Cds solar cells for multikilowatt arrays 8=24100
CdS solar cells micrometeoroid degradation, simulation obs. 8=24094
CdS−SiO_2−Al structure, field-effect conductance temp dependence 8=40544
GaAs bulk oscillators, LSA mode, multiple frequency operation 8=40501
GaAs, bulk subcritically doped, series-connected, microwave amplifiers and oscillators 8=49281
GaAs injection laser, multilayer 8=33210
GaAs injection laser, phase locking and external cavity coupling 8=33211
GaAs junction lasers, compensation effects of Zn and Te impurities 8=46616
GaAs laser bulk field-ionized, stimulated emission 8=33207
GaAs laser, electron-beam pumped, nonradiative surface recombination 8=49226
GaAs laser injection, optimum stimulation 8=33218
GaAs laser, internal Q switching 8=33212
GaAs laser junction, transverse modes 8=33206
GaAs, laser, n-type at 77°K, threshold current, power output and quantum efficiency 8=33216
GaAs, planar bulk, Sn-Au contact prep. and device characts. 8=27157
GaAs planar Gunn oscillator, for microwave integrated circuits 8=44857
GaAs with ohmic contacts, prep. using hot H_2 and HCl gases 8=27156
$GaAs_{1-x}P_x$ injection laser, delay and memory effects 8=33209
$GaAs_{1-x}P_x$ injection laser diode, pulsed, temporal-line shift 8=49307
$GaAs_{1-x}P_x$ injection lasers 8=46617

Semiconducting devices—contd
- $GaAs_xP_{1-x}$ laser, applic. to phase-modulated optical ranging system 8=42110
- GaP photodiode, strongly compensated p–i–n junction, elec. and optical props. 8=40509
- GaP_xAs_{1-x}-GaAs n-n heterojunctions, photosensitivity spectra 8=36019
- Ge, i.r. detector 8=41854
- Ge p-i-n detectors, determination of compensated-region width by light probe 8=46899
- Ge, prep. of tetragonal GeO_2 for passivation 8=40502
- Ge:In far i.r. photocond. detector, response time 8=32945
- Ge(Li) detector surface protective coating 8=46913
- Ge, Li drifted, counter, ionization energy determ. 8=24522
- Ge–Si n–n heterojunction, interlace layer, X-ray anal. 8=40516
- Ge-Si(GaAs) abrupt heterojunctions, fabrication by solution growth 8=49293
- n-Ge-W point contact, oscillatory back-current induced by sonic vibrations after d.c. pulse 8=40503
- InSb i.r. detector, low-noise amplifier 8=41856
- n-InSb magnetoresistance probe for mag. fields at liquid He temp. 8=46371
- Li-drifted Si detectors in β-ray spectrometer for fallout meas. 8=46851
- Li^6 sandwich detector for n spectrometry 8=38083
- SCRs planar, on-characts. rel. to use in monolithic circuits 8=27215
- Si, injection level and temp. depend. of transient annealing in n-irrad. devices 8=27122
- Si junctions, formed by B, N and P ion implantation 8=49263
- Si, ohmic contacts by rubbing with Au 8=49286
- Si p-i-n detectors, study with travelling light probe 8=46888
- Si position-sensitive detector, linearity and resolution 8=24521
- Si solar cells for multikilowatt arrays 8=24100
- Si solar cells in-flight performance, computer prediction 8=24086
- Si solar cells, Li diffused, radiation damage self-healing 8=24091
- Si solar cells, n irrad. damage and Li effects, obs. 8=24095
- n/p-Si solar cells charged particle irrad. degradation, base resist. effects, 1-25 ohm cm 8=24092
- n/p Si solar cells micrometeoroid degradation simulation obs. 8=24094
- Si solar cells, p irrad. damage thermal annealing, 4.6 MeV 8=24101
- Si, stress effects in masking films 8=49047
- n-Si surface barrier detectors for X-ray spectroscopy 8=47071
- Si: Au m.o.s. structures, minority carrier lifetime meas. 8=49315
- SiC varistor with voltage nonlinearity, effect of the content in particles 8=31404
- Si–Cr film resistors, struct., stability at 200°C and resistivity 8=44818
- Si, Li drifted, counter, ionization energy determ. 8=24522
- p/n-Si: Li and n/p-Si solar cells, comparison 8=24089
- Si: Li solar cells, efficiency and e irrad. damage annealing, obs. 8=24103
- Si: Li solar cells, experience and future of 8=24104
- Si: Li solar cells, present status 8=24090
- p^+/n-Si: Li solar cells, status 8=24102
- Si-SiO_2 fast interface state meas. from MOS-C(V) curves at 77°K 8=49320
- Si-SiO_2 in m.o.s. structure, Au-doping effect on admittance and surface-state density 8=49317
- Si–SiO_2 solid–solid interface system 8=40504
- Si-SiO_x system, surface damages in Si after thermal treatment 8=49276
- Si-SiO_2-Al, MIS structure, e-irradiated, capacitance and parallel conductance 8=27211
- SiO_2–Si m.i.s. capacitors, elec. propsl 8=44055
- VO_2 on alumina substrates, rel. to device fabrication 8=30758
- ZnO-Cu_2O heterojunctions, electroluminescence 8=36516
- ZnSe epitaxial layers, on p-Ge, growth and elec. characts. 8=44834
- ZnS electroluminesc. resistor meas. 8=27145

diodes
- avalanche and Gunn, microwave generators, operation, construction and props. 8=35929
- avalanche and transferred electron, as microwave generator, design and performance 8=27142
- avalanche, p-n junction, dispersion relationship 8=35931
- avalanche, relaxation oscillations 8=49299
- avalanche, space-charge-induced negative resistance, analysis 8=44840
- avalanching pin, current filaments 8=27166
- base minority carrier density distrib. of diode turned on with forward current pulse 8=27171
- carrier excitation mechanisms rel. to recombination radiation 8=31953
- channelling of p-i junctions, ion beam penetration 8=44490
- curve tracer, resistance-compensating 8=35926
- diffusion comp. of current pulses, shape under X-ray irrad., theory 8=27164
- electronic processes, method of similarity 8=35928

Semiconducting devices—contd
diodes—contd
- Gunn, high-field domain annihilation rel. to parameters 8=49301
- Gunn, l.f. oscills., dynamics 8=49298
- IMPATT diode oscillators, transmission efficiency, theory 8=40526
- junctions, in avalanche, noise meas. in r.f. and ultra-r.f. region 8=40544
- laser, band tail spreading energy rel. to temp. 8=28698
- laser, temp. dependence of linewidth of spontaneous emission 8=42099
- magnetodiode effect, injection of current carriers 8=49300
- metal-semiconductor system (photodiode), hot e-scattering from surface on illumination 8=35752/3
- metal-Si contacts, surface effects from I–V characts. in gate-controlled Schottky-barrier structure 8=40536
- in parametric amplifiers with self-polarized junction, I-V charact. effect on amplifier parameters 8=28460
- p–i–n, induction of l.f. oscillations by anomalous avalanche negative resistance 8=40524
- p-n-n^+, current-voltage characts., allowing for carrier lifetime variations in base 8=27170
- p-n-n^+, frequency characteristics, with steady-state carrier-distrib. minimum in base 8=27169
- p–n–n^+, small-signed impedance at high forward current densities, theory 8=40527
- p-ν-p, noise at room. temp. 8=44839
- photodetectors, p. i. n. for astrophotometry 8=42135
- photodiodes, thin-base, retarding surface field effects on operation 8=36033
- photodiodes, multielement, elec. coupling mechanism 8=40682
- point, recovery phenomena 8=27173
- Schottky barrier, peripheral electric gield counteraction at contacts 8=28871
- schottky barriers, use as source and drain contacts for insulated-gate FET 8=49318
- Schottky photodiode, voltage enhanced spectral response 8=31458
- SCL, h.f. noise source 8=27172
- surface-barrier, for e position sensing 8=47094
- switching, constant reverse current phase duration 8=27167
- transitional processes for inhomogeneous base on instantaneous disconnection 8=44842
- 2000 amp. for ferrite tuning circuit in 200 GeV accelerator 8=24549
- u.h.f. diode processes, modelling using variable delay eqns. 8=27175
- Al-CdS-Au thin film, prep. and elec. props. 8=27174
- Al/CdSe(or CdTe)/Au thin-layer structures, voltage-controlled bistable states 8=49303
- Al–Si_3N_4–Si MNS, C–V curves and prop., obs. 8=40545
- Au–As alloy-Si Schottky, barrier height rel. to Au content 8=40522
- n–Au–Si surface barrier photodiode, h.f., technology and props. 8=49432
- Au-Si_3N_4-ZnSe, visible electroluminesc. 8=41230
- Bi-Te alloyed diode, spectra at 78 and 300°K, I-V characts. at 300° C 8=36538
- Bi-Te alloyed luminescent, spectra at 78 and 300°K, I-V characts. at 300°K 8=36538
- CdS, MOS, electroluminescence at low-voltage, high-current and 77° K 8=27644
- CdS space-charge-limited, noise, limiting 8=27177
- CdS, thin-film, effect of heat treatment 8=27176
- CdS:rare earth heterojunction, injection luminesc. 8=45265
- CdS-CdTe thin film heterojunction 8=49306
- CdTe, electroluminesc., temp. depend. 8=49790
- GaAs and Si alloyed diodes, V–I characts. and electroluminesc. 8=32058
- GaAs bulk oscillators, random one-dimensional doping fluctuations effect, computer study 8=49308
- GaAs diffused-junction varacter diodes 8=35927
- n-GaAs, electron-hole generation and switching mechanism 8=27180
- GaAs, electroluminesc., external efficiency rel. to junction depth and doping 8=45268
- GaAs epitaxial, electrical and spectral characts. 8=27147
- GaAs Gunn diode, l.f. current fluctuations 8=49302
- GaAs injection laser, phase locking and external cavity coupling 8=33211
- GaAs i. r. pulse generator 8=28770
- GaAs lasers, near-field pattern, effect of material inhomogeneities 8=42109
- GaAs laser, optical losses and efficiency 8=33213
- GaAs laser, short wavelength radiation emission spectrum 8=37613
- GaAs, lasers, temp. depend. of delay time between current pulse and laser emission 8=24339
- GaAs laser, transient temp. distribution and o/p pulse duration 8=33217
- GaAs layer, emission currents, optical and photoelectric props. 8=49305
- GaAs, luminescence mode, current noise spectra 8=46614
- GaAs Schottky barrier, effect of surface treatments on $C^{-2}V$ characts. 8=27178
- GaAs surface barrier, trapping analysis 8=27092

Semiconducting devices—contd
diodes—contd
GaAs$_{1-x}$P$_x$, electroluminesc., external efficiency rel. to junction depth and doping 8=45268
GaAs$_{1-x}$P$_x$ injection laser, pulsed, temporal-line shift 8=49307
GaAs-W junction grown from vapour phase, elec. props. 8=49296
GaP, depend. of radiative efficiency on heat treatment 8=27179
GaP electroluminescent, prep. from p-on-n liquid-phase epitaxial layers 8=41229
GaP, luminescence, 300-900°K 8=45188
GaP p-n junctions grown by liq-phase epitaxy, green electroluminescence 8=41231
GaP, reverse-biased for h.f. light modulation 8=40528
GaP, solution-grown, effect of donor conc. on optical efficiency 8=44843
GaSb, laser modes temp. depend. rel. to optical consts. near energy gap, 80°K 8=41088
Ge-magnetodiodes, V-A characts. in liq. He. 8=31407
Ge, minority carrier lifetime, anisotropic pressure dependence 8=27168
Ge, point-contact, switching time, rel. to pile-neutron irrad. 8=31406
Ge p–i–p, multiple negative resist. rel. to filamentary current paths 8=40529
Ge p–i–p, negative resist. mag. field depend., 770K 8=40530
Ge:Au photoresistors, surface charge effects on I-V characts. and excess noise 8=36034
Ge-GaAs system, V-I characts. and spectral distribution of photosensitivity 8=35174
Ge(Li), surface treatment 8=49309
InAs, alloyed, capacitance depend. on reverse voltage 8=27181
InAs, alloyed, I–V characts. at 4.2°K 8=40532
InAs, stimulated recombinational emission from p-n junction 8=44838
InAs, stimulated recombinational emission from p-n junction 8=49297
In–CdS··SiO$_x$–Al heterojunctions, SCL currents at saw-tooth voltage pulses 8=40523
InSb p$^+$–p–n$^+$, negative-resistance I-V characts. 8=40531
Si and GaAs alloyed diodes, V–I characts. and electroluminesc. 8=32058
Si, avalanche discharge, noise 8=35933
Si, avalanche discharge, self-sustaining, noise meas. at microwave freqs. 8=40537
Si avalanche, high-power, high-efficiency, at u.h.f. 8=49310
Si fast-neutron dosimeter, <1–15,000 rads. 8=33788
Si, Frenkel effect due to X-ray irradiation 8=40533
Si IMPATT type, osc. modes, current depend of freq. 8=49312
Si-intermetallic cpds.-SiC light diodes, V-I depend. of recomb. rad. intensity 8=27184
Si, p beam dosimetry 8=38064
Si, p-i-n avalanche type, effects of applied mag. field on osc. 8=27185
Si p–i–n, instability in avalanche region 8=40535
Si p$^+$-i-n$^+$, avalanching negative resistance and filamentary currents 8=49313
Si p$^+$-n-n$^+$ junctions, V-I characts. rel. to carrier injection 8=27184
Si photodiodes with demodulation props. independent of wavelength 8=49409
Si, point contact, neg. resistance without osc. 8=49311
Si, reverse epitaxial for photomultiplier tube 8=46424
Si, Schottby barrier for 5-6 mm region, fabrication 8=31408
Si Schottky barrier, with near-ideal I–V characts. 8=40525
Si, space charge limited triode, noise parameters 8=31409
Si:Au, computer simulation of charge distrib., space charge and recomb. rate 8=27182
SiC, with carrier injection into heavily doped regions and of V-I characts. 8=27183
Si: Li, diffusion coeffs. of Li on exposure to electron and neutron irrad. 8=39982
TiO$_2$ rectifying barriers, capacitance and resistance meas. 8=27186
Zn–Al–n-Si:P alloy, hole capture by Zn^{2-} in Si, effective cross section 8=40520
p–n junctions
abrupt asymmetrical, spatial variation of electrostatic potential, analysis 8=44830
avalanche-transit effects 8=40507
breakdown localization, effect of mag. field 8=27153
contact potential across junction 8=44832
depth meas. by spherical contouring 8=44833
displaced directly, noise at l.f. 8=40510
doped, heavily, thermally activated current and radiation 8=27147
doping profile, neighbouring evaluation from capacitance meas. 8=27072
electron beam active dev., dynamic response anal. 8=44831
electron thermodynamic nonequilibrium 8=35919

Semiconducting devices—contd
p–n junctions—contd
excess current associated with surface states 8=44828
forward-biased, l.f. noise due to charge fluctuations in depletion layer 8=40519
laser, carrier lifetime meas. by direct modulation 8=33191
laser c. w. operation noncatastrophic degradation 8=33205
laser diode, minority carrier lifetime rel. to impedance 8=33195
laser, internal parameters, determ. 8=28701
l. f. noise, surface-state related 8=35920
metal-Si contacts, surface effects from I–V characts. in gate-controlled Schottky-barrier structure 8=40536
noise calc. using fluctuation-dissipation theorem 8=37370
photoelectromotive force, by probe illumination, and p-i-n junctions 8=49407
p-i-n, carrier lifetime meas. method 8=27149
p-i-n junction, photovoltaic effect 8=36003
p-n-p-n structure, establishing stationary state for turning on 8=27154
p-n-p-n struct., switch-off process under influence of reverse anode voltage, time const. 8=27152
p-n-p-n symmetrical struct., switching process anal. inc. amplification factors on current 8=27148
planar, deep diffused, capacitance 8=27155
production by plastic deform. of p- and n-doped Ge 8=44835
in radiation detectors, applic. in nuclear instrument making 8=46886
review of development in USSR during last 20 years 8=27150
step p$^+$-n, with traps, reverse-biased capacitance 8=40508
symmetrically doped steady-state, closed form soln., 8=49289
temperature sensitive output, appl. to thermometry 8=31402
Au-Si, surface barrier rectification characteristics 8=49294
CdS, high conductivity, light emission under forward bias 8=40444
CdS, props., and construction of photoelectron transducers 8=49291
CdSe film, as base for photocells with p-n hetero-transition 8=40647
CdTe, electroluminescence 8=36521
n-CdTe, production by As$^+$ implantation 8=35882
CdTe p-n counters for γ-ray spectrometry 8=33618
CdTe-ZnTe alloys, electroluminescence 8=36521
GaAs, elec. imperfections rel. to crystal defect location 8=49292
GaAs, electroluminescence 8=36509
GaAs epitaxial compensated, recombination rel. to temp., and band tailing 8=33225
GaAs laser, applic. to phase-modulated optical ranging system 8=42110
GaAs laser diode soln. grown, gain and loss rel. to orientation 8=33214
GaAs laser diode, transient temp. distribution and o/p pulse duration 8=33217
GaAs laser injection, self damage 8=33208
GaAs laser, output light spikes at room temp. 8=33204
GaAs lasers near room temp., delay characts. 8=33222
GaAs laser structures, thermal impedance meas. 8=33223
in GaAs polycryst. films, tunnel junctions, characts. rel. to carrier density, operating temp. etc. 8=27188
GaAs stimulated emission delays rel. to temp., trapping model 8=33221
GaAsP, Zn-diffused, geom. irregularities dislocation structure dependence 8=40512
GaAs$_{1-x}$P$_x$, threshold and emission efficiency temp. dependence 8=33224
GaAs-W junction grown from vapour phase, elec. props. 8=49296

- CdSe, optical props., effect of uniaxial stress 8=36342
- n-CdSe, prepared under N pressure, elec. props. 8=49230
- CdSe, surface enhancement by SiO_2 8=49232
- n-$CdSnAs_2$, elec. props. rel. to temp. and impurity concs. 8=31370
- n-CdTe, electric instability 8=40445
- CdTe, growth process rel. to stoichiometry and electrophysical props. 8=26243
- CdTe, photoeffect due to exciton generation 8=36010
- CdTe, transient currents charact. of deep traps 8=40441
- CdTe, transport phenomena at low temps. 8=44771
- n-CdTe, type conversion and p-n junctions produced by As^+ implantation 8=35882
- $CrTe_{1-x}Sb_x$ alloys, resistivity and Hall effect comp.and temp. dependence 8=35883
- α-Cu phthalocyanine, e.s.r. 8=49608
- $CuAsSe_2$ film, phases and crystal structure from e. diffr. exam. 8=39788
- CuCl, oscillatory photocond 8=31452
- Eu chalcogenides: $(\text{rare-earth})^{3+}$, resistivity anomaly 8=35884
- $FeCr_2S_4$-$CuCr_2S_4$ spinels, elec. transport props. 8=31373
- β-$FeSi_2$:Co, Al, electrical conduction mechanism 8=35885

Semiconducting materials—contd
$GaAs_{1-x}P_x$, effect of Te and S donor levels on direct-indirect transition 8=27093
$GaAs_{1-x}P_x$ injection laser diode, pulsed, temporal-line shift 8=49307
$GaAs_xP_{1-x}$ p-n junction laser, applic. to phase-modulated optical ranging system 8=42110
GaP, band gap from absorpt. meas., 0-900°K 8=45188
GaP, electroluminescent p-n junction obs. 8=36509
GaP, Franz-Keldysh effect 8=36362
GaP, i.r. donor-acceptor pair spectra involving deep oxygen donor 8=36488
GaP, photoluminescence excitation spectra above interband absorpt. threshold and capture cross-sections 8=27647
n-GaP, photoluminescence, influence of Si 8=36496
GaP p-on-n liq.-phase-epitaxial layers in prep. of electroluminescent diodes 8=41229
GaP, synthesis and epitaxial growth by fused salt electrolysis 8=48573
GaP:Te of improved homogeneity, Hall meas. 8=27096
GaP : Zn(Cd), epitaxial growth by $GaCl_2$ vapour transport 8=48544
GaP, (Zn, Te), elec. props 8=48543
GaS layer compound, band structure near Fermi level 8=44774
GaSb band structure from I-V characts. of tunnel diodes 8=35764
GaSb, undoped, electron irrad. effects on elec. props. and recovery 8=27091
n-GaSb, carrier conc. temp. dependence and conduction-band minima 8=49241
n-GaSb, epitaxial growth on p-type substrate 8=44044
n-GaSb, oscillations of longitudinal magnetic resistance in degenerate electron gas 8=40466
p-GaSb, activation energy change due to piezoresistance dependence on stress 8=44776
p: GaSb, elec. conductivity, Hall effect and magnetoresistance rel. to impurity conc. 8=44780
p-GaSb, hole masses, light and heavy, reflectivity meas. 8=35886
p-GaSb, optical modulation by acoustoelect. domains 8=31991
n-GaSb:S, (Se), (Te), conduction-band structure, from resistivity-pressure dependence to 50 kbar 8=49236
GaSe layer compound, band structure near Fermi level 8=44774
$Ge_{1-x}Mn_xTe$, $0.01 < x < 0.1$, Hall const. and s-d scatt. resist., 4.2-400°K 8=40456
$GeSe_{0.75}Te_{0.25}$, optical absorption 8=31994
p-Ge-Si alloys, Hall meas. 8=31377
Ge-Si alloys: Au, electrical conductivity, Hall coeff., donor level 8=40460
Ge-Si alloys, hot-pressed, resistivity and Hall coeff. meas. 8=35893
GeTe, optical and elec. meas. rel. to band structure determ. 8=49726
β-HgS films, conductivity temp. dependence 8=44792
HgS_xSe_{1-x}, $0 \leqslant x \leqslant 0.4$, cond. and Hall effect, 25-300°K 8=40319
n-Hg Te, magnetic susceptibility singularity 8=44981
Hg Te, magnetoplasma reflection rel. to temp. 8=49247
Hg_3Te_3-In_2Te_3 alloys, elec. props. 8=40464
I_2, anisotropic elec. cond., a. c. and d. c., meas. and by thermally generated noise 8=27107
In, photoeffect, I-V characts. on X-irradiation and at 6000 V 8=27325
InAs diode, stimulated recombinational emission from p-n junction 8=44838
InAs diode, stimulated recombinational emission from p-n junction 8=49297
InAs, energy band parameters at 20, 80 and 298°K 8=40240
InAs, films, annealed, elec. props. 8=44794
InAs, magnetoresist., anomalous, in two dim. transport below 4.2°K 8=35905
InAs, non-ohmic transport, non-parabolicity effects 8=27115
InAs p-n junction, radiative recombination mechanism 8=36489
n-InAs, conduction band structure from reflection spectra 8=35771
n-InAs, diffusion of P, coeff. temp. dependence, 650-900°C 8=35496
n-InAs, magnetophonon oscillations in longitudinal thermoelec. power 8=27308
n-InAs, optical susceptibilities, nonlinear, rel. to band structure 8=45219
p-InAs, electrical props. 8=27114
InAs:Cu, elec. props. rel. to effect of Cu and decomp. of solid soln. 8=40473
n-$InAs_xSb_{1-x}$ alloys, e scatt. from thermoelec. and Hall coeff. obs. 8=35758
n-$InAs_xSb_{1-x}$ alloys, Hall coeff., elec. cond. and thermoelec. power obs. 8=40475
In_2O_3, sputtered films, electrical props., intrinsic absorption 8=40469
In_2O_3, sputtered films, near i. r. optical props. 8=40470
n-InSb, photomagnetic effect of hot photoelectrons 8=36022
n-InSe, absorpt. and reflection spectra, optical transitions 8=45196

Semiconducting materials—contd
InP, p-n junction radiative recomb. mechanism 8=27159
n-Mg_2Sn, piezoresistance tensor components, 50-300°K rel. to many-valley processes 8=44800
n-Mg_2Sn, thermal conductivity from 4.2 to 300°K 8=26603
$Mn(Mn_xV^{4+}_xV^{3+}_{2-2x})O_4$, $x < 0.68$, resistivity, thermoelectric power and structure 8=35340
MnO, Hall mobility of electrons and holes at 943°C 8=27118
MnO, thermoelectric force versus resistivity 8=40477
MnO : Li, electrical conduction 8=44801
MnO_2, characts. rel. to contact mats and way of coating 8=31383
NiO, conductivity at h.f. 8=31384
NiO : Li, elec. and mag. props 8=44803
NiS, metallic-semiconducting transition 8=31788
n-PbS, conduction band nonparabolicity 8=35776
PbS films, polycrystalline, polarization currents rel. to oxygen diffusion 8=35909
n-PbSe, conduction band nonparabolicity 8=35776
PbSe:Gd, doping rel. to elec. props. 8=44805
$Pb_{1-x}Sn_xTe$ laser, i. r. up to 28μ, props. at 12° and 77°K 8=37621
PbTe, localized energy levels in forbidden gap, PbTe-Al_2O_3 junction tunnelling obs. 8=35910
p-PbTe-CdTe alloy, magnetoresistance at 77°K 8=49257
PbTe:Na, drift mobility of light-mass holes 8=49258
PbTe:Sb, electrical cond. and Hall effect 8=40478
$PbTe_xSe_{1-x}$ solid solns., forbidden band width temp. dependence 8=40247
PbTe(Se) (S), lattice and electronic thermal conductivities rel. to carrier scattering 8=39951
PbTe-SnTe, general elec. props. rel. to composition 8=44140
PbTe-SnTe-PbS system, current carrier scattering mechanism 8=31385
$PtSb_2$, mobilities of electrons and tides, band gap, carrier conc. 8=40479
Sb, photoeffect, I-V characts. on X-irradiation and at 6000 V 8=27325
p-$(Sb, Bi)_2Te_3$, n-irradiated, thermo-emf, elec. and thermal conductivity 8=27136
p-Sb_2S_3, trap depths from thermally stimulated and dark conductivities 8=44807
Sb_2Se_3 melts, doping effects on conductivity and thermopower temp. dependence, 1300-1400°K 8=34899
SbSi cpds, elec. and photoelec. props. 8=49269
$Sb_2Te_{3-x}Se_x$ syst., struct 8=48677
Se, amorphous, thin layered, voltage-current limits of spatial load 8=40482
Se, electrical conductivity, temp. dependence, thermoelectric power in phase transition region 8=40481
Se, hexagonal, cond. and photocond., effect of reactor irradiation 8=44809
Se layers, specific resistance across normal section, local distrib. studies 8=49259
p-Se, trigonal, electron injection 8=35866
SiC, electroluminescent p-n junction obs. 8=36509
SiC, sintered, heater elements, oxidation ageing rel. to elec. resistivity changes 8=31231
SiO_2, effect on surface of CdSe 8=49232
SiP_2 and $SiAs_2$, preparation and properties 8=40484
Si : Te, resistivity, carrier density and mobility distributions 8=44817
n-SnO_2:Sb, e.-mobility and optical energy gap 8=27135
n-SnO_2:Sb, e.-mobility rel. to opt mode lattice and impurity scatt., 8=49270
SnO_2: Zn, chemisorbed oxygen effect on conductivity 8=31391
SnTe, optical and elec. meas. rel. to band structure determ. 8=49726
p-SnTe, valence band structure 8=44652
$SrTiO_3$, a.c. Hall obs., depend. of Hall mobility on charge-carrier density 8=31392
Te, anisotropy of galvanomagnetic effects, statistical interpret. 8=31394
Te, elect. cond. of single crystal, effect of reactor irradiation 8=31393
Te, magnetoelectric effect, down to 0.05°K 8=35916
$Te_{70}Cu_{25}Au_5$ alloy, amorphous, resistance and thermopower meas., 80-300°K 8=40497
Te-Se-Cd rectifying struct., using Se single-crystal film 8=35930
TiO_2-containing-glasses, small polaron as charge carrier 8=40499
TiO_2, small polaron conductivity 8=40498
TlI, adsorbed organic mols. surface charge-transfer groups form., obs. 8=36028
Tl_2Se film, substrate temp. effect on semicond. props. 8=31395
Tl-Te alloys, liquid, n-type, elect. props. 8=34897
Tl_2Te film, substrate temp. effect on semicond. props. 8=31395
α-U_3O_8, props. from thermoelec. power meas. 8=35999
V_2O_5-containing-glasses, small polarons as charge carrier 8=40499
V_2O_5-P_4O_{10} glasses, elec. cond. rel. to n and γ irrad. 8=27137
VO_2 crystal, semiconductor-metal transition rel. to reflection spectra 8=41150

Semiconducting materials—contd
  VO_2 sputtered films, transport props. 8=27138
  WSe_2, band model calcs. 8=49105
  $Zn_xCd_{1-x}S$ graded-band-bap crystals, growth and elec. props. 8=39696
  $ZnNi_xMn_{2-x}O_4$, conduction mechanism comp. dependence 8=40745
  ZnO, acousto-electrically excited, microwave transmission 8=42011
  ZnO, Brillouin scattering from shear waves in cryst. under high elec. field 8=44325
  ZnO films, polycrystalline dye-sensitized, thermally stimulated conductivity 8=35994
  ZnO, phonon-assisted free exciton recombination 8=44760
  ZnS, drift mobilities of electrons and holes 8=40500
  ZnS electroluminesc. resistor props. 8=27145
 gallium arsenide
  bulk, two circuits using GaAs to generate subnanosec. pulses 8=27094
  conductivity, Hall effect, current instability 8=44779
  current carrier lifetime, effect of heat treatment 8=40449
  defects, rel. to cryst. and epitaxial growth, sawing and polishing, routine handling 8=44427
  depletion layers, large signal a.c. field effect 8=35867
  dielec. constant meas. method 8=44775
  electroluminescent p-n junction obs. 8=36509
  electron concs. and conc.-profiles from Faraday effect obs. 8=40239
  electron distribution function, velocity-field relationship 8=40450
  electro-optical effect, mobile domains 8=44777
  electroreflectance stress dependence rel. to electronic structure 8=49725
  epitaxial films, effect of substrate orientation on electron mobility 8=39592
  epitaxial, for high-efficiency Gunn oscillators, process and device evaluation rel. to doping 8=49283
  epitaxial, surface features and twins 8=35241
  film formation by flash evaporation 8=48450
  film, 2-source vacuum evaporation 8=44045
  Gunn diode, l.f. current fluctuations 8=49302
  Gunn effect, simple transient and non-linear analysis of high-field domain 8=49243
  Gunn oscillator, wide range variable freq. 8=40546
  Hall mobility, microwave, of hot electrons 8=49239
  high field domain vel. meas. and current oscs. in photo-excited sample 8=31374
  high mobility layers, obtained by liq. phase epitaxy 8=30753
  hole masses, light and heavy, reflectivity meas., p-type 8=35886
  insulating region, excitonic, possible existence 8=40514
  interface properties with SiO_2, m.o.s. characts. 8=40446
  i.r. light pulse generator appl. 8=28770
  joule heating in liq. N_2 8=40459
  laser diode critical temp. for excited carriers in exponential of band tail 8=35749
  laser diode, oblique angles betw. resonator mirrors and p-n junction 8=46603
  laser diodes, optical losses and efficiency 8=33213
  laser diode spectrograph, temp. tunable 8=46589
  laser, effect of multiple Zn diffusions on threshold and c.w. output power 8=46615
  laser, electron-beam pumped, nonradiative surface recombination 8=49226
  laser, injection diode, internal mode excitation 8=24341
  laser, injection, optimum stimulation 8=33218
  laser junction, continuous microwave oscills. 8=33220
  laser junction, epitaxial compensated, recombination rel. to temp., and band tailing 8=33225
  laser, liq. N_2 temp., spectral characts. 8=24336
  lasers near room temp., delay characts. 8=33222
  laser structures, thermal impedance meas. 8=33223
  light scattering by charged centres 8=36361
  localized vib. mode of impurities, i.r. active 8=44298
  modulation of opt. abs. at intrinsic edge by acousto-electric domains 8=27570
  n-type, Cu diffusion rel. to transducer prep. 8=35491
  n-type, current saturation 8=49238
  n-type, differential neg. cond. due to intervalley transfer of hot electrons, microwave meas. 8=31375
  n-type, epitaxial, impact ionization breakdown at liq. He temps. 8=27098
  n-type, field effect meas. 150 to 298°K, mobility, relax. and hysteresis 8=35887
  n-type, self-activated luminescence, rel. to Ga vacancy-donor centres 8=36495
  n-type, with high donor conc., diffusion of Zn at 900°C 8=31006
  n-type, UHF emission rel. to acoustoelectric domain 8=27095
  optical attenuation and absorpt. edge after n-irrad., model 8=27569
  photoeffect due to exciton generation 8=36010
  photo-excited, current osc. and high field domain vel. meas. 8=31374
  planar Gunn oscillator for microwave integrated circuits 8=44857
  plasma mode, variation with field 8=40451

Semiconducting materials—contd
 gallium arsenide—contd
  plasma reson. on non-equilib. carriers, refl. obs., 10.6μ 8=40454
  p-n junction laser, applic. to phase-modulated optical ranging system 8=42110
  polaron mass change, conduction band nonparabolicity effect 8=31302
  p-type, Ag-Mn evaporated ohmic contacts 8=49237
  reflective props., change with excitation by laser radiation 8=36367
  resistivity, mobility, impurity levels 8=40452
  space-charge accumulation, limited, effect of doping fluctuations, n-type 8=49242
  stimulated emission delays rel. to temp., trapping model 8=33221
  stimulation, laser structure and applications 8=44778
  surface cleanliness meas. by ellipsometry 8=49240
  surface props, trap density, effects of SiO_2 deposition 8=35144
  surface, {111}, potential temp. dependence 8=44766
  transient temp. distribution and o/p pulse duration 8=33217
  transport, high-field, n-type 8=27097
  trapping analysis 8=27092
  ultrasonic absorpt. prediction 8=35402
  unipolar electroluminesc., by tunnel injection of minority carriers 8=36497
  with Cu atoms as substitutional impurity, charact. recomb. times 8=27089
  GaAs lattice, microwave dielect. const. rel. to temp. 8=27090
  GaAs-InAs solid solns., epitaxial films, crystallization kinetics and structure 8=26119
  GaAs-W junction grown from vapour phase, elec. props. 8=49296
  Si-doped, grown by liquid-phase epitaxy, luminescence 8=27650
  Zn diffusion, reproducible, roles of phase diagram, diffusion and solubility anals. 8=44390
 germanium
  amorphous films, electron tunnelling conductance well 8=31411
  amorphous, resistivity hall effect and photocond. rel. to band struct. 8=44791
  Auger-recombination, indirect band to band 8=35892
  bolometer, cooled, depend, of parameters on conc. of Sb and Ga impurities 8=41855
  breakdown, electrical, low-temp., effect of uniaxial stress on critical field 8=27104
  breakdown at 10°K in extra-pure mat. 8=35894
  carrier momentum relax time and effective mass determ. from microwave magneto-Kerr effect 8=49261
  with compensating impurities, recombination wave excitation conditions 8=35897
  conductivity, accepted e mobility on dislocation lines, obs. 8=35900
  conductivity anisotropy due to warm holes in p-type, elect. field effect 8=35914
  current oscillations in n-type, effect of hydrostatic press. 8=35902
  cyclotron resonance of hot carriers, line width angular dependence 8=35898
  cyclotron resonance of hot holes 8=35807
  cyclotron resonance obs. at 4°K and 70GHz from d.c. thermoelectric current obs. 8=27099
  Δ_1 conduction-band minimum from high pressure effects on p-n junctions 8=44783
  dislocation acceptor level position, n-type 8=35891
  elastic modulus temp. and illumination dependence rel. to carrier generation 8=35702
  electrode-electrolyte interface, surface states and radicals, reln. 8=36599
  electron emission, thermostimulated 8=40697
  electroreflectance at oblique incidence 8=49722
  electroreflectance stress dependence rel. to electronic structure 8=49725
  energy gap rel. to high uniaxial press. along main axes 8=27102
  epitaxially grown layer, sheet resistivity 8=40465
  etched surfaces, low energy electron and u.v. irradiations, rel. to charge condition 8=35901
  f.e.t. low-temp. characts. obs. to 1°K 8=35942
  films, photomagnetic effect spectrum 8=27323
  film, thickness meas., laser i.r. absorpt. 8=35173
  galvanomagnetic effects and negative resistance of hot electrons in bulk specimens 8=31379
  galvanomagnetic recombination effect 8=40461
  galvanomagnetic recombination effect, with unequal Lorentz forces 8=40462
  Hall factor and conductivity, complex, from microwave magneto-Kerr effect 8=27127
  hot electrons, transverse negative differential mobilities, and domain formation 8=40453
  impurity distrib., nonuniform, meas. by anomalous X-ray transmission 8=31376
  impurity doped, epitaxial films, crystallization kinetics and structure 8=26119
  impurity hop conduction in n-type, mag. induced spin-reversal transitions 8=31380

- with piezoelectric and deformational electron-phonon interactions, attenuation of hypersound by excitons 8=44311
- piezoelectric, high-elect.-field galvanomag. effects 8=31366
- piezoelectric, nonlinear phonon interaction and effect on current saturation 8=31367
- piezoelectric, non-ohmic conduction, transport eqns. for e and phonons 8=27061
- piezoelectric, photoelectroacoustic effect and resonance phenomena 8=35871
- piezoelectric-polaron effect on cyclotron resonance, calcs. in quantum limit 8=40283
- piezoelectric, propagating acoustoelec. high-field domain, simple analysis 8=40423
- piezoelectric, sound generation in alternating field rel. to elastic oscills. instability 8=30940
- piezoelectric, u. s. wave amplification and current saturation, non-linear theory 8=44312
- piezoelectric, with traps, sound amplification theory 8=35404
- piezoresistance meas. by cyclic stress 8=35876
- plaquettes, Hall fields 8=44752
- plasma eqns. soln. 8=35745
- plasma, overheating instability in crossed elec. and mag. fields 8=40421
- polarisation at high voltages, conditions 8=27064
- polar, warm electron temp. and mobility 8=40214-5
- polymeric, band conduction and fluctuations 8=27066
- population inversion at lasing threshold, rel. to impurities 8=46601
- with rare earth additives, thermal rad. during thermionic emission 8=31465
- recombination of electrons and holes, inter-impurity statistics 8=31363
- recombination waves at long wavelengths, nonlinear theory 8=27054
- reflection of electromagnetic energy in mm. range 8=31934
- removal of thin layers from surfaces, ion bombardment-enhanced solubility 8=40068
- resistivity distrib. meas. from β cond. response 8=35877
- resistivity ratio, automatic meas. apparatus 8=33013
- rotation of polarization of e.m. waves, in strong elec. field 8=31364

Semiconductors —contd
- sandwich, mid-region, small signal bulk minority carrier lifetime determ. 8=49216
- saturation drift vels. of carriers, determ. from I-V characts. in space charge limited region 8=31387
- Schottky barrier meas., light source control 8=35875
- scintillation phosphors, CdS:Te and ZnTe:O for particle detection 8=46864
- space-charge layers, accumulation and inversion approximations 8=44762
- space-charge layer, minority carriers distrib. 8=40433
- space-charge-limited currents in presence of donors 8=35870
- specific conductivity meas., thin films 8=40424
- spectral intensity of current fluctuations in strong electric fields 8=40428
- with spheroidal conduction band, optical absorpt. due to donor electrons 8=36293
- spin-e-phonon coupling const., magnetooptic interband absorpt. meas. 8=27074
- structure, protonographic exam. 8=26363
- superconducting, acoustic dispersion theory 8=35403
- superconducting and insulating mechanisms 8=26886
- surface band bendings, rel. to photomag. determ. of surface recombination vel. 8=40434
- surface-barrier stability 8=49223
- surface electron states calcs. using pseudopotential method 8=35783
- surface layers, transverse impedance and field-effect theory, rel. to nonequilib. carrier generation 8=26915
- surface phenomena, optical investigation 8=40435
- surface props., chem. control, two- and one-equiv. additives 8=35874
- surfaces, review 8=44761
- surface states, intrinsic, model 8=35785
- theory 8=49213
- thermal conductivity meas. by bridge method 8=39942
- thermal conductivity, 100-400°K 8=44357
- thermoelectric power meas. 77°-600°K 8=31446
- thermogalvanomagnetic phenomena at high mag. fields 8=44751
- thermopower calc. in quantizing mag. field allowing for phonon drag 8=35993
- thin films, temp. variation using thin film thermocouples, props. rel. to thickness 8=40638
- III-V and II to VI compounds, chem. bonding and structure 8=30614
- III-V compounds, appl. to integrated circuits and arrays 8=44856
- III-V compounds, electron-hole radiative recomb., review 8=45248
- transient radiation effects on electronic components 8=31126
- transport coeff. calc. for constant-energy surfaces with cubic symmetry 8=35865
- transverse electrical conductivity, spherical energy band 8=49217
- trap parameters, determ. by thermally stimulated capacitor discharge method 8=27052
- trapping centre parameter investigation by thermo-stimulated capacitor discharge 8=27071
- u.s. amplification, theory rel. to high dielec. const. 8=35405
- vitreous, recombination radiation 8=36453
- wave motion, energy-depend. mobility in small-signal anal. 8=26924
- wide gap, large signal a. c. field effect in depletion layers 8=35867
- wurtzite type, mag. levels of holes in upper valence bands 8=49094
- X-band Gunn oscillators, freq. modulation noise 8=27143
- zero-gap, frequency dependent dielectric function at low temp. 8=40422
- zero-gap, static dielectric function, behaviour 8=27057
- CdS implanted with high energy P^+, change to p type conductivity on implanted surface 8=40443
- GaAs Gunn diode, l.f. current fluctuations 8=49302
- GaP, synthesis and epitaxial growth by fused salt electrolysis 8=48573
- InSb type, electron scattering 8=40217
- InSb type, transport phenomena, inelastic carrier scattering 8=40467

Semi-insulating materials (high-resistivity semiconductors). See Semiconducting materials.

Semimetals. See Metals; Semiconductors.

Series
- Fourier integrals representations 8=45975
- Padé approximation, generalization 8=45969
- Stieltjes with nonzero radius of convergence, bounds and Padé approximants 8=32652

Sferics. See Atmospherics.

Shadow universe. See Cosmology; Elementary particles.

Shear strength. See Mechanical strength/shear.

Shell model. See Nucleus/models.

Shielding. See Radiation protection.

Shock tubes
- diaphragm clamp, gas-operated 8=46160
- diaphragm cutter, fast acting 8=32630

Shock tubes—contd
diaphragm-type, for high speed shocks 8=37252
coupled to molec. beam mass spectrometer, to obs. gas phase chem. reactions 8=45321
electric, with diaphragm, use in study of luminous flow region ahead of cylinder 8=47943
entrance region flow, coupling bet. inviscid flow and compressible boundary layer 8=25803
flow round models, inside use of interferometer with diffraction grating for investigation 8=39172
heat transfer, end-wall, secular change obs. 8=34653
high-vacuum valve 8=32900
ionizing waves, vel. rel. to initial gas press., drive current and mag. field 8=43529
low-density, resistance film gauge 8=32899
m.h.d. generator, unsteady flow 8=28594
pinch, current sheet dynamic obs. 8=34448
plasma temp. meas. by X band rectangular waveguide probe 8=30091
pulse delay time interval multiplying circuit 8=46338
test times, effect of boundary layer growth 8=46159
vapour condensation, electrostatic effects 8=23943
Ar plasma, azimuthal current and Hall e. m. f. in radial mag. field, obs. 8=34485
Ar–O, dissoc., flow heat transfer meas., with catalytic flat plate 8=25826
Cl at. spectrum, spectroscopic investigation 8=29610
T-type em. tube, for temps 720,000°K, spectral anal. of vacuum u.v. rad. 8=39109

Shock waves
See also Detonation; Explosions; Supersonic flow.
in air, chemical nonequilib. radiating normal wave 8=39182
air, non-equilibrium ionization by front of shock wave at 5-10 km/sec velocity 8=29959
air, spark, laser-induced, theory 8=28369
arrival timing by Al pressure switches 8=32904
atmosphere, effects of earth's rotation 8=36724
in atmosphere, from strong explosion, propag. upward 8=28371
binary gas mixture, structure of normal waves 8=30261
blast, intermediate strength, trajectory and overpress. eqns. 8=46171
boundary layer following shock over semi-infinite plate in tube, heat transfer and shear stress 8=28386
of bullets, acoustic characteristics, survey 8=46163
compression, at low pressure, calc. method 8=39183
convergent, under Chapman–Jonguet conditions 8=41835
data, for minerals, phase implication in lower mantle 8=41321
detection, with plastic tapes 8=23944
detonation, propagation, asymptotic laws 8=46172
detonation velocity meas. by piezoelec. coaxial transducer pins 8=41836
differencing methods for flow, comparison rel. to coding, resolution and execution time 8=34632
earth's bow, plasma wave emission 8=41389
in elastic rod, anal. 8=46166
electromagnetic, steady-state solution, laser pulse propagation in Kerr liquid 8=46549
e.m. tube, ionizing, coincident and reflected structure 8=43472
e.m. waves in nonlinear active lines, similar to detonation wave in gas 8=46168
electron-fluid-dynamical waves, nature 8=28546
explosions at ocean surface 8=28372
explosions due to pressurized spheres at ocean surface 8=27867
front structure in e. m. non-linear transmission-line 8=42027
gas and dust clouds, collision 8=45725
in gas binary mixtures, struct. rel. to eqns of state of gas 8=43668
gas detonation velocity fluctuation, origin 8=45356
gas, ionized, wave coupling theory 8=46165
in gas of infinite cond., fading in transverse mag. field 8=33106
in gases, radiation smoothing to prod. continuous temp. profile 8=39200
generation in rarefied gases by laser impact on Be targets 8=47833
gradient of acoustic line in axisymmetric flow 8=30208
hypervelocity impact expts, optical lever technique adaption 8=23945
interactions, pressure fluctuation obs. and theory 8=32903
interstellar, OH production 8=28095
ionized gases in e. m. field 8=47945
ionizing, vel. rel. to initial gas press., drive current and mag. field 8=43599
on laminar boundary layer, interaction 8=47946
in lattice, non-ideal, rel to collision of two semi-infinite crystals 8=48700
from lightning discharge 8=41369
lightning, pressure pulse from triggered lab. stroke 8=36752
in liquid explosives, triple, propag. and configuration 8=30341
lunar bow wave and wake, hypothesis for absence 8=36997
at Mach number interface, irregular refraction 8=30260
magnetodynamic, device for studying effect of transverse magnetic fields 8=23942

Shock waves—contd
magnetogasdynamic with conductivity jump 8=33119
Mandel'shtam-Brillouin scatt. in quartz 8=41036
m. h. d., decay 8=33108
metal plate, classical detonation wave structure for condensed explosives 8=44515
MGD unsteady, curvature and torsion of mag. lines behind wave 8=46167
modelling of detonation waves in gas using nonlinear active lines 8=46169
N-shaped, radiation from finite line source (spark), directional depend. 8=32901
in nonequilibrium flows, onset 8=41833
nonlinear dissipative materials, deformation gradient and stress 8=46151
nonlinear, possibility of driving by transverse secular mag. fields 8=39088
nonuniform, subjected to oblique mag. field, family of solns. for flow 8=39184
in nozzle, flow of gas-particle mixture downstream 8=43688
oblique, conditions of detachment 8=37251
oblique, on supersonic projectile, interaction meas. 8=46162
in perspex spheres, reply to comments on propag. 8=35734
plasma, collisionless, and co-operative phenomena 8=30045
in plasma, front isomagnetic jump at critical Mach number 8=39089
plasma, ion-acoustic, ion-atom collision effect on propag. and damping 8=34487
plasma, ion-acoustic, propagation and damping 8=47879
plasma, ion acoustic reflections from negatively biased grid 8=43527
plasma, ion acoustic waves near and above ion cyclotron freq., damping 8=30151
plasma, jump conditions for finite discontinuities 8=34480
plasma, weakly ionized 8=30044
plastic, plane, reflection and refraction in presence of boundary plane 8=41832
in plexiglass, polarization relax. time, meas. 8=40563
pressure driven, associated precursor 8=34623
pressure-time meas. using miniature piezoelectric gauge 8=46174
propagation, spherically symmetric exponential atmosphere 8=43670
radiative effect on structure 8=37253
radiative energy transfer, conference 8=23909
reflected from adiabatic or isothermal wall, unsteady viscous struct. 8=41829
in relativistic m.h.d., and compressibility hypotheses 8=28587
remote recording detector and gated interval timer 8=41831
resonating radiation scattering in front of shock wave in tube 8=28368
self-similar, strong, in medium with exponentially varying density 8=28367
sliding over liq. surface, interact 8=23949
soils, soft, rel. to plastic volume and shear deform. 8=40109
in solids, polarization relax. time, meas. 8=40563
sonic boom meas., instrumentation requirements 8=32902
Sonic boom, N waves, frequency spectrum with finite rise time 8=23946
sonic boom, rattling of windows 8=46164
sonic boom, underwater sound pressure 8=46161
spherical and plane, propagation and attenuation, effects of solid strength 8=26751
steel, shock wave technique for cladding with refractory metals 8=28206
steel, stainless, explosive shock-loaded thermal recovery 8=49004
stellar collision, 2-dimensional theory 8=45619
in stellar envelopes, propag. Brinkley-Kirkwood theory 8=45637
step-function, propag. through constricted ducts 8=23948
strong, double Machian reflection 8=23947
structure descript. with non-equilib. rad. and ionization 8=39016
strong, struct. accounting for continuum subsonic flow downstream, and hypersonic flow upstream 8=43667
thermal shock on lateral surface of sphere 8=32898
underwater exploding wires, scaling using miniature piezoelectric guage 8=46174
velocity in crossed e.m. fields 8=41830
in viscous rarified gases, kinetic theory 8=34602
water, explosion pressure pulse phase shift 8=48034
water, isothermal at max. density 8=34728
water, pulse phase shift at caustic 8=48035
Z-pinch discharge wave, dynamics 8=34410
in Ar, front propag. for e. m. excitation 8=34635
Ar plasma, ionization, characteristic pots. rel. to press. and current for three types 8=25742
Ar, precursor radiation in explosive-driven shock tube 8=25830
Ar and He gas mixture, structure of normal waves 8=30261
Bi, front, diffusion of charged carriers 8=35826

Shock waves—contd
D_2/O_2 mixture detonation, dual regime 8=45355
H_2O_2 mixture detonation, dual regime 8=45355
in He, front propag. for e. m. excitation 8=34635
Sb, plastic waves in shock-induced polymorphic phase transforms., dynamic obs. 8=39562
effects
acetylene combustion, source of schlieren signals 8=49886
air, ionization e temp. meas. 8=39221
atomic spectral peak of non-equilib. gas behind wave front 8=29632
benzene, refr. index rel. to compression. obs. 8=39370
boundary layer growth, effect on shock tube test times 8=46159
electrostatic turbulent, effect of ion wave-electron interaction 8=43528
ethyl alcohol, refr. index rel. to compression obs. 8=39370
experimental studies of forces on model structures by wind and blast waves, bibliography 8=46170
explosive claddings, microhardness and metallographic props 8=48945
explosive liq. films, sensitivity, and detonation initiation 8=34748
explosives, impact sensitivity testing 8=32907
ferroelectrics, on resistivity, estimates 8=44880
gas behind shock front, maximum of nonequilibrium radiation 8=30299
gas, fast chem. reactions study technique 8=45315
gas flow, two dimensional, transonic 8=47938
gas motion behind expanding deformation wave 8=41834
gas oscills., nonlinear, resonant tube closed at one end 8=30266
gas, shock heated, Cr spectral emissions 8=29611
glycerine, refr. index rel. to compression, obs. 8=39370
hypersonic layer, radiative heat loss effect on subsonic region 8=34636
inorganic crystals, phase transforms. under impact pressure 8=26057
ionization of gases, simple model 8=47781
ionization rate meas. in shock heated gases, microwave method 8=39014
ionizing, transverse elect. field ahead (Alfven Mach > 2) 8=34440
liquid compression, elec. cond. meas. 8=34903
m.h.d. blast, cylindrical with uniform axial mag. field, obs. 8=28595
magnetite bed, residual magnetization change occasioned by explosion 8=50220
metals, resistance of metals, effect of deformation speed 8=41714
monatomic gas. singly ionized, effect of line rad. on precursor ionization 8=39015
nitrocellulose powder, shock ignition 8=23950
nitroglycerin powder, shock ignition 8=23950
non-eqilibrium ionization of air by front of 5-10 km/sec velocity, shock wave 8=29959
pinch tube, current sheet dynamics, obs. 8=34448
plasma, He-Cs, Ne-Li, elect. field intensity determ. 8=30046
plasma ionic sound 10^4Hz, nonlinear interaction with travelling wave 10^9Hz 8=30047
plasma production, Mach no. over 30 for fully ionized high density plasmas 8=47872
plasma, shock-produced, electromagnetically driven, electron densities meas. by microwave reflection 8=25720
plate, with finite Mach number, impulsive motion effect on flow of radiating gas 8=43686
rigid sphere motion in ideal compressed fluid, hydrodynamic force analysis 8=39264
solids, compression, crystallographic analysis 8=26745
sonic boom, comments and reply on Farfeld spectrum 8=25817-18
spark plasma, cylindrically converging wave 8=25745
strings and membranes, travelling forces 8=37241
trinitrotoluene, transition conduction zone behind front, time interval 8=49068
water into ice VII phase transform; by compression 8=48262
water, viscosity under shock load 8=48094
wire thermally shocked into longitudinal vibration by current pulse 8=40088
α-Al_2O_3 powder, explosive shock treatment effects from X-ray line-braodening analysis 8=44168
Ar-air mixtures, equilib. props. behind incident and refl. waves 8=34625
Ar, in e.m. shock tube, origin of plasma , 8=25744
Ar, ionization e temp. meas. 8=39221
Ar, ionization in mag. field and microwave signal attenuation 8=29960
Ar plasma flow, relaxation phenomena 8=25741
Ar, plasma prod. and skin-depth effect of microwave refl. and transmission 8=25743
BN, hexagonal, irreversible transformation 8=26062
CCl_4 liquid, shock-compressed, brightness temp. meas. and P-T curves 8=48089
CCl_4, polarization in refl. shock waves 8=43858
CCl_4, refr. index. rel. to compression, anomalies, obs. 8=39370

Shock waves—contd
effects—contd
CCl_4-C_6H_6 soln., shock-compressed, brightness temp. meas. and P-T curves 8=48089
CsBr, luminescence after shock compression 8=49806
D_2, decomp. and recomb. rate 8=25649
HCl, dissociation 8=38931
HF, dissociation 8=25650
H_2–O_2 mixtures, combustion kinetics 8=32109
Hg, viscosity under shock load 8=48094
LiF, luminescence after shock compression 8=49806
MgO powder, explosive shock treatment effects from X-ray line-broadening analysis 8=44168
N_2, dissociation in shock tube 8=25651
N_2, effect of O atoms on vibr. relax. 8=47724
N_2, ionization e temp. meas. 8=39221
N_2, temp. depend. of afterglow in glow discharge shock tube 8=27712
NH_3, oxidation 8=41256
NH_3-O_2 mixtures, ignition 8=27729
NO, intensity determ. of fundamental band 8=25499
NaCl, luminescence after shock compression 8=49806
O atoms recomb. rates, direct meas. 8=29666
O_2, radiative combination of O atoms 8=38932
OH chemiluminesc. in $H_2 + O_2$ reaction in shock tube 8=49889
Pt, evaporation of submicron particles in shock tube 8=39493
on Ti Br_4-Ar mixture, TiI, II absolute gf-values determ. 8=43489
Xe, compression rel. to conversion to metal-like state 8=43851
YFe garnet, rel. to demagnetization 8=31744
Shot noise. See Fluctuations/electrical.
Showers. See Cosmic rays/showers and bursts.
Shubnikov–de Haas effect. See Magnetoresistance.
Silicon
See also Semiconducting devices; Semiconducting materials/silicon.
absorption spectrum, one-electron, high-resolution exam. 8=45218
abundance in solar photosphere 8=28173
activation anal. to determine trace element impurities 8=50000
activity in molten Ag-Si alloys by e.m.f. meas. 8=48078
addition to Fe-Cr alloys, influence on anodic passivation 8=36602
amorphous phase form. by ion bombard., temp. and channelling effects 8=48931
atomic planes, [111], imaging 8=44218
auger electron emission, chemical effect 8=43227
avalanche diodes, high-power, high-efficiency, at u.h.f. 8=49310
carrier lifetime degradation, n-induced, rel. to dopant impurities 8=31156
crystals, Bragg refl. effect on electron scatt. 8=35354
crystals, impurity atom effects on lattice defects, X-ray studies 8=26644
crystal, (220) reflection, effects of fast neutrons 8=30911
crystals with oxygen and carbon impurities, precip. of SiO_2 and SiC on heat treatment 8=39702
crystallization from Al-Si melts by zone-melting with temp. gradient, mechanism 8=39686
defect formation by epitaxial deposition of Mg-Al 8=48832
defects causing anomalous etching and X-ray double images, origin and struct. 8=48835
defects, interaction of Li with O 8=26632
diffusion in Mo, phase identification 8=48784
diffusion of P. at high-conc., precipitate formation 8=39983
diffusion of P from oxide film, rel. to model 8=44375
diffusion of Sn, effects of P and B codoping 8=48791
diffusion of T 8=48346
diode junction, avalanche noise meas. in r.f. and ultra-r.f. region 8=40534
dislocation distribs. from Laue-case diffr. expts. 8=48860
dislocation-free crystals, e. p. r. of B 8=45101
dislocations, pure edge, parallel arrays, obs. on plastic deformation 8=40044
e.p.r. from clean single-crystal cleavage faces rel. to surface states 8=40943
electron-hole-plasma of p-type, helical density waves and oscillistor-effect 8=49127
electron microscopy at high voltages 8=41971
electron pulse reflection (20–1000 eV) 8=35605
electron radiation damage rate rel. to depth 8=26736
electron scattering, inelastic, and incoherent X-ray scattering 8=44155
epitaxial deposition conditions at low-temps 8=48461
epitaxial deposition on sapphire, substrate prep. 8=39699
epitaxial film growth 8=39597
epitaxial films, impurity penetration in growing process 8=26128
epitaxial films on quartz 8=48465
epitaxial films on spinels, growth twins and carrier mobility 8=35181
epitaxial growth on {311} planes, surface characts. 8=39582

silicon—contd
  - epitaxial layers, crystal perfection, effect of substrate surfaces 8=39596
  - epitaxial layers, P diffusion effects on defect structure, 4=48833
  - epitaxial layers, stacking-fault defect nature 8=40050
  - epitaxial layers, stacking fault disappearance 8=40049
  - epitaxial (111) and (100), shallow surface depressions stability, obs. 8=44145
  - epitaxial, shear and twin-type stacking faults 8=31100
  - excitonic molecule binding energy 8=40262
  - exoelectron emission after irradiation and mech. treatment rel. to surface defects 8=40694
  - exoemission rel. to surface treatment 8=40693
  - field electron-emissive photocell 8=40702
  - films, chemically grown epitaxial, nucleation study using molecular beam techniques 8=44144
  - films, deposited by sputtering through moving mask, low-temp. orientation 8=26127
  - film deposition on sapphire, struct. correls. with substrate 8=44056
  - films on α-quartz substrates, deposition, struct. and elec. props. 8=35180
  - film on sapphire, crystallog. orientation relations 8=44058
  - film on sapphire, vacuum deposition 8=44057
  - film, perfect single cryst., on sapphire, by vacuum evaporation 8=39595
  - films, single crystal, moving mask growth on amorphous quartz substrates 8=26126
  - gamma-irradiated, recombination lifetimes 8=49424
  - gettered, study of lattice disorders rel. to process 8=44077
  - imperfection near oxide film edge rel. to localized diffusion, X-ray micrographic obs. 8=35552
  - impurity striations, reasons for appearance in single cryst. grown by Czochralski method 8=48824
  - ion bombardment damage 8=44503
  - ion channelling at 100-500 keV, obs. 8=48930
  - ion implantation analysis by 1 MeV He$^+$ scatt. 8=48927
  - ions, oscillator strengths for resonance lines present in solar spectrum 8=29647
  - lattice parameter C conc. dependence 8=48674
  - lattice vibrations, microscopic dielectric model 8=44304
  - luminescence and growth techniques 8=36475
  - neutron dosimeter, surface barrier, 2-5 MeV 8=33787
  - neutron-irradiated, defect character from anomalously wide images using stereo e-microscopy 8=31025
  - neutron-irradiated, defect detection using anomalous X-ray transmission 8=48834
  - neutron-irradiated, divacancy and A-centre production 8=44416
  - neutron irradiated, dosage-damage correlations and X-ray diffr. studies 8=26733
  - for neutrons, fast, diode, dosimeter, <1-15,000 rads. 8=33788
  - for neutrons, fast, p-n junction dosimeter 8=33790
  - optical difference mixing 8=31995
  - oxidation in cathode fall area of pure O glow discharge 8=35182
  - oxide films on crystal, i.r. spectroscopic study 8=39598
  - Pendellösung fringes in crystal free of dislocations 8=48675
  - phonon conductivity and acoustic attenuation 8=44324
  - photocells, electron bombardment rel. to props. 8=27329
  - photocells, study of forward branch of V-I characts 8=49431
  - photodiodes with demodulation props. independ of wavelength 8=49409
  - photomechanical effect, wavelength dependence 8=36368
  - planar chem. polishing 8=48425
  - plastic deformation by indentation and scatching under light load 8=40180
  - p-n junctions, forward biased, interband recombination model for light emission 8=45286
  - positron annihilation angular distribs. rel. to single-particle positron wavefunctions 8=44669
  - precipitation kinetics of Cu near room temp. 8=30705
  - radiation detector, pulse height defects due to nuclear collisions 8=46896
  - radiation detector, response to high-energy particles 8=46898
  - recombination radiation at high excitation levels 8=41209
  - in rocks, neutron activation analysis 8=50062
  - Schottky barrier diode, with near-ideal I-V characts. 8=40525
  - secondary dislocations formed after diffusion of B and P 8=35572
  - secondary electron emission angular dependence in primary e. range, 100-2000 eV 8=44952
  - secondary emission angular dependence for 1000 eV primary beam 8=40714
  - single crystals, d. c. photodecay meas. rel. to minority carrier lifetimes 8=40490
  - single crystal slices, analysis by neutron activation 8=40014
  - Sirius, abundance clac. from Si II lines 8=50285
  - solar, abundance rel. to Fe 8=37084
  - solar cells, p irrad. damage thermal annealing, 4. 6 MeV 8=24101
  - soldered contact prep., metal hydride flux 8=45931

Silicon—contd
  - solubility, max., of B, and precipitation kinetics 8=48345
  - solubility of T 8=48346
  - spectrum, Si$_2$O 9μ vibr. states rel. to isotope effects and c-o stretching vibr., 1104 cm^{-1} 8=27607
  - stresses, thermally-induced, rel. to X-ray diffr. and birefringence obs. 8=49051
  - substrate, epitaxial growth of ZnS by vac. evaporation 8=30740
  - surface barrier detector, p damage 8=46897
  - surface cleaning by high field and heating, field emission characts. 8=35148
  - surface dislocation sources 8=26694
  - surface facets formed by HCl selective vapour etching 8=48523
  - surface imperfections during thermal treatment 8=30728
  - surfaces (100), (110) and (111), Berg-Barret skew reflection tables for Kα X-rays 8=35347
  - surfaces, vacuum-crushed, air-crushed and mechanically polished, ht. treatment effects on e.p.r. spectra 8=39580
  - thermal expansion coeff. temp. depend., theory and obs. 8=26594
  - thermal radiation on laser beam irrad. 8=35467
  - twinning in web dendrites, scanning e microscopy obs. 8=44089
  - n-type, electron spin-lattice relax., conc- and compensation-dependence 8=27489
  - p-type inversion layers, mobility anisotropy and piezoresistance 8=27133
  - ultrasonic attenuation in single crystals, frequency dependance 8=48725
  - ultrasound, velocity of propagation variation rel. to temp. 8=39896
  - vacancies at diffusion induced dislocations, and dislocation-enhanced diffusion in (001) crystals 8=26622
  - vibration spectra, freq. along asymmetric dims. 8=30934
  - web-dendrites, semiconducting quality, dislocation origin and reactions 8=26692
  - work function temp. dependence up to 1000°K 8=49436
  - Au and Cu impurity and dopant distribs. on pulling crystals in floating-zone technique 8=40015
  - Ga and In implanted, anomalous penetration 8=48929
  - Li diffused solar cells, efficiency and e irrad. damage annealing, obs. 8=24103
  - Li doped solar cells, experience and future of 8=24104
  - Li doped solar cells, p$^+$/n, status 8=24102
  - Li precipitates, nucleation and growth 8=44105
  - NH$_3$ adsorbed on, vibrations obs., rel. to bonding strength 8=25508
  - Ni electroless plating on p-n junctions 8=45396
  - O analysis, by i.r. spectrophotometer 8=49992
  - P^{32} ion implantation profiles 8=48928
  - P diffused, obs. of induced dislocation by X-ray and etching techs. 8=48861
  - P e.p.r. in n-Si, hyperfine splitting rel. to compensation, obs. 8=27487
  - P, As-doped, single crystals, porous substruct. 8=30866
  - Sb-doped, structural defects rel. to doping conc. 8=40018
  - Si1 absolute oscillator strengths 8=34134
  - Si1 solar abosrption lines, 2935-25578Å, equivalent width calc. 8=37048
  - Si II/III, e impact line broadening calc. 8=47507
  - SiII, IV, spectra, doublets oscillator strength ratios, Fermi calc. and obs. 8=34152
  - Si: Au m.o.s. structures, minority carrier lifetime meas. 8=49315
  - Si: Li detectors of α and p beams 8=38103
  - Si: P, broad saturation effect and background e.p.r. line 8=45100
  - Si: P diffusion junctions, intense interjunction strain 8=49046
  - Si-SiO$_2$ fast interface state meas. from MOS-C(V) curves at 77°K 8=49320
  - Si-SiO$_2$ solid-solid interface system 8=40504

Silicon compounds

  - ion exchangers, isotope exchange rate investigation 8=45313
  - methyl silane, isomeric mono-subs. derivs., differences in phys. props. 8=43925
  - methylsilanes, far u. v. spectra 8=25592
  - opals, gem, crystal structure determ., by light diffr. 8=44254
  - polymeric, C and H microdeterm. 8=36628
  - silica and feldspar mixtures, structural characteristics, thermodynamic props. 8=39297
  - silica, fused, ion diffusion from molten salts 8=48789
  - silica, fused, microcrystal orientation in ordered isotopic structure 8=26150
  - silica gels, "adsorbed, adsorbent" interactions 8=34954

Silicon compounds—contd
- silica gel, AgI single crystal growth 8=26227
- silica gel, brittle, structural evolutions during ageing 8=26150
- silica gel, complete pore struct. anal., surface areas of micropores 8=48351
- in silica gel, growth of crystals, using a co-solute 8=35243
- silica gel, O_3 adsorpt. rel. to annealing temp., —80°C 8=30786
- silica gel, pore surface accessible to N_2 8=48350
- silica-gel spheres, wet, drying by moisture transfer to dry particles in mixing 8=34978
- silica glass, densified at very high press., quasi-crystalline atomic arrangements 8=48504
- silica, molten, speed of ultrasound and adiabatic compressibility 8=48140
- silica monodisperse spheres, controlled growth 8=48235
- silica, vitreous random-network model 8=26151
- silica, vitreous, vibational spectra 8=35392
- silicates e microprobe analysis with oxide standards, correction factors 8=27810
- silicate glasses, strengthening by ion exchange 8=26845
- silicates, layer, some rare polytypes, X-ray exam. 8=26174
- silicates, layer-lattice, thermal studies using adapted Unicam high-temp. camera 8=26326
- silicate-mineral inclusions, orientation in natural diamond 8=26179
- silicide films, on Nb chromised, titanised and chromo-titanised, structure and props. 8=35176
- silicides of transition metals, auxiliary metal bath procedure for synthesis 8=49835
- silicon polymer, glow-discharge deposited, refractive index 8=49763
- siloxanes, solvent effect, freq. spectroscopic investigation 8=25884
- Zeolite Linde 13x, temp. depend. of mag. proton and cation reson. 8=49656
- Al chlorite, dioctahedral, structure 8=26174
- $C_2H_5SiCl_3$ mol. crystals, n.q.r. multiplicity and spin-lattice relax times rel. to phase transforms 8=41010
- CaO–Fe O–Fe_2O_3–SiO_2 melts, ion and electron cond. 8=25946
- GeO_2-SiO_2 glasses, binary, non-ideal mixing 8=44080
- Si carbides, formation by chemical vapour deposition, discussion 8=45348
- Si–B phase formed during deposition, removal 8=48463
- SiC abrasive grains, frictional coeffs. with metals 8=31184
- α-SiC, absorption spectra of exciton-impurity complexes 8=36406
- n-SiC, Be diffusion, 1700–2250°C, mechanisms and anisotropy 8=35506
- SiC, C X-rays absorption, extended Philibert's correction 8=27798
- SiC compacted bodies, elec. props, compared with sintered oxes 8=49142
- SiC, conversion of cubic to hexagonal as fn. of temp. and press. 8=48399
- SiC, crysts. growth from soln., theory 8=35232
- SiC, effect of N_2 and P impurities in crystallization 8=26208
- SiC, elastic properties 8=35717
- SiC, electroluminescent p-n junction obs. 8=36509
- SiC film, dielec., breakdown mechanism 8=27249
- SiC films, noncrystalline, prep. and elec. props 8=48467
- SiC heater elements, sintered elec. ageing rel. to oxidation ageing 8=49349
- SiC, higher absorpt. edges 8=49752
- SiC, luminesc. and growth techniques 8=36475
- SiC, luminescence energy levels and capture centres 8=41210
- SiC, luminescence on irradiation with electrons, H and D ions of 20 keV 8=36510
- SiC particles in varistor with voltage nonlinearity, effect of Al content 8=31404
- SiC, polytypis, as high-order transformation 8=44012
- SiC polytypism, dislocation theory 8=26180
- β-SiC, porous, n-irrad. induced changes in growth, elasticity and thermal props. 8=26735
- β-SiC, radiation recombination on fast electron bombardment effects 8=36508
- SiC, Raman spectra on laser excitation 8=41139
- SiC, sintered, heater elements, oxidation ageing rel. to elec. resistivity changes 8=31231
- α-SiC (6H), high-resistivity, doped accidentally, band scheme 8=35779
- α-SiC (6H), photoluminesc. of single crystals 8=36511
- SiC, 6H polytype, low-freq. dielectric constant and refractive index 8=36407
- n-SiC (6H): B diffusion counters, for strongly ionizing particles, elec. props. 8=33378
- β-SiC, soln.-grown, stacking faults, partial dislocations and twinning 8=31101
- SiC, transition from hexagonal to cubic phase, effect of high press. and high temp. 8=35124
- SiC, ultrasoft X-ray emission spectra rel. to energy structures 8=41136
- SiC vapour scintillation, emission spectrum time scanning 8=34231

Silicon compounds—contd
- $Si(C \equiv CH)_4$ i.r. and Raman spectra 8=25625
- SiC:N, n.m.r. donor conc. dependence rel. to e. delocalization and e. system degeneracy 8=45134
- SiC: N, B, and unknown impurity doped, optical charge exchange exam by e.s.r. and photoconductivity 8=36251
- α-SiC: Ni and Al complexes, luminescence 8=36507
- $SiCl_4$, neutron activation analysis of trace impurities 8=49998
- $SiCl_4$, vibr. relax. and u.s. attenuation 8=39360
- Si–Cr films, annealed, resistivity, struct. and stability at 200°C 8=44818
- SiF, rot. anal. of γ bands 8=38855
- SiF_2, absorpt. spectrum 8=25520
- SiF_2, e.s.r. 8=31885
- SiF_4, rate of ionizaion by electron attachment, three-body process 8=43471
- Si-Fe crystals, coercivity rel. to domain structure 8=31704
- Si-Fe crystals, domain structure, tensile elastic strain effects 8=36173
- Si-Fe crystals, domain structure temp. dependence up to 650°C 8=50829
- Si-Fe, dislocation density during low cycle fatigue 8=39963
- Si-Fe single crystals, effect of dislocations on magnetization process 8=26677
- Si-Ge alloys, pressure sintered, props. rel. to microstructure 8=30668
- Si(Ge)-ZnO films, I-V characts., conductivity change 8=40488
- SiH_3 derivatives n.m.r. spectra 8=34918
- SiH_4, liquid, p spin-lattice relax. time, obs. 8=34922
- SiH_4, nuclear r.f. spectrum obs. 8=47588
- $SiHClO_3$, neutron activation analysis of trace impurities 8=49998
- SiH_nD_{4-n}, liquid, p spin-lattice relax. time, obs. 8=34922
- SiI_4, Mossbauer effect 8=39520
- SiN film on Si, from $SiCl_2$–NH_3–H_2 system, anomalous etching rate 8=48464
- SiN, ground state reduced potential curves 8=29717
- SiN insulated gate FET's, effect of electron irrad. 8=27201
- Si_3N_4 based insulating materials, phase composition and electrophysical props. 8=31445
- Si_3N_4 films deposition on Si and MNS diodes props., obs. 8=40545
- Si_3N_4 films, diffusion of Al substrate, coeff. and activation energy temp. dependence 8=31001
- Si_3N_4 films, etching 8=39652
- Si_3N_4 films on Si, vapour deposited, elec. props. 8=49350
- Si_3N_4 films, prep. from $SiCl_4$ + NH_3 and elec. props. 8=44051
- Si_3N_4 films, pyrolytic, conduction props. 8=49352
- Si_3N_4 films, structure and Na migration 8=48605
- Si_3N_4 insulating film, refractive index 8=49763
- Si_3N_4, prep. by r.f. discharge reaction of silane and N_2 8=35183
- Si_3N_4, ultrasoft X-ray emission spectra rel. to energy structures 8=41136
- Si_3N_4-SiO_2 films, amorphous on Si, struct, optical and elec. props. 8=49319
- Si–Ni, alloy diffusion phenomena omnidirectional pressure effects 8=35488
- SiO amorphous films, formation and structure 8=44052
- SiO film, pulse breakdown obs. 8=40586
- SiO, from graphite cloth 8=35005
- SiO, optical absorpt. 8=41145
- SiO, rot. spectrum, 42 373-43 424 MHz 8=38856
- Si-O solid soln, anomalous X-ray transmission, rel. to periodicity changes on decomposition 8=36409
- SiO($A^1\Pi$-$X^1\Sigma^+$) band system, oscillator strength meas. 8=43334
- SiO_2, addition to $BaTiO_3$ to promote conduction 8=49228
- on SiO_2, Al reactivity, moisture effects, obs. 8=45328
- SiO_2, amorphous, crystallization 8=44011
- SiO_2 coating for protection of aluminized mirrors operating in u.v. 8=42148
- SiO_2 density and colour centres rel. to radiation damage 8=26722
- SiO_2 diffusion masks obtained by evaporation, use 8=48459
- SiO_2 dispersions, scatt. and absorpt. rel. to reflectance of clouds 8=39447
- SiO_2, distrib. and range of B and P ions on bombardment 8=35604
- SiO_2 films, amorphous, elec. strength temp. dependence, —196 to + 50°C 8=40561
- SiO_2, film, amorphous, on Si, prod. by oxidation of silane 8=44055
- SiO_2 film, chemically vapour-plated, environmental effects 8=48466
- SiO_2 films, diffusion of Au 8=39984
- SiO_2 films, e diff. and microscope investigation 8=30910
- SiO_2 films on GaAs, S diffusion through film into GaAs 8=35493
- SiO_2 films on Si, thickness meas. by i.r. techs 8=48460
- SiO_2 films on Si, vapour deposited, elec. props. 8=49350
- SiO_2 films, ordered structure and ion mgration 8=44054
- SiO_2 film, oxide layer thickness and nature from i.r. props. 8=26125

Silicon compounds—contd
- SiO_2 films pyrolytic deposition under vacuum 8=44050
- SiO_2 films on Si wafers, prod. by SiH_4 oxidation 8=44053
- SiO_2 in glass, precip. into $H_2Si_2O_5$ for chem. analysis 8=45413
- SiO_2, form. of phospholsilicate glass film 8=44048
- SiO_2, fused, effect of rad. on optical transmission 8=28742
- SiO_2 fused, modified with thermal expansion coeff. $\sim10^{-7}$/°C, physical props. 8=39930
- SiO_2 gel, adsorpt. of binary, org., liq. mixtures 8=48477
- SiO_2 gel, adsorpt. of mols., n.m.r. signal shifts 8=39462
- SiO_2 gel, proton spin relax. of adsorbed C_6H_6 8=29814
- SiO_2-glass, diffusion of Na^{22}, α-β quartz transformation effects 8=48794
- SiO_2 glass, synthetic, mobility of Na ions 8=48795
- SiO_2, glassy, i.r. reflectivity, absorpt. and transmission 8=49754
- SiO_2 in marine sediments, by nondestructive determ. by 14 MeV neutron activation 8=41314
- SiO_2 insulating film on Si, polarization effects 8=44854
- SiO_2 layers, prod. in cathode fall area of pure O glow discharge 8=35182
- SiO_2 powder from pyrolytic decomp. of silicone, crystallization by annelaing 8=35251
- SiO_2 powder, positronium diffusion constant and annihilation spectra mean length 8=44378
- SiO_2 slip refractory for melting optical glasses 8=45936
- SiO_2, solubility equation, in H_2O, valid up to critical density range 8=48070
- SiO_2, sputtered, for multilayer interconnects in MOS dev. 8=44855
- SiO_2 structural changes in fusion 8=48264
- SiO_2, thermal photoresists adherence rel. to surface constitution, obs. 8=44601
- SiO_2, vitreous, density fluctuations rel. to X-ray scatt. 8=25879
- SiO_2, vitreous, vib. density of states and thermal cond. 8=35455
- SiO_2, wetting by water obs. 8=35140
- SiO_2 with W inclusions network, 2000°C 8=48092
- SiO_x coating on Si, B redistribution 8=48793
- Si_2O in Si, vibr. states rel. to isotope effects, 9μ 8=27607
- Si_2O_3 glass, struct. determ. by X-ray diffr. 8=48503
- Si_3O_{10} group in ardennite crystal structure 8=39808
- $[Si_2O_5]$-layer silicates, crystal chemistry 8=39641
- SiO_2-Al_2O_3 catalysts, adsorption of DPPH 8=27736
- SiO_2-Al_2O_3, n. m. r. of combined H_2O 8=45123
- SiO/Cr mixed films, structural and elec. props. 8=48448
- $SiO_{2-x}N_x$ films on Si, prep. by chem. vapour deposition and stress-comp. dependence 8=48462
- $Si_xO_yN_z$ films on Si, elec. and passivation props. 8=49351
- SiP precipitation on high-conc. P diffusion in Si 8=39983
- SiP_2 and $SiAs_2$, preparation and properties 8=40484
- SiS, ground state reduced potential curves 8=29717

Silver
- absorption in 50-340Å range, calc. of partial oscillator sums 8=31981
- absorption of light by surface plasmon excitation 8=49700
- additions to aged Al alloys, influence on struct. and props. 8=48590
- adsorption and coprecipitation on $Fe(OH)_3$ 8=48478
- α-ray absorpt. at 54.4 MeV, obs. 8=48919
- cohesive energy and isotropic band effective mass 8=48303
- colloid in gelatin, effect of particle shape on spectral absopt. 8=39460
- conduction-electron spin resonance obs. 8=31860
- conducting film formation using electron beam 8=39603
- corrosion in autoclave liners during hydrothermal crystal growth reactions 8=49855
- creep rate at low pressure rel. to annealing in air effect 8=26803
- creep, void formation 8=31225-6
- crystal surface, scatt. of inert gases 8=39575
- crystallization in thin films 8=30741
- crystal growth through 2-dimen. nucleus formation and mono-atomic layer spread on dislocation-free surfaces 8=44113
- crystals, electro-deposited, structure and orientation in initial crystallization stage 8=30822
- depth dose distrib. prop. by electron irrad., energy losses and ionization 8=31143
- determination by atomic fluoresc. spectroscopy 8=36641
- diffusion of Ag^{110m} in Li, 67°-160°C 8=31008
- diffusion in Al, due to near surface effect 8=39964
- diffusion of Ni 8=34813
- diffusion in $RbAg_4I_5$, rel. to high-conductivity in solid electrolyte 8=48787
- diffusion in TiO_2-based dielec. 8=31016
- electrical and thermal cond. c.f. Pt 8=30987
- electrocrystallization 8=41283
- electron beam energy loss distrib. obs. 8=31142
- electrotransfer in liq. Ga, temp. depend. 8=36597
- energy bands, self-consistent, by augmented-plane wave method 8=49097
- evaporation from crystal due to e bombard., deposition 8=40712

Silver—contd
- Fermi surface, effect of lattice parameters change 8=40237
- film, absorbent and anisotropic, optical props., theoretical study 8=49707
- film, epitaxial growth on NaCl crystal 8=30745
- film on glass, light refl. phase retardation meas. 8=31960
- film on mica, growth in ultra-high vacuum 8=44037
- film, polycrystalline thin, photoelec. emissivity obs. 8=27353
- films, abnormal optical absorpt. in vacuum and Ar atmos. 8=45168
- films, adsorpt. of O_2 and substrate for H_2 and O_2 8=39616
- films, electrical resistivity, 4.2 to 295°K 8=26944
- films, excitation of surface plasma oscillations 8=35804
- films on CaF_2 and NaCl, X-ray structure investigations 8=44158
- films, orientation after deposition on NaCl and KCl 8=44085
- films, p-bombardment effects on resistance, —13 to —158°C 8=40302
- films, stacking faults, thermal behaviour 8=40047
- films, thin, optical transmission near plasma freq. 8=27547
- films, vacuum-condensed, elastic anisotropy rel. to structure 8=44545
- films, vacuum deposited, internal friction temp. dependence rel. to prep. 8=35650
- films, vacuum-deposited, structural formation rel. to elec. resistance behaviour 8=26110
- films, vacuum-deposited, temp. coeff. of resistance 8=35819
- foil, with C layer, e energy loss spectra obs. 8=35808
- foil, plasma resonance peak obs. 8=26927
- in glasses, atom impurity stabilization and atomic centre production by X-rays 8=31114
- impurity electrotransfer in liquid tin 8=39408
- impurity in liq. Pb-Sn alloys, self-diffusion 8=34806
- ion orbitals, reduced basis set expansions 8=43176
- liquid, interband transitions 8=43821
- liquid, solubility of O_2 8=39317
- liquid, vapour press., 1450° to 1600°C 8=43918
- magnetothermal oscs. meas., rel. to Fermi surface 8=44686
- nuclei form. on Pt electrode 8=49948
- particles in glass, elongated, selective light polarization by absorption 8=41051
- pastes hardened at 20-150°C 8=35820
- photoelectric effect rel. to temp. 8=36008
- photographic grains, effect of bleaching 8=33295
- radioactive, electrochem. props. 8=36594
- reflectivity changes during laser pulse 8=45169
- solidifying, bubble formation 8=30587
- solvent, Knight shifts in alloys, origin 8=30528
- spectra, absorpt. after x-radiation of frozen solns. of salts 8=47488
- specific ht. and ht. of melting 8=35424
- specific heat in pure samples below 3°K 8=39912
- stacking fault energies 8=31097
- stopping power for 3.75-5.5 MeV proton, using (p, n) obs. 8=43030
- surface structure from electron diffraction 8=35153
- thermal diffusion in Bi_2Te_3 and ht. of transport calc. 8=39968
- thermal expansion and fusion 8=39928
- thermal expansion coeff. of film, e diffr. meas., 20-420°C 8=35446
- thin film, resistivity, ion-bombardment induced changes 8=49151
- thin films, mean free path of conduction electrons rel. to optical absorption 8=36315
- ultramicrotome-cut foils, deformation 8=48850
- vapour pressure, over Cu-Ag-Au liq. ternary alloy rel. to electron cell model 8=26002
- visible radiation produced by electron bombardment 8=36317
- Ag^{110} diffusion in Al, 450-630°C 8=44381
- Ag alloys, solubility of O_2 8=39313
- Ag, internal friction after cold drawing and irrad. at low temp. 8=48986
- Ag-molten $BiCl_3$ solns., elec. cond. rel. to study of metal-molten salts reaction 8=39409
- Ag(I) electrode in $NaNO_3$-KNO_3 eutectic, linear sweep voltammetry 8=27750
- Ag(111) surface rearrangement on O_2 adsorpt., study by LEED 8=26133
- Ag: Mn, spin relax. of localised mag. moments and conduction electrons 8=31875
- Ag-Si molten alloys, Si activity by e. m. f. meas. 8=48078
- Ag^+, diff. in $LiSO_4$, 590-820°C 8=39977
- and Au, dechannelling of 40 kV Au ions at planar defects 8=35599
- Kr bombard., thermal desorption obs. 8=48483
- Sn^{119m} isomer shift 8=26015
- in Sn/Pb solder, X-ray spectrometric analysis 8=27816
- Xe bombard., thermal desorption obs. 8=48483

Silver compounds
- dental alloys, X-ray fluoresc. anal. 8=32165
- halide particles in glass, optical and thermal bleaching 8=41094

Silver compounds—contd
halides, diffusion of Mn^{2+}, 8=39962
halides, electroluminescence at low temps. 8=45256
halides, emulsions, electron trap distribution and low temp. Herschel effect 8=35744
halides, photographic grains, effect of bleaching 8=33295
halides, photoluminesc. rel. to lattice structure 8=36470
halides, single crystal growth from silica gel 8=26229
halogens, optical absorption and ionic conductivity of Cr and Ti ions 8=41052
magnetic alloys, dil., solute Knight shifts rel. to rigid band theory 8=45117
Ag complex, bis(8-hydroxyquinoline)Ag(I) pyridine solvate, cryst. and molec. struct. 8=39765
Ag–Al alloy, dispersion hardening by internal oxidation 8=35649
Ag–Al films, diffusion 8=31000
Ag–Al system, cell growth, calc. of limiting boundary diffusivities 8=48533
Ag_2Al, lattice parameters rel. to temp. 8=44201
Ag_3AsS_3, proustite, crystal growth from melt 8=26228
Ag_3AsS_3(proustite), electro-optic effect 8=45166
Ag-Au alloys, short range order kinetics, rel. to diffusion 8=35059
$Ag_xAu_{51-x}Zn_{49}$ alloys, β-phase stability, low temp. 8=48368
AgBr, absorpt. spectra pressure dependence up to 50 kbar 8=41053
AgBr, colloidal, complex refr. index, near-u.v. 8=43891
AgBr containing iodide, mirror-like absorpt. and luminesc. 8=41050
AgBr cryst, reacts between defects 8=26633
AgBr cryst/soln. phase, Ag^+ and Br^- energy diagram 8=34958
AgBr cryst. /soln. phase, distrib. equilib. and self defect points 8=34959
AgBr crystals, photoconductivity quenching by constant background illum. method 8=40651
AgBr, diffusion of photoexcited holes rel to temp. 8=49410
AgBr dispersion, latent image formation and reduction-plus-sulphur sensitization 8=46765
AgBr, e distribs. from X-ray structural analysis 8=48302
AgBr, luminesc. and photocond. induced by Q-switched laser 8=45255
AgBr, luminescence, behaviour in temp. extinction range 8=41181
AgBr, recrystallization and photosensitivity, effects of NH_3 and triethanolamine 8=30821
AgBr, photoelectron drift, 40 to −100°C 8=36007
AgBr, X-ray diffraction, study of crystallization 8=44114
AgBr, AgCl and AgI epitaxial films vacuum deposition 8=44036
AgBr, AgCl, and AgI far i.r. reflection spectra 8=45167
$AgBr:I^-$, absorption spectra, multiphonon structures 8=31956
β-AgCd, ordering crit. temp., temp. dependence, from elec. resistivity meas. 8=30676
AgCl, absorpt. spectra pressure dependence up to 50kbar 8=41053
AgCl, intrinsic defect conc., effect of defect interactions 8=40003
AgCl, luminesc. and photocond. induced by Q-switched laser 8=45255
AgCl, luminescence, behaviour in temp. extinction range 8=41181
AgCl, luminescence excited by u.v. laser 8=36469
AgCl, opt. props., by reflectivity obs. 8=36316
AgCl, phonon scattering by point-defect aggregates from thermal conductivity meas. 8=30986
AgCl, plastically deformed, strain and dislocation exam. methods 8=26662
AgCl, self-trapped holes, e.s.r. detection 8=45075
AgCl sheet as supporting matrix for micro i.r. spectrophotometry 8=24403
AgCl, structural defects in slip-lines during fatigue 8=48827
AgCl: Cu^{2+}, Se(S) codopants, e.s.r. 8=36235
AgCl, Fe impurity ions, Mossbauer effect study 8=39510
$AgCl:Fe^{n+}$, valency state determ. of Fe impurities 8=35550
$AgCl:I^-$, absorption spectra, multiphonon structures 8=31956
AgCl:V, optical absorpt. and ionic cond. meas. on V ions 8=35523
AgCNO, bonding and stability 8=26006
Ag_2CrO_4, phase boundaries below 500°C 8=48366
$AgCrS(Se)_2$, crystal structure and mag. props., 8=39810
Ag–Cu–Zn–Cd alloys, phase constitution 8=48369
Ag-Cu-Zn-20 wt. % Cd partial system, phase diagrams, obs. 8=43896
Ag-Cu-Zn-Cd system, equilibria and primary crystallization 8=35083
Ag-Cu-Zn-Cd system, univariant, equilibria formation by decomposition 8=30675
AgCu alloy film, vapour-quenched, structure from X-ray scatt. 8=44159

Silver compounds—contd
$AgGaTe_2$, photomagnetoelectric effect, photoconductivity 8=40649
AgI, cryst. struct. at 3 kbar 8=35316
AgI, elec. cond. to 100 kbar 8=31311
AgI films, polycrystalline dye-sensitized, thermally stimulated conductivity 8=35994
AgI, ht. capacity 50°-400°C 8=30961
AgI, ice nucleation, nature of nucleating site 8=32216
α-AgI, low temp., phase transforms. 8=43994
AgI, molten, electrical conductivity 8=35810
AgI, powdered, phosphorescent excitation spectra recording 8=36484
AgI, H_2O vapour to ice conversion 8=45458
AgI, ht. capacity, theory 8=48733
Ag I, nuclear resonance 8=49636
AgI, I^- centre, excited state structure 8=45257
Ag-In alloys, dil., optical constants rel. to interband transitions and plasma oscills. 8=49699
Ag–In solid solns., Zener relax. activation energies 8=31190
AgIn molecule, system B of u.v. absorpt. bands 8=25443
$AgInTe_2$, photomagnetoelectric effect, photoconductivity 8=40649
Ag_3Mg, long range order, quenching temp. dependence 8=44200
Ag-Mn alloy, evaporated ohmic contacts to p-GaAs 8=49237
Ag–Mn alloy, transmission spin resonance of conduction-electron-local-moment obs. 8=31860
AgMn films prod. by simultaneous condensation, magnetic props., conc. depend. 8=40802
$AgMnO_4$, crystal structure redetermination 8=44199
$AgNO_3$, molten electrolyte, cell pot. gravit. component obs. 8=45367
$AgNO_3$-AgCl, molten electrolyte, cell pot. gravit. component, obs. 8=45367
AgN_3, crystal growth method for i.r. and Raman spectral exam. 8=48535
Ag-Ni thin film thermocouples, temp. variation across thin semiconductors 8=40638
Ag_2O, photoconductivity spectra at 77°K 8=40650
Ag-41.8 wt. % Pt alloy, resistivity recovery stages and mechanisms 8=40303-4
Ag_2S form. on AgBr cryst., kinetics 8=49853
Ag_2S, negative photovoltaic effect 8=49411
β Ag_2S, thin films, conductivity and photoconductivity 8=49152
Ag_2S–Cu_2S system phase transformations rel. to elec. resistivity changes 8=48378
Ag_2S-HgI_2, photochromism 8=49952
Ag_2SO_4, i.r. spectrum 8=31955
Ag_2SO_4, phase boundaries below 500°C 8=48366
ζ-AgSb stacking fault probab., X-ray obs. 8=26704
Ag–Sb solid solns., Zener relax. activation energies 8=31190
Ag_3SbS_3, pryargyrite, crystal growth from melt 8=26228
Ag_2SeO_4, phase boundaries below 500°C 8=48366
Ag-Sn amalgam, corrosion studies 8=45326
Ag–Sn solid solutions, extended dislocation modes, effect of annealing 8=35561
Ag–Zn solid solns., vacancy-controlled atomic mobility, Zener-relax. studies 8=31040-1
Ag–Sn solid solns., Zener relax. activation energies 8=31190
β-AgZn, ordering crit. temp., temp. dependence, from elec. resistivity meas. 8=30676
NaCl-AgCl, solid soln., structural changes followed by conductivity and loss tangent meas. 8=35060

Sinanoğlu's theory. See Atoms/structure.

Sintering
alumina ceramic, densification rel. to grinding and abrasion resistance 8=48987
ceramic dielectrics, in reducing atmos. for high quality capacitor production 8=27220
clays, kinetics, thermal analysis meas. 8=30665
ceramic dielectric, in reducing atmos., prep., constitution and elec. props., 8=49332
conference, American Ceramic Society 70th annual meeting, Chicago (USA), 1968 8=40085
corundum, transparent, prep. and props. 8=45940
ferrites, to fine-grain structure with h.f. and microwave props. 8=27435
films, thin, review of results 8=26954
graphitic mats. hot-worked with dispersed liq. carbide rel. to thermal and elec. conductivities 8=44361
ice, spheres in powder, rate of decrease of surface area, due to plastic flow 8=35073
kinetics based on geometric models 8=35069
minerals, kinetics, thermal analysis meas. 8=30665
C amorphous powders, by elec. discharge 8=30667
C composite materials containing excess silica, temp. depend. of elec. resistivity 8=44687
CdS, kinetics, 780°-820°C 8=39534
Cr_2O_3/C compacts, shrinkage and cavitation 8=35072
in Cu with grain boundary cavities on annealing 8=26802
Fe_2O_3 compacts, shrinkage in range 800-1000°C 8=35067
Li-Zn ferrites, to fine-grain structure with h.f. and microwave props. 8=27435

Sintering—contd
- MgO, isostatically hot-pressed, fabrication and characterization 8=26045
- Mn-Zn ferrite, conditions effect on mag. props. 8=27432
- Mn-Zn ferrite, effect on mag. props. 8=49561
- NaCl, and LiF and MgO, pressure densification data rel. to plastic deform 8=35070
- Ni-Al cermet alloys, effect of porosity, temp. and Al content 8=26046
- Ni-Zn ferrites, to fine-grain structure with h.f. and microwave props. 8=27435
- Pb ferrites, oxide additives effect rel. to mag. props. 8=40842
- $PbZrO_3$-$PbTiO_3$ ceramics, by hot-pressing, and elec. props. 8=39535
- Si-Ge alloys, pressure sintered, props. rel. to microstructure 8=30668
- SiO_2 slip refractory for melting optical glasses 8=45936
- TaC, grain growth during hot-pressing 8=35283
- TaN-TiB_2, hot-pressed, densification and wear resistance 8=49053
- UC, with Ar, effects of Ni on structure 8=26299
- UO_2, Dorn method in study of initial phase 8=35068
- UO_2, high temp. thermal cond. 8=44370
- UO_2 with dispersed Gd_2O_3, behaviour at high temp. 8=35074
- W, nucleation of brittle fracture at low temp. 8=44608
- WC powder and WC-Co mixed powder, effect of 15-45 kbar pressure 8=39536
- ZrO_2, grain growth and phase transition 8=48357

Skin effect
- anomalous, confirmed by line shape theory of radio frequency size effect 8=44638
- common-wall directional coupler for waveguides 8=37519
- detector for clear-sky 8=50146
- at high frequencies 8=44678
- impedance in pulsed LCR ccts., anal. of transients 8=41927
- in metal opt. props. theory for specular e. scattering 8=49739
- metals, surface impedance, theory of low-field oscillations 8=36311
- spectral distrib. at Delhi, solar eclipse (1961) obs. 8=41364
- in superconductors 8=49177
- K, radio-freq. size effect rel. to Fermi surface meas. 8=44645

Sky brightness
- See also Airglow; Twilight.
- Musalla in Bulgaria, sky radiation and polarization 8=36798
- sky components due to clear blue sky for vertical rectangular aperture, precise values 8=50151
- stratosphere, diffuse as function of height, rel. to aerosol layer in stratosphere 8=36716
- three-channel photoelec. spectropolarimeter obs. 8=36921
- u.v. dayglow meas. with x-15 aircraft 8=36791
- zenith, and colour, during total solar eclipse, 12-11-66, Bolivia 8=36742

Sliderules
- No entries

Slip
- alloys containing hard particles, rel. to dislocation and work hardening 8=35640
- b.c.c. and h.c.p. structures, cross slip energy, activation volume rel. to stress 8=48963
- b.c.c. crystals, asymmetry, rel. to stacking faults and dislocations 8=44458
- component parallel to longit. marker line, determ. using Moire effect 8=40046
- dislocation incorporation in crystal twins 8=44088
- gas near solid surface, thermal, velocity, gas-kinetic analysis 8=39175
- grain boundary sliding, role in creep of polycryst. mats. 8=35621
- lines, rel. to indentation of rigid punch with smooth base 8=32759
- α-Nylon 66, cryst., (010) [100] slip rel. to plastic deform., obs. 8=40199
- slip-line fields, geometric props. for compression and extrusion 8=40112
- slip velocity, thermal, near solid surface, gas-kinetic analysis 8=39175
- steel, austenitic stainless, of grain boundaries rel. to He embrittlement 8=31213
- step height meas., replica technique 8=31069
- translational, rel. to crystal symmetry 8=26761
- Al, band continuity across grain boundaries 8=31090
- Be and alloys, rel. to temp., transmission electron microscopy 8=44555
- Be and alloys, surface traces above 200°C 8=44554
- Be-Cu alloy, basal and prismatic slip rel. to hardness anisotropy, obs. 8=44552
- Co single crysts. rel. to dislocation struct. and impurities, 78-573°K 8=40138
- Cu, distrib. rel. to initial dislocation substruct. 8=44459
- in Ge-GaAs epitaxial combinations 8=31077
- Ge-GaAs epitaxial combinations, linear defects interpretation as misfit dislocations 8=31078

Slip—contd
- Cu, n-irradiated, strengthening mechanism after mild annealing 8=31198
- Cu single crystals, persistent bands, fatigued at low stress amplitude 8=40140
- Cu-Ni alloys, discontinuous, temp. transients and affected volume 8=40147
- Fe-3% Si, critical shear stress and plastic flow 8=44568
- LiF, quenched, translational slipping mechanism 8=26828
- Mg and alloy MA-8, contrib. to fast deform. mechanism 8=40169
- $MgAl_2O_4$ spinel, and plastic deform. rel. to stoichiometry 8=31216
- Mo crystals, deformed in tension, line pattern and active systems 8=31091
- Nb crystal, slip asymmetry studies 8=26697
- Nb crystals, and yielding at room temp. 8=26696
- Si, rel. to parallel arrays of pure edge dislocations 8=40044
- Sn, white, single crysts., instability rel. to plasticity, obs. 8=40181
- Ti sheet, rel. to yield stresses, strain-ratios and plastic anisotropy 8=35721
- US, behaviour from e-microscope exam. 8=35285
- W crystals, deformed in tension, line pattern and active systems 8=31091
- Zn, by indentation at 5 kg loads 8=31056
- Zn sheet, rel. to yield stresses, strain-ratios and plastic anisotropy 8=35721
- ZnS, periodic processes rel. to polytype formation 8=44461

Smectic phase. See Liquid crystals.

Smokes. See Aerosols.

Snoek effect. See Crystal imperfections/interstitials; Elastic relaxation.

Snow
- firn samples from Antarctica, dating by meas. of natural and artificial radioactivity 8=27855
- heat transfer, model 8=32219

Sodium
- abundance in solar photosphere 8=28172
- active ionic transport through biological membrane, opposite to K ions 8=50461
- atom, D_1 line, profile and equivalent width 8=25361
- atom Na^{23}, h.f.s. in $3^2P_{3/2}$ state, level crossing investigation 8=34145
- atom scatt. on Ar, total scattering cross sections 8=34178
- atom, three-level, resonance problems and radiative transitions for D lines 8=38627
- atom, $3\ ^2P_{3/2}$ hyperfine structure resolution of level-crossing curves 8=43197
- atomic abs. cross sections, 500-600 Å 8=29622
- atomic lifetimes, direct obs. 8=29612
- atoms collisions in Na-Hg system, meas. 8=29665
- atoms in arc discharge with Cu, Ca, Zn atoms, effect on spectral line breadth 8=34437
- atoms in benzene, absorpt. spectrum at 55-100°K 8=49769
- atoms, quadrupolar birefringence in excited states 8=43271
- content determination in fuel rich air-H_2 flames 8=49990
- crystal lattice freq. distrib. function and sp. ht. calc. 8=44300
- diffusion in Li obs. btw. 50-176°C 8=31009
- diffusion in Si_3N_4 films 8=48605
- electron momenta from X-ray meas. 8=44647
- emission spectra, L_{23}, rel. to Al X-ray band spectra interpret. 8=45172
- equation of state, theory based on lattice free energy concepts in quasi-harmonic approx. 8=35021
- film condensation of pure vapour, intensity of heat transfer 8=48132
- friction, internal, in nominally pure samples 8=49029
- helicon-wave resonances in Hall coeff. determ. rel. to surface-mode loss 8=44682
- ion channeling in NaCl and KCl lattices, computer analysis 8=40075
- incipient pool boiling 8=48279
- ion mobility in synthetic SiO_2 glass 8=48795
- isotope distrib. in p-reactions on Mo^{100}, Ta, Ir, U 8=34000
- Knight shift and pseudopotentials 8=45129
- K-type stars, abundance by photometric meas. 8=45633
- liquid, C photon activation analysis 8=32148
- liquid, Faraday station of Alfvén waves 8=46445
- liquid, in breeder reactor cooling system, cavitation 8=29560
- liquid, in-core permanent-magnet flowmeter, calibration and stability 8=48013
- liquid, dynamic three-dimensional structure 8=25867
- liquid, heat transfer rates from moving spheres 8=34839
- liquid, properties, and order in liquid phase 8=48084
- liquid, solubility of Pb 8=43762
- melting curve up to 80 kb 8=34961
- optical constants, ellipsometric obs. 8=41120
- optically pumped, precision frequency meas. of 0-0 transition 8=47524
- oxidation in flames 8=49877
- pair interaction, phase change 8=35027
- photoelectric two-quantum volume effect 8=44948
- reaction with Va-Ti alloys as reactor fuel jacket 8=47430
- resistance, electrical 8=49167
- solid, equation of state 8=26588
- spin waves 8=31659

Sodium—contd
- superconductivity predictions from phonon spectrum and e. -phonon interactions 8=44719
- vapour, electrical conductivity above 10 torr, effect of molecular association 8=39220
- vapour, fluoresc. and energy transfer in collisions with inert gases 8=34182
- vapour lamp, thermal insulation and pressure effects 8=42208
- vapour, thermal cond. 886 to 1264°K, 0.034 to 0.69 kg/cm² 8=47964
- vapour, thermal cond., 670-900°C, 0.008 to 0.82 atm., meas. by coaxial cylinder method 8=47965
- velocity fields in Iyeka-Seki coment 8=45841
- wetting of Re, W, Mo, Ta and Nb rel. to bare work function of metal 8=35168
- Na^{22} diffusion in SiO_2 glass, α-β quartz transformation effects 8=48794
- $Na^{22,23}$ ions, electromigration in molten nitrates 8=43782
- Na^{23} in $NaSO_4$, nuclear quadruple coupling 8=49667
- Na^+, diff. in $LiSO_4$, 590-820°C 8=39977
- Na^+, ionization to Na^+ by electron impact 8=39047
- Na-NH_3 liq. solns., dynamic polarization 8=34925
- NaI 58900-96Å nightglow intensity, diurnal, seasonal and solar cycle vars. 8=32276
- NaI stellar D lines equivalent widths 8=41525
- Na_2, pseudopotential theory calc. 8=38838
- on Ni(110), monolayers one-dimens. incoherent struct., obs. 8=39579
- Pt surface ionization coeff. absolute meas. 8=31476
- V-10wt. % Ti alloy corrosion, influence of Ca content 8=27723
- W surface ionization coeff. absolute meas. 8=31476

Sodium compounds
- halides, ads. of Br_2 and I_2, refl. spectroscopy 8=48480
- halides, photoabsorpt. obs. 30-75 eV using synchrotron radiation 8=41123
- kröhnkite, $Na_2Cu(SO_4)_2.2H_2O$, cryst. struct. and n.m.r. 8=48660
- silicate glasses, high-temp. internal friction and transport mechanisms 8=40176
- sodium arsenoaluminate, hydrated, crystal growth 8=26411
- sodium halides, 30-75eV near Na $L_{2,3}$ edge, obs. using synchrotron radiation 8=41123
- solubility equation, in H_2O, valid up to critical density range 8=48070
- Na-alkali alloys, liq., n.m.r. 8=48223
- Na complex, sodium-N-diethyldithiocarbamate 8=26368
- Na disilicate glass, with diffusion zones of Fe, mag. susceptibility meas. 8=27381
- Na salt of 2, 6-dimethyl-p-benzosemiquinone, e. s. r. in t-pentanol, rel. to ion pairs 8=34909
- Na_3AlF_6 (cryolite) films, dielectric, l.f. polarization effects 8=44870
- Na_3AlF_6 effect on corundum recrystallization 8=48536
- Na_3AlF_6: Eu^{3+} luminescence obs. 8=36502
- $NaAlSi_3O_8$, X-irradiated, e.p.r. and luminescence 8=40936
- $Na_2B_4O_7.10D_2O$ (borax), d.m.r. 8=49628
- $NaBF_4$, n.m.r and ionic motion 8=31912
- $NaBO_3.H_2O$, e.s.r., rel. to RO_2, O_3^- and O_2^- centres 8=45098
- $NaBeF_3$-$NaPO_3$ system, i. r. spectroscopy for Be phosphate glass struct. 8=30791
- $Na_{0.5}Bi_{4.5}Ti_4O_{15}$, cation ordering 8=26413
- NaBr aq. solns., elec. cond. 0°-800°C and to 4000 bars 8=48195
- NaBr surface distortions, electrostatic potential contribution to LEED intensities 8=48423
- $NaBrO_3$, second-harmonic light generation rel. to natural optical activity 8=45206
- NaCN, polymorphism and melting to 40 kbar 8=30701
- NaCNO, bonding and stability 8=26006
- Na-Ca silicate glass, thermoluminesc., e. s. r. and e absorpt. spectra 8=30792
- $(Na_2, Ca)(AlSiO_3).5H_2O$ and $(Na_2, Ca)(Al_2Si_6O_{16}).6H_2O$, complex splitting of n. m. r. spectra 8=36277
- NaCl crystals F-colouring dependence, at room temp., on quenching, 300-710 °C 8=48882
- NaCl, 33.5-44 keV directional breakdown 8=48925
- NaCl:$CdCl_2$, colour centres induced by X-rays, absorpt. bands 8=31113
- NaCl-NaBr fused mixture, elect. conductivity and ion conduction activation energy 8=30519
- NaCl-Tl, -Ag. phosphors: recombination lum. efficiency after photothermal destruction of F centres 8=48881
- $NaClO_4$ aq. soln., diff. of protons 8=48115
- $NaClO_3$, e.s.r. of γ-irrad. cryst. 8=49613
- $NaClO_3$, phase boundaries below 500°C 8=48366
- $NaClO_3$, second-harmonic light generation rel. to natural optical activity 8=45206
- $NaClO_3$, i. r. reflectance bands, dispersion anal. 8=27593
- $NaClO_3$-$NaNO_3$ molten system, density, viscosity, surface tension 8=48086
- $NaClO_3$-$NaNO_3$ molten system, elec. cond. 8=48088
- $NaClO_3$-$NaNO_3$ system, sp. ht. liq., solid 8=48087
- $NaCrS(Se)_2$, crystal structure and mag. props., 8=39810
- Na_2CrO_4, phase boundaries below 500°C 8=48366
- $Na_2Cr_2O_7$, absorpt. spectrum at 2°K 8=45212
- $NaD_3(SeO_3)_2$, d.m.r. 8=49648

Sodium compounds — contd
- $NaD_3(SeO_3)_2$, d.m.r. and molec. struct. 8=49638
- NaF crystals, R_N and N centres, thermal annealing after p.-irrad. at liq. N_2 temp. 8=48883
- NaF, density changes on γ-irradiation 8=40129
- NaF, electron irrad., colour centres, obs. with oven cryostat 8=48880
- NaF, e.s.r. and optical studies of O_2^- 8=45097
- NaF, lattice vibrations in thin film, electron diffraction obs. 8=35387
- NaF, luminescence, delayed of M centre in F-to M conversion 8=41203
- NaF, r. f. spectra by elec-resonance method, rel. to struct of mol. 8=43316
- NaF, sp. ht. temp. dependence, 0.05-15°K 8=26591
- NaF, thermal vibr. and Debye-Waller factor obs. 8=30905
- NaF, X-ray scattering by phonons 8=44286
- NaF : Co^{2+}, absorpt. spectrum 8=49743
- NaF, F_3^+ centre, linear Stark effect 8=31120
- NaF, MO calc. of molec. props. 8=34269
- NaF:OH^-, u. v. and i. r. absorpt 8=45208
- Na_3FeF_6, x-ray diffraction powder data 8=48666
- $Na_xFe_xTi_{2-x}O_4$, $0.90 > x > 0.75$, crystal structure 8=39813
- $Na_2Ge_4O_9$, X-ray powder data 8=26412
- NaH, pseudopotential theory calc. 8=38838
- $NaHCO_3$, aqueous soln, (plus glucose or isopropanol), γ-radiolysis 8=36625
- $Na(H_xD_{1-x})_3(SeO_3)_2$, permittivity and spontaneous polarisation temp. and field strength dependence 8=40581
- $[Na_3H(PO_3)_4]_x$ polyphosphate, crystal structure 8=44239
- $NaH_3(SeO_3)_2$ and deutero-cpd., NMR and ferroelectric props. 8=27511
- $NaH_3(SeO_3)_2$, thermal, hysteresis in both phase transitions 8=44873
- $Na_2(H_2SiO_4).4H_2O$, structure in soln. and solid-state 8=48081
- NaI, surface distortions, electrostatic potential contribution to LEED intensities 8=48423
- NaI, I^{127} n. m. r. intensity dislocation dependence 8=36278
- $NaIO_4$, lattice thermal expansion 8=39929
- NaI: Tl, luminescence temp. and conc. dependence rel. to Tl^+ dimer centre characts. 8=27658
- NaI: Tl^+, luminescence temp. and conc. dependence rel. to energy transfer 8=27659
- NaI(Tl), contribution to total lineswidth of scintillation counter, monte-carlo calculation 8=46879
- NaI(Tl), long-lived phosphoresc. components in cryst. 8=27657
- NaI(Tl) monocrystals, vibration- and thermo-stable characts. 8=24514
- NaI(Tl), pulse shape rel. to Tl conc. and temp. 8=46876
- NaI(Tl) response to ions, $Z > 5$, 1-10 MeV/amu 8=44501
- NaI(Tl) scintillation characteristics, vacuum deposited 8=46875
- NaI(Tl), scintillators, emission bands, excited by X-irradiation, 5-80°K 8=46856
- NaI(Tl) single-crystal γ spectrometer 8=47066
- NaK eutectic, temp. profiles in turbulent flow, effect of superimposed free convection 8=34836
- $(Na_{0.7}K_{0.3})NbO_3$, antiferroelec., electro-optical effects 8=27294
- $NaLn_{1-x}Eu_xTiO_4$, Eu^{3+} fluoresc. 8=41191
- $NaMF_3$, $(M=Mg^{2+}, Co^{2+}, Ni^{2+}, Zn^{2+})$, chem. synthesis and structural data 8=26258
- $NaMgF_3$ crystal growth, perovskite struct. 8=30830
- $Na_4Mn_4Ti_5O_{18}$, crystal structure 8=44234
- Na_xMoO_3, electronic struct. 8=40245
- NaN_3, thermal decomposition, crystal size effects, topochemistry and gas analysis 8=39701
- $NaNO_2$, birefringence, dispersion and temp. depend. determ. 8=27594
- $NaNO_2$, charge distrib. of NO_2^- 8=48308
- $NaNO_2$, dielectric relax. mechanism 8=40613
- $NaNO_2$, dielectric relaxation, exptl. study 8=40612
- $NaNO_2$, phase boundaries below 500°C 8=48366
- $NaNO_3$, dislocations visualization by etching 8=48858
- $NaNO_3$, elec. cond. anisotropy rel. to interstitial defects 8=35964
- $NaNO_3$, far i.r. absorpt., solid and fused 8=49742
- $NaNO_3$, molten, surface treatment of Zr alloys 8=32105
- $NaNO_3$, molten, vib. freqs. by i. r. emission spectroscopy near 600°C 8=38842
- $NaNO_3$, n. m. r. of Na^{23}, orientation and temp. dependence 8=40991
- $NaNO_3$, Raman spectrum 8=41122
- Na NO_3, sp. ht., thermal diffusivity and conductivity in phase transition 8=48391
- $NaNO_3$, thermodynamics of λ-transition 8=39560
- $NaNb_3O_8$—$Nb_2W_3O_4$ solid solutions, existence and crystallographic study 8=43978
- $NaNiF_3$, orthorhombic weak ferromagnet, AFMR rel. to canting 8=31839
- NaO_2, phase transforms. and crystal structures 8=26075
- Na_2O activities in melts of Na_2SO_4 and Na silicate 8=34826
- $Na_2O.2MnO.2SiO_2$, absorpt. spectra, rel. to Mn^{2+} bands changes on temp. decrease 8=41119
- 25 Na_2O. 75 SiO_2 (mole %) glass fibre, thermal-elastic relax. 8=44513
- NaOBr, γ-radiolysis, radical yields 8=27767

Sodium compounds—contd
- NaOH ice, γ-irrad. electron traps 8=31153
- NaO_2-FeO-SiO_2 glasses, comp. vars. in e microanalysis rel. to surface damage, obs. 8=30865
- NaO, Na_2O_2 as impurities on Pt, at 20-1100°C, W, 20-700°C 8=35549
- $Na_2O.2SiO_2$; Fe system, kinetics of surface reaction and diffusion processes 8=26621
- $Na_3PMo_{12}O_{40}$, corrosion inhibition for steel in H_2O 8=45370
- $NaPO_3$, glassy and cryst., thermoluminesc., −180 to +20°C 8=41204
- $NaPO_3$, vitreous, crystallization on metallic condensation-nuclei with cubic lattice 8=44136
- Na_5Pb, cryst. struct. 8=43762
- (Na-Rb)NO_3 molten, elec. cond. 8=43865
- NaSCN, polymorphism and melting to 40kbar 8=30701
- $Na_2S_2O_6.2D_2O$, motion of D_2O molecules by n.q.r. 8=49669
- Na_2SO_4 aq. solns., viscosity and molal vol. 8=48098
- $NaSO_3$, oxidation in packed bubble column, 8=25858
- Na_2SO_4, phase boundaries below 500°C 8=48366
- Na_2SO_4, solubility equation, in H_2O, valid up to critical density range 8=48070
- Na_2SO_4, X-irradiated, single crystal absorpt. peaks obs. 8=44483
- Na_2SO_4-Li_2SO_4 phase diagram 8=39559
- $NaSO_4$, Na^{23} nuclear quadrupole coupling 8=49667
- β-$Na_2Si_2O_5$ crystal structure refinement from redetermined data 8=44237
- Na_2SiO_3, surface structure after etching, i.r. spectroscopy 8=39578
- $NaSmSiO_4$, crystal structure 8=39811
- Na-Sr-Cd niobates, dielectric props. and phase transitions 8=35979
- $Na_4Ti_4[Si_2O_6]_2[Si_4O_{10}]O_4.nH_2O$, crystal structure 8=48667
- $Na_6V_{10}O_{28}.18H_2O$, cryst. struct. 8=44238
- $Na_2W_4O_{13}$, crystallographic data 8=44235
- Na_2ZnGeO_4, electroluminescence in constant elec. field 8=45283
- $Na_2Zn_2[Si_2O_7]$, crystal structure 8=39812
- Na_2ZrSiO_5 phosphor, zone scheme for luminescence 8=41219
- **sodium chloride**
  - aggregation of Ca^{2+} ions, determ. by ionic cond., dielec. absorpt. and bulk density 8=35965
  - atomic charges, effective, X-ray determ. 8=26169
  - band structure, dielectric function pseudopotential calc. 8=41121
  - benzene/NaCl system, proton relax. time 8=45114
  - breakdown, laser-induced 8=40566
  - carrier mobility temp. dependence, 7.7-200°K, theory 8=44872
  - charged dislocations, effect of impurities 8=40041
  - cleavage faces, thermal etching in vacuum 8=35221
  - cleavage surface, decoration, through amorphous C layer 8=26200
  - conductivity, dielectric constant and refractive index spectra 8=45205
  - conductivity, elec., ionic, in pure, doped and irradiated mats. 8=27248
  - crystal, colour centre form. by e beam pulse 8=44475
  - crystal dielec. and mech. relaxation 8=30995
  - crystal growth containing ⟨110⟩ oriented Na dendrites, mechanism 8=30836
  - crystal growth micromechanism in vacuum-condensation process rel. to dislocation distrib. 8=48551
  - crystal growth technique for 4×10^{-8} mol/mol purity 8=39665
  - crystal polarization by voltage pulses, 100°–350°C 8=40580
  - crystal in organic liquids, interfacial energy calcs. rel. to abrasive wear and adhesion 8=30724
  - crysts., additively discoloured, effect of laser irrad. 8=44485
  - crystals containing cavities, work of fracture 8=26834
  - deformed and aged, temp-depend of Mn vacancy pairs 8=48811
  - deposition of Au, Ag, Ni, Pd and Al films, crystal orientation 8=44085
  - density changes on γ-irradiation 8=40129
  - dielectric, unipolar conduction mechanism from solid-state electrolysis 8=40579
  - diffusion of Pb^{2+} 8=31011
  - diffusion of protons in aq. soln. 8=48115
  - diffusion, reciprocal and self-, along dislocations and break surfaces 8=26620
  - dislocation mobility and microhardness dependence on F-centre density 8=26690
  - dislocation multiplication 8=26686
  - dislocation pinning by lattice defects 8=26680
  - dislocations, single edge, penetration through slip lines 8=26687
  - dissolution kinetics at dislocation sites, rel. to solvent and poisons 8=26685
  - doping with OH^- and CO_3 8=48550
  - elastic constants and tensile strength 8=49036
  - electrical conductance, high temp. 8=40323
  - electron emission due to bombardment with inert gas ions 8=40686

Sodium compounds—contd
- **sodium chloride**—contd
  - electron exoemission, X-ray excited, obs. and model 8=36053
  - electronic spectra 8=26909
  - energy bands, plane wave calc. 8=40224
  - with epitaxial Au layer, electrostatic field effect on initial orientation 8=26111
  - evaporation struct. of crystals doped with divalent cations 8=48603
  - exoelectron emission, photostimulated, external elec. field effects, obs. 8=36041
  - F-centres, optical absorption 8=35591
  - F-colour centres, photothermal stability, effect of plastic deformation 8=35590
  - fracture surface as function of crystallographic direction and treatment method 8=44593
  - glycerol soln., dielec. relaxation 8=48192
  - grain boundary energies, rigid lattice approx. 8=40053
  - hardening by n- and γ-irradiation from critical shear stress analysis 8=49037
  - interfacial polarisation, electrode performance effects 8=40582
  - light scattering temp. dependence, 128-298°K 8=45207
  - luminescence after shock compression 8=49806
  - mean inner potential calc. method 8=30629
  - mean inner pot. meas. by electron diffr. 8=30628
  - mechanical props. rel. to impurity effects 8=26401
  - n. m. r., acoustic, rel. to plastic deformation 8=44320
  - photomechanical effect, wavelength dependence 8=36368
  - photostimulated electron exoemission on excitation by electron irradiation 8=40708
  - plastically deformed, F-centre thermal stability rel. to dislocation density 8=35586
  - precipitation and association of $CaCl_2$ 8=48390
  - pressure sintering, densification data rel. to plastic deform. 8=35070
  - proton energy loss crystal orientation dependence rel. to lattice effects 8=35598
  - pure, ionic cond., motion of cation vacancy and form. of Schottky pair 8=35537
  - refractive index and absorpt., far u.v. obs. 8=27592
  - rocksalt films, breakdown strength, anode surface and mats. effects 8=40578
  - Schottky defect formation energy, from dissolution of impurty containing precipitates 8=35536
  - single-crystal scatt. centres, Raman spectra 8=49737
  - single crystal, u.s. propag. rel. to plastic deform. 8=31191
  - solutions, homogeneous nucleation 8=34973
  - specific heat and enthalpies of change of phase; meas. 8=46286
  - strength, theoretical, along body and face diagonals 8=44594
  - surface distortions, electrostatic potential contribution to LEED intensities 8=48423
  - transverse acoustic [OhO] phonon dispersion curve from X-ray thermal diffuse scatt. 8=39876
  - thermal diffusivity at high press. and temp. 8=48762
  - thermal vibr. and Debye-Waller factor obs. 8=30905
  - thermoluminescence, activation energy for glow peaks, by initial rise method 8=32056
  - tribo-photostimulated exoemission of electrons and triboluminesc. 8=40709
  - type crystals, LEED obs. of (11) beam from (100) surfaces 8=44236
  - ultrasonic vibrations, generation and reception 8=35988
  - ultrasonically irradiated, dislocation behaviour 8=26688
  - ultraviolet spectrum and band structure 8=41121
  - u.s. wave delay time meas. at h.f. by phase comparison method 8=44314
  - vaporization effect of dislocations on rate 8=35008
  - water evolution on heating in vacuum 8=41263
  - X-ray scatt. rel. to dislocation density and distrib. 8=45198
  - X-ray study under high pressures 8=35303
  - Ag film, epitaxial growth 8=30745
  - AgCl-doped single crystal, far i. r. absorpt. spectra 8=36391
  - Ag-NaCl layers, e exoemission, X-ray excited, obs. and model 8=36053
  - Al film, epitaxial growth 8=30745
  - Au nucleation rel. to surface F-centre formation in γ-irrad. 8=44152
  - Cl^- channeling, computer analysis 8=40075
  - Co^{60} γ-irradiated crystals, chemical method for the determ. of F-centres 8=48884
  - Cu film, epitaxial growth 8=30745
  - CuCl-doped single crystal, far i.r. absorpt. spectra 8=36391
  - Fe impurity ions, Mossbauer effect study 8=39510
  - K^+ channeling, computer analysis 8=40075
  - M centre, lifetime of first excited state 8=40063
  - Mn-doped, ionic cond., motion of cation vacancy and form. of Schottky pair 8=35537
  - Na^+ channeling, computer analysis 8=40075
  - $NaCl^{35,37}$, isotope-induced acoustic band far i. r. absorpt., 7°K 8=36396
  - NaCl, divalent impurity elec. behaviour 8=44423
  - NaCl, F-centre thermal destruction rel. to dielec. losses 8=44484
  - NaCl-type ionic crystal, energy loss of electron beam due to surface optical mode 8=44871

Sodium compounds—contd
  sodium chloride—contd
    NaCl: Ag, luminescence excited with extreme u.v. radiation 8=36501
    NaCl-Ag phosphors, F centers decomposition, thermal and photothermal 8=31123
    NaCl-AgCl, solid soln., structural changes followed by conductivity and loss tangent meas. 8=35060
    NaCl:Ca, luminous flux scattering temp. dependence, 140 to 150°C 8=32016
    NaCl:Cu$^+$, far i. r. props. of lattice resonant modes rel. to isotope shifts 8=36393
    NaCl: Cu$^+$, resonant bandmode, stress dependent freq. shift 8=48708
    NaCl: Cu$^+$, Ag$^+$, impurity ion distrib. coeff. on crystallization from melt 8=39674
    NaCl: Cu conc., absorpt. and fluoresc. after period of storage 8=49741
    NaCl/KCl aq. soln., heat of mixing 8=32989
    NaCl-KCl solid solns., decomposition effects on spectral characts. 8=36395
    NaCl:Mn, impurity distrib. coeff. from e.p.r., 8=48823
    NaCl:Mn, yield strength 8=40175
    NaCl: Pb(Ca), impurity ion effect on crystal structure 8=26642
    NaCl: Pb(NO$_3$)$_2$, structural changes on heat treatment at 300°C 8=26689
    UCl$_3$ soln., partial v.p. obs. 8=30456

Solid solutions
    See also Alloys; and under compounds of the individual elements. Solid solutions such as Au—Cu, Au—Cu—Zn are indexed under compounds of the first named element, i.e. "Gold compounds" in these examples.
    biphenyl, in cyclohexane, delayed fluoresc. 8=36529
    composition, X-ray diffr. and fluoresc. spectrometry 8=27814
    diffusion, effect of deviations from Vegard rule under multilateral pressure conditions 8=48765
    diphenyl-α, α' dipyridyl, single crystal study rel. to phase diag. 8=26040
    ferrite-spinels, two-component, vacancy formation and behaviour 8=26638
    ferroxplane, dielectric props. 8=49321
    hardening in conc. solns., stress analysis 8=48964
    with impurities, slow neutron scatt. cross-sections 8=35379
    lattice vibrs. and order in substitutional solns. 8=30923
    metal-oxygen, kinetics of oxygen uptake 8=30651
    mixed crysts., deformed AB-type, surface e states, calc. 8=35784
Solid solutions—contd
    Mössbauer effect probability rel. to order-disorder transforms. effects 8=35032
    noble metal-rare earth, e.p.r. and susceptibility meas. rel. to local moments 8=31882
    organic, phosphoresc. and delayed fluoresc., kinetics and chem. appls. 8=25936
    oscillation absorption bands, Davydov's splitting 8=35547
    paradibromobenzene-paranitrochlorobenzene, single crystal study rel. to phase diag. 8=26040
    perovskite-type, ferroelec. transitions, phase fluctuations 8=35970
    photoluminescence, quenching energy transfer model 8=36459
    short-range order, rel. to deformation, annealing and quenching 8=26033
    short-range ordering rel. to diffuse scattering in e.-diffr. patterns 8=39758
    single crystal production, rel. to component segregation on crystallization 8=39654
    spinels, activity computation of cations 8=35045
    steels, Fe–C and Fe–Ni–C, in hardening rel. to martensite strength 8=26815
    sulpho spinels, binary, miscibility from x-ray diffr, and mag. props. 8=30653
    supersaturated, periodic conc. distrib. 8=30654
    superstructures, concentration inhomogeneites in ordered soln. 8=35057
    ternary f.c.c. substitution, hardening action of short range order 8=26806
    tetraphenylporphin and Ag deriv., intermediate comps. growth and structures 8=26034
    tolane-dipherylmercury single crystal study rel. to phase diag. 8=26040
    in triglycine sulphate and isotypic crystal system, ferroelec. phase transition 8=27293
    triglycine sulphate, dueterated, prep., conc. depend. of ferroelec. props. 8=49377
    triphenylene-d$_{12}$-Rhodamine B, triplet-singlet energy transfer kinetics, obs. 8=36533
    yield stress of binary crystals, depend. on temp. and alloy conc. 8=26763
    Ag–M, (M = In, Sn, Sb), activation energies for Zener relax. 8=31190
    Ag–Sn, extended dislocation modes, effect of annealing 8=35561
    Ag–Zn, vacancy-controlled atomic mobility, Zener-relax. studies 8=31040-1
    in Al-Cu-Mn alloys, rapidly solidifed, supersaturated comp. and decomposition kinetics 8=35084
    Al--Ge, stacking faults in precip. particles and elastic stresses 8=31096
    Au-V dilute, V^{51} n. m. r. 8=27514
    Ba$_{1-x}$Ca$_x$MnO$_3$, structure and mag. phase transitions 8=27377
    BaTi$_{0.75}$Sn$_{0.25}$O$_3$, Mössbauer effect and dielec. const., —200 –20°C 8=30639
    BaTiO$_3$-KF system on BaTiO$_3$ growth from KF flux 8=26163
    BaTiO$_3$-La$_{2/3}$TiO$_3$, -Sm$_{2/3}$TiO$_3$, and -Ba$_{1/2}$NbO$_3$, relax. polarization due to vacancies 8=35975
    (1-x)BiFeO$_3$-xSr(Sn$_{1/2}$Mn$_{2/3}$)O$_3$, transitions from Mossbauer studies 8=27442
    C—Cr—Ni—Si system, position of pseudo-eutectic rel. to reinforcing phase 8=43976
    CaF$_2$-Tb$_2$O$_3$(Tb(OF)$_3$)(TbF$_3$) crystal chemistry 8=39640
    CeO$_{1.75}$-La$_2$O$_3$, tri-and tetra-valency of Ce ions from X-ray absorpt. spectra. 8=39638
    Co with P, magnetic moment rel. to P content 8=45006
    Co-C, metastable extension of C solubility, splat-quenching effects 8=30656
    Co$_x$Ni$_{1-x}$S$_2$, pyrite, prep. and lattice parameters 8=48342
    Cr–Ni–Fe, prolonged, crystallization, rel. to lattice parameters and phase dimensions 8=26246
    Cu alloy, dilute thermally activated dislocation depinning 8=26670
    Cu-Al, stacking fault energy, annealing and irrad. effects 8=26702
    Cu-Au alloys, friction, wear and surface hardness in abrasion 8=40149
    Cu-12.5 wt. %Ge, f. c. c. → h. c. p. transform. 8=26068
    Cu$_x$Ni$_{1-x}$S$_2$, pyrite, prep. and lattice parameters 8=48342
    Cu-Zn-Sn, ternary diffusion 8=39972
    Fe base alloys, interstitial, thermodynamic props. 8=44328
    α-Fe, cold-deformed, with stacking faults of C and N 8=35543
    α-Fe, internal friction of C, effect of osc. modes on quantitative anal. 8=35695
    Fe–rich alloys with non-transition elements, saturation magnetization 8=49519
    Fe-Be alloy, ageing, 3-D modulation of struct 8=30650
    Fe$_x$Co$_{1-x}$S$_2$, pyrite, prep. and lattice parameters 8=48342
    Fe-N single crystals, strengthening 8=49013
    Fe-N, solid solns, resistivity mag. field dependence at 4.2°K 8=31319
    Fe-Ni-C martensites, hardening and thermally activated deformation 8=26816
    GaAs-InAs, epitaxial films, crystallization kinetics and structure 8=26119
    GaP-GaAs epitaxially grown, departures from homogeneity 8=30838

Solid solutions—contd
  Ge-Si electronic props 8=49225
  HBr in DBr, n.m.r. 8=36269
  HCl in DCl, n.m.r. 8=36270
  Hg_3Te_3-Im_2Te_3 alloy system, phase diagram 8=30697
  InAs with $A^{III}B^{V}$ type cpds., reflection spectra 8=41099
  InAs:Cu, formation and decomposition effects on elec. props. 8=40473
  In–Cd, densities 8=43977
  In–Ce, superconductivity, low-temp. resistivity and thermoelec. power rel. to localized moments 8=31339
  $In_{1-x}Ga_xSb$, thermal conductivity temp. dependence 8=44363
  KBr-KCl, luminesc., intrinsic, induced by X-ray 8=41198
  KCl-KBr, p-irradiated, F-centre generation comp. dependence 8=31117
  KCl-KI, decomposition effects on spectral characts. 8=36395
  KCl–KI, optical absorption spectra 8=49736
  $Li(Nb_{0.5}Fe_{0.5})O_2F$–$Li(Ta_{0.5}Fe_{0.5})O_2F$ system, phase diag. and dielec props. 8=31435
  Li_2O-LiF, oxide and hydroxide activity determ. 8=36593
  MgO-Cr_2O_3-Fe_2O_3 at 1300°C in air, phase relations 8=39529
  MgO–MnO, and with LiO_2, struct. and mag. props. 8=48662
  Mg_2SnO_4-$MgFe_2O_4$, magnetic props., crystal structure 8=40738
  $MnAs_x Sb_{1-x}$, paramagnetic susceptibility and structure 8=49482
  $Mn_{1-x}Fe_xP$, magnetic props. rel. to props. of FeP 8=27378
  MnP–MnAs magnetic and structural study 8=48388
  Mo, of S, Se and Te, effect on lattice consts. expansion and densities 8=48664
  NaCl-AgCl, structural changes followed by conductivity and loss tangent meas. 8=35060
  NaCl-KCl, decomposition effects on spectral characts. 8=36395
  $NaNb_3O_8$–Nb_2WWO_4, existence and crystallographic study 8=43978
  Na-Sr-Cd niobates, dielectric props. and phase transitions 8=35979
  Nb-O-N, supersaturated, oxide and nitride precip. in annealing and hardness, obs. 8=30831
  Ni-C metastable extension of C solubility, splat-quenching effects 8=30656
  Ni_4Mo-Ni_4W, ordering rel. to resistivity 8=39530
  NiO-MgO, formation on thermal decomp. of mixed hydroxides 8=39532
  NiO–MgO, thermodynamic activites of NiO 8=43979
  NiO-MgO, struct. and mag. props., 98°-298°K 8=35061
  Pb-Bi, indirect nuclear spin-spin interactions in Pb by spin echo 8=40996
  Pb-Hg, indirect nuclear spin-spin interactions in Pb by spin echo 8=40996
  Pb-In, indirect nuclear spin-spin interactions in Pb by spin echo 8=40996
  $PbTe_xSe_{1-x}$, rel. to forbidden band width temp. dependence 8=40247
  PbTe-SnTe-PbS system, current carrier scattering mechanism 8=31385
  $PbTiO_3$–$PbMn_{2/3}W_{1/3}I_3$ system, structures and permittivities 8=40616
  Pt-1 at.% Co(Fe), elec. and mag. props., plastic deformation effects 8=31327
  Sb_2S_3–Bi_2Te_3 solid solns., morphotropy 8=48672
  $Se_xTe_{1-x}Hg$, crystal growth and structure 8=26269
  Si-O, anomalous X-ray transmission, rel. to periodicity changes on decomposition 8=36409
  Sn-Ce, superconductivity, low-temp. resistivity and thermoelec. power rel. to localized moments 8=31339
  $(Sr_{0.4}Bi_xLa_{0.6-x})MnO_3$, structure, mag. and dielec. props. 8=26038
  $Sr_{1-y}Bi_y)MnO_3$, structure, mag. and dielec. props. 8=26038
  Ti, separation of α- and β-, conditions 8=48347
  Ti–Ni–Sb–O system, rutile formation 8=48405
  Ti–Ni–Sb–O system, rutile, reaction diagrams 8=48404
  TiO_2-Sb_2O_3-NiO system, comp., structure and colour 8=26039
  Tl, superconducting transition temp., effect of impurities 8=49201
  $UC_{1-x}N_x$, in N_2 gas, change of comp. 8=35063
  UP-ThP and UP_2-ThP_2, antiferromagnetic 8=45067
  $(U, Pu)O_2$, production and Pu distrib. 8=29562
  WC-Co hard metal foils, microstructure 8=35287
  W-Cr, decomposition from X-ray diffr. study 8=26086
  $91Y_2O_3 + 9ThO_2$, elastic moduli, temp. depend. from 25°C to 1100°C 8=35724
  $Zn_{0.1}Cd_{0.9}Sb$ crystals, thermoelectric power anisotropy 8=27311
  $Zn_xHg_{1-x}Te$, crystal growth and structure 8=26269
  $Zn_xHg_{1-x}Te$, fundamental reflectivity spectrum 8=45232
  $Zn_xHg_{1-x}Te$, thermal conductivity 8=44372
  ZnSe–SnTe, growth in Te_2 atmosphere 8=48564
  ZnTe–CdTe, absorption spectra, energy structure 8=40253
  Zr–O interstitial, ordered arrangement of O 8=35289
  Zr-O, microprobe and e microscope obs. 8=30658
  ZrO_2, hydrated amorphous, nature and thermal behaviour 8=43982
Solidification. See Freezing.

Solids

    containing molecules, reversible orientation, mech. 8=39322
    critical mixtures, anomalous viscosities 8=48097
    critical opalescence in elec. field, relax times 8=30473
    critical opalescence of dipolar mixtures, elec.-field effect 8=39312
    decorated lattice model of binary mixture 8=23873
    dilute polymer, orifice plate calibration 8=25889
    dispersion forces of solvents, effect on u.v. spectra 8=34870
    dissolution of calcined ferric oxides rel. to calcining temp. 8=45337
    dyes, Q-switch, for Nd lasers 8=42112
    electrolyte diamag. solns., intermolec. proton relax. rate 8=25957
    electrolyte, isothermal equilib., independ. of changes in dielec. const. 8=43761
    electrolyte, nuclear spin relax. and viscosity 8=34927
    electrolyte solns., diffusion potential decay 8=30448
    electrolytes, aq., Hall effect meas. 8=48199
    electrolytes, diamag., dipolar spin relax. and self-diffusion 8=25952
    enantiomers in optically active liq. crysts., n.m.r. 8=39422
    ethanol-ethyl halide mixtures, u.s. relax 8=30471
    gases in non-polar solvents, entropy of vol. expansion 8=39288
    gas-liquid, filtration, residual water effects 8=39233
    fluorescence quenching kinetics 8=39385
    hexamethylenetetramine aq. solns., differential diffusion coeffs. 8=30446
    hexamethylenetetramine-water, solvent-solute interactions 8=41254
    hyperchromism, two-band model 8=39365
    inert gases in H_2O, struct. theory 8=48077
    intramolecular barrier in solns., dielec. meas. 8=48186
    ion hydration in aq. solns., i.r. spectra 8=39373
    ion-solvent interaction, preferential solvation in mixed solvents 8=39314
    ionic, equilib. props., computation methods 8=34782
    ionic, magneto-optical rot. meas. by sample exchange 8=34847
    ionic, thermodynamic instability consts. of complexes, calc. by Debye-Huckel type eqns. 8=25905
    ionic, very dilute, ionic distrib. and freezing pots 8=34971
    isobutyric-acid-water system, diffusion coeff. obs. near critical soln. conc. 8=39341
    liquid mixtures, light scatt. above and below crit. soln. temp. 8=39371
    liquid binary mixtures, thermodynamic props. determ. 8=43814
    liquid mixtures, surface props., statistical-mech. calc. 8=48107-8
    liquid mixtures, thermodynamic excess functions 8=39321
    lyophilic, stability and mech. of coagulation by electrolytes 8=25970
    lyophobic, stability and mech. of coagulation by electrolytes 8=25970
    macromolecular, normal stress difference meas. 8=25893
    macromolecules, i.r. spectra and molec. interactions 8=30485
    of macromolecules, theory of diffuse small-angle X-ray scattering 8=25870
    metal thiocyanate molten solns., i.r. spectra 8=25934
    methylurea-water, solvent-solute interactions 8=41254

Solutions—contd
  mixture at vertical point, anomalous increase rel. to damping of hypersonic waves 8=30465
  molecules in aq. soln., dipole moment determ. 8=34213
  molecules, polar, in non-polar solvents, dipole moments formulae 8=34216
  molten salts, conformal soln. theory 8=34784
  monodisperse rigid rods, spectral distrib. 8=39362
  nitrobenzene-n-hexane mixtures, u.s. absorpt. near critical region 8=25912
  nonionic detergent in aq. soln. micellar props. 8=30559
  nonradiative energy transfer in systems with frozen rot. Brownian motion 8=34883
  polar viscous, dielec. relax., microwave obs. and theory 8=43852
  polyisobutylene, v. dil., viscoelasticity 8=39329
  polymer, boson representation of gyration radius 8=38974

  polymers in binary mixed solvents, light scatt. 8=30472
  polymers, linear, dilute flow, friction factor characts. 8=25845
  polymethacrylic acid, aqueous and methanol solns., small-angle X-ray scattering 8=25888
  poly-n-butyl methacrylate in chlorinated diphenyl, normal stress effect 8=39333
  polystyrene, film-forming 8=44065
  s-RNA in water, regularized arrangements from X-ray scattering studies 8=25885
  salts, convective diffusion in porous mats., boundary cond. at inlet of system 8=39959
  siloxanes, solvent effect, freq. spectroscopic investigation 8=25884
  small molecules in solvents, rotation-like motion, spectral evidence 8=25928
  solute concentration, effect on macromolecular adsorpt. 8=39614
  solute-solute interactions in aq. solns. 8=25886
  solutes, diffusivity in rel. to heat of vaporization 8=25900
  solvated electron in polar liqs., oriented dipole model 8=34785
  solvent effects in u.v. spectra 8=34876-7
  solvent-solute interactions, effect on macromolecular adsorpt. 8=39614
  solvent Stark effects and spectral shifts 8=39375
  spectra, charge-transfer absorpt. band shape and polarization, calc. 8=34200
  structure in above-critical region, theory 8=25995
  structure rel. to morphology of hydrothermally grown crystals 8=26223
  styrene-methyl methacrylate random copolymers, dilute soln. props. 8=39323
  ternary liq. systems, decorated lattice model 8=34781
  ternary, thermodynamics, quasi-chem. approx. 8=48083
  thermal conductivity, calc. rel. to molecular component sizes reln. 8=39354
  three-component, phase transitions and crit. pts. 8=48076
  transfer of electronic excitation energy, effect of diffusion 8=34881-2
  trypin and DIP deriv., in water and salt solns., X-ray scattering study 8=25681
  Tschitschibabin carbohydrates in benzolic soln., mol. states 8=48064
  uranine in glycerol-ethyl alcohol and glycerol-H_2O, mol. plus solvation shell vol., obs. 8=34285
  water-oil system solubilized with Aerosol OT, dielec. props., 5-60°C 8=39406
  AgBr cryst/soln. phase, distrib. equilib. 8=34959
  AsF_6^- anion in non-aq. solns., spin-lattice relax. 8=34928
  Ag-Si molten alloys, Si activity by e.m.f. meas. 8=48078
  Ar-N_2 liq. mixtures, surface tension statistical-mech. calc. 8=48107-8
  Bi-Bi Br_3, molten, thermoelec. power 8=25947
  Cd-$CdCl_2$ liq. system, vol. change on mixing 8=30414
  Co(II) Br, in water, methanol and ethanol, bonding, interact and ion form 8=43764
  CO(II) Cl, in water, methanol and ethanol, bonding, interact and ion form 8=43764
  Fe(III)-Cl in methanol, bonding and interacts. 8=43764
  Ga-In liq. alloys, activities 8=39315
  H_2, vibr. solvent shifts in induced i.r. spectra 8=43837
  HSO_3Cl solns. of simple bases, elec. cond. 8=48194
  He^3 in He^4, Fermi-liq. transport coeffs. 8=37340
  KCl/NaCl aq., heat of mixing, calorimeter 8=32989
  KCl in H_2O-alcohol, elec. cond. at high press. 8=39407
  KI in formamide, X-ray diffr. 8=39306
  Li soaps in alcohols, physical props. 8=39316
  NO in H_2O, radiolysis study 8=49975
  NO in H_2O, D_2O photolysis at 1849 Å 8=49958
  Na, liquid, properties, and order in liquid phase 8=48084
  NaCl/KCl aq., heat of mixing, calorimeter 8=32989

Solutions—contd
  $Na_2(H_2SiO_4).4H_2O$, structure in soln. and solid-state 8=48081
  Na-NH_3, dynamic polarization 8=34925
  Ni(II) in aq. soln., primary solvation no. determ. by p.m.r. 8=39423
  O^{17}-n.m.r. study of aq. electrolyte and nonelectrolyte solns. 8=25956

  benzene sorbed on silicagel, proton relaxation, temp. depend. 8=49632
  cellulose, of water, and diffusion 8=30785
  chemisorbed atoms, long-range forces 8=47533
  chemisorption, heat of, calc. using H-MO approx. 8=36585
  chemisorption in mol. separator, deactivation 8=32150
  chemisorption, negative temp. coefficients for surface diffusion 8=49898
  chemisorption of diphite molecules on AC and Mg 8=49899
  chemisorption of N and NH_3 synthesis of Fe purified in ultra vacuum 8=41265
  chemisorption of gases on solid surfaces, molec. thermodynamic treatment 8=44069
  chemisorption of O_2 on electro-graphite 8=41266
  chemisorption of O_2 on ZnO, effect of d.c. electric field 8=49905
  chemisorption states of ionic lattices 8=32118
  chemisorption systems, interpret of LEED data rel. to interact with adatoms 8=27733
  desorbed atoms from specular surfaces, ang. distrib. 8=39574
  desorption by emerging high-energy electrons, kinematics 8=39607
  desorption of thin films on solid surfaces, interpretation of kinetic results 8=39610
  electrical field effect 8=39606
  glass, octadecylamine and stearic acid desorpt. and exchange, obs. 8=30768
  graphon, of O_2, kinetics, 450-675°C 8=45362
  hydrophilic clays, H_2O permeability, porosity and effective specific surface of filling 8=30661
  ionic pump, leak detection appl. 8=39260
  ionic pump, residual gas analysis in ultra-high vacuum system 8=36630
  ionic pumps for Ar 8=39245
  liquid in wetted-wall columns, of gases, acceleration by corona discharge 8=32119
  metal surfaces, gas interact. in field ion microscope 8=35143
  in metallic lattices, atomic capture coeff. and desorpt. rate at very low temps. 8=30762
  metals, H^+ implantation rel. to sputtering 8=30764
  moisture by porous bodies, thermodynamic functions 8=44070
  monooctadecyl phosphate monolayer desorpt. from air/water interface, kinetics 8=30442
  organo-clays, isotherms rel. to swelling and intra-cryst. porosity 8=30779
  oxygen desorption from W substrate by e. impact. 8=49901
  polyvinyl alcohol, of water, crystallinity effect 8=30784
  pump, fast, for 10-150 mtorr 8=30327
  of radioactive substances in chromatographic columns, steady-state conc. distrib. 8=32144
  residual gas on metal surfaces, rel. to secondary electron emission 8=49445
  sample holder for simultaneous gas sorpt. and X-ray obs. 8=33301
  sepiolite, vapour sorption 8=26137
  steel, octadecylamine and stearic acid desorpt. and exchange, obs. 8=30768
  surface scanning with electron probe and ion desorption exam. by mass spectrometer 8=30760
  zeolites, synthesis 8=36541
  Ag, Kr, Xe bombard., thermal desorption obs. 8=48483
  Al_2O_3, chemisorption effects on electronic props. 8=44866
  Au, Kr, Xe bombard., thermal desorption obs. 8=48483
  C membranes, time-lag and blind pore behaviour 8=26134
  CO_2, mixed-gas adsorption and vacuum desorption on mol. sieve, thermodynamic and rate behaviour 8=48481
  CO_2 on MgO, i.r. study 8=47974
  CdS, chemisorption states of oxygen 8=32118
  CdS, influence of oxygen chemisorption and desorption on surface photoconductivity 8=49413
  Cr, chemisorpt. of alcohols, aldehydes, ketones, i.r. of spectra formed 8=45363
  Cu crystal, Xe^+ thermal desorption obs. 8=48482
  Cu, Kr, Xe bombard., thermal desorption obs. 8=48483
  $Fe(OH)_2$, of Ru and nitrosylrothenium, ionic and colloidal, obs. 8=44073
  H atoms, chemisorbed, long-range forces 8=47533
  H on W chemisorption 8=49904
  H-metal system, theory 8=49896

Sorption—contd
H_2O on MgO, i.r. study 8=47974
KCl, water evolution on heating in vacuum 8=41263
MgO, chemisorption of H_2 and surface OH, i.r. spectros. 8=49894
Mn, chemosprt. of alcohols, aldehydes, ketones, i.r. of spectra formed 8=45363
Mo, of N_2 8=49908
Mo films, desorption of N_2 8=30771
N in Ta; 10^{-8}-10^{-3} torr, 1600-2300 °K, 0.0044-1 atomic %, press.-temp.-conc. ranges 8=49897
NaCl, water evolution on heating in vaccum 8=41263
Nb, of O_2, kinetics, 1100-1800 °C at 5×10^{-5} and 5×10^{-4} torr 8=49895
Ne desorption from glass, temp. depend. 8=48485
Ni films, chemisorpt. of O_2 and H_2, reconstitution of adsorbate adsorbent interface 8=27737
Ni, H_2 desorpt., obs. 78°-300°K 8=30772
O transfer from CO_2 to metal surface, kinetics 8=27735
Pd, of NO, and mag. susceptibility 8=44075
Pt, of propane chemisorption, effect of pre-adsorbed water 8=27738
Pt powder, isotopic exchange of O_2 8=41236
Rh, i.r. spectra of chemisorbed H_2 and D_2 8=25470
SnO_2: Zn, chemisorbed oxygen effect on elec. conductivity 8=31391
Ta, of O_2, kinetics, 1100-2000 °C at 5×10^{-4} torr 8=49895
TaC, chemisorption of CO 8=49903
Te films, desorption of CO_2 on e-bombardment rel. to resistivity increase 8=35829
Ti films, desorption of N_2 8=30771
Ti, sorption of NH_3 with dissociation to H_2 and N_2 8=32103
Ti, H_2 desorpt., obs. 78°-390°K 8=30772
TiO_2, chemisorption of O rel. to work function and elec. cond. changes 8=40691
UO_2, Fl chemisorpt. in pellets fluorination, 300-540°C 8=32104
V, chemosprt. of alcohols, aldehydes, ketones, i.r. spectra of species formed 8=45363
V, kinetics of O chemisorpt. and engassing 8=36584
W, binding and field desorpt. of individual atoms 8=30775
W, chemisorbed gases effects on adhesion and friction 8=49061
W, chemisorption of N_2O rel. to temp. 8=36586
W, inert gas bombard., thermal desorption obs. 8=48497
W, of Cs, Hg and O, desorption on coadsorbate interaction with low energy electrons 8=39623
W, desorption, thermal, of O_2, associated effects 8=39626
W (110) and (100), oxide formation and desorpt. processes, mass-spectrometry 8=35198
W, surface chemisorption of water, investigation 8=27739
Zn, effect of chemisorbed O_2 on Kr physisorption 8=48500
ZnO, chemisorption states of oxygen 8=32118

Sn, in stable and undercooled states, 632-425°K 8=30459
solids
Anderson-Gruneisen parameter for general interatomic potential 8=48939
b.c.c. metals, zero-point energy and Θ_c^∞ 8=30932
brass, Debye temp. determ. by one-temp. X-ray method 8=48736
cerium magnesium nitrate, used in low temp. thermometry 8=30962
cobalt borides, electronic, meas. 8=35426
copolymers of methylmethacrylate with methacrylic acid 8=39917
critical temp. region, smoothness due to random impurities 8=44987
diamond, thermal energy evaluation rel. to at. vibration spectrum, review 8=43922
with electron-gas, almost-degenerate, corrections for Grüneisen coeff. and sp. ht., 8=39908
ferromagnets, and linear expansion coeff. at Curie pt., critical fluctuations and anomalous behavour 8=30959
galactose, amorphous, and enthalpy, 15-45℃, rel. to mol. structure 8=30966
glass, Corning 7560, between 4.5° and 20°K 8=26589
glucose, amorphous, and enthalpy, 15-45℃, rel. to mol. structure 8=30966
gold-transition metal alloy, below 3°K 8=39912
Grüneisen coeff. evaluation 8=44352
heat capacities, low temp. containing two or more contributions, analyses 8=35434
Heisenberg antiferromagnet, free surface effects 8=45048
Heisenberg ferromagnet, and high temp. susceptibility, for general spin 8=40780
Heisenberg ferromagnets, impure, calcs. 8=35422
ice, sp. heat near ferroelectric transition temp. 8=48737
Ising lattice with impurities, behaviour near critical point 8=40773
magnetic systems with long-range interactions, shape dependence 8=35423
mannose, amorphous, and enthalpy, 15-45℃, rel. to mol. structure 8=30966
metals, modified modulation method 8=48732
metals, weakly ferromagnetic, spin-fluctuation contrib. 8=30960
methyl-ammonium alum, low-temp. anomalies meas. by continuous heating calrimetry 8=46299
moist mats., simultaneous determ. of thermophys. characts. for any values of Fourier no. 8=37315
particle of dispersed mat, transient heating without temp. grad. 8=30957
polystyrene, atactic, heat capacity rel. to annealing, 10-360°K 8=44345
quartz, from eddy current heated microcalorimeter 8=46286
rare-earth ethyl sulphates, mag. contribution 8=44343
rare-earth metals, low temp. ht. capacities containing two or more contrib., analyses 8=35434
rare-earth ortho-aluminates, antiferromag., near Neel point 8=35435
rare earth perovskites, between 1.2° and 5°K 8=39921
steel, stainless and Polish, at low temp. 8=48730
subliming type, heat capacity meas. with electronic calorimeter 8=37327
2, 2, 6, 6 tetramethyl 4-piperidinol 1-oxyl, 1.3°-74°K 8=30969
transition metals and alloys, low temp. electronic enhancement by spin fluctuations in electron gas near mag. instability 8=31922
transition metals, nearly ferromag., spin fluctuations effect on low temp. electronic coeff. 8=44992
triglycine sulphate, ferroelec. anomaly near Curie pt. 8=39923
triglycine sulphate, near Curie temp., meas. of transtion energy and entropy change 8=35430
two-layer composite samples, ht. capacity meas. by flash method 8=48751
Ag 8=35424
Ag, pure, below 3°K 8=39912
AgI, ht. capacity 50°-400℃ 8=30961
AgI, ht. capacity, theory 8=48733
Al-Ng alloy, superconducting, and energy gap anisotropy 8=48734
Al_2O_3, from eddy current heated microcalorimeter 8=46286
Au 8=35424
Au, pure, below 3°K 8=39912
Au-Fe alloys, rel. to hyperfine coupling constant determ. 8=31495
Au-Ge-Si alloy, at glass-liq. transition 8=39470
$BaCl_2$, heat content meas. in range 298 to 1700°K 8=44339
BaI_2, heat content meas. in range 298 to 1700°K 8=44339

Specific heat—contd
solids—contd
BaO glasses, heat capacity as function of composition and temp. 8=44333
n-Bi_2Te_3, from 1.3 to 90°K 8=39910
CN^- in KCN, rotation ht. cpaacity above 168°K 8=26030
$CeCl_3.7H_2O$, between 1.1 and 3.3°K 8=30963
Cr-Mn alloys, antiferromagnetic 8=48735
Cs halides, lattice dynamics calc. 8=39871
Cu 8=35424
Cu, Debye temp. determ. by one-temp. X-ray method 8=48736
Cu, pure, below 3°K 8=39912
Cu, Cryostat obs. 1°-30°K 8=24033
Cu, 40-920℃ 8=30964
Cu-Fe Kondo alloy obs. down to $2 \times 10^{-3} T_K$ 8=44334
Cu-La double nitrate, heat capacity below 1°K 8=44336
Cu-Ni: system, Debye temp. conc. depend. rel. to ferromag. ordering, obs. 8=39913
Cu-Zn, electronic 8=44335
$Cu(NO_3)_2.2.5H_2O$, ht. capacity, 0.5-4.2°K, rel. to antiferromagnetic props. 8=35428
$CuSO_4.5H_2O$, ht. capacity at 0.4°-4.2°K in mag. fields 8=39915
$CuSO_4.5H_2O$, ht. capacity below 4°K in mag. fields 8=39914
Cu_3Au, below 3°K, effect of ordering 8=35427
$DyFeO_3$, 1.2-80°K rel. to mag. ordering 8=35429
EuS:Gd, magnetic 8=44337
Fe^{57} in cubic lattices, Gruneisen's formula rel. to recoil-free fractions for γ-rays 8=44498
Fe_xB, $(x = 1, 2)$, electron terms 8=30965
Fe_xO, comp-dependence 8=39916
GaP, Debye temp. calc. from u.s. phase-comparison meas. of elastic constants 8=49021
$GdCl_3$, magnetic, high freq. susceptibility exp. 8=40817
GeO_2, heat content meas. in range 298 to 1700°K 8=44339
In-7.05 wt.% Pb alloy, type II superconducting, rel. to irreversibility effects on Maki's parameters 8=44342
Ir alloys, electronic, and mag. susceptibility rel. to rigid band model 8=31532
K, Debye temp. calcs. from Mossbauer meas. with K^{40} 8=42859
KH_2PO_4, temp. dependence 8=44338
$KMnF_3$, heat capacity rel. to magnetic spin 8=44340
KNO_3, heat content meas. in range 298 to 1700°K 8=44339
K_2MnF. heat capacity rel. to magnetic spin 8=44340
Kr, solid, meas. rel. to thermodynamic props. 8=48745
La-Cu double nitrate, heat capacity below 1°K 8=44336
$LiNbO_3$, 77-500°K 8=44341
$LiTaO_3$ ferroelec., temp. dependence, 25-700°C 8=44888
N_2, thermal capacity, 2.6-15°K 8=30967
NaCl, from eddy current heated microcalorimeter 8=46286
$NaClO_3$-$NaNO_3$ system 8=48087
NaF, temp. dependence, 0.05-15°K 8=26591
$NaNO_3$, in phase transition 8=48391
Nb-Ti alloy, temp. depend. at superconducting transition 8=48738
Ni, low temp., 8=39919
Ni-Co alloys, f.c.c., low temp., rel. to band model determ. 8=48739
Ni-Fe alloys, 1.2-4.2°K obs. 8=26592
Ni-Rh alloy, nearly ferromagnetic, and mag. susceptibility 8=31660
$NiCl_2$, rel. to mag. energy spectrum, 1.8-16°K 8=39918
$Ni_{1-3x}Cu_{2x}Fe_x$, low temp., 8=39919
α-$NiSO_4.6H_2O$, ht. capacity, 0.4-4.2°K in mag. field 8=30968
α $NiSO_4.6H_2O$, in mag. fields, theory 8=39920
PbTe, Debye temp. calc. at 0°K from elastic constants and thermal expansion meas., 8=49044
Pd alloys, rel. to band structure and exchange-enhancement effects 8=31294
Pd, electronic 8=26575
Pd-Fe alloys, rel. to hyperfine coupling constant determ. 8=31495
Pd_3Fe alloy, 0.15-1°K, rel. to hyperfine interaction constants determ. 8=31504
Pd:Ni dilute alloys, e heat conc. depend., local exchange enhancement model 8=35433
Pd:Ni dilute alloys, low-temp., localized exchange enhancement model 8=35432
Pt alloys, rel. to band structure and exchange-enhancement effects 8=31294
Pt_3Fe alloy, 0.15-1°K, rel. to hyperfine interaction constants determ. 8=31504
Pu fast reactor fuels, obs. 8=25306
δ-Pu-Ga alloys, temp. depend. below 300°K 8=44598
PuP, cold-pressed, sintered, ht. capacity up to 650°C 8=44368
PuS, cold-pressed, sintered, ht. capacity up to 650°C 8=44368
SnTe, Debye temp. determ. using Mossbauer effect in Sn^{119} and Te^{125} 8=44344
SrF_2, heat content meas. in range 298 to 1700K 8=44339
Ti-Mo alloys, low temp., 8=39922
$UC_{1-x}O_x$, and heat of formation 8=30970
UO_2, heat content from 1200° to 3100°K 8=35436
W, electronic parameter rel. to low temp. CMN scale 8=37331

Specific heat—contd
  solids—contd
    W, Nernst-Lindemann eqn. in range 24°-1800°C, validity 8=26590
    W, specific heat, 1300-3000°K, modified modulation method 8=48732
    YAg, 1.3-5°K, rel. to density of states at Fermi level 8=48740
    YCu, 1.3-5°K, rel. to density of states at Fermi level 8=48740
    Zn, Debye temp. evaluation rel. to mean square at displacements thermal variation 8=44395
    ZnO, from eddy current heated microcalorimeter 8=46286
Spectra
    See also Absorption/light; Astronomical spectra; Atmospheric spectra; Colour; Mass spectra; Raman spectra; Spectrochemical analysis; Spectroscopy; Stark effect; X-ray spectra; Zeeman effect.
  absorpt. characteristics using Jogansen's function for meas. integral intensities 8=34865
  absorption band, apparent bandwidth parameters, obs. 8=24388
  absorption, excitons, low temp., theory 8=40258
  absorption line form. in mag. field, anomalous dispersion 8=29570
  adiabatic inversion with light pulses 8=47437
  auroral, 1050-1550Å region 8=36812
  axially symmetric mols., elec. field induced 8=29676
  chemiluminescent reaction of active N_2 with anhydrous Na_2SO_4 8=41255
  complex, decomp., digital computer programme 8=28245
  complex octahedral anions in crystals, i.r., rel. to cation effects 8=49683
  cyclotron double resonance for spectroscopic study of ion-molecule reaction mechanisms 8=47554
  difference band systems, temp. depend. of total intensity 8=25463
  discrete, generation of second harmonic 8=24354
  dispersed, any wavelength region, real time multiplexing 8=42221
  Doppler shift of spectral line, meas. with optical wedge 8=47471
  effective operators and spectrosc. props. 8=34115
  Elasser band model, Doppler analog 8=34198
  electronic band structure, solvent depend. 8=47583
  emission coeffs. internal calc. from externally meas. spectral intensity for asymmetrical plasma 8=43500
  ethers, vinyl, absorpt. band characteristics 8=30493
  exhaust of scale model rocket, radiative props. 8=38815
  fluid, opalescent, double scattering 8=39152
  forbidden transitions, variational principle for intensity 8=47443
  Franck-Condon factors, isotope effects 8=34271
  Franck-Condon principle, expt. test 8=29966
  gas analysis, selectivity of optical-acoustic method 8=49986
  gas discharge rel. to excitation freq., obs. 8=29880
  gas behind shock front, maximum of nonequilibrium emission 8=30299
  gases, elec. field induced 8=25582
  gases, radiant heat flux distrib. in cylinder with black interior 8=39197
  H-bonded systems, i.r., theory 8=38787
  imaginary-dielec.-index bands, Cauchy analysis 8=25408
  i.r. emission from molec. crysts. 8=41021
  i.r., H-bonds, strong 8=48301
  laser, single-pulse operation 8=24268
  line formation by noncoherent scatt. 8=37232
  line form. in homogeneous mag. field, theory 8=43250
  line intensities, effects of coherent multiple scatt. 8=25403
  Lorentz line, equivalent width, accuracy of simple approx. 8=34126
  luminescent solids, absorption and excitation 8=36449
  magnon-sidebands in antiferromagnetic insulators 8=36298
  matrix-isolated mols., rotation-translation coupling 8=27536
  meteors, ion 8=41571
  molecular crysts., moment theorems for vibronic exciton spectra 8=41023
  molecular ions, r.f. transitions between energy levels, bolometric technique 8=38659
  molecular, microwave review of developments at Duke 8=37534
  molecular optical anisotropy dispersion, by appl. of laser waves and certain harmonics 8=38774
  molecular, very high resolution study using Fabry-Perot spectrometer and hollow cathode lamps 8=29675
  molecules, charge-transfer absorpt. band shape and polarization in solns., calc. 8=34200
  molecules Einstein coeffs. rel. to condensed media optical props. 8=39367
  molecules, in absorbing medium, effects of conversion to non-wave zone heat 8=38629
  molecules, periodic, i.r. vibr. band intensities and terminal group effects, calc. 8=29857
  molecules, secondary emission of light 8=34195
  molecules, ternary symmetry, hyperfine structure of rotation levels, vibr. effects 8=29698
  optical and e.p.r., interpretation by vibronic mass effect 8=43252
  phosphorescent T-S band decay rate meas., effect of absorpt. T*←T bands 8=38777
  photon scattering, resonant, from perturbed two-level system, stochastic theory 8=41755
  plasma flame prod. when elect. field is applied to gas jet 8=38977
  plasma, non-equilib. finite layers, emission lines growth curves, calc. 8=43543
  polar liquid films, i.r. absorpt., rel. to orientation by cell surface elec. fields 8=39302
  polar mols. in inert solvents, far i.r. absorpt. 8=48157
  polishing compounds, i.r. spectra 8=31933
  polyatomic mols., anomalies in intensity distrib. of rot.-vibr. lines 8=43257
  polymers, i.r. vibr. band intensities and terminal group effects, calc. 8=29857
  reflection, polarization effects 8=37683
  ruby laser, time depend. 8=46610
  salicylanide, variation in absorpt. due to equilibrium between rot. isomers and ionization 8=38903
  from shock cap and wake of re-entry models, lab. simulated 8=41485
  solid solutions, Davydov's splitting of oscillation bands 8=35547
  solids, energy spectra computation methods 8=35762
  solvent Stark effects and spectral shifts 8=39375
  thermal radiation density, form 8=23989
  transitions between degenerate levels 8=49682
  two-phonon spectroscopy in solids, theory 8=41025
  Voigt profile, empirical approx. 8=43170
  BaF_2, reflectivity from (111)-cleavage plane, 78°K 8=45175
  C_3 cometary emission, synthetic profile computed, 4050Å 8=50424
  He-Ne gas, effect of one laser beam on the transmission of another 8=46576
  He-Ne laser 8=42081
  He-Xe laser 8=42081
  Ne laser 8=42081
  atoms
      See also Atoms/excitation; Atoms/structure.
    absorpt. band, estimation of position of intensity maximum 8=43150
    absorpt. spectroscopy, lamp 8=36638
    absorption, graphite cuvette meas., interferences calc. 8=25348
    absorption-line profiles, parametrization 8=38684
    absorption using laser discharge to produce vapour 8=34122
    adiabatic inversion with light pulses 8=47437
    alkali, in colls. with N_2, H_2, HD, D_2, sensitized fluorescence and quenching 8=29836
    alkali-like, oscillator strength calc. 8=34136
    alkali, meas. of elec. dipole moment 8=29614
    alkali metal oscillator strengths 8=47500
    alkali metals, absorpt. oscillator strengths and photoionization continua 8=29603
    alkali metals, theory of satellite bands prod. by foreign gases 8=47532
    arc and hollow cathode discharge tube, sensitivity analysis 8=29578
    atmospheric and inert gases, vac. u.v. region, abs. spectra 8=43196
    digital computer theoretical calc. 8=38631
    distribution of non-symm. line from Fabry-Perot ring meas., using Fourier transform. 8=25339
    electronic spectra, theory including electron correl. 8=25347
    Feynman diagrams of 1st and 2nd orders of some states 8=47472
    fine structure transitions of photons and collision cross-sections 8=47476
    fluorescence, sensitized, conservation of r.f. coherence 8=38733
    gas mixtures, excitation, analysis 8=34159
    graphite cuvette applic. 8=38619
    hydrogen-like, 2s state two-photon decay, analytic soln. 8=38647
    hyperfine-struct. matrices in at. config., checks 8=29581
    integrated absorptance for simple spectral lines and lines with hyperfine struct. and isotope shifts, asymptotic expansions 8=29590
    ionized, microwave absorpt. lines from dielectronic recombination 8=47479
    ions, electron-impact linewidths, formulae 8=38718
    ions, r.f. transitions between energy levels, bolometric technique 8=38659
    iron group elements, ionic states, theory 8=43202
    Lamb shift, source of polarized H^- 8=37435
    level-crossing spectroscopy, improved resolution using excited atoms which have survived longer than the average 8=43197
    level non-exponential decay 8=25370
    line broadening, combined Doppler and collision 8=43235
    line formation with scatt. by e, parametrized models 8=43168

Spectra—contd
- **atoms**—contd
  - line-narrowing effects, freq. spectrum, laser induced 8=29589
  - line radiation transfer in multilevel atoms, effect of various coupling mechanisms 8=38628

  - Co I, in excited configs., theory 8=43187
  - Cr II, gf for 2 lines, shock heated gas emission obs. 8=29611
  - Cs absorpt. line-width rel. to optical pumping and Ne buffer press., obs. 8=25374
  - Cs, atomic lifetimes, direct obs. 8=29612
  - Cs, emission on laser irradiation of vapour 8=29906
  - Cs, emission, satellite bands 8=25360
  - Cs, ground state, differential polarizability of Zeeman substates, atomic-beam resonance obs. 8=38667
  - Cs meas. of elec. dipole moment 8=29614
  - Cs, spectra profile of r.f. modulated light beam in optical pumping expt. 8=29613
  - Cs, standard line obs. 8=28210
  - Cu, in arc discharge, impurity Na effect on line breadth 8=34437
  - Cu III, in excited configs., theory 8=43187
  - CV triplet to singlet excitation, relative intensities 8=38662
  - D, 6 Balmer lines obs. and Rydberg constant calc. 8=47494
  - Dy, isotopic shift 8=47493
  - Dy, isotope shifts and nuclear deform. 8=43188
  - Er 1, Zeeman effect, 3000-5000Å in 26 kOe field, obs. 8=29637
  - Er, L-emission, dipole transitions 8=34141
  - Es^{253} emission, hyperfine structure 8=43189
  - F, KLL Auger in 3 fluoride salts 8=34166
  - FI, vac. u. v. 8=33264
  - Fe group, interactions between d electrons in 2nd spectra 8=43190
  - Fe-period elements, far vac. u. v., classification 8=38668
  - Fe IX to XIV, oscillator strengths 8=38668
  - Fe XV in solar corona, lines relative intensities 8=37082
  - FeI, neutral; radiative lifetimes of energy levels calc. 8=47496
  - Ga vapour, absorpt. 250-150 nm region S^2p-Sp^2 transition cross sections obs. 8=47486
  - H, correction of exptl. Lamb shift 8=25351
  - H, excited, in plasma, line broadening for $n \rightarrow n^1$ transition 8=34505
  - H, Faraday effect 8=29639
  - H, h.f.s. discrepancy, A meson contrib. to Feynmann diagram, quark model of proton 8=33743
  - H, plasma decay, T-tube obs. 8=30057
  - H_α profile, strong-collision effects 8=38645
  - H_β profile in spectrum, meas. absorpt. and emission lines in Zodiac light 8=41353
  - H_β radiation in night sky spectrum 8=41354
  - H, Sommerfeld fine-structure constant measurement 8=38648
  - H Stark effect intensity distrib. 8=47480
  - H(2S) in weak electric fields, Lyman-α radiation polarization 8=25349
  - H, 2s state two-photon decay, analytic soln. 8=38647
  - H, H_2, Lyman-α emission in collisions with He^+ 8=38755
  - He, e impact light, polarization obs. 8=29641
  - He, excited by e bombard. 8=29651
  - He, lifetime of 2^1P state obs., oscillator strength for 2^1P-2^1S transition 8=38654
  - HeI, combined Zeeman and Stark effects on hydrogenic lines 8=38653
  - He I λ 584 resonance line, oscillator strength 8=43173
  - He II, enhancement of λ4686 by mag. field 8=34132
  - He 2^1S, 3^1S states, Born cross sections for electron impact excitation 8=38695
  - He 3^3D fine structure 8=29598
  - He^- free-free absorpt. coefficient 8=47484
  - He^+, Lamb shift of $n = 4$ level, meas. by r.f. spectroscopy 8=43172
  - Hg, coeffs. for internal conversion for K, L and M shell e. m. transitions 8=38670
  - Hg $\lambda = 1850$ Å line, isotope shift and hyperfine structure 8=43192

Spectra—contd
atoms—contd
Hg, in preionized flow, intensity relax. of certain lines in flow dirn. 8=47753
Hg, r.f. discharge afterglow 8=29616
Hg, 15.295 Å line h.f.s., Fourier spectroscopy 8=28830
Hg, 2537 Å line broadening and shift by H_2 inpact 8=43194
Hg^{119}, hyperfine structure constants in 6 $^1P_1$ level, and hyperfine structure of line 6 ^1P,-8 $^1S_0$ 8=43195
Ho^{67}, s, t doublet in L-spectrum 8=47499
μ-Ho^{165}, x-ray, rel. to dynamic quadrupole interaction, obs. 8=34191
Ho, X-ray L emission spectrum 8=45193
I, absorpt. series 8=38663
In vapour, absorpt. 250-150 nm region S^{2}p-Sp^2 transition cross section obs. 8=47486
K^{40} resonance radiation, nuclear quadrupole calc. 8=38365
K vapour, 4000Å violet, laser pumping four wave parametric interaction 8=33177
Kr, visible afterglow emission 8=47754
Kr, 4p^5, 5s level excited in Ne-Kr mixtures 8=29882
Kr^{86} line profiles from complex visibility Fourier transform, obs. 8=29619
La III, principle series, transition probabilities in doublets 8=47506
Li, emission spectrum study of plasma in arc discharge 8=47778
Li, identification of unassigned lines 8=43243
Li in sunspot, abundance calc. 8=50452
Li^{7+} ion, ^{1}D, ^{3}D, ^{1}F and ^{3}F states, mag. h. f. s. calc. 8=38673
Mg, weak line transition probability calc. 8=29621
Mg1, f-values calc. 8=34135
N, ionization states of some unidentified lines 8=43223
N, metastable (^{2}D), e. s. r. 8=25386
N, multiply ionized, beam-foil excitation 8=29644
N, new emission lines in 10 000 to 11 000A region 8=34144
N plasma, non-equilib., emission lines from finite layers calc. 8=43543
NII, 2p^2-2p3s arrays, line strengths and transition probabilities 8=45915
Na^{23}, h. f. s. in $3^2P_{3/2}$ state, level crossing investigation 8=34145
Na^{23}, hyperfine coupling constant meas. 8=43197
Na, at. -abs. cross sections, 500-600 Å 8=29622
Na, atomic lifetimes, direct obs. 8=29612
Na, optically pumped, frequency measurements of 0-0 transition 8=47524
Na-D_1-line, profile and equivalent width as function of temp. and mag. induction 8=25361
NaI 5900-96Å nocturnal internsity vars. 8=32276
Nd in complexes, fund. level splitting 8=29623
Ne, Ar II transition probabilities and continuous spectra meas. 8=43179
Ne, double resonance in He-Ne laser operating at 6328Å π transitions 8=47502
Ne, radiative transition probabilities 8=34146
Ne, $^2P_4$ fluoresc. under laser reson. illum., 6328A 8=38675
Ne($2p_4 \rightarrow 1s_4$) spontaneous emission along axis of He-Ne laser 8=25363
Ne, 2p^6, 2p^{5}3s, 2p^{5}3p, 2p^{5}4s states, wave functions 8=29624
NeI, eigenvectors of configuration (2p)^5(3p) and rel. probabilities of 2s-2p transitions 8=25362
NeI, relative transition probabilities determ. by Faraday effect 8=38676
NeIX, 2-photon continuum emission 8=29599
Ni II, in excited configs., theory 8=43187
Ni XI to XIV, oscillator strengths 8=38668
Ni^{61} low levels, h. f. s. and nuclear quadrupole moment 8=38677
O I, establishment of terms and improved level values 8=47503
OI 5577 and 6300Å noctural intensity vars. 8=32276
O III, 2p^2-2p3s arrays, line strengths and transition probabilities 8=45915
O IV, V, VI emission spectra obs. 8=29605
O green line λ 5577 in glow discharge, new emission mechanism 8=29625
μ-O^{16,18}, 2p → 1s transitions and atomic radius, obs. 8=34190
O I' lines λλ 1302-06, 1152Å, experimental oscillator strengths 8=50319
PaII, magnetic-interaction integrals 8=34147
Pa^{231}, L subshell fluorescence obs. 8=43200
Pb$^{206-8}$, muonic, hyperfine interactions obs. 8=38772
Pb, arc spectrum 8=38678
PbI 7229 A line and solar abundance 8=45866
Pm I, fundamental energy levels calc. and Zeeman effect obs. 8=47505
Pr V, ionization energy calc. and 12 lines, 840-2250 Å obs. 8=47504
Rb, in flames, quenching of excited 5^{2}P atoms 8=34150
Rb^{85,87} $8^2P_{3/2}$ state hyperfine structure and life-time 8=34149
Rb^{87}, light shift following optical pumping 8=38708
Rb, resonance, quenching by gases 8=29626
Rb1 resonance lines, solar, rel. to abundance obs. 8=45894
S, forbidden lines, wavelengths and A-coeffs. 8=25365
S ions, oscillator strengths for resonance lines present in solar spectrum 8=29647

Spectra—contd
atoms—contd
S isoelectronic sequence, classification 8=38668
S, satellite X-ray lines due to transitions involving double ionization of inner shells 8=43228
Sc III, principle series, transition probabilities in doublets 8=47506
Sc XIII to Cu XXI fluorine isoelectronic sequence 8=29628
Si ions, oscillator strengths for resonance lines present in solar spectrum 8=29647
Si1 absolute oscillator strengths 8=34134
Si1 solar absorption lines, 2935-25578Å, equivalent width calc. 8=37048
SiII, IV, doublets oscillator strength ratios, Fermi calc. and obs. 8=34152
Sn^{117} and Sn^{119}, level crossing investigation of hyperfine struct. 8=29629
Sn, weak line transition probability calc. 8=29621
Tb^{65}, L-spectrum, new lines 8=47487
μ-Tb^{159}, x-ray, rel. to dynamic quadrupole interaction, obs. 8=34191
Tb 1, additional levels obs. 8=25366
Tb I, relative oscillator strengths 8=43201
Tc I, II, 2000-9000 Å arc and spark sources 8=47508
Te (I), g values of 5p^4 configuration 8=25380
Th I, Ritz standards from energy level obs. 8=47509
Ti lines press. broadening in Ar atm. 8=34153
Ti, press, broadening and shift of lines by Ar 8=43203
TiI, II absolute gf-value, shock tube obs. 8=43489
Ti II, in excited configurations, theory 8=43203
Ti V, 3p^6-3p^{5}4d transitions 8=43178
μ-Ti^{48}, X-ray Lyman and Balmer line energies, obs. 8=34189
Tl, coeffs. for internal conversion for K, L and M shell e. m. transitions 8=38670
Tl in TlI vapour, superradiance of green line 8=34154
Tl^{205} as frequency standard, superior to Cs 8=28211
Tm^{69}, new diagram lines in L emission spectrum, β-γ region 8=38681
Tm^{69}, new diagram lines in L emission spectrum, γ region 8=38680
V III, in excited configurations, theory 8=43203
X_2O_7-type ions, vibration and chemical structure 8=47475
Xe, arc, high press., in stationary and flashed modes, spectral emission and abs. obs. 8=29945
Xe, attenuation cross section near resonance line 1469.6Å 8=43205
Xe, cross-sections for line excitation by electron collisions 8=34165
Xe high pressure lamps, energy distrib. meas. 8=47510
Xe, isotopic shifts of 13 i. r. laser lines, meas. 8=25367
Xe, photo-attenuation cross section, 1050-1550Å 8=43206
in Xe pulsed arc, radial distrib. of radiance in u.v. rel. to temp. distrib. 8=39090
Y III, principle series, transition probabilities in doublets 8=47506
Yb II, energy levels calc., Zeeman effect obs. 8=47511
YbII, 4f^{13}5d^2 configuration 8=34155
Zn, in arc discharge, impurity Na effect on line breadth 8=34437
Zn in discharge tube with high voltage pulses 8=29630
Zn II, IV, spark spectrum extension 8=34156
Zn III spark spectra and energy levels 8=38682
Zn 3075.9 Å, resonance line perturbed by He, A, Ne, Kr and Xe 8=47512
inorganic molecules
See also Molecules.
absorpt. band, estimation of position of intensity maximum 8=43150
absorption, rel. to reactivity 8=34225
atmospheric gases, absorption in vac. u.v. region 8=43196
basalt vapour scintillation, time scanning 8=34231
composite, bonded, triplet enhancement with small singlet effect 8=38779
electron-impact spectra at 33-100 eV energies 8=47585
furan, i.r. absorpt. 8=43836
gases, highly reactive, high-temp. i.r. cell. 8=41302
inert gas mixture, collision-induced translational absorpt. theory 8=34384
line by line calc. rel. to statistical model 8=43327
maser application 8=38782
microwave, review of techniques 8=33140
oxygen, forbidden transitions rel. to O_4 dimer content pressure and temp. dependence 8=34273
pressure-induced, i. r., intercollisional interf. effects 8=34385
radiant thermal conduction, effect on 8=46242
radiative lifetimes of u. v. transitions 8=25442
ruby vapour scintillation, time scanning 8=34231
steel vapour scintillation, time scanning 8=34231
u. v., absolute transition probabilities 8=34230
vibration-rotation energy-level density calc. 8=29685
As_2, bands in D → X system, high-resoln. analysis 8=43284
BiF, rotational structure of 2650-2850 Å system 8=38813
CO pulse radiolysis products 8=45405
CO_2-N_2 mixture, meas. of molec, line and continuum rad. at 7,000-16000°K 8=43287
CS_2 alkali-metal vapours, u.v. cross-sections 3,000-1,100Å 8=43315

Spectra—contd
  inorganic molecules—contd
    H_2-He plasmas, isothermal, calc. 8=43544
    Hg_- band emission in r.f. discharge 8=29616
    K, alkali-metal vapours, u.v. cross-sections, 3,000-1,100 Å 8=43315
    Rb alkali-metal vapours, u.v. cross-sections 8=43315
    SiC vapour scintillation, time scanning 8=34231
    SrH Franck-Cordon factors and r-centroids for bands of $D^2\Sigma^+ \leftrightarrow X^2\Sigma^+$ 8=43337
    X_2O_7-type, vibration and chemical structure 8=47475
    Xe pulse discharge in presence of 2n, 240-300 nm 8=34292
  inorganic molecules, diatomic
    alkali halides, molec. beam elec. reson. 8=25670
    computer analysis, separation of branches 8=29681
    computer analysis, wavelength calc. 8=29680
    halogen acids, photoelectron spectra and ionized states 8=34229
    hydrides, first-row, rel. to electronic structure 8=34256
    hydrides, second-row, rel. to electronic structure 8=34257
    inert-gas couples, translation band, transition probability at l.f. 8=29711
    rotational and vibr. consts. calc. 8=38792
    rotational constants, computer calc. 8=38790
    $^1\Sigma$-state, expectation values as functions of internuclear separation 8=29689
    vibration-rotation, computer analysis, line rot. quantum numbers 8=29684
    vibrational transitions, most favourable orientation 8=43254
    AgIn, system B of u.v. absorpt. bands 8=25443
    AlH, absorpt. 8=25444
    BBr, radiative lifetimes 8=38807
    BS, blue-green systems 8=25448
    BeBr, emission obs. 8=25452
    Be Br excited in presence of argon, emission spectrum 8=38810
    Br_2 ads. on oxides, refl. spectra 8=48479
    BrCl, visible absorption 8=29718
    BrO, γ-absorpt. from oxybromine cpd. radiolysis 8=27768
    C_2, dissoc. through rot. 8=29826
    C_2, higher rot. levels 8=29724
    C_2 mol., new $c'\,^1\Pi_g$-$b^1\Pi_u$ band syst. 8=29725
    C_2, Swan band emission in flames 8=29727
    CN, $B^2\Sigma \rightarrow A^2\Pi i$ bands 8=29721
    CN, extension of red and violet bands 8=29726
    CN, stimulated emission, optical detection at 20 cm wavelength 8=38819
    CN violet emission, shock heated CO_2-N_2 mixture, chemical model 8=29722
    CO, absorpt. in extreme u.v. 8=25458
    CO, adsorbed on Pt, i.r. 8=48488/9
    CO, adsorbed on Si-supported Pt, i.r. absorpt. 8=30773
    CO, Asundi bands, in gas discharge 8=38994
    CO, high resolution by double-beam, two-beam interferometry far i.r. 8=28818
    CO, i.r., absorpt. coeffs. 8=34236
    CO, line absorpt. in late-type stellar atm. 8=45666
    CO, radiance from scale model rocket exhaust 8=38815
    CO trapped in rare gas matrix, e transitions perturbation 8=39523
    CO, 2-0 band line-strengths 8=42218
    CO_2, 4.3 μband, use to determ. temp. of wake behind hypersonic sphere 8=41484
    Ca_2, orange bands, $^1\Sigma$-$^1\Sigma$ system, rotary quantum analysis 8=43296
    CaBr, discharge-excited, u.v. emission bands 8=43295
    CaH and CaD, u.v. absorpt. 8=38820
    CaO, i.r. bands 8=34237
    CrH, CrD, $^6\Sigma^+$-$^6\Sigma^+$ infrared obs. 8=47595
    Cs_2, 6250Å band system 8=29733
    $Cs^{133}F^{19}$, hyperfine struct. of J=1 rot. state 8=43298
    D_2, chemisorbed on Rh, i.r. spectra 8=25470
    D_2, selective enhancement in Ar discharge 8=25471
    DCl, high resolution by double-beam, two-beam interferometry far i.r. 8=28818
    F_2, absorpt. band spectrum 8=34376
    F_2, emission spectrum 8=29735
    GeO, u.v. absorpt. bands 8=43301
    H_2, chemisorbed on Rh, i.r. spectra 8=25470
    H_2 dissolved in solid Ar, induced i.r. fund. band obs. 8=36326
    H_2, ground state rot. and vibr. consts. calc. 8=38792
    H_2 in cryst. Ar, i.r. absorpt. 8=27573
    H_2, in H_2-Kr mixture, pressure-induced, i.r. absorpt. 8=38833
    H_2, in H_2-Ne mixture, pressure-induced i.r. absorpt. 8=38833
    H_2, large vibr.-rot. interaction effects in Franck-Condon factors 8=43304
    H_2, Lyman bands, isotope effects on Franck-Condon factors 8=34271
    H_2, Lyman bands, oscillator strengths 8=43309
    H_2, spectroscopy 850 to 792 Å 8=43303
    H_2, vacuum u.v. emission from p and H-atom impact 8=38834
    H_2, HD, D_2 electronic isotope shifts in Lyman bands 8=34244

Spectra—contd
  inorganic molecules, diatomic—contd
    HBr, line broadening rel. to Debye forces of dispersion and induction 8=25407
    HCl, first rotational linewidths determ. 8=38825
    HCl, line broadening rel. to Debye forces of dispersion and induction 8=25407
    HD, rot. and elec. dipole moment obs. 8=34242
    HD, selective enhancement in Ar discharge 8=25471
    HF, line broadening rel. to Debye forces of dispersion and induction 8=25407
    HF, 1-0 and 2-0 bands 8=25476
    HF, pure rotation 8=29734
    HI, line broadening rel. to Debye forces of dispersion and induction 8=25407
    He_2 ($a^3\Sigma\,u$ (6 = O) at 77°K, metal stability 8=34227
    HgD, hyperfine struct. 8=43314
    HgT, hyperfine struct. 8=43314
    I_2 ads. on oxides, refl. spectra 8=48479
    I_2, time-resolved emission from $B^3\Pi_{o,u+}$ state 8=34251
    ICl, Stark effects in $A^3\Pi_1$-$X^1\Sigma^+$ transition 8=25488
    LaO, very high resolution study using hollow cathode lamp and Fabry-Perot spectrometer 8=29675
    LiCl-KCl eutectic at 550°C, i.r. emission 8=38842
    $N_2(A^2\Sigma_u{}^+)$ in active N 8=38840
    $N_2(A^3\Sigma_u{}^+)$, reaction with N atoms 8=25493
    N_2 afterglow, spectroscopic constraints 8=29897
    N_2, band systems, $b'\,^1\Sigma^+_u \rightarrow X^1\Sigma^+_g$ and $g^1\Sigma^+_u \rightarrow X^1\Sigma^+_g$, selective enhancement in vacuum u.v. 8=38841
    N_2, dipole-allowed absorpt., absolute f values 8=34264
    N_2 discharge, evidence for $^3\Delta_u \rightarrow B^3\Pi_g$ transition 8=47608
    N_2, first positive system, in gas discharge 8=38994
    N_2, ground state rot. and vibr. consts. calc. 8=38792
    N_2, $K(b^1\Pi_u) \leftarrow X$ transition, u.v. absorpt. 8=25491
    N_2 plasma jet, i.r. emission 8=30182
    N_2, p-bombard., Ep=0.56-1.7 keV, obs. 8=43322
    N_2, Stark broadening 8=34272
    N_2 trapped in rare gas matrix, e transitions perturbation 8=39523
    N_2, Vegard-Kaplan bands, intensity obs. 8=34265
    N_2^+, excited by vac. u.v. photon impact 8=47609
    N_2^+, excited states rot. and vibr. consts. calc. 8=38792
    $N_2{}^+(1-)$ ion, first negative bands, e transition, dipole moment, matrix element square determ. 8=29752
    $N_2{}^+$, rot. lines, Stark-broadened, shapes and
    NF, $b^1\Sigma^+$-$X^3\Sigma^-$ band system 8=25497
    N-I_2 flames, i.r. emission 8=49890
    NO afterglow 8=38993
    NO, heterogeneous ($^2\Sigma$-$^2\Pi$) interactions 8=34268
    NO, high resolution by double-beam, two-beam interferometry far i.r. 8=28818
    NO, i.r., adsorbed on zeolites 8=27553
    NO, i.r. bands used to follow rise in temp. behind shock waves 8=41484
    NO, intensity of fundamental band 8=25499
    NO, photoelectron spectrum 8=47606
    NO trapped in rare gas matrix, e transitions perturbation 8=39523
    NO, 2 isotopes, comparison of rotational and spin-orbit coupling consts. 8=43325
    $N^{14}O^{16}$, l.f. satellite band 8=25501
    $N^{15}O^{18}$, i.r. vibr. rot. bands 8=25502
    O_2, absorpt. in vacuum u.v., obs. 8=34274
    O_2, emission induced by 0.15-1.0 MeV protons 8=38847
    O_2, in u.v. afterglow, Herzberg II emission 8=34277
    O_2, radiative combination of O atoms 8=38932
    O_2, Rydberg absorpt. series 8=47615
    O_2, Schumann-Runge bands, isotope effects on Franck-Condon factors 8=34271
    O_2, spectral emissivity of Schumann-Runge bands 8=34275
    O_2, Stark broadening in Schumann-Runge system 8=34272
    O_2, Tanaka-Takamine Rydberg series 8=25512
    OD, Zeeman effect in (0,0) band 8=38848
    OH and OD, in solid Ne 8=32020
    OH, matrix-isolated, i.r. 8=34276
    OH^+, $^3\Pi_i$ excited state, fine structure 8=29830
    PbI, Zeeman effect and intensity anomalies 8=34148
    PtC 8=25513
    $Rb^{85}F^{19}$, h.f.s., Stark and Zeeman effects 8=25514
    RhC 8=25513
    S_2, $^1\Delta^u$-$^1\Delta_-$ transitions 8=38851
    S_2, rare gas matrix effect 8=47618
    SO $B^3\,\Sigma^-$-$X^3\,\Sigma^-$ system Morse Franck-Condon factors, r-centroids for 8=43336
    SO, b $^1\Sigma^+$—$X^3\Sigma^-$ band system obs. 8=38852
    ScO, red system, rot anal. 8=25518
    SiF, γ bands, rot. anal. 8=38855
    SiO ($A^1\Pi$ - $X^1\Sigma^+$) band system, oscillator strength meas. 8=43334
    SnBr, u.v. absorpt. after flash photolysis of $SnBr_4$, $B^2\Sigma$-$X^2\pi$ transition 8=34284
    SnI, u.v. absorpt. after flash photolysis of SnI_4, $B^2\Sigma$-$X^2\pi$ transition 8=34284
    SrD, new u.v. absorpt. bands 8=43338
    SrH, new u.v. absorpt. bands 8=43338
    SrO, i.r. bands 8=34237
    Xe_2, attenuation cross section near resonance line 1469.6Å 8=43205
    Xe_2, photo-attenuation cross section, 1050-1550Å 8=43206

Spectra—contd
inorganic molecules, diatomic, radiofrequency
See also Nuclear magnetic resonance and relaxation; Paramagnetic resonance and relaxation.
alkali halides, molec. beam elec. reson. 8=25670
H_2^+ radio-frequency spectrum, interstellar abundance 8=45722
KCl, by elec.-resonance method, rel. to molec. struct. 8=43316
LiF, by elec.-resonance method, rel. to molec. struct. 8=43316
NO, pure rotational 8=25500
NaF, by elec.-resonance method, rel. to molec. struct. 8=43316
O, at low pressure, anomalous line-broadening obs. 8=29759
OH, doubling transitions obs. and calc. suitable for radioastronomy 8=43328
SiO, rot. spectrum, 42 373-43 424 MHz 8=38856
inorganic molecules, polyatomic
alkali-AlH_4, i.r., obs. 8=31959
alkaline bromides, stability constants of Pb complexes 8=48148
amide ion and ion aggregates, in solns. of KNH_2 in liq. NH_3, absorption 8=39380
bismuthyl halides, i.r. absorpt., rel. to vibr. modes 8=38812
metallochlorins, anistropy of optical transitions 8=34258
oxalyl halides, u.v. absorpt. 8=29795
phosphorus oxyhalide radicals, electronic emission 8=43414
phosphoryl cpds., i.r. intensity of PO bands 8=29760
symmetric tops, computer anal. 8=25412
uranyl cpds., fluorescence and oscillator model 8=34286
uranyl cpds., i.r., U-O bond distance calc. 8=34287
zeolites, synthetic, containing transition metal ions, rel. to coordination states 8=41143
AsD_2, flash photolysis, $^2A_1$-$^2B_1$ band system 8=29713
AsH_2, flash photolysis, $^2A_1$-$^2B_1$ band system 8=29713
AsH_3, K-type doubling in ν_3 band 8=25445
BBr_3, electron-beam excited, u.v. emission 8=38807
BF_3-dimethyl selenide and sulphide complexes, i.r. 8=38806
BF_3, ν_2 band 8=29715
BF_3, $2\nu_3$ bands, ζ_{33} determ. 8=34233
BO_4 group complexes, i.r. spectra rel. to asymmetric stretching vibrations 8=29714
B_2O_3, X-ray emission band of B, valency electron structure 8=29716
BeI_2, i.r. 8=25449
$BeBr_2$, i.r. 8=25449
$BeCl_2$, i.r. 8=25449
BrO_2, γ-absorpt. from oxybromine cpd. radiolysis 8=27768
CF_2, absorpt. 8=25453
CF_2, matrix-isolated, i.r. 8=29723
CF_3, matrix-isolated, i.r. 8=29723
C_2N_2 (cyanogen) condensed in solid N_2 and Ar, luminescence 8=25455
CO_2, absorpt. band Q-branch transmission calc. 8=43294
CO_2, absorpt. in artificial atmos. 8=27907
CO_2, bands at 4.3μ 8=29730
CO_2, band and total emissivities at press. where rot. hyperfine struct. removed 8=43280
CO_2, 4.3μ transient laser oscill. 8=28680
CO_2, i.r. abs., 1-1.25μ 8=29728
CO_2, integrated intensity meas., 2.0-, 1.6- and 1.43-μ regions 8=34235
CO_2, intensities of 12-18 μ bands 8=25462
CO_2, intensity of 1.6μ bands 8=34234
CO_2 line parameters using CO_2-N_2-He laser 8=29720
CO_2, new i.r. bands in Venus spectra 8=28153
CO_2, 9.4 and 10.4μ bands, strengths and widths 8=43289
CO_2, radiance, from scale model rocket exhaust 8=38815
CO_2, 667 cm^{-1} band strength determ. 8=25461
CO_2, 10 μ band, temp. depend. of total intensity 8=25463
CO_2, transmittance, 4590-5346 cm^{-1}, eqns. 8=43293
CO_3, i.r. 8=25464
CO_4 group complexes, i.r. spectra rel. to asymmetric stretching vibrations 8=29714
C_3O_2, vac. u.v. absorpt. 8=25467
$(ClO)_2$, i.r. 8=29731
$ClSi(NCO)_3$, i.r. 8=29732
Cl_3SiNCO, i.r. 8=29732
Cl_3SiNCS, i.r. 8=29732
D_2, sensitized fluorescence in alkali atom collisions 8=29836
D_2S_2, i.r., mol. force field evaluation 8=43331
D_2S, ν_2 fundamental vibr. 8=25484
F_2CN, matrix-isolated, i.r. 8=38946
FNCN, i.r., matrix-isolated 8=47712
GeH_4, deuterosubstituted, i.r. band intensities calc. 8=29737
H_2, sensitized fluorescence in alkali atom collisions 8=29836
H_2Ar, i.r. absorpt. 8=25472
HBr dimer bands in solid matrices 8=27575
HCl dimer bands in solid matrices 8=27575

Spectra—contd
inorganic molecules, polyatomic—contd
HCN dimer, matrix-isolated 8=29740
HCN lines from CH_4-NH_3 laser discharge 8=33190
HD, sensitized fluorescence in alkali atom collisions 8=29836
HF, trimer and dimer, i.r. 8=29747
H_2Kr, i.r. absorpt. 8=25472
$HNCLO_3^-$ ion, i.r. absorpt. obs. and structure 8=34247
HOF, i.r. 8=43299
H_2O, band and total emissivities at press. where rot. hyperfine struct. removed 8=43280
H_2O far i.r. calc. for vapour laser 8=42089
H_2O, high resolution by double-beam, two-beam interferometry far i.r. 8=28818
H_2O, radiance exhaust of scale model rocket 8=38815
H_2O vapour, abs. lines in ν_2 band, product of strength and self-broadened half-widths 8=34239
H_2O vapour, absorpt. coeff. 600-1000 cm^{-1} obs. 8=43312
H_2O vapour, band absorpt. meas. 8=27908
H_2O vapour laser line identification 8=29748
H_2O vapour laser line identification 8=29745
H_2O vapour laser, transitions in $2\nu_2$, ν_3 and ν_1 states 8=29741
H_2O vapour, line strengths in $\nu_{1,3}$ bands 8=25480
H_2O vapour, radiation at nonequilibrium temps. 8=47597
H_2O vapour, spectral emissivity, theory allowing for line struct. 8=25481
H_2O vapour, 2.7μ band, statistical model rel. to line by line calc. 8=43327
H_2O, CO_2, CO and C mixtures in rocket exhausts, i.r. radiant transfer 8=41482
H_2O-CO_2 mixture, band and total emissivities at press. where rot. hyperfine struct. removed 8=43280
H_2O^{16} and H_2O^{18}, high-resolution i.r. 8=25478
HOCl, i.r. 8=25475
H_2S_2, i.r., mol. force field evaluation 8=43331
H_2Xe, i.r. absorpt. 8=25472
$K_2Cr_2O_7$, line structure at 2°K 8=34253
Mo complex halides, electron spectra 8=38857
Mo_6Cl_{12}-2,5-dithiahexane complex, i.r. 8=43318
N_2, sensitized fluorescence in alkali atom collisions 8=29836
NCN, in flash photolysis of NCN_3 8=25495
$N^{14,15}ClO_3^{2-}$ anion, i.r. absorpt. 8=29754
N_2D_2, vacuum u.v. absorpt. obs. 8=34267
NF_3, rot. absorpt. in range 10 to 50 cm^{-1} 8=34260
NF_2CN, i.r., matrix-isolated 8=47712
NH_3 adsorbed on Si, vibrational, rel. to bonding strength 8=25508
NH_4 quaternary halides, i.r. 8=38844
N_2H_2, i.r. absorpt. 3.1μ obs. 8=34267
N_2H_2, vacuum u.v. absorpt. obs. 8=34267
NO_2, i.r., adsorbed on zeolites 8=27553
NO_2, molecular consts. from near i.r. spectrum 8=43326
NO_2, 2491 Å electronic transition 8=25503
NO_3^- in $NaNO_3$, KNO_3, and $CsNO_3$ near 600°C, i.r. obs. 8=38842
N_2O absorpt. rel. to SISAM resolution, 4.5μ 8=28823
N_2O bond in ammonia, cross-correlation obs. 8=42230
N_2O, i.r., adsorbed on zeolites 8=27553
N_2O, strength of bands near 4.5μ 8=34263
N_2O, transmission in near i.r. bands, calc. 8=25506
$(Ni(CO)_4)$, i.r. spectra of isotopic species 8=34270
O_3, i.r. bands 8=34278
O_3, 9.6μ band, statistical model rel. to line by line calc. 8=43327
PF_5, far-i.r. 8=47617
Pt-ammine complexes, far i.r. 8=43330
Pt(II) complex of ethylenediaminedithio-cyanate C- and N- substituted, i.r. 8=43329
SF_5Cl, i.r. 8=25516
SF_5Cl rotation spectrum at 8mm. 8=25515
$SOCl_2$, rotation, 8000-18000 MHz 8=43335
$SPCl_3$, far i.r. 8=25517
$SPClF_2$, i.r. 8=25517
$SPCl_2F$, i.r. 8=25517
SeF_6 8=25519
SiF_2, u.v. absorpt. 8=25520
$ThCl_6^{2-}$ complexes, i.r. 8=47619
UCl_6^{2-} complexes, i.r. 8=47619
W complex halides, electron spectra 8=38857
WF_6 8=25519
inorganic molecules, polyatomic, radiofrequency
apatite structure, e.p.r. 8=31848
CsOH, unstable mol. 8=25468
$Fe(CN)_5NO^{3-}$, e.p.r., hyperfine anal. 8=47683
HPF_4 8=34279
H_2S, elec. reson. 8=25483
H_2S, mm.h.f.s., elec. resonance spectroscopy 8=38826
H_2S_2, mm-wave rotational 8=25485
Li^6F^{19}, elec. reson. 8=25483
NH_3, collision-induced transitions between rot. levels 8=47612
NH_2CN, N^{14}-quadrupole coupling 8=43297
NO, linewidth of $J = \frac{1}{2} \rightarrow \frac{3}{2}$ rot. absorpt. 8=47605
N_2O, high resolution, N^{14} quadrupole coupling 8=25505
$N^{14}O^{16}O^{17}$ 8=25504
NCN_3 8=25496

Spectra—contd

  - metals, rough surface, i.r. reflection 8=31932
  - mineral apatites, i.v. spectra 8=41047
  - minerals, i.r. as basis for crystal-chemical classifi cation 8=39637
  - molecular crysts. of tetrahedral or pyramidal mols., far i.r. 8=45223
  - molecular sieve, type A linde, containing Ni^{2+} ions, rel. to coordination states 8=41143
  - noble, metals, rel. to band structure 8=32036
  - parahydrogen, i.r., freq. analysis 8=43967
  - perovskite fluorides, i. r. transmission 8=27600
  - photoluminophors, conversion efficiency investigation 8=36466
  - α-quartz, optical phonons, extraordinary, directional dispersion 8=45221
  - quartz: Co-doped, absorpt., and changes on X-ray exposure 8=48556
  - rare earth cpds, low-lying crystal-field 8=36296
  - rare earth phosphates rel. to phosphor basis 8=49747
  - rare-earth sulphates, hydrates and anhydrous, i.r. 8=41130
  - ruby, emission rel. to laser axial mode separation 8=24334
  - ruby, exchange-coupled Cr^{3+} ion pairs, piezo spectroscopic studies 8=27646
  - ruby laser, single pulse spectrum 8=42104
  - silicate glasses, containing As, Sb oxides, vibr. and struct. 8=31964
  - thaumasite, $Ca_3H_2(CO_3/SO_4)SiO_4.13H_2O$, thermal decomposition, i. r. study 8=26065
  - torsional ocsillations and n.m.r. linewidth transition 8=31940
  - transition metals, rel. to band structure 8=32036
  - uranyl cpds., electron vibration, analysis and interpretation 8=49758
  - vibronic, of e transitions at probe ion, for lattice mechanics obs. 8=39859
  - X-ray spectroscopy, conference USSR, July 1966 8=45163
  - zeolites, i. r., rel. to chem. struct. 8=27552
  - zeolites, synthetic, containing transition metal ions, $d^9(d^1)$ and $d^8(d^2)$ configs in D_{3h} symmetry 8=41142
  - zeolite, synthetic, surface state evolution from r. f. spectrometry during dehydration 8=39581
  - AgBr, absorpt., pressure dependence up to 50kbar 8=41053
  - AgBr, AgCl and AgI, reflection in far i. r. 8=45167
  - AgCl, absorpt. pressure dependence up to 50kbar 8=41053
  - AgCNO, i.r., bond nature determ. 8=26006
  - AgN_3, i.r., rel. to crystal growth method 8=48535
  - Ag_2SO_4, i. r. 8=31955
  - α-Al_2O_3:V^{2+}(Cr^{3+}), (Mn^{4+}), trigonal splitting, stress dependence 8=43929
  - Al-Si catalysate, water-induced p centres obs. 8=36318
  - Ar, induced i. r. fundamental band of dissolved H_2 8=36326
  - AsI_3, far i. r. 8=45223
  - BH_4^- in alkali halides, i. r. 8=36327
  - Ba tetraoxometalates, i. r. 8=31965
  - BaF_2: Co^{2+}, temp. dependences 8=41076
  - $BaTiO_3$, absorpt. edge, rel. to props. of TiO_6^{-n} unit 8=45225
  - Be, i. r. absorpt. obs. 8=36330
  - BeO, exciton line splitting, phonon induction, obs. 8=36331
  - $BeSO_4$, $4H_2O$ and $BeSO_4.4D_2O$, i.r. refl. spectra 8=35381
  - Bi, hyperfine structure 8=27562
  - $BiCl_3$, far i. r. 8=45223
  - C_3N_{12}, i.r. 8=25456
  - C_3N_{12}, i. r. 8=31976
  - CaF_2 crystal, emissivity, infrared 8=32006
  - CaF_2:Ce^{3+} line splitting in electric field 8=36308
  - CaF_2:Ce^{3+}, rel. to 4f ↔ 5d transitions 8=45263
  - CaF_2: Co^{2+}(Ni^{2+}), temp. dependences 8=41076
  - CaF_2:Eu^{2+}, rel. to Zeeman effect 8=45177
  - CaF_2: H interstitial atoms, i.r. absorpt. rel. to localized vibrations of H 8=41072
  - CaF_2:Ni^{2+}, vis. and near i. r. absorpt., at room temp. and 4.2°K 8=31967
  - CaF_2:$Pu^{3+,4+}$ 8=31968
  - CaF_2: Sm^{2+} crystal generation, spectrum-time studies for ruby laser excitation 8=41071
  - $CaMoO_4$ 8=45179
  - CaO, i.r. dielectric response rel. to lattice vibrations 8=41075
  - $Ca(OH)_2$ and $Ca(OD)_2$, i. r. vibr. 8=31970
  - $Ca(OH)_2$, i. r. 8=27563
  - $CaSO_4.2H_2O$, i.r. combination vibr. spectrum, 10,000-1,200 cm^{-1} 8=41074
  - $CaWO_4$ 8=45179
  - $CaWO_4$:Gd^{3+}, ^6P Stark levels and line polarization 8=31993
  - $CaWO_4$: Yb^{3+}, microwave-optical double reson. using circularly polarized light 8=41070
  - $CdCr_2Se_4$, ferromagnetic, i. r. absorption 8=41078
  - CdF_2: Co^{2+}, (Ni^{2+}), temp. dependences 8=41076
  - CdF_2:Ni^{2+}, vis. and near i. r. absorpt., at toom temp. and 4.2°K 8=31967
  - CdS, absorpt., two-photon, anisotropy 8=45181
  - CdS, anticrossing of dispersive curves 8=36346
  - CdS, exciton lines split by stress, e-hole spin interaction 8=26920
  - CdS, phonon-assisted free exciton recombination 8=44760

Spectra—contd
  inorganic solids—contd
    CdS, photoreflectance at fundamental absorption edge 8=45183
    CdS:Co^{2+}, Co^{2+} absorpt. and emission rel. to ion centre levels, 3500 cm^{-1} 8=27613
    CdSe, anticrossing of dispersive curves 8=36346
    CdSe, coherent radiation of free excitons 8=36343
    CdSe, exciton lines split by stress, e–hole spin interaction 8=26920
    CdSe$_x$(CdTe)$_{1-x}$ alloys, forbidden band width comp. dependence 8=36344
    CdSe:Cu, fundamental absorpt. edge impurity conc. dependence 8=36349
    CdSe:Cu, i. r. absorpt. rel. to Cu impurity conc. 8=36345
    CdTe, pure and In doped, reflection 20 to 200μ, and Reststrahlen band 8=31974
    Cr glasses, high-press. effect 8=39632
    Cr surface species from chemisorpt. of molec. subs., i.r. study 8=45363
    CsNO$_3$, far i.r. absorpt. 8=49742
    Cu, in plasma jet, pulsation of intensity 8=36353
    Cu–Au alloys, absorption, electron transition mechanisms 8=41082
    CuCl, Zeeman effect, 4. 2°K 8=36351
    Cu–Zn, X-ray absorption, K edges 8=41080
    CoCl$_4^{2-}$-ZnCl$_4^{2-}$ mixed crysts. at 4°K 8=27590
    Cs$_2$SO$_4$, i.r. refl. spectra 8=35382
    Cu$_2$O, absorpt., rel. to annealing prod. stoichiometric defects, obs. 8=41083
    Cu$_2$O crystal defects, energy spectra 8=31055
    Cu$_2$O, electroreflectance spectrum 8=49159
    Cu$_2$O, stressed, exciton lines, polarization effect 8=45185
    D, para-, obs. 8=45192
    DyAlO$_3$, absorpt. rel. to mag. props. 8=36356
    DyFeO$_3$, absorpt. rel. to mag. props. 8=36356
    Eu^{2+} in alkaline-earth fluorides, absorpt., multiplet structure 8=31986
    Fe metal, X-ray K-absorpt. spectrum 8=45186
    FeF$_2$, i.r., rel. to mag. susceptibility 8=36210
    FeNi$_3$ alloy, X-ray K-absorpt. spectrum 8=45186
    FeS$_2$, pyrites, X-ray K-absorpt. spectrum 8=45186
    GdVO$_4$:Eu^{3+}, crystal field Hamiltonian, determ. of phenomenological parameters of 8=31992
    Ge, i. r. absorption of Co^{60} γ rel. to annealing 8=36365
    Ge periodate, i.r. absorpt. spectrum 8=43300
    Ge, photoconductivity 8=44925
    Ge surface exam. by total internal reflection spectroscopy 8=35895-6
    H, ortho-, obs. 8=45192
    H$_2$ in cryst. Ar, i. r. absorpt. 8=27573
    HBr, trapped in matrices, far i. r. dimer bands 8=27575
    HCN, adsorbed on porous glass 8=48491
    HCN, matrix-isolated dimer 8=29740
    HCl, cubic and orthorhombic phases, second harmonic vibration-rotation band 8=25929
    HCl, trapped in matrices, far i. r. dimer bands 8=27575
    H$_2$O in matrices, i. r., nuclear-spin-species conversion 8=38830
    H$_2$O, D$_2$O, and HDO, i.r. intensities of stretching and vibrational bands 8=36369
    Hg(CNO)$_2$, i.r., bond nature determ. 8=26006
    Ho, X-ray L emission spectrum 8=45193
    HoFeO$_3$, absorpt. rel. to mag. props. 8=36356
    n-InAs, reflection, rel. to conduction band structure determ. 8=35771
    InAs solid solns. with $A^{II}B^{VI}$ type cpds., reflection 8=41099
    InSb, magneto-optical interband transition linear-$\vec{k}$ valence-band splitting, obs 8=36373
    InSb, microwave emission from nonequilib. plasmas in mag. fields 8=40476
    n-InSe, absorpt. and reflection, optical transitions 8=45196
    n-InSe, fundamental absorpt. and optical transitions 8=41100
    KBr:Li$^+$, far i. r., of lattice resonant modes rel. to isotope shifts 8=36393
    KCl, absorpt. cross-section for transition from F-center ground state to L bands 8=48877
    KCl complexes, i. r., temp. dependence 8=36381
    KCl film, reflection and absorpt., in u.v. 8=32025
    KCl, X-irradiated, i.r. absorpt. 8=41104
    KCl: HF$_2^-$, broadening of i.r. peak 8=49733
    KCl–KBr with Pb admixture, absorption spectra and fluorescence 8=49735
    KCl–KI solid solns, decomposition effects 8=36395
    KCNO, i.r., bond nature determ. 8=26006
    K$_3$CO(CN)$_6$:Cr^{3+}, $^2E \leftrightarrow {}^4A_2$ transition 8=31979
    KCOF$_3$, i. r. transmission 8=27600
    K$_2$CoF$_4$, absorpt., compared to KCoF$_3$ 8=45197
    K$_3$[Cu(NO$_2$)$_5$], vis. and i. r. absorpt. rel. to crystal structure 8=30901
    KH$_2$AsO$_4$, i. r. absorpt. by H-bonds 8=27598
    KH$_2$PO$_4$, i. r. absorpt. by H-bonds 8=27598
    KI film, reflection and absorpt., in u.v. 8=32025
    KI:Ag$^+$, far i. r., of lattice resonant modes rel. to isotope shifts 8=36393
    KI-Tl crystals, absorpt., excitation and emission, 10° to 300°K, rel. to thallous ion centres 8=41108
    KMgF$_3$, i. r. transmission 8=27600
    KMnF$_3$, absorpt., of Mn^{2+} 8=41109

Spectra—contd
  inorganic solids—contd
    KMnF$_3$, i. r. transmission 8=27600
    KNO$_3$, I-II phases, i. r. absorpt. rel. to internal interaction 8=27597
    K$_2$[Ni(C$_2$O$_4$)$_2$]. 6H$_2$O, i. r. 8=36380
    KNiF$_3$, i. r. transmission 8=27600
    KTaO$_3$, i. r. reflection 8=27599
    KZnF$_3$, i. r. transmission 8=27600
    La tetrahydrate perrhenate, i. r. absorpt. obs. 8=36384
    LaF$_3$:Dy^{3+} 8=31985
    Li^{6,7}F, far i. r., isotope-induced acoustic band absorpt., 7°K 8=36396
    LiF colour centres absorpt., linear Stark effect on zero-phonon lines, obs. 8=27581
    LiF crystal, emissivity, infrared 8=32006
    LiNbO$_3$, spontaneous parametric emission power and bandwidth 8=27586
    LiNbO$_3$:Cr^{3+}, polydomain crystal, elec. paramag. resonance of Cr^{3+} 8=27277
    MgAl$_2$O$_4$:Cr, emission and absorpt., visible and u.v. 8=45210
    MgAl$_2$O$_4$:Cr^{3+}, optical absorpt. and fluorescence 8=49715
    MgO, exciton line splitting, phonon induction, obs. 8=36331
    MgO:Fe^{2+}, far i. r. absorpt. at low temps. 8=27589
    MgSO$_4$. 7H$_2$O and MgSO$_4$. 7D$_2$O, i.r. refl. spectra 8=35382
    Mn, Kβ_5-emission and K-absorpt. edge, rel. to band structure 8=41115
    Mn surface species from chemisorpt. of molec. subs. i.r. study 8=45363
    MnCO$_3$, absorpt., at 4. 2°K rel. to magnon side-bands 8=32010
    MnCO$_3$, vis. and u.v. absorpt. 8=32008
    MnCl$_2$, new absorpt. band 8=32012
    Mn$_3$Cl$_2$(NO$_3$)$_{12}$. 24H$_2$O, Zeeman splitting of blue lines, theory and obs. 8=41117
    MnCl$_4^{2-}$-ZnCl$_4^{2-}$ mixed crysts. at 4°K 8=27590
    MnF$_2$, octahedral field, i.r. absorpt. of Co^{2+} ions 8=32011
    MnF$_2$, spin-wave sidebands 8=36388
    Mo bronzes 8=40245
    Mo, 8 kV isochromat obs. 8=45227
    Mo, i. r. meas. rel. to Fermi surface and correlation effects 8=36392
    Mo(CN)$_8^{4-}$, i. r. 8=41118
    MoO$_3$, film and cryst., temp. depend. of absorpt. edge 8=32013
    NH$_3$ in matrices, i. r., nuclear-spin-species conversion 8=38830
    NH$_4$Br, i. r., above and below transition 8=27596
    NH$_4$Cl, i. r., above and below transition 8=27596
    (NH$_4$)$_2$Cr$_2$O$_7$, absorpt., at 2°K 8=45212
    NH$_4$I and NH$_4$I(Tl), absorpt., luminesc. and excitation spectra 8=32014
    (NH$_4$)$_2$Ir; PtCl$_6$, i.r., exchange coupling between Ir^{4+} ions 8=32002
    Na aluminosilicate glass, i. r., rel. to ion-exchange hardening 8=30864
    NaBeF$_3$-NaPO$_3$ system, i. r. spectroscopy for Be phosphate glass struct. 8=30791
    NaCl, conductivity, dielectric constant and refractive index 8=45205
    NaCl, ultraviolet and band structure 8=41121
    NaCl^{35,37}, far i. r., isotope-induced acoustic band absorpt., 7°K 8=36396
    NaCl:AgCl single crystal, far i. r. absorpt. obs. 8=36391
    NaCl:Cu$^+$, far i. r., of lattice resonant modes rel. to isotope shifts 8=36393
    NaCl:CuCl single crystal, far i. r. absorpt. obs. 8=36391
    NaCl-KCl solid solns, decomposition effects 8=36395
    NaClO$_3$, i. r. reflectance bands, dispersion anal. 8=27593
    NaCNO, i.r. bond nature determ. 8=26006
    Na$_2$Cr$_2$O$_7$, absorpt., at 2°K 8=45212
    NaF : Co^{2+}, absorpt. 8=49743
    NaNO$_3$, far i.r. absorpt. 8=49742
    Na$_2$O. 2MnO. 2SiO$_2$, absorpt. rel. to Mn^{2+} bands changes on temp. decrease 8=41119
    Na$_2$SiO$_3$, i.r., surface structure after etching 8=39578
    Nb complex, tetrabromobis (acetonitrile) Nb(IV), i. r. 8=44241
    (Nb$_6$Cl$_{12}$)$^{n+}$ (n=2, 3, 4) 8=27595
    Ni, low-energy transitions rel. to band structure 8=35774
    NiCl$_4^{2-}$-ZnCl$_4^{2-}$ mixed crysts. at 4°K 8=27590
    Ni–Zn, X-ray absorption, K edges 8=41080
    O, at 4°K, simultaneous transition rel. to absorpt. in range (15-33) × 10^3cm^{-1} 8=32019
    OH, matrix-isolated, i.r. 8=34276
    OH and OD in solid Ne, evidence of rotation 8=32020
    POCl$_3$, i.r., at 77°K 8=49746
    PSCl$_3$, i.r., at 77°K 8=49746
    PbF$_2$: Gd^{3+}, rel. to excited levels of Gd^{3+} at 77°K 8=36250
    PbMoO$_4$ 8=45179
    PbO, yellow, forbidden band width, determ. 8=32022
    PbO–SiO$_2$ silicates, crystalline and vitreous, obs. 8=32021
    PbWO$_4$ 8=45179
    Pd, Lβ_2-emission band rel. to electronic structure 8=41129
    RbI film, reflection and absorpt., in u.v. 8=32025
    RbMnF$_3$, absorpt. of Mn^{2+} 8=41109

Spectra—contd
inorganic solids—contd
$RbMnF_3$, fine structure in $^6A_1 \rightarrow {}^4T_1(^4G)$ obs. transition 8=32024
$RbMnF_3$, i. r. transmission 8=27600
Pr^{3+} in rare-earth chloride hydrated crysts. 8=45215
Ru(II) complexes in rigid glasses 8=32027
S_2^- centre in alkali halides, absorpt. bands rel. to para-elastic behaviour 8=45173
SO_4^{2-} in $M_2^IM^{II}(SO_4)_2 . 6H_2O$, i. r. 8=27601
$SPClF_2$, i.r. 8=25517
$SPCl_2F$, i.r. 8=25517
Sb_2S_3 reflection in photon energy range 1. 5-3. 0eV 8=49749
SbSi, ferroelectric, far i.r. spectra 8=41134
Sc_2O_3:Nd^{3+} absorpt. rel. to Stark splitting scheme and $^4F_{3/2}$ lifetime, 4. 2-293°K 8=32017
Se, trigonal, electronic spectrum 8=32030
Si, absorpt., one-electron, high-resolution exam. 8=45218
Si, Si_2O 9μ vibr. states rel. to isotope effects and c-o stretching vibr., 1104 cm^{-1} 8=27607
α-SiC, absorption of exciton-impurity complexes 8=36406
SiO_2, oxide layer thickness and nature from i. r. props. 8=26125
Sn salts with mixed anions, i. r. absorpt. 8=36413
SnI_4, far i. r. 8=45223
SnO_2 crystal, i. r. absorpt. rel. to optical lattice-vibration modes 8=45222
SnO_2, restrahl reflection, in static dielec. constant determ., 8=49353
$Sr_2(Cu_xZn_{1-x}Me)O_6$, ($Me = W^{6+}, Te^{6+}$) Jahn-Teller effect of Cu^{2+} 8=41081
SrF_2 : Co^{2+}, temp. dependences 8=41076
SrO, i.r. dielectric response rel. to lattice vibrations 8=41075
Ta, 8 kV isochromat obs. 8=45227
TaF_8^{3-}, i. r. 8=41118
Tb, quadrupole transition $LMv(\beta_9)$obs. 8=41146
$TbAlO_3$, absorpt. rel. to mag. interactions 8=45066
$TeBr_4$, far i. r. 8=45223
$TeCl_4$, far i. r. 8=45223
Ti cpds., i. r. absorpt. 8=36421
TiO_2, absorpt. edge, rel. to props. of TiO_6^{-n} unit 8=45225
TlCNO, i.r., bond nature determ. 8=26006
TlI-42% TlBr single crystals, i.r. transmission, impurity effects 8=36422
Tl_2SO_4, i. r. 8=31955
TlSe, reflection spectrum beyond fundamental absorpt. edge 8=36423
$TmFeO_3$, coalescing of resonant peaks by rot. of applied field 8=45226
V surface species from chemisorpt of molec. subs., i.r. study 8=45363
VMn_2 alloy, $K\beta_5$-emission and K-absorpt. edge, rel. to band structure 8=41115
VO_2 crystal, reflection, in 1. 4-6. 0eV at 25, 59 and 62°C rel. to semiconductor-metal transition 8=41150
$VOSO_4 . 5H_2O$, cryst. polymorphs, polarized absorpt. 8=49759
W, 8 kV isochromat obs. 8=45227
WCl_3 8=38357
$W(CN)_8^{4-}$, i. r. 8=41118
W-Mo alloys, normal emissivity 8=45228
Y tetrahydrate perrhenate, i. r. absorpt. obs. 8=36384
Y_2O_3:Nd^{3+} absorpt., rel. to Stark splitting scheme and $^4F_{3/2}$ lifetime, 4. 2-293°K 8=32017
YFe garnet rods, axially magnetized, abs. 8=36426
YVO_4: Eu^{3+}, absorpt. and fluoresc., $(4f)^6$ level splittings rel. to internal field, obs. 8=41152
YVO_4, i.r., rel. to lattice vibrations 8=36424
YVO_4, i.r. spectral emittance and opt. props. 8=32038
$ZnAl_2O_4$:Cr^{3+}, optical absorpt. and fluorescence 8=49715
ZnO, exciton lines split by stress, e-hole spin interaction 8=26920
ZnO, phonon-assisted free exciton recombination 8=44760
ZnS and similar lattices, absorpt. rel. to luminescence props. 8=36522
Zns, exciton complexes, absorption and emission 8=36430
ZnS, exciton, rel. to stacking fault probability 8=49766
ZnS: Ag, Ga, absorpt., photoconductivity and photoexcited e. s. r., rel. to donor-acceptor pairs 8=40677
(ZnS-CdS):Co^{2+}, Co^{2+} absorpt. and emission rel. to ion centre levels, 3500 cm^{-1} 8=27613
ZnS:Co^{2+}, Co^{2+} absorpt. and emission rel. to ion centre levels, 3500 cm^{-1} 8=27613
ZnS: Cu, Al(Ag, Al), i.r. absorpt. due to donor states 8=41156
ZnS: La, (La = lanthanides), rel. to crystal field effects 8=26646
Zn(S:Se):Mn phosphors, emission and excitation 8=45235
ZnSe, i.r. lattice vibrations 8=49764
ZnSe:Co^{2+}, Co^{2+} absorpt. and emission rel. to ion centre levels, 3500 cm^{-1} 8=27613
$ZnSnAs_2$, edge absorption spectrum 8=45231
ZnTe, i.r. lattice vibrations 8=49764
α-$Zn_3(VO_4)_2$: Ni^{2+}, optical spectra rel. to crystal field theory 8=48310
$ZnWO_4$, octahedral field, i.r. absorpt. of Co^{2+} ions 8=32011
$ZrCl_4$, i.r. 8=32040
$Zr(NO_3)_4$, i.r. 8=32040

absorpt. band, estimation of position of intensity maximum 8=43150
absorption, rel. to reactivity 8=34225
acenes, cryst. and in soln., absorpt., with polarized light orientation 8=32042
acetals, depend. of geminal H-H couplings on solvent and conc. 8=43831
acetonite, Brownian rotatory motion rel. to dipole-dipole intermol. forces in vibr., 8=43827
acetonitrile in NH_4 salts solns., C≡N band shift rel. to dipole-dipole interaction 8=30487
acetylacetone 8=47651
acetylene, Frank-Condon factors rel. to ionization 8=29982
acetylene, low-energy electron impact, triplet states 8=34302
acetylene monoderivatives, C≡C group oscillation and absorpt. band calc. 8=34300
acetylenes, monosubstituted, C≡C bond vibr. freqs. and absorpt. band intensities, calc. 8=34299
acridine dyes in 2-chloroethanol, $T^* \leftarrow S$ bands in absorpt. 8=30494
acridines, cryst. and in soln., absorpt., with polarized light orientation 8=32042
2-acyl-1, 3-diketones, MO LCAO calcs. of electronic spectra 8=25588
aliphatic ketones, assignment of second singlet in CO group 8=32045
αβ-unsaturated ketones, u. v. absorpt. 8=29788
aminomethoxypyridine, u. v. absorpt. 8=34356
anthracene, Davydov splittings of intense transitions 8=35048
anthracene delayed fluoresc. rel. to excit. states decay and intersystem crossing, obs. 8=25537
anthracene, low-lying triplet excit. states absorpt., 0. 4-1. 0μ 8=25616
anthracene in n-paraffin solvents, electronic spectra rel. to phase transitions of solvent 8=25938
anthracene triplet-triplet annihilation rate const., flash photolysis meas., 430-553°K 8=25535
anthracene, two-photon absorpt. 8=45237
anthracene, polarization of triplet-triplet absorpt. 8=27621
anthracene singlet-triplet transitions, triplet state assignments and spin-orbit coupling 8=25536
anthracene, soln., triplet-triplet absorpt. and extinction coeffs., 3000-8000 Å 8=25926
anthracene vapours, fluorescence fine structure 8=47634
anthracene, Wannier exciton levels 8=26918
9, 10-anthraquinone and derivatives, emission obs. 8=43392
aromatic carbonyl cpds., perturbation of singlet-triplet transitions 8=34296
aromatic compounds, photoelectron spectra and inner ionization pots. 8=34297
aromatic hydrocarbons, anharmonic contrib. to radiationless transitions 8=43342
aromatic hydrocarbons in soln., triplet state form. efficiencies 8=43832
aromatic hydrocarbons, mixed crysts., orientation effects 8=27623
aromatic hydrocarbons, solvent Stark effect and spectral shifts 8=39375
aromatics, polycyclic, vapour phase absorpt., 1550-3000Å 8=38860
aromatics, triplet state lifetimes, delayed fluoresc. obs. 8=25610
aryl ketone-iodine complexes 8=43353
azaporphyrin ion structures 8=34308
azulene derivatives, anomalous emission 8=43354
azulene, elec. field broadening of electronic transition 8=45238
azylene 8=34310
benzene and derivatives, excitation by electron impact 8=48172
benzene ⇌ biacetyl energy transfer and triplet benzene lifetime, vapour phosphoresc. obs. 8=25544
benzene, CNDO calc. of electronic spectra 8=29767
benzene cryst., theory 8=49772
benzene, crystalline, quantitative obs. of optical obs. spectra 8=36435
benzene crysts., site group splitting and orientational effects 8=27627
benzene-cyclohexane, solid solns. at 77°C 8=27624
benzene, effect of solvents on near u. v. absorpt. 8=34870
benzene, in inert-gas matrix, higher excited states 8=49770
benzene isotopic mixed crysts., absorpt. spectra, static cryst. effects 8=49771
benzene, matrix-isolated, temp. depend. 8=29769

  - 4-benzoyl-aminostilbene derivatives, quasiatomic chromosphere systems 8=47643
  - 1, 12-benzperylene in crystalline n-paraffin solns., quasi-line temp. broadening, shift and line profile 8=45240
  - benzoic acid, H-bridge complexes, thermodyn. props. from u.v. absorpt. spectra 8=39349
  - benzonitrile, Brownian rotatory motion rel. to dipole-dipole intermol. forces in vibr., 8=43827
  - 1, 12-benzoperylene at 4°K, line-width obs. in quasiline fluorescence spectrum 8=49827
  - benzophenone, assignment of lowest triplet state of C = O group 8=25560
  - benzophenone, polarized absorpt. 8=27630
  - benzophenone singlet-triplet transitions, triplet state assignments and spin-orbit coupling 8=25536
  - p-benzoquinone and derivatives, emission obs. 8=43392
  - benzpyrene in crystalline n-paraffin solns., quasi-line temp. broadening, shift and line profile 8=45240
  - benzyl, free radical 8=43420
  - bromostyrenes, liq. isomeric, absorpt. obs. 8=43841
  - p-benzoquinone, effect of solvents on near u. v. absorpt. 8=34870
  - p-benzoquinone (H_4) and $(D)_4$ crysts. at 4°K 8=27626
  - biphenylene, electronic 8=27636
  - carbonyl $n \rightarrow \pi^*$ transitions, direction of polarization 8=27630
  - carotene films, effect of gas adsorpt. 8=49773
  - cellulose derivatives, e absorpt 8=36436
  - cellulose propylene phosphite, transformation, structure 8=38966
  - charge-transfer and H-bonded complexes, internal compression effects in solvents 8=34864
  - charge-transfer complexes, solid-state, and crystal structure 8=26166
  - chloralkanes, normal vibrs. and C-Cl charact. freqs. rel. to struct., calc. 8=34354
  - chlorobenzotrifluorides, electronic absorpt. bands obs. 8=43358
  - α,β-chlorine naphthalene, u.v. absorpt. at 77°K for vapour and soln. 8=32047
  - p-chlorobenzonitrile, near-u.v. absorpt. obs. 8=43357
  - chlorophyll, anisotropy of optical transitions 8=34258
  - chromophores, intramolec. energy transfer between triplet states 8=41157/8
  - chromophores, u. v. soln. spectra 8=25927
  - chrysene, low-lying triplet excit. states absorpt., 0. 4-1. 0μ 8=25616
  - chrysophane oxides, N-derivatives, i.r. and u.v. 8=36437
  - cinnoline, vapour, u.v. and visible 8=25559
  - collagen and bone transmission and attenuated total, refl. i.r. spectra 8=32041
  - complexes, electron donor-acceptor, gas phase 8=38905
  - composite, bonded, triplet enhancement with small singlet effect 8=38779
  - compounds with VB group elements, vib. spectra rel. to freq. changes 8=34294
  - copolymers with F atoms, CH_2 group absorpt. bands 8=34394
  - coronene, in cryst. matrices, effect of thermal treatment 8=45242
  - coronene in n-paraffin solvents, electronic spectra rel. to phase transitions of solvent 8=25938
  - corrin analogue, synthetic 8=25561
  - cryptocyanine, laser flash 8=48162
  - cyanine dye soln., stimulated emission 8=48154
  - cyclooctatetraenyl radical anion 8=25658
  - p-di-tert-butylbenzene crysts. rel. to mol. π e chord symmetry, 20°K 8=30648
  - dialkyl sulphides, electronic 8=29762
  - diazines, CNDO calc. of electronic spectra 8=29767
  - 1, 3-dibenzoylacetone 8=47651
  - dibenzoylmethane 8=47651
  - 1, 4-dibromonaphthalene, electronic Zeeman meas. 8=27629
  - dichlorotoluenes, electronic absorpt., near-u.v. obs. 8=43400
  - 3, 3′-diethylthiatricarbocyanine laser, time-resolved stimulated emission spectra 8=28712
  - difluorodiazirine, Stark effect 8=25579
  - 2, 6-dihalogeno-p-benzoquinones, singlet-triplet absorpt. 8=38873
  - 1, 4-dihydroxyanthraquinone, optical emission and absorption 8=34305
  - p-diiso-propylbenzene crysts. rel. to mol. π e chord symmetry, 20°K 8=30648
  - dyes oriented in glass matrix, polarized absorpt. 8=49767
  - $\alpha\alpha'$ and $\gamma\gamma'$ dipyridol in n-paraffins, structural spectra of phosphorescence 8=36530
  - electron-impact spectra at 33-100 eV energies 8=47585
  - ether, ketone acid, amine addition products 8=38880

Spectra—contd
- **organic molecules and substances**—contd
  - ethyl alcohol, trans rotamer obs. and rotational consts. meas. 8-34 Gc/sec 8=43364
  - n-ethylaniline, near-u.v. absorpt. obs. 8=43352
  - ethyl chloride, HCl and CH_3 hindered-rot. lines, Schottky barrier tunnelling obs. 8=34327
  - ethylene oxide, ethylene oxide d_4, potential constants and vibrational analysis 8=38877
  - ethylene, 6 molecules and 1 ion at 300°K, mean square vibr. amplitudes calc. 8=25571
  - ethylene and perdeuteroethylene, far u. v. 8=25573
  - ethylene, u. v. assignments 8=47667
  - ethylphenols, electronic absorpt. bands obs. 8=43385
  - ferrocene, matrix-isolated 8=49775
  - ferroelectrics, soft, spectra-struct. correl. 8=27544
  - five-membered rings, CNDO calc. 8=38862
  - fluoranthene, electronic 8=34329
  - fluorenon, absorpt. bands, elec. field effects 8=34328
  - p-fluorophenol, emission obs. 8=43384
  - fluoro-naphthalene, u.v. absorpt. at 77°K for vapour and soln. 8=32047
  - formaldehyde, elec. field induced 8=25582
  - formaldehyde, elec. field-induced 8=38881
  - formaldehyde, 3500Å $^1A_2 \leftarrow {}^1A_1$ transition 8=25581
  - formyl fluoride, Stark effect 8=25579
  - halogenated benzenes, singlet-triplet absorpt. 8=27625
  - helical polymers, effects of electronic interactions 8=29868
  - hexabromobenzene singlet-triplet transitions, triplet state assignments and spin-orbit coupling 8=25536
  - n-hexane, light emission, electrically stressed 8=39383
  - hydrazides, substituted, C-Br bond 8=49780
  - hydrocarbon glasses, radiation-induced trapped electrons 8=45401
  - hydrocarbon TCNE complexes, effects of press. on charge transfer absorpt. 8=36433
  - hydrocarbons, absorption spectrum similar to dinegative ion 8=38884
  - hydrocarbons aromatic, quasilinear phosphoresc. spectra 8=36524
  - hydrocarbons, unsaturated, vibrational spectra 8=47621
  - indene, substituted, spectroscopic study 8=36440
  - p-isopropyltoluene crysts. rel. to mol. π e chord symmetry, 20°K 8=30648
  - ketones, solvent effects in u. v. 8=34876-7
  - laser flash spectroscopy 8=43341
  - liquid, radiationless transitions, direct meas. 8=43829
  - liquids and solutions, Kramers-Kronig relations 8=48153
  - methanal azine, electronic absorpt. 8=34337
  - methane, nuclear r.f. spectrum obs. 8=47588
  - methylchloride, $2\nu_5$ band near 2880cm^{-1}, parallel component 8=43374
  - p-methyl-2′-methoxybutylbenzene crysts. rel. to mol. π e chord symmetry, 20°K 8=30648
  - methoxynitropyridine, u. v. absorpt. 8=34356
  - methoxypyridine, u. v. absorpt. 8=34356
  - methylcyclopropane, microwave spectra 8=47665
  - methyl iodide, resonances perturbing ν_5 band 8=25594
  - methyleniminyl free radical, electronic absorpt. 8=34337
  - methylsilanes, far u. v. 8=25592
  - mixed crystals 8=41159
  - molecular crysts., absorpt. and vibronic spectra, dynamic theory 8=39860
  - molecules, triplet state props. and spin-orbit and spin-spin interactions 8=25409
  - naphthacene in n-paraffin solvents, electronic spectra rel. to phase transitions of solvent 8=25938
  - naphthalene cryst., theory 8=49772
  - naphthalene, Davydov splittings of intense transitions 8=35048
  - naphthalene, effect of solvents on near u. v. absorpt. 8=34870
  - naphthalene, fluorescence and absorpt. conc. depend. in n-heptane, cyclohexane 77°K 8=49830
  - naphthalene soln. in cyclohexane, $^1B_{3u-}$ state, intersystem crossing 8=43839
  - 1, 4-naphthoquinone, absorpt. obs. 8=43393
  - 1, 4-naphthoquinone and derivatives, emission obs. 8=43392
  - napthalene, Davydov splittings of intense transitions 8=35048
  - napthalene soln., triplet-triplet extinction coeff., 4130 Å 8=25926
  - n-nitroaniline, cryst., stimulated Raman scatt., fermi reson. splitting, 77°K 8=41160
  - nitrobenzene, induced Raman scatt., sensitizing by cyanine dyes 8=34871
  - nitroparaffins, solvent effects in u. v. 8=34876-7
  - olefins, u.v. assignments 8=47667
  - orthodiazines, electronic states and radiationless processes 8=27667
  - oxalyl halides, near u. v. absorpt. 8=25612
  - perdeuteronaphthalene, triplet-triplet absorpt. 4500-3800Å, h. p. obs. 8=30491
  - perylene, α-and β-type crysts., high press. 8=41168
  - perylene in crystalline n-paraffin solns., quasi-line temp. broadening, shift and line profile 8=45240
  - phenanthrene-biphenyl mixed crysts. 8=41150
  - phenanthrene delayed fluoresc. rel. to excit. states decay and intersystem crossing, obs. 8=25537
  - phenanthrene, low-lying triplet excit. states absorpt., 0. 4-1. 0μ 8=25616

Spectra—contd
organic molecules and substances—contd
phenanthrolines, fluoresc. and phosphoresc. spectra 8=43382
phenazine singlet-triplet transitions, triplet state assignments and spin-orbit coupling 8=25536
phenazines, cryst. and in soln., absorpt. with polarized light orientation 8=32042
phenoxyl, free radical 8=43420
phenol, 2750 Å electronic band system 8=43378
m-phenylene-bis-phenylmethylene, quintet mol. 8=47669
p-phenylenediamine cations, dimerization of radicals in solns. and solids 8=25657
γ-phenyl-pyridine derivatives, u. v. absorpt., due to position of saturated substitutes 8=29797
phthalazine, n-π^* transitions 8=41170
phthalimide derivatives, radiationless transitions, activation energy determ. 8=34879
phthalocyanines, polycryst., visible region 8=36444
picene, low-lying triplet excit. states absorpt., 0.4-1.0μ 8=25616
polyvinyl alcohol, electronic absorpt. 8=30492
porphin type cpds., NH oscills. found, problem of internal H bond 8=34353
porphyrins, Stark effect 8=43388
porphyrins, Zeeman effect 8=43387
pyrazole 3(5) and 4 isomer derivs., u. v. and i. r. absorpt. 8=34361
pyrene, flash excited absorpt. 8=43840
pyrene, low-lying triplet excit. states absorpt., 0.4-1.0μ 8=25616
pyrene in n-paraffin solvents, electronic spectra rel. to phase transitions of solvent 8=25938
pyridine, CNDO calc. of electronic spectra 8=29767
radiant thermal conduction effect on 8=46242
Rochelle salt crystals, vacuum u.v. spectra 8=36441
rubrene, crysts. under press. 8=49779
salicylanide, u.v. 8=38903
substituent consts. calc. 8=34311
tetra methylammonium-uranylchloride, luminescent, polarization 8=41166
tetracene, cryst. under press. 8=49779
tetrahalophthalic anhydride complexes with aza-aromatics 8=38902
tetraidoethylene, vibrational spectra and force 8=43396
tetraphenylbutadienes, effect of intramolec. twisting 8=39390
s-tetrazine, gaseous, 5515Å electronic transition 8=25627
s-tetrazine, visible bands 8=25628
thienothiophenes, isomeric, electronic spectra 8=43399
thiophene, monoalkyl substitutes, scatter and i. r. absorpt. 8=34364
tributylphosphate, association with H_2O in organic solvent 8=34775
triglycine sulphate and isotypes, i.r. reflection, rel. to ferroelectric transition mechanism 8=27290
triglycine sulphate group's ferroelectric crystals 8=49776
trimethylene selenide 8=29802
trimethylene sulphide, $(CH_2)_3S$, crystals i.r. absorpt. and Raman scatt., 8=41171
trinitrobenzene crystal, complexes, high press. 8=27635
triplet-triplet transitions, extinction coeffs. 8=34293
triromobenzene singlet-triplet transitions, triplet state assignments and spin-orbit coupling 8=25536
trinitrofluorenone cryst. complexes, high presss. 8=27635
urethanes, substituted, C–Br bond 8=49780
xanthene dyes in 2-chloroethanol, $T^* \leftarrow S$ bands in absorpt. 8=30494
CH^+, $^1\Delta \rightarrow {}^1\Pi$ and $^3\Sigma \rightarrow {}^3\Pi$ band systems 8=38942
Ce^{3+} organic liq. complexes, absorpt. 8=34873
Co acetate tetrahydrate, absorpt. obs. 8=32046
Cu acetate monohydrate, rel. to anomalous mag. behaviour 8=36434
Ho ethylsulphate, absorpt. and Zeeman effect of $^5I_8 \rightarrow {}^3K_8$ and $^5G_4$ transitions 8=49777
Mn acetate tetrahydrate, absorpt. 8=49740
N-salicylideneaniline in H_2O-methanol, hydrolysis 8=48164
NH_3^+ substituent in π-electron systems, inductive effect 8=25525
Ni dimethylglyoxime, spectral shift for high press. meas. 8=50477
X-H bond stretching vibr. intensities in gas to CCl_4 solns. transition, obs. 8=34298
organic molecules and substances, infrared
acenaphthenequinone, vibrational spectrum 8=43282
acetophenone-$SbCl_3$ complexes in CCl_4 8=34866
acetyl radical, rel. to force fields and bond orders 8=43419
acetylene, cryst. phases 8=27618
acetylene, monosubstituted, solns., $C \equiv C$ group absorpt. band intensity rel. to intermol. H-band form. 8=34301
acetylene-t_2 8=25529
acrylonitrile-metal complexes 8=38865
aliphatic ethers 8=29777
aliphatic mononitriles 8=38867
alkali ions in tetrahydrofuran soln. 8=25931
alkyl-Hg(II) cpds 8=43350
alkylphenols, 5-component, analysis 8=34350

Spectra—contd
organic molecules and substances, infrared—contd
alkylpyridine complexes of transition metal cations 8=29763
allene-h_4 and-d_4, vibr. rot. transitions 8=47633
$\alpha\beta$-unsaturated ketones 8=29788
amine–BF_3, absorption of charge transfer complexes 8=25539-40
amino benzene sulphonic acids, isomeric 8=29801
α-aminoethylphosphonic acid 8=47666
aminopyridines and deuterated analogues, obs. 8=43391
aniline adsorbed from CCl_4 soln on Cab–O–Sil silica 8=48474
anthracene crysts. 8=49768
anthracene-d_2(9, 10), vibr. spectrum, 400-3100 cm^{-1} 8=38869
aromatic non-planar hydrocarbons, absorpt. intensities of CH-stretching vibrs. 8=34344
aromatic planar hydrocarbons, absorpt. intensities of CH-stretching vibrs. 8=34343
aryl-Hg(II) cpds 8=43350
aryl sulphanilides, n-substituted 8=34307
aziridines and N-deutero derivs., rel. to structure 8=34309
benzene, adsorbed on Aerosil 8=44076
benzene-2, 1, 3-thio(seleno) diazoles, vibrational spectra 8=43356
benzenes, monosubstituted, correl. of i. r. intensities with chem. reactivity 8=43253
benzenes, substituent effects on l. f. vibrs. 8=47642
benzyl and substituted benzyltin cpds 8=29765
benzyl compounds, vibrational frequencies 8=43361
biphenyl, re-analysis 8=34348
biphenylene, vapour, soln. and cryst. 8=29770
bis(trifluoromethyl)-peroxide 8=43366
bromobenzaldehydes, liq., vibr. obs. 8=43834
p-bromobenzaldehyde, solid, vibr. obs. 8=43834
bromocyclobutane 8=25566
bromocyclobutane, and 3 isotopic species, liq. and vapour, rel. to structure 8=29771
n-bromo phenylsulphonylchloride, absorption, in polarized light 8=41169
butanone-2-oxime in solvents, association determ. 8=43763
3-butenenitrile, rotational isomerism 8=25551
2-butenes, cis and trans 8=25552
butyl chloride (tertiary), liq. and cryst. 8=32044
n-butylamine and N-deutero derivatives, H and D bridge bonds 8=27620
carbon tetrachloride, difference bands 8=38874
carbon tetrafluoride, collision-induced rotational, theory 8=47658
carbonyl group of semicarbazides, semicarbazones and pyrazolecarboxamides, i. r. abs. 8=47645
carboxylic acids, H-bonding 8=25554
cellulose acetate films 8=32048
chars, O^{18}-labelled, rel. to 1600cm^{-1} band origin 8=43345
p-chlorobenzonitrile, absorpt. obs. 8=43357
copolymers, graft, obs. 8=29871
cyanamide, far i.r. 8=48710
cyclobutanol, and Raman spectra 8=25566
cyclopentene, far i. r. and ring-puckering 8=34325
cyclo-propene, -1, 2-d_2, Raman, vapour and solid phase i.r. spectra obs. 8=43362
cyclopropane-H_6 8=43363
dialkyl disulphides 8=43349
dialkyl-Tl(III) cpds 8=43351
diaryl disulphides 8=43349
n-dicarboxylic acids, crysts., far i.r. 8=27631
2, 5-dichloro-1, 4-xylene and 4, 5 dichloro-1, 2-xylene crysts., and cryst. structure 8=39833
dichlorocarbene in solid Ar 8=29775
dichlorocarbene in solid Ar 8=29775
dicyanodiacetylene Σ_g^+ modes, absolute Raman intensities 8=26031
1, 2-dichloroethane in various solvents, rel. to potential barrier 8=43855
diethylmethylsulphonium cpds 8=29776
diethylether, coordination compounds with $MgBr_2$, $ZnCl_2$ and AlX_3(X=Br, Cl) 8=25569
difluoroacetone, symmetrical, rotational isomerism 8=29783
2, 5-dihydroxy-para-benzoquinone, absorpt., and u. v. 8=34318
1, 4-dihydroxyanthraquinone, rel. to hydrogen bonding 8=34305
dimethyl NPX_2(X=F, Cl, Br), gas, liq. and solid, vib. anal. 8=43372
dimethylphenylarsine 8=43381
di-n-butyl diselenide 8=43349
dinitrotetramminecobalt(III) complexes 8=45241
1, 3-dioxolane, far i. r. 8=25567
diphenyl-Tl(III) cpds 8=43351
ethane-1, 1, 1-d_3, near-i. r. 8=25570
ethyl alcohol, rel. to struct. and thermodynamic props. 8=30401
ethylamine and N-deutero derivatives, H and D bridge bonds 8=27620
ethyldimethylsulphonium cpds 8=29776
ethylene imine, absorption, at 90 and 10°K 8=25568
ethylene-methacrylic acid copolymers 8=41173
m-fluoroaniline, liq., obs. 8=43833

Spectra—contd
organic molecules and substances, infrared—contd
furan, methyl-substituted, vibration spectra 8=43368
guanidine, matrix-isolated 8=25583
H-bonded systems, solid and liquid, review 8=38887
H-bonded systems, theory 8=38787
heterocyclic compounds, CH valency oscills. 8=38861
hydrazine, cryst., normal co-ord anal., force consts. and 8=45244
imidazole 8=29787
imidazole, far i.r. 8=41165
ketones, absorpt. band, temp. depend. 8=34319
liquid, effect of local intermol. field 8=34861
macromolecular systems analysis, review 8=34393
maser application 8=38782
methallyl iodide 8=43370
methane, and deuterated, collision induced absorpt. 8=47657
methane, and deuterated, collision-induced rotational, theory 8=47658
methane, compressed, rot. correl. functions and intermolecular torque calc. 8=38894
methane in solid Ar 8=27634
methane, liq. and solid solns. in inert gases 8=25932
methaneselenol 8=25602
methoxyl group detection 8=47661
methyl alcohol, rel. to struct. and thermodynamic props. 8=30401
methyl alkali halides, matrix-isolated 8=47656
methyl aromatic hydrocarbons, conformation of CH$_3$ group 8=29789
methyl BF$_2$, gas, fine struct. due to internal rotation 8=29793
methyl bromide, vibration-rotation, near 6000 cm^{-1} 8=47659
methyl chloride, perturbations in ν_4 band 8=34334
methyl fluoride 8=43371
methyl halides, absorpt. intensity rel. to C-H bond electron cloud distrib. 8=43373
methyl iodide, liq., band shapes 8=39379
methylamines, internal rot. effects 8=47655
methyldiboranes, characteristic i. r. freqs. 8=34335
methyldiphenylarsine 8=43381
methylphosphonic acid 8=47666
methylstannane 8=43369
methylvinylsuphide 8=38899
naphalene vapour, absorpt. rel. to e transitions, 30 000-53 000 cm^{-1} 8=38900
nitriles, absorpt. band, temp. depend. 8=34319
nitromethane, gas, fine struct. due to internal rotation 8=29793
organotrichlorosilanes, l. f. vibrations 8=47620
para-dithiane, fine structure mechanisms, at 15°K 8=27632
perbromocyclopropane 8=25565
perchlorocyclopropane 8=25565
perfluorocyclopropane 8=25565
phenol, H-bonded with vinyl derivatives 8=43379
o-phenylenebis (dimethylarsine) 8=43381
phenyl group IV-A cpds. 8=38901
polar cpds in crystalline phases, rel. to dielec. constant transitions 8=27617
poly-2, 2′-octamethylene-5, 5′-dibenzimidozole rel. to amorphisation in annealing, obs. 8=26158
phenol, struct. in ground and first excited state 8=25614
phenyl derivatives of Ge, As, and Sb 8=34352
phenylgermane 8=25615
phthalic acid distribs., infrared spectroscopic determ. of isomers 8=34346
polymers, freq. distribs., 8=47736
polyvinyl alcohol, dehydrated fibre, i. r. obs. 8=34396
poly(vinylidene fluoride), α- and β-crysts., rel. to fundamental modes, obs. 8=44306
n-proplylamine and N-deutero derivatives, H and D bridge bonds 8=27620
polystyrene sulphonic acid, effect of hydration 8=48165
pyrazolecarboxamides, i. r. abs. of carbonyl group 8=47645
pyridazine, and deuterium analogues 8=25933
pyridine derivs., rel. to ν(CH) bands near 3000 cm^{-1} 8=29799
pyrimidines, polysubstituted, 700-200 cm^{-1} 8=47670
quinoline and isoquinoline, at liq. N$_2$ temp., and interpret. of fund. vibrs. 8=34362
quinone adducts and derivs., Diels-Alder, correl. for carbonyl and C-C double bonds 8=25924
salicylaldehyde obs. 8=43394
semicarbazides, i. r. abs. of carbonyl group 8=47645
semicarbazones, i. r. abs. of carbonyl group 8=47645
silacyclobutane 8=29800
steric factors of H-bonding 8=25639
symmetric tops, computer anal. 8=25412
terpene alcohols, and related cpds, rel. to correl. of struct. and i.r. absorpt 8=39381
tetracyanoethylene charge transfer complexes, polarized spectra, vibr. assignment 8=38879
tetrahydrofuran and deutero-substitutes, vibration spectra 8=43397
tetrahydrofuran, far i. r. 8=25567
trichloromethyl radical in solid Ar 8=29831
triethylsulphonium cpds 8=29776
trifluoromethylphosphonylchloride 8=34330
triglycine sulphate crystals; isomorphous with ferroelectrics 8=49774

Spectra—contd
organic molecules and substances, infrared—contd
triphenylarsine 8=43381
triphenylarsine, mol. addition compounds with SnX$_4$ (X=halogen), stretching vibs. freq. shifts 8=25631
triphenylphosphine, and complexes 8=43380
triphenylphosphine, mol. addition compounds with SnX$_4$ (X=halogen), stretching vibs. freq. shifts 8=25631
triphenylphosphine oxide, and complexes 8=43380
urotropin and Br, I complexes, vibr. analysis and bond strengths, 4000-350 cm^{-1} 8=49781
vinyl acetylene, absorpt., electro-optical parameters 8=34365
vinyl bromide, deuterated 8=47672
vinyl diacetylene, absorpt., electro-optical parameters 8=34365
Ag halide complexes, far i. r. 8=27619
BF$_3$-amine, absorption of charge transfer complexes 8=25539-40
BF$_3$S(CH$_3$)$_2$ 8=25541
C$_2$Br$_2$, absorpt. band assignments to normal modes of vib. 8=45236
C$_2$Cl$_2$, absorpt. band assignments to normal modes of vib. 8=45236
(CD$_3$)$_2$C=O, torsional vibr. 8=25601
(CD$_3$)$_2$NH, torsional vibr. 8=25601
C$_6$D$_5$GeCl$_3$ 8=25615
C$_6$D$_5$GeCl$_3$ 8=34351
(CF$_3$)$_4$As$_2$ 8=25604
(CF$_3$)$_2$PF$_3$ 8=25576
CF$_3$PF$_4$ 8=25576
CF$_3$SF$_5$ 8=25516
CF$_4$, collision induced absorpt. 8=29772
(CH$_3$CD$_2$)$_2$O-AlX$_3$(X=Cl, Br) coordination compounds 8=25569
CH$_3$CH$_2$Br, torsional vibr. 8=25601
C$_2$H$_6$, CH$_3$CD$_3$, and C$_2$D$_6$, torsional vibr. 8=29778-9
CH$_3$CH=CH$_2$, torsional vibr. 8=25601
CH$_3$CH$_2$Cl, torsional vibr. 8=25601
(CH$_3$)$_3$CNCO 8=29732
CH$_3$D, in matrices, nuclear-spin-species conversion 8=38830
C^{13}H$_3$Cl, vibr.-rot. bands 8=29794
CH$_3$NF$_2$ and CD$_3$NF$_2$ 8=25597
CH$_3$OPCl$_2$ and CD$_3$OPCl$_2$ 8=38892
CH$_3$SiHD$_2$ 8=25603
CH$_3$SiHD$_2$ 8=34338
CN, absorpt., effect of acetonitrile conc. in CCl$_4$ 8=34319
C$_2$I$_2$ absorpt. band assignments to normal modes of vib. 8=45236
Cd halide complex with azines 8=36432
Cu phthalocyanine, cryst. emission 8=41021
Ge(C≡CH)$_4$ 8=25625
H$_2$O, absolute intensity meas. of dipole moments 8=38837
Hg halide complex with azines 8=36432
I$_2$ charge-transfer complexes, far i. r. intensities 8=25586
ICl charge-transfer complexes, far i. r. intensities 8=25586
N-vinyl cpds. 8=47671
Si(C≡CH)$_4$ 8=25625
Sn(C≡H)$_4$ 8=25625
Zn halide complex with azines 8=36432
organic molecules and substances, radiofrequency

  spectrograph, instrum. function, exptl. determ. 8=24397
  spectrophotofluorometer for absorpt. and transmission 8=46694

Spectrochemical analysis—contd
- standard preparation 8=36644
- steel, emission anal., decomp. and inter-element effects 8=32156
- steel, of C, using vacuum spectrometer interference of Al 8=32155
- substance utilization, improvement by laser 8 =36645
- sun, Ga abundance from sunspot obs. 8=32573
- thermochemistry of samples in carbon arc 8=41237
- u.v. and visible absorption spectrometry 8=46695
- use of universal arc-pulse generator UBI 1 8=43464
- weak lines on continuous background, extraction method 8=27782
- Ag, atomic fluoresc. using hollow cathode lamp 8=36641
- Al in white cast iron, hollow-cathode discharge determ. 8=36642
- Al, prep. of powder briquets 8=32158
- Au(I) in cyanide solns., at. absorpt. spectrometry 8=32162
- B in white cast iron, hollow-cathode discharge determ. 8= 36642
- Bi in white cast iron, hollow-cathode discharge determ. 8=36642
- Br in brines, X-ray fluorescence obs. 8=27815
- Ca and Mg in Ta 8=45416
- Co, nanogram amounts in blood, Cu-spark method 8=49987
- Cs, specialized flame photometer 8=28825
- Cu in acetylene flame, linear absorpt. method 8=27790
- DC-arc emission spectrography, Li cpd buffers 8=27792
- Eu_2O_3 in rare-earth oxide mixtures, u. v. spectrophotometry 8=27786
- F^- determ. by atomic absorption 8=27788
- Fe^{3+}/Fe^{2+} ratios in phosphate and oxide mixtures, Mössbauer quantitative anal. 8=27778
- K and Na determination in fuel rich air-H_2 flames 8=49990
- K content of new tissue growth 8=27787
- Mg alloyed cast iron with C electrode and lasers 8=32157
- Mg in blood plasma, using improved plasma jet equipped with inexpensive atomizer 8=47894
- N^{15} emission spectrometry, enhancement by inert gas 8=27791
- NH_4HF_2-HF electrolytic products, i. r. cell 8=36606
- Os^{187} d. c. arc spectrum method 8=36635
- Pb, in lead crystal, determ. by atomic absorpt. spectrometry 8=27789
- Sb species in vapour from PtSb at 900°C by atomic absorpt. 8=30608
- Si, O analysis, by i.r. spectrophotometer 8=49992
- Sr, atomic absorpt. 8=45417
- U oxide impurities, mixed carrier 8=32161
- Y_2O_3, determ. of trace amounts of rare-earth impurities 8=27794

Spectrometers
- See also Mass spectrometers; Monochromators; Particle spectrometers; Spectrophotometers; X-ray spectrometers.
- astronomical Fourier, 4300-8000 cm^{-1} 8=32413
- astronomical, telescope mounted Mock interferometer, visible and near i.r. 8=32412
- atomic absorption and flame emission simultaneous analysis, multichannel 8=46700
- auto-recording type, for magneto-optical rotatory dispersion 8=37673
- continuously scanning, recording error 8=42233
- conversion from photographic to automatic recording 8=28817
- cross-correlating for vibration-rotation bands 8=42230
- Czerny-Turner, 4m asymmetric, optimization of configuration 8=42231
- Czerny-Turner, lens correction of astigmatism 8=46664
- Czerny-Turner spectrograph, coma compensation 8=28730
- Dobson, mean absorpt. coeffs. for atm. ozone 8=47973
- electron-impact, electrostatic lens 8=47585
- Fabry-Perot, astronomical, for rocket appls., 1700-5500Å 8=32411
- Fabry-Perot astronomical interferometer 8=32415
- Fabry-Perot, double, press. scanned and digital recording 8=28796
- Fabry-Perot, double, scanning synchronization and plates parallel spacing, servocontrols 8=28821
- Fabry-Perot, high-resolution 8=28806
- Fabry-Perot interferometer with electromechanical scanning system 8=46696
- Fabry-Perot, plate spacing automatic control 8=28819
- Fabry-Perot polyetalon, importance of high contrast 8=42220
- focal isolation, amplitude modulated using lens chromatic aberration 8=28797
- Fourier, high resolution, path difference 0-180 cm 8=28830
- Fourier, interferometers and computer system for far i.r. 8=28799
- Fourier lamellar interferameter with saw-tooth drive, far i.r. 8=28812
- Fourier, Michelson interferometer for balloon-borne solar meas., 10-100μ 8=32571
- Fourier transform, i.r., use of two-beam interferometer with 1m path difference 8=28815
- Fourier, Z-cut uniaxial cryst. plate between circular polarizers 8=28802

Spectrometers—contd
- for galactic emission regions meas., multi-lens Perot-Fabry assembly 8=32414
- γ-ray, Ge(Li), total absorption, for improved peak-to-continuum ratios 8=47053
- grating, Girard coding, with photographic plate 8=28822
- grating, multiplex 16-channel, for near i. r. 8=28798
- high resolution, allowable nonparallelism in beams incident on plane diffraction gratings 8=42228
- high-speed, review 8=42227
- i. r., far, double-beam, high resolution 8=28809
- i. r., high-resolution, improvements 8=24404
- i. r., precision calibration and digital recording 8=24401
- infrared, prism, calibration with echelle grating 8=33267
- i.r. radiometer spectral responsivity determ. 8=42232
- i. r., small, description 8=24396
- i.r., synchronized high speed scanning 8=24399
- instrument functions for wide angle Michelson interferom. type 8=28811
- interferometer, lamellar grating far i.r., double-beam differencing 8=28818
- Littrow mount grating, correction of instrumental broadening 8=42223
- mechanical for analysis of energy distrib. of Cu or Au sputtered atoms 8=48915
- optical, laser calibration for colour blind spectroscopists 8=37675
- PEPSIOS three Fabry-Perot, high resolution scanning spectrometer 8=37674
- photoelectric multi-channel, Fabry-Perot etalon and axicon mapping 8=28804
- photoelectron, rel. to photo-ion kinetic energy anal. 8=47784
- for photoelectrons, parallel-plate 8=31470
- plane-grating, heterochromatic fringe prod. 8=46693
- for plasma meas., multichannel Fabry-Perot with Fresnel lenses 8=30089
- plasma transient Stark and Zeeman shifts, Fizeau interferometer meas. 8=30088
- polarization Fourier, field of view and resolution 8=28826
- Raman, resolution improvement by He-Ne laser light source 8=24398
- rapid-response, for i.r. 0. 8-3μ 8=24392
- recording, for derivative spectroscopy 8=24391
- scanning spectroradiometer 8=37676
- SIMAC, Fabry-Perot spectrometer with scanning multi-receiver grating spectrograph 8=28801
- SISAM, resolution 0-03 cm^{-1}, 4-5μ 8=28823
- SISAM, resolutions 200 mK and 27 mK, 0. 8-2. 5μ 8=28800
- slit width, temp. effect 8=46702
- solar spectra meas. in 1-3. 5 μ range at altitudes below 18 km 8=45873
- specimen-changing device, automatic 8=46698
- spectrofluorimeter, fully compensated 8=33263
- spectrograph design (1918-68) 8=33268
- spectrograph, high resolution, 3 prism 8=46697
- spectrograph, instrum. function, exptl. determ. 8=24397
- spectrograph shutter for 10 μsec. exposures 8=33262
- stray light meas. with n filters 8=46701
- tuned laser differential spectrometry, observation of saturation peaks 8=42091
- for twilight and zodiacal light, press. scanned Fabry-Perot 8=32568
- two-crystal, in X-ray spectroscopy, utilization of X-ray beam divergence 8=49690
- u.v. and visible absorption spectrometry 8=46695
- for upper atmosphere, Fabry-Perot, appls. 8=32271
- wide angle Michelson interferom. type, instrument function 8=28811
- GaAs laser diode spectrograph, temp. tunable 8=46589
- **accessories**
  - adaptor for photoelectric recording of Raman spectra with three-prism spectrograph 8=46709
  - cuvette for stimulated emission in solutions 8=46704
  - cuvette, high-temp. for i. r. absorpt. obs. 8=37679
  - delay unit for flash photolysis 8=41285
  - discharge tubes microwave-excited electrodeless for atomic spect. 8=46707
  - explosive high-speed shutter 8=28835
  - Fabry-Perot photoelec., h.f.s. digital calc., programme 8=28829
  - for Fabry-Perot spectra linear transformation, optical prism viewers 8=28834
  - flow burner laminar with i.r. heated spray chamber and condenser 8=46706
  - Fourier inverter for multiplex spectrometer, Simoramic analyser appls. 8=28831
  - Fourier transform analogue computer IFTAC 8=28827
  - Fourier transform analogue computer, optical 8=28828
  - Fourier-transform, digital recording system 8=37677
  - Fourier transform real time synthesizer 8=28832
  - furnace cell with "rectangular" temp. field 8=46708
  - Fuwa tubes, heated, for at. absorpt. spectroscopy 8=46690
  - heated chamber burner for atomic absorpt. spect. 8=46703
  - hot tube for at. absorpt. spectrochemistry 8=46684
  - image splitters, application in spectroscopy 8=28836
  - integrator for 15-2 spectrogram 8=46328

Spectrometers—contd
  accessories—contd
    interference microphotometer for Fabry-Perot ring photographs analogue reduction 8=28833

formaldehyde, dipole moment of triplet state 8=25580
linear broadening, transition from quasi-static to impact electron contrib. 8=43158
plasma spectral line broadening in strong mag. and elec. fields 8=25340
plasma spectrum 8=30092
plasma transient shifts, Fizeau interferometer meas. 8=30088
porphyrins 8=43388
quadratic constants, for 13 elements 8=47467
quadratic h. f. s., theory 8=29601
Al, ground level h.f.s., obs. 8=29602
Ar II lines, Stark shifts 8=25354
ArII multiplets, temp. depend. 8=39028
$CaWO_4$:Gd^{3+}, ^6P Stark levels and line polarization 8=31993
CdS, exciton levels 8=36348
D source, colorimetry tables 8=46655
Eu, ground level h.f.s., obs. 8=29602
He, 3889, 5016 Å line broadening, obs. 8=47841
HeI, combined Zeeman and Stark effects 8=38653
He II, 3203Å line broadening 8=43225
LiF, linear effect on colour centres, zero-phonon lines. obs. 8=27581
LiF, F_3^+ centre 8=31120
N_2^+, broadening of rot. lines, shapes and widths 8=34259
NH_3, rotational lines observed by far i. r. laser 8=38845
NO molecule, and Zeeman effect, combined 8=25498
NaF, F_3^+ centre 8=31120
Sm, ground level h.f.s., obs. 8=29602
YAl garnet:Fe^{3+}, e.p.r. and pseudo-stark line-splitting 8=31849

Stars
See also Nebulae; Novae; Sun.
A-type, microturbulent velocity parameters 8=50276
A-type within 20pc of Sun, moving pairs obs. 8=50278
AG Peg, brightness oscs. with period of near 800 days 8=32438
angular diameter meas. with stellar interferometer at Narrabi, procedure 8=28073
angular diameters of 15 stars, and obs. monochromatic flux at surface 8=28074
AR Andromedae nature, obs. 8=28078
atmosphere models, influence of turbulence, anal. with corrective element 8=36934
atmosphere, non-LTE, calc. of line spectrum, influence of ordered macroscopic vel. 8=41514
BD + 34°1051 binary, orbital elements, from photoelec. obs. 8=36957
binary, colours and magnitudes in UBV system calc. from photoelectric obs. 8=50332
binary, distances corrected statistically 8=50333
binary eclipsing stars, darkening at limb, interpretation 8=36955
binary ϵ Coronae Australis, eclipsing, blue and yellow filter obs. 8=32471
binary, possibility of many single star systems being resolved 8=45700
binary, spectroscopic, masses obs. 8=45699
binaries, spectroscopic, galactic distrib. 8=41520
binaries, 12 new pairs, orbital parameters tabulated 8=3247
BV342 binary, orbital elements from photoelec. obs. 8=36956
carbon, thermal stability rel. to ν losses, models 8=45636
Cas A, X-ray spectrum rel. to optical 8=45775
cepheids, classical, period-radius relation 8=45681
cluster, gravitational microfield, stellar density gradient effect 8=36959

Stars—contd
clusters, open, statistics and mutual independ. for neighbours 8=32474
collisional relaxation calc. 8=50275
Coma Cluster, distribution of galaxies near centre 8=50363
contracting, model convective envelopes 8=32428
CP1919, Parkes period confirm. 8=45753
declinations, absolute meas. with instrums. without precise graduated circles 8=45613
δ Lyrae cluster, photometric evidence 8=28087
δ Scuti variable, pulsation limited by axial rot. 8=45687
density in galactic halo SA 57, RGU photometry determ. 8=41531
dimensions, rel. to Jeans's criterium 8=50280
double, interferometer obs. 8=32466
double, table of micrometer obs. 8=32465 -7-8
doubles in Melbourne Astrographic Catalogue, 635, search and count results 8=32469
dwarf, white, effects of accretion 8=36928
dwarfs, Sculptor-type, distrib. in near galactic clusters 8=28109
dynamics, collective effects, one-dimensional model 8=50287
dynamics, tensor virial-equation 8=45621
eclipsing binaries, obs. 8=28086
53 Arietis, period calc. from light variation, photoelectric study 8=50274
formation of single and multiple stars effect of rotation and magnetic fields 8=50294
4 C Vn, as δ Scuti variable for radial velocity var. explanation 8=50320
fundamental, proper motions and radial vels. 8=32499
Galactic, near sun, kinematic models 8=36970
in galaxies, absolute proper motions, 14000 obs. 8=45740
in Galaxy, vel. relax. rel. to interstellar gas gravit. condensation 8=45733
γ-Pegasi, atmos. from equiv. widths and depths and H and He lines 8=32422
Giades cluster, structure, density distrib. curves, radius 8=32459
globular clusters in Andromeda Nebula, forming ellipsoidal subsystem 8=32477
groups of uniform spectral type, having same systematic motions (expansions) as OB = associations 8=28085
Hamada-Salpeter model of white dwarfs 8=41502
HD 191566, duplicity, obs. 8=45705
head-on collision, 2-dimensional theory 8=45619
Hevel's object, X Orionis, 1667 8=45612
horizontal-branch, at high galactic latitudes ten new stars 8=50283
hot main-sequence, models of out layers 8=45629
Hyades cluster, distance from earth meas. 8=50330
Hyades cluster, mass-luminosity and He content 8=45697
Hyades cluster star stream 8=45695
Jean's type gravitation instability of finite isothermal gas spheres 8=45618
lagrangian systems, self-adjointness 8=50277
late type, atms. convective instabilities, mag. field effects, calc. 8=50289
light scatt., nonstationary, in atms. and rel. to novae theory 8=28039
magnitudes, determ. with integrating photometers 8=36974
mass-luminosity relationship and He content of Hyades cluster, young stars 8=45697
massive and supermassive, mass and energy balance 8=50288
massive, gravit. modes, stable and unstable, asymptotic solns. 8=45635
meridian circulation velocities in radiative envelope, Cowling model 8=45617
middle-aged, densities 8=28051
models, theory of similarity, rel. to rad. press. and convective cores 8=32426
motion in Galactic plane, perturbations by gravitation irregularities 8=45620
Neugebauer-Martz-Leighton objects 8=50385
neutron, mass infall as source of X and cosmic rays 8=45676
neutron, possible optical identification from pulsating radio source 8=36949
neutron, radio obs., position in HR diagram 8=32451
neutron, radius and struct. 8=28076
neutron rotating, as origin of pulsating radio sources 8=41539
neutron, torsional oscills. and crystallization 8=45762
NGC2360 cluster, photoelectric obs. 8=28088
NGC6397 cluster, blue horizontal-branch obs. 8=32461
OB associations, grains, accretion of solid H mantles 8=41519
OB, distances corrected statistically 8=50333
occultations, tables for 1966 at Sydney Observatory 8=50398
old moving groups, past galactic orbits, numerical computations 8=32478
orbits, rel. to spiral structure stability 8=50364
P Cygni, proper motion and obs. magnitude 8=32420
photographic images, coma tolerances 8=36941
plasma gravitational instability 8=41528
polarimetry, new technique 8=36945

Stars—contd
pulsars, obs. at 11 cm. 8=45765
pulsars, preliminary obs. 8=45745
pulsars, proper motion search 8=50379
pulsating, damping in emission of gravitational waves 8=41516
pulsating, one-zone model vibr. stability 8=45688
pulsating, path length of mixing, theory rel. to estimate of upper boundary 8=36954
pulsation, non-radial and non adiabatic: one zone approximation, p-, g modes stability 8=50322
pulsations, adiabatic and convective unstability 8=50321
pulsational instability in pre-main sequence phase 8=36950
II Puppis and delta cepheid-var. AQ Pupis, assoc. 8=32419
R Z Scuti, close binary system, mass, radius and luminosity calc. 8=50331
radial velocities, from Coude' spectrograms, southern 8=36930
radiation characts. rel. to nebulae radio emission 8=32484
radio, visibility fades in Alaska near solar minimum 8=41437
radio, visibility fades, phase variance and autocorrelation obs. 8=41436
radio, v.h.f. refraction by visible aurora 8=50170
relative magnitudes, determ. with differential astrophotometer 8=36933
rotating neutron with dipole magnetic field 8=45677
rotation, implications of vorticity expulsion by turbulence 8=45622
Schwarzschild singularity, at $r = 2m$ scatt. of massless scalar waves 8=36929
secular stability of chemically, inhomogeneous layers against nonspherical perturbs. 8=28050
self-gravitating stellar system with uniform rotation, stability of density waves 8=28037
shock propag. through hot and giant star envelopes, Brinkley-Kirkwood theory 8=45637
space-velocity vectors, bulletin (1962), criticism 8=45615-6
starlight, scintillation as detector of gravitational waves 8=37164
stellar wind, effects on radiative transfer, rel. to diffusion and ionization processes 8=41512
system stability rel. to velocity distribs. 8=50279
thermodynamic conditions in deep interior 8=32418
T Tauri, props. rel. to pre-main sequence stellar evolution 8=45639
Tr. 15, galactic cluster 8=32473
Tr22 and Ho17 open clusters, photographic magnitudes 8=50329
U Oph and R CMa binaries, eclipsing minima times 8=32470
UV Ceti type, flares nature, spectroscopy obs. 8=32441
u.v. object in Sagittarius, nature 8=45614
variable flare, new, of U Geminorum type, spectrum and periodicity 8=45693
variable, period-density calc., oscill. in phase space 8=45686
variables, eclipsing, epochs of photoelec. minima 8=36951
variables, long-period, 23, relative proper motions, from Leiden plates 8=36952
Vir A, X-ray spectrum rel. to optical 8=45775
white dwarf Hamada-Salpeter models, stability and radial vibr. periods rel. to pulsating radio sources 8=41545
white dwarfs, Hamada-Salpeter, oscillations including general relativistic effects 8=50325
white dwarfs, radial oscillation periods 8=41502
white dwarfs, rotating, pulsation periods 8=50324
Wolf-Rayet, excitation temp. calc. from C IV hydrogenic transitions 8=45661
Wolf-Rayet, wavelength dependent interstellar observation rel. to dust props. 8=36943
W Virginis, halo characts. 8=28038
Be, radial vel. rel. to galactic rot. 8=45735
He content and mass-luminosity relation of Hyades cluster, young stars 8=45697
He, H shells thermal instability 8=45624
composition
See also Elements/origin.
AO Cas, binary, atm. physics 8=32462
BD + 10°2179 He star, C content 8=28066
l Carinae atmosphere, H line profiles 8=50323
clusters, globular, heavy-element abundances 8=32480
early A, model atm. anomalies 8=32421
η Leo, supergiant, atmosphere 8=32427
γ Capricorni, abundance anal. with curve of growth tech. appl. to Conde mat. 8=32424
graphite grain form. by condensation 8=45645
HD 161817, high velocity star, oxygen abundance calc. from spectra 8=50282
HR774, BaII abundance and metal-iron ratios 8=45638
λ Boo, abundance ratio Mg/O calc. from i.r. spectra 8=50286
material exchange in atmospheres of contact binaries 8=50291
π 'Ori', abundance ratio Mg/O calc. from i.r. spectra 8=50286
Population II, He determ., test for gravitation theories 8=23858
red giants, Tc^{97} synthesis 8=45644

  austenitic stainless electrodes, brittleness at bonded part of welded joint with ferritic steel 8=31210
  austenitic stainless, irrad. hardening, substructure 8=49015
  austenitic stainless, growth in oxidising gases 8=45338
  austenitic stainless, growth of M_{23} C_6 carbide 8=39668
  austenitic stainless, stress corrosion cracking study by internal friction meas. 8=40159
  austenitic stainless weld metal solidification 8=48265
  austenitic, temp. cond. at 0° to 1000°C 8=39944
  austenitic 20% Cr/25% Ni/Nb-stabilised, structure of surface oxides formed in CO_2 at high temps. 8=41238
  ball bearing, fatigue crack propag. rel. to crack growth, electron microfractographical studies 8=35696
  carbon, hyper eutectoid, Cr diffusion coating 8=39973
  carbon, particle coarsening of FeC_x, 720°C and 675°C 8=30691
  carbon, u. s. attenuation, 20-800°C 8=30945
  cast austenitic, strength increase and grain size decrease by phase transform. on thermal cycling 8=35698
  cementite, dislocations 8=31075
  chromic, modulus of elasticity change at tempering 8=49003
  cladding with refractory metals, shock wave technique 8=28206
  cold-rolled, recrystallization texture, influence of phase transformations 8=39719
  corrosion by H_2S 8=35691
  corrosion in H_2SO_4, inhibition by $Na_3PMO_{12}O_{40}$, mechanism 8=45370
  corrosion in nitrate soln., stress effects 8=45335
  corrosion resistance of austenitic stainless steels in nitric environment, influence of Mo 8=49867
  crack initiation and propagation, influence of notches 8=35689
  creep at room temperature 8=40160
  deep drawn 1 mm sheet, bonded simple and constrained layers, acoustic damping characts. 8=35612
  deformation, discontinuous, grain size and C content effects 8=35682
  diaphragm, square, plastic deform. and failure 8=37155
  directionally solidified, microsegregation of Ni and Cr 8=39552
  ductility of mild annealed rimmed steel, effect of prior cold reduction 8=26817
  dynamic strain ageing, Charpy specimen behaviour 8=35686
  E 1702, γ'-phase precip. mechanism, holding time effects at diff. quenching temps. 8=35108
  EI 702, ageing mechanism 8=35100
  EI 702, η-phase, precip. mechanism 8=44008
  EI 702, γ' and η' phase precip. or dissoln. on ht. treatment 8=43998
  EI 702, segregation kinetics 8=35054
  electron probe microanalysis of particles, 2.8-30μ 8=30557
  embrittlement sensitivity to n irrad., depend. on uncombined N conc. 8=47405
  etching to determ. P segregation, comp. with autoradiography 8=30861
  exoelectronic emission during friction 8=44939
  fatigue crack propagation and fracture analysis rel. to environment 8=49008
  fatigue props., notch effect, specimen design and loading 8=35690
  fatigue tests of sharply notched mild specimens 8=26821
  with f.c.c. lattice of solid soln., internal friction peak 8=35678
  ferritic, brittleness at bonded part of welded joint with austenitic stainless steel electrodes 8=31210
  field-ion microscopy study 8=48596
  frames, in stability in elasto-plastic range 8=40156
  40KhN5S, properties, effect of programmed loading 8=49005
  high-carbon, martensite defect structure from e. microscope exam. 8=35272
  high-carbon type, heat transfer between liq. and solid crust on Cu wall cooled by water 8=30974
  high-strength cast steels, props 8=49016
  high-strength, fracture toughness dependence on thickness, work-hardening exponent effect 8=26766
  high tensile, stress-corrosion cracking 8=31212
  hot-rolled, properties and process control 8=48598
  ignition temp., min, rel. to O_2 press. and surface deform. 8=36578
  inclusion behaviour, non-metallic in 0.2%carbon steel during hot rolling 8=49020
  inclusions, their thermal expansion and reln. to tessellated stresses 8=44350
  liquid, C activity rel. to Co, Mo, Ni, V, W conc. 8=30458
  low C castings, effect of rare-earth additions on mechanical properties 8=49009
  low carbon, composite martensite, crystallographic theory 8=26175
  low-carbon, deformation and recrystallization textures, rolling temp. dependence 8=26818
  low C, strain age-hardening, time law 8=40158
  Luders front exam. by transmission electron microscopy 8=44449

Steel—contd
  magnetic properties ht. treatment dependence 8=45014
  martensite ageing in carbon-steels, microcalorimetric exam. 8=35105
  martensite crystals of high-C Cr steel, domains from e-microscope exam. 8=40805
  martensite strength, contributing factors 8=26815
  martensitic, tempered, optimum C content 8=35684
  martensite transformation, magnetic field effect 8=39554
  mass spectrographic analysis, using ion beam chopper 8=27779
  microplastic strain energy criterion appl. to fatigue 8=35688
  mild and high strength, fatigue crack propag. behaviour 8=35697
  mild, in chromate solutions, kinetics of film growth, effect of surface prep. 8=44039
  mild, corrosion in NaCl, transient charge fluctuations, obs. 8=45368
  mild, stress-strain curve, statistical examination 8=35692
  oblique impact of Cu–Ni specimens, meas. of temp. developed 8=32981
  octadecylamine desorpt. and exchange, obs. 8=30768
  particle size distrib. in dispersed phases 8=26295
  pearlite and spheroidite, dislocation velocity exponent from strain-rate change tests 8=35557
  pipe with water flow, corrosion, effect of velocity, mass transfer model 8=36560
  plasticity and mech. strength, e bombard. effects, 2.5 MeV 8=35694
  porous castings, behaviour of H rel. to defects, compared with wrought steel 8=30663
  powder formation of 18/8 stainless 8=43983
  quench-hardened, austenitic grain struct. formation 8=35110
  quench-hardened, tempering rel. to martensite decomp. C conc. effects 8=35099
  rectangular diaphragm, ultimate strength 8=37154
  reflectivity changes during laser pulse 8=45169
  reversible temper brittleness development rel. to C content changes in grain boundary regions 8=35683
  ridging formation in 17%Cr stainless 8=26810
  rosette, star, tensile fracture 8=35687
  segregation study by X-ray fluorescence technique 8=30860
  Snoek effect, orientation dependence 8=26747
  sonic and ultrasonic pulses during crack propagation 8=35415
  spectral emission anal., decomp. and inter-element effects 8=32156
  split, layered, cup and cone tensile fracture 8=35685
  stainless, austenitic, deformation, annealing, stacking faults, compositional effects 8=40157
  stainless austenitic, He embrittlement, 540–760°C 8=31213
  stainless, austenitic, mag. field effect on phase transforms, and entropy shock 8=39553
  stainless, craters and penetration holes after exposure to micrometeorites 8=41579
  stainless, dislocations in surface layers in cyclic deform., obs. 8=40035
  stainless, electrolytic and thermal corrosion, effect of Si content 8=45334
  stainless, electron microscopy at high voltages 8=41971
  stainless, explosive shock-loaded, thermal recovery 8=49004
  stainless-fracture micro-mechanisms 8=49012
  stainless, heat-resistant, thermal conductivity 8=39943
  stainless, n irradiation creep obs. at 100°C 8=26833
  stainless, oxide X-ray fluorescence analysis 8=41304
  stainless, pitting corrosion critical potentials 8=49928
  stainless, Polish, low temp. specific heat 8=48730
  stainless, reactor material, embrittlement due to He prod. in (n, α) reaction 8=47406
  stainless, u. s. attenuation, 20-800°C 8=30945
  stearic acid desorpt. and exchange, obs. 8=30768
  strain-aged, discontinuous yielding grain-size dependence 8=26809
  strain rate sensitivity and yield point behaviour 8=44571
  stress-corrosion cracking and grain boundary corrosion, effect of structure 8=44569
  stress-corrosion cracking in high-tensile steel 8=31212
  temperature meas. from heat prod. softening, Templugs, 70-850°C 8=24024
  tempering, e-diffr. exam. 8=35680
  thermal recovery of explosive shock-loaded stainless 8=49004
  three-phase core of cold rolled sheet, flux density distrib. in mag. knot. 8=46377
  transformer, annealing effects at high-temp and vacuum 8=35107
  transformer, change of blast-furnace structure in mag. field 8=40153
  transformer, hot-rolled, internal oxidation zone structure and props. 8=36562
  transformer, hot-rolled, oxidation at 800-1180°C, and structure of oxide films 8=36561
  transformer, mag. props. cubic texture perfection dependence 8=36140

Steel—contd
- 2062, vanadium carbides formation during austenite $\gamma \rightarrow \alpha$ transform. 8=35135
- U8, quenched, tempering under high hydrostatic pressures 8=35679
- ultra-high strength, fracture toughness, effects of microstructure 8=49010
- vanadium, diffraction pattern, isothermal transformation 8=39791
- vapour scintillation, emission spectrum time scanning 8=34231
- Youngs mod. of hardened steel, effect of austenite decomp. 8=31208
- Al-killed, low C, recrystallization and texture development 8=44129
- B content determ. from neutron flux depression 8=37100
- C, internal friction and fatigue mechanisms 8=26813
- C–Mn steel, creep under cyclic stress and temp. conds. 8=26822
- in CO$_2$, corrosion and excrescence form. mechanisms, low alloy steels, $\leqslant$ 550°C 8=32098
- in CO$_2$, simultaneous oxidation and carburisation rel. to transport in porous scales 8=48777
- 17%Cr stainless, ridging formation mechanism 8=26810
- 15%Cr–4%Al ferritic, effect of 0.5%Y on oxidation in CO$_2$ 8=27704
- Cr-Mo, CO$_2$ oxidation resistance, effects of chem. comp., mech. treatment and remelting 8=45339
- Cr–Mo–Co, R-phase precip., structure and comp. analysis 8=44001
- 12%Cr-Mo-V-Nb creep resisting, creep and creep-rupture data rel. to microstructure 8=44576
- 20%Cr–25%Ni–Nb stainless, effect of 0.5%Y on oxidation in CO$_2$ 8=27704
- 27%Cr, annealed, Guinier-preston zones rel. to brittleness 475°C 8=35273
- Cr-Ni/Nb stainless, CO$_2$ oxidation n-irrad. 580°-840°C obs. 8=27705
- Fe–Mn–C, c/a ratio variation during martensitic transformation, –196 to 20°C 8=35334
- Fe-24%Ni-17%Cr-2%Ti, creep, rel. to γ' (Ni$_3$Ti) particle size 8=49002
- Mn effect on corrosion 8=49866
- Mn effects on impact properties 8=35693
- Mn, $\gamma \rightleftharpoons \epsilon^1$ and $\gamma \rightleftharpoons \epsilon$ transforms. dilatometric and X-ray diffr. exam. 8=35114
- Mo–Mn, R-phase precip., structure and comp. analysis 8=44001
- Ni effects on impact properties 8=35693
- Ni, phase transforms., mag. field effects 8=30702
- 9%Ni, struct. and growth characts. of bainite 8=44002
- 18 Ni-9 Co-5 Mo maraging heat treatment in 520-700°C temp. range 8=44572
- NiCoMo, mechanical properties 8=49016
- Ni 25%-Cr 20%-Nb 0.7% stainless, precipitates comp., obs. 8=30805
- O content determ. by O^{16}(n, γ)N^{16} 8=32167
- Si steel, deformed crystals, coercive forces temp. dependence 8=36174
- Si-Mn, fatigue crack initiation and propag., previous austenitic grain size effects 8=44575

Stellar atmospheres. See Stars.
Stellar clusters. See Stars.
Stellar composition. See Stars/composition.
Stellar motion. See Celestial mechanics; Stars.
Stellar structure. See Stars/structure.
Stellarator. See Plasma/devices.
Stereoisomerism. See Isomerism.
Stereophonic sound. See Acoustics.
Stereoscopy
- photographic range-viewfinder 8=42283

Stimulated emission. See Lasers; Luminescence; Masers.
Stimulated Raman scattering. See Lasers; Raman spectra; Scattering/light.
Stochastic processes. See Probability; Random processes; Statistical analysis.
Stokes flow. See Flow; Hydrodynamics.
Stokes law, fluids. See Flow; Viscosity.
Stokes law, optical. See Luminescence.
Stokes lines. See Luminescence; Raman spectra; Spectra.
Stopping power. See Particle range.
Storms. See Atmosphere/movements; Magnetic storms; Thunderstorms.
Strain effects. See Deformation; Elastic deformation; Plastic deformation.
Strain gauges
- capacitive, for solid He^3 compressibility meas. 8=37358
- hand-held, for surface vibration meas. 8=41804
- high-temp. fatigue, diametral extensometer 8=35630
- magnetostrictive load cell for use under high hydrostatic pressures 8=40103
- photoelastic, Rosette factor rel. to strain, temp. and fringe order 8=26753
- plastic strain meas., hydrostatic ring 8=35619
- quartz, shorted guard-ring development 8=37110
- surface displacement, hologram interferometry 8=37713
- transducers effect of adhesives on sensitivity 8=48981
- transducer for pressure difference meas. 8=32642

Strain hardening. See Work hardening.
Strange particles
- decays, survey 8=24827
- $\Delta S = -\Delta Q$ selection rule, decay rates of K$^\circ$, $\bar{K}^\circ$, K$^+$, Σ^+, Ξ° 8=33696
- $\Delta S = 2$ leptonic decays rel. to $\Delta S = -\Delta Q$ decay rates 8=33696
- leptons, in currents for weak interactions 8=24708
- meson exchange, effect on cross-section for Λ prod. in K$^-$p at 10 GeV/c 8=33834
- neutrinos, Cabibbo theory 8=24708
- nuclear reactions, review 8=29483
- production 8=25004
- production from 17 GeV/c π^- in heavy emulsion nuclei 8=33837
- p-p collisions, 6.92 BeV/c, YN resonances not obs., $N^*_{3/2}$ (1236), Y^*_1 (1385) obs. 8=24916
- tachyons, faster than light, fractionally charged, exptl. search 8=42388

Strangeness. See Elementary particles; Field theory, quantum.
Stratosphere. See Atmosphere.
Streamers. See Discharges, electric.
Strength. See Electric strength; Mechanical strength.
Stress analysis
- See also Bending; Photoelasticity; Strain gauges; Torsion.
- axi-symmetric elastic solids with cavities inside, under loading or torsion 8=41666
- beam subject to bending, stress distribution round hole in web 8=23826
- biharmonic, numerical, and applications 8=37131
- body deforming under anti-plane strain, plastic relax. and spread from sharp groove 8=32766
- boundary layer following shock wave over semi-infinite plate in tube 8=28386
- buckling of plates and beams by Lagrangian multipliers method, incorrect results 8=41661
- cast iron with spherical graphite, notch impact and inpact bend strength, testing 8=49017
- circular hole in infinite plate, micropolar elasticity 8=32738
- composite material reinforced with discontinuous fibres, stress, strain and displacement fields 8=46049
- concrete, of creep characts. 8=44536
- in contact of rigid cylinder on elastic layer connected to rigid base 8=37139
- continuum, assoc. between stress and strain tensors 8=46047
- cosserat plate, stress singularities around crack 8=41698
- cosserat surfaces and shells, elastic, linear theory 8=41700
- couple-stresses, effects on singularities due to discontinuous loading 8=32733
- cubic yield condition for incompressible bodies 8=48961
- in cylinder, thermal stresses due to heating or cooling in medium with variable heat transfer 8=37321
- diaphragms, rectangular, ultimate strength under hydrostatic press. 8=37154
- dielectric rectangle reinforced with inextensible cords, flexure and deform. 8=23843
- disc, infinite, with elliptic hole, induced state by temp. decrease 8=32736
- dynamic elasticity, difference method 8=23849
- elastic body with couple-stresses, two-dimensional problem of equilib. 8=41686
- elastic circular cylinder, homogeneous, general soln. 8=41696
- elastic sheets, overlapping, bonded 8=41689
- elastic sphere in solid, uniformly stressed at infinity, contact stresses 8=23831
- elasticae, plane, extensible, general solns. 8=46043
- elliptic die press. on elastic half-space 8=32711
- fading memory of material, weak principle formulation 8=32707

- Griffith cracks, two coplanar, in infinite elastic medium 8=46042
- hollow cylinder with axisymmetric end loads 8=28264
- kinetic stress function determination in elastodynamics 8=46037
- laminated medium, edge buckling 8=41732
- line-loaded cylindrical shell 8=46034
- metal films, cubic, thermally induced strains 8=40122
- metal samples at 1.3°K, micromachine 8=48959
- metal working, microphotoplasticity techniques using laser systems 8=48954
- magnetostrictive composite rotating cylinder 8=28261
- mirror, parabolic, 4 m diam, elastic deformations by dynamic relaxation technique 8=41663
- mixture of two elastic solids, plane strain, linearized theory 8=32744
- noncircular rings under shear load 8=32720
- orthotropic circular plate, large deflection under concentrated load 8=32721
- plane stress theories for stretched plates 8=23848
- plane, upper bounds for breaking loads 8=23824
- plastic spherical sandwich shells subjected to hydrostatic press 8=41720
- plastic strain, iterative methods, convergence 8=41730
- plates and shells, use of hypergeometric functions 8=46038

Stress analysis—contd
  plate stability problem solution without preliminary determination of initial stress state 8=46031
  photoelastic, transmission-microscope polariscope 8=33283
  plate bending, triangular equilib. model 8=41660
  plates, circular, of hardening material, bending anal. 8=41727
  plate, thick stress state 8=46033
  in plate, with harmonic oscs. of temp. medium, calc. of thermal stresses 8=37160
  polystyrene melt, elastic behaviour 8=39261
  quartz plates, freq., stress depend. 8=49049
  radial nozzles in spherical pressure vessels, shakedown loads 8=32750
  in rate-dependent mats., anal. of time variation of strain grads. 8=23851
  Rayleigh functions, localized 8=37129
  rectangular plates, with cambered cross-sections, bending instability 8=37138
  rigid-plastic annular plate under dynamic loads, deflections 8=41811
  rods, general theory 8=37127
  sandwich plates, thermoelastic stability and thermally induced vibrations 8=46072
  sandwich tie/beam, optimum design 8=41659
  semi-infinite plate containing reinforced notch under uniform tension 8=41653
  in semilinear viscoelastic mats, of wave propag. after impact 8=32886
  rel. to shear modulus meas. in vibr. expts. 8=41810
  shells, helicoidal, axial extension and tension to rotationally symm. states 8=32734
  shells, linear theory, multivaluedness of stress functions 8=32718
  in shells of revolution, with symmetry about a curve 8=32713
  shells, shallow, multivaluedness of solns. 8=32719
  solenoid, bonded plain helical, elasticity 8=31166
  in solidification of infinite plate, tensile and compressive stress laws 8=39478
  solid-solution hardening in conc. solns., 8=48964
  solids, elastic, direct numerical determ., as shown by torsion problem 8=41702
  spherical caps buckled under conc. load 8=41697
  step load moving with superseismic velocity on surface of elastic-plastic half-space 8=32749
  stress-equilibrium and compatability eqns. body forces and arbitrary temp. fields effect 8=46023
  stress fields, solenoidal, general expressions 8=41681
  in thermoelasticity, stress function completeness 8=32775
  thick plate with cylindrical hole, thermoelastic eqns. 8=28279
  thin elastic layer, stress state properties 8=46029
  torsion, elastic-plastic, as problem in non-linear programming 8=41710
  twins, dynamic, rel. to deformation behaviour 8=48825
  two-dimensional frameworks, flexural, field solns. 8=32745
  viscoelastic materials, in rapid deformation 8=30376
  wave propagation in half-plane with boundary loading 8=37130
  window, rattling by sonic boom 8=46164
  X-ray analysers, portable, use in Boeing Co. 8=26754
  Cu-Cr alloys, stress rupture curves, 50-140°C, rel. to cavity formation, 8=48871
  KCl, critical shear, rel. to n- and γ-irrad. hardening 8=49037
  LiF ground powders, microstrains from X-ray diffr. line-broadening profiles 8=48600
  NaCl, critical shear, rel. to n- and γ-irrad hardening 8=49037
  Pb cylinders, compressive strain-time, strain-rate and dynamic force-time characts. 8=35711
  Si, thermally-induced, rel. to X-ray diffr. and birefringence obs. 8=49041
Stress effects
  ageing and strain ageing, terminology rel. to precip. phenomena 8=31162
  alkali metals, strained, phonon spectra 8=44296
  alloys, heat resistant, creep and fracture in creep, physical parameters, high temp. 8=26760
  alloys, strain excitation from exo-emission meas. rel. to defect props. 8=44938
  basalt and granite, strength, rel. to stress rate and temp. 8=48985
  b.c.c. and h.c.p. structures, activation volume relationship, cross slip energy 8=48963
  brass–NH_3 system, stress-corrosion cracking mechanism 8=35675
  α-brass, single and bi-crystals, rel. to corrosion cracking 8=26799
  brass, stress-corrosion cracking, mechanism 8=26798
  calcite, twin layer expansion, twinning and dislocation growth 8=31104
  central boss loading of rot. symmetric shells, limit anal. by numerical method 8=23840
  circular cylindrical shells, parametric instability, on in-plane longit. inertia loading 8=23821
  circular ring, radially constrained, instability due to thermal stress rel. to initial imperfections 8=23823
Stress effects—contd
  clamped plastic beam, anal. of permanent deform. considered as system of one deg. of freedom 8=23838
  corrosion cracking, rate controlling step 8=44534
  crack, elastic brittle, propagating, distrib. on extension surface 8=35634
  cracked plates, fracture 8=46025
  crystal point defect ordering, rel. to anelasticity 8=31027
  crystal of rock-salt structure, cyclic stressing 8=44518
  cylindrical elastic bars, suddenly loaded, stress and strain distribs. 8=23833
  cylindrical shell, orthotropic, stability to axial compression, bending moment and ext. press. 8=32752
  cylindrical shells, stability under axial compression due moving loads, soln. by Liapunov method 8=23822
  cylindrical shells, under lateral transient press., theory of dynamic pulse buckling 8=32712
  diffused structures, planar, strain effects, 8=48844
  dislocations, mobile, density and velocity, stress dependence from Lüders band front propag. velocity 8=31057
  dislocation movement through solid with dislocation pileups 8=40021
  dislocation segment bending and Franck–Read sources 8=44437
  elastic-plastic distrib. and fracture strength of notched bars 8=46058
  elastic waves in plates, prod. by impulse load on portion of edge 8=23834
  f. c. c. metals, fatigue mechanisms rel. to stress magnitude, ductility and texture 8=26772
  ferromagnetic films, uniaxially anisotropic, magnetization axis rotation under external stress 8=36131
  fibres, broken, in composite materials, load transfer 8=48975
  fracture in solids, invariant criterion, qualitatively correct 8=26770
  frame, two-member, non-linear buckling and snap-over 8=41655
  gas bubbles in solids, obs. 8=31108
  glass, residual, in heat treatment 8=26824
  gravitational stresses determ. using immersion analogy of Biot, generalization 8=23832
  Hastelloy, reactor material, stress-rupture due to neutron irrad. 8=47400
  h. c. p. metals, elastically strained, inner-displacement tensor 8=26406
  hollow dielectric, effects of polarization under extension, inflation and torsion 8=35947
  impact on finite elastoplastic bar, rel. to compression wave propag. 8=23934
  inclusion, circular, in infinite compressible medium, 2nd order elastic effects 8=23841
  mag. permeability induced by stress variations, instability study 8=49552
  metallic mats, localized peak stresses, meas. with thermo elastic effect 8=44517
  α-methylstyrene-methyl methacrylate copolymer, stretching effects, 125-150°C 8=49356
  microstrain and cyclic loading, surface effects 8=31170
  muscovites, shearing force anisotropy rel. to surface condition 8=44602
  polycaprolactam, photodegradation kinetics temp. dependence 8=45399
  polyethylene terephthalate, oriented, deformation bands 8=31244
  polyethylene terephthalate, photodegradation kinetics temp. dependence 8=45399
  polymer bonds, i.r. spectroscopy 8=43437
  polymer fibres, photodegradation kinetics temp. dependence 8=45399
  polymers, rel. to photodegradation kinetics 8=36619
  polymethylmethacrylate, laser destruction crack orientation 8=40191
  poly-n-butyl methacrylate in chlorinated diphenyl dilute solns. 8=39333
  polystyrene, laser destruction crack orientation 8=40191
  rigid-plastic bodies, surface of discontinuities of stress, relns. 8=48962
  rubber, crystallization, light scattering obs. 8=39682
  rubber, stretched, crystallization kinetics 8=39683
  in ruby piezospectroscopic studies of exchange-coupled Cr^{3+} pion pairs 8=27646
  rupture characts. of metals on basis of short-term creep data 8=44526
  silk, natural, photodegradation kinetics temp. dependence 8=45399
  steel, austenitic stainless corrosion cracking by internal friction meas. 8=40159
  Steel, corrosion in nitrate 8=45335
  steel, low C, strain age-hardening, time law 8=40158
  steel, mild, sharply notched, random and block-loading fatigue tests 8=26821
  steel, mild, stress-corrosion cracking and grain boundary corrosion effect of structure 8=44569
  steel, stainless, dislocation arrays under certain types of loading 8=40035
  superconductors, rel. to micromagnetic equations, derivation 8=35836

Stress effects—contd
- superconductors, type II, theory 8=40357
- tensor of finite length dislocation 8=48836
- turbulence, distortion of irrotational plane strain 8=39169
- understressing effects on fatigue strength, explanation 8=40114
- vicalloy strip, thermomechanical treatment effects in mag. props. 8=36135
- vicalloy in various structural states strained in tension, domain structure 8=40804
- Al alloy, 2024-T3, broad and narrow band random loading fatigue 8=44547
- Al alloy, yield surfaces, prestraining effect, exptl. study 8=40127
- Al, second-order strain accumulation, reverse cyclic torsion, temps. 8=40125
- Al, strain rate, during reversed loading 8=40128
- Al-Mg single crystals, flow stress 8=40123
- Al-Zn-Mg alloy, fatigue-crack propag. rel. to cycle freq. 8=44542
- BN, shear, and high pressure production of dense modifications 8=48374
- $BaTiO_3$, relaxation processes on subjecting to unidirectional mech. pressure pulses 8=35976
- BeO ceramics, extruded, residual, and grain deform. 8=44556
- C-Mn steel, creep under cyclic stress and temp. conds. 8=26822
- $CaF_2:Ho^{2+}$, g-factor stress dependence 8=31510
- CaF_2: Nd^{3+}, (U^{3+}) spin-lattice interactions in uniaxially stressed crystals 8=40912
- CdS, exciton splitting due to interactions between spins of e and hole 8=26920
- CdSe, exciton splitting due to interactions between spins of e and hole 8=26920
- CdSe, uniaxial, rel. to optical props. 8=36342
- Co crystals, tensile elastic strain effects on domain structure 8=36173
- Cu, crystal, n-irradiated, radiation hardened, critical shear stress temp. and strain rate dependence 8=31196-7
- Cu, cyclic stressing, shear modulus rel. to resistivity 8=40317
- Cu deformed crystals, flow stress gradient between surface and centre 8=26804
- Cu, heated in Zn vapour, weight increase due to Zn diffusion 8=35485
- Cu, on pore formation during creep 8=35524
- Cu, optical constants, uniaxial and hydrostatic strain dependence rel. to interband transitions 8=49724
- Cu, strain excitation from exo-emission meas. rel. to defect props. 8=44938
- Cu whiskers, plastic behaviour, thickness depend. 8=40148
- Cu-Al alloys, stacking faults 8=48868
- Cu_2O, absorpt. exciton lines, polarization effect 8=45185
- Cu_2O, uniaxial deform., change of bond energy of excitons 8=35790
- Fe, local stress relax. rel. to strain rate 8=35676
- Fe-0.025% N, enhanced aging due to γ-α transform 8=44577
- GaAs, electroreflectance, rel. to electronic structure 8=49725
- in GaP p-n junction I-V charact. 8=31403
- GaP p-n junction, on I-V charact., and simultaneous illumination effect 8=49288
- p-GaSb, piezoresistance dependence causing activation energy change 8=44776
- n-Ge, breakdown, elec. low-temp., uniaxial rel. to critical field 8=27104
- Ge, electroreflectance, rel. to electronic structure 8=49725
- Ge energy gap rel. to high uniaxial press. along main axes 8=27102
- Ge, mechanical, on diffusion path length of minority carriers 8=35889
- K, strain-dependent magnetoresistance 8=49166
- LiF, programme-hardened dislocation mobility 8=44450
- Mg-6 wt.% Zn-0.5 wt.% Zr alloy, diffusional creep with low strain rate sensitivity 8=26830
- $NaCl:Cu^+$, resonant bandmode freq. shift 8=48708
- Nb, rel. to dislocation-velocity, etching meas. 8=31085
- Ni crystals, stress-relax. meas., 77-350°K 8=40178
- Pb, creep at high temp., stress depend. of secondary stages 8=49043
- Pb, simple shear, flow rel. to grain size and boundaries 8=35713
- Pb, slip bands, orientation distrib. under pure shear 8=48864
- Pt-50% Co alloy, uniaxial mag. anisotropy induced by tempering under stress 8=31702
- RbCl, induction, effect on K-absorption 8=41132
- S_2^- centre in alkali halides, paraelastic behaviour rel. to opt. absorpt. bands 8=45173
- Si, electroreflectance, rel. to electronic structure 8=49725
- Si energy gap rel. to high uniaxial press. along main axes 8=27102
- Si masking films rel. to devices 8=49047
- Si-Fe crystals, tensile elastic strain effects on domain structure 8=36173
- Ta, on surface superconductivity 8=44739

Stress effects—contd
- Th, flow stress, effect of C content, 0.008 to 2.83 at % 8=44603
- $ThO_2:Yb^{3+}$, g-factor stress dependence 8=31510
- Ti alloys, corrosion cracking 8=27716
- Zn, rel. to twinning and slip by indentation at 5 kg loads 8=31056
- Zn, shear, mobility of edge dislocations 8=44457
- Zn, stress state required for pyramidal dislocation movement 8=40045
- ZnO, exciton splitting due to interactions between spins of e and hole 8=26920

Stress measurement. See Strain gauges.

Stress/strain relations
- See also Elastic constants.
- adiabatic strain-cycling and temp. rise model, dispersion relations appl. 8=40102
- ageing stress- and strain-, terminology rel. to precip. phenomena 8=31162
- alloys, calc. of critical resolved shear stress due to particles 8=40106
- alloys, critical resolved shear stress calc. 8=40105
- bars, thick straight, theory of bending 8=41664
- bonded joint adhesives, capacitive meas. 8=35639
- Burgers media, thermodynamic derivation 8=28260
- circular ring, radially constrained, stability when subjected to thermal stress 8=23823
- composite material reinforced with discontinuous fibres, stress, strain and displacement fields 8=46049
- crystals of rock-salt structure, cyclic stressing 8=44518
- in cylindrical shells under lateral transient press., rel. to dynamic pulse buckling 8=32712
- displacements and strains, finite element method 8=41677
- distributions in suddenly loaded cylindrical elastic bars 8=23833
- ferromagnetic solid with lattice imperfections, stress equation props. 8=48937
- glass-reinforced plastics, nonlinear deformation 8=31236
- hysteresis in microstrain regions, rel. to dislocation substructure and friction stress 8=26744
- iron and some alloys strain-rate sensitivity and temp. dependence of flow stress 8=44573
- Lüdens front number effect on yield point 8=32767
- mechanical deform. of elec. cond. mats, theories 8=26752
- membrane displacements and strains, finite element method 8=41677
- metals, f.c.c., internal friction rel. to strain amplitude 8=26742
- metal films, cubic, thermally induced strains 8=40122
- metal, strain ratio meas. method 8=35641
- metal, test behaviour and working props. 8=40087
- nonlinear, for isotropic, homogeneous material 8=41658
- nuclear canning material, tension-compression tests at elevated temp. 8=35628
- pavement, dynamic testing, mobile unit 8=32633
- plastic, matrix method 8=28258
- plasticity, statistical theory 8=40104
- polymers, local stress strains theory 8=31235
- Portevin-Lechatelier yielding, effect of grain size 8=44516
- rubber, in equilib. compression 8=31251
- steel, mild, logarithmic depend. for strains up to 5% 8=44571
- steel, mild, stress-strain curve, statistical examination 8=35692
- Torpin's strain-gradient theory, boundary conditions 8=41684
- in torsion of elastic cylinder welded to elastic half space 8=23827
- two-dimensional frameworks, flexural, field solns. 8=32745
- viscoelastic media, three-dimens. deform. 8=28275
- viscoelastic solid sphere, axisymmetric loaded, linear wave propag. 8=26750
- viscoplastic rods under impact 8=41724
- Zircaloy tubing, strain behaviour effect of texture on ansiotropy 8=26853
- Zircaloy-2, rel. to corrosion behaviour 8=26852
- Al, strain-rate depend. of ductile-brittle transition temp., in liq. metals 8=35657
- Al, third harmonic generation of sinusoidal stress wave, rel. to dislocations 8=44442
- Al-Cu alloys, aged, orientation effect on crit. shear stress 8=48991
- CaO, Fe group impurities, uniaxial stress meas., strain coeffs. 8=40134
- Co single crysts. rel. to slip and dislocation struct., 78-573°K 8=40138
- Cu, commercially pure, tension and torsion creep recovery 8=26805
- Cu crystal, n-irradiated, radiation hardened, critical shear stress temp. and strain rate dependence 8=31196-7
- Cu deformed crystals, flow stress gradient between surface and centre 8=26804
- Cu, initial dislocation substruct. influence on curves 8=44459
- Cu–58% Zn alloy, polycrystalline, in alternating microdeformation 8=35644
- LiF crystal, dislocation distrib. rel. to loading 8=31082
- Mg, textured, deform. rel. to plastic anisotropy 8=44587

Stress/strain relations—contd
Nb crystals, shear-stress strain-rate dependence, characterization 8=31220
Ni-17%Cr alloy, polycrystalline, in alternating microdeformation 8=35644
α-SiO$_2$ moduli changes in electric field 8=44600
Sn, stress and temperature, rel. to strain-rate 8=31232
Ta–Mo alloys, effect of Mo content 8=35718
Ta–Nb alloys, effect of Nb content 8=35718
Ti sheet, anal. of plastic anisotropy by crystallographic tech. 8=35721
W, rel. to dislocation substructures 8=44455
W–Re alloys, rel. to dislocation substructures 8=44455
W–3%Ta, rel. to dislocation substructures 8=44455
Zn sheet, anal. of plastic anisotropy by crystallographic tech. 8=35721
Zn–Al alloys, flow rate behaviour rel. to structure 8=40187
Zr, rel. to corrosion behaviour 8=26852
Stresses, internal
alumina (96%) rods, thermally conditioned, residual, and flexural strength 8=35659
ammonia crystals, relaxation 8=35708
α-brass, relax., 78–295°K rel. to dislocation behaviour 8=31193
α-brass, stretcher strains and discontinuous yielding rel. to grain size, obs. 8=40141
"blow-off" phenomena, laser-induced, ensuing stress pulses, obs. 8=40065
concentrated forces rel. to edge dislocations 8=48838
concentrations, dynamical, in elastic plate, effect of non-propagating wave 8=41694
cosserat plate, singularities around crack 8=41698
in crystal growing, theoretical investigation 8=26224
crystal plate, thermal, and plane temp. field 8=44355
crystalline solid, conc. at step on surface 8=48951
in deformation transmission through crystal by dislocation pile-up break-through mechanism 8=26661
dielectrics, transparent, constraints developed by luminous wave 8=27524
diffused structures, planar, strain effects 8=48844
rel. to dislocation linear array pile-up 8=31073
due to dislocation random distrib. 8=31165
in elastic anisotropic medium, field round elliptical crack 8=41706
elastic plates, dynamic concentrations 8=37150
elasticity, plane, depend on Poisson's ratio 8=41683
epitaxial films on mica and NaCl substrates, causing film curling 8=35157
epoxy resin, reinforced 8=31243
films, condensed, macrostresses form and classification 8=31164
films, vacuum deposited, residual stresses, X-ray diffr. obs. 8=44537
h.c.p. crystals, anisotropic, fields around edge multipole and multipole arrays 8=26795
inclusions in steels, their thermal expansion and reln. to tessellated stresses 8=44350
isotopes evolution model with crustal material recycling through mantle 8=36682
in magnetomechanical damping, distrib. effects 8=31568
in medium with microstructure, extension of dislocation continuum theory 8=44519
metal films 8=48953
metals, electrodeposited, effect of hydrogen 8=31167
optical indices, glasses in optical glass catalogue 8=41096
Permalloy film, rel. to ferromag. reson., obs. 8=31821
Permalloy films, ferromag. reson. obs. 8=31223
piezoelectric element, stress-pulse-activated, secondary stresses 8=40107
in plates, thin, flexure 8=37137
point and line defect movement in continuum theory 8=48952
rel. to Poisson's ratio anomalies after deform. and annealing, $\mu < 0.5$ 8=40095
polymer coatings, correl. with thermal props. 8=30759
residual, meas. using photoelastic gauge, approx. soln. for shear lag effect 8=41691
in reversing sliding, effect of surface-active lubricants 8=35617
semiconductors, mag., rel. to thermal and mag. induced optical absorpt. edge shifts 8=36299
shear-stress field of simple dislocation cell 8=44433
shells, shallow spherical, membrane and bending stresses 8=37141
solenoid, bonded plain helical, elasticity 8=31166
solids, ultrasonic meas. 8=31163
strain deformation, near crack tip in power-law hardening material 8=41717-8
strain field, X-ray determ. 8=26786
tetrahedral lattice, h.p. stress difference meas. 8=45943
thermal, in viscoelastic tube with temp. depend. props. 8=23855
Zircaloy-2, rel. to corrosion behaviour 8=26852
Zircalloy-4, irrad.-enhanced strain relax., 2.4×10^{14} nv > 1 MeV 8=35732
AgCl, plastically deformed, strain and dislocation exam. methods 8=26662
Stresses, internal—contd
Al films, grown by evaporation, rel. to elec. props. 8=44040
Al, rel. to stored energy at low temp. deformation 8=49000
Al-8.7 at.%Zn alloy, strain field, X-ray determ. 8=26786
Al–Ge solid solns., rel. to stacking faults in precip. 8=31096
BeO polycrystals, grains, subgrains and stress analyses 8=26291
Co electroless films, microstrain, obs. 8=44165
Co–Ni–Fe films, production parameter dependence 8=31192
Cu, rel. to stored energy at low temp. deformation 8=49000
Cu-2%Be alloy, diffuse striations obs. at 200°C rel. to strain-contrast effect 8=30859
Cu–Ni alloys, post-deformational, rel. to work hardening 8=31194
Cu–Si–Mn, relax. anomalies, 200-400°C 8=35668
Fe, degree of heterogeneity of local stresses from relax. meas. 8=35676
Fe films, condensed, macrostresses form. rel. to substrate temp., obs. 8=31164
Fe, residual strain distrib. 8=31214
LiF ground powders, microstrains from X-ray diffr. line-broadening profiles 8=48600
LiF, relax. during thermal processing 8=40167
Mo, dislocation velocity stress dependence at 77 and 300°K 8=26684
Ni, electrodeposited, process conditions rel. to microstrain formation 8=26298
Ni film, rel. to ferromag. reson., obs. 8=31821
Ni–Fe films, production parameter dependence 8=31192
Si, thermally-induced, rel. to X-ray diffr. and birefringence obs. 8=49051
SiO$_{2-x}$N$_x$ films on Si, comp. dependence rel. to chem. vapour deposition 8=48462
Si:P diffusion junctions, intense interjunction strain 8=49046
Si:P planar diffused structure, propag. through strain effects 8=48844
SrCl$_2$, coeffs from lattice constants meas. 26-294°C 8=39931
Zn, effect on basal dislocation mobility 8=44456
Zn twinned crystals, relax. at twin boundaries rel. to internal friction 8=35727
Zr, rel. to corrosion behaviour 8=26852
Zr–2.5 wt.%Nb–0.5 wt.%Cu, irrad.-enhanced strain relax., 2.4×10^{14} nv > 1 MeV 8=35732
Striations. See Discharges, electric.
Stripping reactions. See Nuclear reactions.
Stroboscopes
electron microscopy, stroboscopic scanning 8=33008
u.s., for acoustic vel. meas. 8=28373
u.s., for dispersion meas. 8=46197
vibration analysis by stroboscopic holography 8=23919
Strong interactions. See Field theory, quantum/interactions, strong.
Strontium
determination, by atomic absorpt. 8=45417
distribution between potassium feldspar and plagioclase simultaneously crystallized at 600°C 8=36627
isotope ratios in volcanic rocks of three island arc areas 8=32186
Sr^{90} as fission product on coated fuel particles, determination 8=47404
Strontium compounds
(Sr$_{0.4}$Bi$_x$La$_{0.6-x}$)MnO$_3$, structure, mag. and dielc. props. 8=26038
(Sr$_{1-y}$Bi$_y$)MnO$_3$, structure, mag. and dielec. props. 8=26038
(Sr$_y$Ca$_z$Ba$_x$)MgSi$_2$O$_8$, equilibria in subsolidus phases rel. to luminescence 8=49789
SrC^{14}O$_3$ powder, radioactivity meas. when insoluble in liquid scintillator counter 8=47278
SrCl$_2$, lattice thermal expansion, 26-294°C 8=39931
SrCl$_2$-H$_2$O, phase boundaries below 500°C 8=48366
SrCl$_2$-H$_2$O, phase boundaries to 40 kbar 8=39467
SrD, new u.v. absorpt. bands 8=43338
SrF$_2$, exoelectron emission, X-ray and thermo-stimulated, obs. 8=36040
SrF$_2$, formation energies of anion and cation point defects Born-model calc. 8=35540
SrF$_2$, Grüneisen parameter, low-temp. limit, calc. on Axe's shell model 8=48748
SrF$_2$, heat capacity, enthalpy and entropy 8=44339
SrF$_2$: paramagnetic impurities, n.m.r. of F^{19}, temp. and impurity conc. dependence 8=40974
SrF$_2$: Co^{2+}, absorpt. spectra temp. dependences 8=41076
SrF$_2$: Dy^{3+}, e.s.r. in cubic fields 8=36252
SrF$_2$: Eu^{++}, F^{19} spin lattice relax. time angular depend., 4.2, 77 and 300°K 8=36265
SrF$_2$: Gd^{3+}, e.p.r. spectral cubic splitting temp. dependence, 77-950°K 8=40909
SrF$_2$: Tb^{3+}, e.p.r. and spin-lattice relax., 8=40944
SrF$_2$: Y, X-irradiated, polarized luminescence and structure of luminescence centres 8=36478
Sr$_2$(FeMo)O$_6$, mag. ordering from n-diffr. studies 8=27436
Sr$_2$(FeMo)O$_6$, ordered perovskite, mag. and elec. props. 8=36195
SrH, new u.v. absorpt. bands 8=43338
SrHAsO$_4$. H$_2$O, haidingerites, cry. struct. 8=48641
SrNO$_3$, vibration freq. uniaxial pressure-dependence 8=39877

Strontium compounds—contd
  SrO, emission props. in BaO stream 8=27349
  SrO, i.r. bands 8=34237
  SrO, i.r. dielectric response rel. to lattice vibrations 8=41075
  SrO, x-irrad., thermoluminescence 8=41184
  SrO-TiO_2-SiO_2 systems, glass formation 8=44079
  SrO. $4Fe_2O_3$. $2Al_2O_3$ single crystal, magnetization process and reversal 8=31741
  $Sr_3(PO_4)_2$, phosphor for detection of vac. u.v. radiation 8=41179
  $Sr_3(PO_4)_2$: Tb, bluish-white emitting cathode-ray phosphor with long decay time 8=49813
  $SrRuO_3$, ferromagnetic props. 8=36177
  SrS, lattice thermal expansion, 30-273°C 8=39931
  $SrTi_{1-x}Fe_xO_{3-x/2}\phi_{x/2}$, prep., struct., and elec. props. for varying x 8=35252
  $SrTiO_3$, a.c. Hall obs., depend. of Hall mobility on charge-carrier density 8=31392
  $SrTiO_3$, acoustic wave generation by electrostrictive mixing of light waves 8=45162
  $SrTiO_3$, annealed, elec. double hysteresis 8=49376
  $SrTiO_3$ crystals, electro-optical effect, 23 to —183°C 8=36416
  $SrTiO_3$, electro-optical effect, temp. dependence 8=36414
  $SrTiO_3$, electrorefl. oscills. rel. to h. f. free-carrier mass 8=36415
  $SrTiO_3$, ferroelectric phase transitions, lattice-dynamical theory, elastic and dielectric anomalies 8=27284
  $SrTiO_3$ ferroelec. props. rel. to similarity transformations 8=49360
  $SrTiO_3$, ferroelectrically active vibration mode, 77 to —173°C 8=35984
  $SrTiO_3$, growth from molten salts 8=48559
  $SrTiO_3$, optical lattice vibrs. 8=44287-8
  $SrTiO_3$, optical props. near absorpt. edge 8=27609
  $SrTiO_3$, photoconductivity and Hall effect 8=40675
  $SrTiO_3$, photoconductivity, anomalous temp. dependence 8=27331
  $SrTiO_3$, photomagnetoresistance by dc method at 10°K 8=44976
  $SrTiO_3$, polarons, in anisotropic energy bands 8=49118
  $SrTiO_3$, press. depend. of dielec. consts. at low temp. 8=27283
  $SrTiO_3$, Raman spectrum down to 25°K 8=32035
  $SrTiO_3$, refractive index, temp. depend. 8=49708
  $SrTiO_3$, solid solutions, dielectric relaxation 8=49375
  $SrTiO_3$, superconductivity 8=27034
  $SrTiO_3$, thermal conductivity temp. and field dependence rel. to Cochran modes 8=26605
  $SrTiO_3$, 110°K phase transition, soft-phonon at corner of Brillouin zone 8=39564
  $SrTiO_3$:Fe^{57}, Mossbauer study rel. to iron sites in lattice and oxygen vacancies 8=43958
  $Sr_3Yb_2Ge_3O_{12}$, synthesis by precipitation in IM NaOH 8=48557
  $Sr_3(Yb, Lu)_2(OH)_{12}$, synthesis by precipitation in IM NaOH 8=48557

  S_2 formation after flash photolysis of CS_2, COS, NO in presence of inert gas 8=49956
  S_2, molecular spectrum, rare gas matrix effect 8=47618
  S_2^- centre in alkali-halides, paraelastic behaviour 8=45173
  S_2^-, paraelastic behaviour in KI 8=48336
  S II/III, e impact line broadening calc. 8=47507
  S_6, force and torsional consts. comparison with S_8 values 8=43332
  S_n, high-temp. vapours, photoionization 8=47791
Sulphur compounds
  bisthiourea $Cd(NO_3)_2$ atomic crystal structure 8=35324
  dithionic acid salts, rotatory dispersion and sp. rotation temp. dependence 8=27602
  metal thiocyanate molten solns., i.r. spectra 8=25934
  sulphate, atmosphere, particle size distribution obs. 8=50129
  sulphide polycrystalline ores, annealing effect on grain boundary movement 8=26843
  sulphospinels, binary, miscibility studies from x-ray diffr. and mag. props 8=30653
  D_2S_2, force field from i.r. spectra 8=43331
  HSO_3Cl solns. of simple bases, elec. cond. 8=48194
  H_2S and H_2S-Ar, thermal cond., 273-1173°K 8=47962
  H_2S, nonempirical SCF calc. 8=47596
  H_2S_2, force field from i.r. spectra 8=43331
  H_2SO, nonempirical SCF calc. 8=47596
  H_2SO_4. H_2O, H bonding rel. to crystal structure 8=26400
  SCN^-, ht. of formation 8=29980
  $S(CN)_2$ mol. force field and Coriolis coupling coeffs. Calc. 8=43333
  SF_5Cl, rotation spectrum at 8 mm 8=25515
  SF_5Cl, vibr. spectra 8=25516
  SF_6 arc plasma, transport props. from temp. meas. 8=39012
  SF_6, electron detachment in swarm conds 8=29978
  SF_6 hydrate, dielec. props. and n.m.r. 8=49342
  SF_6 injection into ionized Ar flow at high temps. 8=43478
  SF_6, mols. coherent excitation by lasers, photon echoes obs. 8=34282
  SF_6, rate of ionization by electron attachment, two-body process 8=43471
  SI, Fraunhofer solar spectrum, forbidden line $3p^4\ {}^3P_2$-$3p^4\ {}^1D_2$ obs. 8=50444
  SO molecule, $b\,{}^1\Sigma^+$—$X^3\Sigma^-$ band spectrum obs. 8=38852
  SO $B^3\Sigma^-$ - $X^3\Sigma^-$ system Morse Franck-Condon factors, r-centroids for 8=43336
  $SOCl_2$, rotation spectrum, 8=43335
  SO_2 and SO_2-Ar, thermal cond., 273-1173°K 8=47962
  SO_2 aq. soln., absorpt. spectra, 25°C and up to 6 kbar 8=48160
  SO_2, lifetime of lowest triplet state 8=38853
  SO_2, reactions with free ethyl radicals; 28-75°C 8=49848
  SO_2^- radical ion, e.p.r. investigation 8=38948
  SO_2, reactions with free methyl radicals, 25-164°C 8=49847
  SO_3+F_2SO_3, reaction kinetics 8=45333
  SO_3^- free radicals optical spectrum from photolysis of dithionate ions in soln. 8=49957
  SO_4 ions in water from lakes and rivers, O isotope meas. 8=50095
  SO_4^{2-}, vibr. spectra in cryst. $M_2^IM^{II}(SO_4)_2$. $6H_2O$ 8=27601
  $S_2O_6F_2 \rightleftarrows 2SO_3F\cdot$ free radical equilib. in gaseous state, e.s.r. 8=47711
  $SPClF_2$ vibr. spectra 8=25517
  $SPCl_2F$, vibr. spectra 8=25517
  $SPCl_3$, vibr. spectra 8=25517

limb intensity var. rel. to temp. gradient in low chromosphere 8=37089
line profiles, λ 4281-4302Å, rel. to distance from disc centre 8=32572
Lyman-α emission line, solar chromospheric fine structure 8=45916
magnetic field fine structure, velocity, intensity 8=45902
measurement in 1-3.5 μ range at altitudes below 18 km 8=45873
moustaches, metallic emission lines 8=32574
photosphere, lower, hydrodynamics obs. 8=32593
photospheric, around 6708Å, and Li abundance 8=45865
photospheric intensity, velocity and magnetic fields relationship 8=45903
radio burst, 23 May 1967, flux density obs. 8=45884
red shift, Compton effect interpret., predict of variation with position 8=41582
sight-line vel. signal variations from photosphere rel. to atmos. seeing 8=41591
simulation by θ-pinches in million deg. range 8=39109
soft X-ray, 33-110Å obs. 8=32575
spectrogram, granulation 8=37043
stigmatic, between 1800 and 2800Å 8=37046
synthesis for determ. of element abundances 8=45872
two-colour surface inhomogeneity differences 8=45868
velocity fields, short period oscs., possibly caused by local seeing conds. 8=41583
X-ray, below 25Å, rel. to solar activity 8=37051
X-ray, soft, and XUV 8=45880
CN red system vibr. band oscill. strengths, and equiv. widths meas. 8=45867
CO fourth positive system in u.v., obs. 8=45870
C_2, centre-limb vars. rel. to polyatomic mols. form., calc. 8=45875
Ca II in sunspots, K_3 absorpt. line rel. to origin of K-line emission 8=28178
Ca II, K-line in sunspots 8=50453
Ca II solar line, centre-limb var. of $K_{2,3}$ components calc. 8=45878
Cr I and II gf laboratory values, appl. computed solar abundances 8=29611
Ga abundance from sunspot obs. 8=32573
Hα-line, rel. to velocity field round sunspots, at chromospheric heights 8=28184
H emission spectrum, computation 8=45876
HNO_3 and NO_2, absorption in lower stratosphere 8=27877
H profiles photometric obs. 8=37042
He II λ 4686 line in quiescent prominences, excitation 8=28179
K profiles photometric obs. 8=37042
Na, Al, P, S and K, absorpt. lines 8=28172
Ne I and Ar I isoelectronic sequences, resonance line strengths 8=45871
Ne IV-VIII, emission lines obs. and abundance determ. 8=50443
O i.r. triplet, depth of origin in facolae and photosphere obs. 8=45892
O1 forbidden lines wavelengths and equivalent widths, O abundance obs. 8=37044
PbI 7229 Å line and solar abundance 8=45866
S ions, oscillator strengths for resonance lines 8=29647
SI Fraunhofer forbidden line $3p^4\ ^3P_2$-$3p^4\ ^1D_2$ obs. 8=50444
Si ions, oscillator strengths for resonance lines 8=29647
Si I lines, for abundance determ. 8=28173
Si1 absorption lines, 2935-25578Å, equivalent width calc. 8=37048

Sunlight
See also Sky brightness.
outgoing radiances from earth-atmos. system inverted rel. to cloud amounts 8=41361
polarization of skylight, effect of conc. turbid layer 8=36743
radiation intensity var. in sun's vertical for different vapour stratifications 8=27901
reflection and transmission by clouds, depend. on single scatt. albedo 8=32230
scattering into planetary shadow cones, effect on appearance 8=41562
solar constant of radiation, new value 8=27905

Sunlight—contd
surface diffusive radiation flux under cloudy conditions 8=27903
O_3 absorption coefficient, Dobson spectrophotometer obs. 8=45465

Sunspots
activity and brightness of Jupiter's great red spot, correlation 8=41594
activity and geomagnetic storms, 1966 8=28176
activity, increase, early effects on earth's atmosphere at 1000 km 8=41386
complex group, Evershed vel. and mag. field 8=32596
cycle rel. to quasi-biennial stratospheric oscillation 8=27884
effect on F-region drift speed 8=28175
electrical conductivity 8=37066
Evershed motion 8=45901
Evershed motion origin, and growth rate of mag. config. 8=41593
frequency, min. and maxima, secularly smoothed data 8=28185
geomag. Sq semi-annual amplitude vars. rel. to spot number 8=28010
groups, sizes of local sources of radioemission at 4.5 cm 8=32581
magnetic field fine structure, velocity, intensity 8=45902
mag. fields rel. to cosmic ray flares 8=32599
magnetic field, spectrogram meas. 8=32598
max. and min. effects on density scale height 8=27933
new, longit. distrib. at start of 11 year cycles 8=45898
number, relation with charged particle density in upper ionosphere 8=32293
observations (July-Sept. 1967) 8=32570
penumbra m.h.d., horiz. radial field and mag. amplification 8=41592
penumbral material motion, and Evershed effect 8=45899
photospheric intensity, velocity and magnetic fields relationship 8=45903
and S_D mag. vars. at Yakutsk 8=36892
solar activity and brightness of Jupiters great red spot, correlation 8=45829
spectra, high dispersion, Li abundance calc. 8=50452
structure, Wilson effect obs. 8=37068
surfaces, time autocorrelation 8=50454
Umbra convective instability and overstability 8=37067
umbra, model for narrow range of electron press. at spot surface 8=28177
umbra, normal triplet, π component saturation effect 8=45895
umbral dots, lifetime and intensity obs. 8=45896
velocity field at appearance stage 8=32597
velocity field at atmospheric heights, from obs. of Hα line spectra 8=28184
Zeeman triplet appl., magneto-sonic wave effect 8=37070
Zeeman triplets, shape of line profile and line intensity compared 8=50310
zonal activity duration 8=37069
Ca II, K-line 8=50453
Ca II K-line, K_3 line rel. to double reversal and origin of emission 8=28178
Ga abundance from spectra 8=32573
Li abundance calc. from high dispersion spectra 8=50452
TiO lines equivalent widths calc. 8=37065

Superconducting materials and devices
See also Magnets.
alloys, dil. mag., behaviour in applied mag. field 8=27004
alloys, dilute, with paramagnetic impurity, formulation and appl. 8=40366
amplifier, parametric, for d.c. voltage meas. 8=31347
applied superconductivity, conference 8=31338
beam handling and accelerator structures, progress since 1966 8=37806
carbides, anomalous props. 8=49191
characterization parameters 8=40363
coaxial line, frequency and domain analysis using two-fluid model 8=40409
composite strip conductors for large magnets in Argonne and Brookhaven bubble chamhers 8=42349
conductors, stabilized for superconducting bending magnet 8=27001
conductor-substrate systems stability params. and heat transfer, obs. 8=27002
cryoelectric arrays, dynamic fault tolerance 8=40408
cryoelectric content-addressable memories using flux-shuttling non-destructive readout 8=40403
cryoelectric storage element: anisotropic structured cell 8=40405
cryogenic storage cell, multi-aperture 8=40404
current leads, determ. of heat flux along leads to cryostat with liq. He 8=31361
current loops, magnetic levitation 8=28522
domain struct. config. 8=48577
double Josephson junction, phase-sensitive detection of small d.c. voltage 8=46321
echo phenomena in superconductors and normal metals 8=40364
filamentary, synthetic, magnetization and critical current density temp. and field dependence 8=40370
film, modulated flux flow 8=27043

Superconducting materials and devices—contd
  films for radiant-energy detection, microwave-near i.r. 8=37299
  films, superposed, superconductor-superconductor, metal-superconductor, critical magnetic field 8=35846
  films, thin, field effects 8=27007
  films, thin, superconducting and ferromagnetic, proximity effect 8=27008
  films, thin, superconducting and normal, zero-field proximity effect 8=27006
  films, ultrathin, enhanced transition temp. phenomena 8=40400
  flux pumps and transformers for d.c. current storage 8=41931
  flux quantization ammeters 8=40410
  generators, homopolar d.c., high-efficiency 8=37372
  gravimeter 8=31352
  gravimeter 8=50013
  gyroscope, drift data and mathematical model 8=23820
  gyroscope for relativity verification 8=29000
  high-field, and commercial alloys, review 8=49187
  high-temperature superconductors 8=40376
  inductor, modulation by mag. field, appl. 8=31348
  interference, quantum, in resistive state 8=49203
  Josephson barrrers, prep. using glow discharge technique and performance of arrays 8=40414
  Josephson-effect far i.r. detector 8=46225
  Josephson junction, a.c. interaction with surface plasmons 8=27048
  Josephson junction, millimetre-wave mixing 8=27047
  Josephson junction, switching appl. 8=27040
  Josephson junctions, fluctuation phenomena, quantum-field theory 8=27050
  Josephson junctions, quantization and thermodynamic fluctuations 8=27041
  Josephson junctions in series, supercurrent tunnelling studies 8=27049
  Josephson junctions, I–V characts. 8=40395
  Josphson junctions, weak multiply connected, freq. conversion 8=40416
  Josephson tunnel effect in anisotropic superconductors with non-magnetic impurities 8=27046
  Josephson tunnel junctions, current fluctuations 8=27042
  Josephson tunnel junctions, plasma reson., obs. 8=35858
  Josephson tunnelling and quantized phase effect 8=27051
  junctions, weak-link, d.c. I–V characts., a.c. impedance effect 8=40397
  magnet, apparatus for high-field low-temp. magneto-thermodynamic props. 8=41882
  magnet coil, high-homogeneity tape-wound 8=37397
  magnet coils, meas. techniques 8=37396
  magnet fabrication from many mats. 8=37386
  magnet, field meas. by magnetoresistor 8=41938
  magnet for ANL 12-ft hydrogen bubble chamber 8=37802
  magnet for focusing accelerator beam 8=33404
  magnet for polarized π-p scatt., and semi-stabilized cable props., 400 kJ 8=28529
  magnet, high-current-density, high-field, stabilization 8=37389
  magnet, high-field (up to 20 kG) 8=37393
  magnet, peak return field, optimal winding 8=28524
  magnet rings, stabilized, levitated 8=37395
  magnet system, 88-kG, 20-in-bore 8=37391
  magnet system in pulsed MHD generator 8=37376
  magnet systems, nonaxisymmetrical 8=37388
  magnet, using Nb Zr alloy wire, 85KG 8=46385
  magnets, construction, state-of-the-art 8=46387
  magnets, degradation effects, method for reduction 8=46386
  magnets, coil, future development 8=33050
  magnets, degradation and stabilization 8=28527
  magnets for beam handling and accelerators 8=28995
  magnets for high-energy physics 8=24113
  magnets for high-energy physics 8=37385
  magnets, high-field, for use in Mössbauer spectroscopy 8=37387
  magnets, permanent and solenoids, with ferromag. pole pieces, optimum design 8=28525
  magnets, pulsed, for p synchrotrons 8=29010
  magnets, review of behaviour 8=28526
  for magnetic flux change enlarging 8=44745
  magnetic structs., high-res. magneto-optical obs. 8=31336
  magnetizing coil optimum shape 8=28531
  magnetometer, supercond. loop 8=28511
  meander lines 8=40411
  metal, conductivity increase near critical temp. 8=35843
  metal-superconductor superimposed films, transition temp., numerical soln. of eqn. 8=27011
  microwave cavity appl. 8=31350
  microwave mixer with weak coupling 8=31351
  nitrides, anomalous props. 8=49191
  n.m.r. spectrometer, high-resolution, Du Pont instrument general performance information 8=46517
  with nonmagnetic impurities and overlapping bands two-band model 8=44720
  oscillator, microwave monotron with superconducting cavity, freq. stability 8=27012
  oscillator with u.l.f. stability using superconducting cavity 8=46466

Superconducting materials and devices—contd
  persistent current magnetometer 8=31355
  phonon spectrum and e.-phenon interactions in calc. props of simple metals 8=44719
  photodielectric detector using superconducting cavity 8=40681
  point-contact junction i.r. detector 8=31357
  point-contact junction detector for r.f. oscillations 8=31356
  power sensor, high-sensitivity 8=40415
  pressure contacts 8=40417
  for proton synchrotron magnets, supercond. energy storage system 8=29011
  quantum interference, for strong mag. field meas., shielding 8=31349
  rare-earth magnet pole-pieces for field enhancement 8=28530
  resistance of current-carrying filament, no mag. field 8=27045
  resonant cavities in linear accelerator 8=29000
  resonant circuits in oscillators and filters 8=40413
  resonator-solenoid 8=49208
  resonators for linac, construction 8=46995
  review 8=27003
  semiconductors, acoustic dispersion theory 8=35403
  shielding, mag. for He^3 nucleus elec. moment meas. 8=29000
  solenoid, composite, partially stable 90 kG 8=37394
  solenoid, field calibration, n.m.r. probe 8=31360
  solenoid, flux linkage and self-inductance, rel. to self-excitation 8=31354
  solenoid for meas. of magnetostriction at low temps. 8=45000
  solenoid, for meas. of magnetostriction at low temp. 8=49507
  solenoid, 88-kG, 51-cm-bore diam. 8=37390
  solenoids with high homogeneity mag. fields 8=28528
  stabilized compound conductors, flux flow and thermal stability 8=40402
  stabilized, theoretical and expt. I-V characts. in transition region 8=40377
  strip delay line, 50nsec delay 8=49206
  strip transmission lines with periodic load, characts. 8=49205
  structures, self and mutual inductances 8=27009
  superconductor-metal-superconductor junction, phase dependent current density 8=49204
  superconductor-normal metal sandwich (Cooper pair), reduction in spin flip breaking 8=49502
  switches, automatic 8=37363
  thermodynamic and electronic props. of supercond. with nonmag. impurity 3=39901
  thermometer, manufacture 8=46272
  tunnel junction for 1m° thermometry 8=31358
  tunnel junctions, excess currents rel. to multiparticle and subharmonic tunneling 8=44746
  tunnel junctions in circuitry of electronic grey matter 8=40407
  tunnel, radiated freq. band width rel. to quantum fluctuations 8=31346
  tunneling junctions, application as negative resistance devices above 4.2°K 8=49207
  tunnelling cryotron flip-flop 8=40406
  tunnelling, device appls. 8=40398
  tunnelling Ti-doped, magnetic field splitting of conductance peaks 8=40396
  voltmeter using Josephson junction props. 8=31353
  volume expansion for very low mag. field 8=28513
  weak-link and tunnelling phenomena rel. to potential device appls. 8=40399
  wires as exciting coil in magnetic lenses of electron microscope 8=24146
  Al amorphous film, tunnelling obs. 8=40368
  Al, energy gap temp. variation, from thermal cond. meas. below 1°K 8=30988
  Al films, diffusion of impaired electrons obs. 8=40212
  Al films, granular, prep. and enhanced T_c value 8=27013
  Al, props. calc. from phonon spectrum and e.-phonon interactions 8=44719
  Al, quasiparticle recomb. time, temp. depend. obs. 8=35847
  Al, thin film, unique energy gap obs. 8=35845
  Al, u.s. absorpt. rel. to min. energy gap 8=40367
  Al-Ng alloy, energy gap anisotropy and sp. ht. 8=48734
  Bi amorphous film, tunnelling obs. 8=40368
  Bi eutectic alloys, metastable 8=44722
  CdS film sandwiched between superconductors, photosensitive tunneling 8=35848
  Cu layer on Pb, proximity effects, microwave study 8=27015
  Cu–Nb_3Sn-stainless steeel, non-symmetric composite conductors mech. and elec. props., obs. 8=27014
  Cu-Pb alloys, magnetization meas. rel. to microstructure 8=44723
  Ga amorphous film, tunnelling obs. 8=40368
  Ga, β and amorphous phases, energy gap 8=40369
  HfN, f.c.c., transition temp. stoichiometry and lattice parameter dependence 8=27022
  (Hf, Zr)N solid soln., f.c.c., transition temp. stoichiometry and lattice parameter dependence 8=27022
  In films, props. rel. to degree of crystal lattice distortion 8=35849

Superconducting materials and devices—contd
In, non-Londonean resistance jump 8=40371
In thin films, critical mag. field rel. to structural disorder and defects 8=40382
InAl films, Tomash oscillations in density of states 8=40358
InBi film, Mn layers on each side, proximity effect obs. via thermal conductivity 8=40372
In-Ce solid solns., T_c impurity (Ce) conc. dependence rel. to localized moments 8=31339
In-7.05 wt.% Pb alloy, type II, sp. ht. rel. to irreversibility effects on Maki's parameters 8=44342
In-Pb alloy, upper crit. field, temp. and mean free path depend. 8=31340
In-Pb alloys, type II, comparison with Caroli-Cyrot theory 8=39946
In-Pb films, Tomash oscillations in density of states 8=40358
K, props. calc. from phonon spectrum and e.-phonon interactions 8=44719
La, thermal expansion and magnetostriction, 1.5-40°K, rel. to transition temp. pressure dependence 8=35438
La, tunneling density structure of states 8=35850
La_3Se_4, transition temp. rel. to lattice and electronic props. 8=27017
MoC, upper critical field at 4.2°K 8=27018
Mo_2C, upper critical field at 4.2°K 8=27018
M_3X-type, spin-lattice relax. rel. to energy band structure 8=36257
Na, props. calc. from phonon spectrum and e.-phonon interactions 8=44719
Nb, a.c. losses near lower critical field 8=44727
Nb alloy, instability, source 8=49198
Nb alloys, critical current rel. to mag. field and temp. 8=49199
Nb, anomalous magnetic behaviour 8=27383
Nb, extended defects, influence 8=49193
Nb, microwave surface resistance meas. 8=49195
Nb in mixed state, rel. to crystalline orientation 8=35852
Nb, Nernst effect rel. to magnetic field 8=40374
Nb, n-irradiation effects ($E > 1$ MeV) 8=40379
Nb, peak effect rel. to dissolved oxygen clusters 8=49192
Nb, proximity effect in contact with Cu and Ni 8=27026
Nb, resist. and magnetization, n-irrad. effects, obs. 8=40373
Nb, resistive elec. field and Hall effect meas., 8=44724
Nb single crystal, anisotropic energy gap obs. 8=27023
Nb, tunnelling characteristic detail in high purity single crystal 8=27025
Nb, type II, spin-lattice relaxation 8=41005
$Nb_3(Al, Ge)$, β-tungsten phase, high-transition-temp., props. 8=40376
$Nb_3(Al, Ge)$, high mag. field characts. 8=44726
Nb_3Al-20% Nb_3Ge, sintered, critical temp. increase by annealing obs. 8=27019
NbC, f.c.c., transition temp. stoichiometry and lattice parameter dependence 8=27022
Nb-Ga system 8=49197
Nb, K_1 and K_2, theory/expt. discrepancy 8=31342
Nb-N, peak-effect temp. dependence, 4.2-1.35°K 8=40378
Nb-Sb alloys, mag. hysteresis at 4.2°K 8=27024
$NbSe_2$, band model calcs. 8=49105
Nb-Sn alloy, mag. hysteresis, causes 8=44972
Nb_3Sn composite ribbon magnets, transient stabilization 8=37392
Nb_3Sn-composites transition temp. rel. to hot pressing, particle size and admixtures 8=49190
Nb_3Sn, hard tubes, mag. flux jumps, 4.2°K 8=31341
Nb_3Sn high-Q r.f. coils for 15°K 8=31359
Nb_3Sn ribbons, vapor-deposition rel. to e.m. performance 8=40418
Nb_3Sn, sintered, flux jumping control by liquid He flow through pores, obs. 8=27020
Nb_3Sn strip conductor, plasma-plated, critical current angular dependence 8=40420
Nb_3Sn, superconductivity changes on H_2 up-take 8=26414
Nb_3Sn, transition temp. rel. to hot pressing, particle size and admixtures 8=49190
Nb_3Sn-Cu-steel composite conductors, e.m. performance and mech. props. 8=40401
Nb_3Sn; ZrO_2 particles, performance rel. to microstructure 8=44728
Nb-Ta alloys, Nb rich, K_1 and K_2, theory/expt. discrepancy 8=31342
Nb-Ti alloy, at transition temp., temp. depend. of specific heat 8=48738
Nb-Ti alloy, critical temp. and current density 8=35853
Nb-50%Ti rods, flux jumps 8=49194
NbTi strips, flux flow state stability 8=44725
Nb-40% Ti, Cu-clad, stabilization, I-V characts. rel. to theory 8=40377
Nb-45 wt.% Ti and Cu composite conductor for large currents 8=27021
Nb-Ti-N films, reactively sputtered, props. rel. to comp. 8=40380
Nb-Ti-Zr alloys, critical mag. fields 8=35851
Nb and V in mixed state, nonlinear resistivity and dissipation 8=27027
Nb-Zr alloy, flux jumps at liquid He temp. 8=49189

Superconducting materials and devices—contd
Nb-Zr alloys, type II, spin lattice relaxation times 8=44744
NbZr coil magnet, effect of neutron radiation 8=33405
Nb-Zr, hard tubes, mag. flux jumps, 4.2°K 8=31341
Nb-Zr25, type III, lattice defects, nature, size and distrib. and effect on high-field props. 8=48828
Nb-25% Zr solenoid, persistent current decay rate, field dependence 8=27039
Nb-25% Zr tubes, flux jumping rate dependence 8=40375
Nb + 75% Zr magnet for 85 kG 8=41937
Nb-Zr, type II, spin-lattice relaxation 8=41005
Nb-Zr-N films, reactively sputtered, props. rel. to comp. 8=40380
Nb-25%Zr wire, meas. of a.c. surface power loss 8=49196
Pb-base alloys transition temps. 8=44729
Pb, complex elec. cond., strong-coupling calc. 8=35854
Pb, dislocation attenuation mech. rel. to amplitude-independent u.s. attenuation in normal-state 8=44321
Pb, dislocation attenuation mechanism rel. to amplitude-independent u.s. attenuation 8=44322
Pb films and foils, parallel and perpendicular mag. transitions, 1-4.2°K 8=40741
Pb, props. calc. from phonon spectrum and e.-interactions 8=44719
Pb shell, zero mag. field attainment 8=27044
Pb, surface resistance meas. at 2.868 GHz 8=40383
Pb thin films, critical mag. field rel. to structural disorder and defects 8=40382
Pb, tunnel effect under pressures up to 15kbar at 1.3°K 8=44737
Pb thin films, transition, critical fields 8=27028
Pb-Bi alloys, mag. field spatial distrib. and crit. current density 8=40381
Pb-Bi alloys, pinning of flux vortices 8=49200
Pb-Bi system, transition temp. of amorphous phase 8=35844
Pb-In alloy, intermediate state structures, transition from flux lattice 8=44731
Pb-6.3 at.% In foils, type II, flux line arrangement 8=40384
$Pb_{85}In_{15}$ resistive and mag. props., demonstration 8=35855
Pb-Tl alloys, critical currents 8=40385
Pb-Tl alloys, transition temp. comp. dependence 8=44730
in PdSb, dilute solutions of CrSb and MnSb 8=27029
Re, energy gap temp. variation, from thermal cond. meas. below 1°K 8=30988
Sn, coherent coupling of two Josephson junctions 8=44733
Sn, complex elec. cond., strong-coupling calc. 8=35854
Sn film, electron tunnelling, current influence 8=31343
Sn film, tunneling expts in mag. field 8=44732
Sn films and foils, parallel and perpendicular mag. transitions, 1°K-T_c 8=40741
Sn films, clean and dirty, critical mag. field 8=44734
Sn films, energy gap mag. field and film thickness dependence by e-tunnelling 8=27033
Sn films, microwave transmission meas. 8=40386
Sn, helicon-like oscillations 8=44736
Sn, magnetoresistance at liq. He temps. and over large range of mag. fields 8=27031
Sn, particles in oxide film, obs. down to 25Ǎ radius 8=40388
with Sn particles, layered with SiO, size effects in n.m.r. 8=44735
Sn ring, current fluctuations and critical currents as a function of temp. 8=40387
Sn, thin films, hyperfreq. nonlinearities 8=27030
Sn II, modification, critical field plots 8=35856
Sn with Al admixtures 8=40389
Sn-Ce solid solns., T_c impurity (Ce) conc. dependence rel. to localized moments 8=31339
Sn-In alloy films, tunneling expts. in mag. field 8=44732
Sn-In films, mag. props. 8=44974
Sn-Sn tunnel junctions, anomalous behaviour at superconducting transition 8=44738
Sn-SnO-Sn Josephson junction, relax. oscills. 8=40412
Sn-SnOx-Pb junction, electron tunnelling, current influence 8=31343
SnTe, interactions 8=27032
$SrTiO_3$, behaviour of $T_c(n)$ 8=27034
Ta, energy gap temp. variation, from thermal cond. meas. below 1°K 8=30988
Ta, surface prop., strain and impurity effects 8=44739
TaC, f.c.c., transition temp. stoichiometry and lattice parameter dependence 8=27022
Ta-Nb alloys, $K_1(t)$ and $K_2(t)$ meas. rel. to temp. 8=44740
Tc, $\partial T_c/\partial P$, sign rel. to other transition metals 8=31344
Th, gapless, critical-field curves 8=44741
Th-Gd alloys, critical-field curves 8=44741
Ti-16at.% Mo alloys, type II, mixed-state Hall effect 8=27035
Ti-47% Nb, α-phase formation during heating in e-microscope 8=35119
Ti-22 at.% Nb/Cu composite conductors, critical current densities rel. to omega precip. 8=40419
TiNb33:N, O and metals, transition temp. and critical field 8=44742
TiNb40:N, O and metals, transition temp. and critical field 8=44742
TiO, dependence on lattice vacancy conc. 8=31345
Tl, density of states and phonon spectrum by electron tunnelling 8=44743

Superconducting materials and devices—contd
- Tl, transition temp., effect of impurities 8=49201
- Tl_5Te_3, γ-phase in Tl–Te system, transition temp., 2.19°K 8=40390
- Ti-V alloys, critical current densities rel. to ht. treatment 8=40391
- α-U, filamentary, impurity effects 8=49202
- U_6M, (M = Mn, Fe, Co, Ni) and alloys rel. to ferromagnetism 8=27036
- V, anomalous magnetic behaviour 8=27383
- V, type II, Hall effect 8=40392
- V_3Si, martensitic phase transform., e-microscope study 8=26085
- V_3Si, superconductivity dependence on lattice instability 8=27037
- V_3Si, β-tungsten phase, high-transition-temp., props. 8=40376
- V_3Si, type II, lattice softening rel. to phase transformations 8=31107
- V_3Sn, type II superconductor, spin relaxation of V^{51}, temp. depend. obs. 8=40970
- V-Ti alloys, type II, spin lattice relaxation times 8=44744
- V-Ti, type II, spin-lattice relaxation 8=41005
- W, evaporated films 8=40393
- W, evaporated films 8=40394
- W, magnetic field curve rel. to low temp. CMN scale 8=37331
- Zr-Nb alloys, critical current density rel. to dispersed precips. 8=35857
- Zr-Ti, sp. ht., 1.1–4.2°K 8=35437

Superfluidity
See also Helium/liquid; Quantum theory/many-particle systems.
Bose system, 2-dimensional, coherent phonon states 8=46116
boson system model, eqn. of motion of condensate wave function, excitation spectrum gap 8=37212
nuclear system, statistical mechanics 8=23886
persistent currents decay, log. time dependent 8=41894
phenomenological theory, "three parameter" form 8=46311
semimetals, possibility at dielec. transition 8=44627
theory of long-range fermion interaction 8=26983
He ion mobility discontinuities, inadequacy of Huang-Olinto theory 8=41897
He, liq., persistent flow and pot. motion 8=33002
He liquid, electron bubble vibration, freq. estimate 8=37346
He liquid, vortex ring annihilation at surface with electron ejection 8=37344
He, liquid, vortex-ring interaction cross section 8=41895

Superfluidity—contd
He, neutral excitation with Po^{210} α source 8=24045
He, λ point shift in rotating angular gap, obs. 8=37348
He, rotating, hydrodynamic theory of relaxation 8=37347
He, superfluid eddy emergence on free surface 8=37352
He II, bubble model, validity from obs. of photoejection of trapped electrons 8=41901
He II, capillary wave modes 8=37350
He II, heat torques and circulation 8=37345
He II in capillaries, connecting points at different temps, heat conduction 8=28443
He II, injection of electrons from immersed tungsten filament up to 2500°K 8=37351
He II, particle motion and heat exchange 8=37349
He II, quantized circulation round vib. wire 8=41903
He II, vortex wheels 8=41900
He II, vorticity, in flow 8=43731
He^3 soln. in He^4, first viscosity calc. from phonon Boltzmann eqn. 8=41898
He^3-He^4 solutions, mobility of positive ions, 1.4 to 2.15°K 8=46312
He^4 transition, gravit. field effect 8=41899
He^4, vortex ring prod. by negative ions, effect of He^3 impurities 8=37339

Superlattice structure. See alloys; Crystal structure, atomic; Solid solutions.

Supernovae. See Novae.

Superparamagnetism. See Ferromagnetism.

Supersonic flow
See also Shock waves.
air, couette and boundary layer, with radiative transfer 8=39207
air, rarefied, visual picture using wedge shaped Fabry-Perot interferom. 8=30243
boundary-layer transition on cone, effects of roughness with cooling 8=39189
gas, at leading edge of plate, behaviour of mass, impulse and energy fluxes 8=34609
gas round convex profile, with detached shock wave 8=34604
gas, viscous, near wall with corner 8=34606
gases, transonic, two dimensional, in presence of normal shock waves 8=47938
heat transfer in hypersonic wind tunnels, pyroelectric transducer abs. 8=47953
of hot gases, anal. of two-dimens. flow, allowing for heat transfer 8=39185
hydrocarbon fuel/air mixture, in boundary layer of plate, ignition regime 8=32969
hypersonic shock layer, radiative heat loss effect on subsonic region 8=34636
Lavalle nozzle, transonic gas flow 8=39173
past cone-cylinders, calc. of pressure distrib. 8=34631
from porous metal plate, rel. to disordered flow after choking 8=34630
rarefied, density disturbance ahead of sphere 8=43672
reactive, one dimens., steady state analysis 8=34617
sphere wakes, convection vel. meas., comparison of decay curves 8=39188
two-phase nozzle flow, max. particle size, effect of liq. surface tension 8=34634
wake turbulence regimes for flows behind hypersonic bodies 8=34633
Ar beam, low-temp. viscosity cross-sections 8=30311
N_2, low-density, rotational relax. anal. rel. to rot. temp. 8=34629

Supersonics. See Ultrasonics.

Surface diffusion. See Diffusion in liquids; Diffusion in solids; Surface phenomena.

Surface energy
alkali halide/organic liquid interphase, rel. to crystal abrasive wear props. 8=30724
n-alkanes, cohesive and adhesive, calc. 8=43779
crystals, thermodynamics 8=48414
density, effective, in solids dependence on rate of crack growth, strain history etc. 8=44533
of graphite and diamond interfaces with liq. metals 8=30718
ice, rel. to contact angle with water for rapidly freezing interface 8=35146
ionic crystal/organic liquid interphase, rel. to crystal abrasive wear props. 8=30724
of liquid metal interfaces with graphite and diamond 8=30718
mixed crysts., deformed, surface states 8=35784
particles, spherical, radii less than 500Å 8=26000
polycaprolactam, rel. to cryst. morphology, obs. 8=43907
polyvinyl butyral, rel. to composition 8=30731
porous solid, effect on strength 8=48969
solid-liquid interface, or residual force 8=48106
water-ice interface, precrystallization theory application 8=34957
Au, heated in air, and impurity adsorption 8=26095
Co f.c.c., grain boundary and twin boundary 8=44026
Fe-3% Si, and grain boundary energy in presence of O_2 8=26102
Fe-3% Si (100) and (110) surfaces, by surface relax. meas. 8=26101
Ge, semiconducting, computer calcs. using H model for surface structure 8=30721

Surface energy—contd
- Ni, of (100) and (110) surfaces, from self-diffusion coeffs. 8=44028
- Si, semiconducting, computer calcs. using H model for surface structure 8=30721
- UC, rel. to grain boundary grooving 8=30871
- W, binding energy of individual atoms 8=30775
- ZnO crystal, charge and e. multiplication 8=49354

- sliding discharge at solid dielec., in vacuum 8=27224
- solids, desorption of thin films 8=39610
- solids, rough contact area 8=35139
- solids, thin films, physicochemical relations between 8=39608
- solid-liquid interface, morphology during melting 8=43897
- solid-liquid interface stability during solidification 8=43910
- structure defects, active centres and long-range effects rel. to epitaxy 8=26274
- surface state calc., model of crystal potential 8=40255
- transient deforms of opaque bodies, obs. by birefringent strips 8=44521
- transport meas. using sinusoidal grating diffraction phenomena 8=41019
- transport meas. using sinusoidal grating diffr. phenomena 8=41020
- triglycine sulphate, sparking phenomena 8=40623
- u.v. scatt. from rough and smooth surfaces 8=37698
- vibration modes, obs. by stroboscopic hologram interferometry 8=32883
- waves in joined elastic materials 8=46050
- wettability of high energy rough surfaces 8=35140
- zeolite, synthetic, r. f. spectrometry during dehydration 8=39581
- Ag, scatt. of inert gases 8=39575
- Al, oxide film effect on dislocation-surface interacts. 8=26094
- γ-Al_2O_3, radiational defects, adsorpt. exam. methods 8=44024
- γ-Al_2O_3, radiational defects, exo-emission exam. methods 8=44025
- Au crystallites on KCl cleavage planes, Brownian movement 8=44022

Surface phenomena—contd
- CdS, influence on photomag. effects 8=31453
- CdS, photoconductivity, effect of self-purification and polarity 8=40658
- CdS, photoconductivity, influence of oxygen desorpt. and chemisorp. 8=49413
- CdS {0001}, potential temp. dependence 8=44766
- Cr, cleavage cracks due to spark machining 8=39577
- Cu and Ar atom collisions 8=29661,
- Cu, preferential hardening in early stage II 8=40145
- Cu, origin of fractional order peaks in diffracted LEED beams 8=26100
- Cu, p scatt., $E_p = 40\text{-}120$ keV, obs. 8=47135
- Cu, spherical crysts., LEED spot patterns, behaviour during voltage and cryst. position changes 8=26098
- Cu–Au, films, surface and vol. diffusion 8=35486
- Fe, pure, influence of reactor irrad. on surface struct. and corrosion 8=30720
- n-GaAs, barrier, trap density, mobility, and effect of SiO_2 layer 8=35144
- GaAs {111}, potential temp. dependence 8=44766
- GaAs, swing and polishing effects on defects 8=44427
- GaAs-SiO_2 interface props., m. o. s. characts. 8=40446
- Ge, clean surface prep., adsorpt. characts. and surface conductivities 8=48421
- Ge crystals, smooth surface defects, effect on breaking strength at 300°K and 4.2°K 8=40161
- Ge, effect of adsorption-desorption mechanism on electrophysical parameters 8=48484
- Ge etched, charge condition under low energy electron and u.v. irrads. 8=35901
- Ge, semiconducting, structures, computer calcs. 8=30721
- n-Ge, surface states relax. time obs. 8=44788
- Ge, total internal reflection spectroscopy 8=35895-6
- Hg-Tl eutectic, interfacial reactions with metals, dielectrics and polymers 8=49873
- p-InSb, photoconduction 8=44927
- Ir, migration, from field-emission studies 8=27343
- Ir oxidation, formation of "molecular clusters" 8=45343
- MgO : Mn^{2+}, charge transfer at surface, e.s.r. study 8=48422
- Mo, activation energy elec. field dependence (10^7–10^8V/cm) 1300–1800°K 8=35512
- NaCl-type crystals, LEED obs. of (11) beam from (100) surfaces 8=44236
- NaCl(Br, I), distorted, electrostatic potential contribution to LEED intensities 8=48423
- Nb, self-diffusion in strong elec. field, field-emission exam., 8=39978
- Ni, morphology, effects of reaction with Br 8=30726
- Ni, origin of fractional order peaks in diffracted LEED beams 8=26100
- Ni–Au films, surface and vol. diffusion 8=35486
- Pb, crysts., mean displacement of surface atoms 8=30935
- Pd crysts., mean displacement of surface atoms 8=30935
- Pt, appearance of Na, K oxide impurities at 20-1100°C 8=35549
- Re, migration, from field-emission studies 8=27343
- Rh, migration, from field-emission studies 8=27343
- n-Si, absorption of hot electrons 8=49260
- Si, clean surface prep., adsorpt. characts. and surface conductivities 8=48421
- Si crystal inversion layer, magnetoresistance at 77°K 8=27130
- Si, dislocation sources 8=26694
- Si, electronic structure, influence of thermal treatment 8=40487
- Si film on sapphire, orientation relns. at interface 8=44058
- Si, oxidized, rel. to device technology 8=49267
- Si, semiconducting, structures, computer calcs. 8=30721
- Si {311} planes, epitaxial growth 8=39582
- Ti_2O_3 protective layer on cemented carbide cutting tools 8=48428
- UO_2, diffusivity of U ions, 1544°–1915°C obs. 8=35511
- W appearance of Na, K oxide impurities at 20-700°C 8=35549
- W, C contaminated, (110) face metastable phase, obs. 8=39583
- W, chemisorption of water 8=27739
- W, diffusion, activation energy elec. field dependence (10^7–10^8V/cm), 1200–2100°K 8=35512
- W, field evaporation rel. to surface atoms cohesive energy, obs. 8=39503
- W, migration, from field-emission studies 8=27343
- W, O_2-covered, thermal rearrangement 8=31464
- W, origin of fractional order peaks in diffracted LEED beams 8=26100
- W-Mo-Re alloys, comp. changes on ht. treatment and effect on work function 8=39727
- Zr alloys, hydrogenation, protection with molten $NaNO_3$ 8=32105

Surface tension
- See also Capillarity.
- alkali metals, liquid, ultra high vac. obs. 8=25897
- n-alkane mixture, liquid/vapour, water, solid interfaces 8=48102
- n-alkanes, and interface tension calc. 8=43779
- benzene-cyclohexane binary mixturs 8=44068
- of binary hydrocarbon liq. mixtures, at liq.-vapour interface 8=48041

Surface tension—contd
- crystals, thermodynamics 8=48414
- discontinuity, optical obs. 8=25896
- 2-dodecylaminoethanol salts, study of micellar props., effect of counterions 8=39289
- droplets from vapour, rel. to radius 8=43781
- liquid, effect on max. particle size in two-phase nozzle flow 8=34634
- liquid film breaking on vert. surface, contact angles meas. under heat transfer condns. 8=25895
- liquid jet leaving Poisseuille tube, effect 8=48039
- liquid sessile drops, rel. to shape analysis 8=25857
- liquids and liq. mixtures, statistical-mech. calc. 8=48107-8
- liquid/liquid interface, approach of rigid sphere 8=34744
- liquid-vapour interface, importance for weightless liquids 8=48104
- menisci, advancing, deformation 8=48103
- nematic liq. crysts. interfacial effects on thermal cond. 8=34833
- polymer liquids 8=48105
- polyvinyl butyral, critical, in alcohols and hydrocarbons, effect of composition 8=30731
- quasi-brittle, crack propagation in continuous media 8=44533
- solids, crack propagation in continuous media 8=44533
- surfactant solns. capillary nipple damping and films Gibbs elasticity 8=30445
- transition metals, and cohesion, by tight binding method 8=43928
- Ar, rel. to mol.-statistical theory, 87-140°K 8=25898
- Ar-N_2 liq. mixtures, statistical-mech. calc. 8=48107-8
- $CdCl_2$-alkali chloride liquid systems 8=30439
- Cs amalgam, conc., and electron work function 8=49435
- Ga boundary with non-polar org. liqs., interphase 8=39338
- H normal solns. in Ne, 24.59 to 29°K 8=43780
- H_2-Ar solns., temp. and conc. depend. rel. to mol.-statistical theory, 87-120°K 8=25898
- H_2O, contact angle on Au 8=48418
- Hg monolayer obs. 8=48061
- In(Liq.) on Al 8=39336
- Li soaps in water miscible alcohols 8=39316
- $NaClO_3$-$NaNO_3$ molten system 8=48086
- UO_2, critical, for complete melting by liq., comp. in oxidizing and reducing atmos. 8=30729
- $UO_2(NO_3)_2$ in diluent + TBPP/ImHNO$_3$, interfacial tension and partition coeff. 8=34804

Surface tension measurement
- automatic recording for liquids 8=30443
- by bubble profile dimens. 8=39337
- controlled atmosphere Langmuir trough 8=34805
- drop-weight-volume method, correction factors 8=30441
- interfacial, by pendent drop method, eqns for 1/H vs S values 8=48042
- interfacial tension, visual cell, high-press, high-temp. 8=30444
- sodium alkylbenzene sulfonates, free energy change in adsorption 8=39339
- solid, elastic, kink-capillary oscills. 8=26748
- surfactant aqueous solns. by du Nov̌y tensiometer rel. to reproducibility 8=30440

Surface texture
- apophyllite crysts., microstruct. study rel. to growth mech. 8=26211
- cathode spots in high-current vacuum arc, theory 8 =25704
- damage of film coatings on Cu single crystals rel. to strengthening effects 8=40150
- dislocation etch pits shape at intersection with crystal surface 8=48837
- electron diffraction exam., anomalous ring patterns due to secondary e. emission 8=48587
- fracture study, comparison of transmission and scanning electron microscopy 8=48415
- glass fracture, mist zone microstructure 8=30722
- glass, inorg., mech. condition rel. to fracture strength 8=31176
- glass, porosity rel. to aq. attack 8=26149
- glass, structure after etching, i.r. spectroscopy 8=39578
- goniometer, X-ray shield 8=39705
- graphite microtopography using gold decorant, rel. to gold epitaxial growth 8=44099
- laser rod, matting, effect on optical pumping 8=37598
- metal crystals, laser irradiation, localized damage 8=30716
- metal, industrial vacuum technology aspects 8=39572
- metallurgical, scanning e.-microscope exam. 8=50472
- microscopic differences in height by reflection electron microscopy 8=44023
- molybdenite cleavage surface, LEED study 8=48524
- muscovites, rel. to shearing force anisotropy 8=44602
- nitrocellulose films, craters and penetration holes after exposure to micrometeorites 8=41579
- polishing, disproving previous hypotheses 8=50468
- polishing glass, temp. rise from GeO_2 hexagonal-tetragonal transition 8=39558
- porous, transpiration cooled, transient temp. response in forced convection surroundings 8=35450
- profilometry, relocation technique 8=44019

Surface texture—contd
- reconstructed surface uncertainty, comments 8=35141
- rough, optical reflection, var. with angle of incidence 8=46717
- roughness, effect on contact resistance of rough flat surfaces 8=48412
- roughness, effect on contact resistance of tarnished contacts 8=48413
- roughness effect on u.s. velocity calc. 8=37277
- roughness effects on diffusion 8=39956
- roughness measurement techniques, development in U.S.S.R. 8=48416
- roughness of cone, with cooling, rel. to boundary-layer transition at supersonic speeds 8=39189
- roughness of wing elements, effects on heat transfer intensities 8=39208
- scanning electron microscope exam. 8=41968
- seal faces, mean surface profile meas. 8=35138
- selective coatings for solar energy receivers 8=44020
- stainless steel, craters and penetration holes after exposure to micrometeorites 8=41579
- steel, mild, rel. to film growth kinetics in chromate solns. 8=44039
- rel. to X-ray reflection, anomalous 8=27529
- Zircaloy-2, effect on corrosion in water and steam 8=45352
- Al, blistering on p-irradiation, 10-200 KeV 8=40070
- Al, fatigue damage from Au nucleation exam. rel. to fatiguing environments 8=26778
- Al, structure appearance during brightening and anodizing 8=48417
- Au, anomalous structures, as prop. of clean metal surface 8=26097
- Au, interpret. of complex LEED patterns rel. to coincident site lattices, and phase and spacing modulation 8=26096
- Au(100) surface, purity and structure from Auger spectroscopy and LEED 8=27355
- $BaTiO_3$, domain structure and topography from e.-mirror photomicrographs 8=39576
- Be, effect on mod. of rupture 8=26788
- Bi, {001}, {01$\bar{1}$2}, {11$\bar{2}$0}, structure study by LEED 8=26106
- CdS {0001}, structure study and O_2 adsorption by LEED 8=30719
- Cr black coatings, electrolytically deposited 8=45394
- Cu crystal, dislocation distrib. after tensile deform. 8=48856
- Cu spherical crysts., struct. after O_2 adsorpt. 8=26099
- Cu(100) surface, purity and structure from Auger spectroscopy and LEED 8=27355
- Cu-Au alloy, roughening during electolytic dissolution 8=49938
- Cu_2O film on Cu electrode in 3% NaCl aqueous soln., effect of dissolved O on stability 8=41279
- Fe and Fe alloys, electropolishing, "Universal" technique applications 8=44027
- Fe-Cr alloy-oxide interface, e microscopy 8=26103
- GaAs, automatic jet thinning 8=33088
- n-GaAs, cleanliness meas. by ellipsometry 8=49240
- GaAs, epitaxial surface features and twins 8=35241
- Ge, annealed and cleaved, structure transformations 8=48419
- Ge, preparation, stabilization and chemical treatment 8=48420
- LiF crystals, reflectance props. in far u.v. effect of polishing 8=41112
- Mo, (001) and (110), damage due to bombard. by Ne^+, Ar^+, Kr^+ or Xe^+ LEED study 8=26104
- Na_2SiO_3, structure after etching, i.r. spectroscopy 8=39578
- Pd, annealing changes, effect on CO adsorption 8=48424
- Pd(100) surface, purity and structure from Auger spectroscopy and LEED 8=27355
- Pu, effect on total hemispherical emittance 8=30993
- Pt, ion microscope tips smoothing by field evaporation, 10 and 78°K 8=39708
- Re, h. c. p., He field-ion microscopy, comparison with Ru 8=26105
- Re, vapour deposited, rel. to thermionic emission 8=31468
- Ru, h. c. p., He field-ion microscopy, comparison with Re 8=26105
- Sb, {0001}, {01$\bar{1}$2}, {11$\bar{2}$0}, structure study by LEED 8=26106
- Si annealed, nature 8=30727
- Si, damages after thermal treatment of $Si-SiO_x$ system 8=49276
- Si, effect on electron exoemission 8=40693
- Si, imperfections during thermal treatment 8=30728
- Si, micro-relief exam. after elec.-decoration by Pt 8=40496
- Si, planar chemical polishing 8=48425
- Si, struct. and field emission, cleaning by heating 8=35148
- Si, thermal behaviour of vacuum-crushed, air-crushed and mechanically polished surfaces, e.p.r. exam. 8=39580
- UO_2, low-energy electron diffr. 8=48430
- UO_2, steps, LEED 8=48429
- W emitter in thermionic converter, effect of etching to 110 planes on characts 8=28476

Surface texture—contd
- W, (110), damage due to bombard. by Ne^+, Ar^+, Kr^+ or Xe^+ LEED study 8=26104
- W, (110), LEED study 8=48431
- W, (112) face, initial oxidation structs. 8=26107

- Ta-Nb alloys, $K_1(t)$ and $K_2(t)$ meas. rel. to temp. 8=44740
- Ta-O, strain-ageing from resistivity meas. 8=26846
- Ta-O system, γ-phase, annealed, crystal structure, e. diffr. exam. 8=39822
- Ta_2O_5, ion exchange separation from Nb in columbite 8=36544
- Ta_2O_5 insulating film, refractive index 8=49763
- Ta_2O_5, polymorphism, effect of oxide additions 8=48403
- Ta_2O_5 thin films, electron microscope obs. of superstruct. 8=26129
- $TaOF_3$, molec-stability 8=38938
- Ta-Re alloy, yielding, work hardening, cleavage 8=40182
- Ta_2Se_3, crystal structures 8=44240
- $TaSi_2$ in Cs vapour, e- and ion-emission rel. to other refractory metal cpds 8=27350
- Ta/Ta_2O_5 structures, annealed, exponential vacancy distrib. origin 8=44417

Tantalum compounds—contd
- Ta-W alloys, normal spectral emissivity, temp. and comp. dependence 8=45224
- Ta-W alloys, resistivity, 300 to 2400°K 8=26973

Targets. See Nuclear bombardment targets.

Teaching
- atomic struct., chem. bonding and valency theory, effect of using 3-dimens. molec. models 8=45309
- electrostatics, imaging methods, computer-animated film 8=37366
- elements origin, literature and teaching aids review 8=45585
- Films, 1020 16 mm., for physics students, list 8=41611
- Green's function method, ferromag. of 2-spin system 8=40769
- mechanics, thought-provoking problems for students 8=37103
- optical filter transmission characts., educational expt. 8=37666
- physics, reminiscences of a professor 8=37104
- relativity, general, resource letter 8=32805
- vacuum apparatus for student practical work 8=30324
- wave function meaning and matter waves reality 8=42305
- **demonstrations**
  - conservation of momentum 8=28255
  - crystal growth, cine-films 8=26202
  - crystal optics, ciné-films for lectures 8=27519
  - crystallography, apparatus and techniques 8=26330
  - cyclotron, conical pendulum, elect. stimulated as model 8=47001
  - electric field plotting expt., modification 8=37367
  - Faraday's law of induction 8=24122
  - ferromagnetic films domains, hysteresis and magneto-optical effects 8=27397
  - γ-rays particle nature 8=29082
  - heat conduction and loss in bar 8=32956
  - holography with double-focus lens, simple lecture demonstration 8=46758
  - interference fringes, lower-order multiray 8=28854
  - linear air track, strobe photography, demonstration 8=28253
  - linear air track to demonstrate electron atom collision 8=29652
  - neutron generator for undergraduate laboratory 8=38076
  - one-dimensional scatt. film 8=37754
  - perturbations, diosectable anharmonic oscillator 8=41803
  - plasma confinement, metal tube deform. by pulsed mag. field 8=30116
  - projectile motion, wooden shell and moving net target 8=41646
  - Raman spectroscopy experiment for the senior laboratory 8=29696
  - Rutherford elastic scattering experiment 8=25009
  - Rutherford scatt., annular target expts. 8=42669
  - sophomores, instrum. familiarisation programme and projects 8=41612
  - thermal expansion 8=46253
  - viscosity of liquids, falling-ball viscometer for undergraduates, < 2 k bar 8=43769
  - Bi hyperfine structure, using plane grating spectrograph 8=27562
  - HeII second sound propagation 8=33003
  - X-ray diffraction, analogies in interference patterns 8=30879
  - Y-T recorder for linear air track 8=28256
  - $Pb_{85}In_{15}$ superconductor, resistive and mag. props. 8=35855

Technetium
- in stars, red giant, Tc^{97} synthesis 8=45644
- superconductivity, $\partial T_c/\partial P$, sign rel. to other transition metals 8=31344
- Tc^{96}, carrier-free, prep. from $Mo^{96}(p, n)$ 8=47322
- Tc I, II, spectra, 2000-9000 Å from arc and spark sources 8=47508

Technetium compounds
- No entries

Tektites. See Meteorites.

Telescopes
- design, principles 8=28753
- focus testing with spheres 8=28744
- inbalance in rotating parts, obs. 8=42185
- large, recent advances in optics 8=42187
- mirror type with free aperture of 3.5m, optical design 8=36919
- Ritchey-Chretien, corrector system 8=42188
- **astronomical**
  - See also Radioastronomy.
  - Cassegrain, for obs. of Lyman-α emission line, solar chromospheric fine structures 8=45916
  - Cassegrain type with parafocal plates, third order errors 8=41496
  - Cassegrainian mirror-lens isochromatic systems 8=32408
  - Cassegrain type, reflecting, corrector systems for first and secondary focus 8=32409
  - Cerro Tololo Inter-American Observatory, facilities 8=32407
  - coma tolerance in photographic star images 8=36941
  - high resolution photography of solar chromosphere 8=45917
  - Kitt Peak National Observatory, facilities 8=32407
  - mirrors, large aperture Al alloys 8=46677

Telescopes—contd
  astronomical—contd
    multi-element arrays, impedance and radiator matching 8=28197
    photoelectric star tracking, friction drive 8=45608
    Queen Elizabeth II 8=28035
    reflecting, at Herstmonceux, Sussex, capable of detecting quasars 8=50267
    refractor, 16-inch, Hartmann test results 8=28036
    Richey—Chrétien, and extended field systems 8=50268
    3.5 m free aperture, mirror type, optical design 8=36919
Tellurium
    atom coordinates in lattice, temp. depend. 8=44256
    crystals, I^{127} quadrupole coupling exam. 8=36284
    crystals, pulse-heated, anomalous Hall reversal at 515°K rel. to vacancy behaviour 8=31329
    dielectric constant, contribution of free carriers 8=40587
    elastic constants temp. dependence, 270–700°K from ultrasound velocity meas. 8=35719
    electron microscope investtgation 8=35356
    films, e-irradiated, resistance increase due to CO_2 desorpt. 8=35829
    galvanomagnetic effects, anisotropy, statistical interpret. 8=31394
    galvanomagnetic props., down to 0.05°K 8=35916
    Hall effect meas. in mag. fields up to 150kg 8=49171
    isotope fractionation 8=41234
    liquid, resistivity, Hall effect, and comp. 8=34965
    photoconductivity, fast, by CO_2 laser radiation 8=40676
    Shubnikov-de Haas effect, and struct. of isoenergetic surface 8=40331
    $Sb_2Te_{3-x}Se_x$ syst., struct. 8=48677
    Te_2, dissoc. energy 8=38937
    Te (I), g values of $5p^4$ configuration 8=25380
    Te II pulsed laser transition 8=46596
    Te-Se-Cd rectifying struct., using Se single-crystal film 8=35930
Tellurium compounds
    isostructural oxide, crystal structure 8=48676
    $Re(CH_3)_2$, indirect spin coupling 8=29822
    $TeBr_4$, far i.r. cryst. spectra 8=45223
    $TeCl_4$, far i.r. cryst. spectra 8=45223
    $Te_{70}Cu_{25}Au_5$ alloy, amorphous, resistance and thermopower meas., 80-300°K 8=40497
    TeO_2, phase transform. at high pressures ($p = 60$ kbar) 8=26081
Temperature control. See Cryostats; thermostats.
Temperature
      See also High-temperature production and effects; Low-temperature production.
    arbitrary upstream changes, used maximum store method for anal. 8=34574
    Bayard-Alpert gauge, influence 8=39251
    control for epitaxial growth, solid-state linear ramp generator 8=41919
    control, for n.q.r. spectrometer 8=46528
    developed during oblique impact of two bodies 8=32981
    flat disc in transversal air flow, boundary layer stability and heat transfer 8=37314
    galvanometer control, modulation systems 8=32985
    gas stream temp. control device for range –195° to 250°C 8=28421
    generated by non-stationary frictional contact, analog simulation 8=37319
    invariance in special relativity 8=28288
    nonequilibrium, definition 8=23876
    plasma jet, output rel. to current and mass flow 8=43613
    in plate of finite thicknesses, harmonic oscs. of medium and temp. stresses 8=37160
    potentials in laser medium 8=24273
    rarefied u.s. flow, excitation and gas temps. 8=30257
    standard definition, precise and reproducible 8=45946
    stars, calc. from Hγ profiles 8=28056
    in turbulence wake of sphere in water, fluctuations 8=34701
    transient temps of arrays of radiating plates and cubes 8=24017
    transition at fluid-vapour interface in bubble boiling 8=39490
    variations on surface of strip-heated flat plate 8=24018
    He-Ne laser, effect on output power 8=33186
    Pu, surface, rel. to hemispherical emittance 8=30993
    Sb freezing-point standard, apparatus 8=30585
    Sb freezing-point standard, measurements 8=30586
Temperature distribution
    in air jet, field meas. and osc. intensity and temp. 8=39190
    in bars, solidifying, rel. to location and shape of solid-liq. interface 8=43908
    in boundary layer of liq. flow along permeable plate 8=39267
    in burning zone of bed, rel. to difference in temp. between gas and mat. 8=37313
    calorimetry, guard-heater automatic control 8=32988
    convection flow stability of fluids heated from below in gravitational field 8=46251
    crystal plate, plane field, unsteady, generalized 8=44355
    in cylinder, cooled or heated in liq., for variable heat transfer 8=37321
    in cylinder with temp. depend. conductance in const. longit. elec. field 8=41946
Temperature distribution—contd
    in cylinders, rotating, and heated by rad. from distant source 8=32980
    diffusion equation, solution using continuous method of approx. 8=32934
    electric arc cathode, temp. field 8=43462
    field in solids with variable heat-transfer coeffs, approx. calc. 8=28415
    field under conditions of monotonic heating 8=37316
    in flow in annular duct, allowing for mech. energy dissipation 8=39356
    in fluid flow with variable physical characts., numerical integration of ht. of propagation eqn., 8=39196
    fuel element, current heated with temp. dependent parameters, nonstationary field calc. 8=30976
    in gases, high-temp., by meas. of rad. from seeded emitters at two seeding rates 8=34650
    in hollow cylinder, two rapidly convergent solns. for numerical computation 8=32959
    in linear shear flow past flat plate, rel. to heat transfer coeff. 8=34651
    moist mats., simultaneous determ. of thermophys. characts. for any values of Fourier no. 8=37315
    in plate, infinite, field for changing heat transfer coeff. and temp. of ext. medium 8=37320
    in porous body under transpiration cooling 8=28416
    power fluid, non-Fourier, on plate of variable temp. in thermal boundary layer 8=39357
    profiles for convection near cooled disk rotating with its environment 8=32967
    profiles for turbulent natural convection in air 8=34648
    along rectangular fin with vapour condensation 8=34991
    ruby laser, radial distrib. during pumping 8=39909
    streamlines, closed, in laminar flow at high Péclet number 8=34710
    thermal regime, regular, boundary conditions 8=41873
    thermography, high-speed, use of prism line-scanner 8=37322
    transient, analytical solution, in slab absorbing and scattering radiant energy 8=46228
    transient in thin films, estimation rel. to electron beam heating 8=30733
    transistors and integrated circuits with i.r. microscope 8=28380
    in turbulent natural convection boundary layer of vertical plate 8=32965
    wall temp prediction in post burnout region 8=46229
    CO_2, temp. field in volume of gas 8=47959
    Ge melt temp. field in growing crystals by the Czochralski method 8=30829
    Ge single crystals grown by Czochralskii method 8=30827/8
    Hg, liq., temp. profiles in turbulent flow, effect of superimposed free convection 8=34836
    InI_3 discharge lamp 8=43454
    N plasma jet, determ. by spectroscopic methods 8=30183
    NaK eutectic, temp. profiles in turbulent flow, effect of superimposed free convection 8=34836
Temperature measurement
      See also Pyrometers; Thermocouples; Thermometers.
    in anisotropic crystals, based on birefringence changes 8=35420
    apparatus for thermal analysis, 1000-3000°C 8=28414
    black body laws, violation for real bodies 8=32935
    cerium magnesium nitrate scale, evidence from critical magnetic field curve of superconducting W 8=37331
    cerium magnesium nitrate thermometry, use in liquid He 8=37332
    Cerous magnesium nitrate, high field magnetization anomaly obs. 8=44968
    colour coordinates of thermosensitive prints, obs. 8=24015
    combined conductivity-temperature probe for use up to 3000°K 8=46271
    devices, survey for past 40 years 8=46263
    differential, by Pt resistance thermometers, calc. 8=37317
    flame temp. meas. by single-beam photoelec. pyrometer 8=41875
    gas, acoustic and Pt resistance scales compared, 20°-20°K 8=46262
    heat exchanger, surface temp., accurate meas. 8=46237
    i.r. pyrometry, limits 8=46258
    laser temp. determ. of working substance by dilatometric method 8=28661
    liquid surface, thermistor sensor and recorder 8=37318
    low, specific heat of cerium magnesium nitrate 8=30962
    metal, thin films, during vapour dposition 8=44035
    micropyrometer with optical-electronic transducer 8=46275
    microscope, i.r., for temp. distribution over transistor and integrated circuit surfaces 8=28380
    moving objects, by pyrometer, 60-180°C 8=24019
    moving surfaces, by stationary contact thermocouple 8=37324
    optical pyrometer, automatic 8=37323
    outlet channel of AGR, use of N^{16} 8=47435
    plasma, from light depolarization 8=30065
    p-n function as ultralinear calculable thermometer 8=31402

Temperature measurement—contd
- radiation taut-wire transducer 8=24016
- radiometer for environmental studies 8=28384
- reactor, nuclear, liq. semicond. applicability 8=34110
- reference standards above 0°C 8=46260
- sea surface, by radiowave emission 8=50107
- of small surface areas above 800°C, using blue sensitive photomultiplier 8=24014
- solid in liq. N_2 bath during adsorpt. meas. 8=48352
- steam-to-surface temp. difference in dropwise condensation, effects of local venting 8=34986
- stratopause, diurnal var. estimation from horizon radiance satellite obs. 8=36709
- thermocouples, free end temp., automatic correction 8=24026
- thermography, high-speed, use of prism line-scanner 8=37322
- transducer for instantaneous temp. meas. in shock tunnels 8=46264
- transient, resistance thermometer design 8=46269
- tunnel junction, supercond., for 1m° meas. 8=31358
- ultra-high-temperature thermocouples 8=46268
- ultra-sensitive miniature temp. sensor 8=46259
- in wakes of vehicles on reentry, use of i.r. radiation 8=41484
- D plasma, by escape velocity 8=34514
- Ge single crystals grown by Czochralskii method of, field distrib. 8=30828
- Ge transistor bridge sensor 8=32984
- Ge–Ga–Zn, appl. to low temp. thermometry 8=41874
- Mo, by emittance of small cones and cylinders, in surface 8=26611
- Pt ribbon high-temp. X-ray furnace 8=32978
- W, by emittance of small cones and cylinders, in surface 8=26611
- **spectral methods**
  - discharge, h. f. induction, stationary 8=29900
  - discharge, hollow-cathode, gas thermometry 8=34402
  - gas and particle cloud in flames, by comparison method 8=32977
  - graphite surface burning in stream of dry oxygen, temp. profile 8=46256
  - high, appln. of pyrometric light filters, theory 8=46266
  - plasma, 5000°-50 000°K determ. 8=34513
  - propane diffusion flame, spectroscopy 8=46257
  - self-luminous objects, using high speed photography 8=46265
  - of spark in air 8=39004
  - spectral line reversal with objective methods of recording 8=46255
  - C electrode, rel. to arc as standard spectroscopic source 8=29927
  - D pulse discharge plasma, inverted lines 8=29895
  - F dwarf stars, Hβ photometry 8=45649
  - Mg flame by MgO electron vibr. obs. 8=24013
  - W, photoelec. pyrometer principle and error analysis 8=24021

Tensile strength. See Mechanical strength/tensile.

Tensors
- asymmetry in mag. second-rank tensor quantities 8=49575
- Bel-Robinson, generalized, as generator 8=32821
- conformal, function of metric tensor, and diff. concomitant of object K^a_{bc} 8=32811

Terrestrial magnetism. See Earth/magnetic field; Magnetic storms.

Tetraneutrons. See Neutrons.

Thallium
- atom fluoresc. quenching cross-sections, determ. by flame tech. 8=29618
- atom, superradiance of green line in TlI vapour 8=34154
- atom, Tl^{205}, spectrum as frequency standard 8=28211
- atomic, photoionization cross section meas. 8=29949
- ion-implanted in Si, diffusion from subst. to interstitial sites 8=40007
- ions Tl^+, polarographic investigation in $LiNO_3$-$NaNO_3$-KNO_3 melt 8=45414
- liquid, sturcture factor 8=48062
- liquid, structure temp. dependence by X-ray diffr. exam. 8=25873
- resonance radiation, electrodeless h. f. source 8=24380
- superconducting, density of states and phonon spectrum by electron tunnelling 8=44743
- superconducting transition temp., effect of impurities 8=49201
- thallous dimer centre characts in NaI from luminescence study 8=27658
- Tl^4, diff. in $LiSO_4$, 590-820°C 8=39977

Thallium compounds
- Tl amalgams, densities and mag. susceptibilities 8=48348
- Tl halides, ion recomb. rates after photo-ionization rel. to press and inert gases 8=43490
- TlCNO, bonding and stability 8=26006
- Tl-Cd liquid alloy, thermodynamic props. 8=30455
- TlI, adsorbed organic mols. surface charge-transfer groups form., obs. 8=36028
- TlI, ionic recomb. rates for weak ionization 8=43476
- TlI-42% TlBr single crystals, i.r. transmission, spectra 8=36422
- Tl $MeSO_4$ (Me=alkali metal), elec. cond. and density, 700-1150°C 8=39411
- (Tl-Rb) NO_3 molten, elec. cond. 8=43865
- Tl–Sn alloy, phase diagram in range 0-20 at.%Sn 8=35126
- Tl-Te alloys, liquid, n-type, elect. props. 8=34897

Thallium compounds—contd
- $TlNO_3$, molten, elec. cond., viscosity, density 8=39331
- TlSe, films, phase transform kinetics by new c.-diffr. procedure 8=26082
- $Tl_2Mn_2(SO_4)_3$, langbeinite structure, growth and electro-optical props. 8=39678
- Tl_2Se film, substrate temp. effect on semicond. props. 8=31395
- TlSe, reflection spectrum beyond fundamental absorpt. edge 8=36423
- Tl_2Se, thermoelectric power temp. dependence, 100-540°K, rel. to carrier props. 8=49396
- Tl_2SO_4, elec. cond. and density, 700-1150°C 8=39411
- Tl_2SO_4, i. r. spectrum 8=31955
- Tl_2Te film, substrate temp. effect on semicond. props. 8=31395
- Tl_2Te_3, crystal growth from melt rel. to segregation of Se, S, Tl and Fe 8=26242
- Tl_5Te_3, γ-phase in Tl–Te system, conductivity and superconductivity 8=40390

Thermal conductivity. See Conductivity, thermal.

Thermal decomposition. See Chemical reactions.

Thermal diffusion. See Diffusion in gases/thermal; Diffusion in liquids/thermal.

Thermal diffusion columns. See Diffusion in gases/thermal; Isotope separation.

Thermal diffusivity. See Conductivity, thermal; Heat conduction.

Thermal expansion
- alkali halides, calc. for validity test of box model 8=35315
- apparatus for X-ray determination at high-temps 8=26593
- crystals, axial, Grüneisen functions 8=26598
- crystals for u. v. and i. r. optics 8=42116
- cubiform crysts., coeff. temp. depend., theory 8=26594
- deflection, thermal, of non-homogeneous rectangular plate 8=41872
- demonstration 8=46253
- in dielectrics with high permittivity, elec. field effects, theory 8=40560
- epoxy resins, 2°-300°K apparatus and obs. 8=35443
- explosions, thermal, theory, stability of steady-state solutions 8=46173
- ferromagnets, and sp. ht. at Curie pt., critical fluctuations and anomalous behaviour 8=30959
- filament dilatometer 8=48742
- films, effect on temp. coeff. of resistance 8=31315
- gases used in spectrophone to detect laser light absorption 8=39218
- γ-Ce, slow-cooled, temp. dependence, 300-100°K 8=30891
- glass-ceramic mirror blanks $0 \pm 0.3 \times 10^{-7}$/°C from 5 to 50°C 8=41137
- glass, fused silica modified with coeff. ~10^{-7}/°C 8=39930
- glass, rel. to oxide dilution 8=44579
- glass, shrinkage, compression under 10-65 kbar effects 8=40164
- glasses, effect of mixed γ-n radiation 8=44493
- graphite, polycryst., rel. to orientation, averaging techs. 8=35663
- Grüneisen coeff. evaluation 8=44352
- Grüneisen ratio and sp. ht., thermodynamic compatibility reln., 8=39907
- Grüneisen solid, h.p., thermodynamic calc. 8=30972
- high-temp. strain fatigue, diametral extensometer 8=35630
- inclusions in steels, and reln. to tessellated stresses 8=44350
- Invar alloys, rel. to mag. props. 8=36162
- ionic crystals. coeff. and Grüneisen constant calc., semiempirical formulae 8=39924
- metals, cubic, Grüneisen parameters rel. to temp. 8=48743
- metals, linear, comparison of plated and unplated samples 8=35815
- naphthalene, from X-ray meas. and expansion tensor calcs, 78-325°K 8=26596
- optical materials, low coeffs., interferrometric precision obs. 8=39927
- optical materials, small samples, interferometry 8=35439
- periodic bond chain theory rel. to thermal vibrations in a crystal 8=26005
- piezoelectric annular disc, radial deform., rel. to gamma ray heating and appl. elec. voltage 8=31441
- polyethylene, volume coeff. rel. to melting temp. range 8=39472
- polymers, amorphous, and compressibility 8=39926
- polymers, polyethyleneglycol adipate based, solid and solns., obs. 8=26595
- polyurethanes, solid and solns., obs. 8=26595
- pyrocarbons compressed at high temps., anisotropy 8=45941
- recording dilatometer for −150° to +1500°C 8=28216
- reference materials for high-temperature measurements 8=46224
- ruby laser crystal deform. 8=24335
- sintered optical glass fibres 8=39925
- solid, microinhomogeneous, macroscopic coeff., eqn. 8=48741
- solids, book 8=35441
- thiourea, anisotropy in paraelec. phase 8=26597

Thermal expansion—contd
- wire heated by current pulse, longitudinal vibration 8=40088
- Ag film, e diffr. meas., 20-420°C 8=35446
- Ag, small crystals, and fusion 8=39928
- Al film, e diffr. meas., 20-420°C 8=35446
- $2Al_2O_3.5WO_3$, linear 8=35448
- Ar, liquid, meas. and computation 8=28219
- BaF_2, Grüneisen parameter, low-temp. limit, calc. on Axe's shell model 8=48748
- C, pyrolytic, coeff., relation with preferred orientation 8=30971
- C, pyrolytic, dimensional changes during n-irrad., model 8=31148
- CaF_2, Grüneisen parameter, low-temp. limit, calc. on Axe's shell model 8=48748
- $CoCl_2.6H_2O$ crystals, coeffs., 1.5°-4.2°K 8=35442
- Cr_2WO_6, linear 8=35448
- Cs, volumetric, and Grúneisen constant calcs. from eq. of state 8=30973
- $CsCl_2$, rel. to phase transform 8=26067
- Cu alloys, X-ray determ. at high temps 8=26593
- Cu, coeff. temp. depend., theory 8=26594
- Cu oxides, and phase fields 8=30686
- $Cu(HCO_2)_2.4H_2O$, in antiferroelectric transition region −170°C to 30°C 8=44346
- Ge, coeff. temp. depend., theory and obs. 8=26594
- Ge, lattice parameter temp. dependence from X-ray powder diffr. exam. 8=44347
- He^3, solid, obs. 8=37358
- He-Ne laser meas. of small coeffs. 8=35440
- HgTe, lattice dilation rel. to temp. 8=48744
- Ir, lattice parameter temp. dependence from X-ray powder diffr. exam. 8=44347
- K, volumetric, and Gruneisen constant calcs. from eq. of state 8=30973
- KIO_4, metaperiodate 8=35444
- Kr, solid, meas. rel. to thermodynamic props. 8=48745
- La, 1.5-40°K, rel. to superconducting transition temp. pressure dependence 8=35438
- LaF_3, temp. depend., rel. to Schottky defects and diffusion of F ions 8=31048
- LaSb, lattice constant temp. dependence rel. to semi-metal charact., 8=39948
- $LiNbO_3$, linear coeffs., 77-500°K, anisotropy 8=44341
- Mn, linear coeff. rel. to para-antiferromag. transition, −180-950°C 8=44253
- $MnCl_2.4H_2O$, anomaly near Neel pt. due to antiferromag. ordering 8=35445
- Mo, coefficient between 15° and 65°C 8=44233
- Mo, effect of S, Se and Te in soln 8=48664
- $NaIO_4$, coeffs from lattice parameters 8=39929
- Ni film, e diffr. meas., 20-420°C 8=35446
- PbTe and elastic constants, 4.2-303°K 8=49044
- Rb, volumetric, and Grüneisen constant calcs. from eqn. of state 8=30973
- RbH_2AsO_4 crystal, anisotropy from lattice parameter obs. 8=44348
- Rh, lattice parameter temp. dependence from X-ray powder diffr. exam. 8=44347
- Sc, linear coeff. rel. to para-antiferromag. transition, 20-660°C 8=44253
- Se thin layers, linear coeff. meas. and Ag impurity dependence 8=48746
- Si, coeff. temp. depend., theory and obs. 8=26594
- SrF_2, Grüneisen parameter, low-temp. limit, calc. on Axe's shell model 8=48748
- SrS, coeffs. from lattice constants meas. 30-273°C 8=39931
- Tb, and forced magnetostriction 8=35447
- Ti, linear coeff. rel. to para-antiferromag. transition, −180-1500°C 8=44253
- Ti, 2° to 30°K 8=44349
- α-U, behaviour at low temp. 8=48747
- α-U, below 10°K 8=39932
- V, linear coeff. rel. to para-antiferromag. transition, −180-1500°C 8=44253
- Y, lattice constants meas., 77-300°K, by X-ray diffr. 8=39935
- ZnO, coeffs from lattice constants meas., 27-619°C 8=39934
- ZnO polar crystals, from point-charge model 8=30630
- ZnS, anisotropy 8=44351
- ZnTe, 0-460°C 8=39933
- Zr, 2° to 30°K 8=44349
- ZrW_2O_8, linear 8=35448

Thermal measurement

See also Calorimeters; Calorimetry; Conductivity, thermal/measurement; Temperature measurement; Vapour pressure measurement. Entries describing measurement methods for specific thermal quantities and effects may also be found listed under the various headings for the subjects concerned.
- analysis, adiabatic calorimeter 8=24028
- analysis, contactless, 20-2800°C 8=28411
- analysis by hot-stage microscopy, ≤ 2000°C 8=28409
- apparatus for thermal analysis, 1000-3000°C 8=28414
- boiler, coal-fired, radial disk fluxmeter 8=32955
- hydrate binary systems, analysis under pressure 8=28413
- i. r. detectors and appl. 8=28381

Thermal measurement—contd
i.r. image scanning system 8=42213
polymers, crystallinity determ. 8=44093
refractories, differential thermal analysis apparatus, ≤ 2000°C 8=28410
regular regime, boundary conditions 8=41873
sensors, with varying medium temp. and transfer coeff. 8=28385
temp. determ. using thermal radiation meas. 8=28412
thermal effectiveness determ. 8=46254
thermocouple manometric transducers, rating 8=45961
MgO:Fe, microsec. heat pulses in large mag. field 8=44366
Thermal radiation. See Radiation/heat.
Thermal spikes. See Crystal imperfections; Physical effects of radiations.
Thermal transformations. See Boiling; Condensation; Freezing; Heat of transformation; Melting; Phase transformations; Sublimation; Vaporization.
Thermionic emission. See Electron emission/thermionic; Ion emission/thermionic; Ionization, surface.
Thermionic generators. See Electricity/direct conversion; Electron tubes.
Thermionic tubes. See Electron tubes.
Thermistors. See Semiconducting devices.
Thermochemistry. See Heat of reaction, etc.
Thermocouples
conductivity-temperature probe for use up to 3000°K 8=46271
equilibrium concepts of irreversibility 8=43892
free ends, automatic temp. correction 8=24026
for gas stream velocity fluctuations meas., 8=39177
heat exchanger, surface temp. meas. by steel tube/Ni coating thermocouple 8=46237
high-temperature hermetic lead 8=46270
neutron radiation effect on calibration 8=46273
non-equilibrium, foundation 8=46099
parallel, theory 8=24022
probe for meas. of thermal conductivity of insulating materials 8=30983
response in liq. medium, timing and calc. 8=28419
semiconductor, Peltier coeff. determ. 8=40635
stationary contact, for temp. meas. of moving surfaces 8=37324
for ultra-high-temperature range meas. 8=46268
Ag-Ni, thin film, temp. variation across thin semiconductors, thermoelectric props. rel. to thickness 8=40638
Au-Fe wire, props. 8=35995
Au-Ni, thin film, for temp. variation across thin semiconductors, thermoelectric props. rel. to thickness 8=40638
Cu-Ni film, for mag. film substrates meas. 8=31676
Pt/Pt-10% Rh, accuracy of calibration 8=46267
W-Ta, thermoelec. potentials 0°-420°C 8=28418
Thermodynamic properties
See also Critical constants, thermal; Entropy; Heat of reaction; Latent heat.
agents, surface-active non-ionic, + water systems; heat of mixing obs. 25°C 8=48126
air, up to 1000° C and 1000 bars 8=34654
alcohol-hydrocarbon solns, model and excess Gibbs energy and enthalpy 8=43797
alcohol-inert solvent solns, H bonding entropy and enthalpy and ratio of molar vols. 8=43799
alcohols, with dissolved gases, excess molar free enthalpy 8=39319
alkali halides, NaCl-type, Anderson-Grüneison parameter for Born-Mayer potential 8=39906
alkaline earth metals, vapour pressure calc. 8=40699
antiferromagnetic Heisenberg linear chains, alternating and eigenvalue spectrum 8=31751
austenitic Fe base alloys, statistical thermodynamics of C 8=39903
bauxites, rel. to production of crude Al alloys by reduction of aluminous ores 8=30956
benzene + n-heptane system, excess isothermal compressibility and molar heat capacity 8=43794
benzenes, mono-substituted, enthalpies of activation 8=34889
benzoic acid, H-bridge complexes, from u.v. absorpt. spectra 8=39349
binary hydrocarbon liq.-vapour interface, adsorpt isotherms 8=48041
bismuth titanate, rel. to ferroelectricity 8=44887
by calorimetry, stored energy spectra 8=24029
cell theory, equilibrium and thermodynamical functions 8=48057
chemical potential generation by phase diagram analysis 8=49836
classical non-uniform gas, moderately strong coupled, entropy balance eq. 8=30292
complexes in solns. cont. $NaClO_4$, instability consts. calc. via Debye-Huckel type eqn. 8=25905
crystal, anharmonic, molec. field theory, classical and quantum, book 8=30954
crystal, bravais, anharmonic freq. shift and free energy, analysis of cubic contribs 8=30952
crystal cooling by transfer of laser radiation energy into heat energy of atomic vibrations 8=39900
enthalpies of thermochem. reactions, by matrix formulation of Hess's law 8=36546
equibilrium, stability conditions 8=37223
ethanol-n-decanol mixtures, molar excess props. 8=48284

Thermodynamic properties—contd
ethyl alcohol, i.r. study rel. to simple model of liq. 8=30401
feldspar and silica mixtures 8=39297
ferromagnet, magnetocrystalline anisotropy free energy, temp. dependence 8=44996
films, fluctuations 8=35421
fluid mixtures, effects of molec. sizes 8=47896
fluids, confined, thermal stability, Hilbert spaces analysis 8=25786
fluids, equilibrium configurational properties, appln. of statistical mechanics 8=34573
formamide-dioxane liq. system 8=34825
free energy in type II supercond., stress depend. 8=26996
galactose, amorphous, enthalpy and sp. ht., 15-45°C, rel. to mol. structure 8=30966
gas and crystal system with isotopic defects, equilib. 8=48293
gas mixtures, chem. reacting, equilib. comp. etc. 8=32088
gases, hot, approx. calcs. 8=47954
gases, of resonant atoms, effect of dipole-dipole interact 8=39194
glucose, amorphous, enthalpy and sp. ht., 15-45°C, rel. to mol. structure 8=30966
h.c.p. crystals, rel. to non-control force model 8=30621
Heisenberg antiferromagnet, free surface effects 8=45048
Heisenberg ferromagnet, and spin-wave distrib. function 8=44983
Heisenberg ferromagnet with arbitrary spin 8=49490
of homogeneous gaseous, liq. or equilib. systems with components undergoing reaction 8=27681
inert gases, analytical potential models 8=30272
ionic solns, computation of equilib. props. 8=34782
Japanese colloidal earth, rel. to production of crude Al alloys from aluminous ores 8=30955
laser, periodically pulsed, thermal conditions in active material 8=46599
lattice vibr., calc. from continued fractions 8=44291
light-producing devices, limits 8=24382
liquid mixtures, determ. from light scatt. 8=43814
liquid mixtures, excess functions 8=39321
liquid mixtures, nonpolar, molec. model and excess Gibbs energy, enthalpy and vol. 8=43797
liquids, laminar flow and viscosity, thermodyn. state 8=25848
magnetic systems, shape dependence 8=44326
magnetic systems with dipole interactions, shape-dependence 8=44329
magnetothermodynamic, high-field, low-temp., use of supercond. magnet 8=41882
mannose, amorphous, enthalpy and sp. ht., 15-45°C, rel. to mol. structure 8=30966
metal, influence of band structure 8=39904
methane equilibrium combustion products, computer calc. 8=27730
methanol-n-decanol mixtures, molar excess props. 8=48284
methyl alcohol, i.r. study, rel. to simple model of liq. 8=30401
moisture absorbed in porous bodies 8=44070
p and m-xylenes, calc. using significant struct. theory 8=43767
permalloy film, thermally activated domain wall movement 8=45020
phonon mode distrib. rel. to absorpt. of ultrasonic waves in insulators 8=35402
plasma, collisionless, stability 8=30170
plasma, completely ionized, relativistic corrections for e.m. interact. 8=39074
plasma, partially ionized, Saha eqn. 8=30006
polyethylene, crystallized from diluent mixtures, enthalpy of fusion 8=34966
polyethylene enthalpy, −150-+150°C 8=24028
polyethylene, linear fractions, mol. dispersed eutectic systems 8=44095
polypropylene, isotactic, in θ solvents, interaction params., obs. 8=43899
quartz high-low inversion 8=48401
quartz, high-low inversion, of lambda transition 8=39563
sphere in stream of small Reynolds number, heat transfer 8=30457
stars' interiors 8=32418
steel, liq., C activity rel. to Co, Mo, Ni, V, W conc. 8=30458
steel, stainless, explosive shock-loaded recovery 8=49004
superconductor with nonmag. impurity and energy bands overlap 8=39901
superconductors, impurity scattering effects 8=40346
superconductors in mag. fields 8=49181
supercooled liqs, enthalpy and entropy of dipole polarization activation 8=39403
ternary systems, quasi-chem. approx. 8=48083
thin turbulent liq. boundary layer with blowing 8=43728
transition metal carbides, nitrides and oxides, rel. to M-M interaction 8=26441
trifluoromethylphosphonylchloride 8=34330
vanadyl acetylacetonate, enthalpy changes for reaction in nitrobenzene soln. 8=43872

Thermodynamic properties—contd
- viscoelastic media, and waves 8=41734
- water, light and heavy, calc. using significant struct theory 8=43767
- water, with ions at infinite dilution, for hydration numbers 8=43754
- Ar-air, 50° to 3500° K 8=25838
- Ar, liq., calc. from Lennard-Jones parameters by Monte-Carlo method 8=25907
- Ar plasma jet, atmos. press., test of local equilib. 8=39146
- AsH_3, liq., crit. props. and entropy, rel. to significant struct. theory 8=43755
- $BaCl_2$, enthalpy and entropy, and heat capacity rel. to temp. 8=44339
- BaI_2, enthalpy and entropy, and heat capacity rel. to temp. 8=44339
- $BaTiO_3$, enthalpy changes at Curie point 8=35972
- C in austenite, electrochemical study 8=44327
- CF_3 radical 8=29723
- CO_2-air, 50° to 3500° K 8=25838
- COF_2, from 12°K to b. p. 8=30573
- Cu, cementation with Fe, activation enthalpy 8=43898
- Cu oxides, by e.m.f. meas. 8=48729
- Cu-Be alloys, rel. to ageing 8=35098
- $CuSO_4.5H_2O$, below 4°K in mag. fields 8=39914
- Er-D system 8=44330
- Fe base alloys, interstitial solutions 8=44328
- Fe oxides, by e.m.f. meas. 8=48729
- FeP, and magnetic props. 8=27378
- Ga-In liq. alloys, activities 8=39315
- GeO_2, enthalpy and entropy, and heat capacity rel. to temp. 8=44339
- H_2O, i.r. study, rel. to simple model of the liq. 8=30401
- He-air, 50° to 3500° K 8=25838
- He isotope solns, enthalpy and osmotic pressure 8=28436
- He^3, b. c. c., obs. 8=37356
- He^3, solid magnetized, rel. to nuclear spin interaction 8=41905
- HeII, Landau theory of phase transitions 8=33001
- He II, potential function near T_λ 8=24052
- Hg solubility in 17 solvents, temp. depend. and entropies 8=43798
- K solutions, unsaturated, in melted KCl. 8=48060
- KBr, F-aggregate bands, thermal and optical stability, half-widths and oscillator strengths 8=49732
- KD_2PO_4, entropy of phase transition 8=44338
- KH_2PO_4, entropy of phase transition 8=44338
- KNO_3, enthalpy and entropy, and heat capacity rel. to temp. 8=44339
- Kr, solid, from thermal expansion, sp. ht., compressibility and vacancy equilib. conc. meas. 8=48745
- LaF_3, entropy and enthalpy in range 1050°-1200°C 8=35015
- LiF solid, oxide doped, oxide and hydroxide activity determ. 8=36593
- Mn oxides, by e.m.f. meas. 8=48729
- N_2 gas, hot, approx. calcs. 8=47954
- NF_3, molec. calc., 200° to 2000°K 8=43319
- NH_3, as ideal gas 8=47960
- Na_2SO_4, molten, rel. to props. of Na silicate, and N_2O activities 8=34826
- Na_2SO_4, molten, thermodynamic activity rel. to props. of Na silicate 8=34826
- Ni oxides, by e.m.f. meas. 8=48729
- $NiCl_2$ in alkali halide melts, thermodynamic props from cells emf's, 8=49946
- NiO in NiO-MgO solid soln. 8=43979
- Ni-Zn alloys, data 8=48726
- PH_3, liq., crit. props. and entropy, rel. to significant struct. theory 8=43755
- Pb oxides, by e.m.f. meas. 8=48729
- Pd-Cu alloys, of formation 8=27714
- Pt-Cu alloys, of formation 8=27714
- ScF_3, entropy and enthralpy in range 1050-1200°C 8=35015
- SnH_3CH_3 and $SnCl_3CH_3$ mols. 8=38890
- SrF_2, enthalpy and entropy, and heat capacity rel. to temp. 8=44339
- Tl-Cd liquid soln. 8=30455
- UCl_3 soln. in molten NaCl, partial v.p. obs. 8=30456
- UO_2, enthalpy as function of temp. to 3100°K 8=35436
- UO_2, high temp. enthalpy and heat of fusion 8=39902
- YF_3, entropy and enthalpy in range 1050°-1200°C 8=35015
- Zn in liq. Zn-Au, activity by e. m. f. meas. 8=25906
- Zn-Sn-Cd-Pb liq. solns, rel. to calc. of Zn activity coeffs. 8=43795
- ZrO_2, hydrated amorphous, behaviour, and nature 8=43982

  n-Bi_2Te_{3+x}, growth conditions and Te phase effects 8=49392
  Bi_2Te_3 + 20 mol% Bi_2Se_3, power rel. to supercooling conditions 8=44906
  Bi_2Te_3-Sb_2Te_3-Sb_2Se_3 pseudoternary alloy, growth-rate dependence rel. to p- and n-types 8=44907
  n-$Bi_2(Te, Se)_3$, n-irradiated, thermo-emf, elec. and thermal conductivity 8=27136
  Bi-Te-Se(Sb) system, γ-irrad. effects on thermoelec. force 8=44763
  $Cd_xCa_{1-x}O$, thermopower, and elec. and optical props. 8=49137
  CdS crystals, rel. to local centre formation in presence of free electrons and holes 8=36015
  CdS, illuminated, power 8=35997
  CdSb, thermopower anisotropy in intrinsic conduction region 8=40639
  CdSb: In(Cu), power rel. to temp. 8=44768
  $Cd_xSr_{1-x}O$, thermopower, and elec. and optical props. 8=49137

Thermoelectricity—contd
  Cr-Mo alloys, absolute power between 100 and 600°K 8=49393
  Cu, absolute thermopower, effect of plastic deform. 8=31447
  Cu, power due to electron phonon interaction 8=49394
  Cu ternary chalcogenides, Seebeck coeff. at room temp. 8=31448
  CuAu alloy, power and electrical resist. 8=26967
  Cu-Co alloy, dilute, thermoelect. power in mag. field 8=31449
  Cu-Ni alloys, dilute, thermoelect. power in mag. field 8=31449
  β-$FeSi_2$:Co, Al, power, mechanism 8=35885
  Ge, d. c. current meas. rel. to cyclotron resonance obs. 8=27099
  n-Ge, eddy current expt. 8=40642
  n-Ge, force, hot carriers 8=40641
  Ge, second-harmonic thermoelec. voltage 8=40463
  Hf diborides, rel. to conduction e-parameter calcs. based on single zone model 8=53830
  β-HgS films, e, m.f. temp. dependence 8=44792
  HgTe, power, 100° at 300°K 8=40242
  n-InAs, magnetophonon oscillations in longitudinal thermoelec. power 8=27308
  n-$InAs_xSb_{1-x}$ alloys, obs. and e scatt. calc. 8=35758
  n-$InAs_xSb_{1-x}$ alloys, high-temp. obs. 8=40475
  In-Ce solid solns., power (Ce) conc.-dependence rel. to localized moments 8=31339
  LaSb, power temp. dependence, 80-500°K 8=27309
  LaSb, thermopower temp. dependence rel. to semi-metal charact., 8=39948
  $Mn(Mn_xV^{4+}_xV^{3+}_{2-2x})O_4$, $x < 0.68$, thermoelectric power and structure 8=35340
  MnO, thermoelectric force, 1100°C 8=40477
  MnO: Li, power, rel. to conduction 8=44801
  MnTe, antiferromagnetic semiconductor, power, interpret. using magnon drag. 8=32009
  p-MnTe: Ag, fig. of merit obs. 300°-1000°K 8=44908
  Nb–Hf alloys, thermoelectric properties 8=49395
  Nb–Ti alloys, thermoelectric properties 8=49395
  Ni-H system, power rel. to H conc., 77-250°K 8=35998
  n-PbS, thermoelectric power rel. to conduction band structure, 77-300°K 8=27119
  $PbTe_xSe_{1-x}$ thermopower meas. rel. to forbidden band width temp. dependence 8=40247
  PbTe-SnTe-PbS system, meas. rel. to current carrier scattering mechanism 8=31385
  PdCr alloys, thermoelect. power 8=31450
  Sb, solid-liquid boundary, Peltier coeff. meas. rel. to impurity 8=44909
  Sb, thermopower, 5-300°K, rel. to phonon drag effects 8=40219
  p-$(Sb, Bi)_2Te_3$, n-irradiated, thermo-emf, elec. and thermal conductivity 8=27136
  p-Sb_2S_3, trap depths from thermally stimulated and dark conductivities 8=44807
  SbSI grown from gaseous phase, volatile component saturation vapour pressure effects 8=36026
  Sb_2Se_3, energy spectrum of traps from thermally stimulated depolarization meas. 8=40251
  Sb_2Se_3 melts, doping effects on thermopower temp. dependence, 1300-1400°K 8=34899
  SbSeI grown from gaseous phase, volatile component vapour pressure effects 8=35989
  Sb_2Te_3, thermopower rel. to complex valence band structure 8=44808
  Se, power in phase transition region, conductivity rel. to temp. 8=40481
  p-Si, thermopower and magnetothermal effects 8=35912
  α-SiC (6H), high-resistivity, doped accidentally, rel. to band scheme 8=35779
  Sn quantum oscills. in e. m. f. at 1.3°K 8=40643
  Sn-Ce solid solns., power (Ce) conc.-dependence rel. to localized moments 8=31339
  $Te_{70}Cu_{25}Au_5$ alloy, amorphous, resistance and thermopower meas., 80-300°K 8=40497
  Ti diborides, rel. to conduction e-parameter calcs. based on single zone model 8=35830
  TiC, power and elec. conductivity, 20-2000°C 8=2 7310
  TiO_2 (rutile) thermally stimulated currents 8=36513
  Tl_2Se, thermopower temp dependence, 100-540°K rel. to carrier props. 8=49396
  Tl-Te alloys, liquid, n-type, Seebeck coeff. 8=34897
  α-U_3O_8, power meas. rel. to semicond props. 8=35999
  US, power near Curie temp., and elec. cond. 8=44677
  VO_2 sputtered films, power rel. to transport props. 8=27138
  W-Ta thermocouple, potentials 0°-420°C 8=28418
  Y-Ce dilute alloys, mag. susceptibility and thermopower due to s-f anomaly 8=27384
  $Zn_{0.1}Cd_{0.9}Sb$ solid solution crystals, thermoelectric power anisotropy 8=27311
  ZnO films, polycrystalline dye-sensitized 8=35994
  ZnSb, power anisotropy, 200°-300°K 8=44910
  Zr diborides, rel. to conduction e-parameter calcs. based on single zone model 8=35830
  ZrC, power and elec. conductivity, 20-2000°C 8=27310
  $(ZrO_2)_{0.85}(CaO)_{0.15}$ electrolytic thermocell, Seebeck coeff. 8=45392

Thermoluminescence
concretion, and formation 8=50004
crystal, ionic, photon counter 8=49785
devices for low and high temperatures 8=49831
diamonds, synthetic u.v. and X-ray irradiated, 20-400°C rel. to impurity and crystallization effects 8=36474
felspars, X-irradiated, rel. to structure defect exam. 8=26710
fluorites, dosimetric parameters, from Bulgarian ore deposits 8=49799
glasses, industrial, rel. to heat treatment 8=36460
organic matter, radiothermoluminescence 8=41220
quartz, rel. to γ-irrad. effects 8=49812
silicate glass, irradiated, and e.p.r. and electron absorpt. spectra 8=41196
with spectral dispersion, lab. apparatus for exam. 8=45252
II-VI semiconducting cpds., conference 8=31362
vitreous state, rel. to struct. and phys. props. 8=36465
BaO, x-irrad., 8=41184
Ca halide phosphates, obs. 8=36480
CaF_2, γ-irradiated at 77°K, activation energies and emission spectra 8=36477
CaF_2, synthetic γ-irradiated, spectra and transition kinetics 8=45262
CaF_2:Ce^{3+}, rel. to 4f ↔ 5d transitions 8=45263
CaF_2:Mn, read-out, u.v. induced luminesc. rel. to irrad. dose, obs. 8=45261
CaF_2 : Mn, rel. to doping and dosimetric props. 8=49807
CaO, x-irrad., 8=41184
CaS: Ce phosphor, obs. rel. to decay 8=45305
CaS: Zr phosphor, peak shift and trap depth obs. 8=45306
$CaWO_4$, defect sites identification from correlation of e.s.r. and thermoluminesc. meas. 8=31028
$CaWO_4$, rel. to e.p.r. meas. 8=49602
He II, heated by small wires 8=24044
KBr, photostimulated, 50-250°K, 240-700 mμ 8=27652
KCl:I, rel. to ICl^- V_k centre, 8=48875
LiF, spectral emission of intense peaks rel. to heating and irrad. 8=36498
LiF, stimulation by excitation of a centre 8=41200
LiF/CaF_2:Mn dosimeters in tandem, for effective energy of X- or γ-ray fields 8=25169
LiF : Cu, Ag, rel. to doping and dosimetric props. 8=49807
LiF: Mg, effects of pre-irrad. isothermal annealing 8=45280
MgO, V^1 centre thermal decay temp. dependence, 18°-50°C 8=31121
Na-Ca silicate glasses 8=30792
NaCl, activation energy for glow peaks, by initial rise method 8=32056
$NaPO_3$, glassy and cryst., —180 to +20°C 8=41204
SrO, x-irrad., 8=41184
ZnO powder spectrum 8=32065
ZnS, doped, after u.v. irrad. correl. with thermally stimulated elec. cond. 8=49817
ZnS: Cu, Cl, and thermally stimulated dielectric effect 8=36518
Thermomagnetic effects. See Magnetothermal effects.
Thermometers

  - liquid, structure factor 8=48062
  - magnetoresistance at liq. He temps. and over large range of mag. fields 8=27031
  - magnetoresistance, quantum oscillations, obs. 8=44975
  - optical consts. of single crystal from reflectance ratios 8=45164
  - particle layered with SiO, supercond., size effect on n.m.r. 8=44735
  - photoelectric γ cross-section determ. 50-208 keV 8=36004
  - plasticity and slip instability in white Sn single crysts., obs. 8=40181
  - positron annihilation 8=49131
  - positron annihilation, single-quantum, cross sections 8=44670
  - sheet, bound by Araldite or Cemendine 3000, hardness 8=40121
  - stopping power for 3.75–5.5 MeV proton, using (p, n) obs. 8=43030
  - stress and temperature, rel. to strain-rate 8=31232
  - superconducting, complex elec. cond., strong-coupling calc. 8=35854
  - superconducting films, energy gap mag. field and film thickness dependence by e-tunnelling 8=27033
  - superconducting films, microwave transmission meas. 8=40386
  - superconducting, helicon-like oscillations 8=44736
  - superconductivity of particles embedded in oxide film 8=40388
  - superconducting props. rel. to Al admixture 8=40389
  - superconducting ring, current fluctuations and critical currents obs., temp. depend. 8=40387
  - superconductor film, clean and dirty, critical mag. field 8=44734
  - superconductor, film, tunneling expts in mag. field 8=44732
  - superconductor, quantum phase coherence in two coupled, Josephson junctions 8=44733
  - tempered, as ohmic contacts for Gunn elements 8=49282
  - thermoelectric e. m. f. variations, rel. to magnetic breakdown 8=40643
  - weak line transition probability calc. 8=29621
  - whiskers, electrolytic growth conditions 8=30837
  - white, anomalous Shubnikov-de Haas amplitudes 8=49474
  - white, helicon propagation, mag. breakdown effects 8=62932
  - white, thermal lattice vibration spectrum determ. 8=35393
  - white, Knight shift, temp. depend. 8=41002
  - X-rays, anomalous transition 8=49757

Tin—contd
- zone-refined, solute-induced hardening near grain boundaries 8=26842
- Sn^{2+} for activation of $Zn(SCN)_2$, luminesc. 8=36520
- Sn^{117} and Sn^{119}, level crossing investigation of hyperfine struct. 8=29629
- Sn^{119} crystal, pulsed n.m.r. obs. 8=31918
- Sn^{119}, diffraction of resonance γ-rays, on nuclei and electrons 8=39821
- Sn^{119} impurity in metallic matrices, Mössbauer absorpt. spectra, interpret. of isomer (chem.) shift 8=48318
- Sn^{119}, resonant radiation, diffraction on electrons and nuclei, obs. 8=48334
- α-Sn, band structure, including spin-orbit effects 8=44825
- Sn(IV), isomer shifts in ice, conc. depend. 8=43957
- Sn-Sn tunnel junction, anomalous behaviour at superconducting transition 8=44738

Tin compounds
- chalcogenides, epitaxial deposition on NaCl/KBr substrates at 293-873°K 8=39599
- Mossbauer effect, isomer shifts and nuclear radius change 8=26026
- salts with mixed anions, i. r. absorpt. spectra 8=36413
- tetrahalides, mol. addition compounds with triphenyl (phosphine and arsine), i. r. spectra, stretching vibs. freq. shifts 8=25631
- tetramethyl tin free radical form., e. s. r. detection 8=34382
- tin(II) hydroxide, structure 8=44255
- Sn chalcogenides, thin films, struct. and props. 8=39600
- Sn complex, diacetate tetramethyl distannoxane 8=26368
- Sn-Bi alloy substance entering in He and air arc discharges 8=47777
- SnBr, $B^2\Sigma$-$X^2\pi$ system, u. v. absorpt. after flash photolysis of $SnBr_4$ 8=34284
- Sn-Ce solid solns., superconductivity, resistivity and thermoelec. power rel. to localized moments 8=31339
- $Sn(C\equiv H)_4$, i. r. and Raman spectra 8=25625
- $Sn_3(CH_3)_4Fe(CO)_{16}$, crystal and mol. structure 8=26537
- $SnCl_4$, Coriolis coupling consts. and force fields 8=38822
- $SnCl_4$, vibr. relax. and u.s. attenuation 8=39360
- Sn-Co, ferromagnetism in liq. state, and elec. resist 8=43871
- SnF, dissoc. energy 8=38933
- SnF_2, mass spectra of vapour 8=38933
- SnH_3CH_3 and $SnCl_3CH_3$, force consts. and thermodyn. props. 8=38890
- SnI, $B^2\Sigma$-$X^2\pi$ system, u. v. absorpt. after flash photolysis of SnI_4 8=34284
- SnI_4, far i. r. cryst. spectra 8=45223
- Sn-In alloy film, supercond. tunneling expts in mag. field field 8=44732
- Sn–In films, superconducting, mag. props. 8=44974
- Sn-Ni, ferromagnetism in liq. state, and elec. resist 8=43871
- Sn/Pb solder, determ. of Au, Ag and Cu by X-ray spectrometry 8=27816
- SnO, transparent and elec. conducting film, deposition on glass 8=44061
- SnO_2-coated glass analogue system for electrochem. system 8=32129
- SnO_2 colloidal soln. in glycerine-alcohol mixture, γ-rays reson. absorpt. 8=24701
- SnO_2 crystals, i. r. absorpt. spectra rel. to optical lattice-vibration modes 8=45222
- SnO_2 films, prep. and props. by reactive cathode sputtering 8=44062
- SnO_2, static dielec. constant 8=49353
- n-SnO_2:Sb, elec. and optical props. 8=27135
- n-SnO_2:Sb, elec. and opt. props 8=49270
- SnO_2: Zn, chemisorbed oxygen effect on elect. conductivity 8=31391
- Sn-Pb alloys, liquid, density 8=39325
- SnS, epitaxial film, structure and optical props. 8=44060
- SnS, thermal conductivity from experimental parameters 8=48764
- SnSb precipitation from Pb rich alloy of Pb-Sn-Sb ternary system, rel. to aging 8=26764
- Sn-Sb, second-phase deformations after cold rolling 8=49001
- SnSe, epitaxial film, structure and optical props. 8=44060
- $SnSe_2$, photoelectric emission 8=36055
- $SnSe_2$, refractive index and absorpt. coeff. 8=45220
- Sn–SnO–Sn Josephson junction, relax. oscills. 8=40412
- SnTe, Debye temp. determ. using Mössbauer effect in Sn^{119} and Te^{125} 8=44344
- SnTe epitaxial film, structure and optical props. 8=44060
- SnTe, high pressure phase transformations 8=35082
- SnTe, optical and elec. meas. rel. to band structure determ. 8=49726
- SnTe, superconducting interactions 8=27032
- SnTe, thermal conductivity investigation, 100-450°K 8=30992
- p-SnTe, valence band structure 8=44652
- SnTe-GeTe, high pressure phase transformations 8=35082
- SnTe–PbTe, solid solns., heats of formation, hardening, and lattice characts. 8=43981
- SnTe–SnSe system, phase diagram 300° to 900°C 8=44013
- SnX_4, (X = Cl, Br, I, H, Li, Na), Sn^{119} isomeric shift dependence on at. radius of X 8=30637

Tin compounds —contd
- Sn-Zn alloys, electrotransport at 500°C 8=34901
- Sn-Zn alloys, liq., heat conductance 8=39351
- Sn–10% Zn liquid, rel. to ductile-brittle transition in Al 8=35656
- Sn–10% Zn liquid, rel. to ductile-brittle transition temp. of Al, strain rate depend. 8=35657

Titanium
- additions, rel. to props. of Malcolloy (Co–Al), magnetic alloy 8=40803
- α- and β-solid solutions, separation conditions 8=48347
- atom, internal conversion coeff. for e. m. transition between shells 8=38670
- deformation mechanisms, rel. to impurity obstacles 8=44604
- desorption from W in strong electric field 8=35197
- diffusion of H in h.c.p. and b.c.c. types, 610° to 900°C 8=44393
- diffusion processes in weld joints under transient pressure 8=44373
- elastic constants, temp. dependence, 4. 2-36°K 8=49054
- electrodes, measured conductance rel. to measured capacitance and Faradaic current 8=49929
- electron reflection, 500 to 1200 keV 8=44197
- films on Nb alloys, non-electrolytic deposition from fused slats at high temps. 8=44063
- films, resistance and work function rel. to adsorpt. of Ba, O_2 and BaO 8=40322
- films, sticking probabilities of N_2 8=30771
- foil, self-supporting, vacuum deposition method 8=39601
- h. c. p., angular relns. between plane normals and crystallog. directions 8=44087
- interaction of NH_3, H_2 and N_2 8=32103
- ions, Ti^{3+} doped corundum, catalytic C_2H_5 hydration 8=32122
- lattice params. and thermal expansion rel. to para-antiferromag. transition, —180-1500°C 8=44253
- neutron irradiation creep obs. at 100°C 8=26833
- n.m.r. in Ti-H systems 8=49658
- optical absorption and ionic conductivity in silver halogens 8=41052
- oxidation kinetics and growth of diffusion layer, effect of O_2 press. 8=36573
- oxidation rate-constant determ., low-temp., from discontinuous film resistance changes 8=49883
- oxide film form. in boiling dilute H_2SO_4 and HCl, differences in struct. 8=39602
- plasma source, nonlinear effects in operation 8=34569
- press broadening and shift of lines by Ar 8=43204
- reorientation mechanism during recrystallization 8=44086
- sheet, crystallographic anal. of plastic anisotropy 8=35721
- sheet, plastic anisotropy and plastic flow of circular diaphragm 8=35720
- in solar chromosphere, lower, Ti^+ emission regions 8=45914
- stacking fault probab. of cold-worked, X-ray obs. 8=26704
- stress-corrosion cracking in methanol vapour 8=40184
- thermal expansion, 2° to 30°K 8=44349
- thin film, resistivity, ion-bombardment induced changes 8=49151
- weight determination in alnico alloys and ferro-titanium 8=49984
- X-ray K_α, emission, depth distrib. and absorpt. in anti-cathode, 17-29 kV 8=36420
- in Al melts, u. s. dispersion, 740-800°C 8=39442
- H_2 desorpt. obs. 78°-300°K 8=30772
- Hg boiling corrosion of steel inhibited by Ti impurity 8=47426
- Ti^{48}, μ-mesic x-ray Lyman and Balmer lines and μ-capture x-rays, obs. 8=34189
- α-Ti and O mixed crystals, lattice struct. rel. to hydrogenation, n diffr. obs. 8=35357
- α-Ti, plastic flow mechanisms, 0-600°K 8=49057
- Ti II, spectra in excited configurations, theory 8=43203
- Ti V, $3p^6$-$3p^54d$ transitions 8=43178
- Ti^{3+} ion in $BaTiO_3$, electronic transition theory 8=49362
- Ti^{3+} substituted alums, crystal-field origin 8=43935
- Ti : Fe^{57}, f number isomer shift pressure dependence 8=48321

Titanium compounds
- alloy, equiaxed $\alpha + \beta$ type, determ. of β grain zize 8=44170
- alloys, high-strength, fracture toughness dependence on thickness, work-hardening exponent effect 8=26766
- alloys, stress corrosion cracking 8=27716
- atom. spectra line press. broadening in Ar atm. 8=34153
- diborides, conduction e-parameters calc. based on single zone method 8=35830
- infrared absorpt. spectra 8=36421
- oxides, vaporization from liq. phase 8=30603
- oxidic titanates, cryst. struct. effect on luminesc. 8=45284
- rutile, h.f. conductivity, dielectric const. 8=49331
- rutile, Cr-doped, microwave orientation 8=26184
- rutile (TiO_2) crystals, doped, optical absorpt. by polarons 8=36418
- titanomagnetite transform. to titanomaghemite on cryst. margin 8=35125
- Ti alloys, fracture toughness parameters 8=49058
- Ti carbides, formation by chemical vapour deposition, discussion 8=45348

Titanium compounds—contd
Ti methoxide, crystal and mol. structure 8=26523
Ti-Ag system, phase diagram in reln. to diffusion process 8=35509
Ti-6Al-4V alloy, addition of Co, properties 8=49055
Ti-8% Al alloy deform. mechs. rel. to impurity obstacles 8=44604
Ti-9 A-Mo-V, stress-corrosion cracking in methanol vapour 8=40184
Ti-Co system, solubility limit study by X-ray diffractometry 8=30709
Ti-H systems, n.m.r. of Ti 8=48658
Ti-Mo alloys, low temp-electronic sp. heat, BCS theory 8=39922
Ti-16 at.%Mo alloys, type II superconductor, mixed state Hall effect 8=27035
Ti-6%Mo alloy, quenched, structure study by electron microscopy 8=30869
Ti-47% Nb, α-phase formation during heating in e-microscope 8=35119
Ti-22 at.%Nb/Cu composite conductors, ω precip. rel. to critical current densities 8=40419
Ti-Ni, soft X-ray spectroscopy 8=36419
Ti-Ni-Sb-O system, rutile solid solution and reaction diagrams 8=48404
Ti-Ni-Sb-O system, rutile solid solution formation 8=48405
Ti-Pd alloys, phase diagrams, solubility 8=35127
Ti-V alloys, self-diffusion comp. -temp. dependence 8=26623
Ti-V alloys, superconducting critical current densities rel. to ht. treatment 8=40391
Ti-W-C alloys, phase diagram revision 8=39565
Ti-Zr-O alloys, creep rel. to polymorphic substitution temp. 8=49059
$TiBe_{12}$, hexagonal, OD-structure 8=26442
on $TiBr_4$-Ar mixture, TiI, II absolute gf-values determ. 8=43489
TiC, field ion microscopy 8=26289
TiC, self-diffusion coeff. of C^{14}, comp.-dependence, 1450-2280°C 8=39985
TiC, thermoelec. power and elec. conductivity, 20-2000°C 8=27310
TiC-TiO solid solution with outer layer of TiO_2 with intermediate Ti_2O_3 as cutting tool protection layer 8=48428
α- and β-$TiCl_3$, optical props. 8=36417
$TiCl_4$, vibr. relax. and u.s. attenuation 8=39360
TiCo alloys, n.m.r. and mag. susceptibility at 295 and 77°K 8=31920
$TiCr_2S_4$, cryst. and mag. struct., comparison with $TiCr_2Se_4$ 8=35358
$TiCr_2Se_4$ cryst. and struct. mag., comparison with $TiCr_2S_4$ 8=35358
TiFe alloys, 3d-electron redistrib. from X-ray spectra 8=35780
$TiFe_{1-x}Co_x$, n.m.r. and Mossbauer effect line profile comp. temp. and stoichiometry dependence 8=31921
$TiFe_xCo_{1-x}$ alloys, structure and mag. props. from n-diffr. exam. 8=30912
TiH_2, positron lifetime 8=40286
TiH_x, $(x < 2)$, H orbital expansion effects on d-electron exchange rel. to mag. props. 8=49480
TiN inclusions in steel, thermal expansion and reln. to tessellated stresses 8=44350
TiN, Ti Kα band in X-ray emission spectra rel. to electronic structure 8=41148
TiNb33:N, O and metals, supercond., microstruct. and workability, obs. 8=44742
TiNb40:N, O and metals, supercond., microstruct. and workability, obs. 8=44742
TiNi and associated cpds., conf. 8=30868
TiNi, creep obs., 700-1000°C 8=26849
TiNi crystals, obs. in premartensitic states on cooling 200-0°C 8=30710
TiNi, internal friction and elastic constants temp. dependence, −170 to 800°C 8=26847
TiNi, phase transform. within irreversible critical range rel. to electronic transform 8=30708
TiNi, shape-memory effect at 90°C after plastic deform. at room temp. rel. to martensitic transform 8=30707
TiO, molecular bands in M star spectra 8=28060
TiO solar lines equivalent widths calc. 8=37065
TiO, vacancies and supercond. 8=31345
TiO_2, acoustic wave generation by electrostrictive mixing of light waves 8=45162
TiO_2, addition to $BaTiO_3$ to promote conduction 8=49228
TiO_2, adsorbed polymer layer thickness 8=39620
TiO_2, adsorption of surface-active substances and polymers 8=48494
TiO_2-based dielec., Ag diffusion 8=31016
TiO_2-containing-glasses, small polaron as charge carrier 8=40499
TiO_2, e.s.r. spectrum, d^1 config. 8=45102
TiO_2 films, amorphous, prep. by vacuum evap., crystn. by electron irradn. 8=39691
TiO_2 for ruby and sapphire doping, reduction of laser prod. damage 8=33198

Titanium compounds—contd
TiO_2 in BaO-TiO_2-SiO_2 glasses, structural states 8=44078
TiO_2, inert gas depth distrib., sputtering obs. 8=48923
TiO_{2-x}, resist. rel. to stoichiometric defects, 20-1000°C 8=39999
TiO_2, rutile, defined surfaces, adsorpt. of ethanol, n-octanol and n-dodecanol 8=35196
TiO_2 (rutile), thermally stimulated currents and luminescence 8=36513
TiO_2 single crystals, time-dependent elect. conduction 8=27250
TiO_2, small polaron conductivity, i.r. absorption 8=40498
TiO_2, spectral reflectance 8=41128
TiO_2, thin film deposition from thermal decomp. of tetraisopropyl titanate 8=35185
TiO_2 outer layer on TiC-TiO solid solution with intermediate Ti_2O_3 layer as cutting tool protection 8=48428
TiO_2, Voigt-Reuss-Hill approx. rel. to meas. of elastic moduli 8=40188
TiO_2, work function and elec. cond., changes in response to chemisorpt. of O 8=40691
TiO_2: Co^{2+}, ENDOR 8=41007
TiO_2 : M^{4+}, ENDOR 8=41007
TiO_2:Cr^{3+}, structure determ. by e.s.r. 8=39823
TiO_2, MO calcs on TiO_6^{-n} unit, rel. to energy levels and absorpt. spectra 8=45225
TiO_2: Mo^{5+}, paramag. relax., temp. depend. 8=36247
TiO_2, Ti $\mathbf{K}_\alpha$ line shift rel. to e microprobe analysis, obs. 8=27804
TiO_2-Sb_2O_3-NiO system, comp., structure and colour 8=26039
TiO_2-SnO_2 system, spinodal decomposition 8=39703
TiO_2: V^{4+}, ENDOR 8=41007
TiO_2: V^{4+}, paramagnetic spin-lattice relaxation 8=40945
TiO_2-WO_2 system, melting relation 8=39476
TiO_n, Ti Kα band in X-ray emission spectra rel. to electronic structure. 8=41148
TiO_6^{-n} localized units, extended Huckel MO calcs. rel. to absorpt. spectra and energy levels 8=45225
$TiTa_2O_7$, cryst. struct. 8=48403
TiX, (X=Fe, Ni, Co or combinations), relative ductilities 8=26848
Ti_2O_3, crystallographic studies of transition 8=48678
Ti_2O_3, neutron-diffraction data, rel. to mag. phase 8=31800
Ti_2O_3, protective oxide layer in cemented WC-TiC cutting tools 8=48428
Ti_2O_3, resistivity and mag. order 8=31313
Ti_5O_9, magnetic properties, anomalous, 77°-160° 8=31511
Ti_8Te_8 phase, unit cell parameters and ordering of vacancies 8=35359
Torquemeters. See Mechanical measurement.
Torsion
See also Elastic constants; Stress analysis.
balance for low-temp. mag. anisotropy meas. 8=31723
elastic cylinders in contact 8=32717
elastic-plastic, as problem in non-linear programming 8=41710
magnetostrictive circular bar, permeated by longit. mag. field, problem 8=33039
microbalance, elec. for mag. torque meas. 8=37381
plastic, of hollow cylinders, length change rel. to texture 8=44523
solids, elastic, rel. to direct numerical determ. of stresses 8=41702
thermoplastics, torsional creep meas. 8=35624
torque meas. at low temps., clarification 8=41624
tube, compressible elastic and reinforced, calc. 8=41667
vibration of moving band 8=23931
Al tubes, cyclic creep rel. to second-order strain increments amplification obs. 8=44541
Cu whiskers, deformation, rel. to structural features 8=35254
Cu_x crystals, under alternating, plastic deform., macroscopic localization 8=44567
Zn crystal, alternating effects on plastic deformation, macrolocalization characts. 8=35726
Total cross-sections. See under individual particles, no sub-heading.
Townsend coefficient. See Ionization/gases.
Tracers
See also Radioactive tracers; Radiochemistry.
isotope labelling of cpds., for probing chemistry underlying mass spectra 8=25393
radioactive decay effects, soln. of vector eqn. 8=32166
tritium, for mass return flow of air and H_2O vapour to stratosphere 8=36725
Transducers. See Acoustic transducers.
Transformations. See Phase transformations.
Transformations, mathematical
fast Fourier, effectiveness 8=24407
Foldy-Wouthuysen, appl. to relativistic-symmetric Hamiltonian 8=24634
generation by Bel-Robinson generalized tensor 8=32821
of hydrodynamic eqns, for conservation in curvilinear co-ord. systems 8=34578
invariant, rel. to Newman-Penrose constants 8=24474

Transformations, mathematical—contd
- Klein-Gordan, eqn., integral transform. 8=24453
- Laplace, disturbances in semi-infinite visco-elastic bar in mag. field 8=23854
- Laplace, inverse-transformable soln. calc. for right-angled dielectric wedge 8=46482
- Laplace transform space, transient elastodynamics 8=46054
- linear, of field operators 8=28950
- Lorentz, geometrical and tensorial 8=28327

- three-particle forces role in tritium problem 8=25010
- 3N system binding energy 8=38319
- tri-neutron, non-existence, obs. 8=38383
- variational calc. for ground state energy with trial functions 8=47227
- $C^{12}(Li^7, t)$ spectrum and angular distrib. rel. to α- and d-cluster transfer, 27.5 MeV 8=38524
- H^3 and He^3 e.m. and binding energy difference, rel. to charge asymmetry in n-n and p-p interacts. 8=24950
- H^3, binding energy and charge radii 8=33893
- H^3 n cross-sections angular depend. rel. to H^4 existence, 0.007-5 eV 8=29195
- H^3, velocity-dependent N-N pot. 8=25097
- $_{\Lambda}H^3$, lifetime determ. 8=38400
- $_{\Lambda}H^3$ lifetime obs. 8=25011
- $_{\Lambda}H^3 \rightarrow e^- + \bar{\nu} + He^3$, all e^- β-decay rate calc. 8=29351
- α-H^3 scatt., resonances obs. rel. to levels of Li^7 8=24937
- d-H^3 scatt., cross-section obs. 8=24937
- $d + H^3 \rightarrow \alpha + n$, cross-section obs. 8=24937
- p-H^3 scatt., no sharp structure 8=24937
- He^3-H^3 scatt., cross-section obs. 8=24937
- t-He^4 scatt., polarization meas. on He^4 8=38102
- $t(d, n)He^4$, n energy dispersion obs. rel. to accelerators 8=29220
- $Li^6(Li^7, t)$ spectrum and angular distrib. rel. to α- and d-cluster transfer, 27.5 MeV 8=38524
- $T(^3He, np)^4He$, final-state interactions 8=25020
- $T[p, p(\gamma)(n)]T, He^4, He^3$, diff. cross section extrema due to excited state of He^4, Feymann diag. 8=24914
- Zr^{90}, $E_t = 20$ MeV, inelastic scatt. obs. 8=43055

Troposphere. See Atmosphere.

Tungsten
- adhesion and friction, chemisorbed gases effects 8=49061
- adsorption of alkaline atoms, heat, bonds and ionization probab., quantum calc. 8=35199
- adsorption of Ba, search for substrate rearrangement 8=30777
- adsorption of CO on (110) plane 8=39627
- adsorption of CsF 8=48498
- adsorption of N_2 on (110) and (112) planes 8=39621
- adsorption of O_2, and effects associated with thermal desorpt. 8=39626
- adsorption of O_2 on (110) and (113) faces 8=39622
- adsorption of O_2 on (110), (211), (111) and (100) planes, field emission study 8=30778
- with adsorbed NH_3 on (100) surface, LEED obs. of electron impact effects 8=26140
- analysis of O content by He^3 irrad. 8=27818
- binding and field desorpt. of individual atoms 8=30775
- cathode with Mo substrate, in thermionic converter, post test anal. 8=28501
- chemisorption of N_2O, of both N and O atoms, rel. to temp. 8=36586
- cohesive energy of surface atoms, field evaporation, obs. 8=39503
- crystals, deformed in tension, slip line pattern and active systems 8=31091
- crystal, isothermal magnetocaloric oscills. 8=31514
- crystal (110) and (100) faces, oxide formation and desorpt. processes, mass-spectrometry 8=35198
- deformation mode, anomalous X-ray transmission exam. 8=26648
- deposition and chemisorption of H beams 8=49904
- desorption of adsorbed oxygen by e. impact 8=49901
- desorption of CO 8=48496
- desorption of CO by electron bombard. 8=48495
- desorption of Cs, Hg and O on coadsorbate interaction with low energy electrons 8=39623
- desorption of Ti in strong electric field 8=35197
- diffusion of C, mobility determ. from low temp. internal friction peaks 8=35513
- diffusion of Nb, electrochem. sectioning tech. to determ conc. profiles 8=48797
- electron emission, laser-induced, using ruby and Ar lasers 8=40710
- electron field emission rel. to thickness of Al_2O_3 film coating 8=27341
- electron irradiation and recovery 8=48934
- electron work function with various impurities 8=31461
- emitters in field emission microscope, K deposition, flicker noise and surface migration 8=44936
- emitter in thermionic converter, effect of etching to expose 110 planes on characts 8=28476

Tungsten—contd
- emitter, UO_2 fuelled in cylindrical thermionic converter, post test anal. 8=28500
- film on glass, ultrahigh-vacuum-evaporated, elec. conductance 8=40332
- flow stress, in presence of non-equilib. conc. of kinks 8=26850
- fractional order peaks in diffracted LEED beams, surface asymmetry mech. 8=26100
- grain boundaries, step structs. and heights 8=39728
- hardness and microhardness anisotropy of doped and undoped W 8=44607
- hot, dissociative chemisorption of CO 8=49893
- hot filament, mol. beam interact. rel. to pyrolysis 8=36577
- inert gas bombard., thermal desorption obs. 8=48497
- isochromat at 8kV 8=49761
- isochromat obs. at 8 kV 8=45227
- lamp astron. spectrophotometric standard 8=45667
- in liquid steel, conc. rel. to C activity 8=30458
- Nernst-Lindemann eqn. in range 24°-1800° C, validity 8=26590
- n-irradiated, stage III recovery 8=31157
- (110) face, struct. and work function of Li-O double film 8=39593
- (110) surface, damage due to Ne^+, Ar^+, Kr^+ or Xe^+ bombard., study by LEED 8=26104
- (110) surface, LEED exam. 8=48431
- (112) face, adsorpt. of O_2 and oxidation structs. 8=26107
- optical consts., reflectance meas. 537-5770Å 8=27591
- orientation when deposited from WF_6, rel. to temp. and annealing 8=35154
- permeation, diffusion and soln. of N 8=39987
- permeation of H 8=39986
- permeation rates and coeffs. of N_2, 1800° to 2600°C 8=44394
- photoelectric γ cross-section determ. 50-208 keV 8=36004
- powder, absolute atomic scattering factors 8=48681
- pyrometry, photoelec., effective wavelength change calc. 8=32979
- residual resistivity, varying C content 8=26974
- screw dislocation, field-ion microscope exam. 8=31089
- secondary electron emission, variation depend. on electron absorpt. 8=40715
- secondary emission, shot noise fluctuations 8=44949
- shear modulus freq. and temp. dependence (0.0004-20 cps, 1400-2000°K) 8=35723
- single crystal, ion max, range, temp. dependence 8=48932
- sintered, brittle fracture nucleation at low temp. 8=44608
- specific heat, 1300-3000°K, modified modulation method 8=48732
- sputtering by Ar^+ ions, mechanism 8=35606
- stacking faults, ion microscope investigation 8=35580
- stress-strain curves, and dislocation structures 8=44455
- substrate for Pt films, work function and adsorp. of Cs 8=35178
- superconducting magnetic field curve rel. to low temp. CMN scale 8=37331
- surface, appearance of Na, K impurities, 20-700°C 8=35549
- surface, chemisorption of water 8=27739
- surface diffusion, activation energy elec. field dependence, (10^7-10^8V/cm), 1200-2100°K 8=35512
- surfaces, energy anal. of back-scattered electrons rel. to structs. 8=30730
- surface migration, from field-emission studies 8=27343
- surface, Na atom ionization coeff. absolute meas. 8=31476
- temperature meas. by photoelec. pyrometer 8=24021
- thermal emittance of small cavities in surface, rel. to temp. 8=26611
- thermal rearrangement of O_2-covered surface 8=31464
- thermionic emission in Ba and Cs atom flux 8=36048
- thin film, resistivity, ion-bombardment induced changes 8=49151
- vapour-deposited emitter with (110) preferred orientation, bare and caesiated work function 8=28477
- wetting by Cs and Na, rel. to bare work function 8=35168
- whisker-formation on W by chloromethane adsorption using field-emission micro. 8=26272
- wires, exploding in vacuum, undegassed and degassed, X-ray emission and discharge currents 8=40294
- work function and desorpt. energies of O_2, thermionic meas. 8=31469
- C contaminated, (110) face metastable struct., obs. 8=39583
- CO adsorpt. on (100) and (211) faces, work function 8=35200
- CO adsorption, electron bombard. effect 8=30776
- Cs adsorpt. and work function, theory comp. with expt. 8=31466
- Cs coated, work function 8=36038
- Cs-covered, thermal rad. during thermionic electron emission 8=31465
- Cs^+ emission from 50-75μ dia. hole in (110) face 8=49446
- NH_3 adsorption and decomp; field-emission meas. 8=27734
- ThO_2 inclusions, e microscopy 8=44173
- U on substrate work function, effect of H contamination 8=49437
- W^{183}, Mossbauer effect following Coulomb excitation with protons 8=47262

- migration, decay products in minerals 8=48796
- in minerals, fission fragment tracks made visible by chemical etching 8=32185
- ore, direct determ. by natural γ logging, new log 8=32184
- photoelectric cross sections in 80-150 keV range, calcs. 8=44912
- positron annihilation, single-quantum, cross sections 8=44670
- in river sediments, conc. and Th/U isotope ratio 8=50094
- solubility in UO_2, phase boundary for temps. down to 1210°C 8=30712
- thermal diffusivity, 20° to 850°C laser pulse method 8=39952
- Al-coated, parametric study rel. to max. corrosion protection 8=49844
- with SF_6, fission product decontamination 8=43128
- in ThO_2, diffusion, lattice and grain-boundary, obs. 8=35507
- in ThO_2-UO_2 solid soln., diffusion, lattice and grain-boundary, obs. 8=35507
- U^{233}, amine extraction from irrad. ThO_2 8=36634
- U^{233} in soln, array of bottles determ. of neutron criticality condition 8=47398
- U^{233} resistivity, low-temp., α self-irrad. effects, obs. 8=31322
- $U^{234,236}$ Auger effect, L_2-subshell yield obs. 8=38715
- U^{235} in irrad. samples, non-destructive assay, Pb spectrometer 8=36650
- $U^{235,238}$ in natural U, Fabry-Perot spectrometer, meas. 8=28803
- $U^{235/238}$ isotopic ratio determ. by γ spectrometry 8=47546
- U^{253}-depleted U^{238}-Np^{237} fission foil n personnel by dosimeter 8=33795

Uranium—contd
- U-mica foil neutron dosimeter 8=33794
- U^{3+} in CaF_2, ions in sites of tetragonal symmetry direct one-phonon spin-lattice relaxation times 8=40938
- U^{3+} in CaF_2, spin-lattice interactions in uniaxially stressed crystal, e.s.r. obs. 8=40939
- U^{4+}, in CaF_2, u.s. paramag. resonance rel. to multiple phonon interactions 8=31853
- α-U, filamentary superconductivity, impurity effects 8=49202
- α-U, irrad. swelling rel. to solid fission prods. segregation 8=44507
- α-U, phase transition at 4.2°K, obs. 8=39567
- α-U, stacking faults and extended dislocations in (110) and (001) planes, theory 8=31102
- α-U, thermal expansion behaviour at low temp. 8=48747
- α-U, thermal expansion below 10°K 8=39932
- 1.03 wt % U^{235} - D_2O lattices, reactor physics params., obs. 8=38585
- U-H_2O subcritical assembly, meas. of buckling by improved 'flux-shape' method 8=34103
- U-UAs phase diagram 8=48406
- in UO_{2+x}, cations self-diffusion, α-spectrometry obs. 8=35510
- U/UO_2 system, melting point, meas. of solidus and liquidus temp. 8=30581
- on W. work function, effect of H contamination 8=49437
- in $ZrSiO_4$, e microprobe meas. 8=27811

Uranium compounds
- alloy, electrodes, measured conductance rel. to measured capacitance and Faradaic current 8=49929
- alloys, dilute, α-phase grain refinement by B addition, obs. 8=44171
- chalcogenides, ferromag. props. explanatory model 8=36179
- carbides, C^{13} Knight shift 8=41004
- with V elements, antiferromag. props. explanatory model 8=36179
- fluorescence of U-activated cpds with rocksalt lattice and codopant quenching 8=49808
- intermetallic (with Si, Fe, Mn, Al) oxidation kinetics, resistance and rate 8=27721
- oxides, hyperstoichiometric, Young's modulus and internal friction, at room temp. 8=35722
- oxides, phase limits 8=48292
- Sicral F_1, irrad. swelling rel. to fission gas bubbles, 10^{14} n/cm^2 sec 8=44506
- Sicral F_2, irrad. swelling rel. to fission gas bubbles, 10^{14} n/cm^2 sec 8=44506
- uranyl cpds., classification of e states by absorpt. spectra 8=34880
- uranyl cpds., electron vibration analysis and interpretation 8=49758
- uranyl cpds., fluorescence and oscillator model 8=34286
- uranyl cpds., U-O bond distance calc. from i.r. spectra 8=34287
- uranyl nitrates, complexed, luminesc. spectrum struct. rel. to anion and cation vibrs., 77°K 8=36514
- uranyl salts, fluoresc. decay rel. to temp., obs. 8=45288
- CaF_2 doped with UO_2, UC or U, inert gas diffusion 8=34107
- with SF_6, fission product decontamination 8=43128
- U-1.5%Mo, phase transform. by rapid cooling from γ-phase, mechanism 8=35130
- UAs, antiferromag., magnetic ordering from n. diffr. study 8=40878
- UC, Ar-sintered, effects of Ni on structure 8=26299
- UC, grain boundary grooving rel. to surface energy 8=30871
- UC, irrad. at 77°K, density var. during annealing, obs. 8=44605
- UC, prep. by carbothermic reduction of U oxides 8=27720
- UC, UO_2 films growth rel. to O diffusion, 60-160°C 8=39604
- $UC_{1-x}N_x$, in N_2 gas, change of comp. 8=35063
- $UC_{1-x}O_x$, heat of formation and heat capacity 8=30970
- UC_xO_y, C- and O-deficient, lattice parameter obs. 8=35541
- $U_{20}C_3Si_{16}$, structural refinement 8=44261
- UC-UN system liquidus and solidus, obs. 8=32083
- UCl_3 soln. in molten NaCl, partial v.p. obs. 8=30456
- UCl_6^{2-}, vibr. spectra 8=47619
- UCl_4-$PbCl_4$ phase diagram, thermal analysis obs. 8=30584
- UF_4, 2.5H_2O, rhombic, and dehydration products, X-ray diffr. obs. 8=30870
- UF_6, electron diffr. and molec. struct. 8=38858
- UF_6 gas chromatography, −10°C-40°C 8=49981
- UF_6, in HF chem. laser 8=46590
- $UFeO_4$, crystal structure from neutron diffraction 8=26443
- U-H system, pressure-composition-temp. diagrams 8=30713
- UH_3, n.m.r. 8=49660
- U-Ir system, phase diagram 8=35133
- U_6M, (M = Mn, Fe, Co, Ni) and alloys, superconductivity rel. to ferromagnetism 8=27036
- U-Mo 1.1 alloy, irrad. swelling rel. to fission gas bubbles, 10^{14} n/cm^2 sec 8=44506
- U-Mo-Al-Sn, irrad. swelling rel. to fission gas bubbles, 10^{14} n/cm^2 sec 8=44506
- UN, oxidation and deformation studies by e-micros. 8=27718
- UN, prep. and fabrication, rel. to nuclear fuels 8=27722

Uranium compounds—contd
- UN, prep. from UCl_4 + Al + N_2, two-step reactions 8=36574
- UN-C system equilib. rel. to UN compacts prep., obs. 8=32083
- U(NH)Cl, crys. structure 8=48680
- UO_2, antiferromagnetic, structure 8=49574
- UO_2, columnar grain growth under steep thermal grads 8=26301
- UO_2, critical surface tension in oxidizing and reducing atmos., comparison and theory 8=30729
- UO_2, density var. during annealing rel. to fission damage recomb., obs. 8=44605
- UO_2, distillation from uranyl nitrate-TBP soln. 8=47413
- UO_2, enthalpy as function of temp. to 3100°K 8=35436
- UO_2, equiaxed grain growth, influencing factors 8=26300
- UO_2 etching by HNO_3 rel. to cryst. orientation, 1-37 molar 8=30818
- UO_2, films growth on UC rel. to O diffusion, 60-160°C 8=39604
- UO_2 fuel element, axial void form. rel. to radial temp. gradient 8=43144
- UO_2 fuel rods, release of fission gases 8=34108
- UO_2 fuelled W emitter in thermionic converter, post test anal. 8=28500
- UO_2, high temp. enthalpy and heat of fusion 8=39902
- UO_2, LEED from surface steps 8=48429
- UO_2, limits for equation of state 8=30572
- UO_2, magnetic exchange interactions, orbital effects 8=31544
- UO_2, mag. excitations temp. dependence 8=31802
- UO_2, migration of Kr bubbles, before and after annealing 8=26625
- UO_2, n-irradiated, crystal struct. using X-ray counter diffractometer 8=44260
- UO_2 pellets fluorination to UF_6 by Fl, kinetics and chemisorpt. 8=32104
- UO_2 powder, n-irradiated, electronic props. from e.m.f. meas. 8=40290
- UO_2, powders oxidation in storage rel. to fabrication and irrad. props. 8=45349
- UO_2, relax. peaks in internal friction spectrum, rel. to O interstitial reorient 8=35545
- UO_2, sintered, diffusion and release of Xe, from 400°~800°C 8=26624
- UO_2, sintered, high temp. thermal cond. 8=44370
- UO_2 sintering, Dorn method in study of initial phase 8=35068
- UO_2, solubility of U and phase boundary for temps. down to 1210°C 8=30712
- UO_2, surface diffusivity of U ions, 1544°-1915°C obs. 8=35511
- UO_2 surfaces, low-energy electron diffr. 8=48430
- UO_2, thermal cond. rel. to temp. gradient depend., obs. 8=44369
- UO_2 u.s. attenuation and elastic constants, 4.2-300°K 8=49898
- UO_2, with Gd_2O_3 dispersions, behaviour at high temp. 8=35074
- UO_{2+x}, U^{233} cations self-diffusion, α-spectrometry obs. 8=35510
- UO_2^{2+} excitation in β-diketone + N-containing organic bases triple complexes by intramol. energy transfer, obs. 8=34288
- UO_2^{2+}, photo-induced absorpt. in glass, solns., and in spinel 8=27610
- UO_2^{2+}, spectrum in aq. perchlorate resolution of u.v. bands 8=39382
- UO_2-Al_2O_3, grain growth in presence of liq. phase 8=44014
- UO_2-CeO_2, thermal diffusion 8=48776
- UO_2-H_2O lattice n temp. rel. to activation ratios 8=47418
- $UO_2(NO_3)_2$ in diluent + TBPP/ImHNO$_3$, interfacial tension and partition coeff. 8=34804
- $UO_2(NO_3)_2$ water solns. in presence of $Na_4P_4O_{12}$ photoluminescence 8=25943
- UO_2^{+2}:Nd^{+3} laser glass, Ce-stabilized 8=28710
- $UO_2(OAc)_2$. 2Ph_3AsO and $[UO(OAc)_2.Ph_3AsO]_3$; (Ac = acetate, Ph = phenyl), crystal structure 8=44259
- UO_2-TaB_2 fuel, heated in steam, reactions 8=27717
- UO_2/U system, melting point, meas. of solidus and liquidus temp. 8=30581
- UO_2-WB_2 fuel, heated in steam, reactions 8=27717
- U_3O_8, antiferromag. struct. study of neutron diffraction 8=31801
- U_3O_8 layers, prep. by h. v. electrophoresis 8=26130
- α-U_3O_8, thermoelec. power meas. rel. to semicond. props. 8=35999
- U_4O_9, structural changes rel. to temp. 8=26083
- $U^{235}O_2F_2$ aqueous soln., minimum critical thickness of water-refl. infinite slab 8=34052
- $UO_2(NO_3)_2$-polyethylene mixtures, minimum critical U^{235} enrichment, obs. 8=34053
- UP, prep. and fabrication, rel. to nuclear fuels 8=27722
- UP-ThP and UP_2-ThP_2 solid solns, antiferromagnetic 8=45067
- U-Pu monocarbides ceramics, fabrication 8=30664
- U/10% Pu/10% Fz, annealing rel. to changes in structure, hardness and elastic modulus 8=30711

Uranium compounds—contd
$(U, Pu)O_2$ solid soln. production and Pu distribution 8=29562
$(U, Pu)O_{2-x}$, thermal cond. and diffusivity rel. to comp., 50–2000°C 8=35464
U-Rh system, phase diagram 8=35132

partial press. of residual gases, for various means of pumping out 8=39242
particle accelerators and storage rings, developments 8=34695
pressure 10^{-8} torr., physical principles 8=30323
production and meas. for tube manufacture 8=39257
quartz-metal tube jointing 8=34687
ultra-high vacua, below 10^{-9} torr. 8=47989
ultra-high vacuum prod. and meas. 8=39256
valve, greaseless, for mercury reservoir 8=34691
GaAs thin film prep. 8=27354
H_2 gas jet trapping 8=43645
Kr^{85} leak test for tubes 8=47990
P diffusion in Si, method using $POCl_3$ as source 8=48792
Sb, distillation 8=28204
Si single-crystal films, moving mask growth on amorphous quartz substrates 8=26126
Ti foils, self-supporting, evaporation method 8=39601
Vacuum tubes. See Electron tubes
Valence bands. See Crystal electron states.
Valency
translawrencium elements, SCF calcs. 8=47513
B_2O_3, X-ray emission band of B, valency electron structure 8=29716
C-H valence oscills. in vinyl ether 8=30493
C=O valence oscills. in vinyl ether 8=30493
Ce ions in oxide solid solns., from X-ray absorpt. spectra 8=39638
Valves, thermionic. See Electron tubes.
Vanadium
b.c.c. lattices, energy of interstition of impurity atoms into octahedral and tetragonal positions 8=35542

Vanadium—contd
  chemisorption of alcohols, aldehydes, ketones and oxides surface species formed, i.r. spectra 8=45363
  corrosion, influence of Ca content in Na 8=27723
  Compton scattering 8=41149
  diffusion in Al and Ni, coeffs. 8=35476
  diffusion in Nb, Zr and V, coeffs. 8=35475
  diffusion of V, coeffs. 8=35475
  e.p.r. in $CaWO_4$ 8=31855
  Hall effect, type II superconductor 8=40392
  lattice params. and thermal expansion rel. to para-antiferromag. transition, −180-1500°C 8=44253
  lattice vib. curves and phonon spectra 8=26576
  in liquid steel, conc. rel. to C activity 8=30458
  sorption and chemisorpt. of O, isotherm-isobar kinetics 8=36584
  superconducting, anomalous magnetic behaviour 8=27383
  superconducting, and Nb in mixed state, nonlinear resistivity and dissipation 8=27027
  in AgCl, optical absorpt. and ionic cond. meas. on V ions 8=35523
  in Au_4V, moment from Mössbauer effect meas. 8=26016
  V II, spectra in excited configurations, theory 8=43203
  V^{51} in V_3Sn, nuclear spin relaxation, temp. depend. obs. 8=40970
  V^{51}, quadrupole coupling in KVO_3 8=31923
  V^{2+} in α-Al_2O_3, trigonal splittings stress dependence 8=43929
  V^{2+}, in CaO, uniaxial stress meas. at impurities, strain coeffs. 8=40134
  V^{3+} in Al_2O_3, Jahn–Teller effect in $^3T_{2g}$ state, Zeeman study 8=43965
  V^{3+} in Al_2O_3, resonance at mm. wavelength and in intense field 8=49599
  V^{4+} in TiO_2, ENDOR 8=41007
  V : Fe^{57}, f number and isomer shift pressure dependence 8=48321
Vanadium compounds
  carbides formation during $\gamma \rightarrow \alpha$ transform. of austenite in steel 2062 8=35135
  hydride, β-phase, p.m.r. 8=40986
  steel, diffraction pattern, isothermal transformation 8=39791
  transition-metal alloys, elec. cond. anomalies 8=44699
  vicalloy, domain structure in various structural states strained in tension 8=40804
  vicalloy strip, mag. props., thermomechanical treatment effects 8=36135
  CaV_2O_6, microscopic props. 8=30798
  $Ca_2V_2O_7$, microscopic props. 8=30798
  $Ca_3V_2O_8$, microscopic props. 8=30798
  $M_xV_2O_5$ bronzes, homogeneity range rel. to charge and ionic radius of inserted element 8=26444
  Ti-V alloys, self-diffusion comp.-temp. dependence 8=26623
  VAu_4, mag. props. effect of at. environment, correction to paper 8=31513
  V-C system, chem. diffusion and phase equilibria above 1900°C 8=36575
  $VC_x (0.75 < x < 0.88)$, n.m.r. line shape of V^{51} 8=45133
  VC_{1-x} with non-stoichiometric vacancies lattice structure determ. 8=30913
  V_6C_5, ordered cpd., structure 8=44172
  VC–ZrC(HfC) systems, phase diagrams 8=48409
  VCl_4, e.s.r., Jahn-Teller distortion 8=49619
  VFe alloys, 3d-electron redistrib. from X-ray spectra 8=35780
  V-Ga alloys, Knight shift of V^{51} and Ga^{71} 8=41006
  V–Ga system, phase diagram 8=48407
  V_2Ga_5, phase transforms. from structural, thermal and resistivity meas. 200-800°C 8=39566
  $V_{17}Ge_{31}$, crystal structure 8=39782
  VH_x, vibr. spectra in three cryst. phases by neutron scatt. 8=39878
  VMn alloy, spectra, rel. to band structure 8=41115
  V–Ni alloys, metastable b.c.c. phases formed on quenching 8=48408
  VO, electronic phase transitions 8=26084
  VO ground state nuclear hyperfine interactions 8=25522
  VO thin film single crystals, epitaxial growth, electrical resistivity 8=48470
  VO^{2+}, e.p.r. linewidths in NH_4Cl cryst. 8=45103
  VO^{2+} in soln., n.m.r. and e.p.r. line-broadening 8=39419
  VO_2 crystal, reflection spectra rel. to semiconductor metal transition 8=41150
  VO_2 crystal, resistivity anisotropy 8=40292
  VO_2, electrical and mag. props. 8=40293
  VO_2, electronic phase transitions 8=26084
  VO_2 on alumina substrates, rel. to device fabrication 8=30758
  VO_2, opt. props. between 0.25 and 5eV in semiconducting and metallic states 8=49760
  VO_2 oxidation in molten $VO_{2.5}$ soln., obs. 8=27724
  VO_2 sputtered films, transport props. 8=27138
  $VO_{2.5}$, molten, thermal dissoc., obs. 8=27724
  V_2O_3, electronic phase transitions 8=26084
  V_2O_3, mag. susceptibilities 8=31534
  V_2O_3, neutron-diffraction data, rel. to mag. phase 8=31800
Vanadium compounds—contd
  V_2O_4 anodic films growth in acetic acid-$Na_2B_4O_7$ solns., obs. 8=45375
  V_2O_5, carrier e.s.r. spectrum rel. to localized states 8=40947
  V_2O_5-containing-glasses, small polaron as charge carrier 8=40499
  V_2O_5 magnetic susceptibility meas. and calcs. 8=36083
  V_2O_5-P_4O_{10} semicond. glasses, effect of n and γ irrad. on elec. cond. 8=27137
  V_2O_5-P_2O_5-(La_2O_3, Nd_2O_3 or CeO_2) glasses, i.r. transmission 8=36425
  V_2O_5–P_2O_5–WO_3 system glasses, elec. conduction mechanism from e.p.r. 8=40291
  $VOSO_4 \cdot 5H_2O$, polarized absorpt. spectra of polymorphs 8=49759
  V_5Sb_4, at. structure rel. to quasi-homologs 8=35360
  V_3Si, β-tungsten phase, high-transition-temp. superconductor, props. 8=40376
  V_3Si, lattice softening, rel. to phase transformations 8=31107
  V_3Si, paramagnetic, absence of n. scattering rel. to d electrons in conduction band 8=40754
  V_3Si, phase transition near supercond. temp., obs. 8=39567
  V_3Si, sublattice distortion, search 8=26445
  V_3Si, superconducting, martensitic phase transform., e-microscope study 8=26085
  V_3Si, superconductivity dependence on lattice instability 8=27037
  V_3Si, tetragonal-cubic low-temp. transition rel. to density states effect at Fermi surface 8=39568
  V_3Sn, type II superconductor, spin-relaxation of V^{51}, temp. depend. obs 8=40970
  V-10wt.% Ti alloy, corrosion, influence of Ca content in Na 8=27723
  V-Ti alloys, type II superconductors, spin lattice relaxation 8=44744
  V-Ti, type II superconductor, spin-lattice relaxation 8=41005
  Va-Ti alloys as reactor fuel jackets, corrosion by flowing Na 8=47430
Van Allen radiation. See Atmosphere/radiation belts.
Van de Graaff generators. See High voltage production; Particle accelerators/linear.
van der Waals forces. See Atoms; Kinetic theory; Molecules/intermolecular mechanics; Solids.
Vaporization

  water aerosol in optical radiation field 8=30564
  As 8=39497
  BaO, vapour species 8=30606
  BeO-BeF_2 system at high temp., mass spectra 8=35012
  Bi-Se system, cryst. and amorphous, ionic and neutral species in vapour 8=35007
  Cm_2O_3, high temp. stability 8=35425
  Cs-O system products, mass spectrometric obs. 8=32096
  LaS 8=48287
  NaCl single crystals, effect of dislocations on rate 8=35008
  P_3N_5 8=43413
  PbF_2, mass spectra 8=38933
  $PbZrO_3$-TiO_3 ceramics, PbO deficiency rel. to piezoelectric props. 8=35010
  $Pb(Zr_{0.65}Ti_{0.35})O_3$, cold-pressed, thermogravimetric determ. in vacuo, 690-1130°C 8=35009
  $Pb(Zr_{0.65}Ti_{0.35})O_3$, hot pressed pellets of near theoretical density 8=43919
  Se, cryst. and amorphous, laser induced, study of ionic and neutral species 8=35006
  Se, partial press. of $Se_2(g)$ 8=48285
  SnF_2, mass spectra 8=38933
  Ti oxides, from liq. phase 8=30603
  Tm_2O_3, high temp. stability 8=35425
  YbC_2 8=43920
Vapour density. See Density/gases.
Vapour pressure
    See also Humidity; Vaporization.
  acetone, near crit. pt. 8=34956
  alkaline earth metals, thermodynamic parameters 8=40699
  benzene, near crit. pt. 8=34956
  chloroform, near crit. pt. 8=34956
  dry air, 34°-64°K 8=35004
  ethanol-n-decanol mixtures 8=48284
  ferromagnetic binary alloy, temp. dependence rel. to mag. and structural transitions 8=35014
  ice, isotope effects 8=39491
  liquids, isotopic differences, appl. of significant struct. theory 8=43755

Vapour pressure—contd
- methanol-n-decanol mixtures 8=48284
- trifluoromethylphosphonylchloride 8=34330
- void fraction in subcooled boiling 8=35000
- water, isotope effects 8=39491
- Ag, liquid, 1450° to 1600°C 8=43918
- Ag, over Cu-Ag-Au liq. ternary alloy rel. to electron cell model 8=26002
- $AlBr_3$, molten, to crit. pt. 8=43895
- AlF_3, by entrainment method 8=30607
- BaO 8=30606
- CH_4 and CD_4 8=30588-9
- COF_2 8=30573
- Ca_3N_2 8=48295
- of Cs, above Cs-graphite lamella cpds, rel. to compound transitions 8=35011
- Cs saturated, obs. 8=30604
- D_2O-C_2H_5OD mixture, isotope effect 8=48283
- He-3, in mag. field, press. increase, 3°K and 40-80 kOe 8=28433
- He^3, thermomolec. press. between ambient temp. and region 1-0.32°K 8=28438
- H_2O-C_2H_5OH mixture, isotope effect 8=48283
- KOH-ZnO electrolytes, 100-140°C 8=45373
- LaF_3, and entropies and enthalpies in range 1050°-1200°C 8=35015
- $NiCl_2$, $NiBr_2$ and NiI_2, anhydrous solids 8=39496
- SbSI grown from gaseous phase, of volatile components, effect on elec. props. 8=36026
- SbSeI grown from gaseous phase, of volatile components, effect on elec. props. 8=35989
- ScF_3, and entropies and enthalpies in range 1050°-1200°C 8=35015
- XeF_2 and XeF_4 8=39492
- YF_3, and entropies and enthalpies in range 1050°-1200°C 8=35015

Vapour pressure measurement
- solid-vapour, entrainment method 8=30607

Variable stars. See Stars.

Variational calculus. See Mathematics.

Variational method. See Quantum theory/application methods.

Vavilov–Cherenkov radiation. See Cherenkov radiation.

Vectons(vector mesons). See Mesons.

Vectors
- Poynting e.m., calculation 8=41943
- rotation of rigid body, geometrical representation 8=32700

Velocity
- electrodynamics, non-linear, ray diagram 8=46397
- gas near solid surface, thermal slip, gas-kinetic analysis 8=39175
- simple waves, for nonlinear eqn., upper boundary 8=37236

steady-state, in non-linear systems, stability investig. 8=41802
string, influence of imperfect boundaries 8=23923
subharmonic oscillations, 3rd order, initial conditions for obs. 8=32866
surface modes, obs. by stroboscopic hologram interferometry 8=32883
at surfaces during rubbing, normal and tangential components 8=32884
system in impulsive-noise environment, reliability prediction 8=37234
thermally induced, in sandwich plates 8=46072
torsional and flexural systems, receptances due to displacement excitation at a support 8=23926
torsional, use of calculating tables 8=46138
under parametric excitation, oscs of 'summed and differential types', characts 8=32877
Cu and Ge, resonant, dislocation line 8=35563

excitation
bandsaw blades, lateral parametric, theory 8=23924
coupled systems subjected to determinate and random input 8=37240
gas, nonlinear in resonant tube, press. amplitude 8=30266
linear systems, by impulsive noise, response-peak prediction 8=37235
pulley belts, lateral parametric, theory 8=23924
road vehicle, response to profile 8=28360
self-excited, in axially symmetric shell of finite length subjected to internal supersonic flow 8=32864
wire, longitudinal, due to thermal shock by current pulse 8=40088
$LiNbO_3$, elastic, 20-2000 Mc/s 8=44584

measurement
See also Seismology.
amplitude-phase characteristics, contactless meas. 8=46135
bar, deflection microwave interferometry 8=37238
basic vibrometric methods and means 8=46134
displacement rel. to light wavelength, interferometry 8=28357
mechanical, piezoelectric probe 8=32868
Moire-band method for high-amplitude vibrations 8=46136
plastic model, dynamic response, comparison with prototype 8=37237
stroboscopic holographic analysis 8=23919
surface, hand-held dynamic strain gauge 8=41804

Vibronic states. See Molecules/electronic structure; Molecules/vibration

Vidicons. See Electron tubes.

Virial coefficients. See Equations of state.

Virtuons (virtual phonons). See Crystals/lattice mechanics.

Viscoelasticity
See also Plasticity.
anisotropic linear solids, restrictions on relax moduli 8=41719
behaviour, non-linear integral representation 8=41735
biological soft tissues, discrete models 8=45924
butadiene-styrene block copolymer 8=40194
coagulation structures, solid-like, thixotropically hardened, viscosity 8=40090
composite medium, wedge-like waves 8=37159
concrete, response in creep characts. stress anal. 8=44536
creep and relaxation very early-time props. 8=32773
deformation properties of material, mathematical description 8=41731
dissipation function for thermomech. processes in viscoelastic bodies 8=46066
disturbance in visco-elastic slab due to transient torsional forces 8=32769
disturbances produced in viscoelastic medium by impulsive torsional body forces 8=46150
drag reduction in turbulent flow, viscoelastic model and its appln. 8=48093
film, liquid, flowing down inclined plane, stability 8=43745
flow in multiply connected regions 8=32772
flow through porous media, multiphase 8=39270
flows, dimensional considerations 8=47915
fluid, elastico-viscous, static stability 8=43616
fluid, plane parallel Couette flow, linear instability 8=47909
fluid, secondary flow due to rot. oscills. of sphere 8=39155
fluids, stability against shear waves of steady flows 8=43635
gelatin-glycerol system, isochronal temp. -conc. diagram 8=44618
glass-plastic body, deformation under plane-problem conditions 8=49023
half-space, linear, impact of rigid sphere, numerical soln. and comparison with expt. 8=41736

Viscoelasticity—contd
- linear mats., crack initiation rel. to loading history 8=31178
- linear media, eqns. of three-dimens. deform. 8=28275
- linear theory 8=46067
- liquids, elastico-viscous linear, elastic props. and viscosity, theory 8=25841
- liquid, magnetostrictive meas. 20-100 kHz 8=30429
- liquids, stability in parallel flows, used hereditary stress/strain law 8=43720
- lubricating oils, and component fractions, relax. spectra 8=34698
- media, thermodynamics and waves 8=41734
- medium, sound absorpt. effect on Brillouin scatt. 8=32912
- micropolar materials, hereditary, linear theory 8=41708
- nonlinear class of constitutive equations of rate-type 8=32771
- nonlinear, short-time approx. 8=41733
- poly-α-methylstyrene, stress relax. 8=40198
- 1, 2-polybutadiene, rel. to rubber and synthetic elastomers, 5-50°C 8=44613
- polyethylene at high pressure 8=40189
- polyethylene, non-linear behaviour 8=40195
- polyisobutylene, v. dil. solns. 8=39329
- polymer solns., rel. to inter- and intra-molec. interacts. 8=34700
- polymers, homogeneous submicrocavitation fatigue processes 8=31181
- polymers, linear amorphous, rel. to fracture theory 8=31249
- properties of fine-grained incompressible turbulence 8=43643
- relaxation in supercooled liqs. 8=30430
- rheological behaviour, elasticity determ. from tangential stress meas. 8=48099
- semi-infinite visco-elastic bar, disturbances in mag. field 8=23854
- semilinear mats in bar form., wave propag. after longit. impact 8=32886
- solid sphere, axisymmetric wave propag. 8=26750
- stability of initially imperfect, nonlinearly viscoelastic column 8=41729
- styrene-butadiene copolymers in soln. 8=25891
- tensile stresses in rapidly deforming materials 8=30376
- thin plate, impact of rigid sphere, resulting eqns. of motion 8=23853
- thin-walled tube with temp. depend. props, thermal stresses 8=23855
- three dimensional linear mechanical model 8=46065
- tube, flexible, containing viscous liq., acoustic wave propag. 8=48136
- viscoplastic fluid stability, analogy with Grad fluid stability 8=47905
- viscoplastic rod, impact on rigid obstacle, heat conduction equation 8=46241
- waves, non-homogeneous bars, propagation 8=28363
- Weissenberg effect, mechanical model 8=28276
- 0.3 wt % Na-CMC aqueous soln., rel. to inter- and intra-molec. interacts. 8=34700
- in Se, P admixture effect 8=31230

Viscometers
- air turbine, concentric-cylinder apparatus 8=43777
- canal type, anal. for Bingham plastic surface flow 8=30343
- Couette-type, air bearing description 8=30313
- Couette-type, magnetically anisotropic rotor driven by rotating mag. field 8=30435
- falling cylinder, effect of eccentricity 8=39335
- gas, absolute, low-temp. h. p. design 8=34674
- jet orifices, liq. Poiseuille flow rel. to geometrical shape determ. 8=30362
- magnetostrictive, for liq. viscoelasticity 20-100 kHz 8=30429
- oscillating-disc, for gases to temp. of 500°C, atmos. press. 8=43706
- parallel-disc, inertia effects for second-order fluid, anal. and interpret. of results 8=25842
- remote-control, for compressed electrolytes 8=34793
- rheometer, audio-frequency 8=34797
- rotational, relax. meas. on non-Newtonian liq. 8=34800
- skin friction meas. with thin film gauges 8=39236

Viscoplasticity. See Plasticity.

Viscosity
- adsorbed layer of polymer, thickness determ. 8=39620
- amorphous polymers, molec. ordering obs. 8=39633
- dissipation in Poiseuille flow, effects on steady conjugated heat transfer 8=30253
- 2-dodecylaminoethanol salts, study of micellar props. effect of counterions 8=39290
- drag on motion of magnetically anisotropic crystal in rotating mag. field 8=30435
- falling cylinder viscosimeter, verification of eccentricity effects on terminal velocity 8=48091
- Fermi liquid, calc. 8=41778
- fluid containing small particles 8=39443
- fluid, non-homogeneous, rel. oscillations 8=47931
- fluids, dissipative function model 8=32754
- fluids, non-Newtonian viscous, radial flow between discs 8=39160

Viscosity—contd
- fluids, vertical motion of spherical particles 8=47921
- flux-flow in type II supercond. rel. to local temp. gradient 8=26997
- glass fibres with and without concentric glass casings 8=39631
- macromolecular solns., normal stress difference meas. 8=25893
- nonlinear singular boundary value problem in viscous fluid theory, analytical solution 8=47918
- organic glasses used as trapping matrices 8=49065
- plasma, Debye-Hückel, shear viscosity 8=39080
- plasma, toroidal, rel. to stationary equilibrium 8=30119
- plasma, weakly turbulent, electron coefficient in strong mag. field 8=43514
- polyisobutylene in cyclohexane and benzene, conc. effects, obs. 8=30427
- polymer chain, viscosity, excluded volume effect 8=34788
- polymer mols., theory with hydrodynamic interaction and excluded vol. 8=47737
- polystyrene in good and theta solvents, conc. effects, obs. 8=30427
- rotational, irreversible statistical thermodynamics 8=47917
- from seismic wave attenuation obs., dynamic viscosity calc. 8=27830
- solar-wind plasma, Mariner 2 obs. 8=45889
- styrene-methyl methacrylate copolymer in good and theta solvents, conc. effects, obs. 8=30427
- surface, stearic acid reaction with Ca^{2+} ions at air/water interface 8=41264
- volume viscosity of simple fluids, relax. times 8=30194
- B_2O_3, viscous relaxation and non-Arrhenious behaviour 8=34802
- C_{16}-OH monomol. films surface viscosity rel. to phase transitions, 15-30°C 8=30428
- C_{18}-OH monomol. films surface viscosity rel. to phase transitions, 15-30°C 8=30428
- C_{20}-OH monomol. films surface viscosity rel. to phase transitions, 15-30°C 8=30428
- C_{22}-OH monomol. films surface viscosity rel. to phase transitions, 15-30°C 8=30428
- Fe, molten, by oscillating crucible method 8=34798
- Ni-Si alloys, temp. dependence rel. to bonding 8=34796

gases
- acetylene 8=25835
- air, dynamic viscosity, meas, statistical-mech. correls. 8=43704
- ammonia-nitrogen 30°-200°C below 10cm Hg press: Chapman-Enskog theory 8=43702
- atmosphere, variable, rel. to vertical sound propag. 8=32258
- benzene 8=25835
- free fall in a rarified atmosphere 8=28257
- friction at plate immersed in gas stream, influence of turbulent Pr number 8=30255
- inert gases, dynamic viscosity meas, statistical-mech correls. 8=43704
- kinetic theory, shock wave structure, ultrasonic propag. 8=34602
- mixtures, rarefied nonreacting, temp. dependence 8=30286
- monatomic gas, represented by relaxation theory 8=30297
- nonpolar mixtures, calc. at ordinary pressures 8=47981
- polar-nonpolar gas mixtures, 30°-200°C, below 10cm Hg press: Chapman-Enskog theory 8=43702
- quadrupolar gases and vapours 8=25835
- radiation coupled viscous flow, soln. for stagnation region and flat plate 8=39204
- resistance to spherical particle 8=34673
- shear, near critical point, anomalous due to large density fluctuation 8=30291
- shearing flow past flat plate, heat transfer coeffs. 8=34651
- sulphur dioxide-hydrogen 30°-200°C below 10cm Hg press: Chapman-Enskog theory 8=43702
- ternary mixtures, constancy of dynamic viscosities 8=25836
- turbulent boundary layers, with arbitrary press. gradients 8=25834
- viscometer, absolute, low-temp. h. p. design 8=34674
- Ar, 114°-374°K 8=39237
- Ar, supersonic beam, low-temp. cross-sections 8=30311
- CO_2 8=25835
- CO_2, dynamic viscosity, meas. statistical-mech. correls. 8=43704
- CS_2 8=25835
- Cs, partial ionization effect in temp. range 1000° to 2400°K 8=30310
- Cs vapour, 1000 to 10 000°K and 10^{-5} to 10 atm 8=30312
- H with const. density, 16.6-300°K 8=43703
- He^3 and He^4, rel. to low temp. transport props. mutual consistency 8=34671
- Kr, 114°-374°K 8=39237
- N_2, dynamic viscosity meas, statistical-mech. correls. 8=43704
- N_2, low-temp. 8=39237
- Xe, 114°-374°K 8=39237

liquids
- See also Lubrication; Superfluidity.
- amyl and isoamyl alcohol, temp. derivatives 8=34803

Viscosity—contd
  liquids—contd
    with Arrhenium temp. depend., influence of molec. rotation 8=30426
    batch mixing of viscous liqs.with rotating agitators, model studies 8=30437
    binary mixtures, comp. depend 8=34795
    n-butyl alcohol, temp. derivatives 8=34803
    cellulose solns. rel. to -I and -II acetylation, obs. 8=45325
    cellulose sulphoester solns., molec. rigidity 8=34850
    changes in flow past rotating disc, rel. to heat transfer 8=39358
    critical mixtures, anomalous 8=48097
    drag on sphere at low Reynolds numbers, expt. determ. 8=48095
    drag reduction, viscoelastic model and its appln. 8=48093
    droplets of various liqs. falling through air, drag coeffs. rel. to Reynolds number 8=30384
    elastic liqs. superposed simple and sinusoidal shearing eqns. 8=34801
    elastico-viscous liquids, linear, non-Newtonian viscosity and elastic props, theory 8=25841
    elastoviscous, oscillating thermal convection 8=43771
    electrolyte solns., nuclear spin relax. correl. 8=34927
    emulsifying agents adsorbing at oil-water interfaces 8=48101
    ethyl-alcohol mixtures, and proton spin-lattice relax 8=43770
    in flow reaction vessels, effect on transient response 8=32087
    generalized liqs., Euclidean geometry and flow 8=25894
    glycerol, press. depend. 8=34841
    helical macromols. in soln., size and shape determ. 8=30420
    inertia forces, soln. of two examples 8=39328
    rel. to liquid drop shape as it approaches a flat plate through a viscous liq. 8=30385
    local equilib. model 8=25908
    maleic anhydride-styrene copolymer in tetrahydrofuran rel. to mo-. dimens. obs. 8=43776
    mixture at vertical point, anomalous increase rel. to damping of hypersonic waves 8=30465
    moment method approximation 8=39332
    n-alcohols, with LiCl solute, viscous flow and relax. time of reorientation 8=34778
    nonionic detergent in aq. soln. micellar props. 8=30559
    polyacrylic acid, aqueous solutions, viscometic studies of u.v. irradiation 8=34794
    polydimethylsiloxane blends 8=30433
    poly-γ-benzyl-L-glutamate in soln., conformations 8=48096
    polyisobutylene in polybutene oil, gradient depend. of intrinsic viscosity obs. 8=43775
    polymer melts, entanglement effects 8=48100
    polymer solns, conc., molec. theory of shear depend stress props. 8=34699
    polymer solns., dilute, onset of drag reduction in turbulent flow, molec. approach 8=30368
    polymer solns., drag on sphere 8=30432
    polymer solns., flow-time fluctuations in capillary viscometer 8=30431
    polymer solns., kinetic approach 8=39334
    polymer solns., non-Newtonian intrinsic, ellipsoidal model 8=43778
    polymer solns., porous sphere molec. model 8=29866
    polymers, dynamic, a.f. 8=34797
    polymers, rel. to concentration 8=48125
    poly(methyl acrylate) in ethyl acetate rel. to mol. wt. and dimens., obs. 8=43773
    poly-n-butyl methacrylate in chlorinated diphenyl, dilute solns., normal stress effect 8=39333
    polypropylene, rel. to mol. wt. distribs. obs. 8=43721
    (1:1) poly(styrene-co-methyl acrylate) in ethyl acetate rel. to mol. wt. and dimens., obs. 8=43773
    polystyrene-cyclohexane, rel. to mol. chain dimensions below O temp., obs. 8=43774
    polystyrene solns., depend. on conc. and temp. 8=44065
    polyurethane-cyclohexanone soln., temp. depend. obs. 8=26595
    rigid sphere, approach to deformable liquid/liquid interface 8=34744
    sphere moving perpendicular to wall, hydrodynamic force for small gap widths, inc. inertial effects 8=43718
    styrene-methyl methacrylate random copolymers, dilute solns. 8=39323
    supercooled liqs., viscoelastic relax. 8=30430
    suspensions, effect of particle motion in shear and elec. fields 8=48231
    thermodynamic state of laminar flow 8=25848
    viscometer, falling-ball, for undergraduate expts. < 2kbar 8=43769
    viscous plastic fluids, with additives, reduction of turbulent viscosity 8=30436
    viscous solns., paramag. relax. determ. by n. m. r. 8=30532
    water-dioxane mixtures, and proton spin-lattice relax. 8=43770
    water, drag reduction by DNA additive, from vel. profiles 8=39265
    water, under shock load 8=48094

Viscosity—contd
  liquids—contd
    wormlike chains in soln. 8=30434
    Al alloys with Si, Zn, Cu and Mg, visc. - conc. curves rel. to solid state phase relns. 8=34799
    Al, coordination number transforms. obs. 8=25866
    Al-Cu, coordination number transforms. obs. 8=25866
    Al-Mg, coordination number transforms. obs. 8=25866
    Al-Si, coordination number transforms. obs. 8=25866
    Au-Ge-Si alloy, at glass-liq. transition 8=39470
    BeF_2, molten, temp. depend. 8=25892
    Bi-Bi halide molten solns. 8=43772
    D_2O, bulk viscosity calc. 8=43768
    H with const. density, 16. 6-300°K 8=43703
    He II, fluid and superfluid contrib. to damping of cylinder oscs. 8=41902
    He^3 soln. in superfluid He^4, calc. from phonon Boltzmann eqn. 8=41898
    Hg, under shock load 8=48094
    Li soaps in water miscible alcohols 8=39316
    $NaClO_3$-$NaNO_3$ molten system 8=48086
    Na_2SO_4 aq. solns., and molal vol. 8=48098
    Pu alloys 8=39330
    Pu, reactor fuel 8=47407
    SiO_2 with W inclusions network, 2000°C 8=48092

- in capillaries, shift in temp. of max. density 8=34790
- rel. to carbon black suspension stability and electrokinetic pot. in nonpolar media, obs. 8=30550
- cavitation bubbles u.s. induced, models and damaging mechanism 8=43733
- chemisorption on W surface, investigation 8=27739
- Compton scattering profile 8=48066
- rel. to clouds electrifications by selective ion-capture, drops charging in ion stream, obs. 8=30517
- collisions, vibr. transition probabilities 8=34389
- combined in solids, n.m.r. 8=45123
- condensation in cloud chamber 8=30595
- corrosivity to Al, eqn. 8=41240
- of crystallization, H atom postiion determ. by NRM 8=44219
- deionized, electro-osmosis, temp. dependence of rate constants 8=32130
- desportion of CO$_2$ in packed bubble column 8=25858
- dielectric constant calc. from reflectance 8=43752
- dielectric props., changes during adsorption by solids below 0°C 8=39402
- dielectric relaxation, l. f., and viscous flow, mechanism 8=39398
- diffusion vel. through Ge oxide film on Ge 8=48778
- discharge, elect., computer soln. 8=30522
- dissociative ionization 8=29976
- distilled, sound velocity temp. dependence 8=43805
- with DNA additive, vel. profiles and drag reduction 8=39265
- drop photographed pulsed motion 8=43741
- droplet evaporation rate meas. by optical scatter 8=39484
- droplet, time change of radius in evaporation processes, asymptotic soln. 8=30600

Water—contd
- droplets, evaporation rates rel. to coating of n-decanol film 8=48272
- droplets, falling in air and other gases, supercooling and freezing 8=25984
- droplets, nucleation from vapour, surface tension rel. to radius 8=43781
- drops on metal plate, cooling rate and freezing temp. interdependence 8=48263
- drops, photomultiplier investigations 8=48043
- drops, supercooled, crystallization processes 8=25985
- equipment cooling, protection 8=32986
- evaporation and condensation coeffs., maximum values 8=43915
- evaporation rate in vacuum 8=39480
- exciton and interband transitions 8=43752
- explosion pressure pulse phase shift, interpretation 8=48C34
- far i.r. absorpt rel. to rotational transitions 8=49681
- film breaking on vert. surface, ht. transfer condns., contact angles meas. 8=25895
- flow, low velocity meter 8=34717
- flow through steel pipe, vel. effect on corrosion, mass transfer model 8=36560
- free convection at 4°C, heat transfer coeffs. to immersed plate 8=34838
- free convection below 277°K, minimum effect for pos. temp. differences $< 16°$ 8=34837
- freely falling drops, structure of ventilation coeff. 8=25854
- on glass, porous Vycor, adsorption of vapour, surface conduction current variation 8=27252
- glyceride-water mixture, mesomorphic phase and micelle structure 8=25966
- Great Lakes, wind-driven summer circulation 8=32188
- groundwater, steady radial flow towards circular well 8=43725
- HDO mol. deform. vibrs. characterization by vectors nonperpendicular to bonds 8=29679
- heavy, neutron scatt. including intermolecular interference 8=30405
- homogeneous nucleation and condensation 8=30596
- hydrated electron, structural model 8=34752
- hydration of Al(III) and Ga(III) ions, O^{17} n. m. r. 8=30540
- ice crystals growing in supercooled water, morphology 8=26176
- -ice interface, precrystallisation theory applied to surface-free energy 8=34957
- interfacial layer between ice and silicate surface 8=35142
- internal energy, adiabatic calorimeter 8=28424
- with ions at infinite dilution, ion-water interact. and thermodynamic props. 8=43754
- i.r. determ. of non-H-bonded OH-groups, and thermodynamic props. rel. to struct. 8=30401
- i. r. optical properties; application to radiative transfer in planetary cloud layers 8=50140
- Lagrangian one-dimensional wave motion meas. 8=34729
- laminar flow over heated and cooled plates, stability rel. to heat transfer 8=34709
- laser, pulsed vapour, gain characts. 8=24310
- laser, vapour molecular, far i. r. spectrum calc. 8=42089
- layer formed by melting ice from below, convection onset 8=34827
- light, neutron scatt. cross-sections, comp. with models of molec. motion 8=39304
- light scatt., fluctuation theory 8=30476
- liquid, absorption spectra, vacuum u. v. 8=31998
- liquid-solid transform, high pressure study 8=26327
- in mesomorphic phases, d. m. r. 8=48220
- mixture, glycerol-water acoustic absorpt. below 1 MHz 8=34840
- moisture diffusion coeff. in colloidal capillary-porous mats. rel. to moisture content 8=30662
- molecule, dipole moment from i. r. absolute intensity meas. 8=38837
- molecule, mesonic formed with K$^+$, π^+ or Σ 8=29872
- molecule, Rydberg terms calc. 8=25479
- molecules deform. vibrs. characterization by vectors nonperpendicular to bonds 8=29679
- neutron scatt., slow 8=30405
- nuclear mag. susceptibility meas., prepolariation method 8=25959
- nucleate boiling in systems with methyl ethyl ketone and 1-butanol 8=25998
- oil-water interface, viscosity of adsorbing emulsifying agents 8=48101
- oscs., small, in moving rigid circular and elliptic cylindrical containers 8=43735
- permeability, relative, with oil and gas in porous mats. 8=43988
- phase jumps on surface 8=39278
- phase transform. into ice VII by shock compression 8=48262
- pipe flow, heat transfer rate, turbulence induced fluctuations near wall 8=34830
- pre-adsorbed on Pt, effect on propane chemisorption 8=27738
- proton affinity 8=32110
- proton dynamics from slow n. inelastic scatt., at. 273.4°K 8=39303

Water—contd
- radiation distrib. var. at surface 8=34853
- radiolysis, reactions of electrons 8=49964
- in rayon fibres, broadline n. m. r. 8=27508
- refractive index calc. from reflectance 8=43752
- reservoir, detector of radioactive contamination 8=38403
- resonant oscillations in tank, obs. 8=34724
- resonant oscillations in tank, theory 8=34723
- reaction with hydride ion, MO theory 8=27677
- salt, flow through porous medium 8=43726
- scattering of ruby laser emission, large angle 8=48158
- self-association in dichloroethane 8=34874
- shallow, wave generation by unsteady flow 8=30374
- shock wave, isothermal at max. density 8=34728
- silicate K-8, stimulated Mandel'shtam-Brillouin scatt. threshold, 0.35, 0.69 and 1.06μ 8=32032
- single droplets, optical back scatt. 8=27916
- solubility in compressed N_2, Ar, and CH_4 8=30302
- solvent power for hydrocarbons, structural theory 8=48085
- sonoluminescence, temp. depend. 8=39389
- structure, effect of solutes and temp. 8=39295
- subcooled boiling, average vapour voids, predict, compared with theory 8=35000
- in sun-earth's atm. space, mols. density, obs. 8=29234
- supercooled, basal-plane solidification effects of impurities 8=25982
- supercooled, nucleation on freezing by cavitation 8=25981
- supercritical, high electrical conductivity at high temps. and pressures 8=43862
- supersaturated vapour, molec. association 8=25477
- supply, rel. to pitting corrosion of Cu, mechanism 8=45331
- suspended drops, freezing and fragmentation influence of environmental parameters 8=25853
- swirling in vertical and inclined tubes 8=30366
- thermal springs in Italy, O isotopic comp. of sulphate ions 8=50093
- in tolvene scintillators, max. conc., dioxane and naphthalene effects 8=43844
- and toughness of MgO cryst., reln. 8=40173
- transition boiling, meas. of heat-flux vs surface-temp. reaction 8=35002
- turbulent jets, absorpt. of CO_2 and H_2 8=30425
- underwater rad. distrib. meas., directional photometer 8=42136
- u.s. dispersion of insoluble particles, obs. 8=39442
- u.s. rad. field from focusing spherical source, at finite amps. 8=43804
- vapour, abs. lines in ν_2 band, product of strength and self-broadened half-widths 8=34239
- vapour, absorpt. coeff. 600-1000 cm^{-1} obs. 8=43312
- vapour, atmos. density, space averages by dispersion for refractive correction of e. m. range meas. 8=36722
- vapour, atmosphere attentuation of mm. waves 8=45473
- vapour, CO_2-H_2O mixture, optical-acoustic radiative power, absorpt., press. temp. effects 8=30298
- vapour distribution in stratosphere and high troposphere 8=32202
- vapour impurity in O_2, effect on acoustic absorpt. 8=39211
- vapour in atm., luminesc. under laser irradiation 8=38824
- vapour, i. r. spectrum, line strengths in $\nu_{1\ 3}$ bands 8=25480
- vapour, irrad. with 1 MeV He^+, e.s.r. 8=49968
- vapour laser line identification 8=29745
- vapour laser spectrum, transitions in $2\nu_2$, ν_3 and ν_1 states 8=29741
- vapour mass in atmos. column., meas. by total vertical absorpt. at $\lambda = 1.3$ cm 8=32204
- vapour, meas. of spectral absorpt. in bands 8=27908
- vapour mixture with oxygen, ionization cross-sections and mobilities of different species 8=39023
- vapour, molecular level parameters rel. to laser line identification 8=29748
- vapour, non-isothermal radiation in 2.7μ region 8=43680
- vapour pressure, isotope effects 8=39491
- vapour, radiation at nonequilibrium temps. 8=47597
- vapour, selective radiation obs. near 2.7μ 8=36749
- vapour, spectra by double-beam, two-beam interferometry, far i. r. 8=28818
- vapour spectra, line by line calc. rel. to statistical model 8=43327
- vapour, spectral emissivity, theory allowing for line struct. 8=25481
- vapour spectral transmission function 8=30300
- vapour to ice conversion by AgI 8=45458
- vapour traces in gases, meas. with solid electrolyte cells 8=41298
- vapour, wet bulb depression meas. in mass transfer boundary layer 8=25996
- vertical jets to free water surface, expt. and vel. distribs. 8=34732
- viscosity under press. between 40 and 440 kbars 8=48094
- water-air horiz. annular flow, heat transfer and pressure drop 8=43653
- water-cyclohexane, nonionic surfactant system, phase equilib. and types of dispersions 8=48249
- water/n-alkane interface, ideal gaseous behaviour of Na alkyl sulphates 8=30395
- water-oil system solubilized with Aerosol OT, dielect. props. 5-60°C 8=39406
- wetting of Au 8=48418

Water—contd
- X-ray scatt. from free surface in equilib. with vapour, rel. to struct. and distrib. functions 8=25872
- Zircaloy-2 oxidation in vapour, kinetics and mechanism, 350-500°C 8=32106
- $AlCl_3$ aqueous solution, proton transfer between hydration and solvent H_2O, n. m. r. studies 8=34931
- rel. to $BaSO_4$ suspension stability and electrokinetic pot. in nonpolar media, obs. 8=30550
- $Cu_2[Fe(CN)_6]$ membranes, H_2O transport kinetics 8=48121
- D_2O, absorpt. intensities, 4000-1000cm^{-1} obs. 8=34852
- D_2O. bulk viscosity calc. 8=43768
- D_2O, deuteron spin lattice relaxation 8=48217
- D_2O, max. density temp., and dielec. consts, using significant struct theory 8=43767
- D_2O mol. deform. vibrs. characterization by vectors nonperpendicular to bonds 8=29679
- D_2O molecules, motion in $Na_2S_2O_6 . D_2O$, study by n.q.r. 8=49669
- D_2O-C_2H_5OD mixture vapour press. isotope effect 8=48283
- D_2O, O^{17} enriched, spin echo O^{17} T_1 and T_2 obs. 8=48212
- D_2O, X-irrad., primary radical yields 8=49972
- H bonding, mol. orbital treatment 8=43313
- HCl mass transfer in cylinder with pulsed flow 8=34811
- H^3 content, ethane gas counting meas. and counter shielding 8=42474
- H^3 content, water vapour filled counter 8=42475
- H^3 meas., toluene-Triton-water emulsion scintillator optimum comp. 8=42473
- H_2O, absorpt. intensities, 4000-1000cm^{-1} obs. 8=34852
- H_2O, max. density temp., and dielec. consts, using significant struct. theory 8=43767
- H_2O-C_2H_5OH mixture vapour press. isotope effect 8=48283
- $H_2O + H_2$ laser, sub-mm. sealed-off 8=37581
- H_2O, HDO and D_2O in non-aq. solvents, i.r. intensities 8=39377
- H_3O^+ adsorbed by vermiculite, n. m. r. 8=47695
- O^{17} enriched, spin echo O^{17} T_1 and T_2 obs. 8=48212
- on SiO_2, wetting obs. 8=35140
- rel. to ZnS-MgF_2 layer Fabry-Perot filters max. transmission wavelength shift, obs. 8=28763

Wave equations, quantum theory. See Quantum theory/wave equations.

Wave functions. See Quantum theory/wave equations.

Wave mechanics. See Quantum theory.

Wavefront-reconstruction imaging. See Diffraction/light; Optical images.

Waveguides. See Electromagnetic wave propagation/guided waves.

Waves
- See also Acoustic waves; Elastic waves; Electromagnetic waves; Liquid waves; Magnetohydrodynamics; Seismic waves; Shock waves.
- acceleration, in isotropic, elastic materials, growth 8=32678

Work function—contd
Mo, effective, as collector in thermionic diode, comp. with Ni 8=31460
Mo, effective, rel. to O_2 press. and filament temp. 8=31469
Mo, film, effect of Ba, O_2 and BaO adsorpt. 8=40322
Nb, bare, rel. to wetting by Cs and Na 8=35168
Ni, effective, as collector in thermionic diode comp. with Mo 8=31460
Os balls, in vacuum, and Richardson consts. 8=31467
Pt films on W, rel. to structure 8=35178
Re, bare, rel. to wetting by Cs and Na 8=35168
Re, effective, rel. to O_2 press. and filament temp. 8=31469
Re-rare-earth alloys, obs. 8=40690
Re, vapour deposited, effective and Richardson 8=31468
Si, n-, p-type and caesiated, from photoelec. emission, 80 and 290°K 8=40495
Si, temp. dependence up to 1000°K 8=49436
Ta, bare, rel. to wetting by Cs and Na 8=35168
Ta, contact pot. for O and O-Cs atmos. 8=31469
Ti, film, effect of Ba, O_2 and BaO adsorpt. 8=40322
TiO_2, and elec. cond., changes in response to chemisorpt. of O 8=40691
U on W, effect of H contamination 8=49437
W, adsorpt. of CO on (100) and (211) faces 8=35200
W, bare, rel. to wetting by Cs and Na 8=35168
W, covering by adsorpt. of NH_3 8=27734
W, dependence on surface conc. of adsorbed O., 8=39622
W, effective, rel. to O_2 press. and filament temp. 8=31469
W, rel. to O_2 coverage 8=39626
W single crystal, (110) and (112) planes, effect of N_2 adsorpt. 8=39621
W, vapour-deposited (110) oriented thermionic, emitter, X-ray and vacuum 8=28477
W with coadsorbates, desorpt. cross section determ. 8=39623
W, Cs coated 8=36038
W-Mo-Re alloys, trace impurity effects 8=39727

Work hardening
See also Cold working; Surface texture.
alloys, rel. to superdislocations with thresholds in the LI_2 superstructure, braking 8=26655
alloys containing hard particles, model 8=35640
anthracene crystals 8=26855
axisymmetric propag. in solid viscoelastic sphere 8=26750
barrier, dispersed, temp. depend. 8=26631
high-strength mats., exponent effect on fracture toughness dependence on thickness 8=26766
metals, face-centred, theories rel. to dislocation density and flow stress 8=35558
plastic deformation of rot. disc by strain incremental theory 8=26762
plastic square bar, numerical anal. of combined bending and torsion 8=23836
plates, circular, of hardening material, bending anal. 8=41727
rel. to fatigue failure 8=31171
solid solution hardening of metal crystals 8=26763
steel, high-strength, exponent effect on fracture toughness dependence on thickness 8=26766
superstructures, model 8=44527
Al, high strength, exponent effect on fracture toughness dependence on thickness 8=26766
Al sheet, secondary softening rel. to previous cold work 8=44543
Cu, by strain, rel. to slip distrib. and initial dislocation substruct. 8=44459
Cu crystal, n-irradiated, radiation hardened, critical shear stress temp. and strain rate dependence 8=31196-7
Cu-Ni alloy, rel. to internal strains from plastic deformation 8=31194
Ge, curve under deform., dislocation structure at various stages 8=35565
Pb cylinders, strain-time, strain-rate and dynamic force-time characts. 8=35711
Ta-Mo alloys, effect of Mo content 8=35718
Ta-Re alloy, rel. to conc. and temp. 8=40182
Ta-Nb alloys, effect of Nb content 8=35718
Ti alloys, high-strength, exponent effect on fracture toughness dependence on thickness 8=26766

X-ray absorption
See also X-ray spectra/absorption.
angular dip. of abs. X-ray lines by cylindrical and spherical specimens 8=35296
electron microprobe analysis, target absorpt. correction 8=27799
electron microprobe correction factors, calc. methods evaluation 8=27801
electron probe microanalysis correction functions, evaluation 8=27797
electron probe microanalysis, corrections rel. to target Z 8=27796
extended fine structure of crystals, k-absorption spectra 8=39748
in interstellar gas, soft X-ray cross sections, calc. 8=45727

X-ray absorption—contd
in light elements, Philibert's correction extension 8=27798
mass absorpts. coeffs. meas. for various substances 8=41048
radiation shield for texture goniometer 8=39705
rare earths M spectra, sample self absorpt. effects 8=36355
scintillators, noble-gas, for X-rays, quantum efficiency meas. 8=37928
silicate minerals rel. to quantitative microprobe analysis, obs. 8=27809
Ar, of K_α, double e photoejection 8=38714
Cu L spectrum, sample self absorpt. effects 8=36355
Ne, of K_α, double e photoejection 8=38714
Pb L_α, emission in anticathode, 17-29 kV 8=36420
in SiC of C radiation, extended Philibert's correction 8=27798
Ti K_α, emission in anticathode, 17-29 kV 8=36420

X-ray analysis. See Chemical analysis/X-ray; Crystal structure, atomic; X-ray crystallography.

X-ray astronomy. See Astronomy and astrophysics.

X-ray characteristic temperature. See Specific heat.

X-ray crystallography
For results of structure analysis see Crystal structure, atomic.
alkali halides, Debye-Waller factors temp. dependence, calcs. 0-900°K 8=39869
angular dep. of abs. X-ray lines by cylindrical and spherical specimens 8=35296
Bijoveet type generalized eqns. 8=35297
crystals, perfect, unstrained and lightly strained 8=35295
Debye-Waller factor and low temp. anharmonicity 8=35372
Debye-Waller factor in single crystal absorbers, Mossbauer effect obs. 8=39745
diffraction, divergent beam, errors 8=30880
diffraction, introduction through analogies in interference patterns 8=30879
diffraction, simultaneous, n-beam case dynamics 8=35301
diffraction, simultaneous, 3-beam case dynamics 8=35302
diffractometry, liquid He cryostat 8=48622
impurity atoms, location in cryst. matrix. 8=40009
librating atom temp. factor, expression for analysis corrections 8=44184
non-cubic cell parameters, depend. of accuracy on reflection indices 8=35298
Pendellösung, X-ray interferences, experimental results 8=39749
refraction modified back-reflection diffractometry 8=48615
thermal scatt. component, integral, exptl. determ. 8=48612
two-line Fourier analysis, influence of cut-off 8=35299
volume determ., interf. point counting 8=35259
zeolites, surface area determ. 8=48432
AgBr, e.-distribs. 8=48302
Fe in Cu and Au, Debye-Waller factor, anharmonic contribution 8=39874
Ge, divergent beam tech. for precise lattice consts 8=48653
LiCl, Debye-Waller factors from diffr. meas., 298 and 78°K 8=44224
Si, Pendellösung fringes in crystal free of dislocations 8=48675
Sn, anomalous transition 8=49757
apparatus
See also X-ray monochromators; X-ray spectrometers.
Automatic Precision X-ray Goniometer for diffr. angle meas. 8=26342
automatic single-crystal diffractometer system PAILRED, principles 8=44189
back-reflection camera for single crystal areas 8=30842
balanced filter device, automatic, for diffr. expt. 8=44191
camera, far X-ray diffraction topography 8=26331
camera, point-focusing, for single-crystal diffr. 8=44192
computer-controlled diffractometer, programme variety 8=26339
computer-controlled low angle diffractometer 8=26340
computer, controlled single-crystal diffractometer 8=26337
counter diffractometer for crystal struct. investigations on n-irradiated materials 8=44260
diffraction cameras treated as transmission systems 8=48625
diffraction spectrometers, elastic quasi-mosaic effect after diffraction from deformed crystals 8=39706
electronic programmer for automatic scanning of small-angle scatt. curves 8=48626
high-pressure-high temp. diffractometer 8=26335
interplanar distance determ. 8=39754
diffractometers, automatic: Pailred and General Electric Datex; a comparison 8=26341
film goniometer, principle and appl. 8=30816
filter for $K\alpha_2$ radiation 8=35306
goniostat, crystal orientation aid 8=35211
high-pressure single-crystal cell for use with precession camera 8=26327
image intensifier for diffraction patterns 8=26344
Kossel pattern generator with single e. m. lens 8=30883
low-temperature diffraction apparatus for meas. room temp. to −180°C 8=26333

X-ray crystallography—contd
- **apparatus**—contd
  - microdensitometer, c.r.t. with computer control 8=35304
  - multichannel diffractometer for quantitative phase analysis 8=26329
  - phase transformations, low temp. 8=35078
  - polaroid adapter for alignment of single-crystals in Weissenberg goniometer 8=44190
  - pulse height spectrum display 8=26284
  - Siemens horizontal diffractometer modifications for surface reflexion topography 8=26325
  - specimen-holder, thermoelec. annealing 8=39755
  - for teaching elementary crystallography 8=26330
  - for thermal expansion determ. at high temps. 8=26593
  - for transferring crystal from one goniometer head to another 8=26345
  - Unicam high-temp. camera, adaption for thermal studies of layer-lattice silicates 8=26326
  - Weissenberg camera, shutter for photographic alignment 8=35305
  - Weissenberg goniometer attachment for equivalent recording of all reflections 8=39756
- **calculating apparatus**
  - automatic single-crystal diffractometer system PAILRED. principles 8=44189
  - computer-controlled diffractometers-the OLDMAN system 8=26338
- **calculation methods**
  - absorption correction method from intensity meas. 8=39740
  - absorption correction, semi-empirical method 8=39737
  - absorption corrections appl. to high-pressure single-crystal studies 8=44177
  - atom deformation in diffr. data, model calc. exam. 8=39742
  - atomic scattering factors from structure-factor meas. 8=39736
  - Compton line intensity distrib. calc. using Thomas-Fermi models 8=39739
  - computer formulae of structure analysis, representation in parametrical form 8=26310
  - cylindrical lattice, faulted, (chrysotile), diffr. profile calc. and meas. 8=39805-6
  - Debye-Waller factor without Debye distrib. 8=44185
  - diffraction profile interpret. by central scattering and Fourier analysis 8=30874
  - distorted crystal, line shape, dynamical calc. 8=26306
  - elastic constants determ., correction for second-order diffuse scattering 8=40093
  - electron density maps, errors, and use of integrated densities in charge density distrib. exam. 8=39751
  - four-axis hexagonal lattice construction in reciprocal space 8=30873
  - h.c.p., indices and directions 8=30873
  - integrated Bragg intensities, correction of measured values for first order thermal diffuse scatt. 8=44179
  - Kikuchi line interpret. rel. to 2 dimensional lattice 8=44202
  - least-squares refinement, applied results 8=26314
  - least-squares refinement method for isomorphous replacement 8=44186
  - lattice energy minimum search 8=26316
  - least-squares determ. of positional parameters, sinple approx. matrix. 8=39743
  - least squares refinement computer programme 8=39753
  - least-squares refinement, convergence-criteria 8=39752
  - least-squares refinement, filter technique 8=39750
  - least squares refinement in crystals with constraints, approx. matrix method 8=26313
  - least-squares refinement using anisotropic temp. factors from lattice dynamical calcs. 8=26569
  - line-profile parameters, statistical variance 8=26307
  - minimization method for solving structure, analysis problems 8=26317
  - molecular crystals, calc. method for densest distrib. of plane mols. in layers 8=30878
  - MONITO computer programmes 8=39744
  - non-cubic crysts. lattice params. from Kossel lines 8=30881
  - non-cubic crysts., lattice params. and symmetry from Kossel lines 8=30882
  - optimal algorithm, principles, consequences and applications 8=23783
  - optical-diffractometer masks for interpreting X-ray diffr. patterns, prep. techniques 8=26319
  - orientation distribs. in fibres and sheets 8=44178
  - Patterson diags. for orthorhombic diatomic groups 8=26305
  - phase determ. using correlation-eqn. method 8=48611
  - phases of structure factors, direct determ. using non-perfect model of electron density 8=30875
  - pole figure plotting from intensity, computer direction 8=48584
  - pole figure recording and analysis by computer 8=48580
  - pole figures, computer plotting using terminal printer as output device 8=48583
  - potential distribs. in atoms, Z=1-18, integral characts. 8=39731
  - powder pattern indexing, reliability criterion 8=44176

X-ray crystallography—contd
- **calculation methods**—contd
  - powder patterns of unknown structures, indexing by computer 8=26311
  - protein crystals, heavy atom location method 8=26548
  - quantitative analysis with calculated X-ray powder patterns 8=48621
  - random-layer line profile, Fourier-transform methods 8=26308
  - refinement of parameter of atoms in special positions, general procedure 8=26315
  - refinement using aspherical at. scattering factors 8=26309
  - rotation-function high-speed programme and appl. 8=26312
  - scattering factors, relativistic Hartree-Fock 8=39741
  - spinel structure, line profiles, effect of substitutional disorder 8=44225
  - stereographic projections, computer constructions 8=48623
  - structure refinement from powder data 8=48673
  - texture representation, complex, by biaxial pole figures, analysis 8=48576
  - valence struct. from coherent scatt., Fourier difference synthesis 8=48620
  - variance as measure of line broadening rel. to particle size determ. in Ni powder 8=26296
  - Weissenberg photograph analytical indexing, computer-aided 8=26318
  - OD groupoid-family, intensities sum rel. to single layer structure, and appl. 8=26480
  - W, absolute atomic scattering factors 8=48681
- **structures**. See Crystal structure, atomic.
- **technique**
  - alignment of single-crystals with polaroid adapter for Weissenberg goniometer 8=44190
  - anomalous dispersion in structure analysis 8=26321
  - Berg-Barret, for obs. dislocations 8=44430
  - Berg-Barrett topography using Siemens horizontal diffractometer 8=26325
  - crystal cooling by N_2 boiling 8=32992
  - differential diffractometric, for lattice parameter change determ. 8=39757
  - differential photometric, for phase modification analysis 8=26323
  - diffraction angle meas. of very high precision 8=26342
  - divergent beam, for anisotropic distortion exam 8=48619
  - double-crystal diffr. topography with small set of reference crystals 8=26332
  - filter difference method in combination with film method 8=44187
  - for high-temperature exam. of graphite 8=39792
  - Kossel line, in back reflection region, for precision determ. of lattice constants 8=39738
  - lattice-parameter determ. at liq. He temps. by double-scanning diffractometry 8=26334
  - Laue photography, glancing-angle, determ. of crystal orientation 8=26182
  - microscopy for selected-area diffr. patterns and magnified Lane-diffr. images 8=48586
  - mounting, methacrylate adhesive 8=31233
  - oscillation photography for routine structure analysis 8=26346
  - phase determ. using anomalous dispersion and directly measurable parameters 8=39733
  - phase shift determ. 8=48617
  - polarized X-ray photography for extinction and absolute intensity meas. 8=26343
  - powder, peak intensity errors rel. to grain size and crystalline structure 8=26285
  - protein crystals, heavy atom location method 8=26548
  - pulse height spectrum display and appl. 8=26284
  - Siemens diffractometry for precision lattice parameter determ. 8=26324
  - Siemens microphotometer for single-crystal photographs 8=26320
  - structure determ. based on intensity meas. with automatic Nonius diffractometer 8=26336
  - substructure in single-crystal, quantitative determ. by Laue patterns of high resolution 8=26322
  - in teaching elementary crystallography 8=26330
  - topographs, contrast caused by imperf. 8=48618

X-ray diffraction
- See also X-ray crystallography; X-ray scattering.
- absorption corrections appl. to high-pressure single-crystal strudies 8=44177
- angle meas. of very high precision 8=26342
- anomalous transmission, multiple, theory and expt. using Ge 8=35335
- apparatus, at very low temp. 8=35212
- atom deformation from data, model calc. exam. 8=39742
- automatic single-crystall difractometer system PAILRED, principles 8=44189
- back-reflection camera for single crystal areas 8=30842
- balanced filter device, automatic 8=44191
- cellulose I and II rel. to acetylation, obs. 8=45325
- coconut fibre, spiral orientation and cell dimensions 8=48358
- collimator slits, principal limit of meas. 8=28931

X-ray diffraction—contd
cristobalite, stacking fault conc. calc. from line profiles 8=26703
crystal monochromated X-rays, polarization 8=41039
crystalline, effect of X-ray coherence 8=48613
by crystalline medium, diffuse scatt. rel. to electron density 8=26347
crystallography, divergent beam, errors 8=30880
cylindrical lattice, faulted, (chrysotile), profile calc. and meas. 8=39805-6
data averaging, continuous, with multichannel analyser 8=28242
diamonds, natural and synthetic, comparison 8=30889
differential photometric technique, for phase modification analysis 8=26323
diffractometer DRD-1, remote controlled 8=48624
diffractometer, sample holder for spinning device 8=28932
diffractometry, single-crystal, low-temp. system 8=30884
in diffusion coeff. determ. 8=35469
in disordered crysts. with nearly perfect unit cells, correl. functions and theory 8=26328
double-crystal topography with small set of reference crystals 8=26332
dynamical, spherical-wave theory, for absorbing perfect crystals, crystal wave fields 8=30876
dynamical, spherical-wave theory, for absorbing perfect crystals, integrated reflection power 8=30877
elastically deformed crystals, elastic quasi-mosaic effect 8=39706
electret exam., dipole orientation rel. to polarizing field 8=44891
extinction and Borrmann effect in CaF$_2$ spheres 8=44183
extinction and Borrmann effect in mosaic crystals 8=44182
goniometer for single-crystal alignment 8=35210
grating, ruling engine design and construction 8=33303
gratings, 1Å dispersion 8=28929
holography, and appls. 8=24436
image intensifier for patterns 8=46233
imaging furnace, evaluation as heat source 8=33304
introduction through analogies in interference patterns 8=30879
line broadening effects, separation by means of line-width relations 8=45147
liquid He cryostat 8=48622
polymer crystallinity obs., definition 8=44092
powder data from rystals, computer indexing 8=44188
rabbit psoas muscle, glycerol-extracted, filament lattice studies 8=26458
refraction modified diffr. law for back reflection 8=48615
selected-area patterns and magnified Lane-diffr. images from microscopy 8=48586
simultaneous, n-beam case dynamics 8=35301
simultaneous, 3-beam case dynamics 8=35302
solid solns., chemical comp. determ. 8=27814
spinal structure, line profiles, effect of substitutional disorder 8=44225
spinel structure, line profiles, effect of substitutional disorder in MgFe$_2$O$_4$ and Mg(Cr, Al)O$_4$ 8=44226
stationary crystal and film topography, slit system 8=33302
tapiolite and synthetic trirutile substances 8=48614
tobacco mosaic virus with imbedded Xe, binding props. of Xe 8=25974
AgBr, crystallization 8=44114
Au films, lattice parameter thickness dependence, meas. 8=30748
BaTiO$_3$, fine-grained, line shifts 8=39716
CaSO$_4$. H$_2$O, chem. and phase equilibria under hydrostatic press. 8=43901
CdS, microstructure, calc. 8=39779
Cu crystals, deformed, dislocation density determ. 8=26673
for Cu crystals, fast neutron radiation damage obs. 8=26732
CuAuII long period ordered alloy, rel. to lattice modulation 8=30893
Fe, line intensity changes on plastic deform. 8=44166
Fe-Cr alloys, oxidation study by glancing angle technique 8=49868
Fe-Si crystals, contrast at ferromagnetic domain walls 8=27409
In, liquid structure temp. dependence exam. 8=25873
KH$_2$Al$_2$(SiO$_4$)$_3$, isomorphic substitution distribution 8=35338
LiF powder, Debye-Scherrer obs. with Fe^{55} source 8=28930
Mg (Cr, Al)O$_4$, disorder, study 8=44226
MgFe$_2$O$_4$, disorder, study 8=44226
Pt ribbon diffractometer attachment, temp. meas 8=32978
Si, dislocation distribs. from Laue-case diffr. expts., 8=48860
Si-O solid soln, anomalous transmission rel. to periodicity changes on decomposition 8=36409
Sn, Borrmann effect 8=49750
Sn^{119}, resonance γ-rays, on nuclei and electrons 8=39821
Tl, liquid structure temp. dependence exam. 8=25873
UF$_4$, 2. 5H$_2$O, rhombic, and dehydration product obs. 8=30870

X-ray diffractometers. See X-ray crystallography/apparatus.
X-ray examination of materials
See also Chemical analysis/X-ray; Radiography.
alnico, high-coercivity, powder pattern exam. 8=35346
anthracene, dislocations, direct topographical obs. 8=31074
apparatus for high pressure study 8=35303
banana fibres, normal and treated 8=48359
borate glasses, dissociated regions 8=39630
clay minerals, rel. to contact metamorphism 8=39571
collagen-like polymers 8=25682-3
crystallite vol. determ., interf. point counting 8=35259
crystals, Compton effect, review of recent articles rel. to appls. 8=26283
crystals, perfect, unstrained and lightly strained 8=35295
crystals, thin, contrast in topographs 8=48618
defectmeter with Sb$_2$Se$_3$ detectors, construction and appls. 8=39989
deoxycholic acid fibres, 8=26491
di(tetramethylammonium)bis(maleonitriledithialato)CuII, and e. s. r. studies 8=35364
diamond, dynamic reflection, rel. to at. vibration spectrum, review 8=43922
films, from interference fringes 8=48435
fission fragment K, bent-crystal spectrometer 8=34062
goniometer, texture, X-ray shield 8=39705
graphite at > 2000°C, techniques 8=39792
graphite, line intensity on X-ray diagrams 8=35319
for high-pressure studies 8=35303
liquid crystals in mag. fields 8=30410
lysozyme crystals at -50°C rel. to cross-linking 8=26519
microanalyzer, neutralizing insulating targets by low-energy electrons 8=45421
microradiograph for small specimens 8=32619
microscope, MIR-1, shadow 8=48581
minerals, powder diag. peak intensity errors rel. to grain size and crystalline structure 8=26285
photographic emulsion, speck size distrib. determ. 8=24443
planar defect, dynamical contracts 8=31094
point-projection microscopy, technique and limitations 8=48582
polydisperse suspensions, diameter distrib. determ. by small-angle scattering 8=30553
polyethylene, crystallized, crystallite size and lattice defects 8=39990
polymer crystallinity, definition rel. to X-ray diffr. obs. 8=44092
polytripeptides with (glycine-iminoacid-iminoacid) sequence, and synthesis 8=25682-3
powders, grading rel. to dispersion and compactness using diffracted intensity 8=43985
powders, ultramicrotomed, peak profiles rel. to deformation structure 8=48585
protein and nucleic acid structure determ. 8=32624
quartz crystal, u.s. vibrations, topographical obs. 8=48722
quartz glass, structural exam. 8=39629
rabbit psoas muscle, glycerol-extracted, filament lattice studies 8=26458
silicates, layer-lattice, thermal studies using adapted Unicam high-temp. camera 8=26326
sisal fibres, normal and treated 8=48359
stacking fault energy determ. from diffr. analysis, temp. effects 8=31093
stacking fault, image contrast on topographs 8=35574
steel, stainless, oxide fluorescence analysis 8=41304
stress analysis, portable equip. used by Boeing Co. 8=26754
substructure of single crystals by high resolution Laue diagrams 8=35300
Suzuki atmosphere 8=40029
thoria gel, crystallite sizes, equivalence with electron microscopy 8=35284
topography, using Kα_2 rad. monochromated by Ru filter 8=35306
vapour thermostat for back-refl. camera 8=33301
Au films, lattice parameter thickness dependence, diffr. meas. 8=30748
Al-8.7 at. % Zn alloy, internal strain field determ. 8=26786
Al, qualification by fluorescent spectrum line shift 8=41059
Al surface, Kikuchi line interpret. rel. to 2 dimensional lattice 8=44202
Al-Ag alloy, Ag conc. from Guinier-Preston zone exam., 8=49996
AlNi alloy, structural changes on ageing rel. to mag. props. 8=35090
Al(OH)$_3$ gel, struct. 8=25971
Au-Cd alloys, hexagonal, stacking faults 8=26701
BeF$_2$, glassy, atomic radial distrib. from diffr. meas. 8=26148
CdSe crystal, defect structure from topography 8=39994
Cr-Mo-Co steel R-phase precip., structure and comp. analysis 8=44001
Cs$_3$Sb films on MnO 8=39591
Cu alloys, thermal expansion at high temps. 8=26593
Cu crystals, deformed, dislocation density determ. from diffr. profiles 8=26673
Cu, ductile deformation mode, by anomalous transmission 8=26648

X-ray examination of materials—contd
    Cu foils for use in nuclear resonance obs., texture parameters 8=49663
    Cu hexamethylene-dithiocarbamate, struct. obs. 8=30919
    Cu, nearly perfect crystals, vacancy clusters, topograph exam. 8=35534
    Cu whiskers, structural features rel. to deformation by torsion 8=35254
    Fe, deformed, diffraction line intesity changes on annealing 8=35332
    Fe, diffr. line intensity changes on plastic deform. 8=44166
    Fe, high-purity plastically deformed, on heating to 600°C 8=35677
    Fe-Be alloy, ageing 3-D modulation of struct 8=30650
    Fe-Cr-O system, low-temp. oxidation, glancing angle diffractometry 8=27703
    Fe-Si crystals, diffr. contrast at ferromag. domain walls 8=27409
    $FeAl_2O_4$, cation distrib., diffraction and Mössbauer study 8=35331
    Ga, liq. x-ray scatt. 8=34765
    GaAs, liq. x-ray scatt. 8=34765
    Ge, brittle deformation mode, by anomalous transmission 8=26648
    Ge, impurity distrib., non-uniform, meas. by anomalous transmission 8=31376
    Ge, n-irradiated, damage studies by diffr. 8=26733
    Ge, n-irradiated, defect detection using anomalous transmission 8=48834
    Ge, thermal expansion from powder diffr. meas. 8=44347
    H_xWO_3, same crystal structure as $Na_{(0\cdot1)}WO_3$ 8=35336
    Ir, thermal expansion from powder diffr. meas. 8=44347
    KH_2PO_4, dislocations and precipitates exam. by diffr. microscopy 8=26691
    $LiF:Ni^{2+}$, impurity ion clustering from small-angle exam. 8=44422
    MgO, effective atomic charge-determ. 8=26169
    Mo-Mn steel R-phase precip., structure and comp. analysis 8=44001
    $Na_{0.5}Bi_{4.5}Ti_4O_{15}$, cation ordering 8=26413
    $Na_8Ba_2Ti_4O_4(B_4Si_{20}O_{56})$, leucospherite, at. struct. obs. 8=30907
    NaCl, effective atomic charge-determ. 8=26169
    NaCl, under high pressure 8=35303
    Nb_3Sn, phase transform. from diffr. at 300, 15.5 and 10.5°K 8=35118
    $(NH_4)H_2PO_4$, dislocations and precipitates exam. by diffr. microscopy 8=26691
    PbS, deformation state, investigation by harmonic analysis of form of interference lines 8=31227
    Rh, thermal expansion from powder diffr. meas. 8=44347
    Sb, liq. x-ray scatt. 8=34765
    Se, vitreous, atomic arrangements from diffr. data at 25 and −196°C 8=30793
    Si, and inelastic electron scattering 8=44155
    Si, n-irradiated, damage studies by diffr. 8=26733
    Si, n-irradiated, defect detection using anomalous transmission 4=48834
    Si, Pendellösung fringes in crystal free of dislocations 8=48675
    W, deformation mode, by anomalous transmission 8=26648
    $\alpha W-\beta W-WO_2$ mixture, quantitative anal., calibration problems 8=35288
  liquids
    p-azoxyanisol, liq.-crystal, in strong mag. field 8=39309
    benzene, structure 8=34764
    DNA, conformation in soln., by small-angle scatt. 8=29860
    formamide 8=39306
    liquid crystal mixtures, structural and stability characts., x-ray exam. 8=39310
    p-methoxybenzylidene-p′-cyanoaniline, nematic struct. study 8=48067
    molecular, thermal agitation coeff. determ. for diffr. studies 8=25878
    nitrobenzene, liq., X-ray scattering 8=43760
    t-RNA, mol. behaviour at different conc. and ionic strengths 8=25875
    scattering techs., reln. between X-ray and neutron methods for structure 8=30402
    solutions, x-ray and n diffr. methods 8=34763
    structure determ. 8=25876
    transition metals, liquid structure 8=25874
    water, struct. and distrib. functions from scatt. by free surface in equilib. with vapour 8=25872
    Ar, diffraction rel. to determ. of intermolec. pot. and correl. functions 8=25877
    In, liquid structure temp. dependence 8=25873
    Tl, liquid structure temp. dependence 8=25873
  microstructure
      See also Crystal structure/microstructure.
    alloy, ticonal-type, oriented modulated structure 8=35056
    β-brass, quenching effects 8=48595
    electron microprobe, camera for stereo projection micrographs 8=30844
    grain size determ. of coarse crystals 8=30841
    α-keratin, matrix-microfibril texture 8=39729
    muscle filament, structure and packing 8=28200
    pole figure recording and analysis by computer 8=48580

X-ray examination of materials—contd
  microstructure—contd
    polyethylene, during orientational stretching 8=35293
    polyethylene films, rel. to stretching processes, diffr. studies 8=26859
    polyethylene terephthalate, crystallization behaviour 8=26206
    scans integration, photographic, optical and electronic, evaluation 8=30840
    wood fibres, small- and wide-angle diffr. patterns 8=26047
    α-Al_2O_3 powder, explosive shock treatment effects from line-broadening analysis 8=44168
    Au crystals in polyvinyl alcohol films, sizing 8=30858
    CdO, X-ray reflex broadening, lattice distortion and particle size 8=48591
    Fe chromites, phase transformation study 8=35101
    LiF ground powders, microstrain and crystallite size determ. by line-broadening profile analysis 8=48600
    $LiNbO_3$, ferroelec. phase transitions, 20° – 1170 °C obs. 8=30863
    MgO powder, explosive shock treatment effects from line-broadening analysis 8=44168
    Mo, X-ray topographic investigation 8=35274
    Si, diffr. patterns rel. to thermally induced stresses 8=49051
    Si(100), (110) and (111) surfaces, Berg-Barret skew tables for Kα 8=35347
    Si: P, As, single crystals, porous substruct. 8=30866
    SiO_2, amorphous → cristobalite transformation 8=44011
    Y-C system, phase diagram proposal 8=39569
  molecular structure
    actin 8=25674
    o-aminobenzoic acid, H-bonding dimer obs. 8=43359
    high polymers, degree of crystallinity 8=48690
    pepsin, isomorphous derivative prep. 8=30833
    polyvinylidene fluoride, supramol. structure and $\alpha \rightleftharpoons \beta$ phase transformations 8=26155
    H_2O, Compton scattering profile 8=48066
    $In_2(MoO_4)_3$, monoclinic, rel. to $Fe_2(MoO_4)_3$ model 8=30900
X-ray fluorescence. See Luminescence; X-ray spectra/emission.
X-ray measurement

    solar, rocket-borne data handling system 8=50445
    Z-crystal interferometer, construction and operation 8=37733
    $FeSO_4$ Fricke-Miller dosimeter, $G(Fe^{3+})$ yield, 62 keV 8=42457
X-ray microscopes. See Microscopes.
X-ray monochromators
    crystal monochromated X-rays, harmonic radiation elimination 8=41040
    crystal monochromated X-rays, polarization 8=41039
    crystal, polarization factor determ. 8=46785
    high-aperture evacuated, with fixed receiver station 8=46780
    for $K\alpha_2$ rad., appl. to topographical and powder photographs 8=35306
    sing crystal 8=28928
X-ray photoeffect. See Electron emission/photoelectric.
X-ray reflection
    curve shape, effect of insufficiently monochromatic and insufficiently parallel beam 8=49689
    diamond, synthetic, anomalous refl. obs. 8=30889
    integral thermal scatt. component, exptl. determ. 8=48612
    non-cubic cell parameter, depend. of accuracy on reflection indices 8=35298
    paraffin mirrors for $\lambda > 20Å$ 8=24449
    polarized, onto periodic pile of dielectric layers 8=49675
    resonator, planar using Bragg reflectors 8=46786
    vapour thermostat for back-refl. camera 8=33301
    Al film on BK7 glass, obs. 8=31961
    Si(100), (110) and (111) surfaces, Berg-Barret skew tables for Kα 8=35347
    Si, plane crystal, (220) reflection, effects of fast neutrons 8=30911
X-ray scattering
      See also Compton effect; X-ray diffraction.
    anthracene, by thermal agitations, rel. to phonon freqs. 8=26577
    Bijoveet type generalized eqns. 8=35297
    Compton effect in crysts., review of recent articles rel. to appls. 8=26283
    crystal monochromated X-rays, polarization 8=41039
    by crystalline medium, diffuse scatt. rel. to electron density 8=26347
    from crystallite models of amorphous mats., calc. of upper bounds 8=26142

X-ray scattering—contd
- diamond, random defect distribution, neutron irrad. 8=40016
- distorted crystal, line shape, dynamical calc. 8=26306
- ferrite, diffuse, from doublet defects 8=39996
- by homogeneous substances, limit for zero angle of intensity rel. to mean fluctuation of density 8=25879
- liquids, struct. determ. 8=25876
- by macromolecules in soln., theory of diffuse small-angle scattering 8=25870
- martensite, diffuse, from doublet defects 8=39996
- mixtures of amorphous solids or liquids, data anal. 8=39628
- by mosaic virus, southern bean, interparticle interactions 8=25967
- nitrobenzene, liq. 8=43760
- polydisperse suspensions, small-angle, diameter distrib. determ. 8=30553
- polymethacrylic acid, aqueous and methanol solns., rel. to conformational changes 8=25888
- powder grain size determ. from scatt. intensity 8=30843
- regular crystals, resonance Bragg scattering of γ-quanta 8=39746
- semiconductors of blende-type structure, anomalous, rel. to polarity determ. 8=45153
- thermal diffuse, dynamical treatment 8=45154
- thermal diffuse, harmonic radiation elimination 8=41040
- thermal diffuse, integrated first and second-order evaluation 8=27540
- thermal diffuse, rel. to generalized theory of X-ray phonon cross-sections 8=27539
- by two-phase systems, for determ. of particle size distrib. 8=26041
- two-phonon, in diatomic crystals, intensity calc. 8=35369
- vacuum sample holder for Kratky camera 8=34688
- valence struct. from coherent scatt., Fourier difference synthesis 8=48620
- weighting functions for collimation corrections 8=46782
- Al polycrystals, thermal diffuse, temp. dependence 8=48632
- Ar gas for determ. of intermol. pot. 8=30274
- $BaTiO_3$, anomalous 8=36329
- BeO, random defect distribution, neutron irrad. 8=40016
- Cu-16. 7% Pd alloy, diffuse, rel. to elec. resistivity and short-range-order 8=36354
- Cu polycrystals, thermal diffuse, temp. dependence 8=48632
- CuNi, small angle scatt. obs. of clustering 8=30892
- Fe, Compton profile 8=31989
- Ga, liq., intensity curves 8=34765
- GaAs, liq. intensity curves 8=34765
- Ge, thermal, accompanying Bragg reflection, direction dependence of intensity 8=44217
- He^3, liquid, rel. to h.f. sound vel., and zero-point scatt., obs. 8=32999
- KBr, thermal diffuse by transverse lattice waves 8=44221
- KCl, rel. to dislocation density and distrib. 8=45198
- LiF, rel. to dislocation density and distrib. 8=45198
- NaCl, rel. to dislocation density and distrib. 8=45198
- NaCl, thermal diffuse, rel. to transverse acoustic [OhO] phonon dispersion curve 8=39876
- NaF, by phonons 8=44286
- Sb, liq., intensity curves 8=34765
- Si, incoherent, and inelastic electron scattering 8=44155

quartz : Co-doped, on absorpt. spectrum 8=48556
semiconductor diodes, theoretical shape of diffusion comp. of current pulses 8=27164
Ba methacrylate dihydrate, polymerization 8=27741
CaF_2, F-centre vacancies, formation and bleaching 8=40059
CaF_2:Y, irradiated, polarized luminesc. and structure of luminesc. centres 8=36478
CdSe photocurrent on X-ray illumination 8=40656
C_2H_5I and CH_3CD_2I, fragment ions from X-irrad. 8=47795
In, photoelectron emission on excitation, energy distrib. 8=40707
p-InSb, changes in electrical conductivity 8=40471
InSb, photoelectron emission on excitation, energy distrib. 8=40707
KBr, irradiated, low-temp., Frenkel defect formation at 8°K 8=40005
KBr-KCl solid solutions, induced intrinsic luminesc. 8=41198
KCl, i.r. absorpt. spectra 8=41104
KCl, irradiated, low-temp., Frenkel defect formation at 8°K 8=40005
KCl whiskers, F-centre accumulation 8=35585
KCl-KI solid so'ns, decomposition rel. to effect on spectral characts. 8=36395
KCl, X-irrad., thermal annealing Frenkel defect recombination 8=40166
LiF, change in lattice constant, concentration of F-centres, electrical conductivity 8=35603
NaCl—KCl solid solns, decomposition rel. to effect on spectral characts. 8=36395
NH_4 halides, new defect centre, motional effects 8=48879
NH_3OHCl, irradiated, e.s.r. of V_K centres, radical pairs and trapped NO 8=31878
NaCl:$CdCl_2$, F-centres, associated absorpt. bands 8=31113
$Pb(CH_3)_4$, fragment ions from X-irrad. 8=47795
Sb, photoelectron emission on excitation, energy distrib. 8=40707
Se, hexagonal, internal photoeffect spectral distrib. on X-ray and u. v. irradiation 8=40672
Si diode, Frenkel effect due to irradiation 8=40533
SrF_2: Y, irradiated, polarized luminesc. and structure of luminesc. centres 8=36478
U_2Ti, induced phase changes 8=35134
protection. See Radiation protection.

Xenon
in achondrites, U and Ca-rich, two types of fission Xe 8=28160
adsorption on pyrex 8=30774
arc, high press., in stationary and flashed modes, spectral emission and abs. obs. 8=29945
arc lamp, simple power supply system for stable operation 8=24073
atom, electron scattering, elastic 8=47529
atom, interaction with H^+, H° and H^-, charge state changes, investigation by coincidence method 8=43238
atoms, photo-attenuation cross section, 1050-1550Å 8=43206
compressed, light source for pumping Nd glass laser 8=28709
crystalline, kinematic resonances in optical absorpt. spectrum 8=27611
diatomic, attenuation cross section near resonance line 1469.6Å 8=43205
diffusion and release from sintered UO_2 at low temps. 8=26624
diffusion in CaF_2 and U doped CaF_2 8=26618
diffusion in neutron irrad. Cs halides 8=39970
diffusion in UO_2, UC and U doped CaF_2 8=34107
discharge, h. f. induction stationary, temp. 8=29900
discharge, ~ mTorrs, charge range suitable for Langmuir probe 8=30104
electron-atom scattering, mobility mx. 8=43229
equation of state 8=39193
flash tube with delay line 8=42209
gas prop. scintill. counters 8=46878
high pressure lamps, spectral energy distrib. meas. 8=47510
in inclusions of Fe meteorites, conc. and isotopic comp. rel. to age 8=50436

Xenon—contd
- ionic, ground state, alignment by e impact ionization 8=39052
- isotopic shifts of 13 i.r. laser lines, meas. 8=25367
- laser discharges, time varying, perturbations of microwave cavity fields 8=24294
- laser, isotope shifts on i.r. lines, obs. 8=28652
- light scattering, depolarization meas., 8=43694
- liquid and vapour, −59.0°C — 16.5°C, refractive index and Lorentz-Lorentz junction obs. 8=43809
- liquid, luminescence in electric field, induced by α-particle 8=25937
- liquid, radial distrib. and distrib. functions, X-ray atudy 8=43759
- metastable atom, electronic energy transfer to N_2 mol. 8=29847
- monatomic, attenuation cross section near resonance line 1469.6Å 8=43205
- near-critical isotherms, interferometric determ. 8=25977
- photoionization cross sections of M shell 8=29981
- plasma, damping of ion-acoustic waves 8=47876
- pulsed arc, radiative plasma, study of energy transport and balance 8=39090
- Rayleigh scatt. and atomic e.m. susceptibility 8=25375
- scintillation counter for (n, α) reactions in multilayer counter 8=46873
- shock compression rel. to conversion to metal-like state 8=43851
- solid, adsorpt. of noble gases on (100) face, Van der Waals interactions 8=39617
- solid, adsorpt. of noble gases on (111) face, Van der Waals interactions 8=39618
- solid and liquid, charge transport 8=26943
- solid, band struct., deformation pots and effective masses 8=44646
- solid, model potentials 8=35389
- solid, pair pot. calc. 8=30615
- specific heat near critical point 8=34977
- spectral line excitation by electron-atom collisions 8=34165
- thermal cond., Langmuir calc. for incandescent lamps 8=42210
- in thermionic converter, effect on V-I characts 8=28481
- in thermionic diode, V-I characts on exposure to nuclear rad. 8=28485
- in tobacco mosaic virus, binding 8=25974
- viscosity, low-temp. 8=39237
- Ag thermal desorption obs. 8=48483
- Au thermal desorption obs. 8=48483
- CO_2 laser plasmas, influence of Xe 8=33181
- Cd-Xe atom collision cross section calc. 8=34180
- Cu crystal bombard., thermal desorption obs. 8=48482
- Cu thermal desorption obs. 8=48483
- $Xe^{129,131}$ n.m.r., local mag. field shift, obs. and theory 8=39226
- Xe^{133} diff. in metals, rel. to mech. props. 8=48766
- $Xe^{134,136}$ abundance ratio, mass spectrometer meas. 8=47452
- Xe-methane mixtures, charge exchange 8=47792
- Xe pulse discharge in presence of Zn, spectrum, 240-300 nm 8=34292
- Xe_2, photo-attenuation cross section, 1050-1550Å 8=43206
- Xe−CO_2, mixtures, thermal diffusion 8=34679
- Xe-He laser, c.w. with diffuse mirror non-reson. feedback, freq. characts., 3.50μ 8=37592
- in Zn presence, pulse discharge spectrum, 240-300 nm 8=34292
- Zn 3075.9Å, perturbation of resonance line 8=47512

Xenon compounds
- chlorides, Xe^{129} Mossbauer studies 8=30645
- H_2Xe, bound states, i.r. absorpt. 8=25472
- XeF_2, vapour press. and m.p. 8=39492
- XeF_4, semiempirical MO energy levels 8=25524
- XeF_4, vapour press. and m.p. 8=39492
- XeF_6, molec. struct. from gas-phase electron diffr. 8=34290-1
- XeF_6, struct. and inversion, electron diffr. 8=25523
- XeO_4, root-mean-square amplitudes 8=34289
- $XeOF_4$, microwave spectrum molec. consts. 8=43339

Xerography. See Photography.

Y-particles. See Hyperons/resonances.

Yield. See Elastic limit; Plastic deformation; Plastic flow.

Young's modulus. See Elastic constants.

Ytterbium
- ion in silicate glass, stimulated emission 8=36512
- magnetoresistance, Fermi surface 8=40744
- monochalcogenides, high pressure phase transformations 8=26070
- paramagnetic susceptibility from mag. moment meas. at 4.2 ~ 300°K 8=31706
- spectrochem. and nephelauxetic parameters 8=43927
- CaF_2:Yb^{3+}, ENDOR meas. rel. to crystal field splitting of Yb^{3+} in cubic sites 8=27501
- YbII, $4f^{13}5d^2$ configuration 8=34155
- Yb II, spectra and Zeeman effect obs., energy levels calc. 8=47511

Ytterbium—contd
- Yb^{3+}, spin lattice relaxation in CeO_2 8=36222
- Yb^{3+} in CaF_2, transferred hyperfine interactions, F^{19} ENDOR obs. 8=36266
- Yb^{3+} in $CaWO_4$, microwave-optical double reson. 8=41070
- Yb^{3+} in ThO_2, g-factor stress dependence 8=31510

Ytterbium compounds
- Yb-Hg system, phase diag. 8=30706
- Yb−Zn system, phase diagram from thermal, X-ray, metallographic and resistivity data 8=44015
- YbAl garnet, n.m.r. of Al^{27}, quadrupole splitting and paramag. shifts 8=31893
- YbC_2, vaporization 8=43920
- $Yb(ReO_4)_3$ crystal struct., high-temp. modification, X-ray obs. 8=30914
- Yb_3S_4, unit cell and cryst. structure 8=26449

Yttrium
- electronic structure from positron annihilation studies 8=26906
- electrotransfer of impurities 8=36596
- Hall effect meas. 8°-320°K, mag. fields to 7.8kOe 8=44690
- Hall effect, temp. depend. 8=26975
- lattice constants meas., 77-300°K, by X-ray diffr. 8=39935
- secondary e emission coeff. and energy spectrum obs. 8=40716
- solar abundance 8=50441
- in solar chromosphere, lower, Y^+ emission regions 8=45914
- in steels, stainless, austenitic and ferritic, effect on oxidation in CO_2 8=27704
- structural study 8=26434
- Y III spectra, principle series, transition probabilities in doublets 8=47506
- Y^{3+} in Y cpds., K-absorpt. edge 8=41151
- Y^{3+}-stabilized CO_3^{3-} mol.-ion, e.s.r. in calcite 8=49620

Yttrium compounds
- garnet, dispersion of magnetoelastic waves 8=40186
- garnets, magnetoacoustic resonance in 3-cm wavelength range, obs. using transverse pumping 8=35419
- garnets, Si-substituted, permeability and coercive force, spectral dependence 8=40845
- garnets, synthetic, high-pressure decomp. 8=26087
- K-absorption edge 8=41151
- manganites, ferroelectric props., magnetic structure 8=40619
- Fe garnet: Yb, ion-ion interaction via magnon field 8=40830
- Y tetrahydrate perrhenate, i.r. absorpt. obs. 8=36384
- YAg, sp. ht. 1.3-5°K, rel. to density of states at Fermi level 8=48740
- YFe garnet, e.m. conversion to exchange spin wave energy, coherent i.r. diffraction determ. 8=40848
- YFe garnet, Faraday rotation, 100°−450°K 8=32039
- YAl garnet, morphology rel. to growth on seed by flux technique 8=26198
- YAl garnet, planar defects from e.microscope exam. 8=44249
- YAl garnet:Fe^{3+}, e.p.r. and pseudo-Stark line-splitting 8=31849
- YFe garnet, Ho, giant-anisotropy ferromag. resonance linewidth, crystallographic angle and temp. dependence 8=31832
- YAl garnet:Nd laser, continuous 0.532μ solid-state source using $Ba_2NaNb_5O_{15}$ in cavity 8=33253
- YAl garnet:Nd^{3+} laser pumping efficiency of Kr and Xe flash tubes 8=46550
- in $Y_3Al_5O_{12}$, energy transfer between rare earth ions, temp. depend. 8=45138
- $Y_3Al_5O_{12}$, Faraday rotation for Er^{3+}, wavelength dependence 8=44982
- Y-C system, phase diagram 8=39569
- $Y_{3-2x}Ca_{2x}Fe_{5-x-y}V_xIn_yO_{12}$, ($x \leq 1.5, y \leq 0.5$), linewidth reduction 8=31833
- $Y_{2.1}Ca_{0.9}O_{12}$, effective mag. fields at Fe^{57} and Sn^{119} nuclei, rel. to nonmag. Sn^{4+} conc. 8=36197
- YCd_2, crystal structure and refinement 8=26448
- Y−Ce alloys, bound state, magnetoresistance at low temp. 8=49476
- Y-Ce dilute alloys, magnetic susceptibility and thermopower due to s-f anomaly 8=27384
- YCu, sp. ht. 1.3-5°K, rel. to density of states at Fermi level 8=48740
- YF_3, vapour press., enthalpies and entropies in range 1050°-1200°C 8=35015
- YFe garnet, delay of microwave signals 8=49564
- YFe garnet, demagnetization, shock-induced 8=31744
- YFe garnet, Fe^{3+} anisotropy 8=31743
- YFe garnet, freq. and amp. of spin waves in subsidiary absorpt. region 8=49563
- YFe garnet, hydrothermal and flux-grown, OH groups and Fe valence 8=35206
- YFe garnet in two-port magnetoelastic delay lines 8=40850
- Y Fe garnet, magnetic domains, X-ray topographic and optical obs. 8=45044
- YFe garnet, mag. domain-wall propag. vel., effect of Er doping 8=49565
- YFe garnets, mag. props. from Mossbauer effect, 85-600°K 8=36196
- YFe garnet, magnetoelastic pulse excitation and propag. in non-uniform field, loss meas. 8=45043

Yttrium compounds—contd
YFe garnet, magnetoelastic waves, rel. to nondispersive variable delay in two-port device 8=31745
YFe garnet microwave mixer, energy balance 8=41999
YFe garnet, microwave phonon attenuation 8=26585
YFe garnet, nonlinear ferromag. resonance, self-modulation anisotropy 8=45069
YFe garnet, para process in h.f. mag. field near Curie point 8=49566
YFe garnet polycrystals, linewidth and off-resonance loss at microwave freq. 8=31834
YFe garnet rods, axially magnetized, abs. spectra 8=36426
YFe garnet rods, axially magnetized, containing turning pt., magnetostatic mode propagation 8=40846
YFe garnet, sound wave attenuation due to magnon-phonon interaction 8=35401
Y Fe garnet, spin wave excitation time in first- and second-order nonlinear processes 8=45041
Y Fe garnet, standing-spin-wave modulation of reflected microwave power 8=40847
YFe garnets:Fe^{4+}, linewidth temp. dependence, 4.2°-300°K at 10 and 25 kMc/sec 8=31827
YFe garnet: Si, domain wall mobility 8=31746
YFe garnet:Si, ferromag. resonance temp. dependence, 4.2-400°K at 10 and 30 GHz 8=31825
YFe garnet: Tb^{3+}, FMR linewidth rel. to energy levels, wave functions and relax. times 8=31824
$Y_3Fe_{5-x}In_xO_{12}$, two-sublattice cpd., first magneto-crystalline anisotropy constant temp. dependence 8=45042
$Y_3Fe_5O_{12}$, ferromag. res., effects of defects from U^{235} fission fragments 8=36225
$Y_3Fe_5O_{12}$, n-scattering by parametrically excited spin-waves 8=36094
YGa garnet:Eu, electronic Raman transitions 8=27612
YGa garnet: Eu^{3+}, mag. susceptibilities 8=49468
YGa garnet: Nd, crysts. growth and laser oscills., obs. 8=39694
YGa garnet:Nd, electronic Raman transitions 8=27612
in $Y_3Ga_5O_{12}$, energy transfer between rare earth ions, temp. depend. 8=45138
YGdAl garnet:Nd^{3+} growth and laser characts. 8=39692
$YH_{1.96}$, n.m.r. absorpt. spectrum, temp. effects 8=31925
Y_6Mn_{23}, ferrimag. coupling, polarized n obs. 8=40849
$Y_y(Mn_xFe_{1-x})_z$, (y = 1, 6: z = 2.23), magnetisation and susceptibility 8=31710
$YMnO_3$, antiferromag. and ferroelec. props. 8=27285
$YNbO_4$: Nd^{3+} luminescence obs. 8=36515
Y_2O_3, determ. of trace amounts of rare-earth impurities 8=27794
Y_2O_3, optical consts in spectral region 0.25 to 9.6μ 8=49762
Y_2O_3, retention of additives 8=39693
Y_2O_3, spectral reflectance 8=41128
Y_2O_3:Ln^{3+}, (Ln = Pr, Nd, Eu, Er, Tm), radiative and multiphonon relax. of Ln^{3+} 8=45289
Y_2O_3: Nd^{3+} spectra, Stark splitting scheme and $^4F_{3/2}$ lifetime, 4.2-293°K 8=32017
Y_2O_3: R^{3+}, (R = rare earths), cathodoluminescence 8=49814
91Y_2O_3 + 9ThO_2 in solid solution, elastic moduli, temp. depend. from 25° to 1100°C 8=35724
Y-Sn alloys, Mössbauer effect 8=35043
$YTaO_4$, M^1 phase structure, bond angle correction 8=26447
$YTaO_4$: Nd^{3+} luminescence obs. 8=36515
YVO_4, high temp. absorpt. and brightness under 3650 Å excitation 8=45229
YVO_4, i.r. spectral emittance and opt. props. 8=32038
YVO_4, lattice vibrations rel. to Raman and i.r. spectra 8=36424
YVO_4 tetragonal crystals containing Nd^{3+}, induced emission at 300°K 8=33229
YVO_4:Eu, high temp. absorpt. and brightness under 3650 Å excitation 8=45229
YVO_4: Eu^{3+}, absorpt. and fluorcoc., $(4f)^6$ level splittings rel. to cryst. field, obs. 8=41152
Yukawa potential. See Field theory, quantum/meson field; Nuclear forces; Scattering.

Zeeman effect
actinide complexes, octahedral, free and in crystals, vibronic level splitting 8=43964
alkali atoms, meas. of elec. dipole moment 8=29614
anthracene singlet-triplet transitions rel. to spin-orbit coupling 8=25536
asymmetric rotors, quadratic effect 8=47555
benzophenone singlet-triplet transitions rel. to spin-orbit coupling 8=25536
1,4-dibromonaphthalene, electronic Zeeman meas. 8=27629
hexabromobenzene singlet-triplet transitions rel. to spin-orbit coupling 8=25536
lanthanide complexes, octahedral, free and in crystals, vibronic level splitting 8=43964
level-crossing meas., effects of uneven population distrib. among sublevels 8=25342
luminescence centres, inorganic, rel. to emission, meas. 8=41178

Zeeman effect—contd
phenazine singlet-triplet transitions rel. to spin-orbit coupling 8=25536
plasma transient shifts, Fizeau interferometer meas. 8=30088
porphyrins 8=43387
rare-earth ions in cryst. field with C_{3h} symmetry 8=36357
tribromobenzene single-triplet transitions rel. to spin-orbit coupling 8=25536
Al_2O_3:V^{3+}, rel. to Jahn-Teller effect in $^3T_{2g}$ state 8=4396
CS, from millimeter inferometry 8=38814
CaF_2 with Ce impurity, Zeeman relax. 8=45119
CaF_2:Eu^{2+}, rel. to emission spectra 8=45177
CuCl, 4.2°K 8=36351
Er^{3+} in ethylsulphate crysts. 8=36357
Er ferrite garnet, temp. dependence, 4.2-20.4 °K 8=36185
Er 1, 3000-5000Å in 26 kOe field, obs. 8=29637
H, for large quantum no.s and freqs. 5-20 MHz 8=47501
H maser freq. shifts, due to coherently excited $\Delta m_F = \pm 1$ transitions between F = 1 levels of ground state 8=25350
HeI, combined Zeeman and Stark effects 8=38653
Hg, decay constant of metastable 6^3P_2 state, investigated by pulse technique 8=34142
Ho ehtylsulphate, $^5I_8 \rightarrow {}^3K_8$ and $^5G_8$ transitions 8=49777
K, magnetically oriented 4^2p atoms, collisional depolarization 8=47520
KBr:In, A absorption bands 8=45200
KCl:In, A absorption bands 8=45200
KI:In, A absorption bands 8=45200
$LaCl_3$:Ce^{3+}, i.r., at 77 and 27°K 8=36383
$Mn_3Cl_2(NO_3)_{12}\cdot 24H_2O$, blue lines splitting, theory and obs. 8=41117
NO molecule, and Stark effect, combined 8=25498
Na-D_1-line, profile and equivalent width as function of temp. and mag. induction 8=25361
Ne, for large quantum no.s and freqs. 5-20 MHz 8=47501
O, for large quantum no.s and freqs. 5-20 MHz 8=47501
OD, (0, 0) band 8=38848
PbI, and intensity anomalies 8=34148
Yb II, spectra and Zeeman effect obs., energy levels calc. 8=47511
Zener diodes. See Semiconducting devices/diodes.
Zener effect. See Metals; Semiconducting materials; Semiconductors.
Zeta-potential. See Electrokinetic effects.
Zinc
adsorption of Kr, effect of chemisorbed O_2 8=48500
in α-brass, rel. to activation energy of vacancy formation 8=48808
anodic behaviour in KOH solns., 8=45385
atomic displacements, mean square, thermal variations rel. to Debye temp. evaluation 8=44395
atomic spectrum obs. in discharge tube with high voltage pulses 8=29630
bicrystals, grain boundary sliding anisotropy rel. to dislocation climb-glide mechanism 8=31106
clustering in Al-Zn 10% alloy, assisted by defects 8=48802
compressive internal stress during electrodeposition, role of hydrogen 8=31167
conducting film formation using electron beam 8=39603
corrosion in NaCl, transient charge fluctuations obs. 8=45368
crystal growth forms, microscopic obs. 8=48562
crystals, dislocation motion, velocity shear-stress dependence 8=26695
crystals, melt-grown, substructure dependence on impurities 8=26268
crystals, single, {0001} plane decoration with metal chlorides 8=48520
diffusion in Cu crystals and whiskers, mechanism 8=35487
diffusion in Cu, rel. to Cu weight increase, effects of thickness and orientation 8=35485
diffusion in GaAs 8=39974
diffusion in GaAs 8=48774
diffusion in GaAs, roles of phase diagram, diffusion and solubility anals. rel. to sources 8=44390
diffusion in n-GaAs with high donor conc., at 900°C 8=31006
dislocation density and rate effects in twinning 8=26189
dislocations, basal mobility and internal stress effects 8=44456
edge dislocations in basal slip system, vels. rel. to applied shear stress 8=44457
electrodes, adsorpt. of org. materials, pot. vars. 8=36601
electrodes, measured conductance rel. to measured capacitance and Faradaic current 8=49929
films, cold-rolled, from Hall effect and magnetoresistance anisotropy obs. 8=30810
hexagonal, quasidipoles in basal plane 8=48862
impurity in Al, Al^{27} zero field resonances 8=49631
ions, electrochem. in fused $AlCl_3$-NaCl-KCl 8=49917
ions Zn^{++}, polarographic investigation in $LiNO_3$-$NaNO_3$-KNO_3 melt 8=45414
liquid, structure factor 8=48062
magneto resistance and quantum oscs anisotropy at low temp. press-depend. 8=24034
magnetothermal oscillations 8=49477

Zinc—contd
- multiple diffusions, effect on threshold and c.w. output power of GaAs laser 8=46615
- plastic deformation on alternating torsion, macro-localization characteristics 8=35726
- plastic deform. of macrocrysts., grain boundary props., EPMA-Kossel obs. 8=30856
- preferred orientation during recrystallization 8=35213
- radioactive, electrochem. props. 8=36594
- reflectance meas., basal-plane vacuum u.v. 8=45233
- sheet, crystallographic anal. of plastic anisotropy 8=35721
- sheet, plastic anisotropy and plastic flow of circular diaphragm 8=35720
- spectral line breadth with Na as impurity in arc discharge 8=34437
- stacking faults on prism planes of first kind, obs. 8=44466
- stress state required for pyramidal dislocation movement 8=40045
- sputtering by 1- to 5 keV Ar$^+$, rel. to orientation dependence 8=40076
- twinned crystals, internal friction peak at 265°K due to stress relax. at twin boundaries 8=35727
- twinning and slip by indentation at 5 kg loads 8=31056
- vacancy dislocation loops, multilayer 8=40002
- zone-refined, solute-induced hardening near grain boundaries 8=26842
- K-absorption edge in Zn-Al alloys, fine structure investigation 8=41155
- Zn 3075.9 Å, resonance line perturbed by He, A, Ne, Kr and Xe 8=47512
- Zn II, IV, spark spectrum extension 8=34156
- Zn III spark spectra and energy levels 8=38682
- Zn^{65} drop extraction, between liq. metals and fused salts 8=27725
- Zn-Ar plasma, in local thermodynamic equilib., 4000 to 50 000°K, composition 8=47809

Zinc compounds
- chalcogenide films, mono- and multilayer, epitaxially grown structure 8=26115
- chalcogenides, hexagonal or cubic phases formation rel. to stoichiometry effects 8=44082
- chalcogenides, synthesis and growth in Ga and In melts 8=48563
- electroluminescence of polycrystalline ZnTe 8=32064
- phonon-assisted free exciton recombination 8=44760
- specific heat and enthalpies of change of phase; meas. 8=46286
- u.v. radiation dosimetry by use of pyroelectric properties 8=46924
- wurtzite, dielec. model for electronegativity 8=27251
- zincblende, dielec. model for electronegativity 8=27251
- zinkite, hydrothermal crystallization kinetics 8=26230
- Zn complex, bis(acetylacetonato)zinc(II), crystal and mol. structure 8=39824
- Zn complex, di-thiourea-zinc acetate, crystal structure 8=26451
- Zn complex tris(thiourea) zinc (II) sulphate, crystal and mol. structure 8=39825
- Zn complex, zinc-N-N-diethyldithiocarbamate 8=26368
- Zn halide complex with azines, prep. and infra-red study 8=36432
- Zn in liq. Zn-Au, thermodyn. props. by e.m.f. meas. 8=25906
- Zn molybdate hydrates, non-stoichiometric, structures for two phases, and vacancies 8=30916
- Zn(II) di-n-alkylphosphinates, single crystal studies and polymeric structures 8=30797
- Zn(II) oxalate complexes, conc. solns, raman spectra rel. to co-ord. and coupling 8=43843
- Zn-Al alloys, fine structure of Zn K-absorpt. edge 8=41155
- Zn-Al alloys, flow stress-strain rate behaviour rel. to structure 8=40187
- Zn-Al, superplastic alloy, microstructure 8=30872
- Zn-Al-n-Si:P alloyed diode, hole capture by Zn^{2-} in Si, effective cross section 8=40520
- $ZnAl_2O_4:Cr^{3+}$, optical spectra 8=49715
- $ZnBr_2$ molten, external transport numbers 8=34791
- Zn-Cd-Ag-Cu system, univarient equilibria formation by decomposition 8=30675
- (Zn, Cd)O, luminescence 8=45292
- $Zn_xCd_{1-x}S$ graded-band-gap crystals, growth and elec. props. 8=39696
- (Zn, Cd)(S, Se): Cu phosphors, photo- and electroluminesc., obs. 8=45293
- $Zn_{0.1}Cd_{0.9}Sb$ solid solution crystals, thermoelectric power anisotropy 8=27311
- Zn-CN-NH_3 complex in aqueous soln, raman spectra rel. to mixed ligands 8=43842
- $ZnCl_2$-diethylether coordination compound, i.r. spectrum 8=25569
- $ZnCl_2$ molten, self-diffusion 8=34815
- $ZnCr_2O_4$, spin-structure determ. from magnetization and resonance 8=31731
- $ZnCr_2S(Se)_4$ insulating spiral, antiferromag. resonance freq. and temp. dependence 8=31831
- $ZnCr_2Se_4$, distant-neighbour interaction analysis 8=31596
- $ZnCr_2Se_4$, spin magnetism 8=36136

Zinc compounds—contd
- ZnF_2 phase transforms, and lattice params., ≤130 kbar, 25 and 300°C 8=39570
- $Zn_xHg_{1\ x}Te$, growth from soln., with temp. distrib. adjustment 8=44147
- $Zn_xHg_{1-x}Te$ solid soln. crystal growth and structure 8=26269
- $Zn_xHg_{1-x}Te$ solid solutions, fundamental reflectivity spectrum 8=45232
- $Zn_xHg_{1-x}Te$ solid solutions, thermal cond. 8=44372
- ZnI series, intercombinational transition probabilities 8=38711
- $(Zn_{0.65}Mg_{0.35})_2SiO_4$, high-temp. mech. props. 8=35725
- Zn-Mn ferrites, permeabilities rel. to micro- and chemical structures 8=27431
- Zn-Mn ferrite, sintering conditions effect on mag. props. 8=27432
- $ZnNi_xMn_{2-x}O_4$, elec. and mag. props. 8=40745
- ZnO, acousto-electrically excited, transmission of 35 GHz microwaves 8=42011
- ZnO, Brillouin scattering from shear waves in crysts. under high elec. fields 8=44325
- ZnO, chemisorption of O_2, effect of d.c. electric field 8=49905
- ZnO, chemisorption states of oxygen 8=32118
- ZnO crystal, photocurrent sensitization, electrochem. obs. 8=49425
- ZnO crystal, recomb. radiation of bound excitons, 4.2°–90°K 8=31301
- ZnO crystals, e multiplication and surface charge 8=49354
- n-ZnO, current flow on dissolution in acid, 8=49918
- ZnO, edge luminescence, exciton contribution 8=27660
- ZnO, e.s.r. effects of additives 8=36254
- ZnO, e.s.r. of adsorbed NO_2 8=48499
- ZnO film on delay, efficiency as acoustic transducer 8=23956
- ZnO films, polycrystalline dye-sensitized, thermally stimulated conductivity 8=35994
- ZnO, hydrothermally crystallized, effect of Li on facet effect and dendritic growth 8=26201
- ZnO, intrinsic photo effect by dyes, spectral sensibilization, mechanism 8=36428
- ZnO laser, electron pumped, far field patterns 8=33202
- ZnO lattice, crystal field changes by collective distortion rel. to Cu_2^+ ions 8=48311
- ZnO, lattice thermal expansion, 27-619°C, X-ray meas. 8=39934
- ZnO, low dispersion layer, optical props. 8=36429
- ZnO, luminescence 8=45292
- ZnO luminophor, pulse-excited, decay rel. to temp. 8=45290
- ZnO, photoconductivity dependence on water vapour conc. in ambient gas 8=27334
- ZnO, piezoelectric, appl. to microwave mixing 8=49382
- ZnO, polar crystals, model for thermal eqn. of state 8=30630
- ZnO powder, thermoluminescence 8=32065
- ZnO, refractive index 8=49763
- ZnO, refractive index meas., room to liq. He temps. 8=41154
- ZnO, shallow donor ground states 8=31278
- ZnO single crysts., electroluminesc. 8=32059
- ZnO, solubility in KOH and electrolytes elec. cond. and vapour press., 10-145°C 8=45373
- ZnO, spectral reflectance 8=41128
- ZnO, stress induced splitting of exciton lines 8=26920
- ZnO, u.v. luminescent spectrum, 4.2°-77°K 8=41216
- ZnO, valence band symmetry and deform. potentials 8=35782
- ZnO, vapour-phase grown, in ultrasonic amplifier 8=26586
- ZnO, Voigt-Reuss-Hill approx. rel. to meas. of elastic moduli 8=40188
- ZnO, wurtzite-type crysts., optically active lattice vibrs. 8=35394
- $ZnO:Co^{2+}$, optical absorpt. and photocond. 8=36029
- ZnO-Cu_2O heterojunctions, electroluminescence 8=36516
- ZnO, Cu^{2+}, molecular orbital theory 8=43969
- $ZnO:Fe^{3+}$, Mn^{2+}, cubic field parameter by e.s.r. investigations 8=45104
- ZnO:Ga scintillation due to α, obs. 8=37789
- ZnO: Li, high-resistivity, electronic drift mobilities and SCL currents 8=40588
- ZnO-TiO_2-SiO_2 systems, glass formation 8=44079
- $ZnRh_2O_4$, single crystals, growth from PbO flux 8=39695
- ZnS: Cl luminophor, pulse-excited, decay rel. to temp. 8=45290
- ZnS activated with Group IVB elements, e.p.r. investigation of luminescence 8=49815
- ZnS blende, second order Raman spectra 8=36427
- ZnS, coherent fluorescence for excitation by 2 photon absorption 8=32063
- ZnS, colour centres, accumulation during bombardment with fast neutrons 8=31125
- ZnS, energy bands, spin-orbit splittings 8=44826
- ZnS luminophors, preparation, effect of halide addition 8=49819
- ZnS, photodepolarization currents, shallow capture levels rel. to kinetics 8=27332

Zinc compounds—contd
- ZnS, thermal expansion anisotropy 8=44351
- ZnSAg monocrystal, luminesc. rel. to e.s.r. 8=36523
- ZnS(Ag) and Li^6F registration of slow neutrons for luminphor 8=47153
- ZnS:Al(Ga), luminescence, self-activated, polarization 8=32067
- ZnS:Cu^{2+}, molecular theory 8=43969
- $Zn(SCN)_2$, Pb^{2+} or Sn^{2+} activated, luminesc. 8=36520
- Zn(S:Se):Mn phosphors, emission and excitation spectra 8=45235
- Zn(S: Se) phosphors, activator free luminescence 8=36517
- ZnSe, absorption, photo-induced i.r. 8=41153
- ZnSe, codoped, of Er^{3+} 8=30646
- ZnSe, codoped, Zeeman effect of Er^{3+} 8=30646
- ZnSe, energy bands, spin-orbit splittings 8=44826
- ZnSe epitaxial layers on p-Ge, growth and elec. characts. 8=44834
- ZnSe, intrinsic oscillations in photoconductivity 8=27333
- ZnSe, i.r. lattice vibrations 8=49764
- ZnSe, photoelectronic props. in p-type-Cu-activated and n-type-self-activated 8=45296
- ZnSe, photoluminescent props. of activated emissions 8=49816
- ZnSe, semiconducting, growth and morphology 8=48561
- ZnSe-type phosphors, electroluminescent props. 8=49820
- ZnSe:Co^{2+}, Co^{2+} absorpt. and emission rel. to ion centre levels, 3500 cm^{-1} 8=27613
- p-ZnSe: Cu, radiative pair transitions 8=45294
- ZnSe(Cu, I, Cl) sublimated layers, electroluminesc. obs 8=41211
- ZnSe:Fe^{3+}, cubic field splitting for S-state ions 8=43934
- ZnSe : Fe^{3+}, e.p.r. rel. to Fe^{3+} in cubic and axial fields 8=40949
- ZnSe: Tm^{3+} (Er^{3+})(Ho^{3+}), with Li or Cu codopants, luminescence 8=27664
- $ZnSeO_3 . 3H_2O$, crystal structure 8=26450
- $ZnSiF_6 . 6H_2O$: paramagnetic impurities, n.m.r. of F^{19}, temp. and impurity conc. dependence 8=40974
- $ZnSnAs_2$, edge absorption spectrum 8=45231
- Zn-Sn-Cd-Pb alloy, binary liq. phase occurrence 8=34786
- Zn-Sn-Cd-Pb liq. solns, thermodynamic props rel. to activity coeffs. 8=43795
- $ZnSnP_2$ platelets, prep. and props. 8=26267
- $ZnSnP_2$, radiative recombination, photoluminescence spectra 8=41213
- ZnTe, crysts. growth from melt in Zn atm., gradient freeze method 8=35253
- ZnTe, crysts. growth from soln., theory 8=35232
- ZnTe, energy bands, spin-orbit splittings 8=44826
- ZnTe, growth by temp. gradient soln. zoning 8=44148
- ZnTe, hole-traps, Ge- and Pb-associated 8=26884
- ZnTe, i.r. lattice vibrations 8=49764
- ZnTe, polycrystalline, electroluminescence 8=32064
- ZnTe, thermal expansion, 0-460°C 8=39933
- ZnTe–CdTe solid solutions, energy struct. 8=40253
- ZnTe:Fe^{3+}, cubic field splitting for S-state ions 8=43934
- ZnTe:O as scintillation counter material 8=46864
- ZnTe:Pb, impurity state, e.p.r. meas. 8=35738
- $ZnTe_{1-x}Se_x$, growth by temp. gradient soln. zoning 8=44148
- ZnTe-ZnSe alloys, p-n junction, electroluminesc. 8=36521
- Zn_2TiO_4, order-disorder transition, influence of non-stoichiometric substitutions 8=26088
- α-$Zn_3(VO_4)_2$: Ni^{2+}, optical spectra rel. to crystal field theory 8=48310
- $ZnWO_4$, octahedral symmetry, i.r. absorpt. spectra of Co^{2+} ions 8=32011
- $ZnWO_4$, pseudo-rhombic crystal struct. obs. 8=30915
- $ZnWO_4$: Cr^{3+} type crysts, paramag. res., "electronic" and "ionic" mechanisms 8=40948
- Zn_2Y, hexagonal ferrite, two-magnon ferrimag. reson. linewidth 8=36228
- ZnY($Ba_2Zn_2Fe_{12}O_{22}$, Mossbauer spectroscopy 8=36198
- Zr hydride, thermal diffusion of H 8=26627
- **zinc sulphide**
  - allotropic transformation induced by mech. pressure 8=44016
  - brittle crystals, microhardness rel. to dislocation mobility 8=26796
  - crystal growth and morphology in semiconducting mat. 8=48561
  - crystal structure when melt-grown under pressure 8=44084
  - crystals, hexagonal, stacking fault introduction rel. to photovoltaic effect changes 8=31103
  - cubic, growth from molten $PbCl_2$ 8=44149
  - drift mobilities of electrons and holes 8=40500
  - electroluminescence, influence of structure 8=41215
  - electroluminescence in sublimated layers 8=32061
  - electroluminescence rad., reabsorpt. and form. of stimulated state 8=32062
  - electroluminescent semicond. resistor props. 8=27145
  - epitaxial growth on Si, by vac. evaporation 8=30740
  - exciton complexes spectrum 8=36430
  - exciton spectrum rel. to stacking fault probability rel. to exciton spectrum 8=49766
  - film, epitaxial growth on CdS and ZnS platelets, dislocations and cryst. orientation 8=35165
  - impurity ion diffusion mechanism 8=26626

Zinc compounds—contd
- **zinc sulphide**—contd
  - lanthanide impurity doped, crystal field effects rel. to structures 8=26646
  - lattice luminesc. props. 8=36522
  - luminescence excitation at low temp. 8=27661
  - particle size and morphology, effect of precipitating conditions 8=48565
  - platelets, growth, structural properties 8=40034
  - phosphor, trace metal determ. by n. activation 8=50001
  - phosphors, green-Cu luminescence band, temp. shift 8=32068
  - photoconductivity, microwave meas. 8=49426
  - polytypism as high-order transformation 8=44012
  - powders, a.c. electroluminesc 8=36521
  - Raman spectra of wurtzite- and zinc-blende-types 8=45234
  - refractive index 8=49763
  - silicates activated by Mn, Cr, Hf and rare-earth's elements, luminescence props. 8=41219
  - slip, periodic processes rel. to polytype formation 8=44461
  - with stacking faults, one dimensional, internal optical reflection 8=45230
  - stimulated cond. and electroluminesc. of sublimated layers 8=32060
  - thermoluminescence correl. with thermally stimulated elec. cond. 8=49817
  - twist boudaries, effect on electroluminescence 8=41214
  - würtzite classification 8=35209
  - wurtzite, electro-optical effect 8=36431
  - Cu-activated luminophor, two-band emission 8=45307
  - ZnS phosphor, electroluminescence enhancement using
  - ZnS(Ag) based crystals, scintillation output rel. to α-radiation of surface 8=27662
  - ZnS: Ag, Ga, donor-acceptor pairs, photoconductivity, optical and photoescited e. s. r. spectra 8=40677
  - ZnS_x-CdS_{1-x} mixed crysts, luminesc. 8=41212
  - ZnS/CdS mixture, e. p. r. of Mn^{2+} exchange-coupled pairs 8=45105
  - (ZnS-CdS):Co^{2+}, Co^{2+} absorpt. and emission rel. to ion centre levels, 3500 cm^{-1} 8=27613
  - ZnS–CdSe alloy systems 8=32066
  - ZnS:Co^{2+}, Co^{2+} absorpt. and emission rel. to ion centre levels, 3500 cm^{-1} 8=27613
  - ZnS:Cu, electroluminescence rel. to Cl, Br, I co-activators effect 8=32069
  - ZnS: Cu electroluminescence spectrum dependence on heating processes 8=36519
  - ZnS; Cu phosphors freq. dependence of electro luminescence 8=41218
  - ZnS: Cu^{2+}, molecular orbital theory 8=43969
  - ZnS: Cu, Al(Ag, Al), i.r. absorpt. due to donor states 8=41156
  - ZnS: Cu, Cl, thermoluminescence and thermally stimulated dielectric effecy 8=36518
  - ZnS:Fe^{3+}, cubic field splitting for S-state ions 8=43934
  - ZnS-MgF_2 layer Fabry-Perot filters, max. transmission wavelength, H_2O vapour effects 8=28763
  - ZnS:Mn Cu phosphor sublimate, electroluminescence annealing effect 8=27663
  - ZnS : Mn, Cu, Cl films, electroluminesc. in gap and sandwich cells 8=49818
  - ZnS:Mn^{2+}, e.p.r. forbidden line obs. at $\Delta M = Z$; $\Delta m = O, \pm 1$ 8=31887
  - ZnS/ZnSe mixed-crystals, associate defects of ^6S-state ions obs. by e.s.r. 8=26636
  - ZnTe, semiconducting, growth and morphology 8=48561
  - ZnV_2O_4–LiV_2O_4 system, V–V separation, i.r. spectra, electronic props., connection 8=35739

Zirconium
- analysis of O content by He^3 irrad. 8=27818
- deformed single crystals, texture formation by twinning 8=44091
- diffusion of V, coeffs. 8=35475
- corrosion behaviour rel. to internal stresses and deformation 8=26852
- corrosion breakaway region, inelastic behaviour of metal and oxide 8=36576
- films, oxidised 300-500°C, structure obs. by e. microscope 8=35186
- HR1105 star, isotope ratios 8=28069
- monoclinic, stereographic projection 8=35214
- oxidation rate-constant determ., low-temp., from discontinuous film resistance changes 8=49883
- oxidation, thin noble metal film effects 8=49882
- oxygen diffusion study using $O^{16}(d, p)O^{17}$ reaction 8=31017
- paramagnetic susceptibility anisotropy temp. dependence 8=40755
- polycrystalline, optical consts. from reflectance ratios 8=45164
- polycrystalline, sputtering by Ar^+ ions, mechanism 8=35606
- polycrystals, e-irradiated, low-temp. resistivity recovery 8=31158
- purification by β-phase zone displacement along bar of α-Zr 8=30825
- sputtering by 1- to 5-keV Ar^+, rel. to orientation dependence 8=40076
- stacking fault probab. of cold-worked, X-ray obs. 8=26704

Zirconium—contd
- tensile deform., effect of up to 4.2 at. % O 8=44609
- thermal expansion, 2° to 30°K 8=44349
- CaS:Zr phosphors, mag. susceptibility rel. to Zr conc. 8=44967
- in CO_2, oxidation prevention and O diffusion inhibition by Cr coating $\leq$ 650°C 8=32107
- Hf/Zr ratio, metamorphic rocks from Ontario 8=50067
- Hg boiling corrosion of steel inhibited by Zr impurity 8=47426
- in Mg–Zr alloys, rel. to fine grain effect 8=48343
- on W, adsorption and nucleation of α and β phases, obs. 8=39625
- ZrO_2, structure analysis using method of coordination no. determ. without density meas. 8=26141

Zirconium compounds
- alloys, anti-hydrogenation treatment with molten $NaNO_3$ 8=32105
- alloys, irradiation creep, yielding creep theory appl. 8=35730
- carbides, sputtering by Ar^+ ions, mechanism 8=35606
- crystal photolum., electrolum. and photovoltaic effects, 77°-600°K. obs. 8=45291
- diborides, conduction e-paraeters calc. based on single zone method 8=35830
- with Laves structure, magnetism and crystal structure 8=31711
- luminophor emission spectra 8=45295
- Zircalloy-4, irrad.-enhanced strain relax., 2.4×10^{14} nv > 1 MeV 8=35732
- Zircalloy-4, ZrH precip. habit planes, obs. 8=44098
- Zircalloy, in-reactor creep rel. to dislocation climb 8=35728
- Zircalloy-2, fatigue-crack initiation 8=26854
- Zircalloy-2 pressure tubes, in-reactor creep rel. to n flux, temp. and stress, obs. 8=53733
- Zircaloy tubing, strain behaviour, effect of texture on anisotropy 8=26853
- Zircaloy-2 corrosion behaviour rel. to internal stresses and deformation 8=26852
- Zircaloy-2, corrosion in water and steam, effect of surface prep. and fluorine contamination 8=45352
- Zircaloy-2 oxidation in O and H_2O vapour, kinetics and mechanism, , 350–500°C 8=32106
- Zircaloy-2, oxidation in water, 200°-300°C, obs. 8=27726
- Zircaloy-2, white spotting in oxide films rel. to struct. and orientation 8=35187
- Zircalloy-2, ZrH precip. habit planes, obs. 8=44098
- Zr^{95} as fission product in coated fuel particles, determination 8=47404
- Zr alloys, in-reactor creep rel. to dislocation climb 8=35728
- Zr phosphate membranes for intermed. temp. fuel cells 8=46354
- Zr, sample porous material for fracture tests 8=48974
- Zr–Cu alloys, oxygen diffusion study using $O^{16}(d, p)O^{17}$ reaction 8=31017
- $Zr_{1-x}Gd_xZn_2$, mag. props. and NMR rel. to localized mag. moments effect in $ZrZn_2$ 8=36180
- Zr–Hf alloy, sp. ht. 1.1–4.2°K 8=35437
- Zr-Nb alloys, critical current density rel. to dispersed precips. 8=35857
- Zr-2.5 wt.%Nb pressure tubes, in-reactor creep rel. to n flux, temp. and stress, obs. 8=35733
- Zr-2.5 wt.%Nb–0.5 wt.%Cu, irrad.-enhanced strain relax., 2.4×10^{14} nv > 1 MeV 8=35732
- Zr-2.7 w/o Nb oxide film, structure and morphology exam., 300-500°C 8=44064
- Zr–O solid solution, interstitial, ordered arrangement of O 8=35289
- Zr-O solid solns., microprobe and e microscope obs. 8=30658
- Zr–Sc alloy, sp. ht. 1.1–4.2°K 8=35437
- Zr–Ti alloys, sp. ht., 1.1–4.2°K rel. to superconducting transition temp. 8=35437
- ZrB_2, struct. and orientation of second phase precipitates 8=35136
- $ZrBi_2$, atomic structure rel. to quasi-homologs 8=33560

Zirconium compounds—contd
- $ZrC_{0.56}$, diffusion coeff. temp. dependence 8=31018
- ZrC, oxidation 1130-2160°K 8=45351
- ZrC, thermoelec. power and elec. conductivity, 20-2000°C 8=27310
- ZrC in Cs vapour, e- and ion-emission rel. to other refractory metal cpds 8=27350
- $ZrC_{0.32}H_{1.2}$, n.m.r. absorpt. spectrum, temp. efects 8=31925
- $ZrCl_4$ and $HfCl_4$ vapours, thermal diffusion constant 8=34676
- $ZrCl_4$, vibrational spectra 8=32040
- $Zr_4Co_4Ge_7$, crystal structure 8=48682
- $(ZrCo_2)_x(ZrFe_2)_{1-x}$ alloys, hyperfine field distrib. from Mossbauer spectra 8=31712
- ZrH_2, central force lattice dynamical model 8=39879
- $ZrH_{1.9}$, n.m.r. absorpt. spectrum, temp. efects 8=31925
- ZrH_2, positron lifetime 8=40286
- $(Zr_{1-x}Hf_x)Zn_2$ system, ferromagnetism 8=40831
- $Zr_{1-x}M_xZn_2$, where M = Ti, Y, Nb or Hf, magnetic props. 8=49546
- ZrN, diffusion of N_2, film-thickness determ. 8=44396
- $ZrN_{0.47}H_{0.98}$ n.m.r. absorpt. spectrum, temp. effects 8=31925
- $Zr(NO_3)_4$, vibrational spectra 8=32040
- ZrO_2, $\alpha \rightarrow \beta$ phase transform., temp. and impurity cation effects 8=26089
- ZrO_2 effect on corundum recrystallization 8=48536
- ZrO_2, films, gamma, neutron and neon damage 8=35607
- ZrO_2, grain growth and phase transition 8=48357
- ZrO_2, hemispherical spectral emittance 8=35466
- ZrO_2, hydrated amorphous, nature and thermal behaviour 8=43982
- ZrO_2, monoclinic, O self-diffusion coeffs. 8=35514
- ZrO_2, permittivity, effective and intrinsic 8=40589
- $(ZrO_2)_{0.85}(CaO)_{0.15}$ electrolytic thermocell, Seebeck coeff. 8=45392
- ZrO_2:Ce, baddeleyite, impurity positions 8=30917
- $ZrOCl_2.8H_2O$, heat treatment, ZrO_2 grain growth and phase transition 8=48357
- $Zr(OH)_4$, heat treatment, ZrO_2 grain growth and phase transition 8=48357
- $ZrSb_2$, atomic structure rel. to quasi-homologs 8=35360
- Zr_2Se, crystal structure and refinement, rel. to isostructures 8=26452
- $ZrSiO_4$, Pb, U and Th traces, e microprobe meas. 8=27811
- $ZrZn_2$, ferromagnetism, very weak itinerant 8=31547
- ZrW_2O_8, linear thermal expansion 8=35448

Zodiacal light
- brightness and polarization, and interplanetary dist. 8=45856
- dust cloud, cosmic light search 8=50272
- geocentric contribution, evidence against 8=37039
- polarization, negative, search 8=32567
- regions in quadrature to Sun, photometry 8=45855
- spectrometry, press. scanned Fabry-Perot 8=32568
- H_β profile in spectrum, meas. absorpt. and emission lines 8=41353

Zonal heating. See Atmosphere/thermodynamics.

Zone melting and refining
- advances 8=39653
- in alkali-halide crystals growing with high-purity 8=39665
- floating-zone, induction-heated, control system 8=45937
- Al, impurities behaviour, effect of third component 8=35235
- Fe, purification by γ-phase zone displacement along α-Fe bar 8=30825
- in KCl crystal growing with 10^{-9} mol/mol purity 8=39665
- in NaCl crystal growing with 4×10^{-6} mol/mol purity 8=39665
- Ni, high-purity prep., by e. beam float zone melting 8=48553
- Ta crystals, growth conditions rel. to orientation, purity and structural perfection 8=35231
- Zr, purification by β-phase zone displacement along α-Zr bar 8=30825

Zone plates. See Diffraction/light.

Zoology
- bottlenose dolphin, sonic burst count matching 8=37258

Great activity in silicon-iron

Intense research activity into silicon-iron is brought to light in this new IEE publication which reviews the whole ambit of magnetic materials and their applications throughout the world.

The book contains 53 papers, presented at a conference held in London in September 1967 and sponsored by the IEE, IPPS and IEEE, which are grouped as follows:

Orientation and domain structure
Measurements on silicon-iron
Permanent magnets
Magnetostriction in silicon-iron
Transformer noise
Losses in silicon-iron
Nickel-iron and aluminium-iron
Garnets and ferrites
Microwave properties of ferrites
Thin films.

IEE Conference Publication 33: Magnetic materials and their applications.

266 pp. photolitho. A4. soft covers. 1967.

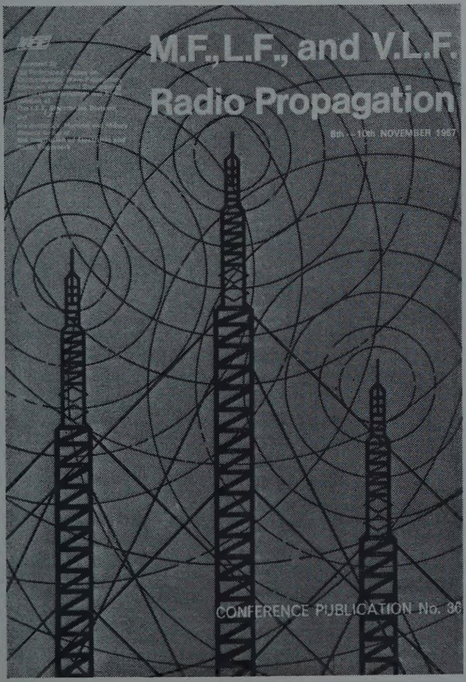
Price £3 15s. (members £2 10s. if ordered through sponsoring society)

Orders, with remittances, should be sent to:
Publications Department, IEE, Savoy Place, London WC2

MAGNETIC MATERIALS AND THEIR APPLICATIONS
26th–28th SEPTEMBER 1967
CONFERENCE PUBLICATION No. 33
IEE

Magnetic materials and their applications

LONG RADIO WAVES



IEE
M.F., L.F., and V.L.F. Radio Propagation
8th–10th NOVEMBER 1967
CONFERENCE PUBLICATION No. 36

The future of long-range aviation depends on artificial satellites. For the present, however, reliance must be placed on radio-navigational aids based on those radio waves in the m.f., l.f. and v.l.f. bands which are well known to propagate over long distances. Propagation of these waves has many technical applications as well as being of interest to the pure scientist studying the ionosphere.
This new book contains 43 papers, presented at a conference held in London in November 1967 and sponsored by the IEE and the IERE, which are grouped as follows:

The ionosphere
Waveguide mode and ray theories
Terrestrial propagation over great distances
Atmospherics
Magnetosphere
Subsurface propagation.

IEE Conference Publication 36: 'M.F., l.f. and v.l.f. radio propagation'. 354 pp. photolitho. A4 size. soft covers. 1967. price £5 (members £3 6s. if ordered through sponsoring society)

Orders, with remittances, should be sent to:

IEE PERIODICALS 1969

Copies and information can be obtained from the

Publications Department

IEE, Savoy Place, London WC2

Proceedings IEE, published monthly, contains papers of industrial and technological interest from engineers and scientists the world over. Each issue comprises three self-contained groups of papers on Electronics; Power; and Control and Electrical Science, and these can be ordered as separate publications—*Electronics Record, Power Record, and Control & Science Record.*

Subscriptions to *Proceedings IEE:*

£21 p.a. *IEE Associates and Associate Members under 28 and IEE Students: £2 10s. Other IEE members: £5*

Separate copies of individual papers are available when they have been published in the *Proceedings. Price 2s. each.*

Electronics Record is published every two months, the papers being taken from the two previous issues of *Proceedings IEE.*

£10 p.a. *IEE Associates and Associate Members under 28 and IEE Students: 25s. Other IEE members: £2 10s.*

Power Record, quarterly, takes its material from the three preceding issues of *Proceedings IEE.*

£6 p.a. *IEE Associates and Associate Members under 28 and IEE Students: 15s. Other IEE members: 30s.*

Control & Science Record, quarterly, includes papers on control and automation and electrical science taken from the three previous issues of *Proceedings IEE.*

£6 p.a. *IEE Associates and Associate Members under 28 and IEE Students: 15s. Other IEE members: 30s.*

Electronics Letters, published fortnightly, is an international journal offering speedy dissemination of research and development results in electronics, control and allied subjects, in the form of communications up to about 1200 words in length. Publication is within two to six weeks of receipt, giving the engineer an immediate picture of the latest developments in the field.

£10 p.a. *IEE members: £3*

Electronics & Power, published monthly, is a wide-ranging magazine covering the complete field of interest of electrical, electronics, and control technology by means of articles, product reviews, correspondence, editorial comment and book reviews.

Electronics & Power: £8 p.a.

IEE members: free

IEE News is a twice-monthly tabloid newspaper for the professional electrical, electronics and control systems engineer.

IEE News: £2
IEE members: free

Students' Quarterly Journal is received free of further subscription by all IEE Students, Associates and Associate Members under the age of 30. It caters particularly for the younger member, and specialises in concise, topical articles on the latest advances in electrical, electronics and control engineering.

20s. p.a. *Senior members: 10s. p.a.*

SCIENCE ABSTRACTS PUBLICATIONS

Physics Abstracts (PA), published fortnightly, will provide 65 000 abstracts in 1969. In addition to covering the established periodical literature as in the past, PA will in 1969 give increasing coverage to the report and patent literature. Alphabetical author and subject indexes will be given twice in the year.

£80 p.a.

Electrical & Electronics Abstracts (EEA) is the comprehensive literature-retrieval service for electrical and electronics engineers. Published monthly, it will in 1969 include 34 000 abstracts and be computer typeset. The usual indexes will be provided.

£65 p.a.

Computer & Control Abstracts (CCA) begins in January 1969 as a development of **Control Abstracts,** whose coverage is being much enlarged to embrace computer science and technology, hardware, software and applications. Published monthly, it will provide 16 000 abstracts in 1969, as well as the usual indexes.

£35 p.a.

Cumulative Indexes

Physics Abstracts—subject index for the five years 1955–59 inclusive, bound in one volume, stiff covers and buckram cloth, 800 pp.

£20

Physics Abstracts—author index for the five years 1960–64 inclusive, bound in four parts, stiff covers and buckram cloth, 2300 pp.

£17 set *Members: £10 set*

Physics Abstracts—subject index for the five years 1960–64 inclusive, bound in two parts, stiff covers and buckram cloth.

£40 set

Electrical Engineering Abstracts—subject index for the five years 1955–59 inclusive, bound in one volume, stiff covers and buckram cloth, 320 pp.

£15 *Members: £9*

Electrical Engineering Abstracts—author index for the five years 1960–64 inclusive, bound in two volumes, stiff covers and buckram cloth, 970 pp.

£12 10s. set *Members: £7 10s. set*

Electrical Engineering Abstracts—subject index for the five years 1960–64 inclusive, bound in one volume, stiff covers and buckram cloth, 950 pp.

£20 *Members: £12*

Current Papers in Electrical & Electronics Engineering (CPE) will in 1969 be a monthly 'current awareness' publication in A4 size (210×297 mm) providing the full bibliographic reference of every abstract published in EEA. Each issue will list an average of 2800 titles and references from the world's literature on electrical and electronic engineering, including patents and reports.

£7 10s. p.a. *IEE members: £3 15s.*

Current Papers in Physics (CPP) will in 1969 be an A4-sized publication providing the full bibliographic reference of every abstract published in PA. An average of 2500 titles and references will be published in each fortnightly issue, using the same classification as in PA.

£4 p.a.

Current Papers on Computers & Control (CPC) will in 1969 provide the full bibliographic reference of every abstract published in CCA. It will be published monthly in A4 size and will be computer typeset.

£5 p.a. *IEE members: £2 10s.*
